

Note concerning data accuracy: The Office of the Board of Governors believes that the accuracy of the data it collects and reports is paramount to ensuring accountability in the State University System. Thus, the Board Office allows university resubmissions of data to correct errors when they are discovered. This policy can lead to changes in historical data.

BOARD OF GOVERNORS - STATE UNIVERSITY SYSTEM GOAL 1: ACCESS TO AND PRODUCTION OF DEGREES (with 2010 University Work Plan "Targets" in Red)

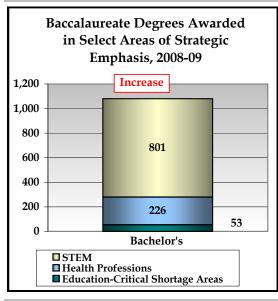

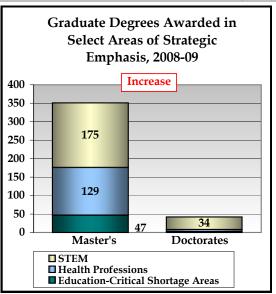

2012 - 2013 Projected Institutional Contributions in RED PRINT.

BOARD OF GOVERNORS - STATE UNIVERSITY SYSTEM GOAL 2: MEETING STATEWIDE PROFESSIONAL AND WORKFORCE NEEDS (with 2010 University Work Plan "Targets" in Red)

Pass Rates on Licensure Examinations

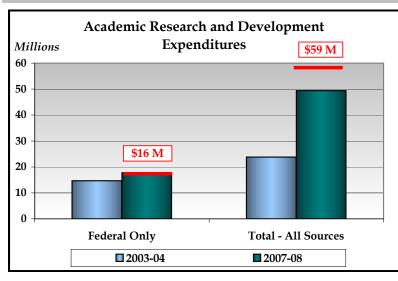

Board of Governors staff are working to match cohorts of university graduates with engineering, accounting, and other professional licensure data, which are gathered by the respective licensing boards and housed within the Department of Business and Professional Regulation. For this year, nursing exam (NCLEX) first-time pass rates are the only meaningful licensure metrics available for bachelor's degree programs.

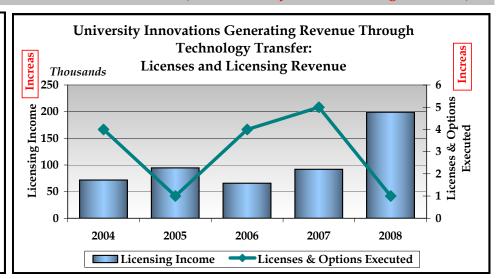

In 2008, FAU had 120 NCLEX test takers from its nursing bachelor's program, with a first-time pass rate of 91.7%.

Maintain

BOARD OF GOVERNORS - STATE UNIVERSITY SYSTEM GOAL 3:

BUILDING WORLD-CLASS ACADEMIC PROGRAMS AND RESEARCH CAPACITY (2010 University Work Plan "Targets" in Red)

Projected Institutional Contributions in RED PRINT

(2012 - 2013 for TOTAL Degrees in Areas of Strategic Emphasis; 2012 for NCLEX; 2011 -2012 for R&D, Licences, and Licensing Revenue).

Key University Achievements

► Student awards/achievements

- > <u>Sarah Lindley</u>, senior nursing student, was elected President of the Florida Student Nurses Association.
- > Junior <u>Christopher Scott</u> was awarded the prestigious Career Prep Fellowship with Management Leadership for Tomorrow (MLT), a national non-profit organization.
- > <u>Dr. Enid Conley</u> became the First Native American Indian Doctoral Graduate for College of Education.

► Faculty awards/achievements

- > The ASME 2009 International Mechanical Congress and Exposition honored FAU Professor <u>Isaac Elishakoff</u> by naming a Symposium for him.
- > Social Work Chair <u>Michele Hawkins</u> was accepted into the New York Academy of Medicine's Leadership Academy in Aging.
- > Four faculty were awarded Fulbright Scholarships during 2009.

