August 28-29, 2019

Wednesday, August 28, 2019

7:30 – 8:30 a.m.	**Breakfast will be provided**
8:30 – 10:30 a.m. or upon Adjournment of Previous Meetings	**Strategic Planning Committee** Chair: Ms. Darlene Jordan; Vice Chair: Mr. Edward Morton Members: Cerio, Felton, Frost, Huizenga, Lamb, Levine, Scott
10:30 – 10:45 a.m.	**Break**
10:45 – 11:45 a.m. or upon Adjournment of Previous Meetings	**Strategic Planning Committee** (continued) Chair: Ms. Darlene Jordan; Vice Chair: Mr. Edward Morton Members: Cerio, Felton, Frost, Huizenga, Lamb, Levine, Scott
11:45 – 1:00 p.m.	**Lunch will be provided**
1:00 – 1:45 p.m. or upon Adjournment of Previous Meetings	**Drugs, Alcohol and Mental Health Task Force** Chair: Mr. Ed Morton; Vice Chair: Mr. Syd Kitson Members: Johnson, Jordan, Scott, Tripp Trustees: Barbar, Burr, Gable, Garvy, Heavener, Hyde, Lawson, Lowell, Martin, O'Sullivan, Schulaner, Watkins
1:45 – 2:15 p.m. or upon Adjournment of Previous Meetings	**Innovation and Online Committee** Chair: Mr. Edward Morton; Vice Chair: Ms. Darlene Jordan Members: Cerio, Corcoran, Felton, Huizenga, Johnson, Kitson, Silagy, Stermon, Tripp

2:15 – 3:00 p.m. or upon Adjournment of Previous Meetings	**Facilities Committee** Chair: Mr. H. Wayne Huizenga, Jr.; Vice Chair: Mr. Syd Kitson Members: Felton, Jordan, Lautenbach, Lydecker, Morton, Silagy
3:00 – 3:15 p.m.	**Break**
3:15 – 5:15 p.m. or upon Adjournment of Previous Meetings	**Audit and Compliance Committee** Chair: Mr. Tim Cerio; Vice Chair: Mr. H. Wayne Huizenga, Jr. Members: Frost, Levine, Lydecker, Morton, Silagy, Stermon

<u>Thursday, August 29, 2019</u>

7:30 – 8:30 a.m.	**Breakfast will be provided**
7:30 – 8:30 a.m.	**Members Breakfast with the Advisory Council of Faculty Senates**
8:30 – 10:30 a.m. or upon Adjournment of Previous Meetings	**Academic and Student Affairs Committee** Chair: Mr. Norman Tripp; Vice Chair: Mr. Brian Lamb Members: Cerio, Corcoran, Felton, Frost, Johnson, Morton, Scott
10:30 – 10:45 a.m.	**Break**
10:45 – 12:00 p.m. or upon Adjournment of Previous Meetings	**Budget and Finance Committee** Chair: Mr. Syd Kitson; Vice Chair: Mr. H. Wayne Huizenga, Jr. Members: Cerio, Johnson, Lamb, Lautenbach, Scott
12:00 – 1:00 p.m.	**Lunch will be provided**
1:00 – 2:30 p.m. or upon Adjournment of Previous Meetings	**Board of Governors – Regular Meeting** Chair: Mr. Ned Lautenbach; Vice Chair: Mr. Syd Kitson All Board members

Please note that this schedule may change at the Chair's privilege.

CONSTITUTION
OF THE
STATE OF FLORIDA

AS REVISED IN 1968 AND SUBSEQUENTLY AMENDED

ARTICLE IX

EDUCATION

SECTION 7. State University System.--

(a) PURPOSES. In order to achieve excellence through teaching students, advancing research and providing public service for the benefit of Florida's citizens, their communities and economies, the people hereby establish a system of governance for the state university system of Florida.

(b) STATE UNIVERSITY SYSTEM. There shall be a single state university system comprised of all public universities. A board of trustees shall administer each public university and a board of governors shall govern the state university system.

(c) LOCAL BOARDS OF TRUSTEES. Each local constituent university shall be administered by a board of trustees consisting of thirteen members dedicated to the purposes of the state university system. The board of governors shall establish the powers and duties of the boards of trustees. Each board of trustees shall consist of six citizen members appointed by the governor and five citizen members appointed by the board of governors. The appointed members shall be confirmed by the senate and serve staggered terms of five years as provided by law. The chair of the faculty senate, or the equivalent, and the president of the student body of the university shall also be members.

(d) STATEWIDE BOARD OF GOVERNORS. The board of governors shall be a body corporate consisting of seventeen members. The board shall operate, regulate, control, and be fully responsible for the management of the whole university system. These responsibilities shall include, but not be limited to, defining the distinctive mission of each constituent university and its articulation with free public schools and community colleges, ensuring the well-planned coordination and operation of the system, and avoiding wasteful duplication of facilities or programs. The board's management shall be subject to the powers of the legislature to appropriate for the expenditure of funds, and the board shall account for such expenditures as provided by law. The governor shall appoint to the board fourteen citizens dedicated to the purposes of the state university system. The appointed members shall be confirmed by the senate and serve staggered terms of seven years as provided by law. The commissioner of education, the chair of the advisory council of faculty senates, or the equivalent, and the president of the Florida student association, or the equivalent, shall also be members of the board.

History.--Proposed by Initiative Petition filed with the Secretary of State August 6, 2002; adopted 2002.

AGENDA
Strategic Planning Committee
Ballroom
Cohen Center
Florida Gulf Coast University
10501 FGCU Boulevard South
Ft. Myers, Florida 33965
August 28, 2019
8:30 a.m. – 12:30 p.m.
or
Upon Adjournment of Previous Meetings

Chair: Ms. Darlene Jordan; Vice Chair: Mr. Edward Morton
Members: Cerio, Felton, Frost, Huizenga, Lamb, Levine, Scott

1. **Call to Order and Opening Remarks** — **Governor Darlene Jordan**

2. **Minutes of June 11-12, 2019, Committee Meeting** — **Governor Jordan**

3. **2019 System Accountability Plan** — **Ms. Emily Sikes**, *Associate Vice Chancellor for Strategic Initiatives and Economic Development*

4. **State University System 2025 Strategic Plan: Mid-course Correction** — **Ms. Sikes**

5. **Programs of Strategic Emphasis Update** — **Mr. Roger Strickland**, *Director of Economic Development*

6. **Florida Polytechnic University 2019 Accountability Plan** — **Dr. Randy Avent**, *President Florida Polytechnic University*

7. Florida Agricultural and Mechanical University Financial Aid Plan

Dr. William Hudson Jr.
Vice President for Student Affairs and Enrollment Management
Florida Agricultural and Mechanical University

Mr. Nigel Edwards
Associate Vice President of Student Affairs and Administration and Assessment
Florida Agricultural and Mechanical University

8. Concluding Remarks and Adjournment — **Governor Jordan**

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Strategic Planning Committee
August 28, 2019

SUBJECT: Minutes of Committee Meeting held June 11-12, 2019

PROPOSED COMMITTEE ACTION

Consider approval of the minutes of the Strategic Planning Committee meeting held June 11-12, 2019, at the University of South Florida

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

The Strategic Planning Committee will consider approval of the minutes of the meeting held June 11-12, 2019, at the University of South Florida.

Supporting Documentation Included: June 11-12, 2019 minutes

Facilitators/Presenters: Governor Darlene Jordan

June 11-12, 2019

Video or audio archives of the meetings of the Board of Governors and its committees are accessible at http://www.flbog.edu/.

1. Call to Order and Opening Remarks

Governor Syd Kitson convened the meeting on June 11, 2019, at 1:11 p.m. with the following members present: Governors Cerio, Felton, Lamb, Levine, and Scott. A quorum was established.

2. Minutes of March 27, 2019, Committee Meeting

Governor Kitson called for a motion to approve the minutes of the March 27, 2019, Committee meeting. Governor Felton moved to approve the minutes, Governor Lamb seconded the motion, and the motion carried unanimously.

3. 2019 Accountability Plans

Governor Kitson said that the next item on the Committee's agenda was to consider for approval the 2019 university accountability plans. He noted that the plans indicate progress and projections on critical performance metrics and key initiatives and the extent to which they will contribute to overall system goals.

Governor Kitson said that each institution would make brief presentations, followed by questions and comments from the Committee. He indicated that each accountability plan would be voted on separately. Governor Kitson reminded the Committee and the institutions that approval of an accountability plan does not constitute approval of any sections of the plan that require additional regulatory or procedural review or approval pursuant to law or Board regulations.

Governor Kitson directed the Committee's attention to a table displaying the performance by 11 institutions on the ten performance-based funding metrics. He explained that Florida Polytechnic University does not yet participate in performance-based funding. Governor Kitson focused on a few highlights. These included that all 11 institutions met their approved goals for average cost to students and that the system

average declined from $13,760 to $9,400, a 32% decrease. Governor Kitson indicated that ten institutions met their approved goals for the percentage of undergraduates with a Pell grant and the percentage of bachelor's degrees awarded without excess hours. Governor Kitson said he was pleased to report that nine institutions met their four-year graduation rate goals and that the system's four-year graduation rate has increased from 49.6% to 52.6%. He indicated, however, that there was still room for improvement.

Governor Kitson said that accountability plans also contain enrollment projections. He reminded members that at its March meeting, the Committee emphasized that maintaining quality is the system's most important goal, recognizing that quality and performance are linked. Governor Kitson then provided a graphic displaying four-year graduation rate performance and educational space capacity. He asked that the Committee keep the graphic in mind as it considers enrollment plans.

A. University of West Florida

Governor Kitson called on President Martha Saunders to present the University of West Florida (UWF) 2019 Accountability Plan. After her presentation, Governor Kitson invited questions and comments.

Governor Kitson congratulated UWF on its performance points increase. That said, he noted that challenges remained in key performance areas.

Governor Cerio also congratulated UWF on its performance increases. He inquired as to UWF's plans for growing enrollment, especially as the university works to increase graduation rates. In that context, he noted UWF's critical deferred maintenance issues. President Saunders responded that UWF was concerned with its deferred maintenance issues. She pointed out, however, that much of UWF's growth will be online.

Chair Darlene Jordan entered the meeting at 1:30. She noted that UWF's academic progress rate increased by almost 5% from the previous year and asked whether there are best practices that the university can share with other institutions. President Saunders said that communication with students has increased across the entire campus. President Saunders also noted that assisting students to develop an academic plan was the key to success and that tools for students to more easily communicate with advisors are now in place.

Governor Tripp asked what it would take for UWF to reach its four-year graduation rate goal of 45% for the 2018-22 cohort. President Saunders said that, while she is pleased with UWF's progress, an infusion of funds will be necessary to see more than incremental increases.

Board Chair Lautenbach suggested that UWF should consider keeping its enrollment flat until graduation rates improve. President Saunders agreed, indicating that enrollment growth will not be substantial.

There being no further questions or comments, Governor Kitson entertained a motion to approve the University of West Florida 2019 Accountability Plan, excluding those sections that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Committee accepts the out-year portions of the plan. A motion was made by Governor Cerio, seconded by Governor Lamb, and the motion carried unanimously.

B. Florida Agricultural and Mechanical University

Chair Jordan called on President Robinson to present the Florida Agricultural and Mechanical University (FAMU) 2019 Accountability Plan. Following his presentation, Chair Jordan invited questions and comments.

Governor Cerio expressed his concern that FAMU missed its law examination pass rate goal by approximately 26% and its pharmacy pass rate goal by 10%. President Robinson said that the pharmacy program had hired a new dean and that the curriculum has been revised, admissions criteria have been increased, and students now have more access to test preparation materials. Dr. Robinson said that law has a very similar plan and noted that a national search for a new dean is underway. Governor Cerio suggested that FAMU reach out to other institutions to learn about best practices.

Governor Levine asked why FAMU listed a Doctor of Nursing Practice for potential implementation, noting that the market was demanding more bedside practicing nurses. Dr. Robinson indicated that the Doctor of Nursing Practice was not a high priority at present.

Governor Levine also noted that FAMU is ranked number nine for all Historically Black Colleges and Universities (HBCU). He asked what it would take for FAMU to become a top-five HBCU. President Robinson noted that for several years, FAMU had been ranked as the best public HBCU. He said that FAMU's research portfolio and its performance on key metric indicators need to increase to reach a top-five designation among all HCBU's.

Governor Cerio remarked that many FAMU students incur large amounts of debt. He also noted that FAMU is expecting to admit more students while increasing its academic progress rate, resulting in a larger student population. He asked whether FAMU is concerned that as enrollment increases, the necessary financial aid will be available to offset student debt. President Robinson indicated that institutional funding is being used to provide students from low- and middle-income brackets assistance in

closing the debt gap. Chair Jordan echoed Governor Cerio's concern. She asked FAMU to return in August and present a plan to address student debt and financial aid.

Governor Tripp commended President Robinson for the priority FAMU has placed on establishing pathway agreements with Florida College System institutions. Dr. Robinson said that FAMU currently has 15 agreements.

Governor Kitson noted that FAMU went from 72 to 70 performance points this year. He said that FAMU has work to do and that if performance stays the same or decreases a student success plan will be required.

There being no further questions or comments, Chair Jordan entertained a motion to approve the Florida Agricultural and Mechanical University 2019 Accountability Plan, excluding those sections that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Committee accepts the out-year portions of the Plan. A motion was made by Governor Cerio, seconded by Governor Lamb, and the motion carried unanimously.

C. New College of Florida

Chair Jordan called on President Donal O'Shea to present the New College of Florida 2019 Accountability Plan. Following his presentation, Chair Jordan invited questions and comments.

Governor Scott commended New College for having a low cost to degree. He asked how New College's success can be leveraged to make additional improvements. President O'Shea indicated that the New College Foundation had raised $935,000 for scholarships, which should convert more applicants to admitted students who will then remain at New College. He noted that substantially increasing scholarships was a function of the priorities established by their foundation.

Governor Tripp inquired further as to the challenges associated with raising academic progress rates. President O'Shea responded that many students enrolling at New College are not used to the rigor of the curriculum. As an example, he said that many New College students are not prepared to read 300 pages a week. He indicated that New College is putting more resources into academic counseling.

There being no further questions or comments, Chair Jordan entertained a motion to approve the New College of Florida 2019 Accountability Plan excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Committee accepts the out-year portions of the plan. A motion was made by Governor Felton, seconded by Governor Lamb, and the motion carried unanimously.

D. Florida State University

Chair Jordan called on President John Thrasher to present the Florida State University (FSU) 2019 Accountability Plan and the FSU Preeminent State Research University Annual Status Update. Following his presentation, Chair Jordan invited questions and comments.

Board members commended FSU's gains in four-year graduation rates, research expenditures, endowment size, and time to degree for students in 120 hour degree programs. President Thrasher provided examples of several coordinated strategies used by FSU. These included traditional academic counseling, predictive analytics, peer counseling, and reconfigurations of dormitory space to induce peer study groups. He made it clear that student health is also a priority because it has a direct correlation to student performance.

Board Chair Lautenbach asked whether faculty have bought into the importance of metric performance and student success. President Thrasher said that they have. As an example, he noted that mathematics faculty are meeting on Saturdays to redesign the curriculum. President Thrasher stressed that metric performance must become part of the institution's entire culture. Board Chair Lautenbach said that other SUS institutions would do well to visit FSU to take away best practices.

When asked what FSU needs to increase its national ranking, President Thrasher emphatically stated that more faculty are needed. He said it was important that the entire system worked together to educate the Legislature as to the importance of higher education.

Some Committee members expressed concern that FSU proposed to lower its out-year goals for the percentage of bachelor's graduates enrolled or employed. President Thrasher said that FSU is well aware that its goal was not met, and that aggressive efforts are being made to move students onto career paths more quickly. He indicated that the reason the goal was being proposed to be lowered is that it would be a more realistic reflection of what FSU can accomplish. Chair Jordan responded that the Board wants to see the system's institutions maintain high goals, even if they are considered stretch goals. She said that the Board is disinclined to approve reduced goals and that she would prefer that FSU keep the original goals. President Thrasher agreed.

There being no further questions or comments, Chair Jordan entertained two motions. First, she entertained a motion to approve the Florida State University 2019 Accountability Plan excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Committee accepts the out-year portions of the plan as amended to restore the

prior year goals for performance-based funding metric one. A motion was made by Governor Lamb, seconded by Governor Cerio, and the motion carried unanimously.

Second, Chair Jordan entertained a motion to approve Florida State University's Preeminent State Research University Annual Status Update. A motion was made by Governor Scott, seconded by Governor Lamb, and the motion carried unanimously.

E. Florida Atlantic University

Chair Jordan called on President Kelly to present the Florida Atlantic University (FAU) 2019 Accountability Plan. Following his presentation, Chair Jordan invited questions and comments.

Governor Felton asked about FAU's academic progress rate, noting that it missed its latest goal and that out-year goals were proposed to be lowered. Governor Felton stressed the goal's criticality if FAU is to become a top 100 institution. Dr. Bret Danilowicz, Provost and Vice President for Academic Affairs said that lowered goals were more realistic than the previously approved goals, but that the university strives to beat them every year. Dr. Danilowicz mentioned that one initiative to address this metric is that beginning this year 30 faculty and 30 graduate teaching assistants will participate in a year-long program developed by the Association of Colleges and Universities and Educators to make faculty better teachers. He also mentioned that academic affairs is partnering with the Division of Student Affairs to address this issue. Dr. Corey King, Vice President for Student Affairs, said that FAU identifies pockets of students in residence halls who are not doing well academically. Students are provided with on-site tutors, and dormitory lounges are converted into study spaces. He said that this brings face-to-face tutoring directly to students with academic difficulty.

Governor Lamb noted that the number of FAU's undergraduate bachelor's degrees awarded in programs of strategic emphasis has declined for four straight years. Dr. Danilowicz responded that FAU's Jupiter Campus has one of the top seven honors programs in the nation, graduating about 100 students a year. Dr. Danilowicz indicated that those students are currently graduating with a liberal arts and sciences degree, even though 70% of the students get all the requirements for a STEM degree. Dr. Danilowicz said that FAU intends to modify an existing program so that, with minimal curricular adjustment, students will graduate with STEM degrees.

Dr. Danilowicz also identified newly implemented STEM degrees. In particular, he pointed to a new degree in health sciences. He said that the program's enrollment is quite large and that it will produce graduates within the next two years.

There being no further questions or comments, Chair Jordan entertained a motion to approve the Florida Atlantic University 2019 Accountability Plan excluding those

sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Committee accepts the out-year portions of the plan. A motion was made by Governor Lamb, seconded by Governor Felton, and the motion carried unanimously.

F. University of South Florida

Chair Jordan called on President Judy Genshaft to present the University of South Florida (USF) 2019 Accountability Plan and USF's Preeminent State Research University Annual Status Update. Following her presentation, Chair Jordan invited questions and comments.

Governor Kitson commended USF for its gains in performance-based funding metrics. He then asked whether USF intends to reduce enrollments on its branch campuses. Provost Ralph Wilcox said that USF intends to increase enrollment by 8% over four years at the undergraduate-level across all three campuses providing that graduation and retention rates were sustained or even improved at the branch campuses. Dr. Wilcox indicated that some of the growth would be a result of increasing retention.

Governor Kitson asked whether USF is reaching out to business and industry to identify workforce needs. Provost Wilcox said constant communication is taking place through community advisory boards located in each of USF's colleges.

Comparing USF to other institutions nationally, Governor Levine commended USF for its gains in research expenditures. He said that the State University System as a whole needed to do a better job of marketing its capability to handle major research funding opportunities.

Governor Silagy asked why USF proposed to lower four-year graduation rate goals. Provost Wilcox said that it was a reflection of disappointing retention performance at the branch campuses. He noted, however, that in fall 2018, admissions criteria will be standardized and increased across all campuses. Governor Lamb mentioned that similar to the conversation with FSU, he would like to see the gap (reduction in goals) closed.

Governor Felton noted that the passage rate goal for pharmacy was not met and that rates have declined over the last several years. Provost Wilcox said that the current rate is unacceptable. He indicated that USF had invested significantly in test preparation, admissions standards have increased, and the curriculum has been revised.

Governor Lamb asked about the university's aspirational goals. Both President Genshaft and incoming President Currall mentioned that a Top 25 status among public research universities and membership in the Association of American Universities are

two of the university's long-term goals. Board Chair Lautenbach indicated that he would like to see USF become a member of the Association of American Universities (AAU) within the next five years.

Governor Cerio asked whether USF had concerns that consolidation will impact the university's preeminence status. President Genshaft responded that USF remained convinced that it was on the right trajectory and that consolidation was the right thing to do.

There being no further questions or comments, Chair Jordan entertained two motions. First, she entertained a motion to approve the University of South Florida 2019 Accountability Plan excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Committee accepts the out-year portions of the plan as amended to restore the prior year goals for performance-based funding metric four for the 2015-2019 and 2017-2021 cohorts. A motion was made by Governor Lamb, seconded by Governor Cerio, and the motion carried unanimously.

Secondly, Chair Jordan entertained a motion to approve the University of South Florida's Preeminent State Research University Annual Status Update. A motion was made by Governor Scott, seconded by Governor Lamb, and the motion carried unanimously.

4. Florida International University 2025 Strategic Plan

Chair Jordan indicated that the Committee would pause in its consideration of accountability plans to consider approval of the Florida International University (FIU) 2025 Strategic Plan. She reminded the Committee that Board of Governors Regulation 1.001(3)(c) requires that each university's strategic plan is to be approved by the Board of Governors. She then recognized President Mark Rosenberg to present the Florida International University 2025 Strategic Plan.

President Rosenberg indicated that the vision for FIU is to achieve exceptional student-centered learning and upward economic mobility for graduates, to produce meaningful research and creative activities, and to produce transformative visions locally and globally resulting in recognition as a top 50 public university by 2025.

President Rosenberg noted that part of the plan is to limit enrollment. He also stressed that the plan aligns with the State University System 2025 Strategic Plan.

Dr. Rosenberg said that FIU's plan includes three priorities: to focus on personalized student success, to accelerate university preeminence through research and economic

impact, and to provide good stewardship of the state's resources. Dr. Rosenberg noted that the FIU Board of Trustees engaged in eight substantive meetings regarding the plan over the past 18 months.

President Rosenberg emphasized the importance of supporting preeminent programs. He identified FIU's strengths as its focus on water and the environment, extreme events, STEM transformation, sustainable coastal infrastructure, its Global Forensic and Justice Developmental Center, and its Center for Children and Families. Regarding stewardship of state resources, Dr. Rosenberg pointed to FIU's highest energy efficiency in the SUS, and he stated that FIU has significantly reduced its cost to the student in the last two years.

Dr. Rosenberg said that FIU intends to measure its success using 20 key performance indicators. He noted that the indicators directly align with performance-based funding metrics, preeminence funding metrics, and national rankings.

Governor Corcoran noted that the FIU 2025 Strategic Plan referenced the need for additional funding. He asked whether there would be a Legislative Budget Request (LBR) submitted for the next Legislative session. President Rosenberg stated that there would be an LBR. He also indicated that FIU would undertake an aggressive fundraising campaign.

Board Chair Lautenbach asked whether the Strategic Plan was contingent on receiving state funding. He said that the Board could not approve a plan based on dollars that it did not have. President Rosenberg indicated that if funding is not received, the university will make the plan work without those resources. Dr. Rosenberg said that an LBR might be approximately $15 million, but the total implementation would need about $50M recurring dollars over five years with around $30 million potentially coming from the state.

Governor Tripp expressed his concern that if FIU indicated that the necessary resources could be found elsewhere, the Legislature might determine that FIU didn't need state dollars. President Rosenberg said that while state dollars would be used, they would not be tied to a new LBR. He indicated that FIU understood that there might be no new state dollars**.**

Chair Jordan asked whether a future LBR would be for recurring dollars. Kenneth Furton, Provost, Chief Operating Officer, and Executive Vice President of Academic Affairs, indicated that the bulk of dollars associated with an LBR would be recurring.

Once again, Board Chair Lautenbach emphasized that the Board did not have the authority to approve a strategic plan predicated on new state dollars. Chancellor Criser

clarified that the issue was to approve a strategic plan and that if FIU intended to seek an LBR, the university would need to come back to the Board to do so.

There being no further discussion, Chair Jordan entertained a motion to approve the Florida International University 2025 Strategic Plan not contingent on a Legislative Budget Request or any other funding. A motion was made by Governor Cerio, seconded by Governor Lamb, and the motion carried unanimously.

5. Resumption of Accountability Plan Approval

A. Florida International University

Chair Jordan called on President Rosenberg to present the Florida International University 2019 Accountability Plan and FIU's Five-year Plan for Emerging State Research University Preeminence. President Rosenberg deferred to Provost Furton to present the plan. Following the Provost's presentation, Chair Jordan invited questions and comments.

Governor Tripp asked why a degree in pharmacy continued to be listed on the accountability plan. President Rosenberg responded that the degree is an artifact of community discussions. President Rosenberg said FIU continues to be asked whether degrees in pharmacy, dentistry, and veterinary medicine are on the horizon. He indicated that FIU has not been receptive to any of those requests. President Rosenberg said that if the Board wished to have FIU remove the program from its list of potential programs, it would be happy to do so. Governor Tripp noted that data did not support the need for another pharmacy program. President Rosenberg said that FIU would withdraw the program.

Governor Corcoran noted that FIU leads the SUS in reducing goals. President Rosenberg responded that not until the consideration of this year's accountability plans has the Board made clear its reluctance to see goals lowered. Chair Jordan said that Board Chair Lautenbach has always been clear about not lowering goals.

Governor Scott commended President Rosenberg on FIU's improving four-year graduation rates. Dr. Elizabeth Bejar, Senior Vice President, Academic & Student Affairs, shared several strategies FIU is taking to increase its graduation rate by nearly 5% every year.

Governor Levine said he would like to see how accountability plan goals aligned with those in FIU's strategic plan. Chair Jordan suggested that the Committee adjourn for the evening and that FIU should return the following morning to discuss its goals. The meeting was adjourned at 6:25 p.m.

(Reconvening of the Strategic Planning Committee: June 12, 2019)

Chair Jordan reconvened the Strategic Planning Committee at 8:37 a.m. with Governors Cerio, Felton, Huizenga, Lamb, Levine, Morton, and Scott present. A quorum was established.

Chair Jordan said that at the conclusion of yesterday's meeting FIU was asked to examine the goals proposed to be lowered in its accountability plan and report back to the Committee. President Rosenberg indicated that after reviewing data, FIU determined it would return to previously approved goals.

There being no further questions or comments, Chair Jordan entertained two motions. First, she entertained a motion to approve the Florida International University 2019 Accountability Plan excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Committee accepts the out-year portions of the plan as amended to restore pre-approved goals for performance-based metrics one, two, six, seven, and eight; and preeminence metrics three, six, and ten. A motion was made by Governor Cerio, seconded by Governor Lamb, and the motion carried unanimously.

Secondly, Chair Jordan entertained a motion to designate Florida International University as an Emerging Preeminent State Research University. A motion was made by Governor Lamb, seconded by Governor Huizenga, and the motion carried unanimously.

B. Florida Gulf Coast University

Chair Jordan called on President Michael Martin to present the Florida Gulf Coast University (FGCU) 2019 Accountability Plan. Following his presentation, Chair Jordan invited questions and comments.

Board Chair Lautenbach expressed his concern about FGCU's four-year graduation rates. He said that FGCU needed to increase its goals. Governor Kitson agreed and noted that FGCU went from 81 to 90 performance points, but only two of those performance points were gained as improvement points.

Governor Huizenga emphasized the need to keep accountability plan goals consistent with those in FGCU's recent LBR. He noted that the LBR's goal for the salaries of bachelor's graduates employed was $43,200, whereas the accountability plan's actual goal was $41,500. President Martin promised the Board that performance would be consistent with the goals provided in the LBR.

Governor Lamb expressed concern that academic progress rate goals were proposed to be lowered. He said lowering those goals could adversely impact four-year graduation rates. Chair Jordan said the Committee has been consistent in its reluctance to approve lowered goals. She indicated that the accountability plan's goals needed to be adjusted back to previously approved goals.

Governor Morton commented on the substantial drop in cost to the student across the system, and he attributed a large part of that to Bright Futures increases.

Governor Morton noted that, for years, he has been asking for an increase in the production of bachelor's graduates with nursing degrees. He emphasized the nursing shortage in Florida. He said that only USF's accountability plan mentioned increasing its nursing degree production. Governor Morton indicated that FGCU should consider producing more nursing graduates. He added that doing so would assist in increasing FGCU's performance on the salaries of bachelor's graduates, because the starting salaries of nurses are, on average, $55,000. Governor Huizenga agreed with Governor Morton.

Governor Tripp indicated that FGCU needed to reach out to the Florida College System to create more transfer agreements. He said that to do so might improve four-year graduation rates.

Chair Jordan asked if FGCU could return after the break and provide revisions to metric four.

After the break, FGCU returned and shared its revised goals. There being no further questions or comments Chair Jordan entertained a motion that the Committee approve the Florida Gulf Coast University 2019 Accountability Plan excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations and that the Committee accepts the out-year portions of the plan as amended: to restore the prior year goals for performance-based funding metric five and to revise performance-based funding metric four goals as follows: to 33% for the 2015-2019 cohort, to 37% for the 2016-2020 cohort, to 41% for the 2017-2021 cohort, and to 45% for the 2018-2022 cohort. A motion was made by Governor Lamb, seconded by Governor Morton, and the motion carried unanimously.

C. University of North Florida

Chair Jordan called on President David Szymanski to present the University of North Florida (UNF) 2019 Accountability Plan. Following his presentation, Chair Jordan invited questions and comments

Governor Kitson commended President Szymanski for focusing on key metrics and student success, noting that it starts with leadership at the top.

Governor Kitson asked why academic progress rates were not improving and why students were leaving UNF. President Szymanski responded that many students transfer to other SUS institutions, most notably FSU and UCF. He also noted that some UNF students transfer back to Florida College System institutions.

Governor Morton asked President Szymanski to elaborate on UNF's early alert system. Interim Provost Chally responded that the early alert system was a different model from others because it fell on the shoulders of the faculty to contact academic counselors when students were experiencing difficulty. She noted that another component of the system was to require all faculty to record mid-term grades.

Governor Stermon asked President Szymanski to expound on a UNF downtown presence. President Szymanski said that a downtown campus is not currently envisioned. He stressed the need for UNF to be part of the entire Jacksonville community. President Szymanski also stated that UNF's presence would assist in efforts to revitalize downtown Jacksonville. Dr. Szymanski noted that a downtown presence provided students with more opportunities for meaningful internships.

Governor Felton inquired as to a potential doctorate in biomedical science, noting that the Board had directed UNF to remove the program from their 2018 Accountability Plan. President Szymanski responded that the program would not be brought forth in the coming year, but he wanted to keep the discussion open for pursuing that program.

There being no further questions or comments, Chair Jordan entertained a motion to approve the University of North Florida 2019 Accountability Plan excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Committee accepts the out-year portions of the plan. A motion was made by Governor Scott, seconded by Governor Cerio, and the motion carried unanimously.

D. Florida Polytechnic University

Chair Jordan called on President Randy Avent to present the Florida Polytechnic University 2019 Accountability Plan. Following his presentation, Chair Jordan invited questions and comments.

Governor Kitson noted that out-year goals for bachelor's degrees awarded were proposed to be lowered. President Avent responded that this was due to Polytechnic's flattening enrollment.

Board Chair Lautenbach commended Polytechnic on its progress. However, he expressed disappointment that it was taking Polytechnic students five years to complete four-year programs. Chair Jordan noted, however, that time to degree out-year goals projected improvement.

President Avent explained that students might take longer to graduate if they fail key classes and are required to retake them. Chair Jordan said such cases should be exceptions to the rule. Board Chair Lautenbach added that parents have expectations that a four-year degree be completed in four years. Governor Kitson agreed and said that improvement depended on institutional priorities. Governor Kitson noted that other universities had made continuous improvement a part of their culture. Governors Cerio and Stermon agreed with the comments of Governor Kitson and other Board members.

Governor Lamb said that he was disappointed with both four-year graduation rates and academic progress rates, noting that these were especially important performance indicators. He noted that when Polytechnic was created, there were high expectations for performance.

Governor Levine said that he worried that complacency might be setting in at some SUS institutions. He emphasized that Florida's ranking as the best system in the country might be lost if underperformance is deemed acceptable. Chair Jordan agreed. She said that to be consistent, the Board has directed some universities to restore previously approved goals and to rethink others.

There being no further questions or comments Chair Jordan entertained a motion to defer action on Florida Polytechnic University's 2019 Accountability Plan until the August Board of Governors meeting and require Florida Polytechnic University to present a revised plan. A motion was made by Governor Morton, seconded by Governor Lamb, and the motion carried unanimously.

Chair Jordan recognized Governor Huizenga, Chair of the Facilities Committee, to make comments. Governor Huizenga expressed his frustration that Polytechnic was still without an Applied Research Center. He said that Polytechnic lacked the physical capacity to conduct research and provide students with meaningful research opportunities. Chair Jordan agreed, noting that, in turn, the situation hurt enrollment and student retention.

E. University of Florida

Chair Jordan called on President Kent Fuchs to present the University of Florida 2019 Accountability Plan and UF's Preeminent State Research University Annual Status Update. Following his presentation, Chair Jordan invited questions and comments.

Board Chair Lautenbach commended President Fuchs on UF's success and asked for a copy of the university's entire set of initiatives regarding four-year graduation rates.

Governor Morton noted a decline in the bar pass rate for the past five years. President Fuchs said that a new law school dean had been hired with the expectation that pass rates will improve.

Governor Tripp asked whether UF has given thought to doing away with the SAT and the ACT to increase access. President Fuchs said that UF is not considering those actions. He indicated, however, that UF continues to focus on first-generation students.

Governor Kitson asked whether the state has a compelling argument for high-tech companies to move to Florida as opposed to California or Texas. President Fuchs pointed to the large numbers of very talented students who want to remain in Florida. He said that this gives Florida an advantage over other states. Governor Kitson asked how Florida can get the word out to companies contemplating relocation. UF Board of Trustees Chair Mori Hosseini said that UF had hired a vice president for marketing. He indicated that UF is ramping up its efforts to make its presence known. Governor Kitson said that all SUS institutions should be making this effort.

Governor Lamb asked about UF's initiative to hire 500 faculty. President Fuchs said that UF would have more than 80% of those faculty on campus in a few months. Governor Cerio followed up by asking about the ratio of tenure to non-tenure track for these hires, and he questioned when the institution would reach 100% of the planned hires. President Fuchs replied that it would be this academic year when all the hires would be brought on board, but he was not certain about the tenure ratio.

There being no further questions or comments, Chair Jordan entertained two motions. First, she entertained a motion to approve the University of Florida 2019 Accountability Plan excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Board accepts the out-year portions of the plan. A motion was made by Governor Cerio, seconded by Governor Scott, and the motion carried unanimously.

Second, Chair Jordan entertained a motion to approve the University of Florida's Preeminent State Research University Annual Status Update. A motion was made by Governor Lamb, seconded by Governor Scott, and the motion carried unanimously.

F. University of Central Florida

Chair Jordan called on Interim President Thad Seymour to present the University of Central Florida 2019 Accountability Plan and UCF's Emerging Preeminent State

Research University Annual Status Update. Following his presentation, Chair Jordan invited questions and comments.

Governor Tripp noted that the number of UCF's undergraduates who earn 15 or more credits per semester is among the lowest in the SUS and that the accountability plan appears to be addressing the issue primarily for first-time-in-college students. He asked why efforts weren't being made to focus on all students. Provost Elizabeth Dooley noted that one way UCF is addressing the issue is to provide more financial aid. She also said that colleges across the campus are working on revising their curricula to ensure that graduates are meeting workforce needs while graduating on time.

Governor Morton noted that all universities faced the challenge of lowering the cost to degree. He asked whether UCF could continue to make progress. Interim President Seymour said that UCF's transfer agreements with Florida College System institutions are the lowest cost pathway for UCF students. He said that UCF's partnership with Valencia College at the UCF Downtown Campus results in a $6,000 savings for students.

Governor Kitson commended UCF for being thoughtful about enrollment growth. He said, however, that there is a risk in adding too many programs at the Downtown Campus. Interim President Seymour responded that few new programs would be added; rather, some programs are being moved from the main campus based on whether they will benefit from a downtown environment.

There being no further questions or comments, Chair Jordan entertained two motions. First, she entertained a motion to approve the University of Central Florida 2019 Accountability Plan excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Board accepts the out-year portions of the plan. A motion was made by Governor Lamb, seconded by Governor Morton, and the motion carried unanimously.

Secondly, Chair Jordan entertained a motion to approve the University of Central Florida's Emerging Preeminent State Research University Annual Status Update. A motion was made by Governor Lamb, seconded by Governor Scott, and the motion carried unanimously.

6. Adjournment

Having no further business, Chair Jordan adjourned the meeting at 12:22 p.m.

Darlene Jordan, Chair

R.E. LeMon, Ph.D.
Associate Vice Chancellor
for Planning and Policy

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Strategic Planning Committee
August 28, 2019

SUBJECT: 2019 System Accountability Plan

PROPOSED COMMITTEE ACTION

For information

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation 2.002

BACKGROUND INFORMATION

Regulation 2.002 requires the Board of Governors to annually submit institutional accountability plans and a system summary to the Governor, the President of the Senate, and the Speaker of the House of Representatives. At its June 2019 meeting, the Strategic Planning Committee considered approval of the 2019 accountability plans for each State University System institution. Based on the data and information provided in the institutional accountability plans, Board staff analyzed system-level data and trends for key performance indicators.

Dr. Christy England, Vice Chancellor for Academic and Student Affairs, will present highlights of the 2019 System Accountability Plan.

Supporting Documentation Included: 2019 System Accountability Plan

Facilitators/Presenters: Dr. Christy England

Enrollment Planning 24-27

INTRODUCTION

The Accountability Plan is an annual report that is closely aligned with the Board of Governors' 2025 System Strategic Plan. This report enhances the System's commitment to accountability and strategic planning by fostering greater coordination between institutional administrators, University Boards of Trustees and the Board of Governors regarding each institution's direction and priorities as well as performance expectations and outcomes on institutional and System-wide goals.

Once an Accountability Plan is approved by each institution's respective Boards of Trustees, the Board of Governors will review and consider the plan for approval, excluding those sections of the Plan that require additional regulatory or procedural approval pursuant to law or Board regulations.

This System Accountability Plan summarizes the data from each university's Accountability Plan. Interested stakeholders are encouraged to also review each university's Accountability Plan for important narrative information detailing key opportunities and initiatives in the coming years.

