Educational Plant Survey Team

Survey team members participating in the 2013-2014 Educational Plant Survey at the University of Florida are as follows:

University Coordinator was Mr. Frank Phillips, Associate Director of Planning, Design and Construction.

Survey Leader

Joe Castrillo, Coordinator Space Analysis and Assessment University of Central Florida

Team Members

Patricia Pasden, Coordinator Administrative Services, FGCU

Elizabeth Jones, Coordinator Facilities Planning, UNF

Christy Collier, Coordinator Space Analysis and Assessment, UCF

Mary Mory, Coordinator-Construction Projects Facilities Planning, UNF

Tamera Baughman, Project Manager Facilities Planning, FGCU

Kenneth Ogletree, Senior Architect Florida Board of Governors

Teira E. Farley, Campus Development Coordinator Florida Board of Governors

Kristen A. Connors, Facilities Planner Florida Board of Governors

I. Introduction

An Educational Plant Survey is required by Florida Statutes for all public educational entities. The State University System requires that, at a minimum of every five years, each university report on their existing facilities and also project its future facilities needs for the next five years. This projection must be based on an examination of data on its existing facilities and a projection of future needs based on anticipated university growth, (The procedures, as approved by the BOG, are included in Appendix A).

Definitions and Requirements for the Educational Plant Survey

An Educational Plant Survey is defined in s.1013.01 (8) Florida Statutes, as a systematic study of present educational and ancillary plants and the determination of future needs to provide appropriate educational programs and services for each student based on projected capital outlay FTE's approved by the Florida Board Governors.

The term "educational plant" is defined in s.101301(7) F.S., as those areas comprised of the educational facilities, sites, and site improvements, necessary to accommodate students, faculty, administrative staff and the activities of the educational program.

The term "ancillary plant" is defined in s. 1013.01(1) F.S., as an area comprised of the buildings, sites, and improvements necessary to provide such facilities as vehicle maintenance, warehouse, maintenance, or administrative buildings necessary to provide support to an educational program.

A Survey is required at least every five years pursuant to s. 1013.31 (1) F.S. In addition, 1013.64(4)(A) F.S. requires that each remodeling and/or renovation project, included in the Florida Board Governors Three Year PECO Project Priority List, be recommended in a Survey and that the educational specifications for new construction be approved by the Florida Board of Governors before appearing in the first year of the list.

PECO (Public Education Capital Outlay) Funds are the primary source available to universities for academic and support facilities. By definition, as found in Section 1013.01(16) Florida Statue, a PECO Funded Project is any "site acquisition, site improvement, renovation, remodeling, construction project, funded through this source of revenue and all buildings, equipment, other structures, and educational use area that are built, installed or established must be necessary to accommodate and serve the primary educational institutional program of the University's Board of Trustees".

Surveys may be amended if conditions warrant a change in the construction program. Each *revised* Educational Plant Survey and each *new* Educational Plant Survey supersedes previous Surveys. This report may be amended, if conditions warrant, at the request of the Board of Trustees (s.1013.31(1)(a) F.S.). Recommendations contained in a survey report are null and void when a new Survey is completed.

II. Overview of the Survey Process

The Purpose of the Educational Plant Survey

The purpose of the Survey is to aid in the formulation of five-year plans to house the educational programs and student population, faculty, staff, and auxiliary and ancillary services of the campus. Specific recommendations are provided to assist in the facilities planning process. The Survey should be considered as one element in the overall facilities planning process, which begins with the master planning process, includes the capital improvement element of the Master Plan for the long term physical development of the university, the shorter term Five-Year Capital Improvement Program, and the development of specific building programs prior to submitting a request for funding.

Types of Facilities Addressed in the Survey

The following ten categories of space have been identified as those needed to meet educational program requirements: Classroom, Teaching Laboratory, Study, Research Laboratory, Office, Auditorium/Exhibit, Instructional Media, Student Academic Support, Gymnasium, Campus Support Services. These categories are included within the nationally recognized space classifications, as identified within the Postsecondary Education Facilities Inventory and Classification manual, dated May 2006. The need for merchandising facilities, residential facilities, and special purpose non-credit facilities such as demonstration schools, continuing education centers, or dedicated intercollegiate athletic facilities are not addressed within this report. An evaluation of facilities needs associated with these activities would require a separate analysis of demand measures and program requirements.

