Subject:

Report of Limited NESHAP Asbestos Survey

Building # 18 – Colbourn Hall Interior Renovation Project University of Central Florida

Orlando, Florida PO # 261043

AMEC Project 6380-12-1026.03

Dear Mr. Vazquez,

AMEC Environment & Infrastructure, Inc. (AMEC) has completed the limited NESHAP Asbestos Survey within the above referenced facility. The field survey was performed by Mr. Angel Vizcarrondo and Mr. Andy Tosado, AHERA Accredited Inspectors from AMEC, on 17 December 2012, in accordance with our Proposal 12PROPINDC.0000.0464, dated 11 December 2012.

The attached report gives a brief background of the project, the procedures used in the field and in laboratory analysis. A summary of the laboratory analyses is included as an attachment.

AMEC appreciates the opportunity to have been of assistance to you on this project and is looking forward to working with you as your consultant in the future. If you have any questions concerning this report or if we can be of further service, please contact us.

Sincerely,

AMEC Environment & Infrastructure, Inc.

9 April 2013 Colbourn Hall Bldg 18 University of Central Florida, Orlando, Florida Report of Limited NESHAP Asbestos Survey AMEC Project 6380-12-1026.03

1.0 PROJECT INFORMATION

Information concerning this project was obtained in a conversation and site visit between Mr. José Vazquez of the University of Central Florida (UCF) and Mr. Paul Santone of AMEC. AMEC conducted a limited NESHAP survey in July of 2011 to support limited renovations on the first floor. At UCF request AMEC conducted a NESHAP survey for suspect asbestos-containing materials (ACM) of the first floor and all of the second through the fifth floors prior to proposed renovation of the subject areas to determine the presence or absence of asbestos. The total gross square feet of floors 1 through 5 is 83,950 and AMEC assessed and sampled 6,500 square feet from the first floor in July 2011. The remainder of the survey will encompass approximately 77,450 square feet of Building 18 Colbourn.

The objective of AMEC's survey was to identify accessible asbestos-containing materials which may be impacted by the planned interior renovation of the structure.

2.0 SURVEY PROCEDURES

2.1 General

The survey was performed by observing accessible exposed building materials and included bulk sampling of suspect interior building materials, prior to the planned renovation of the structure. We must emphasize that it is not possible to look within every location of a building. The visual survey documents only general locations of suspect materials but does not determine exact boundaries.

No attempt was made to disassemble equipment or demolish structural elements and finishes as this is beyond the scope of our authorized services. Visual observations were made at convenient locations (for example) for the presence of resilient floor coverings below existing floor finishes, etc. Due to these limitations, wall voids, building cavities and mechanical equipment, and other areas may contain unreported asbestos-containing materials.

3

9 April 2013 Colbourn Hall Bldg 18 University of Central Florida, Orlando, Florida Report of Limited NESHAP Asbestos Survey AMEC Project 6380-12-1026.03

2.2 Bulk Sampling

The bulk sampling procedures utilized for the collection of suspect materials first required the establishment of a homogeneous sampling area. A homogeneous sampling area is defined as an area of the same type and applied during the same general time period. The individual sampling areas were then examined and representative samples of the suspect materials were obtained. Bulk samples collected during the survey were delivered to EMSL Analytical, Inc., of Orlando, Florida, an NVLAP accredited laboratory (No. 10115-0). The bulk samples were analyzed by Polarized Light microscopy (PLM) coupled with dispersion staining in accordance with EPA Method 600/R-93/116.

Polarized Light Microscopy (PLM) is an analytical method for asbestos identification which depends on the unique optical properties of mineral forms in the samples, and specifically identifies the various asbestos types. This is the referenced method of analysis by EPA for asbestos identification in bulk samples. Materials found to contain greater than one percent asbestos by PLM are Asbestos-Containing Materials (ACM) as defined by EPA, OSHA and the State of Florida.

The EPA National Standard for Hazardous Air Pollutants (NESHAP) Final Rule (40 CFR 61, Subpart M) for asbestos includes an option for verification of friable materials, by point counting, if it is initially determined by PLM analysis that asbestos is present in amounts less than 10 percent. *Point counting was conducted as part of this NESHAP Survey.*

The following suspect materials (thought to possibly contain asbestos) were sampled during the survey. Materials containing trace amount or more of asbestos are in **bold**:

- 1. White 2' x 4' pinhole design ceiling tiles
- 2. Gray brick mortar (interior walls)
- 3. Black foam glass pipe insulation and mastic on supply and return lines
- 4. Black felt paper on 5th floor mechanical room wall
- 5. Sprayed applied fire proofing on corrugated metal deck
- 6. Gray mastic on metal HVAC ductwork
- 7. White mastic on fibreglass ductwork
- 8. Drywall system
- 9. Cove base adhesives
- 10. Carpet glue
- 11. Black sink undercoating

- 12. Thinset and grout (men's and women's restrooms)
- 13. White 2' x 2' pinhole and worm design ceiling tiles
- 14. White caulk around sink (men's and women's restrooms)
- 15. 12" x 12" white VFT with blue streaks
- 16. White window caulk
- 17. Wall expansion joint

3.0 BULK SAMPLE RESULTS

Based upon our visual observations, bulk sampling and subsequent PLM microscopic analysis, the following materials were determined to contain asbestos:

Sample No.	Material Sampled	Sample Location	Percent/ Type Asbestos	Condition	Estimated Quantity
B-5A	Black felt paper	5 th floor mechanical room	5% Chrysotile	Fair	5 S.F.
B-18A	Black sink undercoating	5 th floor break room	2% Chrysotile	Good	4 S.F.
B-22C B-32A,C B-39A,C B-46A,C	Thinset and grout	5 th floor restrooms 4 TH floor restrooms 3 RD floor restrooms 2 nd floor restrooms 1 ST floor restrooms	<1% Chrysotile <1% Chrysotile <1% Chrysotile <1% Chrysotile Assumed	Good	9,000 S.F.
B-29A	White mastic associated with foam glass pipe insulation return line	1 st floor mechanical room	2% Chrysotile	Fair	80 L.F.
B-30A	Black mastic associated with foam glass pipe insulation return line	1 st floor mechanical room	3% Chrysotile	Fair	80 L.F

3.1 Point Count Analysis Results

The EPA NESHAP definition for friable asbestos includes an option for verification by Point Counting if it is determined by PLM analysis that asbestos is present in amounts less that 10 percent. Point Counting is similarly recommended if Category II non-friable materials, which will become friable (with the potential to release fibers) during the renovation process are also identified as containing asbestos in amounts less that 10 percent by PLM. If the Point Counting method verifies that asbestos is present in amounts one percent or less, then NESHAP removal requirements (and the significant associated cost), may not apply. As requested by UCF, AMEC submitted the thinset and grout samples on the walls and ceilings) for point count analysis due to

their low percentage of asbestos (<1% Chrysotile). The results of the Point Count Analysis are presented below:

Sample No.	Material Sampled	Sample Location	Initial PLM Results/ Point Count (PC) Results	NESHAP Category
B-22C	Thinset and grout	5 th floor restrooms	<1% Chrysotile (PLM) <0.25% Chrysotile (PC)	N/A
B-32A,C	Thinset and grout	4 th floor restrooms	<1% Chrysotile (PLM) <0.25% Chrysotile (PC)	N/A
B-39A,C	Thinset and grout	3rd floor restrooms	<1% Chrysotile (PLM) <0.25% Chrysotile (PC)	N/A
B-46A,C	Thinset and grout	2nd floor restrooms	<1% Chrysotile (PLM) <0.25% Chrysotile (PC)	N/A

Prepared By: AU Checked By:

Point Counting on samples above confirmed that the thinset and grout on the walls and ceilings of the men's and women's restroom were <u>less than</u> 0.25% Chrysotile asbestos and are therefore <u>not</u> classified as ACM, according to the USEPA/NESHAP definition.

4.0 ASBESTOS CONCLUSIONS

The following materials were found to contain asbestos:

4.1 Thinset and Grout on Walls and Ceilings of the Restrooms

Thinset and grout were found to contain trace amounts of asbestos (<1% Chrysotile) by PLM. Point Count analysis essentially identified "trace" amounts (<0.25% Chrysotile asbestos) in all seven samples.

As such, the thinset and grout on ceilings and walls of the restrooms are <u>not</u> ACM, as defined by the USEPA/NESHAP. However, this material can be considered as ACM or, at the least, containing asbestos by OSHA. If disturbed, it can still be subject to requirements of the OSHA Construction Industry Standard (29 CFR 1926.1101). Approximately 9,000 square feet of this material, generally observed to be in fair condition was noted.

9 April 2013 Colbourn Hall Bldg 18 University of Central Florida, Orlando, Florida Report of Limited NESHAP Asbestos Survey AMEC Project 6380-12-1026.03

4.2 Black Felt Paper

Black felt paper was noted on the wall of the 5th floor mechanical room. The black felt paper was identified as asbestos-containing 5% **Chrysotile**, respectively by PLM. Approximately 5 square feet of ACM black felt paper was observed.

4.3 Sink Undercoating

Black sink undercoating was noted within the 5th floor break room. The black sink undercoating was identified as asbestos-containing **2% Chrysotile**, respectively by PLM. Approximately 4 square feet on one sink was noted in the 5th floor break room.

4.4 Pipe Mastic

White and black mastic was noted on the return lines within the 1st floor mechanical room. The pipe mastic was identified as asbestos-containing **2%** to **3% Chrysotile**, respectively by PLM. Approximately 160 linear feet was noted in the 1st floor mechanical room.

5.0 ASBESTOS RECOMMENDATIONS

5.1 General Recommendations

There are four recognized alternative courses of action to control asbestos-containing materials in buildings: (1) asbestos removal and disposal; (2) enclosure; (3) encapsulation; and, (4) special operations, maintenance and re-observation programs. The selection of a particular alternative should be based upon intended usage of the building, actual exposure rates and cost.

Regarding Item No. 1, the EPA has Federal regulations regarding asbestos. The National Emissions Standard for Hazardous Air Pollutants (NESHAP) Final Rule Revision (EPA 40 CFR Part 61) dated November 20, 1990 includes several requirements for building Owners and Contractors. The requirement that greatly affects abatement alternatives is the categorization of asbestos-containing materials (ACM).

These are categorized as follows:

- Friable means any material that can be reduced to powder by hand pressure when dry.
- Category I Non-Friable ACM means packing, gaskets, resilient floor coverings and roofing products that contain more than one- percent asbestos.
- Category II Non-Friable ACM means any material, excluding Category I Non-Friable ACM that contains more than one- percent asbestos, and is not friable.
- Regulated ACM (RACM) includes all friable ACM; Category I Non-Friable ACM that will be or
 has been subject to sanding, grinding, cutting or abrading; Category I Non-Friable ACM that
 has become friable; and Category II Non-Friable ACM that has a high probability of becoming,
 or has become crumbled, pulverized, or reduced to a powder by forces expected to act on the
 material in the course of demolition or renovation operations.

5.2 Specific Asbestos Recommendations

5.2.1 Thinset and Grout on Walls and Ceilings of the Restrooms

Thinset and grout on walls and ceilings of the restrooms were identified by PLM to contain trace amounts of asbestos. The thinset and grout were confirmed by Point Count to **not** be greater than 1% Chrysotile asbestos. Therefore, thinset and grout are **not** ACM, as defined by the USEPA/NESHAP. However, these materials can still be considered as ACM or, at the least, containing asbestos by OSHA.

Colbourn Hall Bldg 18

University of Central Florida, Orlando, Florida Report of Limited NESHAP Asbestos Survey

AMEC Project 6380-12-1026.03

9 April 2013

If disturbed, they are still subject to certain requirements of the OSHA Construction Industry

Standard (29 CFR 1926.1101). This could require, from a risk-minimization perspective,

handling of the thinset and grout as ACM as a Class II OSHA work activity, if OSHA would not

accept the Point-Counting results. However, at the least, due to the "trace", essentially de

minimus, levels of asbestos present the materials would be subject to the OSHA requirements of

keeping it wet and prompt clean up and disposal. This could possibly be achieved through the

use of demolition workers with asbestos training certifications.

5.2.2 Black Felt Paper, Black Sink Undercoating and Pipe Mastic

ACM black felt paper was observed on the wall of the 5th floor mechanical room and found to

contain greater than one percent Chrysotile asbestos. ACM black sink undercoating was noted

within the 5th floor break room and found to contain greater than one percent Chrysotile

asbestos. ACM black and white pipe mastic was identified within the 1st floor mechanical room

and were both found to contain greater than one percent Chrysotile asbestos. The EPA

NESHAP (40 CFR Part 61, Subpart M) classifies these materials as Category I, non-friable ACM.

The OSHA Construction Standard (29 CFR 1926.1101) classifies disturbance, removal, or

demolition of structures with these materials as Class II asbestos work which requires

specialized training, engineering controls, etc.

5.3 State Of Florida Asbestos Regulations

Chapter 469 of the Florida Statutes generally requires that a state licensed asbestos abatement

contractor perform the removal, repair, or encapsulation of the types of ACM and materials

identified as containing asbestos in this report.

Since the structure will be demolished, ten working day written notification is required prior to the

start of demolition activities under the EPA NESHAP regulation (40 CFR 61, Subpart M) and

Florida Department of Environmental Protection (FDEP) rules.

Since the project is located in Orange County, the notification, using FDEP form 62-257.900(1),

must be made to FDEP's Central District Office at 3319 Maguire Boulevard, Suite 232, Orlando,

FL 32803-3767 (telephone 407-894-7555, Fax 407-897-2966).

9 April 2013 Colbourn Hall Bldg 18 University of Central Florida, Orlando, Florida Report of Limited NESHAP Asbestos Survey AMEC Project 6380-12-1026.03

5.4 Interim Measures

Regardless of the type of asbestos abatement action chosen, and the time frame involved, we strongly recommend that during the interim time period prior to abatement action, control measures be established for the employees and occupants working in the building to minimize their exposure to asbestos. This program should include, at a minimum, proper safety precautions and cleaning methods by personnel when work must be performed in and around asbestos-containing materials. Also, periodic reassessment of the condition of the asbestos-containing materials should be undertaken and precautions and procedures should be in writing and be thoroughly documented.

5.5 Legal and Medical Considerations

Due to the health hazards and legal ramifications involved in asbestos exposure in public buildings, an interdisciplinary approach between the engineering, medical and legal communities should be involved when determining an asbestos control program. There is presently a tremendous amount of litigation in the courts concerning present and past asbestos exposure in public and private facilities, as well as in the workplace environment.

One basis for much of the litigation stems from the lack of adequate notification by the building owner to building occupants/employees following the identification of asbestos in buildings. As a minimum, building owners should notify building employees, occupants, vendors, and others as required in the OSHA Asbestos Standards (29 CFR 1910.1001 and 29 CFR 1926.1101), and for public facilities, the EPA Worker Protection Rule (40CFR 763, Subpart G). We recommend that you involve appropriate legal counsel in your asbestos control program to address these very important issues.

6.0 LIMITATIONS

AMEC has performed its services in accordance with generally accepted practices at the time of the field work. This report has been prepared on behalf of and exclusively for the use by *University of Central Florida*. This report and the findings contained herein shall not, in whole or in part, be disseminated or conveyed to any other party without AMEC's prior written consent.

The findings are relative to the date of our site visit and should not be relied upon for substantially later dates. All material quantities are estimated based on visual observation and should be relied on for contractor bidding or regulatory notification purposes.

Please note that these test results relate only to those homogeneous materials tested. If conditions, or materials, other than those addressed in this report are encountered during the planned maintenance, renovation, or demolition activities, AMEC should be contacted to assess the potential impact of these materials or conditions relative to the findings or recommendations included herein.

No, we are still planning to cover from E&G as far as I am aware. We removed that for the purpose of this report simply to place more emphasis on the commitments directly related to faculty instructional and start-up costs.

Thx Vanessa. ...Lynn

My only question relates to removal of the Colbourn renovations. Have we found a non-E&G source to fund those expenditures?

Vanessa

Subject: RE: Carry Forward Report Submissions

Christy, as always, thank you very much for your suggestions and assistance.

Attached is the updated report with our additional suggested changes to the "Committed" items (highlighted in blue in Christy's revised column), as follows:

- 38) Reduced "Information Technology Issues" to reflect only the anticipated A&F commitments;
- 39) Reduced "Building Maintenance and Repairs" by \$8M for Colbourn renovations;
- 51-56) Reduced "Faculty Cost Requirements" to reflect only specifically designated allocations (in other words, removed 3-year college estimated commitments);
- 65) Added COS and ORC start-up commitments formerly reflected in the general "Faculty / Instructional Cost Requirements Critical Hiring (Non recurring)" category;
- 89-90) Removed "Equipment Replacements" and "Public/Community Support" entries.

Tony and I discussed these changes yesterday and he is comfortable with this overall approach.

Please let me know if anyone has any other suggested changes or questions.

Thx again. ...Lynn

I adjusted some of the line items where we really stuck out and removed deferred maintenance all together. This leaves us with a negative \$39m – the adjusted (green) column is to the right of the original. I can put some amount back in for deferred maintenance if needed after Lynn's adjustments are made. Kristie Harris is going to be at the ICOFA meeting tomorrow so I can ask a questions and get insight on whether they intend to include the footnote explanations that we submitted.

Please let me know your thoughts.

I'm so glad the universities are working together to send a consistent and accurate message...

Yes, we have the breakdown by year for the info Academic Affairs provided specifically. In that regard, note that all the items we included in the "Restricted" section reflect strictly *current year* estimated expenses as reported by our units, so I would propose to leave those intact (particularly the faculty/instructional requirements section). On the other hand, the "Commitments" section reflects estimated expenses though 2015, so I can adjust those, but still propose that we leave some expenses in the "faculty" category.

Note that the larger reported expenditure figures are primarily in the facilities and maintenance categories, so the adjustments I will make alone are not going to bring us down close to \$0. I don't have specific information by year for those other categories, so hopefully Christy does and can propose some additional adjustments. ...Lynn

Christy's going to try to get to "by year" information, as best she can by Friday, since we're at ICOFA. She will get everyone's input once she starts to dig into it.

How will the commitments be reduced? Do we have figures by year so we can reduce the expenditures that are farthest out into the future? Or is there another way to reduce the figures?

See attached carry forward SUS compilation with commitments. I asked Kristie Harris if, since other schools only listed commitments to come to zero, should UCF consider updating our numbers accordingly, and she recommended yes - that UCF update their numbers (I'll forward that email under separate cover).

Do you all agree with me and Christy Tant updating our numbers so UCF doesn't stick out?

Good Afternoon and Thank you for allowing me to present you this Status of Projects presentation

156 buildings on main campus (1,415 acres)

Construction began January 1967

ORIGINAL ENROLLMENT: 1,948 students

FALL 2012 ENROLLMENT: 59,767

I will be presenting to you in Order of Completion since the last update on April 27, 2012

1,415 acres of UCF-owned land

333 acres of conservation easement controlled in perpetuity by SJRWMD

11 types of land uses

3 types of conservation areas

Located in Uptown Retail north of Gemini Blvd.

Architect – Borrelli and Partners Construction - Welbro

Project Cost: \$1.17M and made possible due to the savings achieved during the bldg. 88 Recreation and Wellness Center Expansion in 2011

Funding Source: CITF

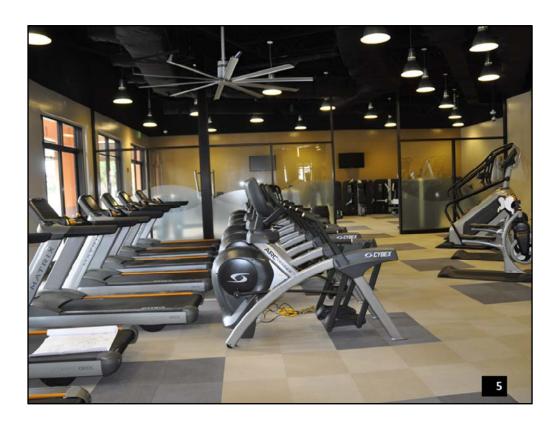

Gross Square Feet (GSF): 8,840

Buildout of the existing Uptown Retail space by Recreation and Wellness Center.