Performance Based Funding Metrics

The Performance Based Funding (PBF) Model includes 10 metrics that evaluate the institutions on a range of issues. The first eight metrics are the same for each institution. The last two metrics are institution-specific, one is chosen by the Board of Governors and one by each institution's Board of Trustees.

METRICS COMMON TO ALL UNIVERSITIES

1. Percent of Bachelor's Graduates Employed (Earning $25,000+) or Enrolled [1Yr After Graduation]

Note: The 2012-13 Median Wage data is based on Florida only data. The Board approved a change for this metric that uses wage data from all states that participate in the Wage Record Interchange System 2 (known as "WRIS 2"). The System goals are mathematically derived from the institutions' goals. The "Percent Change" row, in the goals section, compares the latest actual data with the planned out-year goal. A dot ('.') for the 2020-21 goal results from the fact that the Board did not approve the proposed goals for those institutions at the June 2019 meeting. Therefore, the goals reflect FIU and FSU's approved goals from the 2018 Accountability Plan.

Performance Based Funding Metrics *(continued)*

3. Average Cost to the Student [Net Tuition per 120 Credit Hours]

ACTUAL	FAMU	FAU	FGCU	FIU	FPOLY	FSU	NCF	UCF	UF	UNF	USF	UWF	SUS

%Δ	*-1*	*-5*	*-7*	*-20*		*-3*	*-683*	*-2*	*321*	*-21*	*0*	*-9*	*-4*

Note: This table reports costs based on resident undergraduate student tuition and fees, books and supplies as calculated by the College Board; the average number of credit hours attempted by students who were admitted as FTIC and graduated with a bachelor's degree for programs that requires 120 credit hours; and financial aid (loans not included) provided to resident undergraduate students. The System goals are mathematically derived from the institutions' goals. The "Percent Change" row, in the goals section, compares the latest actual data with the planned out-year goal.
Note: Board staff improved the methodology for calculating this metric by including 'third-party payments' (primarily from Veteran's Affairs, Vocational Rehab., ROTC, etc.) within financial aid amounts for 2016-17 and 2017-18 for a comparable year-over-year comparison.*

4. Four-Year Graduation Rate for Full-time, First-time-in-College (FTIC) Students

ACTUAL	FAMU	FAU	FGCU	FIU	FPOLY	FSU	NCF	UCF	UF	UNF	USF	UWF	SUS SAME	SUS ANY

Note: This table reports the percentage of first-time-in-college (FTIC) students who started in the Fall (or summer continuing to Fall) term and were enrolled full-time in their first semester and had graduated from the same institution by the summer term of their fourth year. FTIC includes 'early admits' students who were admitted as a degree-seeking student prior to high school graduation. The System goals are mathematically derived from the institutions' goals. The 'System Same' rate does not include the students who transfer between SUS institutions and still graduate within six years – the 'System Any' includes these system transfers. The "Percent Change" row, in the goals section, compares the latest actual data with the planned out-year goal. A dot ('.') for the 2018-22 goal results from the fact that the Board did not approve the proposed goals for USF at the June 2019 meeting. Therefore, the above goals reflect USF's approved goals from the 2018 Accountability Plan. *Note*: Data for the 2013-17 cohort has been updated to reflect the change in methodology made by Board staff to improve accuracy.*

Performance Based Funding Metrics *(continued)*

5. Academic Progress Rate [Second Year Retention Rate for FT-FTIC with At Least a 2.0 GPA]

Note: This table reports the percentage of first-time-in-college (FTIC) students who started in the Fall (or summer continuing to Fall) term and were enrolled full-time in their first semester and were still enrolled in the same institution during the Fall term following their first year with a grade point average (GPA) of at least 2.0 at the end of their first year (Fall, Spring, Summer). The System data include FTICs who transfer within the SUS. The System goals are mathematically derived from the institutions' goals. The "Percent Change" row, in the goals section, compares the latest actual data with the planned out-year goal.
Note: Board staff improved the methodology for calculating this metric by calculating the GPA at a later date which allowed more time for 'incomplete' grades to be resolved. This change required some 2016-17 APR rates to be revised for a comparable year-over-year comparison. This new methodology was not applied to all historical years.*

6. Percentage of Bachelor's Degrees Awarded within Programs of Strategic Emphasis

Note: This table reports the number of baccalaureate degrees awarded within the programs designated by the Board of Governors as 'Programs of Strategic Emphasis'. A student who has multiple majors in the subset of targeted Classification of Instruction Program codes will be counted twice (i.e., double-majors are included). The System goals are mathematically derived from the institutions' goals. The "Percent Change" row, in the goals section, compares the latest actual data with the planned out-year goal. A dot ('.') for the 2021-22 goal results from the fact that the Board did not approve the proposed goals for FIU at the June 2019 meeting. Therefore, the above goals reflect FIU's approved goals from the 2018 Accountability Plan.

J	**Doctoral Degrees Awarded Annually** includes Research Doctoral Degrees and Medical/Health Professional Doctoral Degrees	Board of Governors	2017-18	**≥ 400**	404	557	438	1,627	702
K	**Number of Post-Doctoral Appointees**	Top American Research Universities	Fall 2015	**≥ 200**	75	202	51	679	282
		Board of Governors	Fall 2017		222	225	94	640	276
L	**Endowment Size ($M)**	Board of Governors	2017-18	**>$500 M**	$209	$681	$163	$1,735	$480
	NUMBER OF CURRENT CRITERIA MET: *(based on section 1001.7065, F.S.)*				**8**	**12**	**8**	**12**	**11**

Note: There are two sources listed for criteria C, D, and K because the 2019 Florida Legislature amended the allowable sources for this year's evaluation/designation (see Section 35 in HB7071).

System Strategic Plan: Key Performance Indicators

The following metrics are from the Board's 2025 System Strategic Plan. The Strategic Plan metrics that are included within the PBF section are not shown again in this section.

TEACHING & LEARNING METRICS

1. Public University National Ranking [Number of Top 50 Rankings from BOG's official list of publications]

Note*: Kiplinger is revising their methodology and did not release a new annual ranking in 2019, so the 2018 ranking was used again.

2. Percent of Freshmen in Top 10% of High School Class [Fall Term Only]

ACTUAL	FAMU	FAU*	FGCU	FIU	FPOLY	FSU	NCF	UCF	UF	UNF	USF	UWF	SUS
2014	13	12	15	21	21	40	45	31	75	13	28	17	**33**
2015	16	11	13	18	17	38	43	33	72	19	30	14	**33**
2016	16	14	14	18	14	41	35	33	73	14	33	12	**34**
2017	12	16	14	25	22	41	38	31	73	15	34	15	**35**
2018	11	16.5	14	25	25	39	37	34	74	16	32	15	**35**
GOALS	**FAMU**	**FAU**	**FGCU**	**FIU**	**FPOLY**	**FSU**	**NCF**	**UCF**	**UF**	**UNF**	**USF**	**UWF**	**SUS**
2019	20	22	16	25	22	41	40	35	73	17	35	15	**36**
2020	25	23	17	26	22	42	43	36	73	18	35	16	**37**
2021	30	24	20	26	23	43	46	37	73	19	36	16	**38**
2022	35	25	22	27	23	44	49	38	75	20	37	16	**39**

This table reports the percent of all degree-seeking, first-time, first-year (freshman) students who had high school class rank within the top 10% of their graduating high school class. As reported by the university to the Common Data Set (C10). The System goals are mathematically derived from the institutions' goals. *Note*: FAU's data does not match their CDS reports due to excluding summer-to-fall entrants. This data will be revised in the 2020 Accountability Plans.*

Key Performance Indicators *(continued)*

3. Professional Licensure & Certification Exams: First-time Pass Rates

Summary of Exam Pass Rates Relative to Benchmarks (for the most recent data shown below)

	FAMU	FAU	FGCU	FIU	FPOLY	FSU	NCF	UCF	UF	UNF	USF	UWF	SUS
Above/Tied	0	3	2	5		4		5	10	2	5	1	**37**
Below	4	1	0	1		1		0	0	0	1	0	**8**

NURSING: National Council Licensure Examination-Registered Nurse (NCLEX-RN)

	FAMU	FAU	FGCU	FIU	FPOLY	FSU	NCF	UCF	UF	UNF	USF	UWF	SUS	BENCH
2014	64	89	96	82	.	80	.	98	90	85	86	82	**87**	**85**
2015	78	81	96	88	.	95	.	97	93	94	90	94	**92**	**87**
2016	76	96	99	87	.	94	.	92	90	94	94	86	**91**	**88**
2017	64	100	99	87	.	95	.	96	87	94	93	99	**91**	**90**
2018	82	97	100	89	.	95	.	95	93	95	94	98	**94**	**92**

Note: Pass rate for first-time examinees for the National Council Licensure Examination for Registered Nurses (NCLEX-RN) are based on the performance of graduates of baccalaureate nursing programs. National benchmark data is based on Jan-Dec NCLEX-RN results for first-time examinees from students in US-educated baccalaureate degree programs as published by the National Council of State Boards of Nursing.

LAW: Florida Bar Exam

	FAMU	FAU	FGCU	FIU	FPOLY	FSU	NCF	UCF	UF	UNF	USF	UWF	SUS	BENCH
2014	73	.	.	79	.	82	.	.	89	.	.	.	**82**	**74**
2015	66	.	.	84	.	80	.	.	87	.	.	.	**81**	**69**
2016	54	.	.	87	.	78	.	.	78	.	.	.	**76**	**66**
2017	50	.	.	87	.	81	.	.	77	.	.	.	**75**	**69**
2018	47	.	.	88	.	83	.	.	69	.	.	.	**72**	**66**

Note: The benchmark for this exam is not the national average – instead, it is based on first-time pass rate for students enrolled in Florida institutions and excludes students in non-Florida institutions.

PHYSICAL THERAPY: National Physical Therapy Examination (NPTE)

	FAMU	FAU	FGCU	FIU	FPOLY	FSU	NCF	UCF	UF	UNF	USF	UWF	SUS	BENCH
2012-14	59	.	96	75	.	.	.	93	94	97	97	.	**87**	**90**
2013-15	59	.	90	81	.	.	.	98	96	96	95	.	**88**	**91**
2014-16	70	.	93	89	.	.	.	98	95	96	94	.	**90**	**92**
2015-17	61	.	91	92	.	.	.	100	95	96	95	.	**90**	**92**
2016-18	69	.	94	92	.	.	.	99	95	94	94	.	**91**	**92**

Note: A three-year average pass rate for first-time examinees on the National Physical Therapy Examination is used rather than annual averages because of the relatively small cohort sizes in a given year.

Key Performance Indicators *(continued)*

3. Professional Licensure & Certification Exams: First-time Pass Rates (continued)

MEDICINE: US Medical Licensing Exam (USMLE) – Step 1 (2nd year of Medical School)

2021-22	4.1	4.2	4.0	4.6	4.5	3.8	3.8	4.2	4.0	4.3	4.0	4.0	**4.1**

Note: This table reports the number of years between the start date (using date of first entry) and the end date (using the last month in the term degree was granted) for a graduating class of first-time, single-major baccalaureates in 120 credit hour programs within an academic year (Summer, Fall, Spring). Students who took longer than fifteen years are excluded from this analysis. Actual data are shown in the highlighted rows, and planned/projected goals are not highlighted. The System goals are mathematically derived from the institutions' goals.

5. Six-Year FTIC Graduation Rates [includes Full- & Part-time students]

ACTUAL	FAMU	FAU	FGCU	FIU	FPOLY	FSU	NCF	UCF	UF	UNF	USF	UWF	SUS SAME	SUS ANY
2008-14	39	45	49	53	.	79	69	69	88	55	66	50	**66**	**71**

2016-22	60	56.5	57	61	54	84	68	74	90	61	73.3	51	**72**	**77**

Note: This table reports the percentage of first-time-in-college (FTIC) students who started in the Fall (or summer continuing to Fall) term and who had graduated from the same institution within six years. The System goals are mathematically derived from the institutions' goals. The 'System Same' rate does not include the students who transfer between SUS institutions and still graduate within six years – the 'System Any' includes these system transfers.

Note: These tables report the counts of distinct baccalaureate and graduate degrees. In those cases where baccalaureate degrees are awarded under two different degree CIPs, a distinction is made between "dual degrees" and "dual majors." Dual degrees are counted as separate degrees (i.e., counted twice), and include those cases where the second major differs substantially from the first because either the college is different, the degree designation is different (e.g., BA, BS, BBA, BFA, etc.), or the degree CIP is in a different 2-digit range (e.g., 51* vs. 52*); in these cases, the second degree CIP receives a "degree fraction" of 1.0. If these conditions do not apply, the second major is considered a dual major, and the degree associated with it is not counted a second time; in these cases, each dual major degree CIP receives a degree fraction of .5 apiece. The calculation of degree fractions is made according to each institution's criteria. The System goals are mathematically derived from the institutions' goals and rounded to the nearest ten.

Note: Board staff identified an error with the 2017-18 degree counts in the FIU 2019 Accountability Plan approved by the Board of Governors in June 2019. Since the error impacted the FIU goals, the Board office asked FIU's Board to re-approve revised goals for this metric in their 2019 Accountability Plan, which will subsequently need to be re-approved by the Board of Governors in October 2019. These goals have been revised and are pending BOT approval.*

Note: These tables report the percentage of baccalaureate and graduate majors within the specific disciplines of Science, Technology, Engineering, or Mathematics (STEM) and Health Professions. Both the numerator and denominator include second majors. The System goals are mathematically derived from the institutions' goals.

Key Performance Indicators *(continued)*

SCHOLARSHIP & RESEARCH METRICS

Through its research successes, the State University System plays a critical role in Florida's economy, helping it achieve a national and global reputation for innovation. In brief, the System provides: (1) a highly educated workforce for high-skill, high-wage jobs and companies; (2) employs researchers who tackle some of the most significant challenges facing Florida, the nation, and the world; (3) produces intellectual property that can be commercialized through licenses and patents; (4) establishes partnerships with local and regional industries; (5) promotes the creation of start-up and spin-off companies; and, (6) attracts new employers to Florida.

Scholarship & Research Supplement

Academic Program Quality

All institutions maintain regional accreditation through the Southern Association of Colleges and Schools. In addition, Board regulation (3.006) encourages institutions to seek national or specialized accreditation from professional organizations for its colleges, schools and academic programs for which there are established standards.

Specialized Accreditation

Seventy-one percent (71%) of State University System's academic programs for which specialized accreditation was available, received, or maintained the accreditation during academic year 2017-18. Another 5% are in the planning stages of seeking such accreditation, which may take several years to achieve due to the considerable time and resources required to demonstrate that quality assurance standards established by the accrediting body are adequately addressed. To supplement specialized accreditation reviews and ensure that programs without such accreditation receive sufficient attention, the Board requires the review of all academic degree programs at minimum every seven years.

Percentage of Programs with Specialized Accreditation

Source: BOG staff analysis of 2018 State University System Accreditation Survey. Note: Programs suspended for new enrollments are included in these counts. Data reports programs across all degree levels.

Student Learning Outcomes Assessment

Academic Learning Compacts were established in 2004 to convey Student Learning Outcomes (SLO) for each baccalaureate program in the State University System. These compacts identify what students are expected to know by the time they graduate and how that learning will be assessed. On an annual basis, programs also report whether the results of the assessment process have been used to guide improvement. As of 2017-2018 nearly all of the undergraduate programs across the System have identified core student learning outcomes, adopted or developed assessment instruments, and used the results to guide improvement.

UNIVERSITY CENTERS AND INSTITUTES

In fiscal year 2017-18, there were 536 active University Centers and Institutes engaged in a wide range of activities related to scientific research, education, law and other community-service. In total, these centers and institutes accounted for $725 million dollars in research activities – with 79% of these activities funded from non-state sources. Despite including many centers that are not focused on research, these centers and institutes generated a $3.85 Return on Investment (ROI) for every dollar of State funds invested.

Note: These tables report the Full-time Equivalent (FTE) which is a measure of all instructional activity (regardless of fundability) that is based on the number of credit hours that students enroll. FTE is based on the standard national definition, which divides undergraduate credit hours by 30 and graduate credit hours by 24. Pursuant to section 1013.31, Florida Statutes, Board facilities staff use this data as a key factor in the calculation of facility space needs for institution educational plant surveys. The System goals are mathematically derived from the institutions' goals and rounded to the nearest ten. The "Percent Change" row, in the goals section, compares the latest actual data with the planned out-year goal.

Note: These tables report the percentages of FTE enrollment that is classified as Distance Learning for all students at all campuses regardless of funding source. Distance Learning is a course in which at least 80 percent of the direct instruction of the course is delivered using some form of technology when the student and instructor are separated by time or space, or both per 1009.24(17), F.S.. Undergraduate counts do not include remedial instruction. The System goals are mathematically derived from the institutions' goals. The "Percent Change" row, in the goals section, compares the latest actual data with the planned out-year goal.

Note: FAMU's 2017-18 data has been revised since the Board approved their 2019 Accountability Plan due to a data resubmission.*

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Strategic Planning Committee
August 28, 2019

SUBJECT: State University System 2025 Strategic Plan Mid-Course Correction

PROPOSED COMMITTEE ACTION

For information

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

At its January 31, 2019 meeting, the Strategic Planning Committee initiated a review of the Board's 2025 Strategic Plan metrics, beginning with the Teaching and Learning metrics. At its March 27, 2019 meeting, the Committee reviewed the Research, Scholarship and Innovation, and the Community and Business Engagement metrics. At each of these meetings, the Committee requested additional information on certain metrics.

Dr. Christy England, Vice Chancellor for Academic and Student Affairs, will provide an update on the metrics where additional information was requested. She will also provide the Committee an overview of the metrics already reviewed.

Supporting Documentation Included: 2019 Review of Metrics

Facilitators/Presenters: Dr. Christy England

2025 System Strategic Plan
2019 Review of Metrics

Process Outline

At its January 31, 2019 meeting, the Strategic Planning Committee began a review of the Board's 2025 Strategic Plan metrics associated with the Plan's goals to determine whether the metrics need to be adjusted based on progress-to-date, new Board priorities, or external circumstances. At this meeting, the Committee reviewed the Strategic Plan's Teaching and Learning metrics. The Committee considered revisions for five metrics: four-year graduation rates, six-year graduation rates, total bachelor's degrees awarded, graduate degrees awarded, and bachelor's degrees awarded to African-American and Hispanic Students. Appendix A includes the revised goals for these metrics that the Committee discussed in January. Also, the Committee discussed including two new metrics: graduation rates for Pell Grant students and graduation rates for Florida College System AA Transfers. The Committee agreed to a goal for graduation rates for Pell students (see Appendix A), but requested more information about graduation rates for AA transfers.

At its March 27, 2019 meeting, the Strategic Planning Committee reviewed the Strategic Plan's Research, Scholarship, and Innovation metrics and Community and Business Engagement metrics. The Committee considered revisions for total research expenditures, percent of research expenditures from external sources, number of licenses/options executed annually, and number of start-up companies. The Committee requested additional information on research expenditures and percent of research expenditures from external sources, but revised goals for the other research metrics (see Appendix A). For the Community and Business Engagement metrics, the committee considered revising the percentage of baccalaureate graduates continuing their education or employed full-time to align it with metric one in the Performance-Based Funding model. The Committee also discussed including a new metric: median wages for bachelor's graduates employed full-time. The Committee requested additional information on these two metrics related to employment.

At its June 13, 2019 meeting, the Innovation and Online Committee recommended revising the goal: percent of State University System courses bearing a "high-quality" rating in the Florida Virtual Campus online catalog. The Strategic Planning Committee will consider this revision at its August 2019 meeting. The revised goal is included in Appendix A.

If the Strategic Planning Committee approves final changes to metrics in August 2019, the Committee can review and consider approving a revised 2025 System Strategic Plan at the Board's October 2019 meeting.

There are three groups of metrics that the Strategic Planning Committee will consider at its August 2019 meeting:

- **Existing Metrics Still Under Consideration:** This group includes metrics that the Committee requested more information or did not recommend a revised goal. This group also includes three metrics that Strategic Planning Committee has not yet considered: percent of State University System courses bearing a "high-quality" rating in the Florida Virtual Campus online catalog; percent of undergraduates engaged in research; and percent of baccalaureate degrees awarded without excess hours.
- **Metrics Needing Technical Revisions:** Board staff identified two metrics not previously reviewed that require the Board to make technical revisions to accurately reflect the methodology and data used.
- **Metrics to Be Added:** This includes two metrics that the Committee previously discussed but wanted to reconsider at a later meeting.

Appendix A provides a complete list of metrics, the status of each one, and proposed new goals if the Committee made a recommendation during one of the previous meetings.

Existing Metrics Still Under Consideration

PERFORMANCE METRICS	CURRENT GOAL	CURRENT ACTUAL	2025 TREND	PROPOSED GOAL	UPDATES
4) Percent of SUS courses bearing a "high-quality" rating in the Florida Virtual Campus online catalog	90%			100%	Revised language recommended by Online and Innovation Committee June 2019
8) Percent of baccalaureate degrees awarded without excess hours --- CHANGE METHODOLOGY ---- Changes calculation to match 120% change by 2019 Legislature	80%	79%			The 2019 Legislature changed the methodology for calculating excess hours. The Board may wish to consider this change for the excess metric in the strategic plan.
22) Percent of Undergraduate Seniors Assisting in Faculty Research --- or --- Percent of Undergraduates Engaged in Research	TBD	n/a	n/a	Question added to Senior Exit Survey	The Council for Academic Vice Presidents and Vice Presidents for Research recommended a question for all 12 SUS institutions to add to the senior exit survey.
23) Total R&D Expenditures	$2.29B	$2.32B	$2.68B	$3B	Goal proposed by Gov. Levine and Vice Presidents for Research in June 2019
24) Percent of R&D Expenditures funded from External Sources	71%	54%	*	$1.75B	Goal proposed by Gov. Levine and Vice Presidents for Research in June 2019
29) Percentage of Baccalaureate Graduates Continuing Education or Employed ---- CHANGE TO ----- Percent of Bachelor's Graduates Employed (Earning $25,000+) or Enrolled	90% --- .	76% ---- 68%	79% ---- 71%	TBD	Discussed aligning goal with PBF goal in March 2019. More information was requested and is provided below.

Percent of SUS courses bearing a "high-quality" rating in the Florida Virtual Campus online catalog

The Innovation and Online Committee recommended a revision to this goal at its June 13, 2019 meeting and forwarded the recommendation to the Strategic Planning Committee for consideration. The Committee is recommending the goal change to 100% of new and substantively revised online courses must meet Florida standards following an approved review process. Existing and continuing courses be reviewed on no less than a 5-year cycle.

Percent of baccalaureate degrees awarded without excess hours

In 2009, the Florida Legislature established an "Excess Credit Hour Surcharge" to encourage students to complete their baccalaureate degrees as quickly as possible. This metric is based on the statutory requirement that mandates 110% of required hours as the threshold. However, the 2019 Legislature amended this provision, changing the excess hours surcharge threshold from 110 percent to 120 percent beginning with the summer 2019 term. The Committee may wish to consider revising this metric to align with the new legislative changes or keep the Strategic Plan goal as it is to continue encouraging institutions to reduce the number of excess hours that students accrue and to graduate students in a timely manner. If the Committee decides to amend the metric, it may wish to consider a revised benchmark. The percent of baccalaureate degrees awarded without excess hours using the 120 percent threshold is 91%, which exceeds the current benchmark of 80%.

Exhibit 1
Percent of baccalaureate degrees awarded without excess hours

Metric Language	110% Threshold		120% Threshold		%PT Δ
	2016-17	2017-18	2016-17	2017-18	
% of baccalaureate degrees awarded without excess hours	77%	79%	89%	91%	12

Source: Office of Data Analytics, Board of Governors, July 2019.

Percent of undergraduates engaged in research

In March 2019, the SUS Vice Presidents for Research began discussions of the best method for collecting data to measure the percentage of undergraduates engaged in research. In June, they made a recommendation to the Council for Academic Vice Presidents. The Council for Academic Vice Presidents made some modifications and is making a recommendation to the Strategic Planning Committee. Since this metric has not yet been measured system-wide, there is no recommended benchmark at this time. It is recommended that each SUS institution incorporate the following question to its senior exit survey:

> As part of your education at (fill in SUS name), did you participate in any of the following: (Select all that apply.)
> ___ Completed an honors thesis
> ___ Worked on my own research topic with the guidance of a faculty member
> ___ Worked on research with a faculty member (individually or jointly)
> ___ Submitted an article or my own research for publication or exhibition
> ___ Presented or exhibited research at a professional/academic conference (individually or jointly)
> ___ Other (please describe)

It is recommended that each institution begin reporting this information to the Board office beginning with the 2020-21 academic year in fall 2021.

Research expenditures

At the March 2019 Strategic Planning Committee meeting, the system's total research expenditure goal was discussed for revision. In 2017-18, the system exceeded the 2025 goal of $2.3 billion, with a total of $2.32 billion in research expenditures. The Board has placed a heavy emphasis on research in recent years, with the creation of the Academic and Research Excellence Committee, the development of an R&D dashboard, and the annual R&D workshop in Washington D.C., among other activities.

In June 2019, Governor Levine, Chair of the Board's Academic and Research Excellence Committee, met with the Vice Presidents for Research across the State University System to discuss a new goal for research expenditures. Governor Levine reported to the Board in June that the Vice Presidents agreed on a $3 billion goal for the year 2025. With the system's continued focus in this area and increased opportunity at the state and federal level, this goal is well within reach.

Research funded from external sources

At the March 2019 Strategic Planning Committee meeting, the percent of research from external sources was discussed for revision. This is a metric where the original goal was set as a percentage, and because of increased state investment in research and unpredictability of federal awards, the system is not on pace to achieve this goal.

Governor Levine, Chair of the Board's Academic and Research Excellence Committee, met with the Vice Presidents for Research across the State University System in June 2019 to discuss revisions to this metric. Governor Levine and the Vice Presidents agreed on a $1.75 billion goal for the year 2025, rather than using a percentage. With the system's continued focus in this area and increased opportunity at the state and federal level, this goal is well within reach.

Percentage of bachelor's graduates employed or continuing education

At its March 2019 meeting, the Strategic Planning Committee discussed the percentage of bachelor's graduates employed or continuing education metric. The metric is intended to better inform students as to how previous graduating classes fared when entering the workforce and is similar to metric one in the performance-based funding model. Performance on this metric is currently 14% below the 2025 goal of 90%. Employment data used in calculating the metric is from a voluntary national data exchange, which includes information from 44 states, the D.C. area, and Puerto Rico. However, Alabama, California, Hawaii, Massachusetts, and New York do not participate. The data exchange excludes graduates who are temporarily employed, self-employed, and those employed by the military, the federal government, and many non-profits.

The Committee discussed revising the goal to acknowledge data caveats and whether the goal needed to align with the current metric in the performance-based funding model, which is the percent of bachelor's graduates employed (earning $25,000+) or enrolled. The Committee opted to wait until a later meeting before deciding on any changes to this metric.

In the last few years, Board staff has produced a series of reports that reviews the outcomes of baccalaureate graduates. Highlights from the most recent Baccalaureate Follow-Up Study (January 2018) include the following.

- At the time of the study, employment and/or educational outcomes were found for 84% of the graduates.
- Of the graduates who were found, the majority of graduates in the study worked one, five, and ten years after completing a baccalaureate degree at a state university system institution.

  - In Year 1, just over 90% of graduates found worked after completing a baccalaureate degree.
  - In Year 5, approximately 93% of graduates found worked.
  - In Year 10, the percentage of graduates found working increased to 97%.
- Additionally, during the first year following graduation, just over 30% of graduates who were found pursued additional education.

Since the Committee met in March 2019, the Legislature modified Ch. 2019-103, Laws of Florida, to require the Board of Governors to match individual student information with information in the files of state and federal agencies that maintain educational and employment records. The Board must enter into an agreement with the Department of Economic Opportunity that allows access to the individual reemployment assistance wage records maintained by the department. This change will allow Board staff to continue to report on the 1, 5, and 10-year outcomes of baccalaureate graduates.

Metrics Requiring Technical Edits

PERFORMANCE METRICS	CURRENT GOAL	CURRENT ACTUAL	2025 TREND	PROPOSED GOAL	Proposed Edit to Metric Definition
6) Four-year Graduation Rates For FTIC full-time and part-time students	50%	51%	62%	65%	Remove part-time students
11) Bachelor's Degrees Awarded to African-American & Hispanic Students PBF: FAU, FGCU, FIU	36,000 40%	41%	44%	46%	Move to a percentage goal only

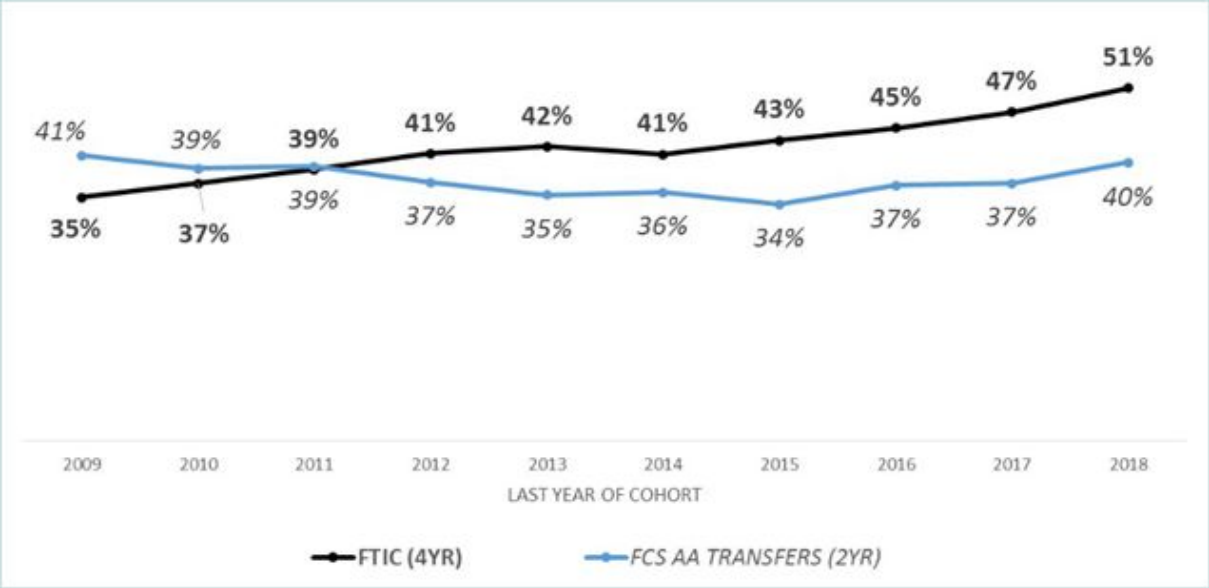
Four-year Graduation Rate

At its January 2019 meeting, the Strategic Planning Committee discussed a new goal for the four-year graduation rate for the system of 65%. Upon staff review of this metric following the meeting, it was identified that part-time students were still included in the 2025 Strategic Plan but not in the actual graduation rate calculation for performance-based funding. Part-time students make up less than 1% of the FTIC students who begin in the fall semester and are not likely to graduate in four years. It is recommended that the Board consider revising this definition in the 2025 Strategic Plan to include only full-time FTIC students, as this is consistent with the definition used for performance-based funding.

Bachelor's Degrees Awarded to African-American & Hispanic Students

At its January 2019 meeting, the Strategic Planning Committee discussed a new goal for the bachelor's degrees awarded to African-American & Hispanic Students of 46%. Upon staff review of this metric, it was identified that the 2025 Strategic Plan includes both a percentage and a number as goals. Having both values can cause some confusion as the number and percentage may not always align if the system grows at different rates over time. A percentage goal for this metric controls for any unexpected enrollment shifts over time and allows the system to have a strategic focus for this area. It is recommended that the Board consider revising this goal to only be a percentage benchmark.

New Metrics to Consider



PERFORMANCE METRICS	CURRENT GOAL	CURRENT ACTUAL	2025 TREND	PROPOSED GOAL
FCS AA Transfer Grad Rate (2-yr)	.	40%	----	TBD
Median Wages of Bachelor's Graduates Employed Full-time	.	$38,100	$43,200	TBD

Florida College System Associate of Arts (AA) Transfer Student Graduation Rate

At its January 2019 meeting, the Strategic Planning Committee discussed including a metric on Florida College System AA Transfer Graduation Rate. Information presented to the Committee in January showed that while the four-year graduation rate for FTIC students has increased for the system, the two-year graduation rate for AA-transfer students has declined over this period. The Committee requested additional information on this topic.

In July 2019, Board staff calculated a two-year graduation rate for the 2016-18 AA-transfer cohort (this information was not available in January). The graduation rate for this cohort is 40% for the system, representing just a 3% increase from the 2010-12 cohort. In comparison, four-year graduation rates for FTIC students have increased by nearly ten percentage points since the 2010-14 cohort.

Exhibit 2
Graduation Rates of FTIC Students and AA Transfers

Source: Office of Data Analytics, Board of Governors, July 2019.

In Fall 2018, AA transfer students made up approximately 25% of all undergraduate students (compared to 52% of students who are FTIC) in the State University System, yet there is not a metric in the 2025 Strategic Plan to support this population. The following section provides additional detail on this student population and factors that may influence graduation.

AA transfer students have different characteristics than FTIC students. First, AA transfer students tend to be older - 78% of these students are 22 or older, compared to 16% of FTIC students. AA transfer students are more likely to attend part-time, with 22% attending part-time, compared to 2% of FTIC students. As a result, AA transfer students take fewer hours per semester than FTIC students – an average of 10.6 hours for AA transfers compared to 12.9 hours for FTIC. Finally, FTIC students tend to have slightly higher GPA's than AA transfer students - 3.18 for FTIC compared to 2.95 for AA transfer.

In terms of the types of degrees awarded, business is the most awarded bachelor's degree program for both FTIC and AA transfer students – for both 19% of all bachelor's degrees awarded are in business. FTIC students are somewhat more likely than AA transfer students to earn bachelor's degrees in biology/biomedical science and engineering, while AA transfer students are somewhat more likely to earn degrees in education, psychology, and public administration/social services. Exhibit 3 below provides a detailed comparison of the types of degrees awarded to AA transfer students and FTIC students.

Exhibit 3
Bachelor's Degrees Awarded by Discipline for AA Transfers and FTIC Graduates

DEGREE DISCIPLINE (2-DIGIT CIP)	TOTAL			FCS AA TRANSFER			FTIC		
	#	%	RANK	#	%	RANK	#	%	RANK

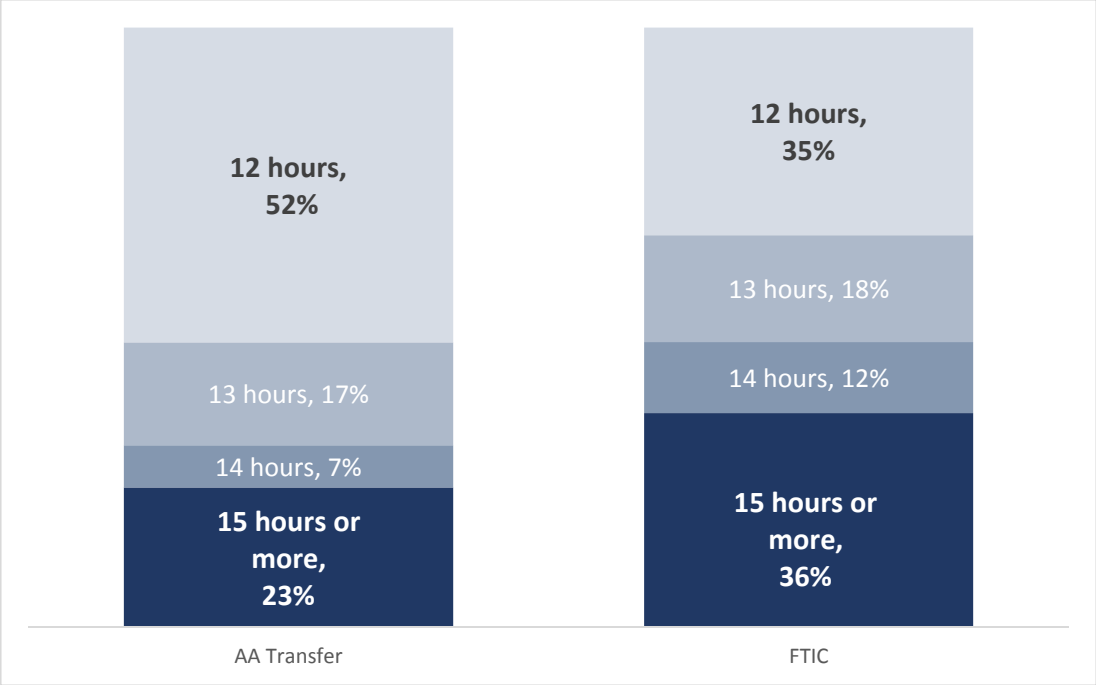
Source: Office of Data Analytics, Board of Governors, July 2019.



When comparing the cohorts used to calculate graduation rates for AA-transfers and FTIC students, there are a variety of factors that may influence the lower graduation rates for AA transfer students.[1] These include the following.

- 13% of AA transfer students that start full-time switch to part-time status the following term, resulting in lower success outcomes and longer time to degree. In contrast, 2% of FTIC students start full-time and switch to part-time.
- 13% of AA transfer students who begin full-time, leave after two semesters, this factor, coupled with the students switching to part-time status, influence the two-year graduation rates for this cohort. This rate is consistent with the percentage of FTIC students who leave after the first year.

[1] The Board uses students who begin in full-time in the fall semester to calculate four-year graduation rates and used an identical methodology to calculate the two-year graduation rates for AA transfers. Students only have to be enrolled full-time that first semester to be included in the calculation.

- AA transfer students who do enroll full-time, take fewer hours per term than FTIC students. Many SUS institutions have emphasized taking 15 hours to encourage students to finish in four years. However, fewer AA transfer students are taking 15 hours per semester. Exhibit 4 compares how many credit hours full-time AA transfer students take compared to full-time FTIC students. As of Fall 2018, more than half of the full-time AA transfer students were only taking 12 hours.

Exhibit 4
Average Credit Hours Taken by Full-time AA Transfer and FTIC Students, Fall 2018

Source: Office of Data Analytics, Board of Governors, July 2019.

- Finally, AA-transfer students are less likely to change their major than FTIC students. For AA-transfers who graduated in 2018, 21% changed their major, compared to 28% of FTIC students.

As a result of the declining or flat trend of FCS AA transfer two-year graduation rates, the Board may wish to consider adding this as a metric to the 2025 Strategic Plan.

Median wages

At its March 2019 meeting, the Strategic Planning Committee discussed including a metric on the median wages of bachelor's graduates employed full-time. The committee agreed to include this metric but did not identify a goal for it. Based on staff review, the 2025 trend for this metric will be $43,200.[2] This trend is based on readily available data, but since employers determine wages, it can be difficult to predict.

