

This is Florida Statutes Section 1013.03 establishing the standards for classroom utilization.

**1013.03. Functions of the department.**

The functions of the Department of Education as it pertains to educational facilities shall include, but not be limited to, the following:

(1) Establish recommended minimum and maximum square footage standards for different functions and areas and procedures for determining the gross square footage for each educational facility to be funded in whole or in part by the state, including public broadcasting stations but excluding postsecondary special purpose laboratory space. The gross square footage determination standards may be exceeded when the core facility space of an educational facility is constructed or renovated to accommodate the future addition of classrooms to meet projected increases in student enrollment. The department shall encourage multiple use of facilities and spaces in educational plants.

(2) Establish, for the purpose of determining need, equitably uniform utilization standards for all types of like space, regardless of the level of education. These standards shall also establish, for postsecondary education classrooms, a minimum room utilization rate of 40 hours per week and a minimum station utilization rate of 60 percent. These rates shall be subject to increase based on national norms for utilization of postsecondary education classrooms.
