

## **Universal Tracking**

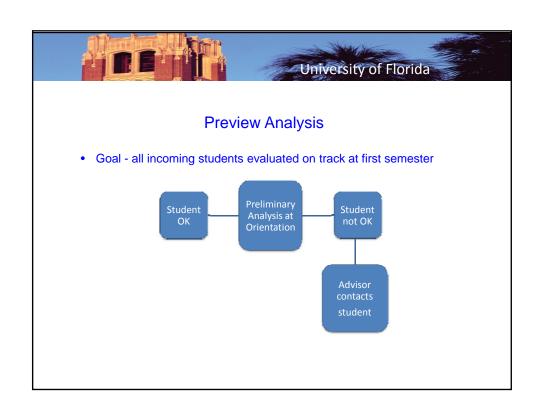

### Precursor to Universal Tracking

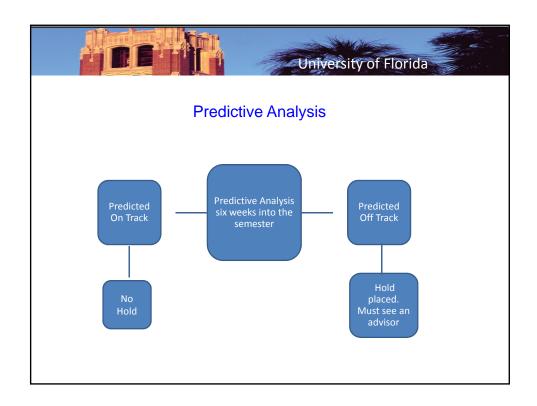

- Monitoring Academic Progress Policy (MAPP) 1992-1996
  - Replaced 80 hour rule
  - Student initially classified in the College of Liberal Arts and Sciences, regardless of their intended major
  - Monitored student progress at 30, 45 and 60 hours earned
  - Student does not meet criteria for intended major at 30 or 45 credit hours earned
    - Must see an advisor in the Academic Advising Center
  - Student does not meet criteria at 60 credit hours earned
    - Must either get conditionally admitted to the college of their intended major or admitted to a major in a different college

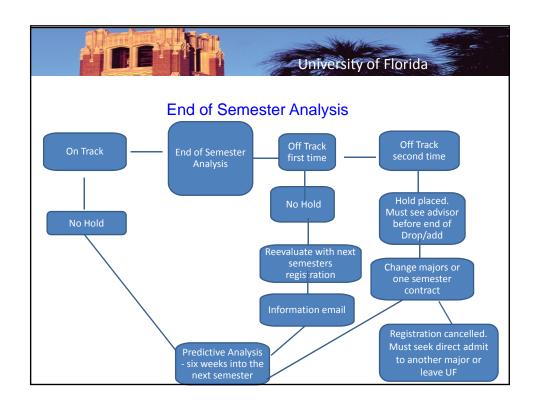

#### **Universal Tracking**

- First pilot run in Fall 1996
- Development of 8 semester plan for each major included in the catalog
- Critical tracking criteria established within the first five semesters
- · Student admitted directly into major from the first semester
- Provost office guaranteed sufficient course offerings in Tracking courses
- Universal Tracking audit is separate from the degree/graduation audit
- Analysis only runs Fall and Spring semesters, allowing off track students to use summer coursework to "catch up"
- Process utilizes existing IT infrastructure and personnel
- Approximately 20,000 undergraduate students are evaluated for each Universal Tracking semester
- Approximately 20% of these students are evaluated off track

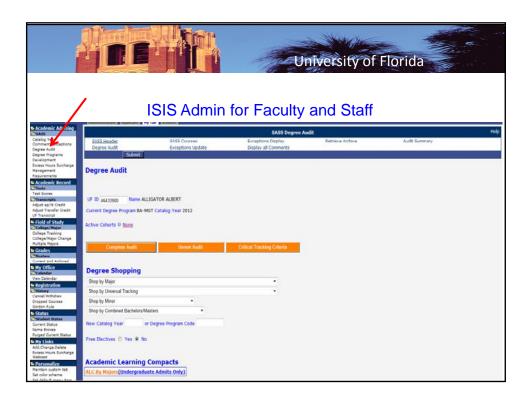

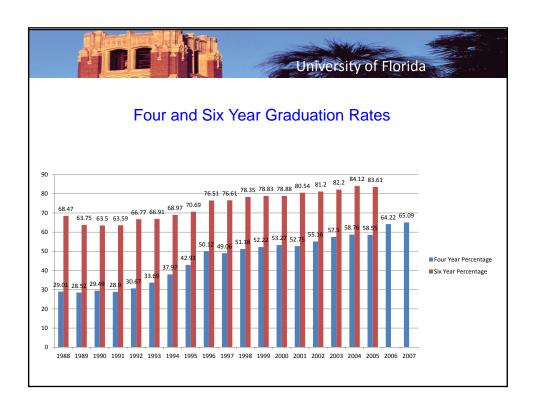

#### Using the Universal Tracking System

- · Advisors and faculty use ISIS Admin, an online web facility
  - View Universal Tracking audit
  - View Degree/Graduation audit
  - · Training is minimal and in most cases self evident
- Students use ISIS, an online web facility
  - View Universal Tracking audit
  - View Degree/Graduation audit
  - Training is done in the First Year Florida course and Preview/Orientation
- College staff member is designated to maintain the Universal Tracking audit for each major
  - Training is done by the SASS coordinator in the Provost Office
  - Changes are tested, reviewed and approved by the SASS coordinator before moving to the live file