[2] The projected median wage for 2025 is a conservative estimate based on a $700 increase per year until 2025. On average wages have increased by $900 per year, with slower increases in the last few years. Any changes to minimum wage policy may also have an effect on this projection.

SUBJECT: Programs of Strategic Emphasis Update

PROPOSED COMMITTEE ACTION

For information

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

An essential component of the 2025 Strategic Plan is the list of Programs of Strategic Emphasis (PSE). The PSE list exists as one of several tools for aligning the degree production goals of the State University System with the economic and workforce needs of Florida, and it is a component of the Performance-Based Funding Model. Every few years, Board staff review this list to ensure that the programs on the list are aligned with the workforce needs of Florida.

Board staff conducted an environmental scan and workforce analysis to identify labor market demand for postsecondary graduates. Staff also reviewed and analyzed several economic and workforce-related reports and data sources, both at the state and national level. SUS institutions were provided draft copies of the updates for review and comment. Board staff reviewed this feedback and made adjustments to the list.

Mr. Roger Strickland, Director of Economic Development, will brief the Committee on the recommended changes to the PSE list resulting from the various analyses.

Supporting Documentation Included:	Revised PSE Methodology; Revised Gap Analysis Methodology; Recommended PSE List
Facilitators/Presenters:	Mr. Roger Strickland

Methodology for Updating Programs of Strategic Emphasis in the State University System of Florida, Board of Governors 2019 Mid-Course Correction - 2025 Strategic Plan

July 2019 (DRAFT)

An essential component of the 2025 Strategic Plan mid-course correction initiative is the need to update the current State University System list of Programs of Strategic Emphasis. The Programs of Strategic Emphasis exist as one of several tools for aligning the degree production goals of the State University System with the economic and workforce needs of Florida. Also, the Programs of Strategic Emphasis is a component in Performance-Based Funding.

As in past revisions to the Programs of Strategic Emphasis list, a meta-analysis of the current reports and data of key economic and workforce councils in Florida was conducted. These "key councils" include Enterprise Florida, Inc., the Council of 100, the Florida Chamber of Commerce, and the Department of Economic Opportunity. Other organizations whose reports and data were used to inform this process include the Florida Center for Nursing, the Florida Department of Education, and the U.S. Department of Labor.

The methodology used to reevaluate assumptions and forecasts that provide the framework for targeting degree programs is relatively straightforward.

1) Identify the recommendations of Florida's leading economic and workforce councils (key councils) and national reports.
2) Merge and evaluate the areas of interest and emphasis from the key councils to determine appropriate broad program categories that are in alignment. This review did not reveal any reason to adjust the current broad program categories.
3) Identify specific academic programs and program clusters by CIP code[1] that should be included in the broad program categories (Appendix A).

The academic degree programs associated with the proposed new categories are identified in Appendix A. An expanded list of all available programs for those targeted at the two and four-digit CIP code level can be accessed online.[2] It should be noted that not all of the CIP codes found in the online expanded list represent programs currently offered within the State University System. Having a complete list allows for new degree programs to be

[1] CIP is the Classification of Instructional Programs code required for reporting degrees and enrollments to the National Center for Educational Statistics and used by the Board of Governors to inventory approved degree programs in the State University System (SUS). The standardized CIP code allows for comparative data to be collected and analyzed at both the state and national level.
[2] http://nces.ed.gov/ipeds/cipcode/default.aspx?y=55

appropriately categorized when they are added to the State University System Academic Degree Program Inventory.

APPENDIX A: Proposed Programs of Strategic Emphasis for the State University System of Florida, Board of Governors 2025 Strategic Plan

About CIPs

The Classification of Instructional Programs (CIP) provides a taxonomic scheme that supports the accurate tracking and reporting of fields of study and program completions activity. CIP was originally developed by the U.S. Department of Education's National Center for Education Statistics (NCES) in 1980, with revisions occurring periodically since that time as new programs emerged and existing program curriculums evolved.

The CIP taxonomy is organized on three levels:

1. The two-digit series, representing the most general groupings of related educational programs (e.g., 14. Engineering)
2. The four-digit series, representing intermediate groupings of educational programs that have comparable content and objectives (e.g., 14.08 Civil Engineering)
3. The six-digit series, representing specific instructional programs with very similar content and objectives (e.g., 14.0803 Structural Engineering as a subset of Civil)

Postsecondary educational institutions use six-digit CIP codes when completing the IPEDS Completions Survey required for participation in federal financial aid programs. Six-digit codes are the most detailed program classifications within the CIP and represent the basic unit of analysis used by NCES and institutions in tracking and reporting program completions and fields of study data.

Source: NCES, *Integrated Postsecondary Education Data System* (IPEDS), online manual.[3]

Proposed Categories for Programs of Strategic Emphasis with Associated CIP

1. Critical Workforce – Education

The Education category is largely based upon the Florida State Board of Education list of critical teacher shortage areas which is published annually. This list can change from year to year but typically remains the same with only one or two additions/deletions. It is also important to consider the critical shortage list within the broader context of the workforce demand for teachers in all specialties, and, for this reason, all teacher education programs were included in the original targeted list associated with the SUS 2005-2013 strategic plan.

It is proposed that the updated program list include all of the programs related to teacher preparation and student counseling at the K-12 level. However, it is recommended that 13.0101 - Education, General be removed from the list as this program is overly broad, does not typically lead directly to teacher certification, and does not typically lead to employment as a K-12 teacher in an area of critical need per the Florida Department of Education.

[3] http://nces.ed.gov/ipeds/cipcode/default.aspx?y=55

The overall approach will allow for targeting academic programs at the 4-digit CIP code level and eliminate any need for annual updates to the category due to changes in the state board list or programmatic reorganizations at the universities.

EDUCATION CIP CODES:

- 13.0301 Curriculum and Instruction
- 13.10 Special Education and Teaching (all)
- 13.11 Student Counseling and Personnel Services (all)
- 13.12 Teacher Education and Professional Development, Specific Levels and Methods (all)
- 13.13 Teacher Education and Professional Development, Specific Subject Areas (all)
- 13.14 Teaching English or French as a Second or Foreign Language (all)

2. Critical Workforce - Healthcare

The Healthcare category is based primarily on workforce projections by the Florida Department of Economic Opportunity. These organizations have identified the healthcare professions that exist as critical shortage areas in Florida. Also, a shortage of nursing faculty is frequently cited as a critical need occupation because of the direct impact on registered nurse education programs.

There are several health-related technology and data management programs that have emerged in recent years as high-demand and high-wage occupations. Also, there is a consensus that Florida will need to expand its healthcare workforce in all related occupations as the population continues to grow and the state experiences a demographic transition as the Baby Boom Generation retires.

It is proposed that this category include all health-related degree programs (not just healthcare practitioners) under the 51 CIP Code along with selected programs that may exist under other two-digit CIP families.

HEALTHCARE CIP CODES:

- 51 Health Professions and Related Programs (all)
- 30.1101 Gerontology

3. Economic Development - Global Competitiveness

The Global Competitiveness category represents more of an over-arching concept found in the various reports reviewed rather than a specific industry or occupational area. Degree programs that assist in making the SUS globally competitive can be found throughout the system across many disciplines, especially within the sciences, engineering, and information technology programs. However, there are programs that directly support globalization

through program graduates and focused research. Some of these programs have an international focus, such as international affairs, international business, international construction, and international law. Area studies and foreign language programs that focus on critical trade partners or foreign competitors also fall under the broad umbrella of increasing globalization.

It is proposed that this category include only programs for which a strong case has been made for enhancing Florida's global competitiveness.

GLOBAL COMPETITIVENESS CIP CODES:

- 05.0103 Asian Studies/Civilization
- 05.0107 Latin American Studies
- 05.0134 Latin American and Caribbean Studies
- 05.0201 African-American/Black Studies
- 13.0701 International and Comparative Education
- 16.0101 Foreign Languages and Literatures, General
- 16.0102 Linguistics
- 16.0399 East Asian Languages, Literatures, and Linguistics, Other
- 16.0904 Portuguese Language and Literature
- 16.0905 Spanish Language and Literature
- 22.0210 International Business, Trade, and Tax Law
- 30.2001 International/Global Studies
- 45.0901 International Relations and Affairs
- 52.1101 International Business/Trade/Commerce
- 52.1502 International Real Estate - CIP assigned by BOG staff (does not exist in NCES)

4. Economic Development – STEM

STEM is a critical category in that it emphasizes the importance of science, technology, engineering, and mathematics programs to Florida's economy. Active STEM lists were researched to identify those that are used nationally to determine whether a program qualifies as STEM. Four such lists were selected as primary references to determine programs eligible to be added to the STEM PSE list, including those produced and published by the Florida Department of Economic Opportunity, the Department of Homeland Security, the National Science Foundation, and the Washington State Education Research and Data Center. Under this year's methodology, programs needed to appear on at least two of these four lists to be considered for addition to the STEM PSE list.

Many of the STEM academic programs can be targeted at the two-digit CIP level, and others can be targeted at the four- or six-digit level. However, there are STEM-related degrees at the four- and six-digit CIP level embedded in disciplines that are not generally associated with

science, technology, engineering, and math such as education and management. These have also been included in the list of STEM CIP codes.

STEM CIP CODES:

- 01.01 Agriculture, General
- 01.0308 Agroecology and Sustainable Agriculture
- 01.09 Animal Sciences
- 01.10 Food Science and Technology
- 01.11 Plant Sciences
- 01.12 Soil Sciences
- 01.9999 Agriculture, Agriculture Operations, and Related Sciences, Other
- 03 Natural Resources and Conservation (all)
- 04.0201 Architecture
- 04.0401 Environmental Design/Architecture
- 04.0601 Landscape Architecture
- 04.0902 Architectural and Building Sciences/Technology
- 04.0999 Architectural Sciences and Technology, Other
- 09.0702 Digital Communication and Media/Multimedia
- 11 Computer and Information Sciences and Support Services (all)
- 13.0501 Educational/Instructional Technology
- 14 Engineering (all)
- 15 Engineering Technologies and Engineering-Related Fields (all)
- 26 Biological and Biomedical Sciences (all)
- 27 Mathematics and Statistics (all)
- 29.0207 Cyber/Electronic Operations and Warfare
- 30.01 Biological and Physical Sciences
- 30.06 Systems Science and Theory
- 30.08 Mathematics and Computer Science

- 30.15 Science, Technology and Society
- 30.16 Accounting and Computer Science
- 30.17 Behavioral Sciences
- 30.18 Natural Sciences
- 30.19 Nutrition Sciences
- 30.25 Cognitive Science
- 30.27 Human Biology
- 30.30 Computational Science
- 30.31 Human Computer Interaction
- 30.32 Marine Sciences
- 30.33 Sustainability Studies
- 31.0505 Kinesiology and Exercise Science

- 40 Physical Sciences (all)
- 42.27 Research and Experimental Psychology
- 43.0106 Forensic Science and Technology
- 43.0111 Criminalistics and Criminal Science
- 43.0116 Cyber/Computer Forensics and Counterterrorism
- 43.0303 Critical Infrastructure Protection
- 45.0301 Archeology
- 45.0603 Econometrics and Quantitative Economics
- 45.0702 Geographic Information Science and Cartography
- 50.0102 Digital Media
- 52.0203 Logistics, Materials, and Supply Chain Management
- 52.1201 Management Information Systems, General
- 52.1301 Management Science
- 52.1302 Business Statistics
- 52.1304 Actuarial Science
- 52.1399 Management Sciences and Quantitative Methods, Other

5. Critical Workforce – Gap Analysis

Gap Analysis is a category that includes degree programs leading to the occupational categories projected to be critically under-supplied in the Board of Governors' analysis of labor market projections and related degree production. Consequently, the academic programs included in this category correspond to Florida's high-need, high-wage occupational areas identified through the gap analysis. A comprehensive methodology for conducting the gap analysis is available on the Board of Governors' website.

Institutions will still be expected to work with local industries and employers to identify academic programs needed to support local or regional economic development and workforce needs.

This category only includes academic programs identified in the gap analysis that are not included in another category of Programs of Strategic Emphasis (e.g., industrial engineering would be captured under STEM, so it is not necessary to include it under gap analysis).

GAP ANALYSIS CIP CODES:

- 04.1001 Real Estate Development
- 09.0101 Speech Communication and Rhetoric
- 09.0900 Public Relations, Advertising, and Applied Communication
- 09.0902 Public Relations/Image Management
- 09.0905 Health Communication
- 19.0203 Consumer Merchandising/Retailing Management

- 43.0117 Financial Forensics and Fraud Investigation
- 43.0121 Suspension and Debarment Investigation
- 45.0602 Applied Economics
- 50.0401 Design and Visual Communications, General
- 50.0402 Commercial and Advertising Art
- 50.0404 Industrial and Product Design
- 50.0409 Graphic Design
- 50.0411 Game and Interactive Media Design
- 50.0702 Fine/Studio Arts, General
- 50.0705 Drawing
- 50.0706 Intermedia/Multimedia
- 50.0708 Painting
- 52.0205 Operations Management and Supervision
- 52.0301 Accounting
- 52.0303 Auditing
- 52.0304 Accounting and Finance
- 52.0305 Accounting and Business/Management
- 52.0801 Finance, General
- 52.0804 Financial Planning and Services
- 52.0806 International Finance
- 52.0807 Investments and Securities
- 52.0808 Public Finance
- 52.0809 Credit Management
- 52.1001 Human Resources Management/Personnel Administration, General
- 52.1003 Organizational Behavior Studies
- 52.1401 Marketing/Marketing Management, General
- 52.1402 Marketing Research
- 52.1403 International Marketing
- 52.1501 Real Estate
- 52.1601 Taxation
- 52.1701 Insurance

The 2019 Gap Analysis: Explanation of Method

July 2019 (DRAFT)

As in the previous iteration of the gap analysis undertaken in 2013, supply was represented by the number of baccalaureate degrees awarded by Florida postsecondary institutions in 2017 as reported to the National Center for Educational Statistics' Integrated Postsecondary Educational Data System (IPEDS).[1] All educational institutions receiving Title IV Financial Aid (approximately 400 in Florida) are required to report these data to IPEDS, assigning a Classification of Instructional Programs (CIP) code to each educational program.

Demand was based on the Florida Department of Economic Opportunity's 2018-2026 Employment Projections.[2] Florida's Bureau of Workforce Statistics and Economic Research (WSER) produces these 8-year employment projections annually for all industries and occupations. The data used to create these projections are the Quarterly Census of Employment and Wages (QCEW), the Occupational Employment Statistics (OES), and the Current Population Survey (CPS). The projections are based on the separations methodology, which is a change from the previous replacement method. The new separations method considers transfers and exits rather than just replacement openings, which results in a more accurate picture of the workforce, generally reflecting a much higher number of job openings. The separations method better reflects the workforce by differentiating between those who are leaving the labor force entirely and those who are permanently leaving an occupation to enter a new field.

The separations method:[3]

- is regression-based and statistically more robust than the prior method;
- incorporates demographic variables in its model and other longitudinal data from the CPS monthly surveys; and
- more accurately accounts for future occupational change by incorporating employment projections data, also from OES; and can quickly adjust to new occupations added to the classification system and more accurately estimate occupations with small employment levels.

Each occupation is assigned a Standard Occupational Classification (SOC) code[4] and an educational attainment level by the U.S. Department of Labor, Bureau of Labor Statistics (BLS).[5] The BLS taxonomy classifies occupations by the typical level of skills needed to enter an occupation. However, Florida's Workforce Estimating Conference has traditionally used a modified version of educational codes as determined by the

[1] https://nces.ed.gov/ipeds/

[4] https://www.bls.gov/soc/
[5] https://www.bls.gov/

Florida Department of Education (FLDOE). The FLDOE codes consider the minimum level of skills needed to enter an occupation. As per the 2013 analysis, this analysis uses the BLS taxonomy rather than the FLDOE coding. The BLS designation is used to determine the gap between supply and demand for workers at the bachelor's degree level in Florida because it provides the most accurate depiction of the actual educational level that workers should complete to meet job requirements.

For the 2019 gap analysis, a national CIP-SOC crosswalk[6] built by the BLS and the U.S. Department of Education's National Center for Education Statistics (NCES) was used as a basis for linking occupations (the SOC code) with their correlated educational programs (the CIP code). When warranted, supplemental CIP to SOC linkages were applied if the BLS crosswalk was deemed incomplete. Unfortunately, there is often not a one-to-one correspondence between CIP and SOC codes because a given educational program can often lead to multiple occupations, and many different educational programs can often supply a given occupation. It is important to note that the educational attainment level was maintained when matching occupations and degree programs so that only the baccalaureate-level program completers were matched to occupations classified at the bachelor's level.

In an effort to limit the problem of occupations linked to multiple academic disciplines and potentially overstating supply, the two following strategies were used.

- Managerial occupations (SOC codes beginning with '11') were excluded from the analysis because they require certain levels of experience beyond a degree, and managerial occupations had the highest number of links to academic disciplines.

- Supply data was adjusted to acknowledge that graduates typically have more than one choice of occupation after graduating. After the initial SOC-to-CIP match to derive the total number of recent graduates qualified for a particular 'target' occupation, it is imperative to also look from CIP-to-SOC to get a sense of all the occupations competing for those graduates. Thus, the adjusted supply was derived by multiplying the total supply of graduates linked to a target occupation by the target occupation's percentage of projected total openings for all the occupations (excluding managers) linked with the disciplines associated with the target occupation.

    - For example, the Financial Analyst occupation has 1,235 projected annual openings that are potentially supplied by the 3,378 graduates annually earning bachelor's degrees from seven academic disciplines: Financial Mathematics, Accounting and Finance, Accounting and Business/Management, General Finance, International Finance, Investments

[6] https://nces.ed.gov/ipeds/cipcode/resources.aspx?y=55

and Securities, and Public Finance (the SOC-to-CIP analysis). At first glance, it appears that there is a substantial oversupply of graduates qualified for the financial analyst openings. However, if one considers the other perspective (the CIP-to-SOC analysis), one also sees that these graduates are qualified for multiple occupations with a combined 18,678 annual openings. (Also note that, as explained above, managerial occupations were excluded from the gap analysis because these occupations also generally require experience.) Therefore, the openings for financial analysts comprised only 6.6% of all the jobs available to these graduates (1,235 financial analyst openings divided by 18,678 total openings). Therefore, only 6.6% of the initial supply of 3,378 graduates is used in the gap analysis, resulting in an annual adjusted supply of 223.

Once the supply and demand data were calculated for each occupation, the 84 occupations that showed any supply gap (where supply was less than the projected annual demand) were sorted. Next, three occupations were removed from consideration because there were no related CIP codes, indicating systemic classification error.[7] From the remaining list of occupations, a 100-opening threshold was used as an analytical safety net to account for methodological uncertainties (e.g., CIP-SOC mismatches and the vagaries of projecting long-term occupational demand). Additionally, certain SOC and CIP codes were excluded including those not related to the system mission and those ending in 99, which is used to designate a catch-all category and does not imply a strong educational program to occupation relationship.

The final phase of the analysis focused on targeting those academic programs with the highest gap, growth, and wage. The need for additional graduates in these occupations was further confirmed by examining and applying certain contextual metrics, including annual projected demand growth rates and average median wage rates. Staff reviewed the initial gap analysis results, which identified over 140 potential programs, and determined additional criteria that refined the number of programs with the goal of focusing the list on high-demand, high-growth, and high-wage occupations. The additional criteria developed were to include only occupations that have a projected growth rate that is equal to or higher than the statewide average growth rate for all jobs of 10.1% and a median salary of at least $45,000 dollars per year. It is important to note that certain occupations fell outside the scope of the analysis because they are educationally coded either above the baccalaureate level (e.g., physicians) or below the baccalaureate level (e.g., technicians).

[7] The three occupations were Compliance Officers [13-1041]; Fundraisers [13-1131]; and Business Operations Specialists, All Other [13-1199].

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Strategic Planning Committee
August 28, 2019

SUBJECT: Florida Polytechnic University's 2019 Accountability Plan

PROPOSED COMMITTEE ACTION

Consider approval of Florida Polytechnic University's 2019 Accountability Plan

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation 2.002

BACKGROUND INFORMATION

Board of Governors Regulation 2.002 requires the development of an institutional accountability plan intended to reflect each institution's distinctive mission and to focus on core strengths within the context of State University System goals as well as regional and statewide needs. The accountability plans outline each institution's strategic direction and top priorities as well as performance expectations and outcomes on institutional and system-wide goals.

At its June 11-12, 2019 meeting, the Strategic Planning Committee deferred taking action on Florida Polytechnic University's 2019 Accountability Plan, requesting that the University return in August 2019 with a revised plan. Florida Polytechnic has submitted a revised plan for consideration to approve. If approved by the Strategic Planning Committee, the plan will be forwarded to the full Board for consideration.

Dr. Randy Avent, President of Florida Polytechnic University, will present the revised accountability plan.

Supporting Documentation Included:	Revised Florida Polytechnic University 2019 Accountability Plan
Facilitators/Presenters:	Dr. Randy Avent

2019 Accountability Plan

FLORIDA POLYTECHNIC UNIVERSITY

REVISED PLAN – APPROVED BY THE UBOT

8/12/2019

STATE UNIVERSITY SYSTEM *of* FLORIDA

Board of Governors

BOT Approved
8/12/19

INTRODUCTION

This is a new report that combines the previous Annual Accountability Report and University Work Plans into a single document more closely aligned with the Board of Governors' 2025 System Strategic Plan.

This revised document will enhance the System's commitment to accountability and strategic planning by enabling comparisons between past goals and actual data to better assess performance, helping to foster greater coordination between institutional administrators, University Boards of Trustees, and the Board of Governors.

Once an Accountability Plan is approved by each institution's respective Boards of Trustees, the Board of Governors will review and consider the plan for approval, excluding those sections of the Plan that require additional regulatory or procedural approval pursuant to law or Board regulations.

MISSION STATEMENT

"Serve students and industry through excellence in education, discovery and application of engineering and applied sciences."

STATEMENT OF STRATEGY

Given your mission, strengths and available resources, provide a brief description of your market and your strategy for addressing and leading it.

Florida Poly strives to be the premier, core STEM public institution in the southeast region of the United States. Our strategy of increasing selectivity supports the University's model of delivering small classes with strong student-faculty interaction engaged in project-enhanced, curricular experiences. Coupled with a carefully engineered curricular and co-curricular focus on professional and leadership skills, the University offers industry-aligned majors in fast-growing, high-paying sectors. Florida Poly's priority on strong relationships with local and regional industry serves to fulfill its directive to enhance economic development in the state. A key component of this is the University's focus on connecting students with small and medium-sized business through internships, projects, and eventual employment. These efforts form key goals in Florida Poly's new strategic plan that calls for stronger efforts to grow the University's program portfolio and student experience initiatives to meet its goals of delivering programs in high-paying industries and maximizing value for students by preparing them for a lifetime of success.

The University's plan also calls for capitalizing on our strategic location on the I-4 corridor by creating a high-tech economy around Florida Poly. This effort includes a strong faculty recruiting initiative that deepens our growing basic and applied research footprint catalyzed by the Applied Research Center. By connecting with local stakeholders, our relationship with SunTrax, and the Advanced Mobility Institute, the plan calls for building out the campus and surrounding area with space for high-tech business and industry, a convention center, and a full service living community.

STRENGTHS, OPPORTUNITIES AND CHALLENGES *(within 3 years)*

What are your major capabilities, opportunities and challenges for improvement?

Florida Polytechnic University's greatest strengths are:

- Its dedicated focus on the core STEM subjects offering a high-touch model with smaller classes.
- Its strategic location in Lakeland which provides close proximity (within 40 miles) to more than 11,000 high-tech firms with our commitment to build jobs for Florida.
- Its agility; limited traditional bureaucracies which allows for a culture of innovation and responsiveness.
- Strong academic experience in both industry and higher education with a start-up culture nimble enough to test and evaluate new strategies.
- Positioned as the sole STEM Public campus with a population less than 5000 students in the southeast offering a project-enhanced curriculum. Strong relationships with Small and Medium Businesses (SMBs) in Florida.

Opportunities for Improvement include:

- Enrollment: The university must continue to grow. New staffing and improved operations in admissions enable us to target top candidates in Florida and keep them in the state; adding three new degree programs in fall 2019 provides students and the state with more STEM-focused educational opportunities; increased emphasis on attracting transfer students including a recent agreement with Polk State College (with a new 2+2 agreement); and a pending favorable ABET decision demonstrates the quality of our academics.
- Academic Progress Rate: Several efforts are underway to improve this rate, including changes in institutional aid and course withdrawal policies; better training for Success Coaches, increased academic support for high DFW and gateway courses.
- Time to Degree: Efforts include a partnership with Complete College America's 15 to Finish to drive toward a culture of completion and incentivized summer pathways are just a few of the initiatives underway.
- Degrees Awarded: Our mission culminates and graduating highly skilled technology leaders. All of our initiatives—emphasis on enrollment, increased transfer agreements, industry-relevant curriculum, and more—drive towards growth in degrees awarded and economic impact.

Summary: Addressing the Challenges

Aggressively addressing these challenges and taking advantage of opportunities will position Florida Poly to achieve five years goals which are: a campus population of 2000 students, a four year graduation rate of 43% (and continuing to build to a 50% rate), an APR in the high 80s, and annual degree production that approaches 400.

KEY INITIATIVES & INVESTMENTS *(within 3 years)*

Describe your top three key initiatives for the next three years that will drive improvement in Academic Quality, Operational Efficiency, and Return on Investment.

1. Growing Undergraduate Enrollment
   As the University enters its next phase (post SACSCOC and ABET accreditations) the focus will be on growing undergraduate enrollment over the next three years. Areas of intended growth include:
   a. FTICs: The market for students interested and qualified to pursue core-STEM degrees in Florida suffers significant losses to out-of-state competition. Targeted recruitment and relationship building with careful financial packaging will enable Poly (and Florida) to keep this talent in-state.
   b. Transfer Students: new agreements in place with more planned; stronger transfer-welcoming presence on University via web (catalog) and on-campus mechanisms to facilitate credit evaluation and degree program advising.
   c. Growing Program Portfolio: For fall 2019, we've added three new programs. With careful planning and market-research, we intend to grow our portfolio of programs to meet industry demands and provide greater options to attract Florida's talented students that become highly effective graduates.

2. Graduate Program Enhancements
   Building on our recently formed Graduate Division, we have focused the tracks in our graduate degree programs to clarify program foci in a manner that is attractive and communicates to both prospective students and employers. These restructured programs derive from our undergraduate portfolio and include a professional-oriented engineering management track. Through stronger program coherence and better recruitment messaging we can grow both our Master's in Engineering and Master's in Computer Science in appropriately selective ways, while supporting the faculty's growing research agendas.

3. Growing Research Productivity
   The University plans to grow its research volume and over the last half-year has submitted multiple NSF-grants and earned one in the range of $600,000 in collaboration with USF. In addition, several actions are underway to further research growth:
   a. Increased proposals to foundations;
   b. Maintain a purposely low overhead rate to remain cost competitive;
   c. Targeted hiring (already underway) of faculty who bring extramural funding or show strong propensity for doing so. In the next year, we will focus strongly on building our environmental engineering faculty, where funding portfolios will be a strong consideration.

Graduation Rate Improvement Plan

This narrative subcomponent is in response to the "Florida Excellence in Higher Education Act of 2018" that revised section 1001.706(5), Florida Statutes, to require each university board of trustees to submit a comprehensive proposal to improve undergraduate four-year graduation rates to the Board of Governors for implementation beginning in the fall of 2018 academic semester.

1. Provide a brief update on the academic, financial, financial aid and curricular actions that your institution has implemented to encourage graduation in four years.

Academic

1. Priority advising and registration of all new students began in fall 2018 to ensure they start on the correct path for degree completion. The Academic Success Center closely advises each student on his or her best pathway to graduation.
2. Faculty mentors connect students to career goals. Common exams and syllabus to ensure all sections of critical courses prepare students at a consistent and rigorous standard.
3. "Gateway" courses are provided off-cycle to allow students a chance to recover from class withdrawals and failures. The delivery of summer courses are arranged to provide a pathway to "catch-up" for students getting off track. This includes the development of 3-year course rotations.
4. Implemented Schedule Wizard in spring 2019 to make it possible for students to have access to every possible iteration of a class schedule in seconds – making it easier for students to register. This also optimizes the available course offerings.
5. Academic Affairs Support Services group identifies and recommends major and minor initiatives and actions for implementation, monitors their progress and reports results/findings, identifies gaps and integrates processes into the university's ongoing continuous efforts to increase retention and graduation rates.

Curricular

6. Common Freshman Year (CFY): for nearly all majors the freshman year of required courses is the same, creating peer cohorts and providing students time to acclimate to our rigorous STEM curriculum without having the burden of potential lost credit if they change majors.
7. Continue to develop and implement policies and practices to ensure timely feedback to students and early-alert systems.

Financial Aid

8. Continue to develop aid packages to incentivize students to limit work during the school year to 20 hours or less.
9. Proactive Financial Aid Literacy Counseling in place to support students' self-assessment and options for resolving unmet need.
10. Active counseling of students to use the Florida Student Assistance Grant (FSAG).

Key Achievements for Last Year (2017 –2018)

STUDENT ACHIEVEMENTS

1. Florida Poly student receives one of 41 global Brook Owens Fellowships for internship at nation's leading aviation company.
2. Three students place 3rd in the 2018 Governor's Cup competition. Florida Poly is the only state university to place in top three for two consecutive years.
3. Statewide competition for entrepreneurship awarded two Florida Poly students for their work on a smart catheter device to diagnose infections and digital listing tool for jewelry.
4. The 2018 Slingshot Polk awarded 1st and 2nd place to five students for their work on sinkhole detection with drones and using music to improve mental health.
5. Student develops components of an astronaut suit that helps to combat depression.

FACULTY ACHIEVEMENTS

1. NSF grant awarded to Drs. Luis Jaimes and Ilhan Akbas for Cyber-Physical systems in crowd sensing.
2. Dr. Dr. Suleiman Alsweiss (Electrical Engineering) assisted in forecasting Hurricane Harvey's devastating path through South Texas as a scientist at the Center for Satellite Applications and Research.
3. Dr. Karim Elish, (Computer Science) awarded a $70,500 grant from the Florida Center for Cybersecurity to develop an evolving course on mobile security and privacy.

PROGRAM ACHIEVEMENTS

1. On the strength of four engineering program readiness reviews (fall 2017), we submitted ABET requests for evaluation (RFEs) in January 2018 and were granted permission to enter the evaluation process. This followed with self-study submissions in July 2018 and site visits occurring in October 2018. Currently, we are in due process with a final decision to be made in August 2019. SACSCOC accreditation, achieved in June 2017, is a prerequisite for ABET to consider our institution. To move from SACSCOC and enter the ABET process in the span three months represents a significant achievement in terms of curriculum and process changes on the part of program leadership and faculty..
2. 84% of our graduates are employed or continuing their education (based on self-reported data.
3. Fulbright relationships developed with Canada and Belgium

INSTITUTIONAL ACHIEVEMENTS

1. Completed and opened the Student Development Center.
2. Continued collaboration with Florida Department of Transportation in the development of SunTrax.
3. Hosted the I-4 Commercial Corridor Conference with a focus on the multimillion dollar market flowing through Central Florida. Keynote by Senator Nelson who linked ongoing student and faculty research at the University with an urgent need for a highly trained U.S. workforce.

2019 ACCOUNTABILITY PLAN FLORIDA POLYTECHNIC UNIVERSITY

BOT Approved
8/12/19

PERFORMANCE BASED FUNDING METRICS

FLORIDA POLYTECHNIC UNIVERSITY IS NOT YET INCLUDED IN PERFORMANCE FUNDING

1. Percent of Bachelor's Graduates Enrolled or Employed ($25,000+)

	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21
ACTUAL	.	.	.	.	.	.	.	.	.
APPROVED GOALS	.	.	.	.	72.8	72.8	72.8	72.8	.
PROPOSED GOALS	.	.	.	.	.	*72.8*	*72.8*	*75*	*78*

2. Median Wages of Bachelor's Graduates Employed Full-time

	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21
ACTUAL	.	.	.	.	.	.	.	.	.
APPROVED GOALS	.	.	.	.	40,700	40,700	40,700	40,700	.
PROPOSED GOALS	.	.	.	.	.	*40,700*	*40,700*	*50,000*	*51,500*

3. Average Cost to the Student [Net Tuition & Fees per 120 Credit Hours for Resident Undergraduates]

	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
ACTUAL	.	.	.	.	.	.	.	.	.
APPROVED GOALS	.	.	.	.	12,000	12,000	11,500	11,500	.
PROPOSED GOALS	.	.	.	.	.	*12,000*	*11,500*	*11,500*	*9,000*

4. FTIC Four-Year Graduation Rate

	2010-14	2011-15	2012-16	2013-17	2014-18	2015-19	2016-20	2017-21	2018-22
ACTUAL	.	.	.	.	36.6	.	.	.	.
APPROVED GOALS	.	.	.	.	37	37	34	38	.
PROPOSED GOALS	.	.	.	.	.	*37*	*37*	*39*	*41*

Note: Our first FTIC cohort (2014-18) had no proceeding students. Initial projections include higher than expected course withdrawals and limited course availability which are being addressed to improve this rate. Early projections show that we will have difficulty achieving the proposed goals, particularly in the next two cycles, but we are aggressively working the problem to reach them moving forward.

5. Academic Progress Rate [Second Year Retention Rate with At Least a 2.0 GPA]

	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
ACTUAL	.	73.0	76.8	65.1	71.7	.	.	.	.
APPROVED GOALS	.	.	74	75	75	76	77	79	.
PROPOSED GOALS	.	.	.	.	.	*76*	*77*	*80*	*83*

Note: For 2019, the retention to progression gap has dropped to its lowest level (3%) indicating the University is retaining the students who are succeeding (GPA>2.0). We will miss the goal for 2018-2019; however, we have engaged in several internal studies that have provided insight into campus issues we are now proactively addressing with multiple initiatives that forecast expected retention improvements.

Note: Metrics are defined in appendix. For more information about the PBF model visit: http://www.flbog.edu/about/budget/performance_funding.php.

6. Percentage of Bachelor's Degrees Awarded within Programs of Strategic Emphasis

	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
ACTUAL	.	.	.	100	100	.	.	.	.
APPROVED GOALS	.	.	.	100	100	100	100	100	.
PROPOSED GOALS	.	.	.	.	.	*100*	*100*	*100*	*100*

7. University Access Rate [Percent of Undergraduates with a Pell grant]

	FALL 2013	FALL 2014	FALL 2015	FALL 2016	FALL 2017	FALL 2018	FALL 2019	FALL 2020	FALL 2021
ACTUAL	.	.	.	.	30.3	.	.	.	.
APPROVED GOALS	.	.	.	.	15	28	29	29	.
PROPOSED GOALS	.	.	.	.	.	*28*	*29*	*29*	*29*

Note: Florida Polytech students were eligible to start receiving Pell grants from the US Dept. of Ed. in Fall 2017

8. Percentage of Graduate Degrees Awarded within Programs of Strategic Emphasis

	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
ACTUAL	.	.	.	100	100	.	.	.	.
APPROVED GOALS	.	.	.	100	100	100	100	100	.
PROPOSED GOALS	.	.	.	.	.	*100*	*100*	*100*	*100*

9. BOG Choice: Percent of Baccalaureate Degrees Awarded Without Excess Hours

	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
ACTUAL	.	.	.	*	96.3	.	.	.	.
APPROVED GOALS	.	.	.	.	68	70	70	80	.
PROPOSED GOALS	.	.	.	.	.	*70*	*70*	*80*	*80*

Note*: There were too few (less than twenty) graduates in the 2016-17 graduating class to report.

Note: This is a transition year for the BOT Choice metric (#10), so we are reporting data for both the current and future metrics. Metrics are defined in appendix. For more information about the PBF model visit: http://www.flbog.edu/about/budget/performance_funding.php

2019 ACCOUNTABILITY PLAN — FLORIDA POLYTECHNIC UNIVERSITY

BOT Approved 8/12/19

KEY PERFORMANCE INDICATORS

Teaching & Learning Metrics (from the 2025 System Strategic Plan that are not included in the PBF section)

Public University National Ranking [Number of Top50 Rankings based on BOG's official list of publications]

	2015	2016	2017	2018	2019	2020	2021	2022	2023
ACTUAL	.	.	.	0	0	.	.	.	.
APPROVED GOALS	.	.	.	0	0	0	0	0	.
PROPOSED GOALS	.	.	.	.	.	*0*	*0*	*0*	*0*

Note: The University has submitted its first survey for inclusion in US News and World Report's Rankings.

Freshmen in Top 10% of High School Class

	Fall 2014	Fall 2015	Fall 2016	Fall 2017	Fall 2018	Fall 2019	Fall 2020	Fall 2021	Fall 2022
ACTUAL	21	17	14	22	25	.	.	.	.
APPROVED GOALS	.	.	35	17	18	18	21	22	.
PROPOSED GOALS	.	.	.	.	.	*22*	*22*	*23*	*23*

Time to Degree for FTICs in 120hr programs

	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
ACTUAL	.	.	.	*	3.6	.	.	.	.
APPROVED GOALS	.	.	.	.	.	5.5	5.25	5.0	.
PROPOSED GOALS	.	.	.	.	.	*4.7*	*4.7*	*4.6*	*4.5*

Note: The 2017-18 rate was somewhat artificial as no students entered prior to our initial 2014 cohort and therefore any graduates would, at most, have finished in four years. Initial projections were conducted with limited data and unknown variables. After a deeper analysis of the variables at play and an improved knowledge of our FTIC progression rates, we are now able to adjust our projections and proposed goals

Six-Year FTIC Graduation Rates [full-time and part-time students]

	2008-14	2009-15	2010-16	2011-17	2012-18	2013-19	2014-20	2015-21	2016-22
ACTUAL	.	.	.	.	.	.	.	.	.
APPROVED GOALS	.	.	.	.	.	.	62	64	.
PROPOSED GOALS	.	.	.	.	.	.	*47*	*54*	*54*

Note: Proposed goals reflect more accurate predictions than were possible in the first three years of the University's operations. Initial projections were not based on any historical data and therefore are unreliable.

Bachelor's Degrees Awarded [First Majors Only]

	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
ACTUAL	.	.	.	18	197	.	.	.	.
APPROVED GOALS	.	.	.	13	160	310	370	370	.
PROPOSED GOALS	.	.	.	.	.	*250*	*320*	*320*	*330*

Note: A detailed examination of FTIC and transfers who are on sequence across student levels provides us with a more accurate picture of likely degrees awarded. These numbers, while not as strong as approved goals, are better than the originally proposed goals. We are optimistic that our solutions will result in a greater number of degrees awarded, although a major part of our efforts will take some time to show results

Notes: This table reports the number of students enrolled at the university by student type categories. The student type for undergraduates is based on the Type of Student at Time of Most Recent Admission. The student type for graduates is based on the degree that is sought and the student CIP code. Does not include 'Unclassified' students who are not formally admitted into a degree program but are enrolled (e.g., dual enrolled high school students).