Exterior photo from West Plaza Drive with signage that is consistent with the Uptown Retail aethestics

This wellness facility contains two cardio studios, a fitness studio, mind and body studio, restrooms, showers, and lockers.

Status of Project: Temporary Certificate of Occupancy January 2013. The reason we received only a TEMP CO, is because Hurricane Sandy delayed the installation of the Turnstiles-Some of the suppliers for the turnstiles went out of business. We expect them to be installed next month._____

Cardio Room with Natural Light exposure from the windows fronting Gemini Blvd., Exposed ceiling painted black, large fans and televisions on the rear wall.

Located on Libra Drive in former Police Department building

Minor Project

Architect - KZF Orlando Construction - Wharton Smith, Inc.

Project Cost: \$1M

Funding Source: Interest accrued as approved by BOG

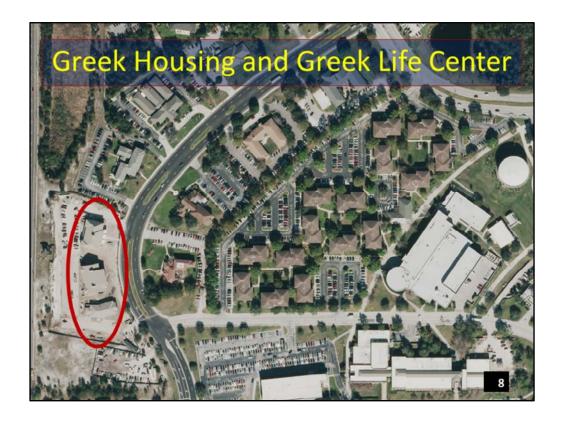

Renovated just under 7,100 of the 7500 GSF facility

Special features include exterior hardening. Windows were replaced with hurricane-rated type. A removable hurricane rated curtain on front entry was installed. This is the Emergency operations room with projectors and screens, 6 monitors, control desk, and seating for 39 persons

There is also an Executive conference room, Media briefing room with stage.

EOC – Certificate of Occupancy issued 2-4-13

Location – Between Alafaya Trail and Greek Park Drive at Aquarius Agora

Architect – Powell Design Group Construction - Welbro

Project Cost: \$6,828,993

Funding Source: House B and Resident Life Center is Bond Finance. House A funds

provided by Housing.

Total Gross Square Feet for the project is: 31,950

This aerial photo was taken in late March and you can see

- Two 2-story Greek Houses (13,625 sf each) are the Kappa Kappa Gamma house and the Chi Omega House
- The Greek Life Center to the left at (4700 sf) Features of this project include:
- Landscape buffer by Alafaya
- Access roads And Parking behind the facility

11 groups are currently housed on campus, these two new houses will bring this number to 13. Houses will sleep 40 students a piece, adding 80 beds to Greek Park. Total number of bed spaces in Greek Park will increase to a total of 462.

Status of Project:

Estimated Completion Date: May 3, 2013

LEED Status is Silver for the Greek Life Center And we will receive LEED for homes certification

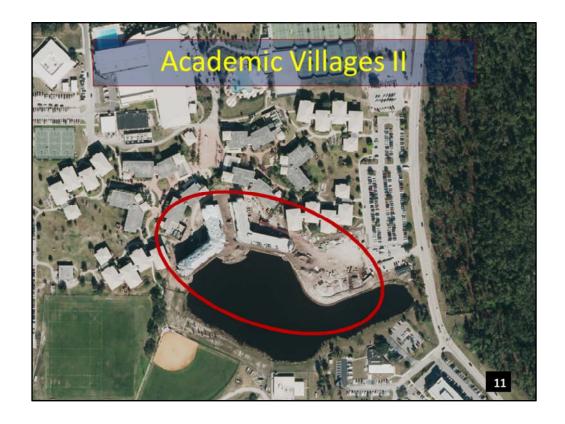

This slide shows a photo taken about two weeks ago and shows the two sorority houses. In addition to the 80 beds these facilities include:

- A Self-serve kitchen
- As well as a Dining/meeting/multiuse space

Greek Life Center includes:

- 2 multi-purpose rooms
- Kitchen
- Grand hall
- Offices
- And will serve as a Meeting place for fraternity and sorority professional staff and governing council

Located off Libra Drive and is an expansion of the AV existing housing community

Architect - Gilchrist, Ross & Crowe Architects Construction - Jack Jennings & Sons

Project Cost: \$37.4M

Funding Source – Bond Finance

Gross Square Feet (GSF): 209K SF Housing comprised of the first 3 buildings to be completed and a 9,000 SF Administration and Maintenance will be the 4th and final building to this project.

- These 4 buildings will be 3-5 stories with Architecture to match existing Academic Villages
- Housing: Bldgs 1, 2, and 3 will add 665 beds on campus housing stock and will include:
 - o Food Vendor
 - o Student mail and package pick up
 - o Common multipurpose room
 - o 60 seat meeting space
 - o Study rooms
 - o Public social living rooms on each floor of each building
- Administration or Building 4 include:
 - o Cooling Tower
 - o Backup Generator
 - o Locksmith and Key control
 - Maintenance workshop
 - Housing Business service offices
 - o IT equipment storage, workgroup and offices
 - Accounting and Administration offices

In this computer generated 3-D model, you are able to see the main pedestrian corridor and plaza that connects from the existing AV facility and terminates at the water feature creating a gathering space for residents with:

seating, hardscape, landscape, power and Wireless

Along the southern portion of the project is a 750 Linear foot Seawall

Completion Date: Aug. 1 2013 for all three housing buildings and Fall 2014 for the Administration Building 4

LEED Status: on track for Silver

This slide shows the most recent aerial photograph taken about two weeks ago.

Because the buildings were permitted separately, we are working to complete Building 3 first, then 2 is next and then building 1. Building 3 on the left of this photograph is nearest completion with:

99% roof complete

Windows are 95% installed except for the ones that are being used for equipment loading Exterior paint complete

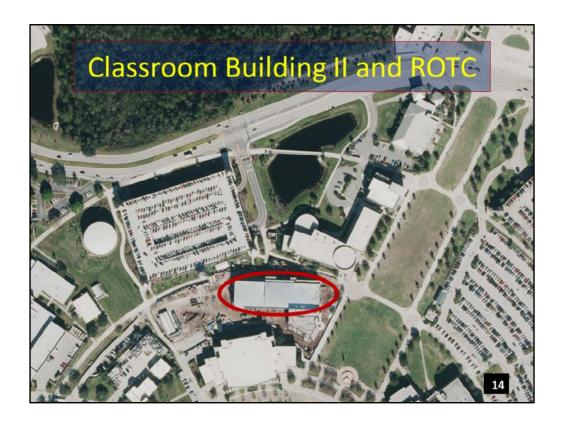

drywall 80% finished

Mechanical 90% complete

Geothermal well-400' injection has been drilled and the 600' extraction well will be drilled next week. Water testing will then comence

Bldg. 4 underground utilities are complete and footers complete. Foundation pours beginning in May.

It is expected that lessons learned during building 3 will help expedite the remainder of the project

Located just north of Classroom I on Memory Mall at the 800' radius.

Architect – Schenkel Schultz Construction - Clancy & Theys Construction

Project Cost: \$23.5M

Funding Source: PECO

Gross Square Feet (GSF): just under 80K square feet

The classroom portion of the project has two stories of space featuring seven (7) large lecture halls ranging from 125 to 450 seats and a wide pre-function student areas with seating and computer access.

The project also includes a three-story element which will house the Army and Air Force ROTC programs. The ROTC entrance, which will front Memory Mall, will feature a rotunda and be clad in cast stone. The first floor will feature a military history library, multipurpose room, and recruiting offices. A virtual battle lab will be included on the second floor, along with the Air Force ROTC. The third floor of the facility will be home to the Army ROTC. The rotunda will also house the Art-in-State feature of the project as well and is scheduled to be completed when the building is opened.

Estimated Completion Date: August 2013

LEED Status (Silver): Anticipate Silver

This is an early 3-D rendering from the Architect illustrating the south façade of the new building and the plaza space that will be created between CR1 and CR2.

This aerial photograph was taken in March. You can see Psychology and Parking Garage H to north, Memory Mall to the east and Classroom building 1 to the south. Since this photograph, most of the brick cladding has been added to the entire building. The Cast Stone that will be applied to the ROTC and Rotunda will begin next week and take about 6 weeks to complete.

Mechanical systems and Interior Gypsum is on-going.

To note: This project was designed using 3-Deminsional Building Information Modeling or BIM (instead of the older CAD software). In addition to designers, this technology tool was utilized by the Builder and their sub-contractors in the field as well. Instead of using traditional paper construction documents, the computer and 3-D drawings were housed on site allowing team to see all of the systems of a particular space at one time. This minimized clashes and changes to the project. The sub-contractors that were reluctant to use this technology, now prefer it.

Located due east of Libra Drive, south of the Creative School and east of the RWC tennis courts.

Architect - PGAL Construction – James A. Cummings

Project Cost: \$11m

Funding Source: Bond Finance

Gross Square Feet (GSF): 345K square feet

This slide shows the perspective looking toward southeast.

This will be a pre-cast garage and will be consistent with the architecture of Academic Villages.

In order to fit the garage on this site, a narrower but taller 6 deck structure was designed.

The garage will accommodate 1,037 new spaces on campus and will also feature a bus loop for pick-up and drop-off. A Traffic Signal on Libra will also be included.

Two stair towers and elevators are located on the Northwest and Southwest corners.

On the west elevation, a large 33' diameter Pegasus will highlight the garage.

Status of Project: Project is under construction.

Underground Utility Infrastructure is complete.

As seen in this slide, footers are being poured and will be completed next week. The precast panels are in fabrication now and are scheduled to begin erection in late May or Early June

Completion Date: December 2013

Since this garage contains no conditioned space, LEED status is not attainable, however, sustainable design and building practices are being utilized when possible.

This will begin the 'projects under design' portion of the presentation

Located adjacent to Health and Public Affairs along Memory Mall

Architect HKS Construction CPPI

This is a Facilities Improvement minor project.

Budget: \$1.6M

Funding Source: Aramark Investment/UCF Auxiliary Funds

The structure is just under 3,300 square feet.

This building will be a stand alone facility and will not have direct access into HPA.

It will contain 92 seats indoors, a fireplace, plus outdoor seating under a canopy structure as well.

Although not a true green roof, There will be a parapet wall that will have plant containers behind it to soften the roof aesthetic.

Construction Plans are scheduled to be submitted for review and permitting in early May.

Construction duration(once permit has been issued): 6 months with a goal to be open Spring 2014

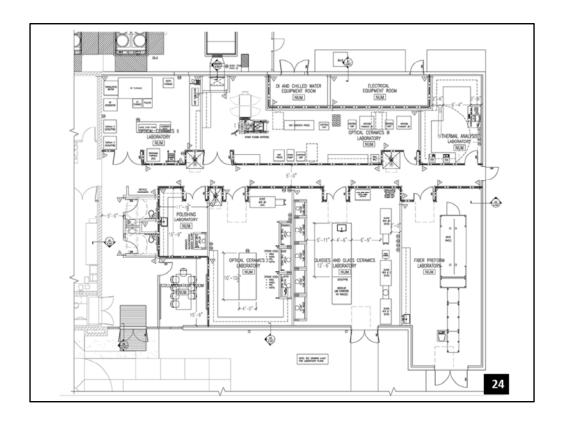

Located at the east end of Neptune Drive and is an expansion of the existing MMAE facility.

Matern Professional Engineers is the lead designer in conjunction with KZF Architects. The Construction is TBD since the delivery method is (hard bid)

Design/Construction budget \$1.67M

Funding: is from Research Townes/CREOL/ORC

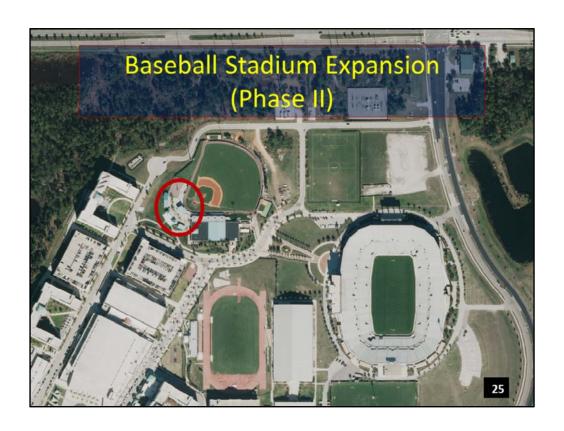

The facility will be about 5,500 square feet.

The proposed building will be used by the CREOL faculty, students and staff for the research and manufacture of innovative materials relevant to optics and photonics. It will house laboratories with state-of-the-art equipment for the preparation of transparent ceramics, single-crystals, glass and glass-ceramics for high-power lasers, photonic fibers, infrared sensing and imaging, nuclear and radiological detectors.

100% construction docs are due Mid May and will be submitted for permitting after that review.

Construction duration/completion date: Estimate 6 months

Tracking for LEED silver

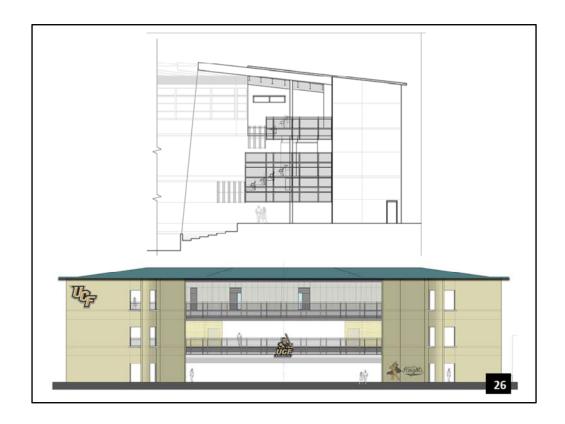

Located at the existing baseball facility in the Athletics node

Design DLR Construction Skanska

Budget: \$2.5M

Funds Source: Athletics

Three level tower behind home plate

Level 3 - Media and operations.

Level 2 – 312 seat club terrace with restrooms and exclusive Food and Beverage

service

Level 1 – Covered concourse Replace chair backs on 100 level

Distributed sound system (replace old horns in center field)

360 new fixed seats (66 third floor+ 294 second level). Total stadium fixed seating 2,286

Status: Design Development complete.
Timeline: Construction July 2013 – January 2014

Completion Date: February 2014

Located in Research Park (just east of UCF Human Resources)

Architect: ACI Design Builder: Wharton Smith, Inc.

Project Cost: \$4.175(including roof replacement)

Funding Source: Research

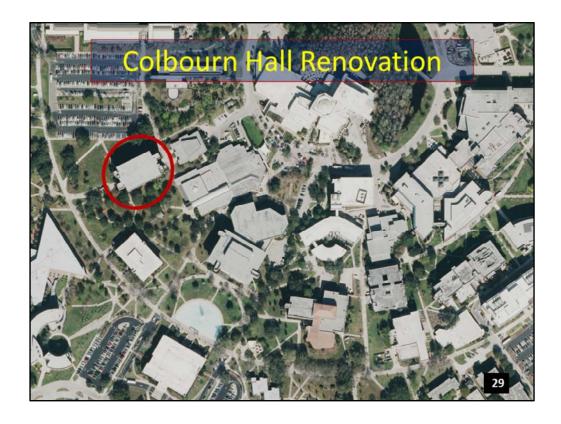

Anticipate Notice to Proceed by first week of May.

The square footage for the three buildings is 18K, 16K, and 14K totaling 48K Gross Square Feet

The project consists of Renovation of office spaces/labs/HVAC mechanical, electrical plumbing and fire protection to meet building and life safety codes

Incorporate LEED Practices

Located adjacent to the Recital Hall.

This project has been advertised. A short list of firms has been created and interviews will commence in May.

The estimated cost for this Renovation is between\$4-\$7 Million

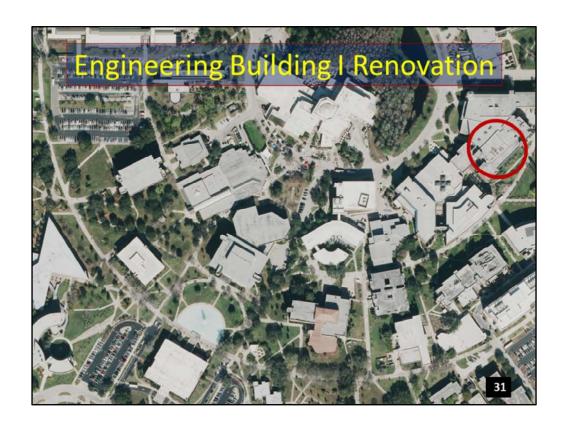

Currently, No external funding from the state has been made available and leaves the question of how of how to pay for this project.

The building is 5 stories and about 40 years old, Totaling 84,000 square feet.

This will be a renovation to include modifications to the building envelope, structural systems, exterior corridors, and HVAC systems to meet the current building and life safety codes.

This project stemmed from a study done from an engineering firm that concluded that the CMU should be reinforced, the brick should be properly anchored to the CMU, the structural steel should be cleaned and supplemented or removed as necessary, lateral bracing should be added between columns,.

Located between Engineering 2 and Business Administration

Have received \$3.6M from PECO funding

Asked for the remaining of construction which is approximately \$14M for years (2013-'14). This was not included in the House or Senates budget which leaves us to re-prioritize the needs of the building based upon the ISES facilities condition assessment.

The project consists of the renovation of the existing Engineering Building I, which is twenty-eight years old. The building is five stories and totals about 104K gross square feet. The renovation will include modifications to the building envelope, major building systems to meet current occupancy and life safety codes, and building interiors.

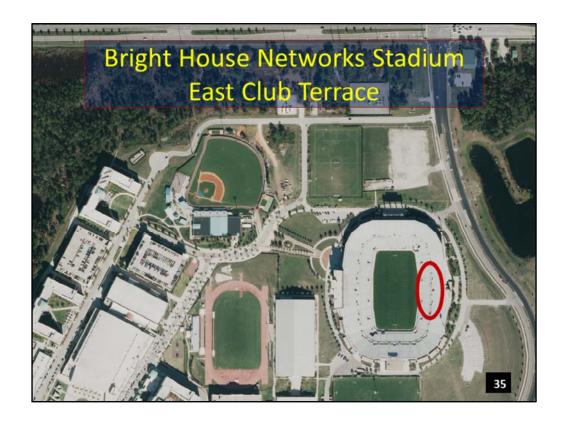

Located just west of the Health Center and Chemistry

Have Received just under \$3.9M from PECO funding. We have asked for the Remainder of Construction in the amount of \$9.4M for years 2013-'14. This project too was not included in the House or Senates budget which again, leaves us to re-prioritize the needs of the building based upon the ISES facilities condition assessment.

The project consists of the renovation of the existing Mathematical Sciences Building, which is forty-three years old. The building is five stories and totals about 107K gross square feet. The renovation will include modifications to the building envelope, major building systems to meet current occupancy and life safety codes, and building interiors.

This Concept is Located in Bright House Networks Stadium in the east stands.

This project currently does not have an architect or builder DUE TO ONLY BEING A CONCEPT; but could become part of the Wayne Densch Center for Student Athlete Leadership.