The Survey Process

The survey process is comprised of two main components: the Facilities Inventory Validation component and the Needs Assessment component. The fieldwork portion of the process is carried out by a survey team, which is directed by the survey leader from one of the university's sister institutions. Other survey team members include an architect from the Florida Board of Governors and professional staff from other universities. A survey facilitator is assigned by the subject university to facilitate logistics, collection of data for inventory validation, development of the survey workbook used by the survey team, coordination of university activities, and final preparation and publication of this document. Significant preparation is necessary before each of the two survey components are carried out. Table 1 identifies the main Survey activities and lead responsibilities.

<u>Table 1</u> Educational Plant Survey Activities

	Responsibility			
Activity	University	Board of Governors	Survey Team	
Establish schedule	х	х		
Letter to President		Х		
Dates, procedures, responsibilities, designation of University representatives; determine inventory sample for validation	х			
Identification of existing/proposed "ineligible" space	х			
Prepare facilities inventory reports (site/building/room reports)	х			
Coordinate logistics for validation field work	х			
Perform validation (on-site field work)	х		х	
Update inventory based on validation	х			
Provide established enrollment projections		х		
Perform formula space needs analysis	х			
Develop proposed projects & justification	Х			
Develop survey workbook: schedule, mission statement, site data, academic programs, enrollment, space needs, inventory data, project summaries & justifications	х			
Develop comments regarding degree program facility needs	х			
Develop comments regarding proposed projects (CIP & Master Plan)	х			
Coordinate logistics for needs assessment field work	х			
Perform needs assessment (on-site field work): review proposed projects in relation to programs, space needs, data, current inventory, and any special Justification	х		х	
Exit meeting	Х		х	
Prepare initial summary of survey recommendations			х	
Prepare final summary of survey recommendations	х			
Prepare written report	х			
Validate survey		х		

III. Facilities Inventory Validation

Purpose of Validation

The main purpose of the Inventory Validation component is to ensure that the facilities inventory data, used in the subsequent Space Needs Assessment component, fairly represents the existing facilities available to support educational programs.

Sampling Technique

The Inventory Validation component of the Survey is accomplished by a sampling technique. The sample of buildings and rooms are selected from the Physical Facilities Inventory Report, a mainframe-based inventory system that contains data about sites, buildings, and rooms. Annually, in July, changes in the File are reconciled to specific project activity and submitted to the Board of Governors. The buildings selected for Inventory Validation include all buildings constructed since the last Survey, all buildings affected by major renovation or remodeling, all buildings the university desires to change the designated condition to a satisfactory or unsatisfactory status, and additional buildings necessary to achieve a reasonable representation of all space categories (see <u>Table 2</u>).

An analysis of past legislative appropriations is conducted to ensure that all new buildings and buildings affected by major renovation are included. Table 2 identifies the buildings included in the sample for validation. Facilities inventory reports with room details and schematic floor plans are prepared to aid the Survey Team as they inspect rooms within the selected buildings.

Functions of Survey Team during Validation

The main function of the team is to compare existing conditions, identified by viewing the space, with the reported inventory data. Identification of condition changes, variance in room sizes, and proper room use or space category classifications are the objective of the team. A list of variances is prepared and used to update the facilities inventory. If significant classification errors are detected, a complete inventory validation is scheduled. There were no significant variances identified during this validation process.

The Resulting Adjusted Inventory Data

The resulting inventory file, with any required adjustments, enables preparation of reports used in the Needs Assessment portion of the Survey. Summary reports of building and net assignable space information are included in Section VIII of this report.

IV: The Space Needs Assessment

Objective

The object of the Survey Team during the Space Needs Assessment component is to develop specific project recommendations consistent with approved programs in the Campus Master Plan. The Space Needs Assessment activity includes an evaluation of the following elements:

- 1– Projects proposed by the university.
- 2– The results of applying a quantitative space needs model.
- 3– Any special justification presented by the university.

University officials provide supporting information and any special justification for the proposed projects to the survey team in the form of a survey workbook and presentations.

