

# USE POLY IS ON THE RISE

The new campus Master Plan provides facilities for 16,000 students. The Master Plan also provides for additional expansion, should the demand ultimately exceed the capacity. The plan on the right indicates the anticipated initial facilities, including the Innovation, Science & Technology Building, the Interdisciplinary Center for Excellence and Wellness Center, the first 124-bed Residence Hall, the Central Utility Plant and provisions for a Temporary Research Labs facility.

**Key construction features include:**

- Buildings powered by alternative energy sources for sustainability and cost savings
- Construction costs comparable to other state science/technology buildings
- Pre-fabricated and common materials for cost savings

**WHAT'S NEXT?**

Demuck 19 acres	Complete June 2011
Construction: Infrastructure (power, water, waste water, etc.)	July 2011 - August 2012
Planning & Design: Phase I-Interdisciplinary Center for Excellence and Wellness	November 2011
Planning & Design: Phase I-Residence Halls	November 2011
Groundbreaking Ceremony	November 18, 2011
Construction: Innovation, Science & Technology Building	November 2011 - November 2013
Temporary Research Labs	Open August 2012
New Campus Occupancy and Ribbon Cutting Ceremony	December 2013