The next steps will consist of completing the engineering study of the existing east stands to be finished in June

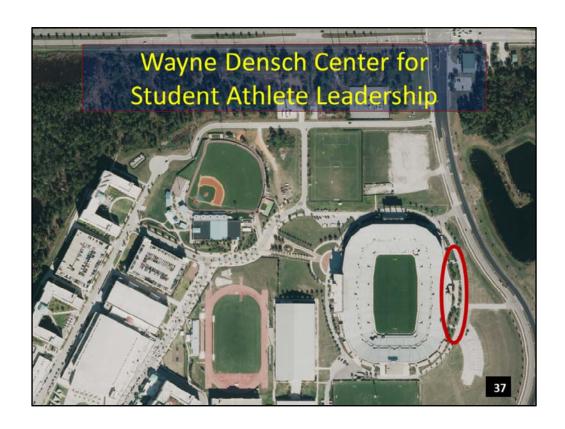

Cost: TBD (\$1.M estimate)

Funding source is Athletics

sons. It will be an open-air club terrace with restrooms and exclusive ering of the East Club Terrace which will have an Estimated capacity: beverage service

at loce

Located just east of Bright House Networks Stadium

The architect is 360 Architecture and the Builder is Wharton-Smith.

Project cost: \$6.5M

Funding Source: Athletics

It is estimated to be 3 stories and 23,000 square feet

This Facility will have Academic Services for Student-Athletes, Office of NCAA Compliance, Office of Athletics Student & Career Services and an Athletics Leadership Institute

We have completed programming and are awaiting funding for design.

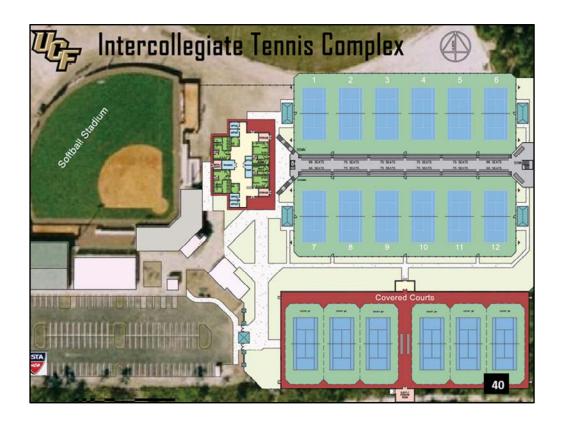

Location: immediately east of softball complex.

UCF AA has assured us that this will not encroach upon the 50 acre parcel

project professionals not yet selected DUE TO ONLY BEING A CONCEPT Awaiting funding.

Estimated Project cost: \$4.2M

Funding: Athletics

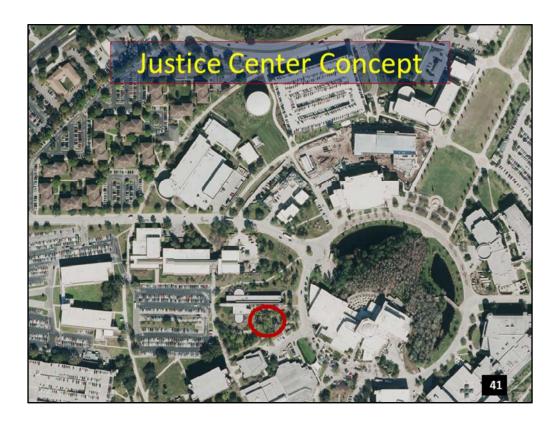

This facility will be used by the Men's & Women's Intercollegiate Tennis teams and will consist of the following to be built in 3 phases:

Phase I - 12 championship caliber hard courts with seating for 600-800, fencing and lighting at a cost of \$1,400,000

Phase II – Team clubhouse \$1,500,000

Phase III – Six covered courts \$1,200,000

Located adjacent to the Burnnett Honors College.

We have been Working with Bob Homes as well as Deans Wang and Frumpkin in the development of this concept

Estimated Concept Budget of \$3.5M

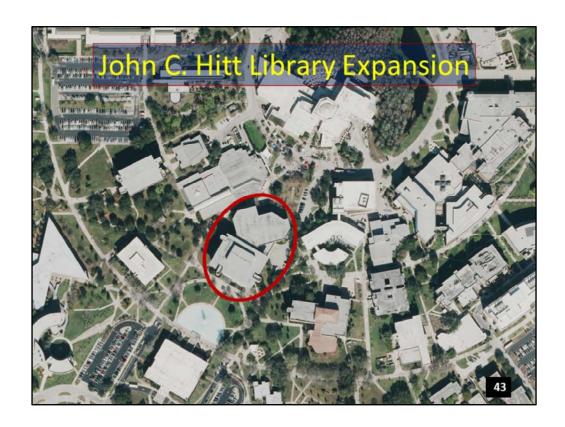

Funding: TBD

The estimated size of this concept is 7,200 square feet.

You are looking at a perspective looking southeast. To the north of this facility is the Honors College meditation garden. It would contain a Grand Entry and Reception Space, a moot courtroom, support space for deliberation, classroom space, a conference room and IT space.

This project is pending approvals.

Expansion to existing library

Architect – Holtzman Moss Architects Construction – Turner

Project Cost: \$70m Estimated '14-'15 \$36.3M

Funding: CITF due to the \$2 fee increase but is pending governor approval of the sale of bonds

Gross Square Footage (GSF): 235,000

3 Phases:

- Automated retrieval system and expansion
- Renovation

Includes:

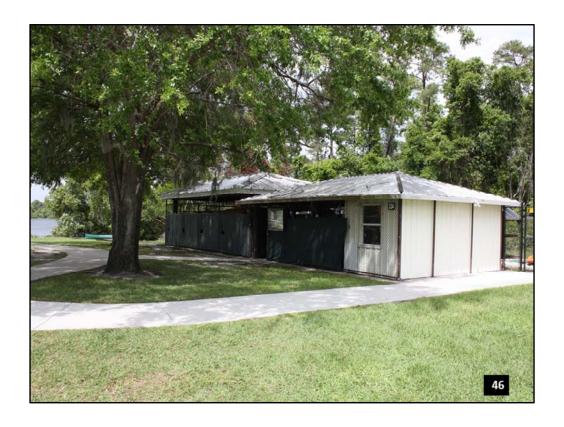

- Technology station
- Study rooms
- Instructional rooms
- Digital Initiatives Spaces
- Graduate Student Commons
- Open Seating

Located at Lake Claire.

Funding is pending: the CITF request is \$3M but is pending governor approval of the sale of bonds

Designers and Builders: TBD

Amenities include the design of a new Boathouse which will serve the needs of Recreation and Wellness's Outdoor adventure program

The boathouse will serve as storage and protection of watercrafts. All the access points for the facility will be designed to meet current ADA requirements.

Location – Gemini and Centaurus

Architect – for phase 1 was HKS with Duda-Paine and Construction was by Balfour Beatty. The next phase will need to be re-advertised for services.

Project Cost: \$67.5M

Funding Source: TBD (Phase I PECO)

Scope: Includes approximately 600 seat concert hall and an approximately 520 seat proscenium theater.

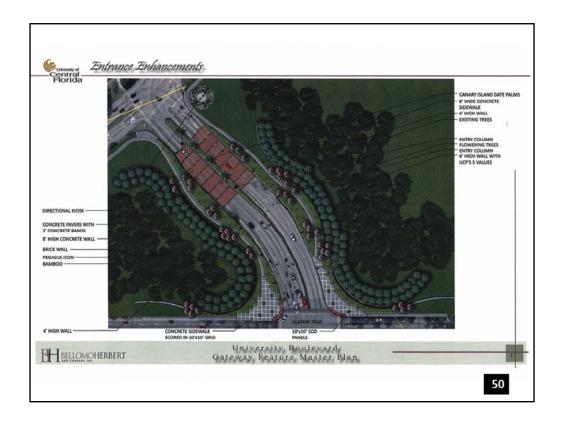

Project is on hold pending funding.

Located at the entry points to the UCF main campus.

The designer was Bellomo Herbert

These Entrance Enhancement designs were developed and approved about two years ago and would define the gateways to campus and celebrate one's arrival to UCF.

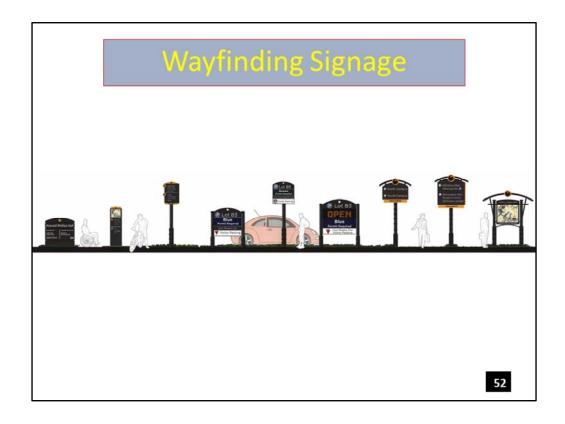

This plan of the University entrance would define the entry by means of signage, landscape and hardscape. It will include flowering trees, palms, varying wall heights.

This is an image of the signage including the Pegasus and UCF Creed- Integrity, Scholarship, Community, Creativity and Excellence

Thiis project is on hold pending funding

Lastly, is the Wayfinding design that was also approved about two years ago. The concept was designed by AECOM with the idea of working from the larger faster scale to the smaller pedestrian scale.

It addresses Vehicular signage (example of this is the digital sign on Alayfaya near Greek Park)

Parking Signage

Building Identification Signage

Pedestrian signage

And several designated signage area that allows for interchangable signs which would help eliminate temp signs across campus.

Attachments: 2013-14_EG Funding Needs and Sources_052213_TO LYNN&TRACY_May22.xlsx;

Planned E&G Budget Allocations 2010-11 forward.xlsx

Tracy/ Lynn – I updated the first tab in the Funding Needs and Sources document with some notes that explain the major changes from the original version over on the far right.

The planned E&G budget allocations document has been updated to include place holders for items that have come up in our Tuesday budget chat meetings. This shows a very worst case scenario as it includes the \$7.5m for research support, \$8m for Colburn Hall, etc., but I thought we could discuss what items should stay and how to tackle some of the estimates.

I will bring copies of both documents for our meeting this afternoon.

Thanks,

Christy Tant, CPA

FOOTNOTE LEGEND:

Use of Auxiliary Resources

Excess Salary for administrators subject to E&G salary cap 500,000

OPS Healthcare costs - probably won't be funded centrally ?

Any of the items above? ?

¹ Although recurring in nature, these allocations will always be managed as non-recurring allocations to the divisions.

²These allocations will be reflected in the start up budget on the allocation document. All others will be transferred during the year based on support provided.

Tracy – Here are the documents for tomorrow morning meeting. I will print color copies from home (forgot I could do that!).

Planned allocations with no amounts:

- 1. Financial aid to replace decrease in Bright Futures
- 2. Faculty hires to address student to faculty ratio (in addition to the amount Lynn included)
- 3. Merit increase
- 4. Academic Advising
- 5. Graduate education support
- 6. Supplemental course incentive

Planned allocations with amounts:

- 1. Electronic journal subscription \$105,000
- 2. Police 6 to 9 new law enforcement positions, 2 key/ camera positions, market adjustment
- 3. HR position for Affordable Health Care Act \$100,000
- 4. SMCA salary increase \$25,000
- 5. SciQuest \$600,000 in 2014-15, \$300,000 recurring
- 6. TIP, RIA, SoTL \$500,000

Other items to discuss:

- 1. \$5 million non-recurring reduction to units in 2012-13 to remain non-recurring
- 2. \$2.5m contribution from units toward 2012-13 enrollment shortfall to remain non-recurring
- 3. Decrease in graduate health insurance/ potential funding "source" in future
- 4. OPS Healthcare costs (in excess of state funding)
- 5. Tuition budget only \$1.4 million held in reserve, may want to hold back waivers held in reserve or some of the 2012-13 rate increase to be safe

Source/ Notes: Mr. Merck

FOOTNOTE LEGEND:

Potential new items:

A&F - HR Coordinator position needed as a result of Affordable Health Care Act. - estimate \$100k

AA - UCF portion of consortium dues for electronic journal subscription is increasing because dues are now being allocated based on headcount. Provost not sure if this expense will hit this year or next - \$509k

A&F - Sci Quest purchasing catalog (looks like BOG will require participation). Mr. Merck to discuss w/ Provost and estimate of \$250k - \$500k to be confirmed w/ Becky.

AA - Graduate Health Costs - M. Stern estimates \$300k savings next year. No planned allocation is necessary. Do we want to evaluate taking some amount centrally at end of the year?

OPS Healthcare costs - probably won't be funded centrally

Colburn Hall - \$8m

Academic Advising project

\$5k recurring for 2012-13 faculty promotions next year (per Lynn)

Salary increase for SMCA (approx. \$25k)

Police - \$100k for year one and \$80k recurring per position

Finanical Aid to offset increase in eligibility criteria of Bright Futures

¹Although recurring in nature, these allocations will always be managed as non-recurring allocations to the divisions.

ITEM: NG-1

University of Central Florida BOARD OF TRUSTEES

SUBJECT: Board Policy on Delegation of Authority to the President

DATE: October 26, 2017

PROPOSED BOARD ACTION

Adopt a board policy detailing delegation of authority to the president of the University of Central Florida.

BACKGROUND INFORMATION

Article IX, Section 7 of the Florida Constitution provides that the Board of Governors shall establish the powers and duties of the university boards of trustees. Board of Governors Regulation 1.001 delegates those powers and duties to the boards of trustees. The Board of Trustees may further delegate certain powers and duties to the President. This policy outlines the authority delegated to the president, as well as specifying the items that require specific approval of the board of trustees or consultation with the chair of the Board of Trustees.

UNIVERSITY OF CENTRAL FLORIDA BOARD OF TRUSTEES POLICY

Delegation of Authority to the President

POLICY STATEMENT

Article IX, Section 7 of the Florida Constitution provides that the Board of Governors shall establish the powers and duties of the university boards of trustees. Board of Governors Regulation 1.001, copy attached as Exhibit A, delegates those powers and duties to the boards of trustees.

The Board of Trustees desires to further delegate certain of its powers and duties to the President as more particularly described below. Any power or duty delegated by the Board to the President may be rescinded at any time by majority vote of the Board. Except as otherwise provided herein, the President may further delegate his or her powers and duties to employees of the University in accordance with the University's Policy on Delegation of Authority.

DEFINITIONS

Affiliated Entities: Direct support organizations, practice plan corporations, or self-insurance trust funds of the University of Central Florida.

Board: UCF Board of Trustees

BOG: Florida Board of Governors

President: President of UCF

UCF or University: University of Central Florida

PROCEDURES:

Except as provided herein, the Board delegates to the President all usual and customary powers of a President to administer the day to day operations of the University. This includes the powers and duties described in Board of Governors Regulation 1.001 and those reasonably implied therefrom, which are not required to be directly performed by the Board.

The President's authority also includes the following:

- 1. Propose regulations for approval by the Board.
- 2. Govern Traffic on the grounds of the University.
- 3. Close and/or suspend operations of the campus as deemed necessary.
- 4. Set the agenda for Board meetings in consultation with the Chair of the Board.
- 5. Establish the University calendar.
- 6. Administer the personnel program subject to Board and BOG policies and regulations.
- 7. Administer University travel in accordance with Section 112.061, Florida Statutes.
- 8. Administer the collective bargaining process.
- 9. Administer the financial activities of the university including proposing university budgets and managing university revenues and expenditures.
- 10. Administer the purchasing and construction programs and act as custodian for university property.
- 11. Execute contracts on behalf of the Board.
- 12. Oversee the research activities of the University, including managing the intellectual property of the university.
- 13. Oversee the philanthropic activities of the University.
- 14. Perform such other duties related to the above not specifically retained by the Board.

Items requiring specific approval of the Board:

- 1. All duties required to be undertaken directly by the Board pursuant to BOG Regulation 1.001.
- 2. Financial commitment, obligation, or contingent risk of five million dollars or .5% percent of the University budget, whichever amount is smaller.
- 3. Contractual obligation of either more than five (5) years' duration or an aggregate net value of five million or more dollars.
- 4. Changes requiring SACS substantive-change approval.
- 5. Acquisition (including gifts), sale, or encumbrance of real property.
- 6. Matters with potential for significant damage to the reputation of the University.
- 7. Any material change to the University's investment program.
- 8. Approval of capital projects valued at two million dollars or more and any material changes to such projects.
- 9. Borrowing of funds by the University or Affiliated Entities and any changes to the term of existing indebtedness.
- 10. Public Private Partnerships.
- 11. Use of University funds for capital improvement projects exceeding two million dollars in construction costs and all changes to such projects that increase project costs by more than 10 percent of the original estimate.
- 12. Creation, dissolution or amendment of governing documents of Affiliated Entities.
- 13. Review and confirmation of all appointments by the President to affiliated entities other than President or designee as provided in Section 1004.28 F.S.
- 14. Adoption of or amendment to the University strategic plan.

- 15. Annual operating and capital budgets for the University and Affiliated Entities and amendments to any line item of two million dollars or greater that exceeds 10% of the value of such line item.
- 16. University works plans, accountability plans and all other significant reports required to be submitted to the BOG.
- 17. Creation or termination of degree programs.
- 18. Naming of Buildings.
- 19. Establishment or closure of educational sites.
- 20. Amendment to University governing documents.
- 21. Establishment or elimination of Board Committees.
- 22. Hiring, supervision, termination and annual evaluation of the President.
- 23. University regulations and Board policies.
- 24. Annual institutional budget request and changes thereto in an amount greater than the lower of five million dollars or .5% of the budget
- 25. Adoption of new or changes in existing tuition and fees.
- 26. Internal and external audits of the University and Affiliated Entities.
- 27. Campus master plan, capital improvement plans, and amendments thereto.
- 28. Adoption or amendments to Committee charters.
- 29. Awarding of Tenure.
- 30. Collective bargaining agreements and impasse.
- 31. Conferral of degrees.
- 32. Transfer of university funds to, from, or among Affiliated Entities.
- 33. Performance unit plan adoption, amendment and cancellation as well as participation, goals and payments under the performance unit plan.
- 34. Hiring and firing or reduction of compensation of the Vice President and General Counsel, Chief Compliance Officer, and Chief Audit Executive, who shall report to the Board as well as the President.
- 35. Selection of Chair and Vice Chair of the Board.
- 36. All items required by the BOG or Florida Legislature to be approved by the Board.
- 37. Any additional items required by the Board to be approved by it.

Items requiring President to consult with the Board Chair before implementation:

- Hiring, dismissal (except for Vice President and General Counsel, Chief Compliance
 officer and Chief Audit Executive) and any annual increase of more than 5% in the
 compensation of any Vice President or other direct report to the President, the head
 football coach or the head men's basketball coach. The President and Chair shall review
 and agree annually on the individuals that are governed by this provision.
- 2. Initiation, appeal or settlement of lawsuits involving the University or Affiliated Entities other than tort claims handled by the State Division of Risk Management.
- 3. Any matter which has the potential to create significant political or reputational issues for the University.

4.	Employment contract with an employee of the University or an Affiliated Entity with a
	term greater than one year

ITEM: <u>FF-5</u>

University of Central Florida Board of Trustees

SUBJECT: Finance and Facilities Committee Charter Review

DATE: July 20, 2017

PROPOSED BOARD ACTION

Approve the updated Finance and Facilities Committee charter.

BACKGROUND INFORMATION

Regulations implemented by the Board of Trustees in January 2011 direct the Finance and Facilities Committee to review its charter every three years. Changes to the charter proposed at the April 19, 2017, and May 16, 2017, FFC meetings are highlighted in yellow on Attachment A. These changes were approved at the June 14, 2017, FFC meeting.