Types of Recommendations

The projects proposed by the university include site acquisition, site improvements, renovation, remodeling, and new construction. The projects are presented as part of an overall development plan that include identification of proposed uses of spaces to be vacated as a result of occupying new buildings and the remodeling of existing buildings.

Space Needs Formula

The Space Needs model applied is the State University System Space Needs Generation Formula (formula). The formula was designed to recognize space requirements for a site based on academic program offerings, student enrollment by level, and research programs. A more complete explanation of the formula is provided in Appendix B. The most important measure in the formula is full-time-equivalent student enrollment. Other important measures include positions, research activity, and library materials. The following space categories are included in the formula:

Instructional/Research

Classrooms Teaching Laboratories Research Laboratories

Academic Support

Study Facilities Instructional Media Auditorium/Exhibition Teaching Gymnasium

Institutional Support

Student Academic Support Office/Computer Campus Support

Application of the formula results in unmet space needs that are then compared to the effect of proposed projects on the facilities inventory. In cases where the formula does not support a proposed project, the justification provided by the university is considered. Such justification may include the unique space requirements associated with a particular program. In some cases, the proposed facilities meet program requirements that are not addressed in the formula. An example of such a case is a large wind tunnel facility or linear accelerator facility that far exceeds the space allowances provided for in the formula. This type of space is regarded as ineligible to meet the space needs generated by the formula. Similar treatment is given to unique facilities within the existing facilities inventory to ensure that formula space needs are compared to facilities designed to meet those needs. The results of applying the formula for the UF survey are identified within Section IX of this report.

V: Overview of the University

President

Dr. Bernie Machen

About UF

The University of Florida is a public land-grant, sea-grant and space-grant research university, one of the most comprehensive in the United States. The university encompasses virtually all academic and professional disciplines. It is the largest and oldest of Florida's eleven universities, a member of the Association of American Universities and has high national rankings by academic assessment institutions. Its faculty and staff are dedicated to the common pursuit of the university's threefold mission: teaching, research and service.

The University of Florida belongs to a tradition of great universities. Together with its undergraduate and graduate students, UF faculty participate in an educational process that links the history of Western Europe with the traditions and cultures of all societies, explores the physical and biological universes and nurtures generations of young people from diverse backgrounds to address the needs of the world's societies.

The university welcomes the full exploration of its intellectual boundaries and supports its faculty and students in the creation of new knowledge and the pursuit of new ideas.

- **Teaching** is a fundamental purpose of this university at both the undergraduate and graduate levels.
- Research and scholarship are integral to the educational process and to the expansion of our understanding of the natural world, the intellect and the senses.
- **Service** reflects the university's obligation to share the benefits of its research and knowledge for the public good. The university serves the nation's and the state's critical needs by contributing to a well-qualified and broadly diverse citizenry, leadership and workforce.

The University of Florida must create the broadly diverse environment necessary to foster multi-cultural skills and perspectives in its teaching and research for its students to contribute and succeed in the world of the 21st century.

These three interlocking elements — teaching, research and scholarship, and service — span all the university's academic disciplines and represent the university's commitment to lead and serve the state of Florida, the nation and the world by pursuing and disseminating new knowledge while building upon the experiences of the past. The university aspires to advance by strengthening the human condition and improving the quality of life.

History

In 1853, the state-funded East Florida Seminary took over the Kingsbury Academy in Ocala. The seminary moved to Gainesville in the 1860's and later was consolidated with the state's land-grant Florida Agricultural College, then in Lake City. In 1905, by legislative action, the college became a university and

was moved to Gainesville, Fl. Classes first met with 102 students on the present site on September 26, 1906. UF officially opened its doors to women in 1947. With more than 49,000 students, UF is now one of the five largest universities in the nation.

Facilities

UF has a 2,000-acre campus and more than 1,000 buildings. This includes 167 with classrooms and laboratories. The northeast corner of campus is listed as the Historic District on the National Register of historic Places. The UF residence halls have a total capacity of 7,500 students. The five family housing villages house more than 1,000 married and graduate students.

UF's extensive capital improvement program has resulted in facilities ideal for 21st century academics and research, including the Emerging Pathogens Institute, the Clinical & Translational Research Building; the Biomedical Sciences Building; and the William R. Hough Hall, which houses the Hough Graduate School of Business. Overall, UF's current facilities have a book value of more than \$1 billion, and a replacement value of \$2 billion.

