STATE UNIVERSITIES OF FLORIDA
Limited Access Program Request
Reference: 6C-6.001 Admissions, FAC

University: Florida International University
Degree(s) offered: Bachelor of Accounting (BACC)
Program: Bachelor of Accounting
Six digit CIP code: 52.0301

1. Will the entire program be limited access or only a specific track?
   The entire program will be limited access

2. If only a track is limited access, please specify the name of the track

3. How many students will the program plan to accommodate?
   Approximately 1,400 students

4. When do you propose to initiate limited access?
   Immediately upon approval by the Board of Governors

5. What is the justification for limiting access?
   Academically or professionally qualified faculty size is inadequate to meet acceptable, benchmarked or accreditation agency student-faculty ratio standards; financial limitations and budget constraints

6. By what means will access be limited? Please provide a description of the program’s admissions requirements and procedures, and indicate how these requirements and procedures ensure equal access for Florida community college Associate of Arts degree graduates in the competition for available space in the program.
   The means will be capping the enrollment according to the following admissions policy: College admission requirements include 60 semester hours of lower level coursework or an AA degree or equivalent, satisfying University requirements for admission including its Core Curriculum requirements, GPA of 2.75, and all seven College pre-core courses completed with a minimum grade of C. Once admitted, student must pass an entrance exam. Failure to do so will preclude student from registering for any upper division course in the major.

7. Present the current race and gender profiles of the students in the program. Discuss the impact of the proposed action on the race and gender profiles. Cite sources used for discussion. What strategies, should they be necessary, will be used to promote diversity in the program.
   Student diversity in the program is currently considered extremely enriched. The proposed changes are not expected to significantly impact student admissions in terms of race or gender based on informal estimates. Currently, specific student demographic data appears in Appendix A.
8. Are the graduates of the program in high demand? If so, and if the program is to be limited due to lack of adequate resources, provide a justification for limiting access to the program rather than reallocating resources from programs with a low marked demand.

The College does not collect employment data for students who successfully complete its undergraduate programs. However, since the College will be implementing limited access (only) by increasing the admission requirements, it is expected that this initiative will increase the likelihood that student retention and graduation rates will increase resulting in similar graduation statistics as in the past. Therefore, the demand for graduates is expected to be high.