Changes only in style require approval at the committee level. Changes in content must be approved by the committee and then be presented to the full Board of Trustees for approval.

Supporting documentation: Attachment A: Draft Finance and Facilities Committee

Charter

and Chief Financial Officer

Attachment A

UNIVERSITY OF CENTRAL FLORIDA

FINANCE AND FACILITIES COMMITTEE CHARTER

1. Overall Purpose/Objectives

The Finance and Facilities Committee ("Committee") is a committee of the University of Central Florida Board of Trustees ("Board"), whose members are appointed by the Chairman of the Board. The general purpose of the Committee is to provide review, policy guidance and strategic oversight of the university's financial matters, financial reporting statements, campus master planning activities and other real estate type activities for both the University and its direct support organizations ("DSO(s)").

For university financial matters, the Committee will review actions to be presented to the Board and provide a recommendation. This includes, but is not limited to, the annual University budget and all tuition, room rents, and other student fees that are required by state statute to be approved by the Board. The committee will schedule and periodically review financial reports from the university's direct support organizations (DSO's).

For campus master planning and other real estate matters the Committee will coordinate the campus master planning process and provide recommendations to the Board for action. The committee will annually review the capital improvement plan submissions to the Board of Governors and State legislature, and periodically review programs that ensure the maintenance and safety of University facilities. The committee will review any real estate related projects or facilities involving the University or any of its DSO's, or any other university entities that may arise in the future by whatever designation, and make recommendations to the full Board. The Committee will participate in (and review and approve) the planning process for any DSO-initiated program that will materially affect the University either financially or in reputation, or involve any real estate related matters on or off campus.

2. Authority

The Board authorizes the Committee to:

- 2.1 Perform activities within the scope of its charter.
- 2.2 Engage outside consultants and other advisors as it deems necessary with approval of the Board or the President.
- 2.3 Have unrestricted access to management, faculty, and employees of the University and its DSOs, as well as to all books and records related to facilities planning.

3. Organization Membership

- 3.1 The Chair of the Board will appoint the chair and members of the Committee, all of whom must be members of the Board.
- 3.2 The Committee will consist of at least five members.
- 3.3 Members will serve on the Committee until their resignation or replacement by the Chair of the Board.

4. Meetings

- 4.1 A majority of the members of the Committee will constitute a quorum for the transaction of business.
- 4.2 Meetings shall be held not less than three times per year.
- 4.3 The Committee shall maintain written minutes of its meetings.
- 4.4 The Vice President for Administration and Finance, who has operational responsibility for facilities planning, will be the liaison to the Committee from the UCF Administration. Said Vice President will regularly meet and correspond with the Chairman of the Committee and in consultation with the Chairman, prepare the agenda for meetings of the Committee. Said Vice President will further advise and keep informed as needed both the President and the Chair of the Board on a regular basis regarding matters brought before and actions taken by the Committee.
- 4.5 The Committee may request special presentations or reports that may enhance members' understanding of their responsibilities.
- 4.6 It is the intent of the Committee for matters within its purview to come before the Committee as early as possible so that the Committee can issue its recommendations and exercise its oversight at the beginning of any particular project or matter.

5. Roles and Responsibilities

FINANCE

With regard to each item listed below, the committee will:

- 5.1 review the annual operating budgets of the university and recommend appropriate action to the Board
- 5.2 review the financial statements of the university's DSOs, making recommendations for action to the board as needed; (frequency of review is at the discretion of the committee, but will be not less than once each year)

- 5.3 review the annual capital budget request of the university and recommend appropriate action to the Board
- 5.4 review annual (or interim) changes to the university's tuition and fees and any related policy changes, and recommend appropriate action to the Board
- 5.5 review the annual financial statements of the university, making any recommendations regarding such reports deemed necessary to the Board
- 5.6 oversee investments of university cash balances and review quarterly.

FACILITIES

6. Campus Master Plan

- 6.1 Become familiar with the current campus master plan and the philosophies behind its development.
- 6.2 Understand the statutorily required process and frequency of updates to the plan.
- 6.3 Recommend amendments to the plan to the Board.
- 6.4 Recommend appropriate action regarding the acquisition and disposition of real property.

Capital Improvement Plan

- 6.5 Review all proposed new construction and renovation projects exceeding \$2 million in construction costs.
- 6.6 Review all changes to projects that exceed \$2 million in construction costs or that increase project costs by more than 10 percent of the original estimate presented to the committee.
- 6.7 Receive as information all new construction projects less than or equal to \$2 million in construction costs.
- 6.8 Review and recommend to the Board the annual list of capital improvements for funding by the Legislature, including the PECO list and the Capital Improvement Program for all other projects.
- 6.9 Periodically review and recommend to the Board matters and facilities relating specifically to student housing, both on and off campus and further review a long-term strategic planning program for said student housing.

Direct Support Organizations

- 6.10 Participate in the planning process for any DSO involvement in capital projects that affect the University either financially or in reputation or involve any real estate.
- 6.11 Review, provide oversight with respect to, and provide recommendations to the Board for any actions that may be required stemming from a DSO initiated capital project.

Maintenance of Facilities

- Review the effectiveness of the various University and DSO organizations in maintaining the buildings and grounds that are responsibilities of the Board.
- 6.13 Review the effectiveness of University law enforcement in protecting the physical assets of the University and providing a safe environment for the various University constituencies.
- 6.14 Review the effectiveness of the campus organizations responsible for environmental health and safety both in the buildings and on the grounds.
- 6.15 Provide recommended action items to the Board on all of the items above to the Board when necessary.
- 6.16 Adopt and recommend to the Board a policy associated with the naming of any buildings or facilities of the University.

Reporting Responsibilities

- 6.17 Regularly update the Board about Committee activities and make appropriate recommendations.
- 6.18 Ensure the Board is aware of matters within the purview or responsibility of the Committee that may significantly impact the financial condition or legal liability of the University.

Charter Review

- 6.19 Review the Committee Charter at least every three years and discuss any required changes with the Board.
- 6.20 Ensure that the charter is approved or reapproved by the Board after each update.

ITEM: FF-1

University of Central Florida Board of Trustees

SUBJECT:

Five-year Capital Improvement Plan

DATE:

July 25, 2013

PROPOSED BOARD ACTION

Approval of the capital improvement plan for 2014-15 through 2018-19.

BACKGROUND INFORMATION

Each year, the university must submit an updated capital improvement plan to the Board of Governors. This plan identifies projects that will be included in the three-year Public Education Capital Outlay (PECO) list, and it provides information to the State Board of Education for its request for capital project funding for 2014-15.

The capital improvement plan must be submitted to the Board of Governors' staff by August 1, 2013. The attached schedules include the following:

- projects that are proposed for inclusion in the five-year capital improvement plan
- items to be included in the 2014-15 Appropriations Authorization Bill, including projects funded by bonds, direct support organization projects, and projects requiring general revenue to operate.

We request approval to submit the 2014-15 Capital Improvement Plan with the projects listed in the attached schedules.

Minutes Board of Trustees Meeting University of Central Florida July 25, 2013

Acting Chair Olga Calvet called the meeting of the UCF Board of Trustees to order at 1:08 p.m. in the Live Oak Center on the UCF Orlando campus.

The following board members attended the meeting: Trustees Richard Crotty, Alan Florez, Robert Garvy, Reid Oetjen, John Sprouls, and Melissa Westbrook.

WELCOME

Calvet reminded the board that the meeting was covered by the Florida Sunshine Law and that the public and press were invited to attend.

Calvet welcomed the board members and called on Dr. Rick Schell, Associate Corporate Secretary, to call the roll. Schell determined that a quorum was present.

Calvet called for approval of the May 23, 2013, board meeting minutes, noting that the minutes had a correction involving her attendance via teleconference. The board meeting minutes were approved as corrected.

Calvet called on President John C. Hitt for remarks and introductions.

REMARKS

Hitt welcomed **State Representative Joe Saunders**, a UCF graduate, representing District 49, which includes UCF. Saunders provided a legislative update that included the restoration of funding to the budget to the entire state university system. He presented Hitt and the board with a commemorative plaque reflecting the State of Florida's House Resolution 9119, which recognized the 50th anniversary of the University of Central Florida and designated June 10, 2013, as UCF Day in Florida.

Hitt referred the board members to the Board of Governors' 2013-14 System Summary of University Annual Work Plans included in their meeting materials and asked that they review it.

INTRODUCTIONS

Hitt recognized the following faculty and staff members for their accomplishments.

A. Staff

Hitt congratulated **Janet Balanoff**, Director of Equal Opportunity and Affirmative Action Programs, for achieving senior certified affirmative action professional status awarded by the American Association for Affirmative Action.

B. Employee of the Month

The Employee of the Month for June was **Katrina Cesaire**, a senior executive secretary in the Provost's Office.

The Employee of the Month for July was **Donna Lucas**, an administrative assistant in the Psychology Department.

INFORMATION

Calvet noted the following information item.

• INFO-1 2015-16 UCF Board of Trustees Meeting Dates

CONSENT AGENDA

Calvet read the consent agenda items into the record. A motion was made to accept the consent agenda, and members of the board unanimously approved the following actions.

- **CL-1 Fourth Amended and Restated Employment Agreement for President John C. Hitt** Approval of the Fourth Amended and Restated Employment Agreement for John C. Hitt and authorization to the vice president and general counsel to draft an employment agreement consistent with the recommendations approved by the board and to be executed and approved by the chair of the board and chair of the Compensation and Labor Committee on behalf of the board.
- **EP-1** Conferral of Degrees Concurrence with the conferral of degrees at the Summer 2013 commencement ceremonies on August 3:

2,965 baccalaureate degrees
711 master's degrees
145 doctoral and specialist degrees
3,821 Total

- **FF-1 Five-year Capital Improvement Plan Approval** Approval of the Five-year Capital Improvement Plan for 2014-15 through 2018-19.
- FF-2 Release of Unrestricted Golden Knights Corporation Revenues Approval of the release of the unrestricted Golden Knights Corporation revenues to the UCF Athletics Association for 2012-13.
- **FF-3** Amend Payment for UCFAA Loan to the University Approval of UCFAA to make a reduced loan payment to the university.

• **FF-4 2013-14 Direct Support Organizations' Budgets** – Approval of the 2013-14 Direct Support Organizations' Budgets (Golden Knights Corporation, Athletics Association, Convocation Corporation, Finance Corporation, Foundation, and Research Foundation).

ADVANCEMENT COMMITTEE REPORT

Rich Crotty, Chair of the Advancement Committee, announced that there was no report for the committee.

AUDIT, OPERATIONS REVIEW, COMPLIANCE, AND ETHICS COMMITTEE REPORT

Alan Florez, Vice Chair of the Audit, Operations Review, Compliance, and Ethics Committee, reported the following highlights from the June 21, 2013, meeting.

- **Dr. Rick Schell**, Vice President and Chief of Staff, provided an update on the search for the Chief Audit Executive.
- **Amy Voelker**, Director of University Audit, provided a work plan update, noting that six of the fifteen planned internal audits had been completed. She recommended that the current plan remain in place during the transition period to a new chief audit executive.
- **Rhonda Bishop**, Chief Compliance and Ethics Officer, advised that a candidate was selected for the position of Director of Compliance and Ethics and that a search for a Director of Compliance and Risk Management would be reopened.
- Bishop updated the committee on the off-site review by the U.S. Department of Education regarding the university's compliance with the Clery Act.
- Bishop further advised that following the Tower One incident on March 18, 2013, the U.S. Department of Education made two additional requests for information regarding the university's response.
- Bishop gave an update on athletics compliance as part of the university's corrective actions in response to the NCAA infractions case. She noted that a compliance group retained to conduct an annual review of the athletics compliance program would present its completed report.
- Bishop also reported on an effort led by her office to bring together Florida SUS compliance officers and staff to discuss compliance topics and new regulatory requirements and to share best practices.

COMPENSATION AND LABOR AD HOC COMMITTEE REPORT

John Sprouls, Chair of the Compensation and Labor Ad Hoc Committee, noted the item approved on the consent agenda. He announced that the committee held meetings on June 27, 2013, and July 16, 2013.

• CL-2 Board of Trustees and United Faculty of Florida-Collective Bargaining Impasse Resolution – A motion was made and unanimously passed by the board approving the Board of Trustees and United Faculty of Florida-Collective Bargaining Impasse Resolution.

Sprouls reported that at its June 27, 2013, meeting the committee reviewed and revised the president's employment agreement to conform to Florida statutes.

EDUCATIONAL PROGRAMS COMMITTEE REPORT

Robert Garvy, Chair of the Educational Programs Committee, reported the highlights from the committee meeting held earlier in the day.

- **Dr. Tony Waldrop**, Provost and Executive Vice President, gave an update on conferral of degrees for the summer session.
- **Dr. Michael Georgiopoulos**, Dean of the College of Engineering and Computer Science, reported on the academic program review for the College of Engineering and Computer Science. He also reported on the status of the recommendations made for each of the programs reviewed in 2011-12.

Hitt stated that the faculty-to-student ratio continues to be a university-wide issue. He noted that it is a tribute to faculty members that they continue to produce high quality instruction and research, along with graduating large numbers of students. Hitt stated that the university seeks to hire additional tenure-track faculty.

FINANCE AND FACILITIES COMMITTEE REPORT

Olga Calvet, Chair of the Finance and Facilities Committee, noted the items approved in the consent agenda.

Calvet reported the following highlights from the committee meeting held earlier in the day.

- Approval of a new five-year capital improvement plan.
- Approval of the 2013-14 operating budgets for several DSOs, including the Golden Knights Corporation, Athletics Association, Convocation Corporation, Finance Corporation, Foundation, and Research Foundation, per Florida Board of Governors' requirement.
- Approval for a reduction this year of the loan payment that the UCFAA makes to the university.
- Approval of the release of revenues that are above budget or obligations by the Golden Knights Corporation to the UCFAA for 2012-13. In addition, the committee reviewed the quarterly financial information for various DSOs and addressed board members' questions.

NOMINATING AND GOVERNANCE COMMITTEE REPORT

Rich Crotty, Vice Chair of the Nominating and Governance Committee, reported that the committee met via teleconference on June 28, 2013, to nominate a chair and vice chair for the UCF Board of Trustees. He stated that the committee's recommendations were void since Grindstaff was not reappointed to the board by the governor. The matter was tabled until the committee could reconvene to discuss the issue.

• NG-1 Chair and Vice Chair Recommendations, Nominations, and Elections, UCF Board of Trustees – A motion was made and passed to table the item.

Garvy recommended that the board acknowledge its appreciation for Grindstaff's leadership, service, and contributions to the board of trustees, and the trustees concurred.

Hitt stated that Grindstaff had served the board with devotion and distinction, and he will be missed.

STRATEGIC PLANNING COMMITTEE REPORT

Alan Florez, Chair of the Strategic Planning Committee, announced that the committee met on June 24, 2013, and reported the following highlights from that meeting.

- Florez and Admiral Al Harms, Jr., Vice President for Strategy, Marketing, Communications, and Admissions, recommended a newly adopted process for the Strategic Planning Committee to use the Board of Governors' university work plan as the principal document for defining and measuring outcomes. Harms advised that UCF's 2013-14 work plan was approved by the Board of Governors during its June meeting.
- Harms also recommended that the committee monitor UCF's progress in achieving specific goals outlined in future performance-funding models. The committee is also considering a name change to reflect its new focus on these initiatives.

ANNOUNCEMENTS AND ADJOURNMENT

Chair Calvet announced the following upcoming meetings:

	Board of Governors meeting	September 11-12 (New College of Florida)
	State of the University address	September 24 (Pegasus Ballroom)
	Board of Trustees meeting	September 26 (Live Oak Center)
	Diversity Breakfast	October 21, 8-10:00 a.m. (Pegasus Ballroom)
	Trustee Summit 2013	November 20 (Florida International University)
	announced that information on the Board of tees' materials.	Governors' Trustee Summit 2013 was included with
Calvet	invited the trustees to attend the UCF commo	encement ceremonies the first weekend in August.
Calvet	adjourned the board meeting at 1:45 p.m.	
Respec	tfully submitted: John C. Hitt Corporate Secretary	Date:

July 31, 2013

Mr. Tim Jones Chief Financial Officer Board of Governors State University System of Florida 325 West Gaines Street, Suite 1614 Tallahassee, Florida 32399-0400

Dear Mr. Jones:

In accordance with your request dated June 10, 2013, to the Council of Presidents, enclosed is the University of Central Florida's Five-Year Fixed Capital Improvements Plan for the years 2014-19. This list revises UCF's primary priorities of previous years in accordance with the funding allocated by the Board of Governors, and it also includes facilities consistent with recent program developments and needs of the university. Utilization was considered in the prioritization of UCF's projects. The order of projects reflects the priority given in the Board of Governors' instructions.

The UCF Five-Year Fixed Capital Improvements Plan was reviewed and approved by the University Board of Trustees on July 25, 2013.

Please have members of your staff contact Lee Kernek at (407) 823-3812 or Gina Seabrook at (407) 823-2166 if they have questions or need additional information related to this request.

Cordially yours,

John C. Hitt President

Projects to be programmed
Projects with approved building programs

Remodeling denotes <u>change</u> in space usage. Renovation denotes <u>no change</u> space usage.

Short-Term Plan: 2014-2019 (CIP-3)

CIP-3 SHORT-TERM PROJECT EXPLANATION								
AGENCY Univers	sity of Central Florida		Page	1	of .	2		
BUDGET ENTITY	SUS	AGENCY PRIORITY	1					
PROJECT TITLE	Engineering Building I	DATE BLDG PROGRAM						
	Renovation	APPROVED						

Engineering Building I (EBI) will be 28 years old at the time of renovation. During that time, it has housed the majority of the engineering facility needs. The Engineering Building, currently houses classrooms, instructional and research labs, micro-fabrication clean room, offices, conference rooms, and support space for such critical Science, Technology, Engineering, and Math (STEM) programs as the Engineering Leadership and Innovation Institute (ELI2), Mechanical and Aerospace Engineering (MAE), Civil Environmental and Construction Engineering (CECE), Applied Material Processing and Analysis Center(AMPC), Materials Engineering (ME), and Electrical and Computer Engineering (ECE). The building will also house Materials Science and Engineering Research, an intense laboratory program

The Mechanical and Aerospace Engineering, Materials Engineering and Engineering Technology Departments serve 1,600 undergraduate and 200 graduate students. Significant renovation of the facility is needed to accommodate the expansion of the department. These programs have dramatically different facility needs and, because of the age of the facility, renovation is imperative. Research accomplished by these departments serves dozens of high technology industrial firms located across the nation. Occupancy of the space without renovation will significantly impair the ability to teach and conduct research in EBI.

The College of Engineering and Computer Science at UCF represents the core of UCF's STEM programs. It currently enrolls 6,280 undergraduate students, making it the largest in Florida and the 9th largest in the country.

Given the age of the facility, the status of electrical wiring, mechanical systems, carpeting, and lighting should be evaluated for replacement. The building is in fair condition and requires major attention to its building systems, to include: asbestos abatement; electrical; HVAC; lighting; controls, commissioning, chilled water upgrade; fire alarm; fire sprinklers; plumbing; information technology (IT server rooms); elevator upgrade; interior remodeling; and exterior lighting.

Space utilization in the facility exceeds the current statutory requirement of 60% student stations occupied at a minimum of 40 hours per week. Over a one-week period, using a 75-hour week, class seat utilization averaged 55.3%. Narrowing the focus to a 40-hour week would substantially increase the utilization rates. Research labs receive continual use, with sessions running in shifts.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

CIP-3 SHORT-TERM PROJECT EXPLANATION

Research/Laboratory

Space classification shall be predominately laboratory type, with classroom or office type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Laboratories should have continuously variable air flow valves with ventilation reset capabilities. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type. Domestic and laboratory hot water needs shall be provided by thermal solar means as a primary means.