Academic Programs

UF has 16 colleges and more than 100 research, service and education centers, bureaus and institutes. More than 100 undergraduate majors are offered. Over 1,200 freshmen and sophomores participate in the honors program, which offers nearly 100 honors courses per semester. The University Scholars Program introduces UF undergrads to the exciting world of academic research by allowing them to work one-on-one with Florida faculty on selected research projects.

Libraries

The university libraries form the largest information resource system in the state of Florida. It contains over 4 million volumes, more than 7 million microfilms, and thousands of full-text electronic journals. The extensive collections include formats ranging from manuscripts to electronic texts, and are distributed in libraries across campus close to the colleges and departments they serve. Additionally, library collections are accessed though the online catalog.

The Arts

UF consistently attracts world-class symphony orchestras, Broadway plays, opera, and other large-scale ballet performances. Among UF's artistic venues are house a permanent collection of more than 6,000 original works, the largest natural history museum in the Southeast, musical and theatrical centers, two television stations, and four radio stations.

Athletics

UF has ranked among the nation's 10 best athletic programs in each of the last 20 years. Florida couples its strong intercollegiate sports program with more than 60 intramural and club sports ranging from archery to weightlifting. More than 90 percent take advantage of the numerous outdoor courts and playing fields on campus, and in the O'Connell Center, the Student Recreation and Fitness Center, the Southwest Rec Center, and the Florida Gymnasium for indoor sports.

Student Activities

The Division of Student Affairs includes the Office of the Vice President for Student Affairs, Career Resource Center, Counseling Center, Deal of Students Office, Housing and Residence Education, J. Wayne Reitz Union, Recreational Sports, and Student Financial Affairs.

The Dean of Students Office offers support related to disabilities services, multicultural affairs, new student programs, including the Preview orientation, off-campus life, and judicial affairs. The UF student body follows an honor code committed to the highest standards of honesty and integrity.

A Leading Research Institution

Research awards have risen steadily over the decades placing UF among the nation's leading institutions. More than half of the total was for health-related research, representing a significant portion of the state's intellectual and economic commitment to biotechnology. Researchers at the McKnight Brain Institute, Genetics Institute and throughout the six colleges of the Health Science Center study everything from adult stem cells to gene therapy.

Student Research

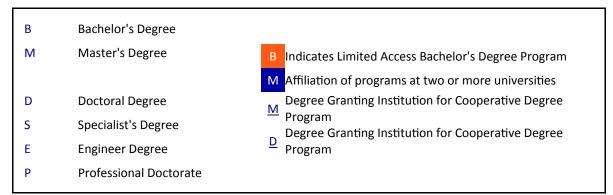

Graduate education and research go hand-in-hand. The great discoveries of the 21st century will undoubtedly come from the creative efforts of the university faculty working closely with bright and motivated graduate students. Graduate students, particularly those pursuing the doctoral degree, broaden the knowledge base of their disciplines in countless ways. UF undergrads, through the University Scholars Program, work one-on-one with Florida faculty on selected research projects. The university's graduate programs what produced generations of professionals in a wide variety of disciplines, many of whom have risen to positions of prominence in our state, the nation, and the world.

VI: Academic Degree Programs of the University

The university's academic degree programs and student enrollment within these programs generate the primary demand for facilities. The Florida Board of Governors, pursuant s.1001.704(1) (b) 8. F.S. has the responsibility for approval of all new programs and elimination of existing programs.

The approved programs for the university are identified within Table 3.

VII. Analysis of Student Enrollment

Student enrollment is the single most important measure used to develop facility requirements for a university.

Enrollment is measured using full-time equivalent (FTE) enrollment. Each FTE is equivalent to 40 credit hours per academic year for undergraduates and 32 credit hours for graduates. First, FTE enrollment is reported by site, and then all enrollment not requiring facilities is deducted to determine the Capital Outlay FTE (COFTE). The level of enrollment used for survey purposes is the level for the fifth year beyond the year the survey is conducted. For this survey, the projected enrollment used is for academic year 2017-2018.

