# Why Prevention Matters?

**It Works – Long-term return on  
investment**

# What is the Strategic Prevention Framework?

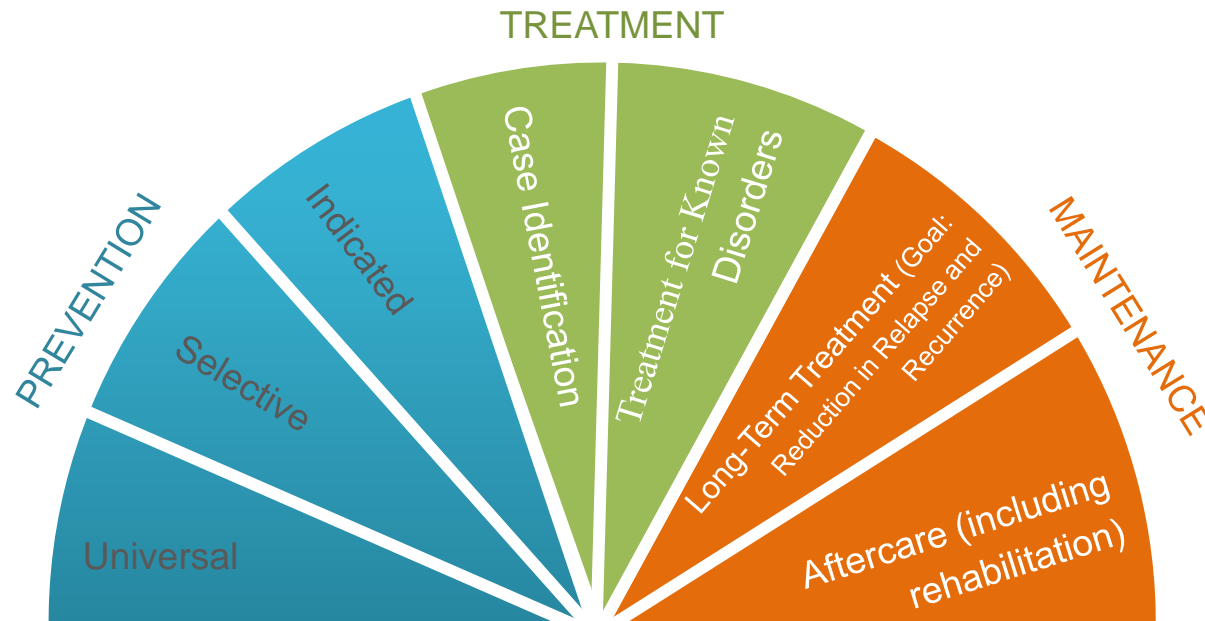

# Why Prevention IS Difficult?

- It is often unclear what we are trying to **Prevent**
- Diffusion of Innovation – the lag between **Developing** and **Implementing** best practices
- How do we measure the **Impact** of prevention
- We can't measure what **Didn't** happen