While LEED certification is not mandatory for existing buildings, the goal is to achieve LEED Silver Certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey was conducted and approved in February, 2011. See recommendation No. 2.1 Engineering Building Renovation.

STATISTICAL JUSTIFICATION

The Statistical Justification portion of the CIP-3 is not required this year.

CIP-3 SHORT-TERM PROJECT EXPLANATION								
			Page 1 of 2	2				
AGENCY Univers	sity of Central Florida							
BUDGET ENTITY	SUS	AGENCY PRIORITY	2					
PROJECT TITLE	Mathematical Sciences	DATE BLDG PROGRAM						
	Building Remodeling and	•						
	Renovation							
		APPROVED						

The Math Sciences Building (formerly known as Math and Physics Building) is a 44-year old, 106,523 gross square foot, teaching facility containing classrooms and teaching labs, research labs, study rooms, offices, conference rooms, and support space for Science, Technology, Engineering, and Math (STEM) education and research in the areas of mathematics, physics, chemistry, and optics and lasers. The Math Sciences facility lays the foundation for UCF's STEM programs. This building requires a total remodeling-renovation of its interior space to better address the needs of the user group. The building systems are aging and obsolete, and no longer support the building research applications or the classroom demand. The facility has not been renovated in its 44-year history. It is in poor condition and requires attention to its building systems, to include asbestos abatement; HVAC; lighting; controls; commissioning; fire alarm; fire sprinklers; plumbing; information technology IT (server rooms); chilled water upgrade; utilities; envelope roof, windows and entrances; elevator replacement; new auditorium seating; interior remodeling; exterior lighting, and egress and accessibility. Life-safety code violations need to be corrected. A remodeling-renovation of this facility will make it possible to bring the balance of the entire facility up-to-date, making it more suitable to meet the needs and goals of the university.

Space utilization in the facility exceeds the current statutory requirement of 60% student stations occupied at a minimum of 40 hours per week. Over a one-week period, using a 75-hour week, class seat utilization averaged 62.52%. Narrowing the focus to a 40-hour week would substantially increase the utilization rates.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

APPROVED								
	AGENCY PRIORITY	Page _ AGENCY PRIORITY3 DATE BLDG PROGRAM	Page 1 AGENCY PRIORITY 3 DATE BLDG PROGRAM	Page 1 of AGENCY PRIORITY 3 DATE BLDG PROGRAM				

The University of Central Florida (UCF) was again required to reduce its budget to a lower level of funding, resulting in the need to prioritize maintenance items. Those areas relating to life safety codes and Americans with Disability Act (ADA) were given the highest priority. Many other maintenance issues were deferred. The alternative of deferring maintenance has already been taken. To delay maintenance continually will result in predictable failures thus dramatically reducing the normal expected life of materials, systems, and buildings resulting in negative impacts to the operations of the university. Deferring maintenance generates replacement needs and costs sooner than is normal.

The limited funding created a backlog of utilities, infrastructure, capital renewal, and roofing needs. HVAC systems and roofs have reached the end of their projected lives. Air distribution and air quality in older buildings need attention.

During 2010-2011, an external analysis of utilities, infrastructure, capital renewal and roofs was conducted to review and update the needs of the university. The analysis focused on future utilities and infrastructure needs, building exteriors, mechanical, electrical, plumbing, elevator, and safety systems. In addition, the condition of telecommunications duct banks and systems, roadways, sidewalks, exterior lighting, and irrigation systems were reviewed and needs established for replacement, upgrades, or repairs. The analysis resulted in identifying over 300 items, with an estimated cost in excess of \$100,000,000.

As the university continues to grow and more facilities are constructed, so does the need for organized approaches to scheduling and funding maintenance. In addition to a systematic approach of proper maintenance and scheduling, adequate funding is needed to maintain functionality and to reach the expected life of systems that the university depends on for operations. A continuing source for funding is needed.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey was conducted and approved in February, 2011. See recommendation No. 1.2, Utilities Infrastructure Improvements.

STATISTICAL JUSTIFICATION

The Statistical Justification portion of the CIP-3 is not required this year.

CIP-3 SHORT-TERM PROJECT EXPLANATION								
			Page 1	of 2				
AGENCY Univer	sity of Central Florida	_						
BUDGET ENTITY	SUS	AGENCY PRIORITY	4					
PROJECT TITLE	Library Building Renovation	DATE BLDG PROGRAM						
	Phase II	APPROVED						

The existing Library is inadequate to meet the current and future needs of a growing student population in both the amount and quality of space required for research, study, and collaborative learning, as well as space to accommodate collection growth. The student FTE in 1967 was 1,500; currently it stands at more than 32,000, with headcounts exceeding 56,000. The existing Library presently has 1,903 reader seats, which represents about 6% of the main campus FTE, and is significantly less than the minimum requirements recommended by the Association of College and Research Libraries. This project will accommodate 3,264 seats, about 10% of the main campus FTE. Inspections of the building have revealed a number of substantive changes that must be made to the building and systems if it is to continue to serve the university in the future.

The present facility is almost fifty-one years old, and major systems such as HVAC, electrical, plumbing, lighting, elevators and telecommunications are in need of replacement and renovation. The HVAC system is at the end of its life-cycle; the electrical system is the original system installed in the first phase (1967); and the plumbing is out of date; all require replacement. Fire sprinklers are only installed on the first floor, and the alarm system is obsolete. Currently, some areas are experiencing leaks caused by the skylights and the air handler piping. The existing lighting is outdated, has reached the end of its life, and does not meet energy efficiency guidelines. The building will need significant upgrades to meet current ADA accessibility. Due to damage from the HVAC system, mold, and normal building use, interior finishes, including areas with original carpeting, will require replacement.

As part of the 21st Century Library project, the university explored the use of an automated retrieval system (ARC) that could provide quick access to a computer-managed storage system with a capacity of 1,500,000 items. This will allow seldom used material to be stored in the ARC and free up valuable square footage for occupants and stacks in the Library. Although 70% of the materials will be housed in the ARC, library users will still have open access to more than 365,000 materials, including item within the reference collection, general collection, periodicals, and government documents. The most current and heavily used items as well as the most suited to browsing will remain on open shelves. The retrieval system will provide the library with space to grow collections.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

CIP-3 SHORT-TERM PROJECT EXPLANATION

CIP-3 SHORT-TERM PROJECT EXPLANATION								
			Page 1 of :					
AGENCY Univer	sity of Central Florida .							
BUDGET ENTITY	SUS	AGENCY PRIORITY	5					
PROJECT TITLE	Interdisciplinary Research and Incubator Facility	DATE BLDG PROGRAM						
	one modern admity	APPROVED						

Crosscutting research is a critical component in addressing many of the issues facing today's new economy. Traditional academic boundaries inherently slow the creative process necessary to solve today's complex issues in research and delay technology transfer and commercial exploitation. Interdisciplinary research has led the way in the discovery and creation of new disruptive technologies that have fueled economic growth and prosperity in the US. Florida is building a strong base of faculty with a broad base of technological expertise in key areas of science and technology. The ability to leverage the talents of faculty from various disciplines transparently creates synergies, value, and opportunities well beyond the sum of the individual parts.

The Interdisciplinary Research and Incubator Facility (IRIF) represent the core of UCF's STEM programs. Four main user groups have been identified to occupy the IRIF: the NanoScience Technology Center, (NSTC); Advanced Materials Processing and Analysis Center (AMPAC); the Center for Research in Education in Optics and Lasers (CREOL), and the Florida Solar Energy Center (FSEC). In FY 09, they collectively generated nearly \$29 million in external funding, more than 24% of the total university external research funding. All of these centers are highly multidisciplinary, recognizing that dividing lines between various traditional disciplines are blurring and new disciplines are emerging, leading to more rapid innovation. The best way to spur this new paradigm is to provide interdisciplinary research facilities like the IRIF where the various disciplines are housed together to create a new climate of interaction and collaboration. The interdisciplinary research facility will enable the university to cost-effectively share capital and equipment investments, while at the same time enhancing researcher collaboration and reducing the time to move discoveries to commercial markets.

UCF has developed a number of highly successful partnerships, research centers, and a nationally ranked technology incubator which have resulted in expansion into the adjacent Central Florida Research Park. This growth has enabled research centers to develop in their own right. However, that physical growth has been "ad-hoc" in leased, off-campus dislocated facilities, which inhibits the fulfillment of center potential. Further, the separation of on and off-campus facilities has created limitations for crossing disciplines. By developing a quadrant on the main campus that will focus on multiple disciplines, energy research will be enhanced, and the environment within the IRIF will create collaborations.

This facility will provide the infrastructure, atmosphere, and culture necessary to build strong interdisciplinary teams and programs in research, technology transfer and commercialization. The proposed Interdisciplinary Research and Incubator Facility (IRIF) will provide facilities and laboratories for multi-scale materials research and development related to innovative and efficient energy production, storage and utilization. The facility will enable fundamental and applied interdisciplinary research, provide a bridge between technology development and technology transfer and commercialization, and become an integral partner in economic development activities in the region and state.

As a metropolitan university serving the needs of Central Florida, the addition of this building will enhance achievement of the university's goals of:

CIP-3 SHORT-TERM PROJECT EXPLANATION

Offering the best undergraduate education available in Florida;

Achieving international prominence in key programs of graduate study and research;

Providing international focus to our curricula and research programs;

Becoming more inclusive and diverse; and

Being America's leading partnership University.

The building would provide the laboratory space for the interaction, collaboration and professional development of the facility users. The IRIF will promote multidisciplinary research by placing faculty, research scientists/postdocs, and students in the same building where they will interact on a daily basis, learn each other's language, and build collaborations. Co-location with the Materials Characterization Facility will dramatically increase research efficiency, potentially cutting years off the time required to produce new technology. The building will also provide space for community entrepreneurs to launch new ventures based on innovations related to the research efforts at the university.

Space utilization exceeds the current statutory requirement of 60% student stations occupied at a minimum of 40 hours per week. Where research labs, classrooms, and teaching labs are concerned, the UCF main campus already is operating "at or above capacity." Based on the 2011 educational plant survey analysis for space needs, the university has a shortfall of classroom space, research labs, and teaching labs and requires this new building to meet the current and growing demands of the university. Making full use of regular academic buildings, which in some cases includes utilization of spaces designed originally for other purposes (laboratories, theaters, library study areas, etc.), the university has been forced over the past several years to rent temporary facilities both on and off campus for classrooms and other purposes (offices, labs, etc.).

Research labs are very often essential for thesis and dissertation work by students in disciplines with active graduate programs, especially at the doctoral level. Many cases exist on campus where the same lab is used both for graduate coursework, thesis and/or dissertation work, and faculty research.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

July 2013

CIP-3 SHORT-TERM PROJECT EXPLANATION

Research/Laboratory

Space classification shall be predominately laboratory type, with classroom or office type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Laboratories should have continuously variable air flow valves with ventilation reset capabilities. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type. Domestic and laboratory hot water needs shall be provided by thermal solar means as a primary means.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey was conducted and approved in February, 2011. See recommendation No. 3.1, Interdisciplinary Research and Incubator Facility.

STATISTICAL JUSTIFICATION

The Statistical Justification portion of the CIP-3 is not required this year.

CIP-3 SHORT-TERM PROJECT EXPLANATION								
		Page _	1 0	f <u>1</u>				
AGENCY University of Central Florida	AGENOV BRIGRITY							
BUDGET ENTITY SUS	AGENCY PRIORITY	0						
PROJECT TITLE UCF-VC Classroom Building	DATE BLDG PROGRAM							
	APPROVED	<u> </u>						

The UCF-VC Classroom Building was constructed on the Osceola Campus of Valencia College and provides much needed education and support space to an underserved community. We have satellite offices and make use of other college facilities that are outside the immediate tricounty area. The local colleges; however, have grown considerably in the last few years and are unable to accommodate additional courses provided by UCF. The lack of adequate space has limited students' ability to complete their undergraduate degrees.

Space utilization exceeds the current statutory requirement of 60%. Based on the 2011 educational plant survey analysis for space needs, the university has a shortfall of classroom space, and teaching labs and requires this new building to meet the current and growing demands of UCF and VC. UCF students are also taking summer classes and online classes in order to meet graduation requirements.

The success of UCF course and program offerings at VC Osceola to date demonstrate that this shared vision can produce results for students. Five successful Bachelor Degree programs are currently being offered by UCF at VC's Osceola campus: Applied Science, Business Administration, Elementary Education, Psychology, and Interdisciplinary Studies. Enrollment data show that student demand matches the supply of courses in these programs; when additional sections are offered, they approach capacity. However, because of their own enrollment growth VC has insufficient classrooms to allow UCF to meet this demonstrated demand on the VC Osceola campus. Currently UCF has only two classrooms available for priority scheduling, and both UCF and VC are resorting to temporary portable classrooms.

Moreover, needs assessments indicate a strong interest in additional UCF degrees to be offered at VC's Osceola Campus. Currently in the planning stages are the following proposed new degree programs: Criminal Justice, Legal Studies, Health Services Administration, Communication, Nursing, and a Master's Degree in Social Work cohort. These programs have been targeted because of demonstrated interest by VC students, because of their potential as economic drivers, and because they reflect the collective strengths that education and industry share in Orange and Osceola counties, and the greater Central Florida metropolitan area. Unfortunately, the quantifiable lack of existing classroom space on the VC Osceola campus severely hampers UCF's ability to address existing needs, much less the projected demand for additional bachelor's degree programs at VC Osceola Campus.

Many of the students utilizing these facilities are full-time workers and are not able to attend classes on the main campus of UCF. The shared space will provide additional space for the college and allow students to continue their education in a reasonable amount of time. This effort will serve the growth needs of both institutions in a cost-effective manner.

The partnership with other state educational facilities will provide a key relationship for continuing the educational experience. The equipment, facilities, and staff required to bring courses to the student is limited. Therefore, sharing the operations with other educational institutions within the SUS can help to streamline the efforts and raise the level of service provided.

CIP-3 SHORT-TERM PROJECT EXPLANATION

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

In line with the university policy for new construction, this project will be designed and constructed to achieve a LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey was conducted and approved in February, 2011.

			Page _1 of _1				
AGENCY Univer	sity of Central Florida						
BUDGET ENTITY	SUS	AGENCY PRIORITY	7				
PROJECT TITLE	Arts Complex Phase II	DATE BLDG PROGRAM					
	(Performance)						
		APPROVED					

This project is the second phase of a three-phased Center for the Arts. The first was completed in 2011, and has provides classroom, support and office space for Theatre and Music. Phase II will provide performance space for both Theatre and Music. This facility also contains supporting offices, storage, and classrooms. There is only one music performance facility on campus, the 150-seat Rehearsal Hall. This facility is totally inadequate for orchestral performance. The 450-seat auditorium in the Visual Arts Building was designed and constructed as a lecture hall and is not suited to musical performance.

This project is a facility that will include a 600-seat concert hall, a 263-seat recital/lecture hall, a 520- seat proscenium theatre, and a 225-seat black box theatre. These spaces are to be attractive, comfortable, and functional. They are to be "state-of-the-art" facilities with special emphasis given to acoustics, lighting, and stagecraft. This facility will also contain supporting offices, storage, classrooms, specialized production areas, and parking. The need for the university to embrace and promote cultural activity and diversity is basic to its educational mission.

In addition to providing performances, this facility will be designed for teaching and lab space for students in the performing arts. Scene shops, and costume shops, welding areas are all functioning lab spaces for the performing arts.

The new Performing Arts Center will enhance performing arts classes and programs at UCF and will become a focus for performance activities on campus. Students will entertain the Central Florida communities.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. AGENCY Univers	sity of Central Florida		Page _	1 of	2
BUDGET ENTITY	SUS	AGENCY PRIORITY	8		_
PROJECT TITLE	Millican Hall Building Renovation	DATE BLDG PROGRAM			
		APPROVED			_

Millican Hall was a one of the first buildings on campus, and will be 45 years old at the time of renovation. It has housed the majority of the administrative needs, which include the office of the president, vice presidents, provost, registrar and admissions office, and student development and enrollment services. Given the age of the facility, the electrical wiring, mechanical systems, carpeting, and lighting needs to be replaced. The building is in poor condition and requires major attention to its building systems, to include asbestos abatement; electrical; HVAC; lighting; controls; commissioning; fire alarm; fire sprinklers; plumbing; chilled water upgrade; envelope floor, windows and entrances; elevator upgrade; interior remodeling; exterior lighting; egress; and accessibility.

Total building renovation is required to address the problems of indoor air and water quality. The HVAC systems are obsolete. The electrical infrastructure needs to be relocated from its current location. In addition, any remaining asbestos issues will be resolved. The renovation will incorporate a complete environmental assessment. The elevator needs upgrading, and life safety issues need to be addressed. The utilities infrastructure of the building needs to be assessed for necessary improvements.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

While LEED certification is not mandatory for existing buildings, the goal is to achieve LEED Silver Certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey was conducted and approved in February, 2011. Recommendation No. 2.5, Millican Hall Building Renovation.

PROJECT TITLE	Business Administration	DATE BLDG PROGRAM			=
	Renovation	, BDBQUED			
		APPROVED			_

The College of Business Administration (CBA), which is accredited by The Association to Advance Collegiate Schools of Business (AACSB International), houses six academic units: the School of Accounting and the Departments of Economics, Finance, Management, Management Information Systems, Real Estate and Marketing. The College of Business Administration serves 7,660 undergraduate students and 879 graduate students. The Business Administration facility is a STEM facility. Technology plays an integral role in the College of Business Administration. Students have access to numerous state-of-the-art computer labs, tech support, and multi-media classrooms. Students graduate from the College of Business with the technical knowledge and entrepreneurial skills necessary to compete in today's global marketplace.

The renovation of the Business Administration building will address the problems of indoor air and water quality. In addition, asbestos issues will be resolved. An upgrade of the building systems is necessary. The building is in fair condition and requires major attention to its building systems, to include: asbestos abatement, electrical; HVAC; lighting; controls; commissioning; fire alarms; plumbing; information technology (server rooms); envelope roof, windows and entrances; elevator upgrade; interior remodeling, and exterior lighting; egress; accessibility; chilled water upgrade; and utilities. The renovation will incorporate a complete environmental assessment. The HVAC system is obsolete and needs to be replaced. A test and balance needs to be conducted.

Space utilization exceeds the current statutory requirement of 60% student stations occupied at a minimum of 40 hours per week. Where classrooms are concerned, the UCF main campus already is operating "at or above capacity." Based on the 2011 educational plant survey analysis for space needs, the university has a shortfall of classroom space. The university has been forced over the past several years to rent temporary facilities, both on and off campus, for classrooms and other purposes. UCF students are also taking summer classes and online classes in order to meet graduation requirements.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey was conducted and approved in February, 2011. See recommendation No. 2.3, Business Administration Building Renovation.

	CIP-3 SHORT-TER	M PROJECT EXPLANATION		
			Page 1 of	2
AGENCY Universit	y of Central Florida			
BUDGET ENTITY	SUS	AGENCY PRIORITY	10	
PROJECT TITLE	Chemistry Renovation	DATE BLDG PROGRAM		
		APPROVED		_

The existing Chemistry Building was constructed in the late sixties. The College of Sciences is the largest college at UCF and is one of the major participants that represent the core of UCF's STEM program. The Chemistry Building is in fair condition and requires major attention to its building systems, to include: asbestos abatement; electrical; HVAC; plumbing; information technology; envelope, brick and walls; elevator upgrade; chilled water upgrade; interior remodeling; and exterior lighting; egress and accessibility. The HVAC system is obsolete and part of the original design; it does not effectively maintain humidity. The elevators need upgrading, and life safety issues need to be addressed.