► Program awards/achievements

> FAU's School of Accounting, a unit of the College of Business, consistently ranks in the top 10 in the United States for its students' high pass rate on the national CPA exam.

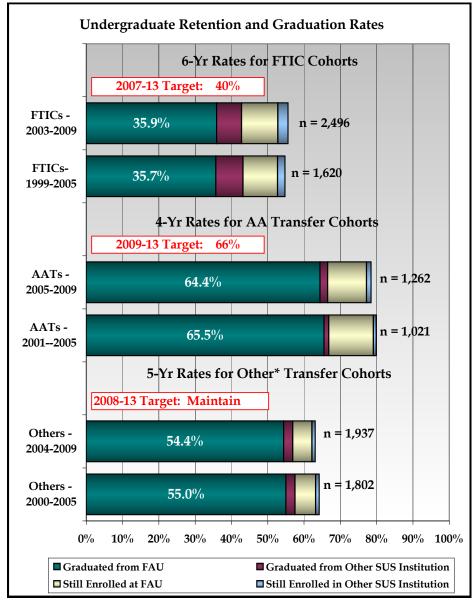

► Research awards/achievements

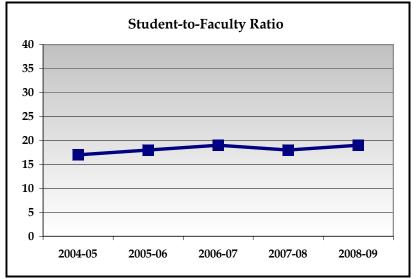

- > FAU is working on collaborative research and education projects with three of the world's premier scientific research organizations Scripps Florida, the Torrey Pines Institute for Molecular Studies, and the Max Planck Florida Institute.
- > Harbor Branch Oceanographic Institute, a premier marine science research organization, is now part of FAU and is in the forefront of ocean exploration, innovation, and education.

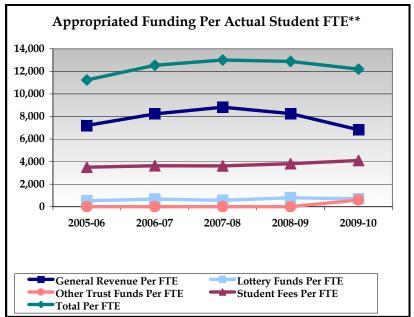

► Institutional awards/achievements

> In 2008, FAU completed an agreement with Clearwire Communications for the lease of Educational Broadband Spectrum usage rights as permitted by the Federal Communications Act. The proceeds from this lease have enabled FAU to plan and implement a multifaceted Academic Enhancement Initiative in the critical areas of student success, technology, and research.

RESOURCES, EFFICIENCIES, AND EFFECTIVENESS (with 2010 University Work Plan "Targets" in Red)

* The composition of "Other Transfer" cohorts may vary greatly by institution and by year.

** FTE for this metric uses the standard IPEDS definition of FTE, equal to 30 credit hours for undergraduates and 24 for graduates.

2010 University Work Plan / Proposal

FLORIDA ATLANTIC UNIVERSITY (University)

(ChiveIshy)
Strategic Plan
[Please provide a link to the latest version of the institution's strategic plan. If the latest strategic plan is not current, or the institution is in the process of developing or updating its strategic plan, please indicate at what stage the institution is in that process.]
Florida Atlantic University's 2006 – 2013 Strategic Plan can be found at: http://www.fau.edu/strategicplan/
Mission Statement
Florida Atlantic University is a public research university with multiple campuses along the southeast Florida coast serving a uniquely diverse community. It promotes academic and personal development, discovery and lifelong learning. FAU fulfills its mission through excellence and innovation in teaching, outstanding research and creative activities, public engagement and distinctive scientific and cultural alliances, all within an environment that fosters inclusiveness.