# Where do we begin?

**We start with a public health framework.**

Source: Institute of Medicine

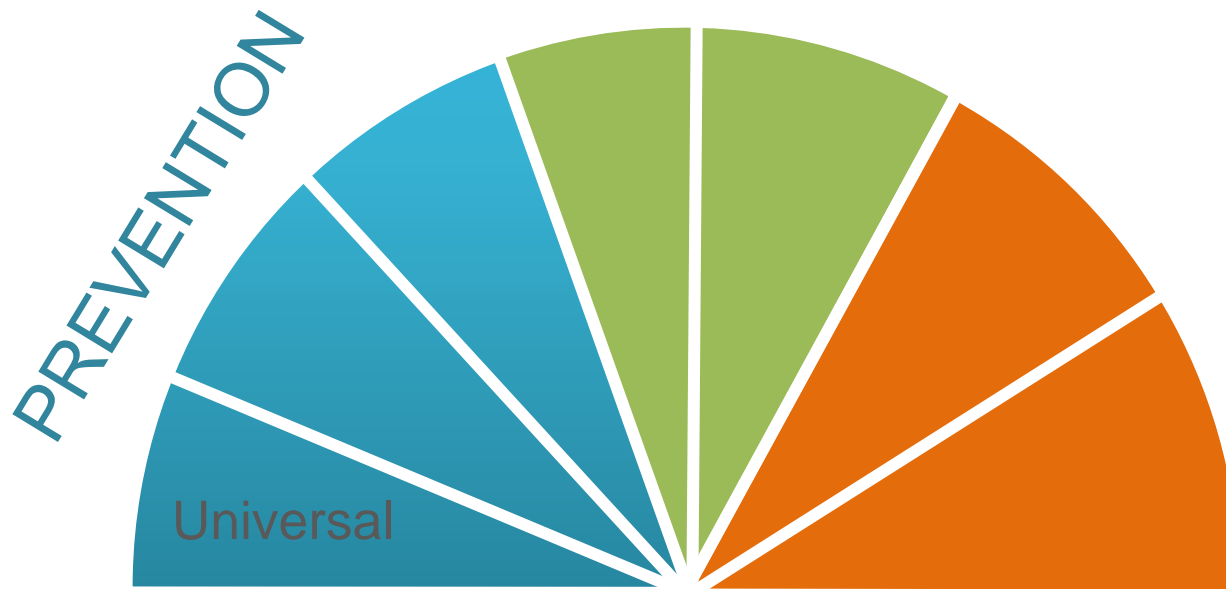

# Specific Prevention Strategies

- Information Dissemination
- Skill-Building
- Problem Identification & Referral Services
- Campus-Based Processes
- Environmental

# Problem Identification & Referral

Source: Institute of Medicine

# Information Dissemination

**Increase awareness and knowledge of the potential for abuse and available campus/community resources**

Examples of Information Dissemination:

- **Make Students aware of how to read Rx drug labels**
- **Help students to understand interactions and potential side effects**
- **Identify risks associated with mixing prescription and non-prescription drugs**  
*(e.g., using Xanax with alcohol may be fatal)*
- **Raise awareness about counterfeit pills**  
*(e.g., a pill labeled as Xanax may actually be fentanyl)*
- **Identify signs and symptoms of alcohol drug overdoses or withdrawal**

# Problem Identification & Referral

Source: Institute of Medicine

# Skill-Building Strategies

**Improve skills to reduce risk and foster protective behaviors.**

**Improve critical life and social skills:**

- Decision-making
- Refusal Skills
- Systematic Judgment Abilities

## **Strategies**

- Facilitate small group sessions with high-risk groups
- Develop bystander training for university staff and peer educators

# Problem Identification & Referral

# Problem Identification & Referral

**Enhance use of protection strategies and eliminate or reduce risk** \*Does not include activities designed to assess need for treatment

## Best Practices for Alcohol Use

BASICS (Brief Alcohol Screening and Intervention for College Students)