Percent of Baccalaureate-Seeking, Resident Undergraduates Who Earned 15+ Credit Hours

(Fall terms only)

	2014	2015	2016	2017	2018	2019	2020	2021	2022
ACTUAL	30	30	33	35	27	.	.	.	.
APPROVED GOALS	.	.	.	.	.	.	.	.	.
PROPOSED GOALS	.	.	.	.	.	*34*	*40*	*42*	*44*

Note: Analysis indicates seniors often take fewer than 15 (often 12) credits needed for graduation. Transfer students also require pre-requisite courses prior to being on track for a fall load. Another factor is students who are not progressing academically (DFW in key gateway courses) impairs their ability to progress with 15 credit load. Solutions to support improvements in Time-to-Degree and Academic Progress Rate also address this metric.

Note: Full-time Equivalent (FTE) student is a measure of all instructional activity (regardless of fundability) that is based on the number of credit hours that degree-seeking students enroll. FTE is based on the standard national definition, which divides undergraduate credit hours by 30 and graduate credit hours by 24. Pursuant to section 1013.31, Florida Statutes, Board facilities staff use this data as a key factor in the calculation of facility space needs for university educational plant surveys.

Classroom (0-50%)	.	100	100	100	100	100	100	100	100	100

Note: Distance Learning is a course in which at least 80 percent of the direct instruction of the course is delivered using some form of technology when the student and instructor are separated by time or space, or both (per 1009.24(17), F.S.). Classroom/Traditional, is a course in which less than 50% of the direct instruction of the course is delivered using some form of technology when the student and instructor are separated by time, space or both. This designation can include activities that do not occur in a classroom (ie, labs, internships, practica, clinicals, labs, etc) – see SUDS data element #2052.

ACADEMIC PROGRAM COORDINATION

New Programs For Consideration by University in AY 2019-20

The S.U.S. Council of Academic Vice Presidents (CAVP) Academic Program Coordination Work Group will review these programs as part of their on-going coordination efforts. The programs listed below are based on the 2018 Accountability Plan list for programs under consideration for 2019-20.

PROGRAM TITLES	CIP CODE 6-digit	AREA OF STRATEGIC EMPHASIS	OTHER UNIVERSITIES WITH SAME PROGRAM	OFFERED VIA DISTANCE LEARNING IN SYSTEM	PROJECTED ENROLLMENT *in 5th year*	PROPOSED DATE OF SUBMISSION TO UBOT
BACHELOR'S PROGRAMS						
Cyber Physical Security	29.0	No	No	No	100	2020

Florida Polytechnic University will investigate and develop a new set of Bachelor programs to sufficiently sustain the institution within our STEM-focused mission. Sample degrees that may be considered are; Civil Engineering, Biomedical Engineering, Chemical Engineering, and Statistics. These degrees, or other similar degrees, will be fully considered in terms of market need and the resources required in delivering the degrees.

MASTER'S, SPECIALIST AND OTHER ADVANCED MASTER'S PROGRAMS						
Business Analytics	52.0203	Yes	Majors: USF & FSU. Tracks or concentrations: UCF, FIU & FAU	No	40	2020
DOCTORAL PROGRAMS						

New Programs For Consideration by University in 2020-22

These programs will be used in the 2020 Accountability Plan list for programs under consideration for 2020-21.

PROGRAM TITLES	CIP CODE 6-digit	AREA OF STRATEGIC EMPHASIS	OTHER UNIVERSITIES WITH SAME PROGRAM	OFFERED VIA DISTANCE LEARNING IN SYSTEM	PROJECTED ENROLLMENT *in 5th year*	PROPOSED DATE OF SUBMISSION TO UBOT
BACHELOR'S PROGRAMS						

As Florida Polytechnic University continues to build upon a mission that is STEM-focused, additional Bachelor programs will be investigated and developed. These degrees will fully consider the market needs, the resources required in delivering the degrees, and be compatible with the System's Strategic Plan.

MASTER'S, SPECIALIST AND OTHER ADVANCED MASTER'S PROGRAMS						

Additional Master's programs will be investigated and developed to sustain Florida Poly's STEM-focused mission. Like the bachelor programs, the master's programs will consider the best fit within the System to meet market needs and the resources required in delivering these degrees.

DOCTORAL PROGRAMS						

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Strategic Planning Committee
August 28, 2019

SUBJECT: Florida Agricultural and Mechanical University's Financial Aid Plan

PROPOSED COMMITTEE ACTION

For information

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

At its June 11-12, 2019 meeting, the Strategic Planning Committee considered approval of Florida Agricultural and Mechanical University's (FAMU) 2019 Accountability Plan. Committee members expressed concern at the high level of debt among FAMU students. FAMU was asked to return in August 2019 to present the Committee with a plan for reducing student debt.

2019

FLORIDA AGRICULTURAL AND MECHANICAL UNIVERSITY

STUDENT DEBT REDUCTION PLAN

SEPTEMBER 2019

Florida Agricultural and Mechanical University
Student Debt Reduction Plan
2019

Florida Agricultural and Mechanical University continues to review best practice strategies, to add to those already in place, to increase student success and decrease student debt. In 2012, FAMU began its Student Debt Reduction Initiative, which was presented and approved by the Board of Governors in November 2012. This initiative provided the University's action plan to enhance retention, progression, graduation rates and reduce student indebtedness and cohort default rate. Since then, FAMU remains committed to student academic success by improving academic progression, performance and graduation rates. The University has made significant improvement in key areas of focus illustrated in Table 1 below:

Table 1. FAMU Student Academic Progression

39% (2008-14)	Six-Year Graduation Rate	50% (2012-18)
18.3% (2010-14)	Four-Year Graduation Rate	22.8% (2014-18)
5.3 (2013-14)	Time to Degree	4.9 (2017-18)
18.3% (2009)	Three-Year Cohort Default Rate	9.5% (2015)

Sources: Integrated Postsecondary Education Data System (IPEDS), 2019 Accountability Plan, Department of Education

In 2017, Florida A&M University (FAMU) adopted its 2017-2022 Strategic Plan, "FAMU Rising." In the strategic plan, FAMU identified six Strategic Priorities that provide a roadmap to focus on the essential elements that will contribute to student success. Consistent with Strategic Priority 1 – Exceptional Student Experience, FAMU remains committed to student academic success by improving academic progression, performance and graduation rates through initiatives to enhance academic support services, strengthen our academic degree programs, enhancing our living-learning environment, and promoting innovative co-curricular activities. Goal 2 of the plan focuses on achieving national distinction for success in retention and graduation rates. Strategies include:

- **Intensifying student success initiatives** to improve retention and persistence that include:
  - Enhancing academic advising training and resources
  - Expanding academic support services
  - Increasing the use of predictive analytics
  - Enhancing early alert retention mechanisms for at-risk students
  - Expanding the Living-Learning Communities
- Increase faculty use of pedagogical best practices in undergraduate and graduate programs

- Promote **financial wellness education to minimize student debt** and improve financial health.

As evidenced in the strategic plan, FAMU's top priority remains to increase student retention and graduation rates, thus having a direct impact on our student indebtedness.

Profile of FAMU Students

In fall 2018, the University had 8,137 undergraduates with 64% being Pell Grant eligible. Fifty-nine percent (59%) of these students received the maximum amount of $6,095 and 41% received from $642 to $6,042. The average loan for bachelor's graduates' is $30,126 for students graduating in 2017-18. Table 2 below provides the Estimated Family Income for students receiving financial aid in 2017-18.

Table 2. Estimated Family Income

Income Range	Headcount	Percent
Below $30,000	3,740	49.5%
$30,000-$48,000	1,425	18.9%
$48,001-$60,000	565	7.5%
$60,001-$75,000	443	5.9%
$75,001-$100,000	508	6.7%
$100,001+	871	11.5%
TOTAL	**7,552**	100%

Source: Office of Institutional Research

Table 3 below provides the average cost for a Florida resident attending FAMU:

Table 3. Average Annual Cost per Florida Resident

Tuition and Fees (per 30 hours)	Room and Board	Books and Supplies	Other Required Fees	Total
$5,645	$10,038	$1,138	$140	$16,961

Source: Office of Institutional Research (Does not include Health Insurance)

Table 4 below provides the average student financial need and average student unmet need after need based aid have been awarded to resident students. Some students do not receive the federal Pell grant which increase the unmet need.

Table 4. Student Need and Unmet Need

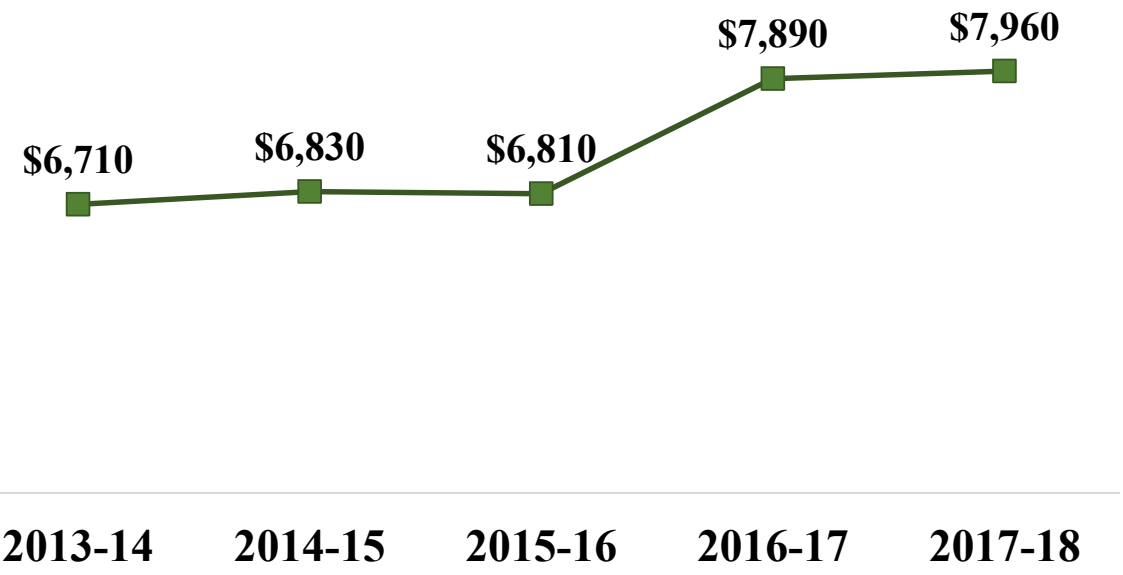
Average Need	Average Unmet Need
$17,167	$10,228

Source: Office of Institutional Research

Based on the 2013 Debt Reduction Plan, the initiatives implemented were based on proven best practices emerging from a growing body of research at the national level. Similarly, initiatives to

decrease student debt are based on proven best practices at institutions that have won awards for debt reduction. Today, FAMU has several of these initiatives/interventions that are ongoing such as provided in Table 5 below:

Table 5. Previous Interventions to Increase Student Success and Reduce Student Debt



Issue	Interventions
Retention and Graduation – Increasing student progression and timely graduation	• Reduction in profile admits (Board of Trustees directive) • Intrusive advisement and counseling • Enhancement of the First-year Experience Program • Enhanced tutorial services • Faculty Development • Peer Mentoring Program • Career Development Initiatives

Debt Reduction – Increase of financial aid awards to need-based students and financial literacy to students.	• Debt Management/Financial Literacy Program
	  ○ Hiring of Debt Counselors
	  ○ Offering mandatory debt management workshops
	  ○ Establishing interventions to decrease student debt
	  ○ Reinforcing importance of financial management in the First Year Experience (FYE) course;
	  ○ Conducting face-to-face exit counseling for graduating seniors
	  ○ Educating students and parents of loan repayment policies to decrease student loan default rate.
	• Use of Tuition and Differential Fees for need-based students (30%).

The Concern

The University has made significant improvements in regard to its focus and efforts to address student debt, however, additional attention must be given to the annual average loans for resident/dependent undergraduates. In Figure 1 below, the trend is provided from 2013-14 to 2017-18 depicts an 18.6% increase.

Figure 1. Annual Average Loans for Resident/Dependent Undergraduates

FAMU Focus in 2019 and Beyond

FAMU has developed a three-pillar approach to guide the strategies for decreasing student debt and increasing student success. The three pillars are:

- Pillar One: Financial Aid Budgeting and Packaging;
- Pillar Two: Education and Training, and
- Pillar Three: Student Success

Pillar One: Financial Aid Budgeting and Packaging

To address the issue of student debt, FAMU packages student financial aid awards based on grant, institutional scholarships, private scholarships, and eligibility for loans. The Pell grant program is the foundation of our packaging policy. We frame our awards based on whether the student is eligible for the Federal Pell Grant. The other determinant is whether the student applies for financial aid by the January 1 priority date. Therefore, we have several categories we have to account for in our packaging strategies: in-state and out-of-state, on-time, late, undergraduate, graduate, and professional.

Student financial aid and scholarships are very important to all students and specifically to FAMU students who are first generation and/or economically disadvantaged. Within our student population, 64% are Pell eligible and have an average family income of approximately $45,000

annually. With increasing cost to educational expenses, we began in 2012 looking at financial aid packaging and how to positively impact students by strategically packaging students, including awarding institutional funds to close the financial gap students may experience and decrease student debt. During the 2018-19 academic year, FAMU reviewed student files and replaced student loans with institutional aid to decrease student debt with funds recognized at the end of the spring term. It is allowable to replace loan funds with institutional funds through June 30th. Starting with the 2019 fall cohort we plan to increase awarding of institutional funds prior to the disbursement of financial aid specifically for resident students who complete the financial aid file by the priority deadline. This process will be ongoing as the university provides academic recovery through retention and completion grants. We have also modified the packaging of FTIC Florida-Resident students to offer less loans and more institutional funds provided they complete the financial aid file by the priority deadline. This includes up to $1,500 in additional grant aid to decrease overall indebtedness. We send communication to current students and applicants indicating the necessity to complete the FASFA and subsequent verification information required by the US Department of Education. This year, it is our intent to:

1. Allocate more institutional funds to student financial aid awards prior to offering unsubsidized loans to FTIC resident students. It is our hope that by offering these funds, students will have decreased financial need and reliance on unsubsidized loans, which accumulate interest while the student is enrolled.
2. Invest more university resources in our students, not just through a reliance on institutional funds but also through employment at the university. Work study funds allocated by the US DOE will assist with student expenses and we have requested all departments university-wide to consider students for Other Personnel Services (OPS) part-time employment. This keeps them on campus, gaining valuable experience and developing the soft skills necessary to be competitive in the global economy.

Pillar Two: Education and Training

Educating and training our students about money management became a focus of FAMU with the 2013 debt reduction plan. Students were hired and intensely trained on financial aid and financial literacy. These financial liaisons have been integral in helping to decrease the student default rate by working with the First Year Experience program, at special events, attending residence hall meetings, and facilitating scheduled appointments through the Office of Financial Aid. For fall 2019, the First Year Experience (FYE) Course has been redesigned to include a critical thinking assessment of financial literacy to ensure students understand the value of decreasing loan debt. Three full time instructors have been hired and charged with ensuring assessment and accountability for students and parents. Students will receive financial literacy in FYE and parents will receive information during the recruitment and orientation process. Many of our students are first generation. The need to inform their parents of all options to finance their student's education is imperative. As a result, we have made financial literacy an integral aspect of our recruitment and onboarding strategy for students and parents alike. Beginning fall 2019, we will increase our efforts by improving the presence of our financial liaisons throughout the university community. We continue to increase our presence in the local community by conducting workshops in collaboration with local high schools and accompanying our enrollment management teams in the recruitment process. This is in part funded through a partnership with Fifth Third Bank. An essential part of students enrolling at FAMU is ensuring that they have a complete understanding

of the costs and ways of supplementing the costs in such a way that limits unnecessary borrowing. This summer, FAMU hosted a summit with high school counselors and our Florida College System partners where detailed discussions were held on the admission process, cost of attendance, the importance of filing financial aid information on time, and utilization of student loans as a last resort for covering educational expenses.

FAMU's goal is to provide information and guidance to help student borrowers understand how to manage their debt and repay their loans. The University has implemented a series of professional development initiatives for students in order to develop and enhance their financial literacy skills and to provide them with information on student loans, debt obligations, repayment options, and loan alternatives. Several units will continue to enhance their processes to provide information and guidance to help student borrowers understand how to manage their debt and repay their loans.

A. Financial Aid Office

The Office of Financial Aid plays a key role in educating FAMU's student borrowers by providing information and guidance to increase student awareness about debt management strategies and effective financial planning. Through the Office website, the office provides information to students on budgeting strategies, and it includes links to external websites that serve as resources on financial literacy. In addition, the Office of Financial Aid requires all first-time student loan borrowers (Federal Direct Loan and Graduate Plus) to complete entrance loan counseling before any loans are dispersed. As noted on the Office's website, this entrance loan counseling reinforces the commitment that comes with the acceptance of a student loan and helps students understand how to better manage their student loans for educational purpose. All student borrowers (Federal Direct Loan and Graduate Plus) are also required to complete exit loan counseling to prepare them for loan repayment after graduation or withdrawal.

The Office of Financial Aid also will continue to provide several debt management initiatives in conjunction with the Undergraduate Student Success Center, as described below.

B. Undergraduate Student Success Center (USSC)

Debt Counselors

The Undergraduate Student Success Center (USSC) employs two full-time debt counselors to facilitate ongoing campus-wide workshops, class presentations, and one-on-one sessions on financial literacy. The main goal of the counselors is to educate students on the importance of budgeting and to make them aware of the potential loan debt obligation upon graduation. Examples of ongoing sessions conducted by the debt counselors are listed below.

- Financial Literacy Workshops
- Student Loan Debt obligations (Exit counseling) [10]
- Student Loan Debt obligations (Information on various Repayment Plans, Loan Forgiveness, Loan Consolidation and Rehabilitation

The First Year Experience Program

The FAMU First Year Experience Program (required for most freshmen and financial literacy is a topic on the course syllabus) focus is to enhance the mission of the University by providing

comprehensive services to aid in the transition of newly admitted undergraduates by stimulating intellectual growth, social and fiscal responsibility, personal wellness, and career development. One goal of the program is to help students understand the principles of financial literacy by:

- Explaining the difference between a Pell Grant and a student loan
- Identifying the basic skills necessary to effectively manage money.

Pillar 3: Student Success

Student success is the major component of our debt reduction plan. Ensuring students have the necessary coursework and resources to persist to graduation and reducing excess credit hours is the center of student success initiatives. Through initiatives defined in our Graduation Plan, the following initiatives will be implemented to reduce the time-to-degree for our students. Initiatives include:

1. **Finish in Four Campaign:** The University has launched our four-year graduation campaign "Finish in Four" starting with the 2018 Cohort. The plan is designed to raise awareness of the importance of obtaining a degree in four years though new tools in the SIS (Student Information System), website and social media campaigns. To date, the plan has been rolled out to approximately 1,500 Students.

2. **Strengthen and enhance academic support services:** The University has initiated a restructuring of undergraduate advisement, which includes allocating funding to hire seventeen (17) new advisors/academic coaches. First-year students will have dedicated academic coaches to assist with enhancing academic skills (note taking, time management, study skills, etc.) necessary for student success. We have also created the Office of Transfer Services to better meet the needs of transfer students.

3. **Living Learning Communities:** The University has increased funding for the initiative by $200,000 to enhance programming and accommodate an expansion of the program to serve additional students.

4. **Peer Mentoring:** We have allocated $300,000 in funding to the peer mentor program. To date, over 60 new peer mentors have been hired to provide increased support to tutoring labs and existing first-year courses.

5. **Early Warning System:** The University allocated $100,000 in new funding to acquire a new early warning system. The University is currently evaluating various early-alert systems (Civitas and Starfish) for implementation during the Fall 2019 semester. Moreover, we are revamping the technology stack used by our advisors, academic coaches, tutors, and other academic and student affairs services to facilitate significantly improved student tracking and accountability.

6. **SLS Course Redesign:** The University has launched the redesign of our first-year course to shift the focus to developing core academic skills and the Growth Mindset (Grit).

7. **Preparing Scholars for Success (PS2) Summer Program:** The University is developing a summer boot camp to help address math deficits in STEM majors. Students will do online

math remediation during the summer and come to campus a week early for the fall semester to participate in an intensive boot camp program designed to prepare the student for the upcoming semester. The program has been modeled on the successful BIOS program at LSU which reports increased retention and graduation rates for participants.

8. **Strengthen the financial literacy program:** The FYE Financial Literacy program is designed to educate students on the importance of repaying their student loans. When the program was initiated, the Cohort default rate for the University was 18%. Due in part to the success in our program, the default rate now is at 9%. Student Debt Counselors come to each SLS 1101 course to provide students with critical information about taking out student loans and repaying their debt.

With over 64% of all undergraduate students receiving federal loans, we will continue our efforts to educate students on student debt and implement strategies to ensure student success. We have made progress over the past several years in improving student success outcomes in several areas, such as six-year graduation rates, reducing the time-to-degree, student average loan amounts and student default rate. However, the University acknowledges that rapid and significant progress is needed with respect to the number of students who are receiving federal student loans. FAMU will continue to research best practices for increasing student/family knowledge about how to pay for college and how to successfully navigate higher education without taking on excess or unnecessary debt. Table 6 below provides the targets the University has established to monitor the effectiveness of strategies implemented.

Table 6. Student Success and Debt Reduction Metrics

Baseline	Metric	2022 Goal
50% (2012-18)	Six-Year Graduation Rate	60% (2016-22)
22.5% (2014-18)	Four-Year Graduation Rate	40% (2018-22)
4.9 (2017-18)	Time to Degree	4.1 (2021-22)
81% (2017-18)	Retention Rates (Second Year)	88% (2021-22)
9.5% (2015)	Three-Year Cohort Default Rate	8.5% (2018)
$7,960 (2017-18)	Annual Average Loan of Resident Dependent Undergraduates (Federal)	$6,800 (2021-22)
$30,126 (2017-18)	Average Amount of Debt *for Bachelor's who have graduated with debt*	$28,000 (2021-22)

The following action plan (Table 6) will provide the additional steps/initiatives that will be implemented to address student success, thus reducing debt.

Table 6: Retention and Debt Reduction Action Plan

Area of Focus	Strategy/Intervention	Unit Responsible	Proposed Implementation Date
Financial Aid Budgeting and Packaging	• Utilized institutional funds to decrease student loan debt • Revised packaging of FTIC Florida resident students • Pell PLUS Program (3P) FTIC Florida Residents with completed files by February 1 • Specified Loan Options	Office of Financial Aid	Spring 2019 (Ongoing) Fall 2019 (Ongoing)
Education and Training	• Redesign First Year Experience course (FYE) to include critical thinking assessment of financial literacy • Financial literacy efforts in residence halls, student union, and virtually • Implemented 5/3 Bank early financial literacy education with high school students • Hired two full time FYE Instructors to monitor and track student critical thinking • Summer Summit with High School Counselors and FCS partner institutions	Office of Financial Aid and Student Success Center	Initial implementation 2012-13 and ongoing Fall 2013 (Ongoing) Fall 2018 (Ongoing) Summer 2019 (Ongoing)

Area of Focus	Strategy/Intervention	Unit Responsible	Proposed Implementation Date
Student Success	• Online or Hybrid Course Offerings • Implementation of the Four-Year Graduation Plan in 2019 Accountability Plan • Increased data collection from schools/colleges • Hired 5 Freshmen Academic Coaches • Academic Recovery Program • Retention and Completion Grants • Leveraging Civitas and Impact software to evaluate effectiveness of programs • On-campus OPS student employment • Retention and Completion Grants	Academic Affairs and Student Affairs	Fall 20017 (Ongoing) Summer 2019 (Ongoing) Fall 2019 (Ongoing) Summer 2019 (Completed) Summer 2019 (Ongoing) Spring 2020 (Ongoing) Fall 2019 (Ongoing) Summer 2019 (Ongoing)

1. Call to Order and Opening Remarks

Chair Fernando Valverde convened the meeting on March 27, 2019, at 1:03 p.m. with the following members present: Governors Kitson, Tripp, White, and Zachariah (by phone); Florida Agricultural and Mechanical University Trustee Lawson, Florida Atlantic University Trustee Barbar, Florida Gulf Coast University Trustee Gable, Florida International University Trustee Lowell (by phone), Florida State University Trustee Burr; New College of Florida Trustee Schulaner; University of Florida Trustee Heavener (by phone), University of Central Florida Trustee Garvy; University of South Florida Trustee Watkins; and University of West Florida Trustee O'Sullivan. A quorum was established.

2. Minutes of January 30, 2019, Task Force Meeting

Chair Valverde asked for a motion to approve the minutes from the January 30, 2019, Task Force meeting. Governor Tripp moved to approve the minutes, Governor White seconded the motion, and the motion carried unanimously.

3. Dashboard Project Update

Chair Valverde informed the Task Force that he attended a meeting at 11:30 a.m. with university stakeholders on the subject of drugs, alcohol, and mental health. Chair Valverde said that he was very encouraged by the engagement and energy the group showed, and he asked Dr. King to provide a synopsis of the meeting.

Dr. Corey King, Vice President for Student Affairs and Enrollment Management at Florida Atlantic University and the Chair of the Council for Student Affairs (CSA), reported that the Council for Student Affairs, student health center directors, and student counseling center directors held a joint meeting with Governor Valverde on drugs, alcohol, and mental health. The purpose of the meeting was to provide Governor Valverde with insight into the activities, programs, and services provided around alcohol, drugs, and mental health on our campuses. Dr. King asked for those

who were in attendance to stand and be recognized. Dr. King thanked Chair Valverde for his leadership.

Next, Dr. King provided an update on the progression of the Dashboard Project. In the first area of Student Wellness, Dr. King reported all institutions had agreed to system-wide adoption of the American College Health Association's National College Health Assessment with implementation in Spring 2020. Dr. King stated that questions from the assessment would be used as benchmarks to create metrics around this initiative. Dr. King said that all campuses also achieved the goal of implementing Healthy Campus 2020 in Fall 2018. In the area of Alcohol and Drugs, Dr. King reported that all institutions had achieved the goal to rebrand the collegiate student experience around healthy and responsible choices to support lifelong health and well-being with a Fall 2019 implementation. Institutions are currently working to address Goal 2 to align policies with practice to support the desired campus culture and would be effective Spring 2020. Dr. King noted that all institutions had met Goal 3 to implement best practices and early intervention, and all institutions currently have programs in place to address Goal 4, which is to support students with a non-drinking/non-drug using lifestyle. Dr. King stated that the majority of campuses had already established peer counseling programs with 2-3 institutions indicating a peer counseling program will be in place by Fall 2019. The provost group is working in collaboration with CSA to offer student life skills and wellness courses that would include a mental health and wellbeing component for freshmen. This initiative would have a Fall 2021 implementation date. Dr. King said the goal to create and/or reorient campus services focused on proactive and responsive mental health and well-being is currently in progress, with an implementation date of Fall 2019. All institutions implemented a comprehensive needs assessment for all incoming freshmen in Fall 2018. According to Dr. King, the Council for Student Affairs also voted unanimously to put together a hard-waiver insurance program proposal to present to the Task Force. The goal is to implement a hard-waiver insurance program with a mental health component as early as Fall 2020. Dr. King also reported the Council for Student Affairs is moving forward with the mental health literacy program Kognito and working with the provost group and the Florida Student Association for an implementation date of Fall 2019. Board staff is working with procurement offices, and a contractual review with Kognito is currently in progress.

Dr. King then described the recommended drugs, alcohol, and mental health metrics from the American College Health Association's National College Health Assessment and Kognito. The metrics will include data related to the use of alcohol, marijuana, and other drugs in the past three months, the most common mental health issues, treatment of mental health issues in the past 12 months, and the impact of use of alcohol, drugs, and mental health issues on academic performance in the past 12 months. Dr. King reported that data from Kognito related to mental health literacy could also be used to create additional metrics.

Chair Valverde asked Dr. King to summarize the accomplishments over the past 14 months. Dr. King commented that there is greater collaboration and consistency across all 12 institutions regarding drugs, alcohol, and mental health. Dr. King said that institution staff had learned the importance of the American College Health Association's National College Health, Kognito, and the care and case managers on campuses to coordinate care for students. Dr. King stated that there is interest in providing hard-waiver insurance to ensure students have insurance with a mental health component and to ensuring that institutions have community resources for students that may offer treatment beyond what institutions can provide for them. Dr. King mentioned that institutions have qualified, educated, and knowledgeable professionals who care about students working on campuses.

Chair Valverde thanked Dr. King and the members of his team for all the work that has been completed and the work that is ongoing.

4. Drugs, Alcohol, and Mental Health Issues: A Review

Chair Valverde invited Dr. Christy England, Vice Chancellor for Academic and Student Affairs, to provide a review of drugs, alcohol, and mental health issues.

Dr. England noted that in the last year, the Task Force was provided a lot of information about the critical issues facing students relative to drugs, alcohol, and mental health. She stated that the Task Force identified several solutions, worked with the Council of Student Affairs, among others to begin implementing solutions with support from campus leaders and staff at counseling centers, health centers, and wellness programs. Dr. England presented a review of student reported use of drugs and alcohol and mental health issues. She noted that students report that substance use and abuse and mental health issues have adversely affected academic performance. Dr. England described a framework and the solutions that have been implemented, solutions in progress, and potential additional solutions that may help fill in any gaps.

Dr. England said given that student success is our highest priority, it is imperative that our students be well. To fully serve our students, institutions have to provide efforts for prevention, addressing crises when they occur, and treatment of students for addiction or mental illness. Dr. England commented that while our institutions cannot be all things to all students, institutions are devoting substantive resources to these areas, and comprehensive approaches are being developed to support student wellness. Dr. England stated that coordination of service and care is a critical component to developing and supporting a healthy culture that will lead to increased student success.

Dr. England asserted that the Task Force should remain focused on the ultimate goal of student wellness for student success. To accomplish this, she discussed three levels of

support: campus-level, community, and policy and system-level support. Dr. England reviewed the accomplishments to date and summarized the solutions in progress. Dr. England described House Bill 595, which extends protection for a drug-related overdose to include protection for an overdose related to alcohol so long as the person seeking assistance meets specific criteria. She stated that this legislation encourages others to seek medical assistance for persons experiencing an overdose by providing those individuals with immunity from prosecution. Dr. England said institutions are working to align policies and practices across campus to support a healthy campus culture.

Dr. England commented that on the campus level, the Council for Student Affairs should continue to be encouraged to implement and support dashboard initiatives. At the community level, institutions are assessing the availability of resources as part of the student hard waiver health insurance plan and developing campus-specific recommendations for utilizing community resources. Dr. England also mentioned exploring the viability of telehealth options.

Chair Valverde noted that approximately 15% of students do not have insurance. He stated there might be gaps for students who don't have insurance and who have high pathology. He stated that we are working to identify gaps to help the most vulnerable students to find solutions. Governor Cerio commented that a greater number of students are also coming to the institutions with alcohol and drug addiction and mental health issues and that institutions must prepare for these students.

Dr. England suggested that system-level solutions include an annual review of the dashboard by Board staff and the Council of Student Affairs. Dr. England also recommended a review of the data be conducted related to the metrics over time to see if there is any reduction in reports on the use of substances and reports of mental health improvements being made to impact student performance. Dr. England suggested the System host a biannual summit focused on student wellness. She stated that this would be an opportunity to discuss current and common issues, share best practices, provide training opportunities, and learn from experts on research and practices for effectively helping students deal with issues.

Chair Valverde thanked Dr. England for her presentation.

5. Student Wellness Initiatives Updates

Chair Valverde then re-introduced Dr. King to give an update on student wellness initiatives.

Dr. King provided an overview of student wellness. He noted that the American College Health Assessment, Kognito, and the peer counseling initiative would be

moving to the dashboard. Dr. King reported that Healthy Campus 2020 would be evolving to Healthy Campus 2030 at the end of this year at which time implementation of this initiative would begin.

Dr. King stated that the ongoing student wellness initiatives include the Student Life Skills/Student Wellness courses, a review of care managers and case managers, and looking at a formalized process for referring students from health and counseling centers to community resources.

Chair Valverde thanked Dr. King for his report.

6. Concluding Remarks and Adjournment

Chair Valverde concluded by reading a letter that was sent to all university Presidents by Florida Education Commissioner Richard Corcoran. The Commissioner wrote about the anniversary of the shooting at Marjory Stoneman Douglas High School in Parkland. He wrote about the impact of the tragedy on the lives of our students. The Commissioner asked for support for students who survived the violence, to let the students know there is help and how to access the help, and requested administration to reach out to the parents of those students. Chair Valverde reiterated the importance of the work of this Task Force.

Chair Valverde thanked the Task Force and presenters and adjourned the meeting at 1:39 p.m.

Drugs, Alcohol, and Mental Health Task Force Report

August 2019

DRUGS, ALCOHOL, AND MENTAL HEALTH TASK FORCE
FINAL REPORT
August 2019

INTRODUCTION

On January 25, 2018, Board of Governors Chair Ned Lautenbach established the Drugs, Alcohol, and Mental Health Task Force during his State of the System Address. Chair Lautenbach asked Governor Fernando Valverde to lead the effort with the engagement of the chairs of the State University System (SUS) institutions' boards of trustees. Refer to Appendix A for a list of full Task Force membership.

The Drugs, Alcohol, and Mental Health Task Force was charged with reviewing evidence to document the most critical drugs, alcohol, and mental health issues facing students in the SUS. The Task Force was also charged with identifying best practices to inform the development of System-wide recommendations for effectively addressing the most critical issues and determining resources required to implement System-wide solutions. This report provides an overview of SUS student use and abuse of substances and SUS student mental health, followed by a review of the most critical issues for the System relative to those areas. The report concludes with a review of solutions already implemented, those in progress, and those recommended for future implementation.

The Task Force first convened on March 27, 2018. The Task Force members, as well as representatives from the Council for Student Affairs (CSA) and the Council of Academic Vice Presidents (CAVP), were in attendance. The Task Force convened for six meetings between March 2018 and March 2019 and is currently chaired by Governor Edward Morton. Appendix B provides an overview of the topics addressed at each meeting.

During those six meetings, campus experts delivered the presentations and reported national- and state-level data related to student use and abuse of drugs and alcohol as well as the status of student mental health. The presentations also included evidence-based research on national best practices regarding education, prevention, treatment, and continuum of care relative to student wellness. The presenters also described various campus initiatives in place throughout the system that promote wellness, resilience, and student success. Behind the scenes, staff from SUS counseling centers, wellness programs, health centers, and medical schools provided vast amounts of information and support to the presenters and the Task Force.

In June 2018, the Dashboard Project was initiated by the Task Force in collaboration with the CSA. The dashboard (see Appendix C) establishes a framework that includes System-level goals and initiatives that address student wellness, drug and alcohol use, and mental health. Dr. Corey King, Chair of the CSA, provided updates on the development of the dashboard at each subsequent Task Force meeting. In March 2019, Dr. King shared specific metrics identified by the CSA that could be used to assess drug and alcohol use and mental health issues among students over time. The metrics are questions from the American College Health Association's National College Health Assessment. Data for these metrics will be available System-wide beginning in the summer or fall of 2020.

As the Task Force identified critical issues at each meeting, the CSA discussed and recommended solutions that would have high impact, and that could be implemented in a relatively short timeline. With support from the Task Force, the Council and others began implementing various solutions, and Dr. King provided updates on the implementation of these student wellness initiatives at each subsequent meeting.

STUDENT USE OF SUBSTANCES

The first key area of focus for the Task Force was student use of substances. Experts across the System presented the Task Force with national- and System-level data on the use and abuse of alcohol, opioids, marijuana, and other drugs. Factors that increase the likelihood of alcohol and drug use among college students include use in middle and high school, peer pressure and perceived use among peers, escape and avoidance, family history of alcohol and drug dependence, college culture, and mental health issues.[1] The short-term effects of alcohol and drug use among college students may include a decline in academic performance, memory loss, impaired perceptual-motor skills, an increase in impulsive behaviors such as fighting and vandalism, relationship problems, increased likelihood of engaging in risky sexual behavior, sexual violence, and physical injury.[1] The long-term effects of substance use among college students may include poor physical health, the need for treatment, a legal record, and death.[1] Presentations also included evidence-based research on best practices regarding education, prevention, and treatment relative to student drug and alcohol use.

[1] National Center on Addiction and Substance Abuse as reported in Dr. Kirk Dougher's presentations Drug Use & Abuse Among College Students at the March 27, 2018, Drugs, Alcohol, and Mental Health Task Force meeting and Alcohol Use & Abuse Among College Students at the June 27, 2018, Drugs, Alcohol, and Mental Health Task Force meeting

Drugs

Dr. Kirk Dougher, Assistant Vice President of Student Affairs and Director of Counseling and Psychological Services at Florida Atlantic University, presented on drug use and abuse among college students to the Task Force in March 2018, and provided data relative to reported drug use among students in the SUS and national data from the National College Health Assessment.

Student use and misuse of most illegal and prescription drugs are relatively low among SUS students, with the exception of marijuana (18%). This trend is similar to the national trend.[2,3]

Alcohol Use

At the Task Force's June 2018 meeting, Dr. Kirk Dougher presented on alcohol use and abuse among college students and provided data relative to reported use among students in the SUS and national data from the National College Health Assessment.[4]

In 2017, 62% of SUS students reported using alcohol at least once in the last 30 days, while 7% of students reported consuming five or more drinks in one sitting four or more times within two weeks. Twenty-one percent of SUS students reported never having had an alcoholic drink. Alcohol usage among SUS students closely mirrors the usage among college students nationally.

STUDENT MENTAL HEALTH

The Task Force focused on the issue of student mental health at four of its six meetings. The Task Force heard presentations with national- and System-level data on student mental health issues, including anxiety, depression, and others. In 2017, 25% of SUS students reported experiencing anxiety, and 21% reported experiencing depression, which aligns with national data.[5] The presentations also included best practices for risk assessment, diagnosis, treatment, and continuum of care. The Task Force also learned about strategies the SUS institutions have implemented during the last several years in response to increased student demand and as a result of discussions with the Board before the creation of the Task Force.