Overview of Core Institutional Strengths, Special Assets, and Niche Contributions

A number of FAU's academic programs have achieved national recognition. One that consistently stands out is ocean engineering, a field of study that was pioneered at FAU in 1965 with the establishment of the first such department in the country. Faculty and student researchers at FAU's specialized SeaTech center conduct millions of dollars of research annually for the U.S. Navy on autonomous underwater vehicles and other security related projects. In addition, FAU is home to the Center for Ocean Energy Technology (COET), created to research, design, develop, implement, and test ocean energy technologies that are cost-competitive with existing power technologies.

FAU's School of Accounting, a unit of the College of Business, consistently ranks in the top 10 in the United States for its students' high pass rate on the national CPA exam. Business Week has listed FAU's online MBA among the best programs of its kind in the South and has ranked the University's executive education program among the best in the country. For two years in a row, The Princeton Review has included FAU's College of Business on its list of the "Best Business Schools" in America. The College's programs in business intelligence, information security and hospitality management serve some of the fastest growing areas for employment. The College of Nursing has the state's only Nursing Leadership Institute, created to bridge the gap between nursing education and entry level practice. FAU produces the third-highest number of elementary teacher education degrees in the SUS, sending 439 new teachers into the workforce in 2008-09.

Florida Atlantic University is especially proud of its service to traditionally underrepresented populations and this is reflected in the fact that 18% of the baccalaureate degrees awarded each year are awarded to Black Non-Hispanic students, while the proportion awarded to Hispanic students has grown to 19%. In 2009, FAU was ranked in the top 10 engineering schools for Hispanic students. It is noteworthy that Pell Grant recipients average about 40% of all baccalaureate recipients, giving a significant number of students with financial challenges a chance at a more promising future.

FAU is a full participant in the life of its service region and beyond. The partnerships with Scripps Florida, the Torrey Pines Institute for Molecular Studies, the Max Planck Florida Institute, the Palm Point School at Tradition and the Center for Ocean Energy Technology are just a few of the many examples of FAU's continued significant engagement with the community. FAU's School of Social Work provides more than 115,000 hours of free social service to public and nonprofit agencies in South Florida; its students are sought after by area agencies for field learning experiences and employment. A number of Centers and Institutes serve the needs of the community, including The Louis and Anne Green Memory and Wellness Center, the Florida Institute for the Advancement of Teaching, Center for Autism and Related Disabilities, Toppel Family Early Childhood Education Institute, Pine Job Environmental Education Center, Digital Education Teacher Academy, the Communication Disorders and Audiology Clinic and the Center for the Study of Values and Violence after Auschwitz.

FAU, through its Lifelong Learning Society, is a well-known and well-respected national model for community-based lifelong learning and educational and cultural programming. With course registrations of over 35,000, the Lifelong Learning Society is believed to be one of the largest and most successful organizations of its kind in the United States.

Institutional Vision and Strategic Directions for the Next 5 - 10 Years

FAU will soon welcome its sixth president, Mary Jane Saunders. Dr. Saunders' leadership will set the institution's strategic directions for the near and long term, and will continue the university's strong development as an excellent academic and evolving research institution.

Changes in FAU's external and internal environments have brought both opportunities and challenges in recent years, and FAU expects that the next 5 – 10 years will see even more alterations to the landscape of higher education and to FAU.

With the Florida Board of Governors' recent approval of FAU's proposed medical education program and partnership with the Scripps Institute Kellogg School of Science and Technology to offer a dual M.D./biomedical sciences Ph.D., FAU is poised to position itself as a leader in state-of-the art medical education and groundbreaking research for years to come.

Florida is gaining a reputation as one of the top biotechnology centers in the country, and FAU is at the heart of this activity. For more than five years, FAU has been working closely with some of the world's biotechnology giants to advance research economic development opportunities in the state. These endeavors have resulted in creating an environment that is attracting a nucleus of world-class biomedical scientists to Florida's new research coast. FAU's research mission is greatly enhanced by partnerships with these preeminent organizations, including Scripps Florida and the Max Planck Florida Institute, which are both housed on FAU's Jupiter campus, and the Torrey Pines Institute for Molecular Studies. Scientists from the Max Planck Florida Institute are working in temporary facilities on the Jupiter campus until the Institute's permanent 100,000-square-foot building is completed. The Florida facility will focus its scientific activities on bio-imaging using the most advanced techniques for visualization of microscopic molecular processes to achieve a deeper understanding of the structure, dynamics and function of molecules and tissues in order to tackle challenging problems in biology, bioengineering and medicine.