Renovation is needed for health/safety issues and better usage. There is considerable capital renewal need for health/safety issues. In addition, space will be renovated to accommodate the College of Sciences need. The utilities infrastructure of the building needs to be assessed for necessary improvements.

Space utilization exceeds the current statutory requirement of 60% student stations occupied at a minimum of 40 hours per week. Where research labs, classrooms, and teaching labs are concerned, the UCF main campus already is operating "at or above capacity." Based on the 2011 educational plant survey analysis for space needs, the university has a shortfall of classroom space, research labs, and teaching labs. The university has been forced over the past several years to rent temporary research facilities both on and off campus.

Research labs are essential for thesis and dissertation work by students in disciplines with active graduate programs, especially at the doctoral level. Many cases exist on campus where the same lab is used both for graduate coursework, thesis and/or dissertation work, and faculty research.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

Research/Laboratory

Space classification shall be predominately laboratory type, with classroom or office type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Laboratories should have continuously variable air flow valves with ventilation reset capabilities. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type. Domestic and laboratory hot water needs shall be provided by thermal solar means as a primary means.

While LEED certification is not mandatory for existing buildings, the goal is to achieve LEED Silver Certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey was conducted and approved in February, 2011. See recommendation No. 2.6, Chemistry Building Renovation.

	CIP-3 SHORT-TER	M PROJECT EXPLANATION			_
			Page _ 1	of <u>1</u>	_
AGENCY Universit	y of Central Florida				
BUDGET ENTITY	SUS	AGENCY PRIORITY	11		
PROJECT TITLE	Facilities & Safety Complex	DATE BLDG PROGRAM			
	Renovation	APPROVED			

The Facilities & Safety Complex was constructed over a number of years, with the first building completed in 1969, and is approximately 103,286 gross square feet (GSF). The complex consists of five buildings: the Offices/Shops (A), Auto Mechanics and Key Shop (B), Landscaping Building (C), Housekeeping and Energy Management Building (D), and the Warehouse (E). This complex is a critical station, manned during hurricanes and other disasters, and will require renovations to bring it up to code. The HVAC is obsolete, and needs to improve air condition zoning. The buildings are in fair condition and require major attention to their building systems, to include: electrical; information technology server rooms (IT); building envelope; roof, windows and entrances; egress; accessibility, to include securing the complex; utilities; complete upgrade of the fire alarm system; interior remodeling; exterior lighting and painting; and heavy equipment storage expansion. The loading dock bays and gates need to be renovated.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. 	CIP-3 SHORT-TERM	PROJECT EXPLANATION			
			Page 1	of _2	_
AGENCY Univer	sity of Central Florida				
BUDGET ENTITY	SUS	AGENCY PRIORITY	12		
PROJECT TITLE	Visual Arts Building	DATE BLDG PROGRAM			
	Renovation and Expansion				
		APPROVED			

The Visual Arts building was completed in 1992 and needs to be completely renovated. Given the age of the facility, the electrical wiring, mechanical systems, carpeting, and lighting should be replaced. The ceramic labs dust collection system needs to be redone to improve air quality. An asbestos survey to needs to be completed to identify any asbestos within the kiln areas. The elevators need upgrading, and life safety issues, which have been documented, need to be addressed. The utilities infrastructure of the building needs to be replaced. The HVAC system and the electrical infrastructure no longer support the building demand. The original HVAC system and has gone over its useful life.

The building is in fair condition, but requires major attention to its building systems; to include: asbestos abatement; HVAC; lighting; building controls; building commissioning; fire sprinklers; plumbing; information technology (server rooms); building envelope, including the roof, floor, walls, windows and entrances; some remodeling of the interior; painting, egress and accessibility; chilled water upgrade; and all utilities.

The expansion to the building is for the visual arts and is to include: additional offices, teaching labs, studios, gallery spaces, and conference rooms. The film department will also occupy the expansion.

If the project were not approved, parts of the building might be rendered unusable over time, due to unresolved environmental health and safety issues associated with deferred maintenance.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey was conducted and approved in February, 2011. See recommendation No. 2.8, Visual Arts Building Renovation.

STATE UNIVERSITY SYSTEM

<u></u>	CIP-3 SHORT-TERM F	PROJECT EXPLANATION	
			Page 1 of 2
AGENCY Univer	sity of Central Florida		
BUDGET ENTITY	SUS	AGENCY PRIORITY	13
PROJECT TITLE	Multi-Purpose Research and Education Building	DATE BLDG PROGRAM	
		APPROVED	

The Multi-Purpose Research and Education Building will provide general research and office space. This facility will house a variety of services which will serve the general academic community. This building must be a "state-of-the-art" facility capable of supporting university research and administrative functions with multimedia capabilities. It is the intent of this effort to provide space of the highest technological quality currently available. This will be a shared space facility. The Multi-Purpose Research and Education Building will also be used to move departments into while other space is being renovated. Rental of space has been considered and implemented on a temporary basis. Extensions of campus utilities and roadways are being requested separately to meet the needs of this and other campus construction projects.

Space utilization exceeds the current statutory requirement of 60%. Where research labs, classrooms, and teaching labs are concerned, the UCF main campus already is operating "at or above capacity." Based on the 2011 educational plant survey analysis for space needs, the university has a shortfall of classroom space, research labs, and teaching labs and requires this new building to meet the current and growing demands of the university. The university has been forced over the past several years to rent temporary facilities, both on and off campus. UCF students are also taking summer classes and online classes in order to meet graduation requirements.

Research labs are very often essential for thesis and dissertation work by students in disciplines with active graduate programs, especially at the doctoral level. Many cases exist on campus where the same lab is used both for graduate coursework, thesis and/or dissertation work, and faculty research.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

Research/Laboratory

Space classification shall be predominately laboratory type, with classroom or office type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water

consumption should be at least 50% less than a comparable building. Laboratories should have continuously variable air flow valves with ventilation reset capabilities. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type. Domestic and laboratory hot water needs shall be provided by thermal solar means as a primary means.

In line with the university policy for new construction, this project will be designed and constructed to achieve a LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey was conducted and approved in February, 2011. See recommendation No. 3.3, Multi-Purpose Research and Education Building.

CIP-3 SHORT-TERM F	PROJECT EXPLANATION			
		Page _	1 0	of <u>3</u>
AGENCY University of Central Florida				
BUDGET ENTITY SUS	AGENCY PRIORITY	14		
PROJECT TITLE College of Nursing	DATE BLDG PROGRAM		•	_
	APPROVED			

By 2010 the College of Nursing (CON) had outgrown its space and leased a building in Research Park to provide better teaching-learning facilities to its faculty and students. Since 2003, the College of Nursing has more than doubled in size due to the addition of the following academic offerings: an accelerated baccalaureate program, a doctoral program, a masters' program, a Doctor of Nursing Practice program (D.P.N.), certificate programs, and two regional sites that must have audiovisual connectivity. Prior to 2003 there was only one nursing skills laboratory, inadequate at best. In 2004 a small conference room was converted to additional laboratory space to finally provide for graduate students. Currently the total laboratory space required to teach all degree and certificate programs remains inadequate, and students frequently must practice their skills in the hallways and lunch rooms.

The College of Nursing should be located in close proximity to the College of Medicine at Lake Nona to provide the best educational experience for student nurses and doctors. Utilizing shared facilities, nursing and medical school students collaborate to ensure the best medical outcome and patient experience. A new CON building will provide adequate laboratory, classrooms, simulation, computer, and conference spaces to support educational and research needs and interprofessional education.

While CON currently leases space in Research Park, suitable space is not available within a reasonable distance of the Medical City at Lake Nona.

A College of Nursing building will meet the needs of the student population; provide the highest quality educational and research programs; and allow for expansion of the programs; to meet the ever-increasing needs of the community and the state of Florida. Finally, the proposed facility will support expansion of the research programs, and facilitate increased external funding for research to support doctoral students and faculty members research efforts.

Delays in this project will seriously limit any growth in terms of new faculty hires, new programs, the ability to teach using state-of-the art simulation and the ability to meet the increasing demands for course work and research. A Student Health facility will be co-located in the College of Nursing, and staffed by nurse practitioners to provide clinical care and mentor D.N.P. students.

The Florida Center for Nursing predicts that there will be a shortage of 11,000 nurses by 2015, and 50,000 by 2025. UCF needs to prepare nurses at all levels to meet these shortages.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly

important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

Research/Laboratory

Space classification shall be predominately laboratory type, with classroom or office type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Laboratories should have continuously variable air flow valves with ventilation reset capabilities. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type. Domestic and laboratory hot water needs shall be provided by thermal solar means as a primary means.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

AGENCY University of Central Florida		
BUDGET ENTITY SUS	AGENCY PRIORITY	15
PROJECT TITLE Partnership IV	DATE BLDG PROGRAM	
	APPROVED	

The purpose of Partnership IV is the research and development of future immersive environments using advanced techniques in modeling and simulation, access to high end computing and networking, artificial agents, autonomous vehicles and multimodal interaction. The building will support the immersion of individuals, small and large groups (homogeneous and mixed), their interaction and performance. Technologies developed will accelerate learning in science, technology and the arts for adults and K-12, through interactive and mobile learning environments. It will further the development of a professional workforce to meet future academic, military and industrial requirements.

The facility would provide:

Laboratory and office space for the rapidly expanding research and development programs; and multiple disciplines in modeling, simulation, immersive environments and mobile learning

Allow UCF to fulfill its state charter as the Center of Excellence in Simulation and Training by focusing its broad range of academic and research efforts through more specialized programs and projects

Expand traditional modeling and simulation into new areas such as medical team simulation and international cultural dynamics, significantly impacting health care scenarios and international relations and business

Research in multimodal interaction to include, multicultural speech, gestures, high level dialogue, health, counseling and lifestyle decisions to understand probable outcomes and develop intervention scenarios

Expand the opportunities for educational and work experiences for students who are pursuing degrees related to modeling, simulation, training, team performance and future learning environments

Allow for additional funding vehicles (contracts) by providing adequate space and equipment for basic and applied research

Create a Cultural Modeling Center of Excellence furthering the understanding of how individuals and groups react, to include, dynamic agents and robots/ autonomous vehicles

Expand UCF's collaboration with military R&D, meeting post 9/11 standoff security requirements while maintaining an open academic environment

The facility would underscore UCF's commitment to:

the environment as a LEED Gold facility

establish Central Florida as the National Center for Simulation.

achieve international prominence in key programs of graduate study and research be America's leading partnership University

Nation-wide research programs continue to expand in the simulation and training community. Without a Partnership IV facility, a significant level of projects cannot be accommodated, and opportunities to conduct research are lost to other institutions.

Without research, the pool of students educated and trained in advanced simulation technologies will be negatively impacted. The number of students produced for the high technology pool for local simulation and training employers will be restricted, having a detrimental effect in the

Central Florida community and the state.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Research/Laboratory

Space classification shall be predominately laboratory type, with classroom or office type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Laboratories should have continuously variable air flow valves with ventilation reset capabilities. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type. Domestic and laboratory hot water needs shall be provided by thermal solar means as a primary means.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

CIP-3 SHORT-TERM PROJECT EXPLANATION						
		,	Page 1 of 2			
AGENCY Univer	sity of Central Florida					
BUDGET ENTITY	SUS	AGENCY PRIORITY	16			
PROJECT TITLE	Howard Phillips Hall	DATE BLDG PROGRAM				
	Renovation					
		APPROVED				

Howard Phillips Hall is approximately 44 years old and had some remodeling in 1990. It is in good condition for its age, but requires attention to its building systems as well as changes to existing interior space configurations. As a result of buildings being completed (Health & Public Affairs Buildings I & II and the Psychology Building), academic departments moved out. This released space is available for use by other units, but it will need some remodeling and renovation work. Specifically, it is planned that the bulk of the space will be used for administrative service functions that require mainly offices and associated support areas (including, for example, state-of-the-art video conferencing rooms), rather than classrooms.

Given the overall growth of the university, there is no real alternative to pursuing the developments outlined unless one counts trying to accomplish the same thing in some other fundamentally equivalent location. In this regard, the location of Howard Phillips Hall is especially suitable for administrative usage, given its proximity to the existing Administration Building.

If the project were not approved, the building would not effectively support the changing needs of the university. Moreover, parts of the building might be rendered unusable over time, due to unresolved environmental health and safety issues associated with deferred maintenance.

This building is in poor condition and requires attention to its building systems to include asbestos abatement; HVAC; lighting; controls; commissioning; fire alarm; fire sprinklers; plumbing; information technology IT server rooms); chilled water upgrade; utilities; envelope roof, windows and entrances, etc.; elevator replacement; new auditorium seating; interior remodeling: floor, painting, and exterior lighting, egress and accessibility. Changes to existing interior space configurations and correction of life-safety code violations, to better address the needs of the user group.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

While LEED certification is not mandatory for existing buildings, the goal is achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

BUDGET ENTITY SUS		AGENCY PRIORITY	17	
PROJECT TITLE Colbourn	fall Renovation	DATE BLDG PROGRAM		
		APPROVED		

Colburn Hall is a 41-year old, 84,000 gsf, five story educational building. Over the next few years Political Science and most of Music are scheduled to relocate in other new buildings. In order to accommodate expansion by English, History, Foreign Languages and Literatures, Philosophy, OASIS and Interdisciplinary Studies, it will be necessary to renovate the first, second and fifth floors of Colbourn Hall.

Given the age of the facility, the building, is showing signs of structural deterioration, including the second and third floor exterior corridors; around the perimeter of the building, structural steel handrails, and structural steel shelf angles. This facility is in fair to poor condition. A structural analysis and evaluation will be conducted to determine the extent of the damage. The status of electrical wiring, mechanical systems, carpeting, and lighting should be evaluated for replacement. The building is in fair condition and requires major attention to its building systems, to include: asbestos abatement; electrical; HVAC; lighting; controls, commissioning, chilled water upgrade; fire alarm; fire sprinklers; plumbing; information technology (IT server rooms); elevator upgrade; interior remodeling; and exterior lighting.

There are no alternatives for this remodeling since there are not enough new buildings planned to accommodate the growth of the academic units occupying the building. Moreover, there are infrastructure needs to be addressed since the last partial renovation to Colbourn Hall.

Delay of this project could prevent growth of programs currently housed in the building and could adversely affect health safety issues in the use of existing building.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

According to the second		

The Ferrell Commons Renovation will require major renovations to bring it up to code. We will only be renovating the E&G space. This building is a critical station manned during Hurricanes. The HVAC system needs to be replaced. A test and balance needs to be conducted. Building 7E is designated as the shelter for essential staff. This building's exterior and roof needs to be evaluated. Total building renovation of the electrical, chilled water and asbestos is required to bring it up to code. The renovation will incorporate a complete environmental assessment.

Life safety issues need to be addressed. The utilities infrastructure of the building needs to be assessed for necessary improvements.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

While LEED certification is not mandatory for existing buildings, the goal is achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

AGENCY Univers	sity of Central Florida					
BUDGET ENTITY	SUS	AGENCY PRIORITY	19			
PROJECT TITLE	Technology Commons I	DATE BLDG PROGRAM				
	Renovation					
		APPROVED				

The remodeling of Technology Commons I is necessary to accommodate and meet the needs of the Departments of Computer Science, Statistics and Computer Services/Telecommunications. The Computer Center Expansion (CC III) was completed in 1996. Segments of these departments were relocated to CC III. All facets of UCF operations are becoming heavily dependent on central computer support facilities. Reliability of our telecommunication networks and computer resources is imperative. If the project were not approved, the building would not effectively support the changing needs of the university. Moreover, parts of the building might be rendered unusable over time, due to unresolved environmental health and safety issues associated with deferred maintenance.

The HVAC system is part of the original design; it does not effectively maintain humidity and temperature control. Total building renovation of the HVAC system, electrical, and asbestos is required to bring it up to code. The renovation will incorporate a complete environmental assessment.

The elevators need upgrading, and life safety issues need to be addressed. An effort must be made to provide sufficient telecommunication wiring, power conditioning, security and furniture ergonomics for utilization of computing resources in both TC I & II.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

While LEED certification is not mandatory for existing buildings, the goal is achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

AGENCY Univers	sity of Central Florida		Page <u>1</u> of <u>1</u>				
BUDGET ENTITY	SUS	AGENCY PRIORITY	21				
PROJECT TITLE	College of Sciences Building Renovation	DATE BLDG PROGRAM					
		APPROVED					

The College of Sciences building was constructed in 1996 and is 56,644 gsf. The primary building contains offices, computer rooms, support spaces and an auditorium. The Sciences Building is needed to provide instruction, laboratory, and people space for Physics and Chemistry. This space is also needed to support new doctoral programs and research efforts consistent with Research I status. The HVAC system is part of the original design; it does not effectively maintain humidity in the computer labs. A test and balance needs to be conducted. The renovation of this building will address the problems of indoor air quality.

Given the age of the facility, the status of electrical wiring, mechanical systems, carpeting, and lighting should be evaluated for replacement. The building is in fair condition and requires major attention to its building systems, to include: HVAC; fire alarm; fire sprinklers; elevator upgrade; interior remodeling; and roof membrane.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

AGENCY Univer- BUDGET ENTITY	sity of Central Florida SUS	AGENCY PRIORITY	23
PROJECT TITLE	Theatre Building Renovation	DATE BLDG PROGRAM APPROVED	

The existing Theatre Building was constructed in the early seventies. Renovation is needed both for health/safety issues and better usage. Theatre is expanding to include a graduate program with several tracks. Arts Complex II is completed and has an emphasis on performance. Theatre will be assigned considerable space in Arts II including new performance space. Given that the existing Theatre Building was built in the early seventies, there is considerable capital renewal needed for health/safety issues. In addition, older performance space needs to be remodeled to accommodate teaching space.

The renovation plans, include capital renewal for health/safety issues as well as renovations for more appropriate user needs.

Once Theatre occupies new performance space in Arts II and possible other locations, the performance space in the existing Theatre Building will be unusable without renovation.

Given the age of the facility, the status of electrical wiring, mechanical systems, carpeting, and lighting should be evaluated for replacement. The building is in fair condition and requires major attention to its building systems, to include: electrical; HVAC; lighting; fire alarm; fire sprinklers; plumbing; interior and exterior remodeling.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

AGENCY University of Central Florida	AGENOV/PRIGRITY	0.4	
BUDGET ENTITY SUS	AGENCY PRIORITY	24	
PROJECT TITLE Classroom Building III	DATE BLDG PROGRAM		
	APPROVED		

The Classroom Building III will provide general classroom support services for enhanced student development and learning. This facility will house a variety of "high-tech" classroom services which will serve the general academic community. These services need to be integrated to support present and future curricula activities. This building must be a "state-of-the-art" facility capable of supporting "smart classrooms" with multimedia capabilities.

Based on the 2011 educational plant survey analysis for space needs, the university has a shortfall of classroom space and requires this new building to meet the need and growing demand. UCF students are also taking summer classes and online classes in order to meet graduation requirements.

Classroom Building III will include general classrooms and faculty offices. It is the intent of this effort to provide classroom space of the highest technological quality currently available in the teaching discipline.

The effects of a delay in constructing Classroom Building III may include the inability to effectively serve student needs with general classrooms.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

AGENCY University	sity of Central Florida		
BUDGET ENTITY	SUS	AGENCY PRIORITY	25
PROJECT TITLE	Facilities Building at Lake	DATE BLDG PROGRAM	
	Nona		
		APPROVED	

The Facilities Building at Lake Nona will house Facilities and Safety departments (Facilities Planning, Facilities Operations, Landscape & Natural Resources, Environmental Health & Safety, Sustainability and Energy Management, and the Police) to provide optimal support to faculty, staff and students.

