AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation 2.002

BACKGROUND INFORMATION

Board Regulation 2.002 requires the development of a university accountability plan, which is intended to reflect each institution's distinctive mission and to focus on core strengths within the context of State University System goals as well as regional and statewide needs. The accountability plans outline each institution's strategic direction and top priorities as well as performance expectations and outcomes on institutional and system-wide goals.

University accountability plans include sections on strategy, performance based funding metrics, key performance indicators, enrollment planning, and academic program coordination. The strategy section includes institutional mission statements, strengths, opportunities and challenges, key initiatives and investments, and Graduation Rate Improvement Plans. Sections on metrics indicate how the institutions are performing on performance based funding metrics and key performance indicators that support the Board's 2025 System Strategic Plan. Enrollment planning includes actual and planned enrollment. Finally, the academic program coordination section identifies new academic programs that may be developed by the universities within the next three years.

The Strategic Planning Committee considered approval of those portions of the accountability plans associated with the 2020-21 academic year, reviewed out-year portions, and noted areas for further dialogue and deliberation. In addition, the committee also considered the annual university preeminence status updates for Florida State University, the University of Florida, and the University of South Florida.

If approved by the Strategic Planning Committee, the 2021 accountability plans will be forwarded to the Full Board for consideration.