To interface effectively with Scripps Florida, Max Planck Florida, and the Torrey Pines Institute for Molecular Studies, the Division of Research envisions the eventual transformation of the Jupiter campus to one with an emphasis on science, research and graduate education. The move to develop and tie faculty into the research focus is projected to begin with the neurosciences and life sciences. The groundwork for this initiative has been laid with the relocation of the National Academy of Sciences member to the Jupiter campus and the hiring of a biochemist to begin the growth. It is not envisioned that entire units will be moved to Jupiter, but specific activities will benefit from the closer geographic alignment. Another longer term goal for the Division of Research involves finding more effective ways to commercialize research. The local community and state expect the university to participate in the economic development of its area, and efficient commercialization of research is a way to achieve this goal.

The Division of Student Affairs expects to undertake a number of strategic directions for expanding amenities to transform the Boca Raton Campus into a more traditional campus over the next 5-10 years. Foremost among these is the completion of Innovation Village which includes, in fall 2011, a football stadium, specialty shops, the recently completed Recreation and Fitness Center, and the first phase (1200 bed spaces) of a new 2400 apartment style housing complex which will become a new living-learning and social center for our students. Construction projects include a new Student Union on the Boca Raton Campus; a one-stop shop for the Health Clinic, Health Education and

Counseling Center; and a new Career Development and Civic Engagement Center. Accreditations will be sought for the Student Health Center through the Association for Ambulatory Health Care by 2012, and for the University Counseling Center through the International Association of Counseling Services by 2014. Along with increasing the number of academic honor societies by 20%, we plan to continue to expand the number of social Greek letter organizations from 25 to 30 by 2014, and construct housing for these organizations.

The next 5 – 10 years will witness significant transformation in the way academic and administrative services are delivered to students. FAU expects to capitalize on the availability of new and existing technologies to expand delivery of distance learning, thereby increasing educational access to many working students in its service area, as well as to those outside who seek the opportunities afforded by an FAU education. FAU expects to restructure many of its operations for increased efficiency.

Aspirational Peer Institutions (aspire and plan to be comparable to in the next 5 – 10 years) While FAU has not defined a separate set of aspirational peers, the current peer list contains benchmarks to which FAU aspires. For example, both Georgia State University and Old Dominion have student characteristics similar to FAU's and have raised their graduation rates to over 50% for the most recent cohort. The University of Las Vegas has a similar graduate enrollment and has increased its research grant expenditures in recent years. While no institution is exactly like FAU, there as aspects of the current out-of-state peer set to which FAU can aspire and against which it can measure its progress.

*** Include full-time and part-time students in the cohorts,

Additional Primary Institutional Goals/Metrics for the Next One to Three Years (In the context of the institutional strategic plan and vision, as well as System priorities, present a minimum of three additional goals on which university effort will be focused in the next one to three years. Describe each goal, including whether the goal is new or continuing, the strategy for achieving that goal, the metrics by which success will be measured, specific actions to be taken in this fiscal year, expected outcomes, and assumptions, including financial, upon which the projected outcomes are predicated.)

FAU has made considerable progress on one of the primary objectives of its Strategic Plan, to promote the academic success and improve the retention rate of first-time-in-college (FTIC) students. Over the last three years, the first-year retention of FTICs has increased from 73% to 78%, exceeding projections and the median of our peers. Over the next three years, FAU's goal is to increase first-year student retention to 80% or better. FAU plans to achieve this goal by continuing initiatives already begun and using financial resources already allocated. These initiatives include Supplemental Instruction (a form of peer-assisted learning), faculty workshops and faculty learning communities focused on the pedagogy of teaching, and improving the quality of instruction and tutoring in lower-division math courses. In the past year alone, FAU has seen the D/F/W rates in the most difficult math courses fall by one-half or more. FAU will seek comparable improvements in other "bottleneck" lower-division courses, especially in the sciences. A new Center for Teaching and Learning, to open by Fall 2011, will house all student academic support services in a "one stop shop," affording the student body far better access to tutoring and other forms of assistance necessary for students to succeed.