## Best Practices for Rx Drugs

Navigating and implicit or explicit assumption about stigma of illicit drug use

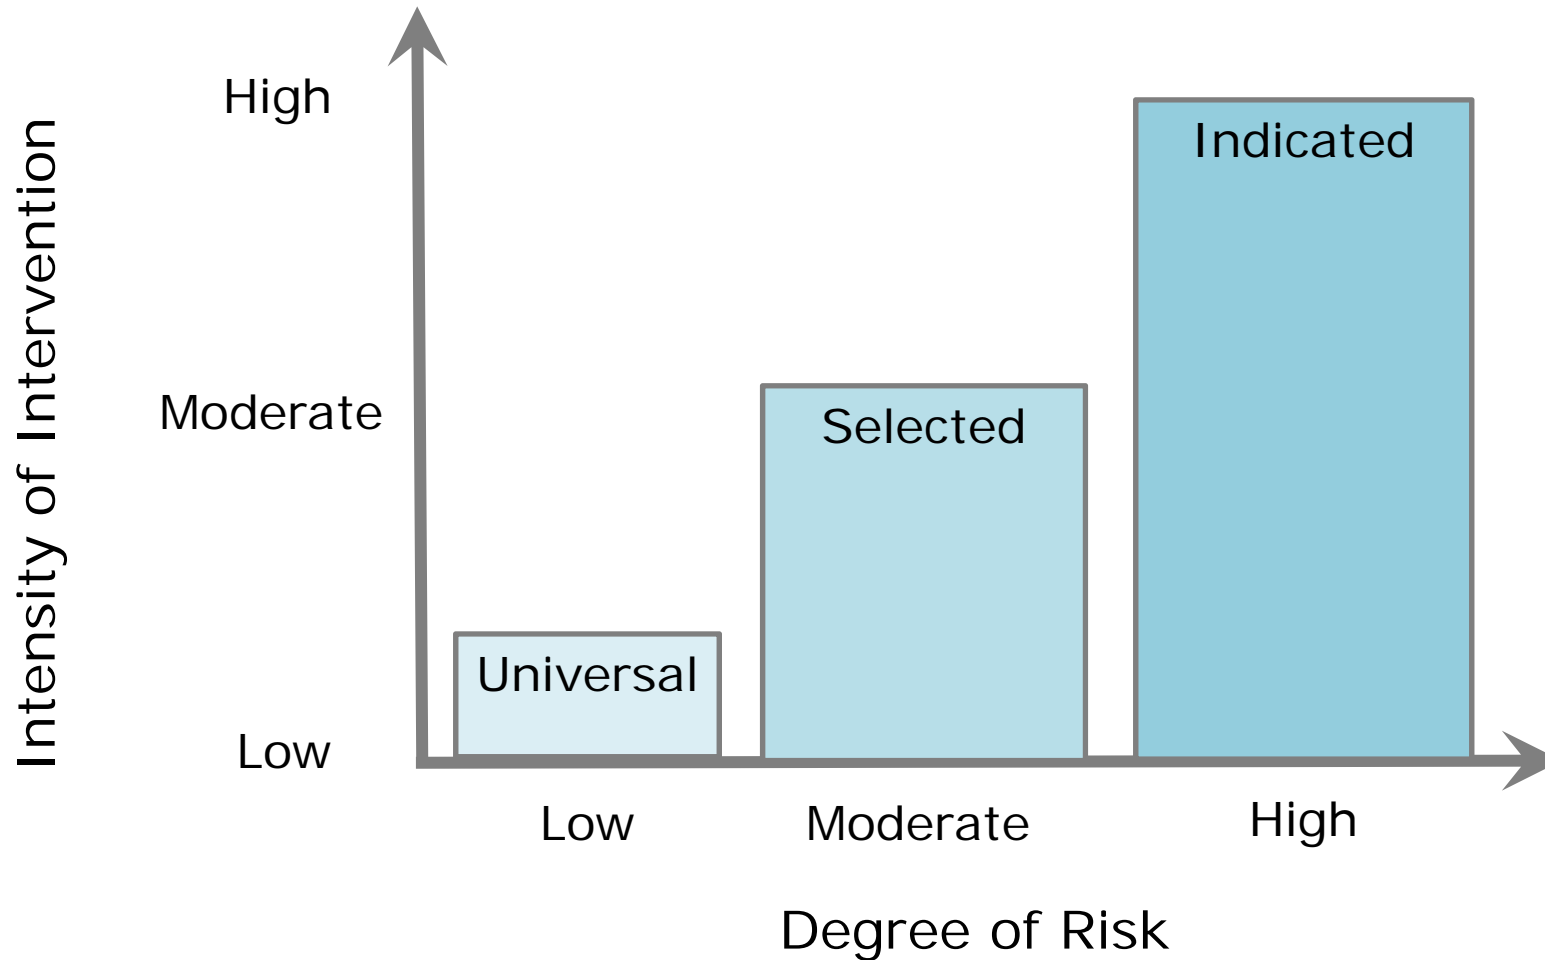

### Strategies:

Factors that indicate a student will benefit from a referral:

- Identify health threats related to at-risk behaviors
- Partner with student conduct, law enforcement or court systems to assess if education can reduce a student's risk of harmful consequences due to Rx drug abuse
- Develop relationships with student organizations to ask for help when they are concerned about a member or members

# Intensity Versus Degree of Risk

# Case Identification

## TREATMENT

# Case Identification

**Reduce severity and intensity of risk factors and impede progression to disorder**

## Strategies

- Rank order risks associated with substance use
- Identify pros/cons of engaging in risky behavior
- Weigh the pros/cons of changing that behavior
- Identify risk and protective strategies
- Determine if treatment is appropriate