In November 2018, Dr. Kathryn Kominars, Interim Director for Counseling and Psychological Services at Florida International University, described the comorbidity of

[2] Dr. Dougher's title at the time of the meeting of the presentation to the Task Force
[3] American College Health Association National College Health Assessment, 2017 Reference Group Executive Summary
[4] American College Health Association National College Health Assessment, 2017 Reference Group Executive Summary
[5] Center for Collegiate Mental Health 2018 Special System Analysis

substance use and mental illness. Dr. Kominars reported that 2.4 million young adults (26.8%) aged 18 to 25 with any mental illness also had a substance use disorder.[6]

CRITICAL ISSUES

During the six Task Force meetings, three critical issues emerged as the highest priorities for the System. The three critical issues identified by the Task Force include the impact on student academic performance; the prevention, diagnosis, and treatment of drug use and mental health issues; and coordinating care for students across the institution and in the community. Each of these issues is described in more detail below.

Academic Performance

Student success is the highest priority for the Board and the SUS institutions; however, the Task Force repeatedly heard that substance use and misuse and mental health issues adversely impact students' academic performance. Three percent of students reported that alcohol use interfered with academic performance within the last 12 months, and 1-2% reported that drug use interfered with academic performance within the last 12 months.[7] Furthermore, 25% of students reported that anxiety affected academic performance, and depression was reported by 16.8% of students for having a negative academic impact. Impacts on academic performance included a lower exam grade, lower course grade, and the inability to complete a course.

Prevention, Diagnosis, and Treatment

To fully serve our students, institutions must continue working towards a comprehensive approach to support student wellness with prevention initiatives, early diagnosis, and effective treatment. A greater number of students are entering SUS institutions who have been previously diagnosed and treated for substance use and misuse, mental health issues, and who have taken medication. Counseling center utilization across the System also continues to increase – in part due to increasing numbers of students who were diagnosed with mental illness before enrolling and also due to the reduced stigma associated with seeking help for mental illness. All SUS institutions continually monitor the services and needs of students to maintain and establish the most efficient and effective services, resources, and programming for students.

[6] National Survey on Drug Use and Mental Health 2017 as reported in Dr. Kathryn Kominar's presentation Mental Health and Substance Use: Occurrence and Complexity at the November 7, 2018, Drugs, Alcohol, and Mental Health Task Force meeting

[7] American College Health Association National College Health Assessment, 2017 Reference Group Executive Summary

All SUS counseling centers have established policies and practices for performing student risk assessments and providing access to those in need of both short-term and long-term services. Institutions' mental health enhancement plans, as submitted to the Board of Governors in fall 2017, have resulted in several improvements including but not limited to the following: additional staff hired in various capacities based on the needs of the institutions; increased access via extended hours on campus, community providers, and online services; and enhanced mental health training for faculty, staff, and student groups (e.g., at-risk students, peer educators, wellness coaches, and resident assistants). Institutions also refer students to community resources who can provide services beyond those that institutions can provide.

Coordinating Care

Coordination of services and care is a critical component to developing and supporting a healthy campus culture that will lead to increased student success. Various health providers coordinate care for on-campus, commuter, and online students through care managers, case managers, treatment coordinators, and community providers.

At the September 12, 2018, Task Force meeting, Dr. Rita DeBate, Associate Vice President for Health and Wellness at the University of South Florida, provided a presentation on the Campus Mental Health Action Planning Guide which recommends inclusion of evidence-informed strategies along a continuum of care, and she provided examples of System and institution strategies that align with the continuum.

Each institution has implemented a comprehensive needs assessment for incoming freshmen to assist in the early identification of students who may benefit from counseling services. Each institution has a treatment coordinator(s), case manager(s), and/or care manager(s). Responsibilities for the individuals in these positions vary by institution but typically include the following.

- Providing initial intake, screening procedures, and crisis walk-in services.
- Working with students concerning such issues as exceptional circumstances for withdrawal, food insecurities, financial issues (including homelessness), health or family issues resulting in class absences, responding to other "crisis" concerns regarding students.
- Monitoring and tracking students seeking services within a university counseling center, e.g., medical and psychiatric services and referrals to group services and community resources.
- Maintaining a referral system and process and facilitating the transition to a higher level of mental health care when necessary (e.g., inpatient, specialty care), and assisting with transitioning back to campus.

SOLUTIONS

Student wellness for student success is the overarching goal of the Board and the SUS institutions. To achieve this goal, three levels of support have been identified. The first level of support is campus support, which encompasses all the programs, services, and initiatives that the institutions use to support students directly. The second level of support is community support, which provides resources beyond campus resources to supplement care available on campus or fill in any gaps. The third level is provided by the State and/or the System through policies, oversight, and coordination to support the students and the institutions. As a result of the work of the Task Force, the System has made substantial progress in identifying and implementing solutions to address critical issues that have been identified. Exhibits 1, 2, and 3 in Appendix D provide a summary of the solutions already implemented, solutions in progress, and recommended solutions for future consideration at each level of support.

NEXT STEPS

The Board of Governors is committed to promoting student wellness and success by addressing the most critical issues related to student use of alcohol and drugs and to student mental health. The Task Force has determined that reducing substance use and abuse and improving mental health, particularly anxiety, while ensuring student success requires a comprehensive approach that encompasses prevention, early treatment, and coordinated care. The Task Force, in collaboration with the CSA, have developed a comprehensive action plan to address these critical issues.

To reduce substance use and reduce anxiety, the following actions have already been completed by all SUS institutions.

- Implementing the national Healthy Campus 2020 framework, which requires a comprehensive, strategic framework that unites health issues under a single umbrella; tracking of data-driven outcomes to monitor progress and to focus action; engagement of a comprehensive network of stakeholders; includes research, program planning, and policy efforts to promote health and prevent disease; and utilizes population-level interventions, while addressing the social determinants of health.
- Providing healthy lifestyle options for students to encourage mental and physical well-being.
- Conducting freshmen needs assessments to identify resources needed by each incoming class, including wellness education and counseling services among others.

- Creating medical amnesty policies to encourage students to seek help when in medical danger due to excessive alcohol or drug use.
- Expanding the state's medical amnesty statute to include alcohol use by minors in addition to drug overdose situations.

These completed initiatives are only the beginning of the system-wide commitment to student success through student wellness. The CSA has committed to the Task Force and the Board of Governors that a wide array of additional strategies will be implemented as outlined in the Dashboard (Appendix C) and Solutions in Progress as detailed in Exhibit 2 of Appendix D. Following are a few of strategies that will most directly impact student substance use and mental health.

- Implementation of a mental health literacy program, Kognito, to train faculty and staff to increase awareness and build knowledge and skills related to mental health and suicide prevention. This is being done in collaboration with the CAVP and the human resource directors beginning in fall 2019. The goal is to have 100% of all faculty and staff across the system trained by January 2021.
- Including in all student life skills and wellness courses a student wellness component that addresses drug use and mental health. This is being done in collaboration with the CAVP.
- Development and/or enhancement of prevention and early intervention programs designed to address substance use and mental health.
- Development and/or enhancement of peer education programs to promote health-enhancing change and support. A trained peer can share knowledge, teach healthy coping skills, and increase awareness of resources.

The final step going forward is continuous improvement, which is comprised of two key components - both of which are also part of Solutions for Future Consideration in Exhibit 3 of Appendix D. One component is to assess the progress towards implementation of these strategies and their subsequent impact. Progress towards implementation will be done by conducting annual assessments of the Dashboard in Appendix D. The CSA has committed to conducting this assessment and reporting the outcomes to the Board of Governors on an annual basis. Evaluating the impact of these initiatives will be done through key metrics from the American College Health Association's National College Health Assessment. The CSA recommends using the following metrics, which will be available for all SUS institutions every two years beginning in 2020, to monitor the impact of these initiatives of students throughout the system.

- Frequency of use of alcohol, marijuana & other drugs in the past three months
- Most common mental health issues (e.g., anxiety, depression, addiction
- Treatment of mental health issues in the past 12 months
- Impact of alcohol use, drug use, & mental health issues on academic performance in the past 12 months

The CSA has also committed providing data for these metrics to the Board as they become available.

The second component of system-wide continuous improvement component is a biannual summit focused on student wellness. During the summit, institutions can share data and information from the Dashboard, the National College Health Assessment, Kognito, and other sources to inform further improvements. Institutions can also share success stories and lessons learned as they implement the strategies outlined in this plan. Summit planners should also consider including national experts and best practices identified outside the system. While the early summits should focus on substance use and mental health, the scope can also be expanded as needed to address new or emerging issues that threaten student wellness and success in the future.

This comprehensive plan for reducing substance use among students and improving student mental health provides a solid foundation on which the Board can and will continue to support the success of all students.

	Implementation Date	FAMU	FAU	FGCU	FIU	FL Poly	FSU	NCF	UCF	UF	UNF	USF	UWF
Goal 1: Rebrand the collegiate student experience around healthy & reasonable choices related to alcohol & other drugs to support lifelong health & well-being	Fall 2020												
Goal 2: Align policies with practice to support the desired student/campus culture	Spring 2020												
Goal 3: Implement best practices focused on prevention & early intervention	Fall 2019												
Goal 4: Support students with non-drinking/non-drug using lifestyle	Fall 2018	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓

Appendix C: Dashboard Project (continued)
Mental Health Dashboard

	Implementation Date	FAMU	FAU	FGCU	FIU	FL Poly	FSU	NCF	UCF	UF	UNF	USF	UWF
Goal 1: Implement peer education programs, which require training prior to becoming a peer educator	Fall 2019												
Goal 2: Provide Student Like Skills (SLS)/Wellness Courses, which will have a mental health/well-being component	Fall 2021												
Goal 3: Create or re-orient campus services focused on proactive & responsive mental health well-being	Fall 2020												
Goal 4: Administer a comprehensive needs assessment for incoming freshman students	Fall 2018	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓

Appendix D: Exhibit 1
Solutions Achieved

Solutions Achieved	
Campus	**Healthy Campus 2020.** Healthy Campus 2020 is a national initiative of the American College Health Association that provides a framework for collaboration to foster healthy environments and behaviors on campuses nationwide. All institutions adopted Healthy Campus 2020 in fall 2018.*
	Healthy Lifestyle Programs. In fall 2018, all institutions implemented healthy lifestyle programs for students seeking a living environment focused on wellness. Programs support students with a non-drinking/non-drug using lifestyle and are focused on nutritious eating, physical activity, and restful sleep.*
	Freshman Needs Assessment. All institutions have implemented a comprehensive needs assessment for incoming freshman students (fall 2018). Assessing the needs of incoming freshmen allows institutions to utilize their resources more appropriately and effectively to meet student needs.*
	Institutional Amnesty Policies. All SUS institutions have implemented amnesty policies to help alleviate fears students may have regarding disciplinary actions from the institution if the student were to assist someone needing immediate medical attention.
System / State	**Medical Amnesty Legislation.** Ch. 2019-82, Laws of Florida, was revised during the 2019 session to extend immunity to the following so long as the person seeking assistance remains at the scene until medical help arrives and they cooperate with authorities. • A person seeking aid for an alcohol overdose • A person who acts in good faith and seeks medical attention for an individual experiencing an alcohol-related overdose • An individual who gives alcohol to a person under 21 and to persons under the age of 21 who would otherwise be subject to arrest and prosecution for underage drinking

*Denotes goal from the Dashboard Project

Appendix D: Exhibit 2
Solutions in Progress

Solutions in Progress	
Campus	**Mental Health Literacy.** All institutions have adopted Kognito, a mental health literacy training program for faculty and staff. System-wide implementation is scheduled for fall 2019.
	National Collegiate Health Assessment. All institutions have adopted the American College Health Association's National College Health Assessment, which will be implemented biannually beginning spring 2020.*
	Prevention and Early Intervention. Institutions are implementing evidence-based best practices focused on prevention and early intervention in fall 2019.*
	Rebranding. The rebranding of the collegiate student experience around healthy and responsible choices related to alcohol and other drugs to support lifelong health and well-being will be implemented at all institutions in fall 2020.*
	Re-orientation of Campus Services. Institutions are creating or re-orienting campus services with a focus on proactive and responsive mental health well-being effective fall 2020.*
	Peer Education Programs. All institutions will have a peer education program in fall 2019.*
	Student Health Insurance. All institutions will continue to work on a hard waiver insurance proposal that includes mental health and substance abuse components to allow for access to care for uninsured students.
	Student Life Skills/Wellness Course. By fall 2021, all institutions will offer a Student Life Skills/Wellness Course, which will include a mental health/well-being component.*

*Denotes goal from the Dashboard Project

Appendix D: Exhibit 2 (continued)
Solutions in Progress

Solutions in Progress (continued)	
Campus	**Policies and Practice.** Institutions are aligning policies with practice to support the desired student campus culture with implementation in spring 2020.*
Community	**Resources.** Institutions are assessing the availability of community resources as part of the student hard waiver health insurance plan and developing campus-specific recommendations for utilizing community resources.
	Partnerships. Community relationships/partnerships are being established, as appropriate to meet the needs of students.

*Denotes goal from the Dashboard Project

Appendix D: Exhibit 3
Solutions for Future Consideration

Solutions for Future Consideration	
Campus	The Task Force recommends that all institutions continue to implement and support the dashboard initiatives for student wellness, drugs and alcohol, and mental health as outlined in Appendix C.
Community	The Task Force recommends that the SUS institutions determine the viability of telehealth options to supplement the services provided by the institutions and the local communities.
System / State	The Task Force recommends that the dashboard be reviewed annually by the CSA and Board staff to ensure institutions achieve the identified goals. Appendix C provides current Dashboard goals, implementation dates, and institutional progress.
	The Task Force recommends an annual review by the CSA and Board staff of the metrics that have been identified from questions on the American College Health Association's National College Health Assessment. The metrics identified include: •Frequency of use of alcohol, marijuana & other drugs in the past three months •Most common mental health issues (e.g., anxiety, depression, addiction •Treatment of mental health issues in the past 12 months •Impact of alcohol use, drug use, & mental health issues on academic performance in the past 12 months •Additional mental health literacy metrics may be identified with the use of Kognito The review of the data related to the metrics will allow for any changes in student reporting on the use of substances, mental health issues, and impacts on academic performance to be assessed over time.

Appendix D: Exhibit 3 (continued)
Solutions for Future Consideration

Solutions for Future Consideration (continued)	
System / State	The Task Force recommends that in January 2020, institutions provide a final update of the Mental Health Counseling Plans.
	The Task Force recommends a biannual System summit focused on student wellness. This summit would provide an opportunity to discuss critical issues and share best practices across the System.

MINUTES
STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
INNOVATION AND ONLINE COMMITTEE
UNIVERSITY OF SOUTH FLORIDA
TAMPA, FLORIDA
JUNE 13, 2019

1. Call to Order and Opening Remarks

Chair Ed Morton convened the meeting at 9:45 a.m. on June 13, 2019, with the following members present: Vice Chair Darlene Jordan; Tim Cerio; Dr. Shawn Felton; H. Wayne Huizenga, Jr.; Zenani D. Johnson; Syd Kitson; Eric Silagy, Kent Stermon, and Norm Tripp. A quorum was established.

Chair Morton encouraged all Committee members and members of the audience to visit the Online Education Showcase in the hallway. He said that the Showcase highlighted the collaborative work underway to implement the 2025 Strategic Plan for Online Education.

Governor Motion announced that after the 2018 Annual Report for Online Education was presented, the committee will begin the mid-course review of the performance metrics and goals in the 2025 Strategic Plan for Online Education. Quality metrics will be reviewed today; Affordability metrics in August; and Access metrics in October. At the October meeting, all three sets of metrics will be approved and sent to the full Board for approval.

He also announced that as a part of the Affordability discussion in August, he has asked staff to present to the committee a plan for developing Master Agreements with publishers at the System level so that students throughout the State may obtain materials at more affordable prices than are currently available.

2. Approval of Committee Meeting Minutes

Governor Jordan moved that the committee approve the minutes of the January 31, 2019, meeting, as presented. Governor Felton seconded the motion, and the members concurred.

3. 2018 Annual Report for Online Education

Dr. Nancy McKee presented the following highlights from the 2018 Annual Report for Online Education:

- The State University System tied for first place in the top ten states for distance learning enrollments in terms of the percentage of public university students enrolled in distance learning courses, and placed second in terms of the number of students enrolled in distance learning courses.
- The SUS enrolled 266,000 students in distance learning courses in 2017-18.
- Seventy-two percent (72%) of undergraduates enrolled in at least one distance learning course during 2017-18, up from 69% in the previous year.
- Sixty-one percent (61%) of undergraduates took a combination of distance learning and classroom courses, up from 59% in the previous year.
- Three universities had at least 80% of their undergraduates taking at least one distance learning course: University of Florida, University of South Florida, and University of West Florida. The University of Central Florida was close behind with 77% taking at least one distance learning course.
- New College of Florida and Florida Polytechnic University do not offer distance learning courses.
- UWF had the highest percentage of graduate students enrolled in at least one distance learning course, and the highest percentage of both undergraduate and graduate students enrolled only in distance learning courses.
- Undergraduate students took 28% of their credit hours in distance learning courses, an increase from 20% in 2013-14. Every institution offering distance learning courses had an increase in distance learning credit hours during that range of years.
- The UCF, UF, Florida International University, and USF offered the greatest number of undergraduate distance learning credit hours. UF had the greatest number of graduate distance learning credit hours, followed by USF.
- Students taking only online courses were older than other students; they were primarily female; and they were primarily Florida residents.
- Of undergraduate students taking classroom courses, 80.8% received grades of A, B, or C, the same percentage as those taking primarily distance learning courses. Those students taking their courses fully at a distance had a higher percentage – 84.9% - earning grades of A, B, or C.
- The SUS had 540 online programs in 2017-18, with 327 of those being in Areas of Strategic Emphasis.

Governor Huizenga moved that the committee approve the State University System 2018 Annual Report for Online Education. Governor Jordan seconded the motion, and the members concurred.

Governor Morton stated that online education is a tool that can be used to bring dignity and opportunity to people throughout the state of Florida, if not the nation. Education is undergoing a dramatic change; a lot of it is being brought forward by online education. He encouraged the continued focus on online education as an opportunity to

extend the bridge of education and knowledge to people who otherwise would not have the opportunity to access what the system has to offer.

4. Mid-course Correction of the SUS *2025 Strategic Plan for Online Education's* Quality Metrics

Dr. McKee presented the following recommended changes to the Quality Performance Indicators and Goals in the *2025 Strategic Plan for Online Education:*

- 2025 Goals: Replace "8 Chancellor Awards presented annually at the state level" with "One Chancellor's Award presented annually at the state level."
- Performance Indicator: Replace "Percentage of faculty participating in professional development" with "Percentage of faculty teaching online courses participating in professional development."
- 2025 Goal: Replace "15% of faculty from SUS institutions offering online education participate in yearly professional development activities" with "90% of faculty teaching online courses complete professional development related to online education."
- 2025 Goal: Replace "75% of SUS institutions participate in the online education research consortium" with "100% of SUS institutions share relevant research (proposed, underway or completed) by participating in the annual Florida Online Innovation Summit."
- 2025 Goal: Replace "Online student success rate equals or exceeds the rate for comparable face-to-face courses" with "Online student success rate is comparable to the rate for classroom courses."
- 2025 Goal: Replace "Online student course withdrawal rate is no higher than for comparable face-to-face courses" with "Online student course withdrawal rate is comparable to the withdrawal rate from classroom courses."
- 2025 Goal: Replace "Student satisfaction levels for online courses equal or exceed satisfaction levels for comparable face-to-face courses" with "Student satisfaction levels for online courses are comparable to satisfaction levels for classroom courses."
- Performance Indicator: Replace "Percent of SUS courses bearing a "high-quality" rating in the FLVC online catalog" with "Continuing assessment of online courses to provide quality assurance and improvement using the Florida Online Course Design Quality (https://www.flbog.edu/board/office/online/_doc/2019_04_25_FLORIDA%20ONLINE%20COURSE%20DESIGN%20QUALITY_forPosting.pdf) review or an approved institutional process."
- 2025 Goal: Replace "90% of SUS courses in the FLVC catalog rated high quality" with "100% of new and substantively revised online courses must meet Florida standards following an approved review process. Existing and continuing courses will be considered for review on no less than a 5-year cycle."

Governor Huizenga asked if there was a timeframe for training 90% of faculty teaching online courses. Dr. McKee responded that data would start being collected in this manner for the upcoming year, beginning in the Fall of 2019, so she would be better able to answer that question at this time next year.

USF Provost Ralph Wilcox, Chair of the Steering Committee, said that the six provosts serving on the Steering Committee are fully engaged not only in shaping the future of online and innovative education, but also in tracking performance on the goals in the Strategic Plan for Online Education.

Governor Morton reminded the Innovation and Online Committee that the revisions to these and other metrics would be approved in October. He said the one exception was to the Quality course metric, because it is also found in the Board's overall Strategic Plan, and the Strategic Planning Committee is currently reviewing its performance metrics.

Governor Cerio moved to substitute the current metric of "Percent of SUS courses bearing a 'high-quality' rating in the Florida Virtual Campus online catalog" with a new metric requiring 100% of new and substantively revised online courses to meet Florida standards following an approved review process, and for existing and continuing courses to be considered for review on no less than a 5-year cycle and to forward the revised metric to the Strategic Planning Committee for its consideration." Governor Jordan seconded the motion, and the members concurred.

5. Performance in the Workforce: Students with Online Degrees

Gary Cantrell, Senior Vice President and Chief Information Officer, Jabil, Inc., spoke of the importance of getting and keeping the right talent educated and current. Realizing the need for data scientists, Jabil began a data analytics program with USF a few years ago and it has become more and more distance learning. The satisfaction levels and quality have gone up and the business value has gone up as the program has matured. The skill sets have been exceptional.

Andy Zolper, Senior Vice President and Chief Information Technology Security Officer, Raymond James Financial, said it takes critical thinking skills, problem-solving, leadership, bias for action, and an ability and fluency for learning to be successful in cybersecurity. He said that with his employees from the State University System, he cannot tell the difference in those who have obtained traditional degrees from those who have obtained online degrees or had hybrid experiences.

Two Raymond James employees who graduated from the University of South Florida spoke about their experiences with online courses:

- Kathy Castano majored in Computer Engineering and Computer Science at USF and took classes both in the classroom and online. She stated that these experiences helped her to be goal-oriented and a team player.

- Brooke Wallace graduated from USF with a bachelor's degree in International Studies (Russian studies), and a Master's degree in Cyber Intelligence, which she took fully online. With her online courses, she said she was able to choose her pace, which helped her to innovate and learn to work as part of a team.

6. Concluding Remarks and Adjournment

Governor Lautenbach said he felt the SUS is a leader in the country in online education. He said online education is one of the few areas in which all of the SUS institutions were collaborating, all working together in the areas the committee has been discussing, from access to quality to cost.

Chair Morton adjourned the meeting at 10:29 a.m.

Florida Board of Governors

I. INTRODUCTION

The Florida Board of Governors, hereinafter referred to as the Board, is developing the Action Plan for the purpose of providing access to quality and affordable textbooks and instructional materials for students enrolled in the State University System of Florida.

II. BACKGROUND

In Fall 2018, the State University System of Florida enrolled 353,558 Educational and General students and 8,599 students in Special Units.[1]

The 2018 Student Textbook and Course Materials Survey of SUS and Florida College System students, which was conducted by the Florida Virtual Campus, found that "The cost of textbooks continues to negatively impact student access, success, and completion." The Executive Summary further explains this finding:

> The findings suggest that the cost of textbooks was negatively impacting student access to required materials and learning. The top 5 highest percentage answers as a result of the high cost of textbooks are: not purchasing the required textbook (64.2%); taking fewer courses (42.8%); not registering for a specific course (40.5%); earning a poor grade (35.6%); and dropping a course (22.9%).

Another key finding of the survey was that "Students were more and more willing to rent print and digital textbooks," as described below:

> We see trends of willingness to rent textbooks. The majority of students (59.0%) were willing to rent either print or digital textbooks, compared to 51.0% in the 2016 Survey. When asked the strategies to reduce textbook costs, renting digital textbooks jumped from 29.6% in the 2016 Survey to 41.4% in the 2018 Survey.[2]

[1] Board of Governors, Office of Data Analysis (2019). "History of Headcount Enrollment, Fall 2006 through Fall 2018." SOURCE: Enrollment datamart; extracted 2019-04-09.

[2] Florida Virtual Campus, Office of Distance Learning & Student Services (2018). "2018 Student Textbook and Course Materials Survey: Executive Summary." Retrieved from https://dlss.flvc.org/documents/210036/1314923/2018+Student+Textbook+and+Course+Materials+Survey+-+Executive+Summary.pdf/3c0970b0-ea4b-9407-7119-0477f7290a8b.

The Board, concerned about the effect that the cost of required course materials was having on students, directed that a plan be developed at the System level, so that students throughout the State may obtain materials at more affordable prices than are currently available.

III. GOAL

The goal of this initiative is to provide students with access to quality and affordable textbooks and other instructional materials, thereby increasing the likelihood of their success in higher education.

IV. PURPOSE OF THE NOTIFICATION OF THIS ACTION PLAN

The purpose of this Action Plan is to notify interested parties of the intent of the Board to pursue Letters of Commitment with publishers and university bookstore vendors to ensure that students in the State University System of Florida will be paying less for textbooks and other instructional materials than they currently pay, beginning with the Fall term, 2020, and that students throughout the System will be paying consistent prices for the same materials.

Components of the System-wide initiative that have been identified to achieve the goal include:

1. Student cost of course materials, including pricing mark-ups by university bookstore vendors, be provided for (a) $20 or less per credit hour or (b) more than $20 per credit hour, but at a noticeably lower retail cost than students would otherwise pay;
2. Identifying the format of materials that meet the pricing indicated above as print and/or digital;
3. Student access to materials on the first day of class;
4. Student access to digital materials beyond the end of the course;
5. Students not paying twice for digital access if the course is dropped and taken at a later time;
6. The option for print-on-demand for digital materials;
7. Accessibility for students with disabilities;
8. Bookstore vendors will develop mechanisms for capturing and reporting faculty use of open education resources, library materials, and other no-cost resources (e.g. generic ISBNs), which will allow these resources to be included in the official booklist and the savings can be captured in the authoritative list;
9. University access to data;

The Letters of Commitment from publishers and university bookstore vendors will acknowledge and address the components of this initiative (as applicable) to provide access

DRAFT

to quality and affordable textbooks and instructional materials for students enrolled in the State University System of Florida.

V. PROCESS

Publishers and university bookstore vendors interested in participating in the Board's Action Plan will submit an Opportunity to Participate form with contact information to Board staff, Dr. Lynn Nelson, Director of Student Affairs, Lynn.Nelson@flbog.edu, by **September 12, 2019.** Those parties interested in participating will be invited to attend a web-based introductory session with Marshall Criser, Chancellor, State University System of Florida, on **September 17, 2019.** Afterward, any questions may be submitted to Dr. Nelson at the above address no later than **September 26, 2019**; responses will be posted to (web page) within three days of receipt of the questions. Signed Letters of Commitment addressed to Chancellor Marshall Criser must be received at the Board office no later than **November 22, 2019.** By **January 20** of each year beginning in **2020**, publishers will have available for faculty review and consideration the list of materials meeting the terms of their commitment. The list must include the title, author(s), ISBN, cost, format, access, option for print-on-demand, and accessibility, and be updated as additional materials become available.

VI. REPORTING

Each institution will report the number of course sections that ~~met the pricing goal of~~ provided required course materials for $20 or less per credit hour ~~for required course materials~~ in the annual Textbook and Instructional Materials Affordability report due to the Chancellor by September 30, beginning with the ~~2020~~ 2021 report.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Innovation and Online Committee
August 28, 2019

SUBJECT: Mid-course Correction of the *SUS 2025 Strategic Plan for Online Education's* Affordability Metrics

PROPOSED COMMITTEE ACTION

Discuss proposed revisions to the Affordability metrics in the *2025 Strategic Plan for Online Education*.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

The *2025 Strategic Plan for Online Education* was adopted by the Board in November 2015 and has several performance indicators and goals for each of the three elements in the *Plan* (Quality, Affordability, and Access). Two of these metrics – one Quality and one Access – are also reflected in the SUS *2025 Strategic Plan.*

The *2025 Strategic Plan for Online Education* provides that the Board "will periodically evaluate these performance indicators and their corresponding 2025 goals." The Quality metrics were reviewed by the Committee at its June meeting; the Affordability metrics will be reviewed at its August meeting; and the Access metrics will be reviewed at its October meeting. In October, all revisions will be approved and forwarded to the full Board for its consideration.

The Steering Committee, six provosts and a non-voting member of the Board staff, was created by the Chancellor to provide guidance for the implementation of the *2025 Strategic Plan for Online Education*. The Steering Committee reviewed and approved the proposed suggested revisions to the Affordability metrics, which staff will present to the Innovation and Online Committee for discussion during the August meeting.

Supporting Documentation Included: Affordability Metrics

Facilitators/Presenters: Dr. Nancy McKee

DRAFT 8/28/2019

Affordability

Performance Indicators and Goals

Performance Indicators	*2025 Goals*
Current: Availability of reduced cost electronic textbooks or accepted open educational resources (OERs) **Proposed:** *TBD*	**Current:** Annual increase in the percentage of online courses using electronic textbooks or open educational resources **Proposed:** *TBD. Waiting for PBF metric on textbook affordability. The Steering Committee supports expanding this goal from online courses to all courses.*
Current: SUS and FCS institutions collaborate on course design and development **Proposed:** *[Combine this indicator with the one below.]*	**Current:** 50% of SUS institutions are working collaboratively with institutions in the Florida College System to share online course development tasks and resources **Proposed:** *[Combine this goal with the one below.]*
Current: SUS institutions collaborate on course design and development **Proposed:** No change	**Current:** 50% of SUS institutions are working collaboratively with each other and/or with other universities to share online course development tasks and resources **Proposed:** All universities offering online education work collaboratively to share online course development tasks and resources.
Current: Competency-based and adaptive learning approaches reduce time-to-degree and associated cost **Proposed**: Innovative strategies, which may include but are not limited to competency credit and adaptive learning, will reduce time-to-degree and enhance student success.	**Current:** 50% of SUS institutions offer competency-based or adaptive learning courses that accelerate student time-to-degree **Proposed:** SUS institutions will utilize online education or innovative strategies to enhance student success.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Innovation and Online Committee
August 28, 2019

SUBJECT: Recognition of Exemplary Online Student

PROPOSED COMMITTEE ACTION

For information

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

To promote the impact of online education in the State University System and to recognize the accomplishments of individual online students, the Committee will recognize Ms. Kathleen Smith and Ms. Kristina King, both completers of the Master of Public Administration degree through FGCU's online MPA program.

Ms. Kathleen Smith: After completing her Law Degree at the University of Florida, Ms. Smith began her law practice as an assistant Public Defender in 1990, and then in 2008 she was elected Public Defender for the 20th Judicial Circuit. Motivated to be both an outstanding public manager and an innovative leader, she enrolled in FGCU's online Master of Public Administration program and completed her degree in 2013.

Putting her MPA degree to good use, Ms. Smith has championed innovations that have won her office the prestigious Prudential Davis Productivity Award recognizing major government improvement initiatives.

Ms. Smith will attend today's meeting to briefly describe her completion of a Master of Public Administration degree through FGCU's online MPA program, as well as the ways in which her degree has enhanced her innovative management of the 20th Judicial Circuit's Public Defender's Office.

Ms. Kristina King: Having completed an undergraduate degree, Ms. King began her career in the non-profit sector as a Quality Assurance Manager for an early childcare education agency. After becoming Business Manager for Sarasota County's Solid Waste Division, she sought to strengthen her professional prospects even further through graduate work in Public Administration. Precluded by her substantial professional responsibilities from participating in a traditional campus-based program, she did so by

enrolling in FGCU's online Master of Public Administration program. She completed her degree in 2015.

Since receiving her online MPA degree from FGCU, Ms. King has moved on to become Business Manager for North Port's Department of Public Works. She also has been a recipient of the Florida City/County Management Association's "Emerging Leaders Award."

Ms. King will attend today's meeting to briefly describe her completion of a Master of Public Administration degree through FGCU's online MPA program, as well as the ways in which her degree has supported her professional advancement.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Committee members will review and approve the minutes of the Facilities Committee meeting held on June 12, 2019, at the University of South Florida.

Supporting Documentation Included: Minutes: June 12, 2019

Facilitators/Presenters: Governor H. Wayne Huizenga, Jr.

BOARD OF GOVERNORS
FACILITIES COMMITTEE
UNIVERSITY OF SOUTH FLORIDA
TAMPA, FLORIDA
JUNE 12, 2019

Video or audio archives of the meetings of the Board of Governors and its Committees are accessible at http://www.flbog.edu/.

Governor H. Wayne Huizenga, Jr., Chairman, convened the meeting of the Board of Governors Facilities Committee meeting at 4:23 p.m., June 12, 2019. The following members were present: Shawn Felton, Darlene Jordan, Sydney Kitson, Ned Lautenbach, Edward Morton, and Eric Silagy. Other Board members present included: Tim Cerio, Richard Corcoran, Zenani Johnson, Brian Lamb, Alan Levine, Steven Scott, Kent Stermon, and Norman Tripp.

1. Call to Order and Opening Remarks

Chairman Huizenga expressed appreciation for the contributions and services to the Facilities Committee made by Governors Patel and Valverde and recognized the new member of the Committee, Governor Silagy.

Chairman Huizenga called the meeting to order.

2. Minutes of Committee Meeting: Governor Huizenga

Governor Felton moved that the Committee approve the minutes of the Facilities Committee meeting held March 27, 2019, at the Florida Agricultural and Mechanical University (FAMU). Governor Silagy seconded the motion, and it passed unanimously.

3. USF College of Medicine – Space Lease with Tampa General Hospital

Chairman Huizenga explained that the USF Board of Trustees, on June 6, 2019, authorized the university to lease space to Tampa General Hospital in the still under construction College of Medicine building in Downtown Tampa. The Chairman further explained that while the lease with Tampa General Hospital does not need Board approval, USF is bringing the proposed lease forward to keep the Board informed on the impact of the lease on the state's investment in the new College of Medicine facility. Currently, the State of Florida has provided over $110M in state support for the project.

University of South Florida (USF) then presented a brief history of the project to the Committee and explained that the project is on target to open January 13, 2020. USF explained that Tampa General Hospital (TGH) has been a clinical partner, education partner, research partner, and now it is becoming a financial partner as TGH has proposed to lease approximately 25,000 square feet in the building. Approximately 6,500 square feet on the first floor will become an urgent care and imaging center with an MRI that will also be used by the researchers. The 9th floor will be part of heart health and will be part of the Heart Institute. The space on the 12th floor will be for executive health. The base rent for the initial term is $20,000,000, to be prepaid to USF on or before July 1, 2019. USF believes it has a fair value lease, and retains rights and responsibilities of a landlord.

Chief Medical Officer at USF, Dr. Mark Moseley, explained that it is no coincidence that all of the top 20 medical schools partner with top 20 academic medical centers per US News & World Report. The rise of USF Health's reputation is tied to the quality of the clinical programs, educational programs, and research programs, many of which are done in partnership with Tampa General. For the four years of medical school, 60% of students do a portion of their clinical time at Tampa General. 70% of all of the clinical trials done by USF faculty are done at Tampa General. TGH provided over $30M of support for faculty for joint medical programs that benefit the community in Tampa and our students through their growth. TGH supports over $65M in graduate medical education. That's almost 336 trainees that USF wouldn't be able to do without their assistance. Dr. Moseley explained that TGH is intertwined and linked with USF and stressed the importance of linking TGH to the Medical School and Heart Institute which ultimately builds on the collaborative collegial relationship that builds and enhances upon USF's clinical, educational, and research platforms.

When asked if this would impact residencies, Dr. Moseley advised that TGH supports 336 residents for USF at their training program and it has increased funding so it could provide more opportunities and more sites, but that the increase in residencies is not directly tied to the lease of the space.

Chairman Huizenga explained medical center's background. He further stated that, in order to make this project happen, President Genshaft committed to raising $40M privately, because this was above and beyond the scope of what was originally proposed in moving the project downtown. When it was originally proposed, USF was going to have two floors of shelled space for future use. Then an opportunity came to add two more floors to the building and that was going to be roughly $20.3M to fund the two floors. Governor Levine further explained that the lease was a routine lease between a hospital and an owner of a building and that, since the lease is long term and TGH is at total risk for the maintenance of the space, USF has offloaded some of the carrying cost to the building. Chairman Huizenga made the point that the Board of

Governors agreed the location was great and that USF honored the raising of the $40M, that they are paying for the two additional floors through a lease with Tampa General Hospital that was at market value, and that they have one and a half to two floors of shell space to be built-up for future use.

Chairman Huizenga explained that the goal was to be transparent and explain what was going on. Chairman Huizenga asked if there were any questions. There being none, the Chairman explained that they are all in agreement that the location was great and an elimination of traveling for the medical students made sense.

4. University of Florida Educational Plant Survey

Chairman Huizenga recognized Assistant Vice Chancellor for Finance and Facilities, Mr. Chris Kinsley, to present University of Florida's (UF) Educational Plant Survey. Mr. Kinsley advised that the Educational Plant Surveys (EPS) are fully vetted, not only by Board staff, but also staff from other universities, not just the institution being surveyed.

Mr. Kinsley highlighted the development of an application which has created a common platform and has changed the process from a manual process to a more consistent process. Mr. Kinsley also explained that the application is flexible, which will assist in satisfying the requirements of Senate Bill 190 to produce a report for improvements, efficiencies, and changes to the EPS process. This software has enabled the review of various modeling and scenarios. The EPS reports provide a lot of great data and we continue to work to make the report more digestible and more useful to the Board of Trustees. Mr. Kinsley advised that his next goal, now that we have really strong data, is to make it available for executive decision making.

For the UF Survey, Mr. Kinsley highlighted the Site Improvement recommendations, Remodeling recommendations, and one big continuing survey recommendation (the Data Science and Information Technology Building) which has received two years of funding from the Legislature. Mr. Kinsley pointed out the Music Building, the Utility Plant, the Florida Natural Museum, the Whitney Center, and the Demolition recommendations. Mr. Kinsley also noted that UF has to wrestle with how it deals with very diverse matters and that the prior survey five years ago contained a much more extensive list, weighted more toward new projects, with far fewer demolition and renovations. Mr. Kinsley commended UF for moving in a different direction on this survey with a smaller list, more focused on something that is going to be, in the long term, more sustainable.

Chairman Huizenga discussed additional information related to the EPS Process. There being no further discussion, Chairman Huizenga called for a motion to approve the University of Florida Educational Plant Survey. Governor Lautenbach moved to

approve, Governor Jordan seconded, and the motion passed with approval by all members present.