Funds derived from the lease of broadband frequencies under Federal Communications Commission permit and internal reallocations have enabled FAU to make substantial progress in its Strategic Plan goal to offer faster, more reliable, and scalable technological services for use in teaching, research, service and administrative arenas. 20% of centrally scheduled classrooms will be updated annually to ensure that the latest teaching technologies are available in the classroom. For 2010-11, the focus will be on upgrading older classrooms to the latest standards. FAU will update any labs to ensure that computers in centrally managed teaching or open computer labs will be no more than five years old. Outdated network equipment in academic and administrative facilities will be replaced so that the critical network infrastructure will be less than ten years in age by the end of the next three years. Continued progress on this goal is contingent upon the availability of the Clearwire lease funding.

The Division of Research has sponsored a major targeted collaborative effort between units to identify research priorities. After an exhaustive review process, the Division is close to selecting between three and five proposals (out of an invited submission of 43 pre-proposals) which will be funded over three years in the amount of \$1.5 million. Each of the selected proposals will be provided metrics to measure progress and success, with results reported annually. It is expected that at the end of three years, each of the research priority areas will develop funding that is two or three times greater than its current funding base. Other promising research proposals that cannot be funded under this initiative will nonetheless be assisted in finding sponsorship. The Division of Research will help connect individuals with agencies in the Washington, D.C. area and help them in putting together their proposals for funding.

New Academic Degree Program Proposals - Next Three Years (Program development goals need to align with the institutional strategic plan and System priorities.)

Windows of Opportunity/Unique Challenges

(If the university has been presented with one or more unique opportunities that have not been included in prior plans but which will receive particular attention during this year, those opportunities should be presented here. Additionally, if the university expects to face a unique challenge in the coming year(s), that should be noted.)

On May 15, 2010 Governor Charlie Crist signed legislation authorizing the establishment of Florida Atlantic University's independent medical education program. The approval came after the doctor of medicine program was approved by the Florida Board of Governors in April and by FAU's Board of Trustees in February. Assuming that preliminary accreditation status is granted, FAU will be positioned to admit the charter class to its Medical Education Program in 2011. In partnership with The Scripps Research Institute Kellogg School of Science and Technology, FAU will offer a dual MD/PhD degree to 10–20% of the entering class of 64 students each year. The partnership offers significant advantages for students, the Florida physician workforce, the Florida biotechnology research sector and FAU's biomedical science research enterprise.

While exciting opportunities have materialized for FAU, so have the challenges related to the deteriorating economic climate. FAU's multiple campuses and research sites, stretching more than 100 miles along Florida's Atlantic coastline, strain to provide top-quality higher education opportunities to the people of its large service area while remaining true to its goal of access.

Tuition Differential Proposal for 2010-2011						
University: FLORIDA ATLANTIC UNIVERSITY						
Effective Date						
University Board of Trustees Approval Date:	May 26, 2010					
Implementation Date (month/year):	August, 2010					
Purpo Describe the overall purpose of the tuition	Without the differential, FAU would need to					
differential at this institution and the aspects of undergraduate education the funds are intended to improve.	reduce the number of sections offered by 5%, resulting in 30,000 fewer credit hours delivered. The differential will help ensure that there are enough sections/seats offered in required courses to ensure student access and meet student needs; will offer high demand critical pathway courses that ensure timely progression to graduation; and will help maintain FTE production.					
Campus or Cen	ter Location					
Campus or Center Location to which the Tuition Differential fee will apply. (If the entire university, indicate as such.)	Entire university – all locations, where applicable.					
Undergraduat	e Course(s)					
Course(s). (If the tuition differential fee applies to all university undergraduate courses, indicate as such. If not, also provide a rationale for the differentiation among courses.)	All undergraduate courses.					
Current Base Tuition and	Tuition Differential Fee					
Current (2010-11) Undergraduate Base Tuition per credit hour:	88.59 (2009-10); \$95.67 per credit hour in 2010- 11					
Current Undergraduate Tuition Differential per credit hour:	5.74 (2009-2010); 12.80 per credit hour in 2010- 11					
Proposed Increase in the T	uition Differential Fee					
Percentage tuition differential fee increase (calculated as a percentage of the sum of base tuition plus tuition differential):	7%					
\$ Increase in tuition differential per credit hour:	\$7.06					
\$ Increase in tuition differential for 30 credit hours:	\$211.80					