# Treatment

## Change substance use & addictive behaviors Identify coping strategies

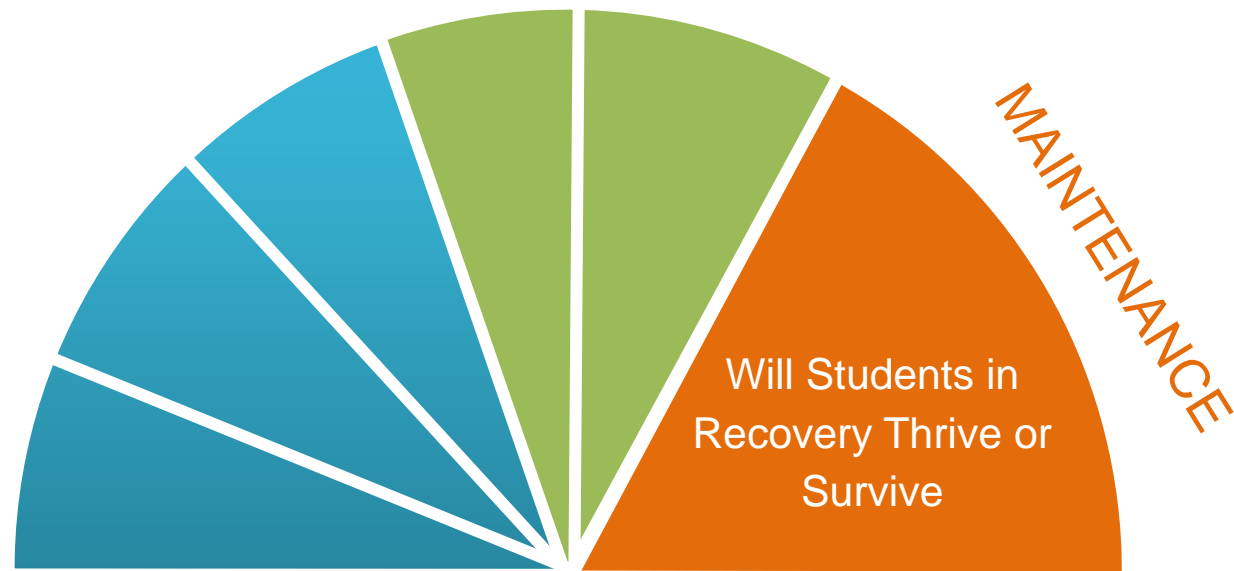

### Strategies

- Identify triggers and high-risk situations interfering with attaining a reduction, or abstinence goal
- Identify and address interpersonal behaviors interfering with reduction, or abstinence goal
- Identify social activities that support a reduction or abstinence goal

# Relapse Prevention & Recovery Support

# Relapse Prevention & Recovery Support

 **Student Health Services**

**Addiction happens. Recovery works.**

Struggling with substance abuse? The UCF Collegiate Recovery Community can help. Visit [StudentHealth.ucf.edu/Recovery](http://StudentHealth.ucf.edu/Recovery) to read John's story.

-John, Class of 2012

**Addiction happens. Recovery works.**

Struggling with substance abuse? The UCF Collegiate Recovery Community can help. Visit [StudentHealth.ucf.edu/Recovery](http://StudentHealth.ucf.edu/Recovery) to read Natalie's story.

-Natalie, Class of 2019

# Maintenance

## On Campus Recovery Support

### Why is on campus support important?

- Students with a substance use disorder who cannot moderate their substance use need support for long-term abstinence
- Stigma & implicit bias are barriers to seeking supportive networks
- Students in recovery contribute to their community through service and setting positive examples
- Students in recovery exemplify resilience and hope for change

# Specific Prevention Strategies

- Information Dissemination
- Skill-Building
- Problem Identification & Referral Services
- **Campus-Based Process**
- Environmental

# Campus-Based Practices

## Suggestions to more effectively make prevention and treatment available for students

**We CAN lead by raising awareness and building sustainable practices, including:**

- Acknowledge stigma associated with substance use disorders
- Advocate for bystander training similar to existing training for suicide prevention, sexual assault, and domestic violence
- Create a statewide SUS AOD coalition comprised of director and senior level administrators to identify system-wide prevention goals and strategies
- Integrate prevention, treatment, and recovery services to create a continuum of care
- Participate in your drug-free community coalition

# Specific Prevention Strategies

- Information Dissemination
- Skill-Building
- Problem Identification & Referral Services
- Campus-Based Process
- **Environmental**

