

Statutory Teaching Hospitals

Mission, role and contribution to medical education, the community & the state. Resources of funding & current financial status.

*Gerard A. Kaiser, MD,
Chief Medical Officer, Chief Operating Officer, Jackson Health System. Senior Associate Dean for Medical Affairs, University of Miami School of Medicine*

January, 2004

Florida's Statutory Hospitals 1

Florida's Statutory Teaching Hospitals

- Jackson Memorial Hospital
- Mt Sinai Medical Center, Miami Beach
- Orlando Regional Medical Center
- Shands Hospital, Gainesville
- Tampa General Hospital
- University Medical Center, Jacksonville

Florida's Statutory Hospitals 2

Our Role

The major clinical training programs are usually university-based and occur in teaching and specialty hospitals affiliated with medical schools. Developing free-standing medical education programs in hospitals affiliated only with research facilities, or free-standing hospitals, would be difficult.

Florida's Statutory Hospitals 3

**Working Together to Benefits
Healthcare in Florida:**

The statutory Teaching Hospital Council is a partner, and advocate, for Florida's six statutory teaching hospitals in developing care-related legislation and policies that support the hospitals shared goals and objectives

Florida's Statutory Hospitals 4

Unique Mission

- Florida's six statutory teaching hospitals are unlike any other healthcare provider in the state. Because of their three-fold mission of *education, research and patient-care*, they are uniquely beneficial to the state and well as to their surrounding communities.

Florida's Statutory Hospitals 5

Unique Mission

- The statutory teaching hospitals ensure that Florida maintains a well-trained pool of physicians. They promote greater public-access to cutting-edge medical care, boost the local economy and provide much-needed community service programs.
- Florida's teaching hospitals are the state's safety-net providers, ensuring quality healthcare for patients who might otherwise be medically underserved.

Florida's Statutory Hospitals 6

Our Three-Fold Mission

Education:

- More than 70% of all PCP trained in the STH remain in the state.
- Over 50% of all physicians trained in Florida, remain in the state, giving us the third highest post-training retention rate in the nation.
- Train more than 2200 residents and 2300 medical students, annually, in 75 specialties and sub specialties.
- Train more than 7000 allied health professionals

Florida's Statutory Hospitals 7

Our Three-Fold Mission

Research

- STH conduct 3000 medical research projects and clinical trials with funding from both private and public sectors.
- R&D benefits the health of state residents.
- R&D bring national recognition to the community.
- R&D spins off commercial enterprises.

Florida's Statutory Hospitals 8

Our Three-Fold Mission

Patient Care

- STH provide comprehensive care, that may not be available at community hospitals (e.g. Trauma, Burn, Critical Care Services).
- Academic physicians apply the latest and most effective medical techniques and clinical practices.
- STH Provide more than \$5.52B in medical care to to approx. 2M people from the state's 67-counties.
- STH often provide care that other hospitals consider too risky, costly, complex.
- STH offer a full range of services (specialty, clinical programs) that are not typically offered at community hospitals.

Florida's Statutory Hospitals 9

Our Three-Fold Mission:

Community Service

- **Indigent Care:**
 - Serve Florida's poor, under-insured and uninsured to the tune of \$1B annually.
- **Community Service / Outreach:**
 - Quality of life through disease management, population care management programs.
 - Serve as a state and regional referral service for comprehensive and complex care and services.
- **Public Policy:**
 - Help share healthcare policy and healthcare related issues.

Florida's Statutory Hospitals 10

Economic Impact

- The STH employ more than 32,000 FTEs with more than \$1.2B in annual salary and benefits impact on local communities.
- Enhance communities quality of life by enhancing economic development.
- STH spin off commercial enterprises.

Florida's Statutory Hospitals 11

Sources of Funding for Education Programs

- **Federal:**

 - » Medical SMPs
 - » Upper Payment Limit Proposal
 - » Disproportionate Share
 - » Inter-Governmental Transfers

Florida's Statutory Hospitals 12

Hospital Income Sources

- **Commercial Payors**
 - Managed Care
 - Private Pay
- **Government Payors:**
 - Medicare
 - Medicaid
- **Special Taxing:**
 - Special Taxing District
 - Dedicated Sur-Tax Programs

Florida's Statutory Hospitals 13

Community Hospital Education Program

CHEP:

- **Community hospitals serve as sites for affiliated teaching programs, predominantly in primary care.**
- **Former Independent Funding Program is now paid as supplemental payments to the Medicaid Rates for qualified hospitals. Though these dollars are not uniquely specified for education activities.**

Florida's Statutory Hospitals 14

Summary

- **STHs are a vital part of the state's medical infrastructure.**
- **STHs have a key role in ensuring quality medical care, education, training & research.**
- **STHs Provide a steady flow of well trained physicians to meet the needs of our expanding population.**
- **STHs have an important economic impact on their communities by providing well paying jobs, benefits and economic security.**
- **STHs are the socio-medical safety net of our state.**