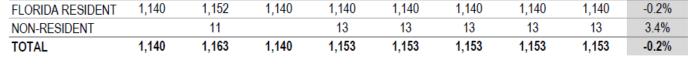

The University's Board of Trustees approved the University Work Plan which includes planned enrollments for the next five years. This data was provided to the survey team and was used in the survey. <u>Table 4</u> identifies the Statutorily Required Enrollment Plan (based on State-Fundable Florida FTE), taken from Page 18 of the 2012-13 Work Plan.

University of FloridaEducational Plant Survey

Pages 27 - 60 (Building Inventory) removed. Information available upon request.

IX - Quantitative (Formula) Space Needs

The basic method used to determine the facilities required by a university to accommodate educational programs, student enrollments, personnel, and services is the fixed capital outlay space needs generation formula. The space needs formula (Formula) provides for three general classifications of space: instructional, academic support, and institutional support. Within these three classifications ten categories of space are included: classroom, teaching laboratory, research laboratory, study, instructional media, auditorium and exhibition, gymnasium, student academic support, office and administrative data processing, and campus support services. Although each of the ten categories of space is treated individually in the Formula, only three basic methods are used for generating space: space factors for scheduled space, allotments for nonscheduled space, and space provided as a percentage of other space. While the FTE enrollment projection (by site) acts as primary generator, the formula recognizes variations in space requirements derived from discipline groupings, course levels, research programs, and library holdings as well as faculty, staff, and contract and grant positions. The outcome of running the Formula is a campus-wide aggregate of the ten categories of space, based on an individual universities make of students, programs, faculty and staff. A detailed explanation of the Formula is in Appendix B.

Table 7 reports the results of applying the formula generated space factors for the main campus.

Table 8, also known as the "Form B", shows the details of these comparison results.

Table 7 - Formula Generated Net Assignable Square Feet by Category

Satisfactory Space calculated using the 2013 UF Space File Submission. Adjustments made in each category to account for the total amount of sqft of the Health Science Center Space in the following disciplines: Veterinary Medicine, Medi Additional adjustments made in each category to account for half the total amount of sq ft of the Health Science Center Space in the following disciplines: Office of Health Affairs & Graduate Research All applicable data provided by UF and can be located in the UF_HSC_By_Cat document

Due to the elimination of the Student Academic Support Space factor, Student Academic Support Space has been added to the Study Category.

^{*}Factors as provided to University Facilities Planners by Chris Kinsley on October 20, 2010

^{**}SUS Teaching Lab average factor inserted to eliminate 0, per Chris Kinsley November 25, 2013

^{***} Classroom Factor increased based upon general classroom factor average located in space formula workbook of 12. .6 added to accommodate for the elimination of the Student Academic Support category, yielding a total of 12.6, per Chris Kinsley 02 April 14.

X - Recommendations of Survey Team

Survey Team Members:

Jose (Joe) Castrillo, Team Leader (UCF), Kenneth Ogletree (BOG), Teira E. Farley (BOG), Kristen Connors (BOG), Christy Collier (UCF), Patricia Pasden (FGCU), Tamera Baughman (FGCU), Elizabeth Jones (UNF) and Mary Mory (UNF)

Site Improvements Recommendations:

- 1.1 Land Acquisition This is a general recommendation that allows the university to purchase properties in the adopted Campus Master Plan. No land acquisition projects were presented during this Educational Plant Survey cycle.
- 1.2 Landscaping and Site Improvements This is a general recommendation for landscaping and site improvements consistent with the adopted Campus Master Plan. No major landscaping and site improvements were presented during this Educational Plant Survey cycle.

Remodeling/Renovation Recommendations:

- 2.1 Nuclear Science Building Renovation
- 2.2 Norman Hall Remodeling
- 2.3 Dental Science Building Renovation
- 2.4 McCarty Hall Remodeling/Renovation Building A (#0495)
- 2.5 McCarty Hall Remodeling/Renovation Building B (#0496)
- 2.6 McCarty Hall Remodeling/Renovation Building D (#0498)
- 2.7 Public Safety Building Renovation (#027)
- 2.8 Public Safety Building Renovation (#132)
- 2.9 Psychology Building Remodeling
- 2.10 Rolfs Hall Renovation
- 2.11 Weil Hall Remodeling, Phase II
- 2.12 Music Building Renovation

New Construction Recommendations:

