Footnotes

1) The Bond Par amount is \$245M, and structured with a 30-year final maturity. There is no principal due during construction, and interest due during that period will be paid with bond proceeds (i.e. Capitalized Interest). Following the construction period, the bonds have level debt service of principal and interest.

2) Interest-only debt service during construction (approximately 23 months) is paid from the Capitalized Interest fund.
