

## MOTION

That CEPRI be directed to define the parameters of a model to be used to quantify the adequacy of the State's physician workforce; project the extent to which a physician shortage exists and to develop cost/benefit estimates of various alternatives to produce the required number of additional physicians including but not limited to: expanding the capacity of existing medical schools, creating new medical schools, expanding or creating new residency programs and other incentive programs to attract physicians to Florida.

CEPRI shall define the parameters of the model in collaboration with an advisory committee including representatives of the Council of Florida Medical School Deans, the Graduate Medical Education Committee, and representatives from other interested public universities. Upon completion of the definition of the model's parameters, the model shall be developed in collaboration with The Bureau of Economic and Business Research of the University of Florida, under contract with the Department of Education.