Projected Differential Revenue Generated and Intended Uses				
Incremental differential fee revenue generated in 2010-11 (projected):	\$2,607,776			
Total differential fee revenue generated in 2010-11 (projected):	\$4,477,776			

Seventy percent (70%) of the total differential revenue generated must be used for undergraduate education.

The total estimated amount to be spent on undergraduate education is \$3,134,443.

Describe in detail the initiative(s) and the estimated expenditure(s) for each:

- 1. To ensure that enough sections/seats are offered in required courses to meet student needs.
- 2. To offer courses to that ensure student access, timely degree completion, and maintaining FTE production.

Thirty percent (30%) of the total differential revenue generated must be used for undergraduate students who have financial need. Total estimated amount to be spent on financial need is \$1,343,333.

Describe in detail the initiative(s) and the estimated expenditure(s) for each:

1. To augment existing need-based funds, which still fall far short of demonstrated student need. Ensures that fewer students will not be required to work in order to afford their education.

Monitoring

Indicate how the university will monitor the success of the tuition differential fee. Provide specific performance metrics that will be used. Also, point out any metrics that are different from the prior year and any prior year metrics that are no longer listed.

- 1. Monitor registration and student demand to assure that access is maximized.
- 2. Monitor student progression and graduation rates to assure that they hold to current numbers/percentages.
- 3. Funds will be placed in a distinct fund in order to monitor and audit appropriately.
- 4. Monitor student / faculty ratio.
- 5. Monitor number of financial aid recipients to determine impact on unmet financial need.

Performance Measure Status

What is the institution's plan for improving performance on the identified measure(s)? Show initial/baseline data starting with the year before each metric was identified, the goal for each metric, time frame for achieving the goal, and where the institution is now in relation to the goal if not in the initial year.

1. At the end of each academic year, the Office of Institutional Effectiveness and Analysis will produce reports on historical and current graduation rates, numbers of course offerings, and any changes that have occurred. In addition, the Office of Financial Aid will report regularly on the numbers of financial aid recipients and the use of the tuition differential funding toward mitigating need for FAU students.

Tuition Differential Supplemental Information Provide the following information for the 2009-2010 academic year. 2009-2010 - 70% Initiatives (List the initiatives provided in University Update on Each Initiative the 2009-10 tuition differential request.) To ensure that there are enough sections/seats offered in Net increase of 57 sections and 10.000+ course enrollments over required courses to meet student needs. previous year. Courses with the highest demand are ENC 1101, 1002; Added in 2009-10: 6 sections each of CHEM 2045, 2045L: LIT 2030. These funds will be used to ENC 1101 and 1102; 100+ course add sections to meet demand. enrollments in CHEM 2045 and 2045L; 3 sections and 136 enrollments in LIT 2030; 5 sections and 300 enrollments in SPN 1120 and SPN 1121. Other high demand courses added sections to meet enrollment needs. FTE production increased by 5% Courses to ensure student access, timely degree completion and maintaining FTE production. despite budget cutbacks. Additional Detail, where applicable Number of Faculty Hired or Retained (funded by tuition differential): 10 9 Number of Advisors Hired or Retained (funded by tuition differential): 250 Number of Course Sections Added or Saved (funded by tuition differential): University 2009-2010 - 30% Initiatives (List the initiatives provided in the 2009-10 tuition Update on differential request.) Each Initiative To augment existing need-based funds, which still fall far short of demonstrated \$561,000 in student need. need-based aid was added. Fewer Ensures that fewer students will not be required to work in order to afford their freshmen education. A recent study indicates that over 50% of FAU students who responded to the survey (n=3,644) work 21-40 hours per week while attending classes. were working offcampus in fall 2009. Florida Board of Governors State University System Request to Implement a New Fee