- 3.1 Nuclear Science Building Addition (47,000 GSF)
- 3.2 Norman Hall Conference Addition (200 GSF)
- 3.3 Mechanical Aeronautical Engineering Building (114,000 GSF)
- 3.4 *Safety Building (26,025 GSF)
- 3.5 IFAS Natural Resources Building (58,420 GSF)

- 3.6 Psychology Building Addition (36,590 GSF)
- 3.7 Environmental Health & Sciences Building (53,200 GSF)
- 3.8 College of Liberal Arts & Sciences (CLAS) Life Sciences Building (52,850 GSF)

IFAS Research and Special Purpose Center Recommendations:

- 4.1 Development of IFAS Farm Operations (Indian River REC)
- 4.2 IFAS Tropical Research and Education Center (Homestead)

Demolition Recommendations:

Per Board Regulation 9.004, Razing of Buildings, demolition projects beneath the \$1,000,000 threshold do not require an Educational Plant Survey recommendation; however, all reductions in space categories should be appropriately reflected on the Form B. (Please identify existing square footage for projects listed below in submission of final report.)

5.1 Mechanical Engineering Lab Building (#183) This recommendation is in conjunction with the aforementioned new construction of the Mechanical Aeronautical Engineering Building (3.3).

Projects Based on Exception Procedure:

- 6.1 Medical Science Building/Basic Science Building Remodeling/Renovation (Medical/HSC)
- 6.2 Whitney Center for Marine Animal Health (St. Augustine)

Standard University-wide Recommendations:

- SR1. Projects for safety corrections are recommended.
- SR2. Projects for corrections or modifications necessary to comply with the Americans with Disabilities Act are recommended.
- SR3. Projects required to repair or replace a building's components are recommended provided that the total cost of the project does not exceed 25% of the replacement cost of the building.
- SR4. Expansion, replacement and upgrading of existing utilities/infrastructure systems to support projects identified within this Educational Plant Survey are recommended.
- SR5. Projects requiring renovations to space vacated in conjunction with new construction that result in no significant changes in space categories, are recommended.

Notes:

A. University is to write recommendation text in accordance with current Educational Plant Survey format

criteria.

- B. The Survey Team requires that projects recommended for approval are to be incorporated into the Master Plan update(s).
- C. The Survey Team recommendations to the Board of Governors cannot exceed 100% utilization in any of the ten (10) space categories. Any project that exceeds 100% utilization must be modified to ensure approval by the Survey Team. The 100% threshold options are as follows:
 - 1. Re-verify classification/utilization
 - 2. Delete project or space utilization category
 - 3. Reduce space utilization category
 - 4. Trade with other space category within the project
 - 5. Shift project priorities
 - 6. Provide sufficient data to support any overage
- D. Supplemental surveys are required if any changes to project scope result in a space category exceeding 100% of formula-driven need.
- E. Sufficient information for recommendations associated with UF Online was not provided during the UF Validation & Needs Assessment. A supplemental survey can be requested when information becomes available.

Mr. Chris Kinsley
Director, Finance and Facilities
Florida Board of Governors
State University System
325 West Gaines Street, Suite 1614
Tallahassee, Florida 32399

Re: University of Florida Education Plant Survey

Dear Mr. Kinsley:

The University of Florida Educational Plant Survey was conducted April 7-11, 2014. This letter reports the University's understanding of the recommendations of the Survey Team for the five year period ending June 30, 2019. The Board of Trustees reviewed the recommendations of the survey team and approved them as submitted on June 5-6, 2014. The University Board of Trustees will review and approve the Educational Plant Survey Book at the December 2014 meeting. Upon approval, the University will submit the approved book to the Board of Governors for final approval.

RECOMMENDATIONS OF SURVEY TEAM

UNIVERSITY OF FLORIDA

Validation & Needs Assessment Dates: April 7-11, 2014

Conference Call Date: May 29, 2014

Revised (Revisions Underlined): July 25, 2014

Survey Team Members: José (Joe) Castrillo, Team Leader (UCF), Kenneth Ogletree (BOG), Teira E. Farley (BOG), Kristen Connors (BOG), Christy Collier (UCF), Patricia Pasden (FGCU), Tamera Baughman (FGCU), Elizabeth Jones (UNF) and Mary Mory (UNF)

Site Improvements Recommendations:

- 1.1 Land Acquisition This is a general recommendation that allows the university to purchase properties in the adopted Campus Master Plan. No land acquisition projects were presented during this Educational Plant Survey cycle.
- 1.2 Landscaping and Site Improvements This is a general recommendation for landscaping and site improvements consistent with the adopted Campus Master Plan. No major landscaping and site improvements were presented during this Educational Plant Survey cycle.