Delays in construction will prohibit Facilities & Safety (Facilities Planning, Facilities Operations, Landscape & Natural Resources, Environmental Health & Safety, Sustainability and Energy Management, and the Police) from efficiently maintaining these buildings.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

	ng Center	DATE BLDG PROGRAM APPROVED			

This facility will house the cumulative recycling and solid waste programs at the University of Central Florida. The function of this building is to receive all materials either recycled or composted as a result of day-to-day operations on the main campus. Materials to be recycled include plastic, paper corrugated cardboard, glass, steel, aluminum, food waste, Styrofoam and surplus material; with appropriate sorting, packaging, baling and composting for all. The State of Florida is mandating a recycling rate of 75% for all institutions by 2020 with this facility; UCF will achieve a recycling rate of 90 and 95%.

The alternative to this facility is continuing the current process where toters are utilized daily for trash removal and recycling storage. The process is labor intensive and has the detrimental effect of throwing millions of pound of materials into the landfill. With the sorting facility, we will design and implement a delivery system that will be efficient from the moment an item is discarded, to the reuse, resale, recycling of all the byproduct of our day to day operations.

This facility will be designed for optimum use of space with some room for future machinery expansion as the University grows. This facility will house areas for storage of both dry and wet materials. It is hoped that this not only produces compost for use on the University landscape but can become a saleable item as well.

The State of Florida is mandating a 75% recycling rate for all state institutions by 2020. If this facility is delayed we will not be able to achieve the 75% mandated by the State of Florida.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

STATISTICAL JUSTIFICATION

	CIP-3 SHORT-TERM	PROJECT EXPLANATION		
			Page1 (of 2
AGENCY <u>Univer</u>	sity of Central Florida			
BUDGET ENTITY	SUS	AGENCY PRIORITY	27	
PROJECT TITLE	Humanities & Fine Arts II	DATE BLDG PROGRAM		
		APPROVED		

This project attempts to consolidate various departments within the College of Arts and Humanities. A Humanities & Fine Arts building would accommodate moving three units to a department-oriented facility, simplifying the administrative functions for the College of Arts and Humanities.

Existing space that houses the English Department is at maximum usage. Space for this department to support general university growth parallels the growth factor of the university. In addition, the new program at the Ph.D. level in Texts and Technology will require considerable additional space.

Political Science will move from the Colbourn Hall and join Sociology and Anthropology on the two upper floors of Howard Phillips Hall. This is a temporary solution to meet current demands for these units. The consolidation of these units in the new facility will enable other university departments to use much needed space which is vacated in Colbourn Hall.

The possibility of leasing additional space is not a viable alternative. In addition, specialized lab spaces are unavailable for the Anthropology needs. They are currently sharing spaces with other labs on campus.

The main features of this building will be an increase in faculty and staff offices, teaching labs, and classrooms.

Delays in construction will inhibit the College in meeting the demands of expected university growth. Space is also needed to allow expansion of doctoral programs and research funding in support of UCF's goal of moving to Research I status.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

22,605,337

CIP-3 SHORT-TERM	PROJECT EXPLANATION	
AGENCY University of Central Florida BUDGET ENTITY SUS PROJECT TITLE Simulation & Training Building	AGENCY PRIORITY DATE BLDG PROGRAM APPROVED	Page <u>1</u> of <u>2</u>

The purpose for the facility is to serve as the ultimate research home for University of Central Florida (UCF)/Institute for Simulation and Training (IST) simulation, modeling, and training activities. For UCF/IST to be able to compete with other research institutions in the simulation field, it must be able to attract quality research faculty and provide modern research facilities and training programs specific to simulation research.

UCF/IST must respond to the needs of the high tech industries to produce top UCF students through cutting-edge educational and research opportunities. Fulfilling these needs supports the university's mission to lead the nation in its contribution to local, state, national and international needs. The facility, located on the UCF campus, would better facilitate academic and collegial interactions, and provide a greater focus to demonstrate the university's commitment. The facility would also enable stronger academic programs and classroom instruction for students. Lastly, the facility would provide the space for current activities and future growth.

The facility would:

Provide opportunities for educational and work experiences for students pursuing degrees related to simulation and training, in particular the newly established MS and PhD programs in Simulation and Modeling.

Provide laboratory and office space for the rapidly expanding research and development

programs in modeling, simulation and training disciplines.

Allow UCF to fulfill its state charter as the Center of Excellence in Simulation and Training by broadening its range of academic and research efforts. Allow for additional outside funding opportunities by providing adequate space and

equipment for basic and applied research.

Underscore UCF's commitment to establish Central Florida as the National Center for Simulation.

As research programs expand in the simulation and training community, a significant level of projects could not be accommodated and opportunities to conduct research would be lost to other institutions.

An alternative to building the facility on campus would include occupying additional space for selected programs or projects on campus, as space is available.

The pool of students educated and trained in simulation technologies would be negatively impacted. The number of students produced for the high technology pool for local simulation and training employers would be restricted, which would have a detrimental effect on the Central Florida community and the state.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

Research/Laboratory

Space classification shall be predominately laboratory type, with classroom or office type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Laboratories should have continuously variable air flow valves with ventilation reset capabilities. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type. Domestic and laboratory hot water needs shall be provided by thermal solar means as a primary means.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

AGENCY University BUDGET ENTITY	sity of Central Florida SUS	AGENCY PRIORITY	29
PROJECT TITLE	Business Administration III Building	DATE BLDG PROGRAM	
		APPROVED	

The College of Business Administration (CBA), accredited by The Association to Advance Collegiate Schools of Business (AACSB International), houses six academic units: the School of Accounting and the Departments of Economics, Finance, Management, Management Information Systems, Real Estate and Marketing. The College of Business Administration serves 7,660 undergraduate students and 879 graduate students. The Business Administration facility provides the foundation for STEM, leading to improved graduation within the state. Technology plays an integral role in the College of Business Administration as students have access to numerous state-of-the-art computer labs, tech support, and multi-media classrooms. Students graduate from the College of Business with the technical knowledge and entrepreneurial skills necessary to compete in today's global marketplace.

Approximately 25% of all course sections in the College of Business are scheduled outside of the CBA building. Moreover, this academic year we have no unused office space. The continued growth in student enrollments and faculty size requirements mandated by our accrediting agency (AACSB) will necessitate aggressive faculty hiring. Business I and II are at capacity. There are no viable space utilization alternatives within the CBA building.

Delay or non-approval would be detrimental to the College's ability to conduct its mission, that of serving students studying Business Administration at the University. Since 1999 the College has experienced a serious space-shortage condition in the current facility in terms of housing faculty and staff. The Business II provided only temporary relief. Given expected continued growth in enrollments and student credit hours generated, this situation can only be alleviated in the long term by a significant new facility.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

STATISTICAL JUSTIFICATION

STATE UNIVERSITY SYSTEM

CIP-3 SHORT-TERM I	PROJECT EXPLANATION	
		Page 1 of 2
AGENCY University of Central Florida BUDGET ENTITY SUS	AGENCY PRIORITY	30
PROJECT TITLE Education II Building	DATE BLDG PROGRAM APPROVED	

The current College of Education (COE) Complex needs to be expanded to accommodate the preparation and renewal of professional educators and school administrators. In addition to meeting the rigorous standards of the National Council for Accreditation of Teacher Education (NCATE), expanded facilities are needed to meet the demands of the state's educational system. UCF must produce professional educators who can competently teach literacy, mathematics and science, global studies, and technology, while addressing the issues of diversity, and personal and social responsibility. UCF's COE is the second largest source of public school educators in the state of Florida; having a projected shortage of 16,000 public school educators over the next ten years.

In addition to preparing and renewing professional educators, the COE serves as a hub for significant state centers and programs: The Family Literacy and Reading Excellence Center (FLaRE), Project CENTRAL (Coordinating Existing Networks To Reach All Learners), the Toni Jennings Exceptional Education Institute, the Consortium for Social Responsibility, and Character in Education. These collaborative projects, supported by the faculty, staff and students engaged in teaching, learning, leadership, research and service, and in partnerships with professional organizations, educational institutions, business, industry, and the community.

The possibility of leasing additional space is not feasible since it is not available within walking distance of the main campus. In addition, the types of spaces required by the various education disciplines are generally not readily available.

Physical space is a critical factor in the development of the potential of the COE and UCF as a major metropolitan research university. The Education II building will enhance the current collaborative ventures that link the UCF COE, the UCF Academy for Teaching, Learning and Leadership, community colleges, and the public and private schools in the central Florida elevencounty service area.

The Education II Building will feature formal and informal learning spaces, and public interactive zones that invite collaboration and spark creativity. Dedicated space for centers and special projects will also be included. This state-of-the-art environment, with full multimedia support, will inspire and enable people to engage in education that is capable of creating the future.

The delay of this project will create a situation in which further growth of the COE will be impossible in terms of new faculty lines or the ability to meet increasing demands for additional course sections. School systems are expressing the need for more organized and effective approaches to professional development. UCF has been cited as a key reason for the location of business and industry in Central Florida in recent years. Future directions in education should utilize existing resources in Central Florida and the COE at UCF stands ready to meet these new needs and demands.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

The Band Building is needed to provide space for UCF's marching band. It will contain office space, ensemble rooms, instrument and uniform storage rooms, recording studio, and a band

music library.

The possibility of leasing additional space of the type needed is not readily available. In addition, there is no other space on campus that could be utilized. Therefore a new building is the only viable alternative.

The Band building will also provide individual practice rooms and a loading dock.

Delays in construction will prohibit needed space for the marching band and hinder recruitment of new band members.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

AGENCY <u>Univer</u>	sity of Central Florida				
BUDGET ENTITY	SUS	AGENCY PRIORITY	32		
PROJECT TITLE	Arts Complex III	DATE BLDG PROGRAM			
		APPROVED			

This Arts Complex III project is an effort to meet the growing classroom needs of the Music and Theatre departments. The Music Department is projected to have some additional space in the Arts Complex II - Performance Building, but will still need to continue using classroom space assigned in Colburn Hall. The Arts Complex II-Performance will have only a recital hall designated for the Music Department. Projected growth in Music can be solved by an Arts Complex III building and will enable them to migrate out of Colburn Hall. This project is the last phase of a three (3) phased Center for the Performing Arts.

Arts Complex III will help to bring some of the production units closer to the performance auditorium to be part of Arts Complex II-Performance. Construction of this building will mean increased instructional and performance space.

The effect, if this project is not funded, will be the inability to enhance the performing arts classes and programs at UCF; and the inability to attract cultural events and meet the needs of the Central Florida community.

The possibility of leasing additional space is not feasible due to the technical requirements of these spaces.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

CIP-3 SHORT-TERM	PROJECT EXPLANATION	
		Page _1_ of _2_
AGENCY University of Central Florida BUDGET ENTITY SUS	AGENCY PRIORITY	33
PROJECT TITLE Social Sciences Facility	DATE BLDG PROGRAM APPROVED	

PURPOSE, NEED, SCOPE, RELATIONSHIP OF PROJECT TO AGENCY OBJECTIVES

This project will consolidate various departments within the College of Sciences. A Social Sciences building would accommodate moving three units to a department-oriented facility, simplifying the administrative functions of these academic units for the College of Sciences.

The departments, Anthropology, Political Science, and Sociology, currently occupy the two upper floors of Howard Phillips Hall. Their existing space is at maximum usage. The consolidation of these units in the new facility will enable other departments from Academic Affairs and Student Affairs, currently on the lower two floors of Howard Phillips Hall, to expand into the vacated spaces while remaining in a location close to Millican Hall (Administration).

The main features of this building will be an increase in faculty and staff offices, classrooms, teaching labs, and research labs. Additional specialized Forensic Anthropology teaching lab and research lab spaces will be needed. Current space is limited and is located in multiple buildings on and off campus.

Delays in construction will inhibit the College in meeting university demands for teaching and research. Space is also needed to allow expansion of doctoral programs and research efforts in support of UCF's goal of being a Research Institution.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

While LEED certification is not mandatory for existing buildings, the goal is achieve LEED Silver certification.

CIP-3 SHORT-TERI	M PROJECT EXPLANATION	
		Page 1 of 2
AGENCY University of Central Florida BUDGET ENTITY SUS	AGENCY PRIORITY	34
PROJECT TITLE Coastal Biology Station	APPROVED	

PURPOSE, NEED, SCOPE, RELATIONSHIP OF PROJECT TO AGENCY OBJECTIVES

The UCF Marine Turtle Research Group (UCFMTRG) has conducted research on the Archie Carr National Wildlife Refuge (ACNWR), adjacent beaches, and in coastal and inland waters for over 30 years. Data collected by this program were instrumental in establishing the ACNWR in 1991. The refuge and coastal habitats support the most significant, densely nested loggerhead sea turtle rookery in the Western Hemisphere, and among the most important green turtle and leatherback nesting habitat in North America. The UCF Marine Turtle Research Group houses one of the longest and largest sea turtle datasets in the world. This dataset is essential to international, federal, and state managers tasked with the protection and recovery of the endangered and threatened sea turtle populations, including populations utilizing central Florida's terrestrial and marine habitats.

The UCFMTRG field sites are located over 70 miles from the UCF campus in Orlando. Due to long field days, nighttime nesting beach surveys, and the storage and transport of heavy equipment (e.g., 4 boats, 4 trucks, 12+ ATVs), it is not practical or safe for students, Principle Investigator (PI), and staff to commute between campus and the coast at all hours of the day or night. Historically, the ACNWR and Brevard County provided housing and equipment storage for the turtle program; however, given federal budgets and dwindling resources, this is no longer a viable option, nor are there other, feasible alternatives that would ensure the long-term presence and viability of a facility to support UCFMTRG activities.

The continued success and survival of the UCFMTRG is dependent on the development of a dedicated coastal field station or field complex in proximity to the ACNWR. Without a strong presence on the coast, and without the resources needed to successfully fulfill federal and county contracts, the UCFMTRG may lose grants and contracts to other universities, consulting groups, and agencies. Such a loss would undermine the value of the 30+ year UCF sea turtle dataset and research program, to the detriment of sea turtle conservation, and UCF's standing as an international leader in sea turtle research.

A coastal biology facility or complex would 1) provide housing and equipment storage for the UCFMTRG; 2) support coastal research (both in-water and terrestrial); and 3) provide a handson, experiential education platform that could be used for K-12, undergraduate, graduate, and professional educational and training programs. Specifically, the facility would provide:

- 1) Housing and equipment storage for the UCFMTRG including:
 - A bunkhouse to support nighttime and seasonal nesting beach research, including up to 12 UCFMTRG personnel (graduate students and undergraduate interns).
 This bunkhouse could be used/rented in the off-season for visiting school-groups, field classes, REU programs, etc.
 - Additional PI and visiting scientist quarters, separate from a student bunkhouse.
 Visiting scientist quarters will promote national and international collaborations and broaden the research scope of the UCFMTRG.
 - Storage space for boats, trucks, ATVs, nets, and other field equipment out of the elements to better preserve equipment and promote the safe use of equipment in

the long-term.

- A small, functional workshop to make and maintain/repair field equipment; space to properly wash and service field equipment.
- A facility will allow for new funding/grant opportunities by providing adequate housing for educational activities (e.g., Research Experiences for Undergraduates program (REU)).
- 2) Enhance UCF's sea turtle and coastal research programs including:
 - A functional wet-lab available for student research, use by visiting scientists, and classes (K-12, undergraduate and graduate).
 - Lab space to also serve as temporary 'triage' area for mass sea turtle (or marine mammal) stranding or cold-stun events—this will assist federal and state agencies during periods of unusual mortality and conservation activities.
 - Office space with computers for MTRG data entry and management, as well as for use by visiting scientists. Computers to include UCF network access. This will facilitate scientific advisory service; and will promote the real-time reporting of nesting beach activities to federal, state, and county agencies.
 - A facility will allow for new funding/grant opportunities by providing adequate space and equipment for research activities.
 - Allowing for the creation of a center for "whole life history" sea turtle research in one of the world's most important nesting and foraging habitats. This will expand UCF's collaborative ties with regional, national, and international researchers and agencies.
 - Providing space (e.g., rooftop) for deployment of technologies to sample environmental data (temperature, rainfall, etc.), radio tracking listening stations, and other remote sensing equipment to enhance field data collection, and to establish a base-line coastal monitoring program to better understand the effects of storm events, coastal nourishment activities, climate change/sea level rise over time.
- 3) Enhance and expand on UCF's education potential, including:
 - Expanding student opportunities for educational, work, and research experience for student pursuing degrees in biology, conservation, chemistry, physics, engineering, and environmental studies, among others.
 - Providing space for short-term, on-location, and hands-on training programs (telemetry workshops, wildlife handling, veterinary practices, coastal ecosystem sampling, etc.) to UCF and outside groups.
 - Allowing for new funding/grant opportunities by providing adequate space and equipment for educational activities.
 - Promote UCF's innovative science and research activities through a small (self-guided) visitor/outreach center.
 - Encourage public support and donations through educational outreach activities elevating UCF's research and educational opportunities through public programs and a small visitor center.

CIP-3 SHORT-TERM PROJECT EXPLANATION

 Classroom/meeting room space to provide educational opportunities for K-12, undergraduate, and graduate students, as well as professional training programs.

A new facility/complex would solidify UCF's standing as a primary sea turtle research institution. It would provide the foundation for the UCFMTRG to evolve to incorporate new technological, educational and training programs; promote international relevancy and collaborations; and provide a platform for new coastal research and educational programs. This facility would promote:

UCF's commitment to achieve international prominence in key areas of graduate study and research.

UCF's commitment to fulfilling its state charters in education and training.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

While LEED certification is not mandatory for existing buildings, the goal is achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

PURPOSE, NEED, SCOPE, RELATIONSHIP OF PROJECT TO AGENCY OBJECTIVES

Technological innovation is truly the engine driving the new economy. The ability to develop, transfer, and successfully commercialize new technological discoveries is critical to the economic prosperity of Florida and the nation. Florida enjoys low unemployment but suffers from an over-dependence on tourism and entertainment, and the low wage jobs indicative of these industries. While the job base has been increasing significantly, the average per capita income has remained below national averages. Florida must build the infrastructure to support and enable a strong technology sector to capture a significant share of the wealth creation made possible by the new economy. Florida lags behind many other successful efforts in the creation of the enabling infrastructure that fosters the creation of home grown technology based companies. The National Business Incubator Association reports that 82% of these home grown companies stay in the region where they were incubated, and realize an average return on investment of 450% to these regions in the form of an increased tax base alone. Florida continues to build an outstanding university system that produces relevant, exploitable technologies in key areas. Too large of a percentage of these technologies are commercialized elsewhere or simply sit on the shelf.

It is the intent of this program to build a center of excellence in technology entrepreneurship and incubation, that will significantly impact economic development and technology exploitation in the region, and Florida as a whole. The goal will be to develop and integrate strong education, incubation, and technology transfer and commercialization programs that will catalyze significant growth in the technology sector.

The possibility of leasing additional space is not feasible since it is not available within walking distance of the main campus. In addition the types of spaces to support this type of research are not generally available.

As a metropolitan university, serving the needs of Central Florida, the addition of this building will enhance achievement of the University's goals of:

Offering the best undergraduate education available in Florida;
Achieving international prominence in key programs of graduate study and research;
Providing international focus to our curricula and research programs;
Becoming more inclusive and diverse; and,
Being America's leading partnership University.

The building would provide the laboratory space for the interaction, collaboration and professional development of the faculty.