5. New College of Florida Educational Plant Survey

Chairman Huizenga recognized Mr. Kinsley to present New College of Florida's (NCF) Educational Plant Survey. Mr. Kinsley discussed the Site Improvements recommendation, which includes a Land Acquisition recommendation. Additionally, Mr. Kinsley noted more Remodeling and Renovation recommendations, starting with the Old Caples House. Mr. Kinsley noted that the core of the campus at New College of Florida is a collection of 1930's and 1940's era facilities originally built for private residential use by some of the Ringling Brothers, which is now New College of Florida. The types of properties at NCF require extensive upkeep and some do need extensive remodeling and renovation. Mr. Kinsley noted that New College may appear overbuilt, and also noted that probably over 50% of the college is in need of remodeling and renovation as the space was not purposely built for education, however, it is unique, but it does need work. Lastly, Mr. Kinsley advised that we continue to recommend the Multi-Purpose Building to provide a large assembly area, as well as demolition of Palmer Court.

Chairman Huizenga opened the floor for questions. There being none, the Chairman called for a Motion to Approve the New College of Florida Educational Plant Survey. Governor Kitson moved to approve, Governor Jordan seconded, and the motion passed with approval by all members present.

6. Shared Initiatives Update

Chairman Huizenga stated that the Shared Initiatives Update will be deferred to the August meeting.

7. Modification of the 2020-21 LBR Process

Chairman Huizenga advised that Senate Bill 190 requires, among other things, that the Board adopt a points-based methodology for scoring the State University System (SUS) SUS Public Education Capital Outlay (PECO) projects in preparing the SUS three-year PECO list. The new law provides for considerable flexibility to the Board in establishing its methodology, however, it will effectively replace the PECO project presentation in the traditional Board project selection process. The university PECO lists are due July 1 and staff can score and develop a draft ranking for initial consideration by the Facilities Committee in August. The October Workshop will then be the final lockdown for the points system and the LBR.

Governor Huizenga called on Mr. Kinsley to explain the draft methodology. Mr. Kinsley explained that the points system was applied to the 2018 PECO, creating a Preliminary Selection Test Group to determine how the results compared to the projects the Board prioritized. Mr. Kinsley explained in detail the six criteria established by Senate Bill 190 and how the ranking for each of the criteria was developed and applied. Mr. Kinsley also explained that projects can only get on the list if it has been previously funded by the Legislature, if it is the number one or number two priority listed in each university's Capital Improvement Plan and if projects have an educational plant survey recommendation.

Mr. Kinsley explained that the goal in doing this process was to create something that was simple, included objective items that involved scoring based on verifiable data that we already have, and was comparable for each school, thereby creating consistency in the way the process is completed. The formula has therefore been created to assess each of the criteria and space needs met. Mr. Kinsley stated that Board staff is currently taking feedback from the universities and that more will be reported to the committee in the future, particularly once the lists of projects are received from the universities.

Mr. Kinsley stated that this project is still underway and that this would have been recommended as a workshop topic but, due to the limited timeframe, this must be expedited since the PECO list should be adopted at the October meeting.

Mr. Kinsley made additional remarks regarding the structure of the Preliminary Selection Test Group sheet, pointing out the correlation and differences in comparison to last year's priority selection, adding that no attempt was made to replicate any prior processes.

Chairman Huizenga opened the floor for comments. He noted that Mr. Kinsley is available for any further discussion outside of the meeting and noted that this year's submission of projects will be used and presented in the August meeting. Mr. Kinsley, in response to a question, pointed out that there has been an exchange of thoughts between staff from the Division of Colleges and the Board of Governors. While the methodology is not going to be the same between the two, we would like to keep them similar where it makes sense. Mr. Kinsley pointed out that for the past four or five years there has been a workshop where the universities presented their projects. Due to the points system, the presentations will not be as necessary. Governor Huizenga explained that it would be worthwhile to obtain presentations on the new projects once the new list is complete. Further discussion ensued regarding the points system, visiting projects, and the potential outcomes of the selection group and funding.

8. Florida International University (FIU) Biscayne Bay Campus Pool Repairs

Chairman Huizenga called on Mr. Kinsley to provide some background into this CITF project. Mr. Kinsley explained that this is to authorize the reimbursement of up to $2,000,000 in Activity and Service (A&S) fee funds; expended for repairs to FIU's Aquatic Center from the Capital Improvement Trust Fund (CITF) fees allocation and corresponding reduction of the same amount in CITF fees previously approved for by the Board for the Graham University Center expansion. The university became aware of the need for emergency repairs on the pool. Mr. Kinsley advised that this is a student activity, so this is appropriate for CITF, and that the action that is being requested is to authorize FIU to fund shift from A&S to the Aquatic Center project.

Chairman Huizenga called for a Motion to Approve the use of Capital Improvement Trust Fund (CITF) funds for the Florida International University Aquatic Center Repairs and Renovation and amend the Board's prior CITF project list to include this project. Governor Jordan moved to approve, Governor Lautenbach seconded, and the motion passed unanimously.

9. Concluding Remarks and Adjournment

There being no further business, Chairman Huizenga adjourned the meeting at 5:21 p.m. (ET), on June 12, 2019.

Chris Kinsley, Assistant Vice Chancellor
Facilities

H. Wayne Huizenga, Jr., Chair

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Facilities Committee
August 28, 2019

SUBJECT: 2019-20 Capital Improvement Fee Trust Fund (CITF) Allocation

PROPOSED COMMITTEE ACTION

Approve the 2019-20 university CITF project allocations and authorizing the Chancellor to approve adjustments within a university's CITF allocation as may be requested by the university board of trustees.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Senate Bill 2500 General Appropriations Act

BACKGROUND INFORMATION

The 2019 General Appropriations Act included funding of $44,000,000 for projects to be funded from the Capital Improvement Fee Trust Fund, with proviso specifying that:

> *Funds in Specific Appropriation 17 shall be allocated by the Board of Governors to the universities on a pro rata distribution basis in accordance with the Board of Governors Legislative Budget Request for funding from the Capital Improvements Fee Trust Fund, as approved January 31, 2019. Each board of trustees shall report to the Board of Governors the funding it allocates to each specific project.*

Attached is a draft pro rata distribution for Board consideration and the specific project(s) being requested by the university at this time.

In some instances, completion of the desired project may require additional funding. The Board has not yet determined what amount will be requested during the 2020-21 Legislative Budget Request cycle.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Facilities Committee
August 28, 2019

SUBJECT: Legislative Report on Space Needs Calculation Methodologies

PROPOSED COMMITTEE ACTION

For Information Only

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Senate Bill 190 (2019)

BACKGROUND INFORMATION

The 2019 Legislature passed Senate Bill 190 and Governor DeSantis signed the bill into law. Related to the State University System, Senate Bill 190, Section 12(e), requires that:

> *The Board (Board of Governors) shall review its space need calculation methodology developed pursuant to section 1013.31, Florida Statutes, to incorporate improvements, efficiencies, or changes. Recommendations shall be submitted to the chairs of the House of Representatives and Senate Appropriations Committees by October 31, 2019, and every three years thereafter.*

To assist Board staff in conducting this review, a survey has been developed to gather information on each university's policies and procedures for the assignment and usage of space and to receive recommendations to improve and make more efficient the Board's existing space need calculation methodology. In addition, Board staff have visited four representative universities and conducted face-to-face interviews with university leadership in academic affairs, facilities, and space management to further learn about the university processes and current and projected space needs.

Dr. Jon Rogers will provide an update on this study to the Committee. A draft report will be available for discussion during the October 3 meeting of the Facilities Committee, with the final report being presented for Board approval at its October 30, 2019, meeting.

Supporting Documentation Included: Space Needs Calculation Methodology Survey

Facilitators/Presenters: Dr. Jon Rogers, Assistant Vice Chancellor for Special Projects

Space Needs Calculation Methodology in the State University System
2019 Survey

The 2019 Legislature directed the Board of Governors to: *review its space needs calculation methodology, developed pursuant to section 1013.31, Florida Statutes, to incorporate improvements, efficiencies, or changes.* To assist the Board in this work, please respond to the following questions:

Policy / Efficiency Questions

1. Do board of trustees or institution policies exist relating to space assignment and usage? Are there institution goals relating to optimizing the use of space? If yes, provide a brief description.

2. Should Board of Governors regulations specify space management policies and procedures, including metrics and benchmarks, that will optimize the use of instructional and research space and promote efficiency in the State University System (SUS)? Explain your answer.

3. Each SUS institution is currently assigned the same space need factor for each of the nine education & general (E&G) space categories, regardless of mission. Should the Board of Governors adopt a policy allowing each university to establish unique space factors based on mission? Explain your answer.

4. Describe any technological tools that are used to monitor the use of academic space.

5. Describe challenges that exist at your university in the assignment of space and efforts to optimize space usage.

Process / Educational Plant Survey Questions

6. In the assignment of E&G space at your university, what is the role of:
   a. The university provost?
   b. The college/division deans?
   c. The department heads?
   Briefly describe the process.

7. The Educational Plant Survey:
   a. How should the Educational Plant Survey be utilized to more effectively determine the adequacy of quality E & G space for current and projected student needs?

b. Describe how the Educational Plant Survey findings are reflected in your university's Accountability Plan in relation to the goals of the university.
c. Should the SUS adopt the national standard for measuring FTE for the Educational Plant Survey? (This would result in increasing the space needs formula by 25%)? Explain your answer.

National Standards and Definitions

NOTE: Definitional references below are taken from the 2006 edition of the *"Postsecondary Education Facilities Inventory and Classification (FICM) Manual."* See attached section.

8. Should the SUS adopt the national standard definition of "Unsatisfactory" space and exclude such space from the inventory of "Satisfactory" space? Explain your answer.

9. Should the SUS adopt the national "suitability" criteria for buildings, and allow institutions to optionally record the suitability of space as a data point? Explain answer.

Space Needs Calculation Methodology

10. You are invited to provide recommendations regarding the current space needs calculation methodology to make the process more accurate, efficient, and meaningful.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Facilities Committee
August 28, 2019

SUBJECT: 2020-2021 State University System (SUS) Fixed Capital Outlay (FCO) Legislative Budget Request (LBR)

PROPOSED COMMITTEE ACTION

Review and approve the 2020-2021 SUS Fixed Capital Outlay Legislative Budget Request; Update on the Initial Public Education Capital Outlay (PECO) Points List.

Approval is recommended by the Chancellor

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

The requested budget provides the State University System of Florida continued capital outlay support and has been prepared in accordance with statutory requirements and guidelines adopted by the Board of Governors. All university fixed capital outlay legislative budget requests have been approved by the institutional boards of trustees.

In summary, the staff recommendation to the Board is adoption of a lump sum budget as the initial budget request for 2020-2021. The proposed amounts are in accordance with the official estimated amounts as provided by Florida law. A workshop is scheduled for October 3, 2019, at the University of Central Florida. At the workshop, the Committee will review the PECO projects using the preliminary selection group process pursuant to Senate Bill 190 (the points process).

SB 190 Process:

SB 190 requires the use of a points-based project ranking system, and establishes 6 ranking criteria. However, SB 190 leaves it up to the Board to determine the actual point values assigned to each metric. The staff recommended point scale is as follows:

	Maximum Points
1. Prior Legislative Funding	20 Points
2. Maintenance and Infrastructure	15 Points
3. Space Needs Met	25 Points
4. University Priority	5 Points
5. Renovation or Replacement	15 Points
6. Eligibility Points	20 Points
Total Points	100 Points

Per SB 190, Criteria 1 and Criteria 6 are mutually exclusive. The Space Needs Met metric and Renovation/Replacement/Maintenance are not typically found in the same project. These and other factors indicate that the maximum project score is around 50 points.

As both the process and points values assigned are preliminary, each university has been given the opportunity to amend their Capital Improvement plans. Importantly, this public and transparent process allows for the correction of any out-of-date or incorrect information on the part of either Board or university staff.

The Facilities Committee will review both the 1) methodology and 2) all PECO point projects at its meeting scheduled for October 3, 2019. In as much as the methodology drives the points values, the Committee may (or may not) need to meet briefly later in the month to recommend a final comprehensive LBR for full Board approval October 30th.

Specific Fixed Capital Outlay Appropriation Requests

- **[ADOPT $110,155,073M] The PECO 2020-2021 SUS Five-Year Fixed Capital Outlay Request -**

  [ADOPT $44M] Request for Capital Improvement Trust Fund (CITF) Allocation - represents an amount based on current CITF revenue projections, with a base assumption of no future fee increases. The pro-rata distribution will be adopted at a future meeting of the Board.

- **[Information] Preliminary Selection Group -** represents an assessment of: 1) projects deemed potentially eligible for funding; and 2) the preliminary points assigned to eligible projects.

***** In the event of a tie score between projects, the project with the lowest Remaining PECO Need will be given priority.

****** Includes private gifts/donations, funding raising, etc., generally speaking. In the case of FPU's Applied Research Center, the Non-PECO funding represents Carryforward funds, as authorized by F.S. 1013.74(6).

Footnotes

1) A new construction, remodeling or renovation project that has not received prior appropriation will not be considered for inclusion on the prioritized PECO list unless:
   1. A plan is provided to reserve funds in an escrow account, specific to the project, into which is annually deposited 1% of the total value of the building for future maintenance;
   2. Sufficient capacity within cash and bonding estimate (per Revenue Estimating Conference) to accommodate the project within the 3-year PECO funding cycle; and
   3. The project has been recommended by an Ed Plant Survey (s. 1013.31).
2) In the case of multiple projects per university, the cumulative Total Needs Met should not exceed the university's Total Unmet Space Need.

Rev. 7/26/19

I:/Facilities/Working/PECO/Points System/Methodology

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Facilities Committee
August 28, 2019

SUBJECT: Proposed Amendment to Board of Governors Regulation 14.0025 Action Required Prior to Fixed Capital Outlay Budget Request

PROPOSED COMMITTEE ACTION

Action - Notice of Intent to Amend Board Regulation 14.0025

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

This regulation was amended on March 27, 2008, to specify that budgets approved by the board of trustees, rather than the Chancellor, and would serve as the basic planning documents for facility construction:

> *Building programs approved by the university president, and budgets approved by the ~~Chancellor~~ university board of trustees, shall serve as the basic planning documents for development of plans and specifications for construction.*

The proposed amendments re-establishes a role for the Chancellor and provides for Board approval of fixed capital outlay budgets in parallel to the approval of university operating budgets as provided in Board Regulation 9.007, State University Operating Budgets:

- Specifies that projects requested for inclusion on the the Board of Governors' three-year Public Education Capital Outlay (PECO) Priority List must be supported by an educational plant survey.
- Specifies that the Chancellor's Office will provide a format for the fixed capital outlay budget to be approved by the university board of trustees.
- Provides that the fixed capital outlay budget approved by the trustees must be submitted to the Board for approval (parallels the process for the operating budget).
- Authorizes the Chancellor to approve fixed capital outlay amendments up to $5,000,000.

The proposed draft has been provided to the universities for feedback.

Supporting Documentation Included: Regulation 14.0025

Facilitators/Presenters: Mr. Chris Kinsley

14.0025 ~~Action Required Prior to~~ Fixed Capital Outlay Budget ~~Request~~

(1) All fixed capital outlay projects ~~No new construction or remodeling project shall be~~ requested by a university for inclusion on the ~~first year of the 3 year,~~ PECO-eligible priority list must have ~~without being recommended in~~ an educational plant survey. Fixed capital outlay ("FCO") is a budgeting category which includes 1) authorized PECO projects; 2) CITF projects; 3) authorized projects from E&G carryforward; 4) projects authorized pursuant to the Board of Governors Debt Management Guidelines; and any other FCO projects as designated in Florida Statutes.

(2) The university is responsible for the preparation of the building program. The program shall be consistent with the university strategic plan, academic and facilities master plan, and shall include the project budget and the building codes applicable to the project.

(3) The university president shall have the responsibility for the building program review and approval to assure compatibility with the institution's approved strategic plan, master plan, educational plant survey and with space utilization criteria. Building programs approved by the university president, and budgets approved by the university board of trustees shall serve as the basic planning documents for development of plans and specifications for construction.

(4) Proposals for fixed capital outlay projects to be funded by Capital Improvement Fees shall be prepared by the university, and submitted to the Board of Governors. Each proposed project shall be approved by the university president after consultation with the student government association. For the purpose of this regulation, "consultation" is defined as an ongoing dialogue with the student body president prior to developing the university proposal. An attachment containing any objections and alternatives, and stating that both the university president and the student government association have reviewed the project proposals, shall be included in the proposal.

(5) Effective for the 2020-2021 fiscal year, each university president will prepare a fixed capital outlay budget for approval by the board of trustees in accordance with the instructions, guidelines, and standard formats provided by the Chancellor. The fixed capital outlay budget must include both new construction and previously approved projects which have not yet been completed. Each university board of trustees shall adopt an annual fixed capital outlay budget that must be presented to the Board of Governors for approval by the date established by the Chancellor.

(6) Fixed capital outlay project expenditures may be made by the university, subject to approval of the board of trustees. Budget approval by the Board of Governors, or budget amendment approval by the Chancellor as provided in section (7) is required.

Such approvals remain in effect for the life of the project; and do not expire at the end of the fiscal year.

(7) The Chancellor is hereby authorized to approve amendments to the fixed capital outlay budget as approved by the university board of trustees in a cumulative amount not to exceed $5,000,000. Cumulative amendments in excess of $5,000,000 require approval of the Board of Governors.

(8) The fixed capital outlay budget must include provisions for any new construction; construction work in progress; and the maintenance, repair, remodeling and renovation of the existing educational plant; ancillary plant and auxiliary facilities subject to the following definitions:

(a) "New construction" means any construction of a building or unit of a building in which the entire work is new or an entirely new addition connected to an existing building or which adds additional square footage to the space inventory.

(b) "FCO Maintenance and Repair" means those funds designated for the upkeep of university facilities, site and site improvements In many instances, planned expenditures may be appropriately budgeted from either the FCO Maintenance and Repair category or the Plant Operations and Maintenance category.

Roof or roofing replacement short of complete replacement of membrane or structure; repainting of interior or exterior surfaces; resurfacing of floors; repair or replacement of glass; repair of hardware, furniture, equipment, electrical fixtures, and plumbing fixtures; and repair or resurfacing of parking lots, roads, and walkways are all examples of the types of expenses that could be charged to either FCO Maintenance and Repair or Plant Operations and Maintenance.

The term "FCO maintenance and repair" does not include custodial or grounds-keeping functions, or recurring utility charges such as electricity, these are more appropriately charged to Plant Operations and Maintenance.

~~or renovation except for the replacement of equipment with new equipment of equal systems meeting current code requirements, provided that the replacement item neither places increased demand upon utilities services or structural supports nor adversely affects the function of safety to life systems.~~

(c) "Remodeling" means the changing of existing facilities by rearrangement of spaces and their use and includes, but is not limited to, the conversion of two classrooms to a science laboratory or the conversion of a closed plan arrangement to an open plan configuration. The university may not use current year E&G Operating funds for remodeling projects.

(d) "Renovation" means the rejuvenating or upgrading of existing facilities by installation or replacement of materials and equipment and includes, but is not limited to, interior or exterior reconditioning of facilities and spaces; air-conditioning, heating, or ventilating equipment; fire alarm systems; emergency lighting; electrical systems; and complete roofing or roof replacement, including replacement of membrane or structure; and upgrades and replacement of campus infrastructure, including, but not limited to roads, water, sewer, gas, steam, chilled water loops, and electrical systems. The university may not use current year E&G operating funds for renovation projects.

(9) University boards of trustees may budget the following fixed capital outlay categories at a summary level by fund source, not to exceed $1,000,000 per project:

(a) FCO Maintenance and Repair Projects
(b) Remodeling Projects
(c) Renovation Projects

If the university opts to budget at the summary level, it must provide a detailed update on actual spending by project on an annual basis in connection with the FCO Budget approval; or as may be otherwise requested by the Board or the Chancellor.

~~(10) Notwithstanding any other provision of Board regulations, fixed capital outlay project budgets approved by the Board of Governors prior to the effective date of this regulation remain in effect until June 30, 2021.~~

Authority: Section 7(d), Art. IX, Fla. Const., History–Formerly 6C-14.0025, 1-24-89, Amended 1-13-99, Amended and Renumbered as 14.0025, 3-27-08, Amended 11-21-13, _____.

Facilitators/Presenters: Governor Cerio

MINUTES
BOARD OF GOVERNORS
STATE UNIVERSITY SYSTEM OF FLORIDA
AUDIT AND COMPLIANCE COMMITTEE MEETING
UNIVERSITY OF SOUTH FLORIDA
TAMPA, FL
June 13, 2019

Video or audio archives of the meetings of the Board of Governors and its Committees are accessible at http://www.flbog.edu/.

Chair Tim Cerio convened the meeting of the Audit and Compliance Committee on June 13, 2019, at 8:34 a.m., in the Marshall Student Center Ballroom on the campus of the University of South Florida in Tampa, Florida. The following Audit and Compliance Committee members were present: Tim Cerio, H. Wayne Huizenga Jr., Patricia Frost (phone), Alan M. Levine, Ed A. Morton, Eric Silagy, and Kent Stermon. The following members of the Board were also present: Shawn Felton, Zenani D. Johnson, Sydney Kitson, Brian Lamb, Ned C. Lautenbach, Steven Scott, and Norman D. Tripp.

1. Call to Order

Mr. Cerio called the meeting to order.

2. Approval of Minutes

Mr. Morton motioned that the Committee approve the minutes of the Audit and Compliance Committee meeting held March 28, 2019, as presented. Mr. Huizenga seconded the motion. The minutes were approved.

3. OIGC Risk Assessment and Audit Work Plan 2019-2020

Ms. Leftheris presented the Committee with the draft *Office of Inspector General and Director of Compliance 2019-2020 Work Plan*, which is required to be developed and presented annually for the Board's consideration and approval.

Ms. Leftheris explained the work plan is risk-based to provide the most effective coverage of Board office operations and Office of the Inspector General and Director of Compliance (OIGC) System responsibilities. It will guide OIGC staff activities for the upcoming fiscal year and contains two planned audit projects. The first is a compliance audit of Take Stock in Children funding, and the second is an operational audit of the academic approval process with the Board of Governors. The OIGC intends to continue outreach to promote itself as a resource to report abuse, fraud, and waste within the

universities as recommended by the Florida House of Representatives Public Ethics and Integrity Committee. The OIGC is also seeking accreditation for its investigative function from the Florida Commission on Law Enforcement Accreditation.

Mr. Huizenga motioned to approve the work plan, and Mr. Levine seconded it. The Committee approved the OIGC's 2019-2020 Annual Work Plan and moved it to the full Board of Governors for their approval consideration.

4. UCF E&G Funds Misuse Investigative Report Update

Mr. Cerio provided the background on the continued investigation into the University of Central Florida's (UCF) misuse of Education and General (E&G) Funds. He stated that during the January 31st Committee meeting, Committee members approved a second investigation into the university's use and/or transfer of E&G funds for capital projects beyond that of the Trevor Colbourn Hall construction project. Mr. Cerio noted that this investigation is in progress and being conducted by the law firm, Bryan Leighton Cave Paisner (BCLP) with oversight by Board of Governors' Inspector General, Julie Leftheris. Ms. Leftheris introduced BCLP's lead investigator, Joey Burby, so that he could provide an update on the investigation.

Mr. Burby noted that BCLP is being assisted by the firm PricewaterhouseCoopers (PwC) in the investigation. He cautioned that the information he was reporting was preliminary and subject to change. Mr. Burby expressed that there has been significant progress since the previous Committee meeting because UCF staff have provided substantial amounts of both financial data and internal correspondence. He said that BCLP has begun reviewing this documentation and commended UCF for their cooperation. Mr. Burby explained that witness interviews had begun and that over 25 interviews had been conducted to date. He noted that, however, the people with the most knowledge regarding the subject matter of the investigation were uncooperative by either ignoring or declining BCLP's request for interviews. These included former staff members: former President John Hitt, former President and Provost Dale Whittaker, former Provost Tony Waldrop, former CFO Bill Merck, former Associate Vice President for Finance Tracy Clark, and former Associate Vice President for Facilities and Safety Lee Kernek. He explained that this lack of cooperation could prevent the investigators from fully finding out how the capital projects under investigation came to be improperly funded.

Mr. Burby noted that he expected to have his report completed before the next Committee meeting in August. He explained that he consulted with Ms. Leftheris and Chris Kinsley, the Board of Governors Assistant Vice Chancellor for Finance and Facilities, to create the methodology for the investigation. The methodology involved an analysis of all fund transfers of any type to any UCF construction project during the

period under review. Cumulative transfers totaling two million dollars or more was the threshold to determine in-scope capital projects.

In referring to the table of "Preliminary Findings: List of Projects in Scope" (provided in the meeting materials), Mr. Burby explained that eleven capital projects were determined to be in scope; five completed, and six still in progress. Mr. Burby explained that the amount of E&G dollars spent and when those dollars were spent was still being determined, and would be included in BCLP's final report. Seven of the projects involved new construction as opposed to renovation projects. Mr. Burby noted that the Global UCF project was not initially identified as in scope, but after considering the improperly distributed investment earnings from E&G funds to the project, it became in scope. Mr. Burby noted that the Heating and Power Plant project used an internal loan of E&G funds that was intended to be paid back from future "energy" savings according to a memorandum of understanding signed by former CFO Bill Merck and Interim Provost Diane Chase in 2014. He explained that this matter is still being investigated.

Mr. Burby explained that regarding the eleven capital projects, there was approximately 61.3 million dollars in E&G funds transferred. He noted that these were almost all carryforward funds and that some transfers seemed to be timed so that UCF did not have to report them to the Board. Mr. Burby explained that including Trevor Colbourn Hall, approximately 100 million dollars in E&G funds were improperly transferred to capital projects. He said that BCLP is reviewing documentation and conducting interviews to determine how the use of E&G funds was determined, who made these determinations, and why. BCLP is also seeking to determine if E&G funds were replaced or returned with the appropriate funds.

When asked, Mr. Burby explained that without the ability to compel former staff members to interview, the full depth of the misuse would be difficult to determine. Committee members discussed the Board's authority over this situation and discussed seeking subpoena authority in the future.

In response to the discussion, Mr. Burby noted that UCF's Board of Trustees' members were being cooperative and supportive. He reiterated that he expects the BCLP report will be completed before the August Committee meeting.

5. <u>USF Report of Findings, Review into Use of Carryforward Funds in the Construction of the Dr. Kiran C. Patel Center for Global Solutions (Patel Center)</u>

Ms. Leftheris introduced USF's Board of Trustees Audit and Compliance Committee Chair, Nancy Watkins, and USF's Chief Audit Executive, Virginia Kalil, to provide an

update on the review into the use of carryforward funds for the construction of the Patel Center. Ms. Leftheris noted that Ms. Kalil conducted the review under Ms. Watkins' oversight.

Ms. Watkins presented the review findings and explained the three reports were released. The first report was conducted to confirm the Patel Center's misallocation of funds. This report revealed that approximately 5.7 million dollars of E&G funds were transferred for the Patel Center project. Ms. Watkins noted that due to the projects' age and the lack of contact with employees who had worked on them, they relied on empirical rather than anecdotal evidence. Ms. Watkins noted that the accounting system from the period the Patel Center was built has been replaced and explained that this misuse of funds occurred due to lack of checks and balances between departments. She noted that this lack of internal control has been corrected. Ms. Watkins explained that the funds have been repaid and that there was no evidence of intentional misuse or personal or private inurement from the misuse of funds.

Ms. Watkins explained that the second report reviewed all capital projects. She noted that there were 51 capital projects; 30 of those were in scope. She explained that the auditing department validated the funding source for all 51 projects.

The third report reviewed the current procedures and internal controls in place at USF as a preventative measure. Ms. Watkins noted that the report deemed the controls adequate and that there will be follow-up on seven medium risk items (listed in Appendix B). When asked, Ms. Kalil explained that all corrective actions have begun and should be completed within three to six months. Mr. Lamb and other Committee members encouraged USF to complete their corrective actions before the August Committee meeting.

6. Florida Agricultural and Mechanical University Intercollegiate Athletics Cash Deficit

Ms. Leftheris provided a history of the OIGC's monitoring activities regarding the athletics program cash deficit. She introduced FAMU's Board of Trustees Chair, Kelvin Lawson, to update the Committee.

Mr. Lawson explained that FAMU's Vice President of Audit, Joe Maleszewski, was also in attendance to answer Committee members' questions. Mr. Cerio noted the presentation provided by Mr. Lawson and Mr. Maleszewski had been updated and was not the same version as the one in the meeting materials. Mr. Lawson explained that the presentation was changed to reflect the most recent events that occurred regarding the athletics cash deficit.

Mr. Lawson provided a background of the athletics cash deficit. He noted that FAMU was in the midst of a 12-year repayment plan, which began in September 2016, to repay seven million dollars to their auxiliary programs. The corrective action plan includes a three-year review process. Every month for the first year, Chair Lawson, President Robinson, the university's CFO, and the university's athletics director met internally to review the athletics program budget. Then they met with Board of Governors staff to review it with them.

Year two of the corrective action plan requires a less aggressive review process, but they still meet with Board of Governors staff, which now includes Mr. Cerio as the Audit and Compliance Committee Chair. Additionally, the plan requires the CFO and the President to approve any transfers from auxiliaries to athletics should there be a reason to do so.

Mr. Lawson explained that the control of the athletics budget was removed from the athletics department to the financial leadership team. He noted that the overall athletics budget is 10 million dollars and that there is currently a $313,000 gap between the plan's budget and the plan's incoming revenue. He explained FAMU's four-part plan to close the gap. They are still pursuing their athletics fund-raising tour; they are continuing the Investing in Champions campaign; they are working with the Boosters to generate additional revenue; and they are collecting on outstanding debts such as royalty payments, Investing in Champions commitments, and outstanding sponsorships. The goal is to zero-out the budget at the end of the academic year.

Regarding the internal audit staff's recent discovery of unauthorized funding sources still being used to cover the athletics cash deficit, Mr. Lawson explained that this is unrelated to the recent news about FAMU's NCAA penalties. He said that corrective actions related to the former include the resignation of FAMU's CFO and the replacement of positions from the CFO to the budget officer. He noted that there were additional safeguards put into PeopleSoft, the university's accounting system, and that FAMU is hiring an outside firm to perform an extensive audit. He estimated that 1.5 to 3 million dollars of auxiliary funds have been misused for this purpose. Although they had a good plan in place, as he had described earlier, that required the CFO and President to sign off on any transfers from auxiliary operations to athletics, Mr. Lawson said the funds were transferred without obtaining the required signatures. President Larry Robinson stated that he did not why the approvals did not follow the established procedures.

Mr. Maleszewski explained that the external firm they select to conduct additional audit or investigative work will have the final report completed by August 1st. He noted that this practice could have been happening since the first year the corrective plan was put into place and added they have put a notification system in place so that he will be automatically notified of any auxiliary funds transfers. Mr. Stermon stated that this

occurrence was unacceptable. Mr. Lawson concurred with Mr. Stermon's statement and noted that leadership is taking swift corrective action.

7. OIGC Updates

Due to time constraints, Mr. Cerio asked Ms. Leftheris to provide her report regarding OIGC updates at the next Audit and Compliance Committee meeting in August.

8. Concluding Remarks and Adjournment

Mr. Cerio asked Board members if anyone had any questions or comments. Hearing none, the Audit and Compliance Committee was adjourned at 9:45 a.m.

DRAFT

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Audit and Compliance Committee
August 28, 2019

SUBJECT: State University System of Florida Audits Summary

PROPOSED COMMITTEE ACTION

Information only

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

The Board of Governors Inspector General and Director of Compliance, Julie Leftheris, will provide Committee members with a summary of the audit coverage for fiscal year 2018-2019 for State University System of Florida universities.

Supporting Documentation Included: PowerPoint Presentation

Facilitators/Presenters: Ms. Julie Leftheris

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Audit and Compliance Committee
August 28, 2019

SUBJECT: USF Carryforward Funds Follow-up

PROPOSED COMMITTEE ACTION

Information only

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

The Inspector General and Director of Compliance, Julie Leftheris, will provide Committee members with an update of the University of South Florida's corrective actions implementation in response to the medium-risk recommendations from the review of the misuse of E&G funds for the Dr. Kiran C. Patel Center for Global Solutions (the Patel Center). The university reported that corrective actions on those items might take three to six months to implement. Committee members urged the university to fully implement corrective actions by the August meeting.

Supporting Documentation Included: Follow-up Status Table

Facilitators/Presenters: Ms. Julie Leftheris

UNIVERSITY OF SOUTH FLORIDA
CONSTRUCTION ACCOUNTING AND CONTROL STRUCTURE
RECOMMENDATION STATUS
AUGUST 2019

	Statement of Risk	Recommendation	Status	Comments
1	Further guidance was needed regarding the allowable uses of Education & General (E&G) funds on construction projects.	The university should seek formal written clarification from the Board of Governors (BOG) as to exactly what types of E&G carryforward expenditures, and in what amounts, are viewed as allowable on construction projects by both the BOG and the legislature, and develop and implement procedures accordingly so that the university can ensure strict compliance with all requirements.	In Progress 10/1/19	The Chief Financial Officer has requested formal written clarification from the BOG and is awaiting finalization of an update to BOG regulation 9.007 State University Operating Budgets. This update is expected to provide more guidance and clarity as to what types and amounts of E&G carryforward expenditures are viewed as allowable on construction projects by both the BOG and the legislature. Upon finalization of the updated regulation, the university will develop and implement procedures accordingly to ensure compliance with all requirements.
2	Financial Accounting System (FAST) functionality was not being utilized to associate related projects in the project costing (PC) module.	The university should implement a means of identifying and tracking all of a construction project's financial transactions within FAST.	Complete 7/1/19	All new capital projects are established using a singular FAST PC Project ID to associate related appropriations and alternate funding sources.
3	Tracking of costs by Activity ID and fund needs to be improved.	The university should develop and implement procedures for budget to actual tracking of all construction costs by both Activity ID and funding source.	Complete 7/1/19	Procedures for budget to actual tracking of all construction costs by both Activity ID and funding source have been developed and implemented.
4	Monitoring authorization of expenditure transfers, subject to USF System Policy 0-100, needs to be improved.	The university should ensure all expenditure transfers are subject to BOT approvals consistent with the intent of USF System Policy 0-100.	Complete 7/1/19	Procedures have been established and implemented to ensure expenditure transfers are subject to approvals consistent with the intent of USF System Policy 0-100.
5	Monitoring of expenditures outside of the Construction Fund should be performed to ensure a Project ID is associated with all construction expenditures.	The university should develop and implement procedures which require that all construction costs, regardless of funding source, be associated with an appropriate FAST PC Project ID. Monitor for compliance with this procedure.	Complete 7/1/19	The university has procedures that require all construction costs, regardless of funding source, be associated with an appropriate FAST PC Project ID. Compliance monitoring protocols have been developed.
6	There was no formal communication of roles and responsibilities for construction projects accounting among the various decentralized facilities units.	The university should establish a consistent control structure for construction accounting activities throughout the USF System.	Complete 5/1/19	The university has established a consistent control structure for construction accounting activities throughout the USF System. Each decentralized construction administration unit is responsible to ensure fiscal control in accordance with the established structure.
7	Financial controls over projects being managed by USF Health (USFH) Operations and Facilities Management needs to be improved.	The university should enhance the College of Medicine Business Office construction accounting control structure, or else transfer USFH construction accounting functions to ASBC.	Complete 5/1/19	Training on the consistent control structure referenced in recommendation 6 above was provided to the College of Medicine Business Office and other decentralized construction administration units in March, 2019. The College of Medicine Business Office will ensure fiscal control in accordance with the established structure.

SUBJECT: UCF E&G Funds Misuse Investigative Report Update

PROPOSED COMMITTEE ACTION

Information Only

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Joey Burby, the lead investigator and partner at the Bryan, Cave, Leighton, Paisner law firm, will present the Committee with the results of the Board of Governors' investigation of UCF's misuse of education and general (E&G) Funds. This investigation focused on additional E&G funds transfers for capital projects beyond the funds used for the construction of Trevor Colbourn Hall. At the January 31, 2019, Committee meeting Mr. Burby had reported the results of the previous investigation he conducted for the UCF Board of Trustees into the misuse of E&G funds for the TCH building construction project.

g) Timing concerns....90

V. REPAYMENT OF IMPROPERLY TRANSFERRED E&G FUNDS 91

Appendix A – List of Witnesses Interviewed

Appendix B – List of In-Scope Projects

Appendix C – Summary of E&G Transfers to In-Scope Projects

Appendix D – Summary of Expenditures for In-Scope Projects

I. BACKGROUND AND SCOPE OF INVESTIGATION

A. Prior Investigation and Engagement of BCLP

In September 2018, the University of Central Florida ("UCF") Board of Trustees ("BOT") engaged the law firm of Bryan Cave Leighton Paisner LLP ("BCLP") to conduct an independent[1] investigation into the University's use of state appropriated Education and General ("E&G") funds for capital projects, including the construction of a new academic building called Trevor Colbourn Hall ("TCH"). The BOT directed the Chair of its Audit and Compliance Committee, Beverly J. Seay, to oversee the investigation. Following a three month investigation with assistance from the accounting firm of PricewaterhouseCoopers Advisory Services LLC ("PwC"), BCLP issued a report of investigation on January 17, 2019 ("TCH Report") and presented it to the BOT on the following day, January 18, 2019.

The TCH Report concluded, among other things, that between 2013 and 2016, UCF allocated over $38 million of E&G funds, nearly all of which were "E&G carryforward funds" (i.e. E&G funds that were not spent during the fiscal year for which they were appropriated), to a project that began as the renovation of an existing building, Colbourn Hall, but which resulted in the construction of a new building, TCH, in violation of state law and regulations. The TCH Report found that most of these funds were not spent until fiscal year 2017-18, such that millions of dollars in E&G carryforward funds had been moved from carryforward accounts, the balance of which must be reported to state officials, to a construction account for the project, where they would not have to be reported, long before the funds were actually needed or spent.

The TCH Report focused exclusively on the funding of TCH and not on any other capital projects where E&G funds may have been inappropriately used, even though other such projects had been identified by UCF during its own internal investigation. UCF staff presented this information, which we understand was initially based on a five-year review but ultimately expanded to ten years, at various BOT meetings, including on September 20, 2018, when the Board retained BCLP. To be clear, BCLP had no involvement in the identification of these other, potentially improperly funded projects. On January 24, 2019, the BOT voted to accept the TCH Report but not to extend the BCLP investigation to examine the additional projects that UCF staff had identified.

