

# Florida A&M University Student Green Fund

June 20, 2013

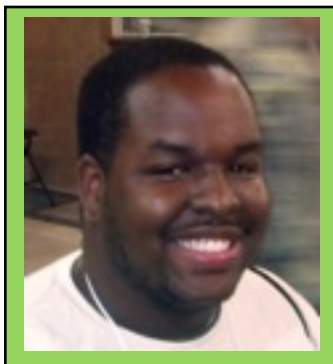

Greetings, Florida Board of Governors:

On behalf of the members of FAMU's Green Coalition, we want to thank you for considering our request to establish a Student Green Fund at Florida A&M University. We have been working on the Student Green Fund for the past few years, and we look forward to your support to implement the fund in fall 2013.

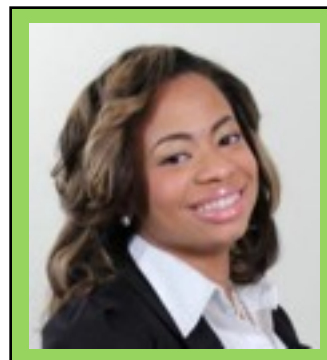

Next to salaries, we understand that energy is the next greatest expense a university must deal with. We love FAMU, and by creating a Student Green Fund, we – students – are making a commitment to help FAMU become more environmentally sustainable for generations to come.

Research tells us that the poor and people of color are disproportionately affected by climate change. FAMU students want to be participants and leaders in the national dialogue about how to address the effects of climate change. Having a Student Green Fund is one step toward doing that.

So we hope you will join us by saying **“Yes!”** to creating a Student Green Fund at Florida A&M University. Thank you.

Anthony Ward  
2012-2013 President

Ariana Williams  
2013-2014 President

# FAMU Students Support The Student Green Fund

We support the Student Green Fund...Do you?

Thank you!