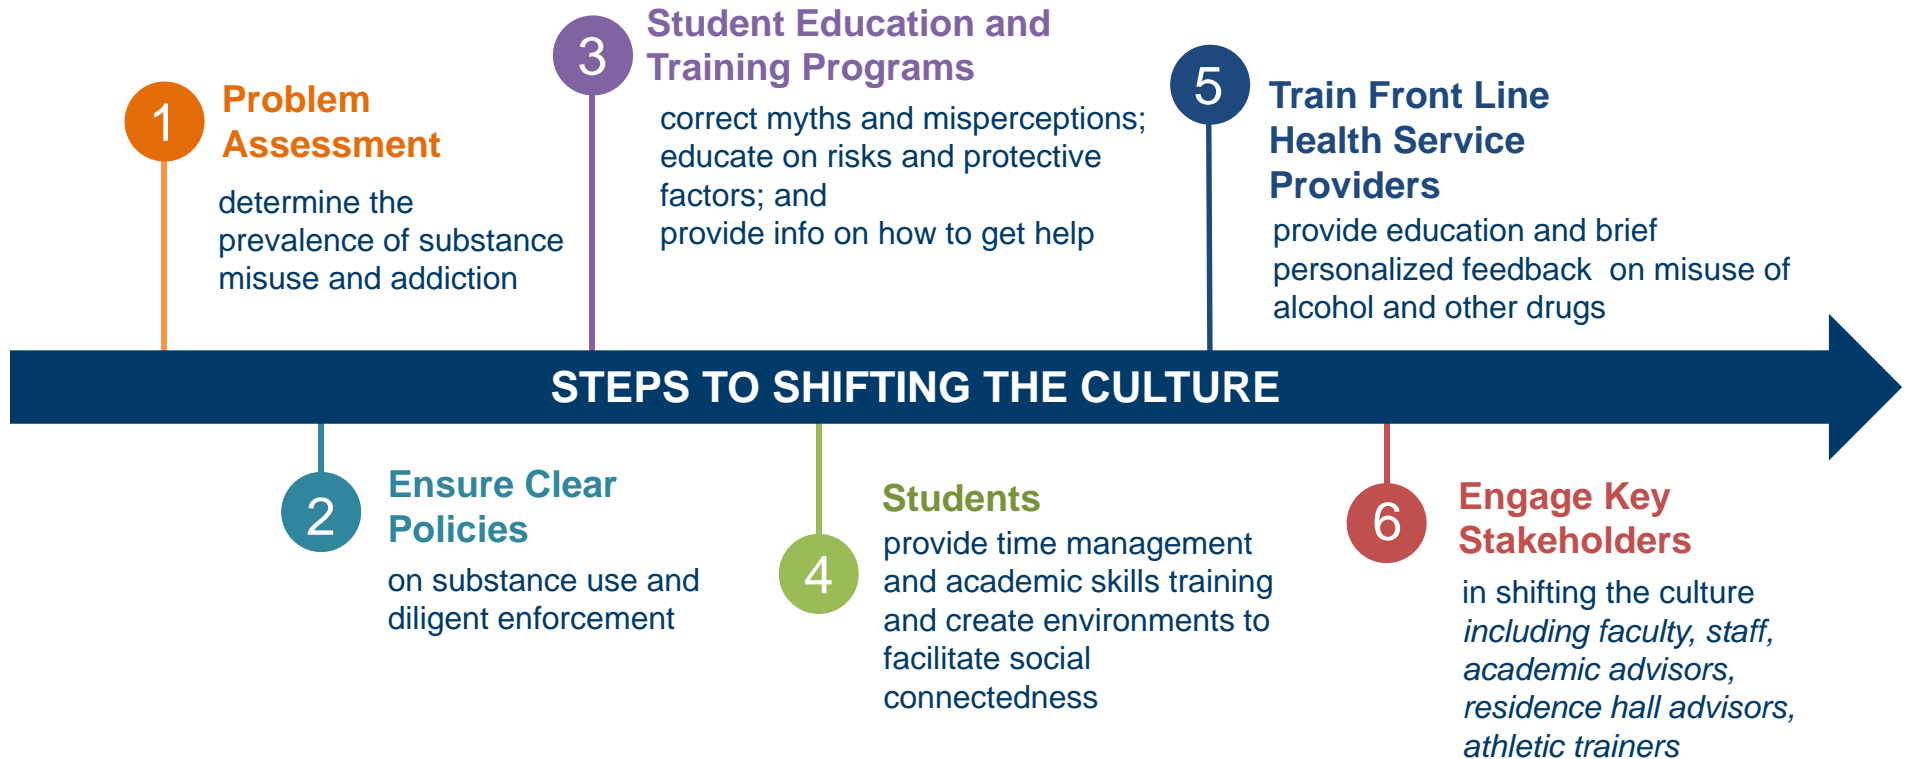

# Environmental Strategies

## Establish or change policies or rules to strengthen the campus and community and support prevention

- Create or refine policies to ensure they are appropriate, timely, clearly written, and effectively communicated
- Conduct a campus and community needs assessment to determine what resources are needed
- Identify available resources and determine appropriateness of the resources

# Steps to Shifting the Culture

# Final Thoughts

- Fostering well-being is our best **sustainable prevention** strategy
- More than the absence of disease, student well-being is manifested by positive **emotions, campus engagement, positive relationships,** and a **feeling of accomplishment** and connection to the campus community
- As we evolve, our best prevention efforts will move in the direction of **fostering student well-being**