CIP-3 SHORT-TERM PROJECT EXPLANATION

The delay of this project will inhibit the necessary growth of new interdisciplinary research efforts at the university to meet a growing demand of high tech industry in Central Florida. UCF has been cited as a key reason for the location of some key business and industry in Central Florida in recent years. The laboratory space, teaching labs and associated faculty office space are vitally needed to meet the new research demands.

This is the second of three Interdisciplinary Research Buildings envisioned to meet the growing high-tech demands of central Florida industry.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Research/Laboratory

Space classification shall be predominately laboratory type, with classroom or office type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Laboratories should have continuously variable air flow valves with ventilation reset capabilities. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type. Domestic and laboratory hot water needs shall be provided by thermal solar means as a primary means.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

EDUCATIONAL PLANT SURVEY

The Educational Plant Survey has not been addressed for this project. As the planning year approaches, this project will be addressed.

STATISTICAL JUSTIFICATION

The Statistical Justification portion of the CIP-3 is not required this year.

CIP-3 SHORT-TERM PROJECT EXPLANATION							
			Page <u>1</u> of <u>1</u>				
BUDGET ENTITY	sity of Central Florida SUS	AGENCY PRIORITY	36				
PROJECT TITLE	Sustainability Center	DATE BLDG PROGRAM APPROVED					

PURPOSE, NEED, SCOPE, RELATIONSHIP OF PROJECT TO AGENCY OBJECTIVES

The Sustainability Center would be a facility in which the operations, research, and academics departments of the university would jointly collaborate to increase the sustainability of the university and community. This center would provide the office, laboratory, and conference space needed to promote the university's continued sustainable operations, while developing strong connections to the research and academic units on campus. The goal of this facility would be to increase the partnerships in sustainable and energy industries to provide additional avenues for the faculty, staff, and students to develop.

The Sustainability Center would also be a facility designed and constructed to the highest levels of sustainability including energy efficiency. It will provide for research space that would allow for demonstration to building and construction industries, and provide students with a center for continued learning in this emerging industry.

SUSTAINABILITY AND LEED

The University of Central Florida is committed to the efficient use of natural resources. As energy costs and demands continue to grow, achieving energy efficiency has become increasingly important to the university's mission. Appropriate policies and procedures that govern the use of environmental resources and facilities have enabled UCF to achieve the improvements necessary to ensure a productive environment for all and establish itself as a national leader in energy research, education, and stewardship.

Classroom/Office

Space classification shall be predominately classroom or office type, with laboratory or research type minimized. Project should achieve Gold LEED certification with the US Green Building Council. Energy consumption should be at least 30% less than a comparable building. Water consumption should be at least 50% less than a comparable building. Project should utilize the district cooling loop for space cooling needs. All heating and reheating should be hydronic type.

In line with the university policy for new construction, this project will be designed and constructed to achieve LEED Silver certification.

PURPOSE, NEED, SCOPE, RELATIONSHIP OF PROJECT TO AGENCY OBJECTIVES

Film is a high-growth program and is also undergoing change. The change is in a high technology direction emphasizing digital convergence. Another newly approved program, Digital Media is rapidly developing. Both programs will be synergistically developing graduate programs to support a rapidly changing entertainment industry. The programming purpose for this building is to accommodate the growth for Film, Digital Media, and others participating in the digital convergence technology change.

Delay may inhibit community driven growth plans.

ITEM: FF-6

University of Central Florida Board of Trustees

SUBJECT:

2013-14 Capital Outlay Budget

DATE:

May 23, 2013

PROPOSED BOARD ACTION

- 1) Approval of the university's 2013-14 capital outlay budget
- 2) Authorization for the president to make necessary adjustments to the 2013-14 capital outlay budget

BACKGROUND INFORMATION

Pursuant to 1013.61, Florida Statutes, each university board of trustees must adopt an annual capital outlay budget that designates proposed expenditures by project. Attachment A lists the projects approved during the legislative session and by the governor. Approval is sought for the attached budget and authorization for the president to make changes to this budget as necessary during the year.

REVISED* Minutes Board of Trustees Meeting University of Central Florida May 23, 2013

Chair Michael J. Grindstaff called the meeting of the UCF Board of Trustees to order at 1:08 p.m. in the Live Oak Center on the UCF Orlando campus.

The following board members attended the meeting: Trustees Jim Atchison, Richard Crotty, Alan Florez, Robert Garvy, Marcos Marchena, Reid Oetjen, Beverly Seay, and Melissa Westbrook. Trustee Ray Gilley *and Olga Calvet attended via teleconference.

WELCOME

Grindstaff reminded the board that the meeting was covered by the Florida Sunshine Law and that members of the public and press were invited to attend.

He welcomed the board members and requested that the roll be called. A quorum was present.

He called for approval of the March 21, April 22, and May 15, 2013, board meeting minutes, which were approved as written.

REMARKS

President John C. Hitt announced that three trustees were leaving the board, Dr. Ida Cook, Harris Rosen, and Meg Crofton.

Dr. Cook served on the board for the four years that she chaired the Faculty Senate. Hitt presented her with a plaque and thanked her for her service to the university.

Charter trustee Harris Rosen was recently awarded *trustee emeritus* status by the board. Hitt thanked Rosen, who was unable to attend the meeting.

Hitt thanked trustee Meg Crofton, who was also unable to attend the meeting.

Hitt welcomed three new board members. **Beverly Seay** is vice president and general manager of global professional services at CAE Integrated Enterprise Solutions; **Dr. Reid Oetjen** is the chair of the UCF Faculty Senate; and **Melissa Westbrook** is the president of the UCF Student Government Association. Hitt presented each with a gold Pegasus pin and welcomed them to the board.

Hitt referred the board members to the New America Foundation's report, "The Next Generation University," which was included in their meeting materials. He noted that the foundation had included UCF among five other nationally prominent universities as representatives of the next generation of universities. These universities are continuing their commitment to world-class research while enrollment and graduation rates increase even as state funding decreases.

Hitt reported that 36 members of the charter class of the UCF College of Medicine graduated on May 17. The ceremony, held in The UCF Venue, was the culmination of the start-up stage of the UCF College of Medicine.

Hitt stated that Governor Rick Scott had congratulated the UCF Business Incubator Program for being named the 2013 Incubator Network of the Year by the National Business Incubation Association. Hitt also indicated that the governor had sent the trustees a letter in this regard.

Hitt announced that the March 18 emergency response at Tower I challenged the UCF community to respond promptly, to ensure the safety of UCF's community, and to act with compassion for UCF's students. He further stated that, thanks to the efforts of so many dedicated staff and faculty members, he was confident that the university had met that challenge. Hitt noted that students had shown their appreciation with thank-you signs hanging from their Tower 1 windows. Photographs of those signs were on display at the meeting. Hitt further reported that parents, relatives, and friends of students in UCF's residence halls had commended the university's actions. He also thanked Subway in the Student Union that had responded by providing food and beverages to students who had been evacuated from Tower I.

On behalf of the UCF family, Hitt extended the university's appreciation to the UCF police officers, counselors, Housing and Residence Life staff members, and News and Information staff members who had participated in the response.

Hitt announced that he had directed that a comprehensive review be conducted of the Tower I incident. He noted that the UCF team working on the task is headed by Al Harms, Vice President for Strategy, Marketing, Communications, and Admissions, with the goal of providing a detailed, after-action-review report. An independent review board from the community has also agreed to participate. Members of this board are the following:

- Val Demings, retired Orlando police chief
- Dave Freeman, manager of the Orange County Office of Emergency Management
- Dr. Stephen Holmes, Associate Vice President of Academic Initiatives, UCF Regional Campuses
- Sharlea Robbins, a student in Tower I, and
- John Sprouls, Executive Vice President and Chief Administrative Officer for Universal Parks and Resorts and a UCF trustee.

INTRODUCTIONS

Hitt recognized the following members of the UCF community for their accomplishments.

A. Students

Fred Kittinger introduced this year's legislative scholars and thanked them for their service. In attendance were Kevin Craig, Joyce Delgado, Anthony Duarte, Megan Kizzort, Vanessa Lewis, Yoe Lopez, Kelly Quintero, and Brian Sullivan.

B. Faculty

Dr. Richard Eastes, an assistant professor and research scientist with UCF's Florida Space Institute, and Ray Lugo, director of the institute, were awarded a \$55 million NASA grant to build and launch into space an instrument that will provide unprecedented imaging of the Earth's upper atmosphere. The award is the largest single grant in UCF's history, and UCF will become the first Florida university to lead a NASA mission. Hitt congratulated Eastes and Lugo.

The Pegasus Professor Award is UCF's most prestigious faculty honor, distinguishing extraordinary contributions to the UCF community through teaching, research, and service. This year, seven faculty members were presented this award. Hitt recognized and congratulated the following recipients who attended the meeting.

Dr. Robin W. Roberts is a professor in the College of Business Administration and is the Al and Nancy Burnett Eminent Scholar Chair in the Kenneth G. Dixon School of Accounting. He is an internationally recognized leader in accounting ethics and public-policy research, and he has worked tirelessly to make UCF's accounting Ph.D. program one of the top 10 in the nation.

Dr. Lisa Dieker is a professor in the College of Education. From her work in helping to create TeachLive, a virtual classroom simulation system, to leading the Lockheed Martin/UCF Academy, which is responsible for helping scientists become classroom teachers, Dr. Dieker is known as a change agent who leads by example.

Dr. Deborah Beidel is a professor of clinical psychology in the College of Sciences. Her research has earned more than \$7 million in contract and grant funding in just six years as she continues to find ways to help people cope with anxiety disorders.

Dr. James D. Wright is a professor of sociology in the College of Sciences and the director of the UCF Institute for Social and Behavioral Sciences. Dr. Wright's work in the area of poverty and homelessness is regarded as required reading for anyone studying sociology, and his research has gained national recognition.

C. Employee of the Month

The Employee of the Month for April was **Richard Berwanger**, a senior maintenance superintendent for Housing and Residence Life.

The Employee of the Month for May was **Janki Maraj**, an administrative assistant for the College of Arts and Humanities.

D. CFE Federal Credit Union

Hitt welcomed representatives from the CFE Federal Credit Union, which has acquired the naming rights of the UCF Arena. It will now be known as CFE Federal Credit Union Arena. Hitt introduced **Joe Melbourne**, president and CEO of CFE Federal Credit Union, and invited him to speak. Melbourne was accompanied by **Mary Lynn Williams**, Chair of the Board; **Kevin Miller**, Senior Vice President and General Counsel; and **Katie Thomason**, Director of UCF Development at CFE Federal Credit Union.

INFORMATION

Grindstaff noted two information items.

- INFO-1 New Committee Assignments and Direct Support Organization Assignments
- INFO-2 Naming of UCF Arena

CONSENT AGENDA

Grindstaff read the consent agenda items into the record. A motion was made to accept the consent agenda, and members of the board unanimously approved the following actions.

- **EP-1 Equity Accountability Program** Approval of Florida Equity Accountability Program Reports 2013.
- **EP-2 2013 Tenure Recommendations** Approval of tenure for faculty members whose names are recommended on the list.
- EP-3 UCF 2013-14 Work Plan Approval of UCF 2013-14 Work Plan.
- **EP-4 Revision of UCF's Academic Program Review Policies and Procedures, 2007-14** Approval of UCF's revised Academic Program Review Policies and Procedures, 2007–14.
- **FF-1 2013-14 College of Medicine Self-insurance Program Budget** Approval of the 2013-14 Self-insurance Program budget presented by the College of Medicine.
- **FF-2 2013-14 College of Medicine Faculty Practice Plan Budget** Approval of the 2013-14 College of Medicine Faculty Practice Plan budget presented by the College of Medicine.
- **FF-3 2013-14 University Operating Budget** Approval of the University Operating Budget.
- **FF-4 University Depositories** Approval of the following: depositories into which university funds may be deposited, authorizing the president or his designee to transfer funds between depositories, and designating university employees to sign checks for payment of university obligations.

ADVANCEMENT COMMITTEE REPORT

Rich Crotty, Chair of the Advancement Committee, reported the highlights from the committee meeting earlier in the day.

- **Robert Holmes,** Vice President for Alumni Relations and Development and CEO of the UCF Foundation, gave an update on foundation activities.
- Holmes introduced Heather Junod, Director for The UCF Fund, who provided an overview of KNIGHTS GIVE 50, a virtual campaign event taking place via computer, smart phones, or tablets over a 50-hour period starting Tuesday, June 11, 2013.
- **Fred Kittinger**, Associate Vice President for University Relations, provided a legislative update on the budget. The overall State University System operating budget increased 3.8 percent, or \$314 million over the current year base funding after adding back the \$300 million lost in last year's budget. The state funded the first generation college matching grant program at \$5.3 million. For the education enhancement trust fund, UCF was funded at \$29.8 million. For education general activities, UCF was funded at \$102.4 million.
- Al Harms, Vice President for Strategy, Marketing, Communications, and Admissions, reported
 that Zenaida Gonzales played a key role in UCF's winning several prizes on three projects at the
 Central Florida Chapter of the Public Relations Association. Harms noted that Gonzales wrote
 the script for the NBC show highlighting the graduation of the UCF College of Medicine's first
 class.
- Harms reported that UCF has projected an increase of 10 percent for incoming freshmen and is expected to meet the target of 60,000 students.
- Harms reported that the Bright Futures scholarships program has increased the minimum SAT score to 1170 for Medallion Scholars, starting in Fall 2014.

AUDIT, OPERATIONS REVIEW, COMPLIANCE, AND ETHICS COMMITTEE REPORT

Jim Atchison, Chair of the Audit, Operations Review, Compliance, and Ethics Committee, announced that there was no report for the committee, which would next meet on June 21, 2013, in Room 243, Millican Hall, at 1:00 p.m.

EDUCATIONAL PROGRAMS COMMITTEE REPORT

Robert Garvy, Chair of the Educational Programs Committee, welcomed new committee members Oetjen and Seay. He noted the items approved in the consent agenda and reported the highlights from the committee meeting earlier in the day.

- **Dr. Tony Waldrop,** Provost and Executive Vice President, reported on the Equity Accountability Program. He noted the progress made toward improving diversity during 2011-12, and he called attention to the steps taken to achieve 2012-13 employment goals.
- Waldrop and Dr. Paige Borden, Assistant Vice President for Institutional Knowledge Management, reported on the UCF 2013-14 Work Plan.
- **Dr. Diane Chase,** Executive Vice Provost, reported on the program review policy revisions that include the requirement to review baccalaureate program lower-level prerequisites to ensure compliance with common state-approved prerequisites and, when applicable, to review a program's limited-access status to determine if such status is still warranted. The rest of the policy remains unchanged from its last update in November 2011.
- **Dr. Deborah German**, Vice President for Medical Affairs and Dean of the College of Medicine, provided an update on the progress of the college.

Waldrop advised that the search for a dean for the College of Engineering and Computer
Sciences had been completed. An offer was made and accepted by **Dr. Michael Georgiopoulos**.
He also advised of a national search for a vice provost for regional campuses. **Dr. J. Jeffrey**Jones, from Indiana University South Bend, was hired to lead the UCF regional campuses. He will begin July 1, 2013.

FINANCE AND FACILITIES COMMITTEE REPORT

Jim Atchison, Vice Chair of the Finance and Facilities Committee, noted the items approved in the consent agenda, and he reported highlights from the committee meeting earlier in the day.

Atchison presented the following items for board approval.

- FF-5 2013-14 Tuition and Fees, and Amendments to University Tuition and Fee Regulations UCF-9.001 and UCF-9.006 The original motion to approve 2013-14 Tuition and Fees, and Amendments to University Tuition and Fee Regulations UCF-9.001 and UCF-9.006 was introduced and amended. The amended motion was made and passed by the board approving the 2013-14 Tuition and Fees, and Amendments to University Tuition and Fee Regulations UCF-9.001 and UCF-9.006. The approval was based upon the assumption that the proposed 1.7 percent tuition increase was automatic and non-discretionary. However, if the 1.7 percent tuition increase is later determined to be discretionary, the board members will reconvene to discuss the increase. The motion passed nine to one.
- **FF-6 2013-14 Capital Outlay Budget** A motion was made and passed by the board approving the university's 2013-14 capital outlay budget and authorizing the president to make necessary adjustments to that budget.
- **FF-7 UCF Investments Policy Amendment** A motion was made and passed by the board approving revisions to the operating-funds supplement to the UCF Investment Policy.

NOMINATING AND GOVERNANCE COMMITTEE REPORT

Ray Gilley, Chair of the Nominating and Governance Committee, noted that he was unable to attend his committee's meeting, and he requested Grindstaff to report on the highlights of the meeting held earlier in the day.

Grindstaff stated that the board meeting of April 22, 2013, was held via teleconference for the purpose of issuing honorary doctoral degrees for Joe Lewis, Founder and Chairman, Tavistock Group, Doctor of Medical Service; Dr. Michael M. Crow, President, Arizona State University, Doctor of Humane Letters; and William Jefferson Clinton, former President, United States, Doctor of Humane Letters.

STRATEGIC PLANNING COMMITTEE REPORT

Alan Florez, Chair of the Strategic Planning Committee, announced that there was no report for the committee and that a committee meeting date had not yet been established.

ANNOUNCEMENTS AND ADJOURNMENT

Grindstaff announced the following upcoming	ng meetings:
Golden Anniversary Celebration	June 8 (UCF Arena)
Board of Governors meeting	June 18-20 (University of South Florida)
Board of Trustees meeting	July 25 (Live Oak Center)
Grindstaff adjourned the board meeting at 2:	08 p.m.
Respectfully submitted:	Date:

We discussed the EP code a while back – it indicates the functional expense category. You can locate the EP code in the department crosswalk. Building Maintenance = 03. I want to make sure the Colburn repairs show up in the correct functional category on certain reports that we file with the BOG, especially since it is expected to be material - \$7 to \$8 million. Here are the departments that currently have the building maintenance code. Let me know which one works for you.

Chartfield	Status	Fund Code	Description	D/P	Managers Name	Budget Entity	EP Code	EF Des

This department has been an issue for us in the past and currently has a negative balance.

Not sure what an "03" EP code is in order for me to determine another department. Can you explain this?

Thanks, LaShanda

Hi LaShanda – We are going to transfer \$700,000 to one of your E&G departments for Colburn Hall. Then, you will need to transfer the cash from that department to the new project number. Can you tell me which E&G (non-carryforward) department you would like to receive the budget into... preferably one that has an "03" EP code (building maintenance). Department 02400013 looks like a good option... let me know if that works for you.

Thank you,

Christy Tant, CPA

Christy,

Do you know how is the construction project is going to be funded? I did set up project number 92010018; usually a cash transfer is made to the project and then I load the budget.

Thanks, Wilson

John-

Lashanda's group needs to request a project number from Wilson on this, if she hasn't alread done so.. Then just submit a budget request to Christy Tant for an allocation from central reserves. She will then have theses funds transferred to that new project number.

Thanks.

Subject: Colbourn Hall Funding

Hi, Bill. We have the A/E and CM selected and need to begin planning and design with destructive testing. I am requesting \$700,000 (10% of the estimated project cost) for the testing, planning, and design work. We expect to see some options on 8/5 so would like to have the funds by then.

Thanks! Lee

Budget Transfer - Colburn Hall

Budget Office,

Please transfer \$700,000 from the university's central reserve (00010101) to Administration & Finance (department 02800018). This amount will be used for testing, planning, and design work related to Colburn Hall renovation and repairs. This is a portion of the total estimated project cost of \$8,000,000 included in the "Future Allocations from reserve" section of the 2013-14 allocation document.

This will be recorded as a temporary increase to the division's base budget.

Please notify John Pittman, LaShanda Neal and Wilson Rosario once the transfer has posted.

Thank you,

Christy Tant, CPA