The State University System of Florida ("SUS") Board of Governors ("BOG") invited BCLP and PwC to present the TCH Report at its January 31, 2019 meeting. After hearing the report, the BOG voted to continue the investigation into the transfer and/or use of E&G funds at UCF for capital projects beyond the funds used for the construction of TCH, and for the investigation to be paid for by UCF. The Board directed Julie Leftheris, the BOG Inspector General and Director of Compliance, to oversee the investigation. On February 8, 2019, BOG Chair Ned Lautenbach wrote to BCLP and asked to retain the firm to conduct this broader investigation. Specifically, he asked for BCLP "to identify all E&G funds transferred into UCF construction accounts since July 1, 2010, to determine the usage or intended usage of those funds and their earnings, and

[1] BCLP did not then and does not currently represent UCF or the BOT in any other matters.

the current status of those funds. Additionally, we are asking you to determine how this was done, at whose direction, and for what purpose." (Exhibit 1). BCLP subsequently terminated its representation of the BOT (with the BOT's consent), and on February 26, 2019, Chair Lautenbach signed an engagement letter on behalf of the BOG, formally engaging BCLP to conduct this investigation. (Exhibit 2).

The BCLP investigative team was once again led by R. Joseph Burby, a partner in the firm's Atlanta office and the leader of its Higher Education Internal Investigations and Compliance team. Prior to joining BCLP, Burby was employed by the United States Department of Justice, serving as an Assistant U.S. Attorney in the U.S. Attorney's Office for the Northern District of Georgia for nearly five years. As a federal prosecutor, Burby investigated and prosecuted a wide range of fraud offenses and other financial crimes, including crimes involving government funds. Burby's practice at BCLP focuses on, among other things, conducting internal investigations for large, complex organizations and their boards, including for colleges and universities.

B. Engagement of PwC

BCLP engaged PwC to assist it with the investigation and provide forensic accounting and other services. (Exhibit 3). The PwC team was once again led by Robert E. Gallagher, a CPA and Certified Fraud Examiner with substantial experience conducting complex, internal investigations involving accounting fraud and regulatory matters and the leader of the firm's Southeast Forensic Services practice group. PwC also has the largest higher education practice in the country, with over 1,500 higher education industry professionals in accounting and auditing, regulatory compliance and education advisory services, among others. Gallagher drew upon this wealth of higher education expertise as needed during the investigation. PwC had not, prior to the TCH investigation, provided any professional services to UCF, the BOT or the BOG.

C. Scope of the Investigative Work

1. General Overview

BCLP conducted the investigation with assistance from PwC over a period of approximately six months, between February and August 2019. As previously stated, our work was overseen by BOG Inspector General Julie Leftheris, to whom we provided regular updates. Inspector General Leftheris in turn provided updates to the BOG's Audit and Compliance Committee, and we also provided an interim report to the Committee on June 13, 2019.

The initial phase of the investigation involved developing a methodology for identifying capital projects at UCF that had received improper transfers of E&G funds since July 1, 2010.[2] We developed this methodology in consultation with BOG staff, as discussed in Section II of this Report, and then applied it using various financial and construction data provided by UCF, resulting in the identification of ten capital projects for further investigation. During this initial phase, we also gathered information

[2] We did not want to rely on UCF's own internal investigation or the projects they had identified through that process; rather, we wished to perform our own independent analysis and reach our own conclusions.

regarding UCF's investment portfolio and process for allocating investment gains, as questions had arisen concerning UCF's investment of E&G funds and use of investment gains for capital projects. This effort resulted in the identification of an eleventh capital project that appeared to have been improperly funded with E&G, the Global UCF building. Specifically, the project appeared to have been funded with investment earnings derived in part from the investment of E&G funds. When the E&G portion of those earnings was considered, the project qualified for inclusion under the methodology agreed upon with BOG staff.

Next, we investigated each of the 11 identified capital projects to determine how the decision was made to use E&G funds for them, why it was made and who at UCF was involved. As part of that process, BCLP interviewed over 40 witnesses, some more than once. Most of these interviews were conducted in person, although some were done by telephone. Inspector General Leftheris participated in most of the witness interviews, including nearly all of the in-person interviews. BCLP also requested extensive documents and other information from the University, including emails and detailed financial and accounting records, which were then reviewed and analyzed. The total number of documents collected and reviewed during the investigation is estimated to be in the tens of thousands. This is in addition to the estimated tens of thousands of documents collected and reviewed during the TCH investigation, many of which were also relevant to this investigation.

2. Witnesses Interviewed

BCLP conducted over 46 interviews with 42 different witnesses, including many current and former UCF administrative officers and staff, faculty members, BOT members, BOG staff and others having information about the matters within the scope of the investigation. Inspector General Leftheris and representatives from PwC were present for, and participated in, most of these interviews.

Senior UCF administrators who were interviewed include Interim University President Thad Seymour; Vice President and General Counsel W. Scott Cole; former Interim Chief Financial Officer Kathy Mitchell; and Chief of Staff to President Seymour and Vice President for Communications and Marketing Grant J. Heston.

A number of senior staff from the University's Finance & Accounting department also made themselves available for interviews, including former Assistant Vice President and University Controller Christy Tant; Interim University Controller Brad Hodum; Assistant Controller Bert Francis; Director of University Budget, Planning & Administration Donna DuBuc; and Director of Budget Initiatives Lynn Gonzalez. Gonzalez also served as Associate Vice President for Academic Affairs during some of the relevant period.

BCLP also interviewed a number of employees from the University's Facilities & Safety department, including Director of Facilities, Planning and Construction Bill Martin; former Director of Downtown Campus Facilities Allen Bottorff; Associate Director, Business Office, Facilities and Safety Resource Management, Lashonda Brown-Neal; and Construction Specialist Gina Seabrook.

BCLP interviewed the current Chair and Vice Chair of the BOT's Finance and Facilities Committee ("FFC"), Alex Martins and Robert Garvy, as well as former FFC Chairs Marcos Marchena and Conrad Santiago. Mr. Marchena also previously served as Chair of the BOT, and Mr. Garvy served as Interim Chair. BCLP also interviewed trustee David Walsh, who serves as a member of the FFC.

Finally, BCLP also interviewed staff of the Florida Board of Governors, including Vice Chancellor for Finance and Administration and Chief Financial Officer Tim Jones, Assistant Vice Chancellor for Finance and Facilities Chris Kinsley and Budget Director Dale Bradley, and consulted with General Counsel Vikki Shirley.

A complete list of the individuals interviewed during this investigation, and the dates of their interviews, is included at Appendix A.

3. Witnesses Not Interviewed

Perhaps more noteworthy than who was interviewed during the investigation is who was not. All of the key individuals who made or participated in the funding decisions for the capital projects that were the focus of this investigation declined to be interviewed, some through their counsel and others by simply ignoring our written interview requests. The lack of cooperation from these individuals significantly hindered the investigation and in some cases prevented us from fully ascertaining how and why the decisions were made to fund the projects. As these individuals were no longer employed by UCF, and the BOG and Inspector General Leftheris lack subpoena power, BCLP had no ability to compel them to cooperate or provide an interview.

The following former senior UCF officials declined our request for an interview:

- John C. Hitt (President, 1992-2019)
- Dale Whittaker (President, 2018-2019; Provost, 2014-2018)[3]
- William ("Bill") F. Merck, II (VP for Administration and Finance and Chief Financial Officer, 1996-2018)
- Tony G. Waldrop (Provost, 2010-2014)
- Diane Chase (Interim Provost, 2010 & 2014; Executive Vice Provost, 1984-2016)[4]
- Tracy Clark (Assoc. Provost and VP for Finance, 2007-2019)
- Priscilla L. ("Lee") Kernek (Assoc. VP for Facilities and Safety, 2007-2019)
- Vanessa Fortier (Assoc. VP for Administrative Affairs, 1998-2013)

Relevant correspondence with these individuals and/or their counsel is included as collective Exhibit 4.

[3] Whittaker declined to be interviewed about the capital projects at issue and his involvement in the funding decisions relating to them, but did offer to discuss policy and process improvements.

[4] Chase provided certain information by email but declined to answer questions or give a formal interview.

4. Documents Received and Considered

BCLP submitted numerous written document requests to the University, resulting in the receipt of thousands of documents. Former Interim CFO Kathy Mitchell initially coordinated the collection of documents (including financial and accounting records as well as emails) in response to BCLP's requests, but this was later handled by current Interim CFO Dennis Crudele. Employees in the University's Office of the General Counsel and Facilities & Safety department coordinated the collection of other types of documents in response to BCLP's requests. BCLP also requested documents and emails directly from some employees.

As discussed in the TCH Report, in October 2018, BCLP collected from the University the entire email accounts of John Hitt, Dale Whittaker, Bill Merck, Tracy Clark, Lee Kernek and Christy Tant. BCLP also collected text messages from all of these individuals except for Merck. These emails and text messages (totaling over 300 GB of data) were loaded into an e-discovery document review platform at BCLP to permit complex searches to be performed of the data and to facilitate document review. During the current investigation, BCLP performed additional searches of these emails and texts for documents relating to the capital projects of interest. BCLP also requested emails directly from some employees, and the University also collected emails from employees in response to the document requests it received from BCLP.

5. Forensic Analysis of Hard Drive

As discussed in the TCH Report, the audio recording of the FFC's April 3, 2014 meeting abruptly cut off during the portion of the meeting when the TCH project was discussed. (TCH Report at p. 24). This meeting was also relevant to this investigation, as information about one of the in-scope projects (Global UCF) was presented at the meeting, although the recording captured that discussion. As part of this investigation, we obtained from UCF a copy of a forensic image of the hard drive for the laptop computer that may have been used to record the April 3, 2014 FFC meeting. We were informed by UCF that the laptop was used to record BOT and FFC meetings during the time period in question, and that following a meeting, recording software would be used to create an MP3 audio file that would be copied to a CD and provided to University staff to maintain as part of the official record of the meeting. We were also informed that it was common practice to delete the audio file from the laptop after it had been copied to the CD. PwC performed a forensic analysis of the hard drive image but was unable to locate an audio file for the meeting in question.

6. Other Information Considered

In conducting this investigation and preparing this Report, BCLP considered documents and other information collected during the earlier TCH investigation for the BOT, including information provided by witnesses during interviews.

Additionally, BCLP considered information collected during an investigation by the Florida House of Representatives' Public Integrity & Ethics Committee ("PIE

Committee"), including the sworn testimony of witnesses taken in depositions[5] conducted by attorneys for the PIE Committee as well as the PIE Committee's final report titled, "Report of Investigation Into Unauthorized Use of Appropriated Funds for Fixed Capital Outlay Projects at the University of Central Florida."

[5] Unlike BCLP and BOG Inspector General Leftheris, the PIE Committee had the authority to serve subpoenas on witnesses, compelling them to provide sworn testimony.

II. METHODOLOGY FOR IDENTIFYING IN-SCOPE PROJECTS

As part of this engagement, BCLP was asked to identify all capital projects at UCF that were improperly funded, in whole or in part, with E&G funds between the dates of July 1, 2010 and December 31, 2018 ("Review Period"), excluding Trevor Colbourn Hall ("In-Scope Projects"). The In-Scope Projects would then be investigated further to determine how the decision was made to use E&G funds, who made it and why. BCLP consulted with BOG staff, including Assistant Vice Chancellor for Finance and Facilities Chris Kinsley, on how to identify capital projects that were improperly funded with E&G and ultimately developed an agreed upon methodology. The methodology was designed to be conservative and to only focus on clear-cut instances of improper spending.

The methodology involved, as an initial step, obtaining from UCF a complete listing of all transfers of any types of funds into unique construction project accounts during the Review Period. Construction project accounts that did not receive *any* transfers of E&G funds were considered outside the scope of this review, as the projects associated with those accounts were presumed to have been properly funded. The remaining construction project accounts which did receive E&G transfers in some amount were then separated into accounts involving a "New Facility" project and accounts involving an "Existing Facility" project. A "New Facility" was defined as any new, stand-alone building, or any work done to an "Existing Facility" that adds 10,000 or more gross square feet to such facility that was not in service prior to the date of the first transfer of E&G funds to the project. An "Existing Facility" was defined as a building that was operational prior to the date of the first transfer of E&G funds to the project. BOG staff requested this step in the methodology in order to better understand the nature of the projects at issue, although as will be shown the distinction between "New Facility" and "Existing Facility" construction accounts did not affect the final determination of the In-Scope Projects.

Next, those New Facility construction accounts and Existing Facility construction accounts that received cumulative transfers of E&G funds totaling $2 million or less were removed from the list and considered out-of-scope, without further analysis. BOG staff indicated that for purposes of this investigation, they were willing to treat the E&G transfers to such construction accounts as permissible, and the projects associated with those accounts as properly funded. BOG staff explained that in prior guidance they had advised SUS institutions that up to $2 million of E&G funds could be used for so-called "minor projects." Accordingly, this step in the methodology was intended to eliminate projects that may have been funded with E&G up to $2 million in favor of larger, more clear-cut instances of improper funding.

The projects associated with the remaining New Facility and Existing Facility construction accounts (i.e., those accounts that had received cumulative E&G transfers in excess of $2 million during the Review Period) were then examined more closely to determine the overall scope of each project. In order to analyze overall scope, both the budgeted and actual Planning & Design costs and Construction costs were considered. Notably, the Furniture, Fixtures and Equipment ("FF&E") costs were not considered in

this step of the methodology.[6] This was done using project budget information received from UCF's Facilities department and project expenditure detail received from the Finance & Accounting department. BOG staff elected to exclude FF&E costs in this step to ensure that projects would not cross the $2 million threshold and therefore be included in the In-Scope Projects due solely to the addition of FF&E costs on top of Planning & Design and Construction costs.

The final step in the methodology was intended to ensure that projects whose budgets were less than $2 million but that ultimately cost more than $2 million were included in the In-Scope Projects. Accordingly, if either the budgeted or actual Planning & Design and Construction costs for a project were greater than $2 million, the E&G transfers associated with the project were considered to be impermissible. All such projects were considered "In-Scope Projects" which would be subject to further investigation to determine how the improper funding occurred. If neither the budgeted nor actual Planning & Design and Construction costs for a project were greater than $2 million, then the E&G transfers associated with the project were considered to be permissible, and the project was considered to be properly funded with E&G. All such projects were considered outside the scope of this investigation.

[6] BOG staff defined FF&E for us as property that is movable, such as desks and chairs, and attached, such as lab equipment, fume hoods, safety equipment, cubicles, and the like. It also includes painting, carpet and signage. It does not include walls, doors, windows or elevators.

III. SUMMARY OF FINDINGS

A. Improperly Funded Projects and Related E&G Transfers

Applying the methodology agreed upon with BOG staff (discussed in Section II of this Report), we identified ten capital projects at UCF that were improperly funded, in whole or in part, with E&G funds between the dates of July 1, 2010 and December 31, 2018 ("Review Period"), excluding Trevor Colbourn Hall. We identified an eleventh improperly funded project, the construction of the new Global UCF building (together with the other ten projects, the "In-Scope Projects"), after determining that it was funded with investment earnings derived in part from the investment of E&G funds.[7]

In Appendix B, we list the 11 In-Scope Projects and summarize the amount and timing of E&G funds transferred to each project. More detailed information about the E&G transfers made to each project is provided in Appendix C. As you can see, the total amount of E&G funds transferred to the In-Scope Projects was $ 61.3 million. We found that nearly all of the $61.3 million ($55.3 million) was E&G carryforward funds. If the $38.2 million of E&G funds transferred to Trevor Colbourn Hall are also considered, the total amount of E&G funds improperly transferred by UCF to capital projects during the Review Period is over $99 million. In Appendix D, we summarize the expenditures incurred by UCF over time towards the In-Scope Projects, identifying for each the general timing, amount and type of expense.

The 11 In-Scope Projects and the E&G funding they received are discussed in detail in Section IV of the report but are briefly summarized as follows:

1. College of Medicine - Furniture, Fixtures & Equipment. Between 2009 and 2012, UCF purchased furniture, fixtures and equipment ("FF&E") for the College of Medicine's new Medical Education Building using approximately $2.4 million in unrestricted auxiliary funds. In late June 2012, University officials decided to substitute E&G carryforward funds for these auxiliary funds even though the money had already been spent.

2. CREOL Building Roof. In late June 2012, UCF transferred $2.6 million in E&G funds to replace the roof of the existing Center for Research and Education in Optics and Lasers ("CREOL") building. These funds were not ultimately used for the project, however, and the roof of the CREOL building was never actually replaced. Instead, a portion of the funds were returned to E&G accounts and the balance was used for other deferred maintenance projects involving other buildings, which we found to be appropriate uses of E&G.

3. Combined Heating and Power Plant. In January 2011, UCF made an internal loan of auxiliary funds to fund the construction of a Mitsubishi-built cogeneration power plant housed within a 5,000 square foot building

[7] As will be discussed, BOG regulations provide that interest from the investment of E&G funds are subject to the same restrictions on use as the E&G principal. When we considered the portion of the investment earnings used to fund the Global UCF project that should have been allocated to E&G, the project met the requisite criteria for inclusion in the In-Scope Projects.

on UCF's main campus. The loan was to be repaid using future energy savings derived from UCF's reduced dependence on electricity from outside providers. In September 2012, after the project was nearly completed, University officials decided to substitute $10.8 million of E&G carryforward funds for the auxiliary funds that had been loaned and partially spent. Additional E&G funds were transferred to the project throughout 2012, increasing the total amount to $11.1 million.

4. Global UCF. In 2014, UCF transferred $10 million in investment earnings from an auxiliary account to fund the construction of this new, 52,000 square foot building for international students and international-focused programs. The investment earnings, however, were derived in part from the investment of E&G funds, and officials elected not to treat the E&G portion of those earnings as E&G, even though UCF's normal practice was to allocate all investment earnings pro-rata so that E&G departments would receive their proportionate share. Had UCF allocated these earnings according to the methodology in place at the time of each transfer, an estimated $3.8 million would have been credited to E&G accounts. Additionally, in June 2016, UCF transferred approximately $1.6 million in E&G carryforward funds to pay for the building's FF&E.

5. CREOL Building Expansion. In July 2015, UCF transferred $4 million of E&G carryforward funds to fund a 14,000 square foot expansion of the existing CREOL building that includes new labs and offices, along with the shell for an auditorium to be completed at a later date.

6. Center for Emerging Media. In November 2016, UCF transferred $5 million of E&G carryforward funds to renovate an existing academic building located in downtown Orlando, consisting of a 28,000 square foot remodel of approximately one half of the building.

7. Research I - FF&E. In May 2017, UCF transferred $3 million of E&G carryforward funds to pay for the FF&E for the Research I building, a new, three-story, nearly 106,000 square foot interdisciplinary research building located on UCF's main campus.

8. Research I - Lab Buildouts. In May 2017, UCF transferred $6 million of E&G funds (all but $100,000 of which was E&G carryforward funds) for the design, construction and customization of certain labs located in the new Research I building.

9. Downtown Energy Plant. In October 2017, UCF loaned $11.5 million of E&G carryforward funds for the construction of a new, 9,500 square foot central energy plant designed to meet the chilled water needs of the new Downtown campus.

10. Downtown Student Center. In October 2017, UCF loaned $5.4 million of E&G carryforward funds for the design and buildout of approximately 47,000 square feet of leased space in the UnionWest at Creative Village

building, a privately owned and developed building that includes student residences. The leased space for the Student Center includes the Office of Student Services for the Downtown campus and other student resources.

11. Downtown Infrastructure. In October 2017, UCF loaned $4.8 million of E&G carryforward funds for the construction of telecommunications, data network systems, plumbing, sanitation, landscaping and other infrastructure needs for the new Downtown campus buildings.

UCF recorded the E&G transfers to 4 of the 11 capital projects (the Combined Heating and Power Plant, Downtown Energy Plant, Downtown Student Center and Downtown Infrastructure) as internal loans. However, we found that *none* of these loans had been repaid, *in any amount*, as of late August 2018 when the University's use of E&G funds for the construction of Trevor Colbourn Hall came under scrutiny. UCF collected loan payments in the form of energy cost savings for one of the projects, the Combined Heating and Power Plant, but elected to transfer those payments to an auxiliary account rather than repaying them to the E&G account that funded the loan. No loan payments were collected for the other three loans which were associated with projects located at UCF's new Downtown campus, nor had the University settled on an official plan to repay the loans as of late August 2018.

B. Involvement of UCF Employees and the Board of Trustees

In Section IV of this Report, we discuss in detail how each of the In-Scope Projects came to be funded with E&G, including the relative involvement of individual UCF employees and the Board of Trustees ("BOT"). The specific employees involved varies by project, which is not surprising given that the Review Period covered a span of ten years, and we do not intend to list all of them here.

Nevertheless, several former senior UCF officials approved the use of E&G funds for multiple In-Scope Projects and therefore warrant mention. Chief among them is the University's former Vice President of Administration and Finance and Chief Financial Officer, William ("Bill") F. Merck, II, who served in that role for over 20 years, from 1996 to 2018. We found that Merck approved (or jointly approved) the funding for many of the In-Scope projects, and was involved, in one way or another, in the funding decisions for all of the projects. Former Provosts Tony Waldrop (2010-2014) and Dale Whittaker (2014-2018) also played significant roles. We found that Waldrop approved the E&G funding for the College of Medicine FF&E and the Combined Heating & Power Plant, while Whittaker approved the funding for the Research I lab buildouts and Center for Emerging Media renovation, likely approved the funding for the Downtown Energy Plant, Downtown Student Center and Downtown Infrastructure, and was heavily involved (along with Merck) in the funding of the CREOL building expansion. We found that former President John Hitt (1992-2018) had only limited involvement in the funding of the In-Scope Projects but did approve the funding for the CREOL building expansion and the FF&E for the Research I building.

While she did not approve any funding, we found that, like Merck, former Associate Provost and Vice President for Finance Tracy Clark (2007-2019) participated in the funding decisions for every In-Scope Project with the exception of the CREOL

Roof project, in many instances identifying if not recommending the specific funding sources, including E&G. Other senior employees who did not approve funding but were also involved in funding decisions for multiple projects, meaning they exchanged emails or attended meetings where the funding with E&G was discussed, directed the funding transfers, etc., include former Associate VP for Administrative Affairs Vanessa Fortier (1998-2013), former Associate Vice President for Facilities & Safety Priscilla L. ("Lee") Kernek (2007-2019), and former University Controller Christy Tant, who has been employed at the University since 2011 and remains employed today.

Significantly, none of the individuals listed above, with the exception of Tant, agreed to be interviewed or otherwise cooperated with this investigation.

To be clear, the fact that an individual approved of the transfer of E&G funds to an In-Scope Project, or was involved in the funding decision, does not mean they knew it was improper at the time. Evidence we found as to the relative knowledge and understanding individuals had of the relevant BOG regulations, including the limits on the use of E&G funds, are discussed within the Report and will not be repeated here. In many instances, however, we could not determine what individuals were thinking at the time of these funding decisions or their motivations, due in part to the lack of cooperation we received from them. However, at least Merck and Clark, if not others, had reason to question the use of E&G funds for some of the In-Scope Projects, particularly those involving new construction. Evidence collected during the TCH investigation and presented in that report also supports this conclusion.

We found that the BOT did not formally approve of the use of E&G funds for any of the In-Scope Projects. Indeed, the BOT only approved of the funding for 2 of the 11 In-Scope Projects, Global UCF and the CREOL building expansion, and in neither instance was the BOT told that E&G funds were being used or that there was anything potentially improper about the source of funds for the projects. In the case of Global UCF, the BOT was not informed that the $10 million in investment earnings they approved to fund the project was derived in part from the investment of E&G funds, and that BOG regulations prohibit the use of the E&G portion of such earnings for the construction of a new facility. As for the CREOL building expansion, the project was listed on the University's Capital Outlay Budget for fiscal year 2017-18 as being funded with funds from "other state sources," but the specific source of funds was not disclosed or discussed during the meeting when the budget was approved. We found that the BOT was not informed at all about some of the In-Scope Projects; others they were informed of, but the information they received, particularly as to funding sources, was limited and often vague and contradictory.

C. Concerns about the Timing of E&G Carryforward Transfers

In addition to finding that UCF improperly transferred E&G funds to the In-Scope Projects, we found that the timing of some transfers of E&G carryforward funds was concerning and potentially improper, as the timing appeared to be driven by a desire to reduce the University's carryforward balance prior to reporting it to the BOG in a fiscal year-end or interim carryforward report, rather than by a legitimate need for the

funds in the construction accounts for the projects at that time.[8] By moving E&G carryforward funds from E&G carryforward accounts, such as the University's central E&G reserve account, to construction accounts, UCF could avoid including the funds in the total carryforward balance it reported to the BOG. As will be discussed, the BOG shares E&G carryforward balance reports with the Legislature, which considers the balances in deciding how much funding to provide to SUS institutions, and may reduce funding to institutions that have large balances (an indication such institutions are not spending, and therefore do not need, all of the operating funds they have been appropriated). According to some UCF employees we interviewed, concerns about reporting large E&G carryforward balances influenced the timing of some of the transfers to the In-Scope Projects.

The E&G transfer data for the In-Scope Projects clearly indicates a pattern of timing E&G transfers around known or expected carryforward fund balance reporting dates. For example, in reviewing the E&G transfers to the In-Scope Projects, which are summarized in Appendix B and broken down into individual transfers by project in Appendix C, it is striking how many were made at or near the end of the fiscal year, such as for the College of Medicine FF&E (June 26, 2012), CREOL Roof (June 28, 2012), Global UCF (June 30, 2016), Research I FF&E (May 25, 2017) and Research I lab buildouts (May 25, 2017). Equally striking is the length of time between many of the fund transfers shown in Appendix C, on the one hand, and the material expenditure of the funds as shown in Appendix D, suggesting that the transfers were not precipitated by a specific need for the funds.

We also found more direct evidence that UCF transferred E&G carryforward funds to In-Scope Projects at least in part to avoid reporting them. For example, in the case of the College of Medicine project, we found that initial discussions about replacing auxiliary funds that had already been spent on the building's FF&E with E&G carryforward funds coincided with the Legislature's discussion of major state budget cuts that were ultimately allocated to the universities based on their pro-rata share of total E&G carryforward balances. Further, the final decision to swap out the spent auxiliary funds with E&G carryforward funds took place right before the end of the fiscal year, the next year's fund balance report was almost due to the BOG, and the funds were obviously not needed at the time of the transfer (indeed, the expenditures had already occurred, in some cases *years* earlier).

The Combined Heating and Power Plant ("CHP") and Downtown Campus projects (excluding the Center for Emerging Media renovation) present even more blatant examples, as the fund transfers were made by UCF shortly after the BOG requested interim E&G carryforward balance reports. In the case of the CHP project, in early September 2012, BOG staff notified all universities they would need to report their E&G carryforward balances in October as of September 30, 2012. Less than ten days later, on September 21, 2012, UCF decided to substitute nearly $11 million of E&G carryforward funds for auxiliary funds that had been loaned to the CHP project in the previous year and partially spent, even though the project was already fully funded and

[8] As will be discussed, universities are required to report their starting balance of E&G carryforward funds to the BOG each fiscal year along with their operating budgets.

there was no apparent need to change the funding source. With respect to the Downtown Energy Plant, Downtown Student Center and Downtown Infrastructure projects, in mid-October 2017, BOG staff notified all universities they would need to report their E&G carryforward balances in November as of October 31, 2017. On November 1, 2017, UCF decided to loan $21.7 million of E&G carryforward funds to the aforementioned three projects, but made the transfers effective as of October 31. The decision to loan the funds at this particular time does not appear to have been based on any immediate need for the funding.

To be clear, there is no statute or regulation that prohibited UCF from reviewing its E&G carryforward balance at the end of the fiscal year or prior to an interim report and adjusting its carryforward balance as necessary to reflect legitimate commitments of E&G funds. But our review found that these adjustments were made to account for commitments that were not permitted under the regulations and, at least in some cases, were motivated by the desire to report a lower carryforward balance to the BOG rather than by an immediate need to fund construction costs. As a result, the BOG was not provided with accurate balance information which it relied upon in making funding requests to the Legislature on behalf of the entire SUS system.

D. Status of Repayment of Improperly Transferred E&G Funds

As discussed above, we found that UCF improperly transferred a total of $61.3 million of E&G funds to the In-Scope Projects. Pursuant to the analysis described in Section V of this Report, we confirmed that UCF has either returned or replaced $41.3 of the $61.3 million in improperly transferred E&G funds, and that any replacement of spent E&G funds was done using non-E&G funds. Additionally, we found that of the $2.6 million that was transferred for the CREOL building roof, a portion was returned to E&G accounts, while the balance was ultimately spent on deferred maintenance projects, an appropriate use of E&G funds. Accordingly, it is our conclusion that approximately $17.4 million of E&G funds still need to be returned or replaced by UCF as of the date of this Report.

IV. FINDINGS REGARDING IN-SCOPE PROJECTS

As discussed earlier, applying the methodology agreed upon with BOG staff resulted in the identification of 11 In-Scope Projects (i.e., UCF capital projects during the Review Period that were funded with more than $2 million of E&G funds and otherwise met the requisite criteria, excluding Trevor Colbourn Hall). Below we discuss each of these projects and how the E&G funding occurred, beginning with an overview section and then providing a detailed timeline discussion. As requested by the BOG Chair, we have attempted to address, with respect to each project's E&G funding, "how this was done, at whose direction, and for what purpose." First, though, we provide relevant background information on E&G funds, applicable BOG regulations and state statutes, and university reporting obligations concerning E&G carryforward balances.

A. Relevant Background[9]

1. About E&G Funds and Their Use

E&G funds are public funds through which the State of Florida supports the operations of the twelve universities that make up the State University System of Florida ("SUS"). E&G funds are used to support various operating activities such as academic instruction, research, public service, plant operations and maintenance, student services, libraries and administrative support. The Florida Legislature appropriates E&G funds annually to each SUS institution following extensive consultation with the BOG, who in turn works with each institution to identify and assess its funding needs for the upcoming fiscal year.

After E&G funds are distributed by the State, universities are required to separately account for and track the use of such funds. The use of E&G funds is governed by regulations promulgated by the BOG pursuant to authority granted to it by Article 9, Section 7, of the Florida Constitution and Fla. Stat. §§ 1001.706 and 1011.40.[10] BOG Regulation 9.007(3)(a)(1) provides, in pertinent part, that "[u]nless otherwise expressed by law, **E&G funds are to be used for E&G operating activities only**, such as, but not limited to, general instruction, research, public service, plant operations and maintenance, student services, libraries, administrative support, and other enrollment-related and stand-alone operations of the universities." (Emphasis added).[11]

---

[9] Additional relevant background information may be found in the TCH Report at pp. 12-14, as well as the Florida Auditor General's January 2019 report regarding its operational audit of UCF and the PIE Committee's March 2019 "Report of Investigation into Unauthorized Use of Appropriated Funds for Fixed Capital Outlay at the University of Central Florida."

[10] The use of E&G and other appropriated funds is also subject to Fla. Stat. § 216.292.

[11] The BOG adopted this regulation in December 2007 and has since amended it twice, in November 2013 and September 2016, although the latter amendments were immaterial. The original regulation provided that the E&G budget "funds the general instruction, research, public service, plant operations and maintenance, student services, libraries, administrative support, and other enrollment-related and stand-alone operations of the universities." The November 2013 amendments revised subparagraph 3(a)(1) to include the current language which expressly limits the use of E&G funds to "E&G operating activities only... ." These amendments were circulated to SUS institutions on July 11, 2013, in a redline showing proposed amendments and soliciting comments from SUS chief financial officers, budget officers and

Interest earnings from investing current-year E&G funds are also considered E&G funds and subject to the same restrictions, under BOG Regulation 9.007(5), which states that "E&G interest earnings are not to be utilized for non-E&G related activities or for fixed capital outlay activities except where expressly allowed by law."

Under BOG Regulation 9.007, E&G funds cannot be used to construct new facilities, although E&G can be used for repair and maintenance of existing facilities. According to BOG staff, E&G funds may be used for building renovations, but only up to a limit of $2 million. There is no regulation that explicitly sets forth this limit. According to BOG staff, the limit arises from Fla. Stat. § 255.103(4), which imposes a $2 million limit on a governmental entity's authority to enter into a continuing contract for construction projects, and Fla. Stat. § 1013.74, which provides that a university may undertake construction or remodeling projects without the need for educational plant survey approval, up to a limit of $1 million.

Funding sources for fixed capital outlay, on the other hand, include Public Education Capital Outlay ("PECO") appropriations, Capital Improvement Trust Fund ("CITF") financing, bonding, private sources including donations, and the Courtelis challenge grant program.[12] The PECO program is funded through a gross receipts tax on utilities, including electricity, telecommunications and cable. Historically, PECO revenues have been used to secure the issuance of tax-exempt bonds, used to finance construction and maintenance projects for education facilities, including facilities at SUS member institutions.[13] However, PECO revenues have not been bonded for many years, significantly reducing the amount of state funds available for capital projects.

Florida law governs expenditures by SUS institutions on fixed capital outlay. Pursuant to Fla. Stat. § 1013.61, university trustees must adopt a capital outlay budget for the ensuing fiscal year which is part of the annual budget and designates the proposed capital outlay expenditures by project for the year from all fund sources. The BOT may not expend funds on any project not included in the budget or amendments thereto.

2. E&G Carryforward Funds and Reporting Obligations to the BOG

E&G funds that are not spent during the fiscal year for which the funds were appropriated by the State are referred to as "E&G carryforward funds." Under the regulations in place throughout the relevant period, SUS institutions were entitled to

---

general counsels. (Exhibit 82). As will be discussed, the amendments were received by CFO Bill Merck, Associate VP of Finance Tracy Clark and University Controller Christy Tant, among others at UCF.

[12] Fixed capital outlay is defined as real property and permanent fixtures and includes "repairs, renovations to real property which materially extend its useful life or materially improve or change its functional use." Fla. Stat. § 216.011(1)(p).

[13] Fla. Stat. § 1013.01(16) defines "Public education capital outlay (PECO) funded projects" to include "renovation, remodeling, construction projects, and site improvements necessary to accommodate buildings, equipment, other structures, and special educational use areas that are built, installed, or established to serve primarily the educational instructional program of the…university board of trustees."

keep their E&G carryforward balances for use in later fiscal years.[14] The use of E&G carryforward funds, however, remains subject to the same restrictions as other E&G funds. Specifically, BOG Regulation 9.007(6) states that "[a]ny unexpended E&G appropriation carried forward to the fund balance in a new fiscal year shall be utilized in support of E&G operating activities only except where expressly allowed by law."

SUS institutions are required to report their starting balance of E&G carryforward funds to the BOG each fiscal year along with their operating budgets. This is done every August using a document titled "Operating Budget - Beginning Fund Balance Composition" but more commonly called the "Fund Balance Composition Report" ("FBCR"). The document follows a standard form and reports a university's E&G carryforward balance at the beginning of the year and also the date of the report, followed by its predicted use of the balance broken down into two categories: (1) Restricted/Contractual Obligations and (2) Commitments, i.e., funds that have been allocated by the University for a particular purpose. Each of these categories are further broken down into numerous subcategories whose names reflect various permitted uses of E&G funds, such as "Campus Security-Safety Issues," "Building Maintenance and Repairs," and "Financial Aid." As E&G funds cannot be used for fixed capital outlay, there is no such subcategory on the FBCR form.

According to BOG staff, the BOG uses the FBCRs in preparing its Legislative Budget Request ("LBR"). The LBR is the BOG's request for state funding for the entire university system, which the BOG submits each October to the Florida House, Senate and Governor's Office. The BOG also forwards the FBCRs to the House and Senate for their consideration (and also to the Governor's Office, if requested) after they are received in August. Additionally, the Legislature sometimes requests updated E&G carryforward balance information during the fiscal year, often at the end of the calendar year or in the spring during session. BOG staff explained that the Legislature considers these E&G carryforward balances in deciding how much funding to provide to each university, and may reduce funding to universities that have large balances (an indication such universities are not spending, and therefore do not need, all of the operating funds they have been appropriated).[15] According to BOG staff, universities are therefore dis-incentivized to maintain a large carryforward balance and instead are incentivized to spend carryforward funds (for permissible purposes, of course, and based on legitimate funding needs) before the fiscal year-end or an interim carryforward report is due.

B. College of Medicine Building - Furniture, Fixtures & Equipment

1. Overview

UCF's College of Medicine (COM) includes a four-story, 170,000 square foot Medical Education Building which opened in August 2010. Between 2009 and 2012, the

[14] *See also* Fla. Stat. § 1011.45. Universities are expected, however, to keep an amount equal to 5% of their E&G revenues as a minimum reserve. Fla. Stat. § 1011.40(2).

[15] As will also be discussed herein, at least one past state budget cut was effectuated pro-rata based on each university's balance of carryforward funds.

COM purchased various furniture, fixtures and equipment ("FF&E") for the building using approximately $2.4 million in unrestricted auxiliary funds. In late June 2012, University officials decided to replace these spent auxiliary funds with E&G carryforward funds. The E&G transfers that enabled this "funds swap" are detailed in the chart at Appendix C.

We found that Provost Tony Waldrop approved the transfer of all but a small portion of these E&G funds. Other senior University officials involved in the transaction include CFO Bill Merck, Vanessa Fortier, Tracy Clark, Judith Monroe and Lee Kernek. The precise extent of each person's knowledge and participation could not be determined. This was due in part to the fact that none of these individuals agreed to be interviewed and was compounded by the fact that we received limited documents from the University regarding the transaction. We found no evidence indicating that President John Hitt or the BOT were involved in any way.

The decision to swap out the spent auxiliary funds for E&G carryforward funds appears to have been motivated by a desire to decrease the balance of carryforward funds that the University would have to report to the BOG at the start of the next fiscal year on July 1, 2012. It may also have been based on a genuine belief by those involved that E&G funds could be used for FF&E purchases, even if those purchases exceeded $2 million and were intended for a newly constructed building. The swap also freed up for the University's use approximately $2.4 million in unrestricted auxiliary funds.

2. Timeline of Significant Events

a) *UCF's College of Medicine*

UCF decided to open a medical school, which was established as the COM, in 2006. The COM is located on UCF's Health Sciences Campus at Lake Nona. It includes a four-story, 170,000 square foot Medical Education Building, which cost approximately $68 million to build and opened in August 2010. Construction of the Medical Educational Building was primarily funded by private donations and the Florida Department of Education's Alec P. Courtelis Capital Facilities Matching Trust Fund ("Courtelis Funds").

After its official opening, work continued for the next two years on outfitting the Medical Education Building. Various FF&E for the building was purchased and installed between 2009 and 2012. We identified two different construction accounts for the Medical Education Building. The relevant account for this investigation is the UCF552-COM ADDL RESOURCES account (COM Additional Resources), which was created May 1, 2009 and used to fund construction and also purchase the aforementioned FF&E for the building.

b) *Original funding for purchases of FF&E*

The original funding for the Medical Educational Building fell short of covering the completion and furnishing of the building when Courtelis Funds ceased to be made available in 2009. *See* Fla. Stat. § 1013.79. The University identified alternative funding, specifically auxiliary funds from the University's sale of excess broadband

capacity for internet services (the "broadband funds") and funds from bond proceeds. These funds were transferred to the COM Additional Resources account and were used to cover remaining costs, including the FF&E costs.

