University of Miami School of Medicine at Florida Atlantic University "UMSM@FAU" Partnership for Quality Medical Education

Presentation to the Florida Board of Governors

March 17, 2004

- Responds to the State's need to increase the number of medical graduates annually and the American Association of Medical College's call to increase graduates by 15 percent annually
- A study commissioned by the Florida State Legislature and conducted by MGT of America* concluded that Florida's demand for physicians would greatly exceed the supply
- Impending national physician shortage casts doubt on Florida's ability to import physicians at a rate sufficient to meet its needs

*Richard Janeway, M.D. "An Assessment of the Adequacy and Capacity of Florida's Medical Education System", 1999.

- UMSM-FAU partnership is a unique cooperative program that will increase the production of physicians by 32 annually
- The partnership expands entering UMSM classes by 32 students who will be educated at FAU for the first two years of the 4-year curriculum
- These additional places would not otherwise be available at the UMSM without a significant infusion of financial resources due to facilities and staffing constraints

- The partnership is cost-effective because the FAU facilities are already in place with the opening in 2002 of The Charles E. Schmidt Biomedical Science Center
- The \$20 million Charles E. Schmidt Biomedical Science Center combined a \$10 million gift from the Charles E. Schmidt Family Foundation and a \$10 million State match
- An additional \$5 million gift was matched to create a \$10 million endowment for equipment to support medical education
- The Charles E. Schmidt Biomedical Science Center achieves operational efficiencies and synergies by serving as a common educational facility for training medical students, science undergraduates, masters degree students in biomedical science, Ph.D. students in integrative biology and post doctoral fellows in biomedical science

Budget required to support 64 UMSM students	\$4,600,000
Legislative appropriation 1999	\$ 500,000
Legislative appropriation 2000	1,000,000
FAU funding redirected to Biomedical science	600,000
Legislative budget request 2004-2005	\$2,500,000

- Medical Education at FAU Identical to UMSM
 - Students admitted through regular UMSM admissions process
 - Course delivery by FAU faculty on site, aided by distance learning technology
 - Director of Clinical Education at FAU works closely with Clinical Skills Coordinator at UMSM to provide analogous experiences
 - Testing, evaluation, grading and promotions are identical at FAU and UMSM
 - FAU-based students have full and complete access to student organizations and societies at UMSM
 - Students graduate from UMSM

- Medical Education at FAU
 - Integrated UMSM Curriculum

<u>Year 1</u>	<u>Year 2</u>
Core Principles	Respiratory
Infectious Diseases and Epidemiology	Renal
Neurobehavioral	Endocrinology – Reproduction
Cardiovascular	Musculoskeletal
Clinical Skills	Hematology – Oncology
	GI – Liver – Nutrition
	Problem-based learning – longitudinal integration
	Clinical Skills

Key Events

- 1998
 - FAU and UM begin feasibility study
 - Gift of \$15 million from Schmidt Family Foundation
 - Legislative and BOR authorization for partnership

UMSM@FAU

Partnership for Quality Medical Education

Key Events

• 2000

- Medical Scholars Program to increase number of FAU baccalaureate degree holders to begin medical school at UMSM
- 2002
 - Completion and occupancy of Charles E. Schmidt Biomedical Science Center
 - Final Memorandum of Understanding between UMSM and FAU signed
 - Florida Board of Education approved FAU's request for regional medical campus of UMSM at FAU

Key Events

• 2003

- Accreditation site visit by Liaison Committee for Medical Education (LCME) to certify FAU as a regional campus for UMSM
- 2004
 - LCME approval to operate regional medical campus at FAU
 - August 2004 First class of UMSM students begin studies at FAU

UMSM@FAU Partnership for Quality Medical Education FUTURE OPPORTUNITIES

- UMSM may explore expansion to third and fourth years of medical education utilizing local community hospitals for clinical instruction
- Expanding the program to four years will be at the request and under the supervision of UMSM and consistent with FBOG policies