Remodeling/Renovation Recommendations:

Remodeling/renovation recommendations are in accordance with the net square footage as described in the Form B. As presented, remodeling/renovation recommendations yield no significant changes to existing space use categories. Any changes to remodeling/renovation projects that exceed 100 % of any space use categories will require a supplemental survey.

(Please identify existing square footage for ALL projects listed below in submission of final report.)

- 2.1 Nuclear Science Building Renovation
- 2.2 Norman Hall Remodeling
- 2.3 Dental Science Building Renovation
- 2.4 McCarty Hall Remodeling/Renovation Building A (#0495)
- 2.5 McCarty Hall Remodeling/Renovation Building B (#0496)
- 2.6 McCarty Hall Remodeling/Renovation Building D (#0498)
- 2.7 Public Safety Building Renovation (#027)
- 2.8 Public Safety Building Renovation (#132)
- 2.9 Psychology Building Remodeling
- 2.10 Rolfs Hall Renovation
- 2.11 Weil Hall Remodeling, Phase II
- 2.12 Music Building Renovation

New Construction Recommendations:

New construction recommendations are in accordance with the presented net square footage and as described in the Form B.

- 3.1 Nuclear Science Building Addition (47,000 GSF)
- 3.2 Norman Hall Conference Addition (200 GSF)
- 3.3 Mechanical Aeronautical Engineering Building (114,000 GSF)
- 3.4 *Public Safety Building (26,025 GSF)
- 3.5 IFAS Natural Resources Building (58,420 GSF)
- 3.6 Psychology Building Addition (36,590 GSF)
- 3.7 Environmental Health & Sciences Building (53,200 GSF)

3.8 College of Liberal Arts & Sciences (CLAS) Life Sciences Building (52,850 GSF)

*Based upon the presented information, it is the recommendation of the Survey Team that the University move the Public Safety Building to a higher priority. We understand the final decision is left to the discretion of the University Board of Trustees.

IFAS Research and Special Purpose Center Recommendations:

- 4.1 Development of IFAS Farm Operations (Indian River REC)
- 4.2 IFAS Tropical Research and Education Center (Homestead)

Demolition Recommendations:

Per Board Regulation 9.004, Razing of Buildings, demolition projects beneath the \$1,000,000 threshold do not require an Educational Plant Survey recommendation; however, all reductions in space categories should be appropriately reflected on the Form B. (Please identify existing square footage for projects listed below in submission of final report.)

5.1 Mechanical Engineering Lab Building (#183) - This recommendation is in conjunction with the aforementioned new construction of the Mechanical Aeronautical Engineering Building (3.3).

Projects Based on Exception Procedure:

- 6.1 Medical Science Building/Basic Science Building Remodeling/Renovation (Medical/HSC)
- 6.2 Whitney Center for Marine Animal Health (St. Augustine)

Standard University-wide Recommendations:

- SR1. Projects for safety corrections are recommended.
- SR2. Projects for corrections or modifications necessary to comply with the Americans with Disabilities Act are recommended.
- SR3. Projects required to repair or replace a building's components are recommended provided that the total cost of the project does not exceed 25% of the replacement cost of the building.
- SR4. Expansion, replacement and upgrading of existing utilities/infrastructure systems to support projects identified within this Educational Plant Survey are recommended.

SR5. Projects requiring renovations to space vacated in conjunction with new construction that result in no significant changes in space categories, are recommended.