University: Florida Atlantic University

Description	/ Purpose
	Scheduled peer-assisted study, review and
New fee title: Supplemental Instruction (SI)	discussion of course materials.
Amount of new fee (per credit hour):	\$5.00 (\$15 flat fee based on 3-credit course)
Proposed new fee as a percentage of tuition:	5.2%

Describe the purpose of this fee and how its intent aligns with the strategic plan of the Board of Governors:

This fee will make it possible for FAU to offer supplemental instruction programs linked to courses in which students encounter the most difficulty. Failure to negotiate these "highrisk" courses often results in students being unable to make progress toward graduation.

In the SI sessions, students compare notes, discuss important concepts, develop strategies for studying and learning the subject, and test one another on the course material. The SI leaders are students who took the course in a previous semester and earned an A.

This fee will support the SI program, which aligns with the following strategic goals:

- 1. To improve retention within targeted historically difficult courses.
- 2. To improve student grades in targeted historically difficult courses.
- 3. To increase the graduation rates of students.

e
05/26/2010
08/2010

Fee Approval Process

Describe the fee approval process at the university. Was this fee approved by a committee with student representation? If not, please explain:

This fee was approved by the FAU Board of Trustees Audit and Finance Committee, which has student representation, and by the Board of Trustees, which has student representation.

Campus or Center Location					
Campus or Center Location to which this new fee will apply (if the entire university, indicate as such):	Entire University.				
Target Population and Course(s)					
If the fee applies to all university students and co	ourses indicate as such If not provide a				

Florida Board of Governors State University System Request to Implement a New Fee

rationale for the differentiation among students and courses:

This fee will apply to approximately 25-30 courses per term, which were selected because they enroll a high percentage of all lower division students (especially FTICs) and have a high percentage of recorded grades of "D," "F," or "W." The SI program is intended to increase significantly the percentage of students who successfully complete these courses and make substantial progress towards graduation.

Student-based Need for the Fee

Explain how this need was identified, what type of student support exists for this fee, and why the need for this fee is not being met or cannot be met through existing university resources, operations or another fee.

This need was identified by students who participated in a pilot program that began in fall 2007. There has been a consistent increase in "pass" rates in historically difficult courses. Funding from the fee will provide a consistent, reliable source of funding that will enable the program to include all courses that meet the criteria for designation as "historically difficult," i.e., high rates of D, F, or W grades assigned.

Student Impact

Explain the impact of the fee on students, including those having financial need:

The fee is expected to produce a positive direct benefit to students by reducing the number of times students repeat courses, including multiple repeats that trigger the additional surcharge for the third enrollment. The dollars saved by avoiding repeat enrollments will far outweigh the fees paid. Benchmark statistics from FAU's pilot program already demonstrate the positive effect that SI attendance has on grade achievement, pass rates, and overall GPA in addition to the positive effects on student retention.

Restrictions / Limitations

Identify any proposed restrictions, limitations, or conditions to be placed on the n	ew fee:
--	---------

None.

Florida Board of Governors State University System Request to Implement a New Fee

Revenues / Expenditures	
Annual estimated revenue to be collected: \$377,400	
Describe the service or operation to be implemented and estimated expenditures (attach detailed operating budget expenditure form). 1. SI instructors (136 undergraduates who received an "A" in the course previously) 2. SI tutors (as needed to assist individual students or small groups) 3. Graduate student trainer/evaluator 4. Professional staff coordinator	
Monitoring	
Indicate how the university will monitor the success of the new fee. Provide specific performance metrics that will be used, the baseline point from which performance will be measured, and the target performance change and time frame. 1. Increase first-year to second-year retention rate to 80% in next three years. 2. Decrease the "D-F-W" rate each year for three years in SI courses. 3. Increase average class grade each year for three years in SI courses.
