

Answering your questions, providing expertise, solving your problems...

Florida ExpertNet

A network of applied research expertise in Florida's public universities

Resources and expertise to assist you in practical solutions for government, business, and industry.

The Florida Photonics Center of Excellence at UCF provides research in the areas of nanophotonics, biophotonics, advanced imaging and 3D displays, and ultra-high bandwidth communications.

The Center of Excellence for Regenerative Health Biotechnology at UF focuses on transforming potential products discovered in the research laboratory to medicines suitable for clinical trials.

The Center of Excellence in Biomedical and Marine Biotechnology at FAU is an academic/industry partnership working to discover new medicines from Florida's marine resources.