Notes:

- A. University is to write recommendation text in accordance with current Educational Plant Survey format criteria.
- B. The Survey Team requires that projects recommended for approval are to be incorporated into the Master Plan update(s).
- C. The Survey Team recommendations to the Board of Governors cannot exceed 100% utilization in any of the ten (10) space categories. Any project that exceeds 100% utilization must be modified to ensure approval by the Survey Team. The 100% threshold options are as follows:
 - 1. Re-verify classification /utilization
 - 2. Delete project or space utilization category
 - 3. Reduce space utilization category
 - 4. Trade with other space category within the project
 - 5. Shift project priorities
 - 6. Provide sufficient data to support any overage
- D. Supplemental surveys are required if any changes to project scope result in a space category exceeding 100% of formula-driven need.
- E. Sufficient information for recommendations associated with UF Online was not provided during the UF Validation & Needs Assessment. A supplemental survey can be requested when information becomes available.

Sincerely,

J. Bernard Machen

cc: Curtis A. Reynolds, Vice President for Business Affairs
Carol Walker, Assistant Vice President, Planning, Design and Construction

F. State University Checklist for Submitting Educational Plant Survey Reports to the Florida Board of Governors

This checklist is to be used by the university before submitting state university educational plant survey reports pursuant to Section 1013.31(1)(a), Florida Statutes. Checking the survey report against this list will indicate if the report is complete and ready for submission.

A checkmark ($\sqrt{}$) beside an item number indicates the answer is "Yes;" an ex (X) beside a number indicates

- "No." 1. Name of university: University of Florida 2. Date of previous five-year survey: May 2009 3. Date of this survey: April 4—11, 2014 4. New survey out year: <u>2019-2020</u> 5. Three copies of survey report submitted to the Board of Governors (BOG). $\sqrt{}$ 6. Was the survey report made available on the university web site? $\sqrt{}$ 7. Was the survey conducted for official sites only? $\sqrt{}$ 8. Is each site described in the report by its number, name, type, date it was established, address, acreage, and the number of buildings it contains? $\sqrt{}$ 9. Throughout the report, are sites referred to by name and number? $\sqrt{}$ 10. Is a copy of the current list of Institutional Sites by Type for the State University System attached? N/A 11. Has a current site inventory report for the university been forwarded to the Board of Governors? $\sqrt{}$ 12. Is a copy of the approved current five-year planned enrollments for the university attached? $\sqrt{}$
- 13. Do FTE figures used in the survey report match those in the five-year planned enrollments? $\sqrt{}$
- 14. Does the survey report include a table showing total Capital Outlay Full Time Equivalent (COFTE) for the university, by level of student within each site, for the

five years of the survey? $\sqrt{}$

- 15. Does the survey report include a table for each site showing COFTE by discipline category within level of student for the survey out year? $\sqrt{}$
- 16. Have all space needs been generated correctly? $\sqrt{}$
- 17. Are the generated aggregate amounts of square feet for the space categories for each site included in the space category aggregate square footage summary table for the site? $\sqrt{}$
- 18. Is a copy of the current building inventory report for the university available? $\sqrt{}$
- 19. Is a copy of a site plan showing building locations attached for each site? $\sqrt{}$
- 20. Is a copy of the current room inventory report for the university available? $\sqrt{}$
- 21. Is a copy of the current existing satisfactory aggregate assignable square feet by space category by site report for the university attached? $\sqrt{}$
- 22. Does the survey report contain a table for each site which lists the buildings on that site describing each by number, name, status, condition and area in assignable square feet, non-assignable square feet, and gross square feet? $\sqrt{}$
- 23. Throughout the report, are buildings referred to by number and name? $\sqrt{}$
- 24. Are the aggregate amounts of existing satisfactory square feet for the space categories for each site included in the space category aggregate square footage summary table for the site? $\sqrt{}$
- 25. Does the survey report contain recommendations for each site? $\sqrt{}$
- 26. Are the recommendations limited to fixed capital outlay items such as the acquisition, remodeling, renovation, and construction of real property? $\sqrt{}$
- 27. Does each recommendation contribute to resolving differences between the existing educational and ancillary plants and the determination of future needs? $\sqrt{}$
- 28. Does the survey report contain a space category aggregate square footage table for each site which shows by the ten space categories the amounts of square feet needed, amounts of satisfactory square feet existing, changes caused by remodeling, renovation, and new construction recommendations, and the total amounts of square feet planned? $\sqrt{}$
- 29. Are the amounts of square feet planned the same as the amounts of square feet needed? $\sqrt{}$
