

2006 LEGISLATIVE ISSUE FORM

BOG/SUS ISSUE: Tuition Flexibility

PROPOSED STATUTORY LANGUAGE: To Be Determined

1. Change Needed: Statutory Section Not Determined

HB 1001 on governance of the State University System provides that the Legislature has the authority and responsibility for setting tuition at Florida's public universities. In order to be competitive with other college and university systems across the country, the Board of Governors needs the authority to establish tuition and fees for all levels except resident undergraduate students.

At the July 21 Board of Governors meeting the following motion on tuition was adopted:
Continue the Board of Governors delegation to the University Boards of Trustees the authority to set tuition for all levels of students, except resident undergraduates.

2. Current Condition:

Tuition and fee flexibility at all levels except resident undergraduate is authorized in proviso language that expires June 30, 2006 and therefore needs to be authorized in statute. The State Universities Presidents Association will recommend statutory language to the Board of Governors. Any statutory flexibility should be consistent with the BOG policy.

3. Rationale for Change:

SUS institutions need tuition and fee flexibility to meet local and national market conditions in attracting students and in raising revenue. The statutory flexibility should be consistent with the Board of Governors' policy.

4. Fiscal Impact:

Neither Bright Futures nor the Pre-paid program will be impacted.

5. Justification for BOARD OF GOVERNOR'S Priority (if applicable):

The Board of Governors is on record (October 2004 and July 2005) delegating tuition and fee flexibility to the university boards of trustees for all but in-state undergraduate students.

6. Link to BOG Strategic Plan:

This flexibility promotes several goals of the BOG strategic plan. The universities will facilitate access because they will have the flexibility to set tuition and fees to meet market conditions while gathering the financial resources needed to deliver a high quality

education. This change will help to build world-class research universities by attracting some of the brightest young minds to our research programs. In turn, the SUS can continue to attract researchers of international repute to its campuses, in part because of the quality of our graduate students.
