21	191041	Epidemiologists	40	NA	1	31	31	NA	NA	30	NA

* Unadjusted Supply is the total of graduates before any adjustment for multiple occupational pathways has been applied. Unadjusted Supply includes all of the pre-professional (previously not licensed) program graduates and may include some program graduates that were initially left out of the CIP-SOC crosswalk but were added based on website reviews and university correspondence noting a relevant, license-eligible program.

** Adjusted Supply is the total of graduates after an adjustment for multiple occupational pathways has been applied. For four occupations (Medical and Public Health Social Workers; Clinical, Counseling, and School Psychologists; Mental Health and Substance Abuse Social Workers; and Marriage and Family Therapists) more than one adjusted supply estimate is provided in the occupational chapter (see Table D. and the chapter narrative). Figure 3 above includes the adjusted supply from the likeliest scenario.

*** Includes licenses for Medical Doctor and Osteopathic Physician

****Licensure is not required for Mental Health and Substance Abuse Social Workers. Rather, the 3,000 estimate in the 2014 Workforce column is the number of current Florida Certified Addiction Professionals, issued by the Florida Certification Board.