UCF purchased FF&E for the Medical Education Building between 2009 and 2012 using the non-E&G funds from the COM Additional Resources account. Including installation costs, these FF&E purchases totaled $2,384,676. (Exhibit 5 at p. 3). We were not able to determine exactly which types of funds were used for the specific FF&E purchases, although the total balance of auxiliary funds transferred into the COM Additional Resources account more than covered the cost of the FF&E.

c) *E&G carryforward funds are used to replace auxiliary funds already spent on FF&E*

In 2012, the decision was made to replace the nearly $2.4 million of auxiliary funds that had already been spent on the aforementioned FF&E purchases for the Medical Educational Building with E&G carryforward funds. Internal emails and other documents indicate this was first considered in February 2012, although the funds swap did not actually occur until June 2012.[16]

On February 2, 2012, Associate Vice President for Administrative Affairs Vanessa Fortier sent an email to Associate Vice President for Facilities and Safety Lee Kernek, copying CFO Bill Merck, Associate Vice President of Administrative Affairs Judith Monroe and Assistant Vice President for Finance and University Controller Tracy Clark.[17] The email confirmed a discussion the prior day between Fortier, Merck and Monroe regarding the use of E&G carryforward funds and raised questions about expenditures already made from non-E&G sources that could have been made from E&G, including for the COM building. Fortier asked Kernek if her team could "look at the expenditures for those buildings to see if E&G carry forward funds could be used instead of the auxiliary funds for some of these amounts," further noting that Fortier, Merck and Monroe thought there were "at least some furniture and equipment expenditures that could be justified [as E&G-related expenses] and perhaps others." (Exhibit 6).[18]

This apparent effort by University officials to reduce their E&G carryforward balances may be explained by the state budget for fiscal year 2012-13 that was being discussed at the time and ultimately approved in April 2012. The budget included $300

[16] The planned use of E&G carryforward funds for this purpose was not included in the University's FY 2011-12 Fund Balance Composition Report (FBCR), submitted to the BOG on August 17, 2011, indicating that the decision was not made until sometime later.

[17] Although having the same titles, Fortier oversaw Finance Accounting, University Budgets, and Purchasing, while Monroe oversaw Human Resources, Parking and Transportation Services, and Business Services. Fortier retired from UCF in March 2013, while Monroe left the University in August 2012.

[18] We were not provided with any responses to this email, or any other documents revealing contemporaneous communications or discussions regarding this request or the issue.

million in cuts to the state's eleven universities existing at the time, including UCF.[19] It is our understanding that these cuts were effectuated pro-rata based on each university's balance of carryforward funds. Each university's share of the budget cuts was calculated based on a series of factors. We understand that half of the $300 million reduction in funding was allocated to the universities based on their pro-rata share of available E&G carryforward balance compared to the total E&G carryforward balance across all the universities. In other words, the higher the balance of unspent E&G carryforward funds on a university's books, the more that university would be impacted negatively from the statewide budget cut of $300 million.

What happened next, including what Kernek's team concluded and why, could not be determined due to the lack of cooperation from witnesses and available documents.[20] However, on June 21, 2012, Clark emailed Scott Sumner, COM's Faculty Administrator, a spreadsheet and asked him to call her to discuss it. The spreadsheet included a list of 23 different expenditure categories plus other transactions involving the COM Additional Resources account between 2009 and 2012. Twenty different line item entries for various FF&E expenditures were highlighted in yellow, with a total sum for those entries already calculated as $2,384,676. The only expenditure categories not included in the highlighted group were for professional services, construction contracts, and "TSFR TO UCF FINANCING CORP DSO." On June 24, 2012, Sumner forwarded this email and spreadsheet to Steven Omli, Assistant Dean - Medical School Finances, and indicated that he wanted to discuss it at a meeting they had scheduled the next day. (Exhibit 5).

Sumner is no longer employed at the University, having left in February 2013, and was not interviewed. Omli was interviewed but did not recall the June 25, 2012 meeting referenced in the email. What Omli did recall was that by the time of these emails, the University had already decided to use E&G carryforward funds to "pay back" certain expenses related to the Medical Educational Building that had originally been paid for using auxiliary funds. Omli confirmed that the highlighted expenses on the spreadsheet were all FF&E expenses for the building that had already been paid for using auxiliary funds and comprised the expenses to be "repaid" with E&G, and further that the spreadsheet also included proposed journal entries to effectuate the funds swap. Omli did not recall who actually prepared the spreadsheet. Omli indicated he was not aware at that time of any restrictions on the use of E&G funds and as a result this transaction did not raise any red flags with him or cause him any concerns.

On June 25, 2012, University officials transferred $2,384,676 of E&G carryforward funds—the same amount that appeared on the spreadsheet Clark sent to Sumner—from the University's central E&G reserve account (which holds unallocated

[19] According to Dale Bradley, Florida BOG Budget Director, the Florida Legislature reduced overall funding to the State University Systems by $300 million ahead of the 2012-2013 Fiscal Year. *See* Florida Legislature "Fiscal Analysis in Brief 2012 Legislative Session", page 23 "ALIGN APPROPRIATIONS WITH REVENUE ESTIMATES", attached as Exhibit 7.

[20] Merck, Kernek and Clark declined to be interviewed through their attorney, while Fortier and Monroe did not respond to our request for an interview.

carryforward funds) to the COM's E&G carryforward account. The next day, on June 26, 2012, the same amount was transferred from the COM carryforward account to the COM Additional Resources account. (Appendix C at p.1).

Clark initiated the request for this transfer on June 25, 2012 by email to Provost Waldrop, attaching a Budget Transfer Request form and asking him to approve the transfer. In her requesting email, Clark told Waldrop the transfer was from the University's E&G carryforward reserve, the transferred funds would "be applied toward the telecom, furniture and equipment expenditures at the Lake Nona campus operations," and the transfer would "be recorded as a temporary increase." Waldrop approved the transfer about an hour after Clark's request, with Fortier, Lynn Gonzalez (Associate Vice President Academic Affairs) and Christy Tant (at the time, Sr. Associate Controller for Budget, Contracts and Grants, and Compliance) copied on his reply email. (Exhibit 8). We found no evidence that any other information regarding the transfer was provided to Waldrop. As previously mentioned, Waldrop declined to be interviewed, and therefore his rationale for approving the transaction, including his understanding of the restrictions on the use of E&G funds, is unknown.

A few days later, on June 28, 2012, Clark emailed Gonzalez and asked her to approve a transfer of $23,873 from the University's central E&G reserve account to the COM's E&G carryforward account. As with the earlier request to Waldrop, Clark told Gonzalez that the amount transferred would "be applied toward the furniture and equipment purchase at the Lake Nona campus operations" and would "be recorded as a temporary increase." Gonzalez approved the request within an hour. (Exhibit 9). That same day, UCF transferred $23,873 from the central E&G reserve account to the COM-BSD carryforward account, and then from the COM-BSD account to the COM Additional Resources account. Gonzalez was interviewed but did not recall this transaction or her rationale for approving it. However, Gonzalez indicated that at the time she was not aware of any restrictions or limits on the use of E&G funds for FF&E.[21]

d) *Involvement of the President and BOT*

We found no evidence that President Hitt was apprised of this transaction, let alone approved it. The planned use of E&G carryforward funds for this purpose was not, for example, included in the FY 2011-12 Allocation Document[22] that he signed on August 25, 2011, nor did we find any other documents contemporaneous with the transaction that reflected his knowledge or approval of it. (Exhibits 10 & 11). We also found no evidence that this transaction was shared with, or approved by, the BOT.

[21] According to journal entry support, the purpose of this additional transfer of $23,827 on June 28, 2012 was to reconcile a negative cash balance in the account related to FF&E purchases. The record does not explain why Gonzalez was asked to approve this transfer instead of Provost Waldrop, although it was likely due to the small amount.

[22] The Allocation Document sets forth the University's plans to commit E&G funds during the current fiscal year, is used as written authorization to carry out budget transfers of E&G funds, and must be recommended by the Provost and approved by the President (which is evidenced by their signatures).

The evidence does clearly show that Provost Waldrop approved the use of E&G carryforward funds to purchase FF&E for the COM's Medical Educational Building on June 25, 2012. The transfer request email clearly informed Waldrop that over $2 million in E&G funds were being requested for FF&E, but it is unclear what other specific knowledge he had at the time. Clark's email did not clearly explain that these E&G funds would *replace* auxiliary funds that had *already* been spent on the FF&E. The evidence also indicates that CFO Merck was aware of the transaction and involved in the decision, even if he did not specifically approve it, given his participation in the February 2012 meeting and inclusion on Fortier's follow-up email. The evidence further shows that Clark, Kernek and Fortier were involved in discussions on the topic, and knew that swapping out auxiliary funds for E&G funds for the COM FF&E expenditures was being considered.

e) *Knowledge and understanding of relevant regulations*

The key individuals involved with the reclassification of funds used for the COM's FF&E purchases declined to be interviewed, including Waldrop, Merck, Clark, Fortier, Monroe and Kernek. As a result, it is difficult to reach any conclusions regarding their rationale for replacing the nearly $2.4 million in already-spent auxiliary funds with E&G carryforward funds. It may be that the individuals involved genuinely believed it was proper to use E&G funds for FF&E in any amount (including over $2 million), and even for a newly constructed building, and as a result the funds swap presented a legitimate (if unconventional) opportunity to decrease the University's E&G carryforward balance at fiscal year-end.

While Merck and Clark declined to be interviewed as part of our investigation, both were subpoenaed by the PIE Committee to provide sworn testimony during its investigation. While neither specifically addressed the funding for this project, both testified that they believed E&G funds could be used for FF&E. (*See* Exhibit 12 at p. 78; Exhibit 13 at pp. 68-69). They were not asked, however, whether they understood there to be any limits on such FF&E expenditures, such as a $2 million "cap" that other witnesses have indicated they understood to exist. We found no evidence that directly contradicts this testimony by Merck and Clark, although as will be discussed elsewhere in this Report, both were clearly aware of the BOG regulation that limited the use of E&G funds to operating activities. Kernek also declined to be interviewed but was interviewed during the earlier TCH Investigation and also was deposed by PIE Committee investigators. While her testimony did not cover this project or the propriety of using E&G funds for FF&E, she claimed in both her interview and deposition to be unaware of any restrictions on the use of E&G funds. (Exhibit 14 at pp. 26-27).

f) *Timing concerns*

The decision to replace spent auxiliary funds with E&G carryforward funds took place right before the end of the fiscal year, the next year's FBCR was almost due to the BOG, the funds were obviously not needed at the time of the transfer (indeed, the expenditures had already occurred, in some cases *years* earlier), and this specific use of E&G funds had not been included in relevant budget planning documents for the current fiscal year. Based on this, and our findings with regard to the timing of E&G

transfers for other projects discussed in this Report, it is fair to conclude that these transfers took place when they did at least in part to reduce the University's E&G carryforward balance that would be reported to the BOG in the August FBCR. This conclusion is further corroborated by witnesses who described a general concern that the Legislature may take back unspent E&G funds that carry forward to the next fiscal year, particularly if a large balance of such funds is reported. Indeed, the state budget passed in 2012 cut $300 million from UCF and other universities in part based on their unallocated E&G carryforward balances at the time.

C. CREOL Building Roof

1. Overview

In 2012, the roof of the Center for Research and Education in Optics and Lasers (CREOL) building, located on UCF's main campus and home to the College of Optics and Photonics (COP), was leaking and deemed to be in need of repair. Facilities personnel considered different fixes but ultimately commissioned a roof condition study by an outside firm which recommended replacing the roof. Bids were solicited for the project which indicated it would cost approximately $1.8 million to replace the roof; however, for unknown reasons, Facilities personnel added another $725,000 as a contingency amount, bringing the total estimated cost of the project to nearly $2.6 million. In late June 2012, that amount of E&G funds was transferred to a construction account for the project from 39 different E&G accounts within the University's Administration and Finance division, including from several E&G carryforward accounts. These transfers are shown in the chart at Appendix C.

These E&G funds were not ultimately used for the project, however, and the roof of the CREOL building was never actually replaced. Instead, the project was briefly abandoned, then in 2014 Facilities decided to repair the roof rather than replace it at a cost of just $592,525 using PECO funds. Despite this, most of the E&G funds budgeted for the CREOL roof replacement project were not returned to their original E&G accounts. Instead, the funds remained in the construction account for the project where they were later used for other critical deferred maintenance involving other buildings, which appear to have been appropriate uses for E&G.

Details about this project are relatively scant and largely based on accounting records and a handful of witness interviews. Nevertheless, the available information indicates that Lee Kernek, the Associate Vice President for Facilities and Safety, made the decision to transfer the $2.6 million in E&G funds to the CREOL roof replacement project with the knowledge and approval of CFO Bill Merck. We found no evidence that President John Hitt, Provost Tony Waldrop or the BOT approved of the project or the source of funds for it, or were even aware of the project.

2. Timeline of Significant Events

a) *Problems with the CREOL building roof*

The CREOL building was constructed in 1996 and by early 2012 was experiencing problems with its roof, including leaks. UCF's Facilities department began looking at

ways to address these issues. The earliest evidence we identified relating to the roof conditions, from March 2012, was a proposed scope of work to repair the roof by spraying it with a protective coating. (Exhibit 15). Shortly thereafter, Facilities hired an outside firm, Construction Moisture Consulting, Inc., to perform a study of the roof's condition and determine how best to address the leakage issues. In May 2012, Facilities transferred $57,200 of E&G funds from a carryforward account to a construction project account it had set up for the project (the "CREOL Roof Account"). (Exhibit 16). The funds were intended to pay for the roof study, and the University issued a Purchase Order for that study in the amount of $57,200. (Exhibit 17). Facilities eventually paid Construction Moisture Consulting a total of $25,865 for this study.

The roof study recommended replacing the CREOL roof rather than repairing it, and bids were solicited for the project. (Exhibit 18). On June 13, 2012, Delphini Construction submitted a written proposal to replace the roof for $1.84 million, which included a 10% contingency amount. That same day, Facilities personnel opened a Facilities Improvement Work Order to replace the CREOL roof. The amount of the work order was $2,565,523, however, because it included an additional contingency amount of $725,523 on top of the $1.84 million estimate. (Exhibit 19). The added contingency was approximately 40% of the project cost (which as mentioned already included the contractor's built-in 10% contingency), and is the exact difference between the total amount of E&G funds transferred to the project minus the original amount of the work order.[23]

According to Facilities employees we interviewed, it is common practice to add contingency amounts to the estimated cost of capital projects, but those typically range from between 3% and 10% of the total estimated project cost. We were unable to determine why such a higher contingency amount was included for the CREOL roof project, but witnesses speculated it may have been due to the fact that the building housed expensive lab equipment on the roof used for ongoing research, and Facilities was concerned about possible damage to the equipment or additional costs to move it. Lashanda Brown Neal, Associate Director of the Facilities Business Office (part of the Resources Management Department), advised us that she believes Lee Kernek decided on the amount of the work order, including the contingency amount, and that she suspects Kernek was unsure exactly how much the project would cost and just wanted to make sure they had enough money for it. Kernek, as has been discussed, declined to be interviewed as part of this investigation.

b) *Transfers of E&G funds for the roof replacement project*

On June 28, 2012, the University transferred a total of $2,565,523 of E&G funds to the CREOL Roof Account for the purpose of replacing the CREOL roof. (Appendix C at pp. 1-2). These E&G funds came from 39 different E&G accounting departments within the University's Administration & Finance division, accounts controlled by Merck as the division's Vice President. (Exhibit 16). Four of these accounts were E&G

[23] $2,565,522.54 of E&G transfers minus $725,522.54 written in "contingency" equals $1,840,000 amount in original proposed work order.

carryforward accounts, from which $767,488 was transferred to the project. The transfers were made by a former accountant in the Facilities Business Office.

According to Brown-Neal and other witnesses, Kernek directed the funding of the CREOL roof project in this manner pursuant to an arrangement she had with Merck to use excess E&G funds in the Administration and Finance division for critical deferred maintenance projects. Brown-Neal described how periodically, including prior to the end of each fiscal year, Kernek would ask someone to review the balances in the division's E&G accounts, compare the available funds to each department's budget, and then roll any excess funds into Facilities accounts for deferred maintenance projects.

The unusually large contingency (40% of the project cost), coupled with the timing of the transfer (two days before the end of the fiscal year) and the fact that the project was discontinued just two months later (as discussed further below), raises the question of whether the nearly $2.6 million transfer was motivated at least in part by a desire to decrease the University's E&G carryforward balance prior to reporting the balance to the BOG in August. As indicated, $767,488 of the $2.6 million transferred came from E&G carryforward accounts. Additionally, assuming the remaining E&G funds had not been transferred or spent by June 30, 2012 (i.e., prior to the end of the 2011-12 fiscal year), these funds would have rolled over into the 2012-13 fiscal year as E&G carryforward funds, and therefore would have been reported in the beginning balance of E&G carryforward in the FY 2012-13 FBCR due in August 2012.

c) *The CREOL building roof is not replaced, the E&G funds are not returned, and some of the E&G funds are used for repairs to other buildings*

Just two months later, in August 2012, the University abruptly decided not to move forward with the plan to replace the CREOL roof. This decision was made by Kernek, purportedly due to budget constraints, even though the project was fully funded. The decision was confirmed in an email to Construction Moisture Consulting from Facilities employee Frank Ballentine, a maintenance superintendent who worked closely with Kernek. Ballentine also asked Construction Moisture Consulting to close out the CREOL roof project but keep its records in case funding for the project became available in the future. (Exhibit 20). We were not provided any similar communications with Delphini, but the University made no payments to Delphini in 2012 in connection with the CREOL roof project.

Between September 2012 and May 2013, the University returned some of the approximately $2.6 million of E&G funds originally transferred to fund the CREOL roof project. Specifically, Facilities transferred back $416,765 of the E&G funds from the CREOL Roof Account to the original source departments via 13 separate transfers, according to General Ledger data we received. Facilities left the remaining E&G funds in the CREOL Roof Account to be used for other deferred maintenance projects associated with other buildings. None of the individual deferred maintenance projects that were later funded from this account, however, exceeded $2 million or even came close to that amount.

d) *The CREOL roof is repaired rather than replaced using non-E&G funds*

In May 2014, the University received PECO funds for "critical deferred maintenance projects" which had been requested in 2012.[24] Witnesses reported that Kernek decided which deferred maintenance projects would receive these PECO funds and chose to allocate $592,151 for repairing the CREOL building roof. Apparently sometime between 2012 and 2014, Kernek determined that the roof could be repaired rather than replaced, as originally recommended. The decision to finally move forward with the project appears to have also been prompted by new complaints about water leaks in the building including from the COP Dean. Witnesses reported that Kernek made the decision to repair the roof rather than replace it and to pay for the repair costs using some of the PECO funds that were received rather that the E&G funds that had already been transferred to the construction account for the project. As Kernek declined to be interviewed, her reasons for these decisions are unknown.

The CREOL roof was repaired in stages between fall 2015 and spring 2017. The main repair involved recoating the roof with a protective sealant, which was completed in April 2016. Including the 2012 roof study, the University spent a total of $592,525 on the CREOL roof project. (Exhibit 21).

e) *Conclusions regarding the funding decision for the project*

As discussed, it appears that Kernek, the Associate VP for Facilities and Safety, made the decision to fund the CREOL roof project, and indeed the fund transfers were performed by a Facilities accountant. It further appears that CFO Merck knew about and approved of the transfers, based on where the funds came from (E&G accounts within the Administration and Finance division, which he oversaw) and what witnesses told us about an arrangement he had with Kernek to aggregate and transfer excess E&G funds within the Administration and Finance division at the end of each fiscal year for use on deferred maintenance projects. We found no evidence indicating that the F&A department was otherwise involved in this decision or the transaction itself, and F&A employees we interviewed were not familiar with this project or the transfers.

Additionally, we found no evidence that President Hitt, Provost Waldrop or the BOT approved of the CREOL roof project or its source of funds or were otherwise aware of, or involved in, the project. We found no evidence, for example, that the project was discussed in "budget chats" at the time between the Provost and CFO and their respective staffs. Nor was the project identified in the FY 2011-12 Allocation Document, signed by both the President and Provost, as a planned use of E&G funds, or included in the FY 2011-12 Capital Outlay Budget approved by the BOT in May 2011. (Exhibits 11 & 23).

[24] The University's PECO request had apparently included $1.3 million for the CREOL roof project.

f) *Knowledge and understanding of relevant regulations*

Kernek declined to be interviewed as part of this investigation and therefore her explanation of the CREOL roof transaction is unknown. She was not asked about this specific project in her only interview for the TCH investigation and she did not discuss it in her PIE Committee testimony, but in both she claimed not to be aware of any restrictions on the use of E&G funds for capital projects. (TCH Report at p. 9; *see* Exhibit 14 at p. 26-27). Chris Kinsley, the BOG's Assistant Vice Chancellor for Finance and Facilities, expressed skepticism about Kernek's claim, given her long tenure at the University (over 11 years) and her frequent interaction with him and other BOG staff regarding capital project funding. Indeed, Kernek acknowledged in her PIE Committee testimony that she frequently spoke with Kinsley about whether E&G funds could be used to fund particular projects, suggesting some awareness of limits on their use. (Exhibit 14 at pp. 41-42, 48). Nevertheless, we found no direct evidence that Kernek knew E&G funds carried restrictions prior to May 2015 when she heard statements by Merck about potential issues with the use of such funds for TCH. (Exhibit 14 at p. 27).

Merck also declined to be interviewed for this investigation but in his PIE Committee testimony stated that he thought E&G funds could be used for renovation projects. (Exhibit 12 at p. 37). His testimony did not address the CREOL roof project specifically or the use of E&G funds for deferred maintenance projects generally, or if he understood there to be any limits on the amount of E&G funds that could be used for deferred maintenance projects.

g) *Timing concerns*

Due to the limited information available, including the unavailability of key witnesses, we could not determine why these E&G transfers to the CREOL roof project occurred on June 28, 2012. While the cost proposal for the project had just recently been received, no construction contract had been signed and in fact just two months later a decision was made not to go forward with the project. There is also the unusually large contingency amount. The transfers may have been part of an end-of-year process for reallocating excess E&G funds to deferred maintenance that was carried out by Kernek and the Facilities department, with Merck's approval, as discussed earlier. However, the timing also suggests that the transfers may have been part of an effort to spend down carryforward funds before the end of the fiscal year in order to report a lower carryforward balance to the BOG in the University's August FBCR, which appears to have been the case with the similar transfers in late June 2012 to the COM Additional Resources construction account and with transfers to other projects, as discussed throughout this Report.

D. Combined Heating and Power Plant

1. Overview

The Combined Heating & Power Plant (CHP) is a Mitsubishi-built "cogeneration" power plant housed within a 5,000 square foot building on UCF's main campus. The equipment for the plant cost approximately $6.3 million, and the entire project

(including construction of the building) cost approximately $12.9 million. Construction began in December 2010 and the plant became operational in January 2013.

The project was planned as an energy conservation measure authorized by the Guaranteed Energy, Water, and Wastewater Performance Savings Contracting Act. *See* Fla. Stat. § 1013.23. Energy savings contracts are allowed if they meet certain statutory criteria, but as will be discussed, it does not appear such requirements were ever satisfied for CHP. The statute is silent as to whether universities can use E&G funds to meet their debt service obligations under energy savings contracts and also whether they can self-finance such projects through internal loans. The statute does not expressly prohibit using external loans on such projects, and BOG staff has indicated that BOG practice is to allow such loans to be repaid using energy savings dollars comprised partly of E&G funds. The BOG Debt Management Guidelines further enable state universities to finance energy savings contracts with only BOT approval, provided that the total contract is less than $10 million. Contracts that exceed $10 million, however, require approval by the BOG. As will be discussed, because the CHP project was funded by an internal loan of greater than $10 million, BOG approval was required. Additionally, the project never received BOT approval as required by the Debt Management Guidelines.

The CHP project was mostly funded through an internal loan of around $10.8 million in E&G carryforward funds from the University's central E&G reserve to the CHP construction account, which was to be repaid with funds generated from energy savings in annual installments through 2025. Neither the BOT nor the BOG specifically approved the project or this financing arrangement. The University has collected $7.3 million in installment payments to date. However, significantly, the installment payments were not paid into the E&G account from which the loan was made, but instead were paid into a non-E&G auxiliary account from which funds may be spent without restriction. Thus the construction of CHP was effectively paid for using E&G funds that were supposed to be repaid with funds generated through energy savings but in fact never were. The chart at Appendix C, page 2, shows the timing and amounts of the E&G transfers to the project. The chart at Appendix D, page 2, shows the timing and type of construction spending on the project.

Approval of an initial internal loan to fund the construction of the CHP plant was provided by President John Hitt and CFO Bill Merck, who entered into a memorandum of understanding (MOU) to document the loan in January 2011. The original loan amount was $6.8 million but later increased to $10.7 million. The source of the loaned funds was initially all auxiliary funds. In 2012, a decision was made to substitute E&G carryforward funds for the auxiliary funds that had been loaned and partially spent, even though the project had already been fully funded and there was no apparent need to change the funding source. The transfer of carryforward funds for this purpose was approved by Provost Tony Waldrop in September 2012 at the apparent recommendation of Merck and Vanessa Fortier (Associate Vice President for Administrative Affairs).

The timing of this substitution of funds strongly suggests that it was motivated by a desire to reduce the University's E&G carryforward balance prior to an anticipated request from the BOG to report that balance. Specifically, in early September 2012, BOG staff notified SUS institutions that they would need to report their E&G

carryforward balances in October as of September 30, 2012. We found no evidence that the substitution of E&G funds for the loaned auxiliary funds was ever discussed prior to this e-mail, and the decision to transfer the E&G funds was made shortly thereafter. Additionally, internal emails reflect an intention to execute the transfer in time for the reduction in the E&G carryforward balance to be reflected in the anticipated report to the BOG.

For reasons that are unclear, this new loan of E&G funds was not formally documented for nearly two years, until July 2014. At that time, Merck and Interim Provost Diane Chase signed a new MOU, setting the loan amount at approximately $10.2 million. The BOT was generally aware of the CHP project and in July 2010 approved a minor amendment to the 2010 Campus Master Plan to allow for it. Nevertheless, the BOT does not appear to have given individual approval to proceed with construction or to have been apprised of the funding arrangement, including specifically the internal loan of E&G funds.

From the beginning, it was contemplated that the loan would be repaid with "energy savings" generated by the new plant; i.e., the amount that UCF would save because it could now generate power that it previously had to purchase from a third-party provider. As noted, these energy savings were actually paid into a non-E&G account rather than the E&G account that had made the loan. Our review of the manner in which the energy savings were calculated indicates that UCF counted energy savings from both E&G and non-E&G departments, meaning that some of the energy savings applied to repay the loan (but in fact diverted to an auxiliary account) came from E&G departments. As such, the "color" of these energy savings-related E&G funds was effectively changed from E&G to auxiliary. The amount of such affected E&G funds could not be determined.

2. Background on Energy Savings Contracts and Related Statute

One of the main selling points of the CHP project was its potential to generate substantial energy savings for the University over time. Florida law specifically authorizes and encourages certain public agencies, including state universities, to enter into "energy savings" contracts under specified conditions. Fla. Stat. § 1013.23. This includes contracts for the "evaluation, recommendation, and implementation of energy conversation measures," meaning "a training program, facility alteration, or equipment to be used in new construction, including an addition to an existing facility, that reduces energy costs … ." Fla. Stat. §§ 1013.23(2)(a), (2)(c). Such measures include the purchase of "[c]ogeneration systems," like CHP. Fla. Stat. § 1013.23(2)(a)(7). The energy savings statute also presumes that the energy savings contracts may sometimes "be used in new construction," Fla. Stat. § 1013.23(2)(b)(2), and thus arguably authorizes the construction of a building to house energy savings equipment. The statute does not clearly address whether, in that scenario, the costs of construction are considered part of the energy savings contract and subject to the statute's conditions.

Among other things, energy savings contracts must contain certain mandatory contract terms, including the design and installation of energy saving equipment, the amount of annual savings exceeding contract payments, and the finance charges

incurred over the life of the contract. Fla. Stat. § 1013.23(2)(c). Prior to design or installation, the contractor must provide the Board of Trustees with a report summarizing the costs and estimates of savings. Fla. Stat. § 1013.23(3)(d). Additionally, the contract must undergo mandatory review and approval by at least one other authority: the Department of Management Services, the Department of Education or a registered professional engineer. Fla. Stat. § 1013.23(3)(d). Although the project was approved by a registered professional engineer, we found no evidence that the other statutory requirements were fulfilled with respect to the CHP project including the requirement that the costs and estimated energy savings be reported to the BOT.[25]

The Florida energy savings statute implicitly recognizes that energy savings contracts may be financed. The statute authorizes universities to enter into an "installment payment contract" for energy conservation measures, not to exceed 20 years. Fla. Stat. § 1013.23(3)(e). However, the statute does not explicitly authorize or prohibit self-financing such as through a loan from one department of the university to another, and it does not explicitly authorize or prohibit paying for the project with "energy savings"—i.e., the difference between the overhead costs for any energy a university produces and consumes itself and the market rate for the same amount of energy. The BOG Debt Management Guidelines in effect at the time of the CHP project authorized universities to finance § 1013.23 energy savings contracts of less than $10 million, provided the financing receives BOT approval. (Exhibit 24 at 3.) (BOG approval is required if that threshold amount is exceeded.)

Finally, the statute does not identify the types of funds that may or may not be used to pay for energy saving projects. Specifically, the statute does not contain any mention of E&G funds and is silent as to whether E&G funds may be used to purchase new energy saving equipment (or ancillary implementation contracts). Because of this silence, it appears that the use of E&G funds remains subject to BOG Reg. 9.007(3)(a)(1)'s restriction on the use of E&G funds for operating activities only and its nonexclusive list of examples. Although this list includes plant operation and maintenance ("PO&M"), the purchase of new cogeneration equipment and the construction of a new building to house that equipment does not appear to qualify as an operating or maintenance expenditure.

3. Timeline of Significant Events

a) *Initial Plans for CHP*

In December 2009, UCF announced an RFP for a combined heat and power facility to reduce its energy costs and support its sustainability and environmental initiatives.[26] On June 30, 2010, UCF signed a contract with Mitsubishi Power Systems Americas, Inc. ("Mitsubishi") to build a natural gas powered CHP system to produce

[25] Additionally, the CHP contract was extensively redacted prior to its production to us, based on objections from Mitsubishi in order to protect proprietary and trade secreted information. As such, a full review of the contract to determine the presence of the required terms was not possible.

[26] On May, 2009, the BOT's Facilities & Planning Committee (which predated the FFC) reviewed various energy savings initiatives, but it is unclear whether CHP was discussed at the time.

approximately 5.2 megawatts of power, sufficient to satisfy approximately one-third of UCF's electricity needs on its main campus. (Exhibits 25 & 26). Mitsubishi agreed to build and deliver the system, consisting of a natural gas engine, generator and absorption chiller, for a price capped at $6,238,661.00. (Exhibit 26). According to Assistant Vice President Dave Norvell, the total cost of the project was anticipated to be approximately $12 million, which was originally planned to be paid in six annual installments of $2 million generated from energy savings. The project, however, did not appear on the University's FY 2010-11 Capital Outlay Budget. (Exhibit 27).

On July 22, 2010, the BOT approved a minor amendment to the 2010 Campus Master Plan "to construct a new CHP facility adjacent to the South Utility Plant on Gemini Boulevard." (Exhibits 25, 28 & 29). The funding source for the project was not discussed at this meeting or the BOT's Finance and Facilities Committee ("FFC") meeting earlier that day, and the project never received specific approval from the BOT to proceed with construction or be funded in any particular manner. There is no indication that the BOT was informed of the requirements set forth in the energy savings statute or that the project itself satisfied those requirements. Construction of the plant began in December 2010 without specific approval from the BOT.

At the outset, UCF decided that it would self-finance the CHP project through an internal loan from the central auxiliary reserve to the construction account set up for the project. On January 25, 2011, President Hitt and CFO Merck signed an MOU memorializing their understanding regarding the loan, which was to be in the amount of $6.8 million. (Exhibit 30). A handful of unsigned addenda from 2011 to increase the loan amount suggest the funding sources for the project had not yet been completely finalized, potentially explaining why the original loan amount was less than the full anticipated cost of the project. According to the MOU, the funds would be used "in connection with the purchase of a Combined Heat & Power (CHP) Plant System from Mitsubishi … ." (Exhibit 30). The outstanding principal, the source of which was not clearly stated, would accrue interest at a rate of two percent per annum. The debt would be repaid in annual installments beginning on December 31, 2012 and continuing each December 31 until 2016. As outlined by the MOU, the loan was to be repaid by the Division of Administration and Finance "from savings generated from its energy account … ." (Exhibit 30). The MOU did not identify the source of those savings or to which account they would be paid.

b) *2011 Modifications to Financing*

During 2011, the principal amount of the loan increased from $6.8 million to $10,695,000. CFO Merck authorized these loan balance increases on October 3, 2011 in a document he signed entitled "Summary of CHP Funding Plan as of 10/1/11." (Exhibit 31). Internal budget documents from the period indicate that all of the money committed to the project, through loan or otherwise, would come from non-E&G auxiliary funds. (Exhibit 32). The October 3, 2011 document signed by Merck references three separate auxiliary loans: the "original" $6.8 million loan, an additional $432,000 loan from August 2011, and an additional $3,463,000 loan approved by Merck. At this point in time, the total outstanding auxiliary loan balance (including anticipated interest) was $11,350,000. (Exhibit 31). Merck later authorized a direct

transfer of an additional $1.5 million in auxiliary funds on October 5, 2011, bringing the total funds available to build the CHP plant to $12,850,000.[27] (Exhibit 32).

c) *Decision to Replace Auxiliary Funds with E&G*

In September 2012, UCF decided to change the source of the loan from auxiliary to E&G carryforward funds.[28] (Appendix C at p. 2). UCF effectively paid off the outstanding auxiliary loan balance and then transferred the full amount of the newly "loaned" E&G to the project.[29] Internal budget planning documents from immediately prior to this decision do not provide any hint that this switch was being considered. For instance, on August 15, 2012, President Hitt and Provost Waldrop signed an Allocation Document for the 2012-13 fiscal year which did not mention any anticipated use of E&G funds for the CHP project. (Exhibit 34). The transfer was similarly not listed as a commitment line item on the 2012-13 Fund Balance Composition Report ("FBCR") submitted to the BOG on August 17, 2012. (Exhibit 35). These omissions suggest the decision to transfer the funds had not been made at the time. Additionally, CHP had already secured a funding source and construction was nearing completion, indicating that the decision to use E&G carryforward was not due to a lack of other available sources of funding or a need for additional funds to complete the project.

Instead, the decision to replace the auxiliary funds loan with a loan of E&G carryforward funds was most likely made in mid-September in order to reduce the University's overall E&G carryforward balance prior to an anticipated reporting deadline to the BOG. On September 12, 2012, BOG Budget Director Kristie Harris emailed state university budget officers, stating: "In preparation for the upcoming Legislative session, our office will begin collecting unexpended E&G carryforward balance information beginning with the September 30, 2012 amounts." (Exhibit 36). On September 20, 2012, Associate Vice President for Administrative Affairs Vanessa Fortier sent an email confirming that she and CFO Merck wished to proceed with various transfers to reduce the E&G carryforward balance in advance of the September 30 deadline, including the $10.9 million CHP transfer: "Bill and I discussed these items this morning and would like to move forward with recording these expenditures **so they will be reflected in the September 30 carry forward balance we must report to the BOG in early October**." (Exhibit 37 (emphasis added)). Because both Merck and Fortier have declined to be interviewed, their explanations for this decision are unknown.

[27] This additional $1.5 million transfer of auxiliary funds was *not* added to the auxiliary loan balance to be repaid with energy savings, but rather was committed and transferred into the CHP construction account on October 25, 2011.

[28] Prior to this decision, in March and April, 2012, UCF moved small amounts of E&G (totaling $161,535) from the E&G Admin & Finance—Energy & Sustainability account to a construction account created for CHP.

[29] As of September 2012, the outstanding principal and interest balance of the auxiliary loan was $9,430,637.15. (Exhibit 33).

The following day, on September 21, 2012, then-Associate Controller Christy Tant sent an email to Provost Waldrop, copying Assistant Vice President for Finance and University Controller Tracy Clark and other Finance and Budget Office employees, stating, "Please approve the transfer of $10,853,000 from the central carry forward [to the Administration & Finance department]. This amount relates to the Combined Heat and power Plant (CHP)." (Exhibit 38). The same morning, Waldrop responded: "**I approve with the understanding that these funds will be replaced with dollars from energy savings over several years**." (Exhibit 38 (emphasis added)). Waldrop declined to be interviewed and so we do not know his rationale for approving the transfer, what else he may have been told about it, or if he even knew that loaned auxiliary funds were effectively being swapped out for E&G funds. Nevertheless, his written approval did make clear that the use of E&G funds was conditioned on their repayment through energy savings.

Tant forwarded Waldrop's response to the Budget Office as proof of authorization to make a budget transfer of the E&G carryforward funds from the central E&G carryforward reserve to the Administration & Finance department. (Exhibit 38). The budget transfer was made the same day, after which the funds were ultimately transferred to the Facilities E&G carryforward account. On September 26, 2012, the $10,853,000 was transferred from the Facilities E&G carryforward account to the CHP construction account, effectively authorizing the use of funds in that amount to pay for the remaining construction costs of CHP and replace the outstanding balance of principal and accrued interest on the auxiliary loans of $9,430,637.15. (Exhibits 33 & 39). The BOG requested a subsequent mid-year FBCR as of December 31, 2012. The E&G carryforward balance UCF reported in response did not include the $11.1 million because it had already been transferred to the CHP construction account in September. (This amount was included in the "Expenditures to Date" line as part of the roll-forward of the E&G carryforward fund balance from July 1, 2012 to December 31, 2012, which had the effect of decreasing the reported E&G carryforward balance).

d) *"Repayments" Begin*

In January, 2013, CHP was turned over to UCF. (Exhibit 40). The plant began generating energy savings in July, 2013. (Exhibit 41). On June 30, 2014, UCF made its first payment towards the loan of E&G carryforward funds in the amount of $1 million. (Exhibit 42). This payment, however, was not paid to the central E&G reserve department that had funded the loan, but rather to a central auxiliary reserve department called "University Resources," as were all future payments.

On July 23, 2014, CFO Merck and Interim Provost Diane Chase executed a second MOU reflecting an updated loan amount of $10,231,359. (Exhibit 43). Payments under the new MOU, excluding the previous June, 2014 payment, were to begin on August 31, 2014 and continue each August 31 through 2025, and interest would accrue at 2 percent annually. (Exhibit 42). The amortization schedule attached to this new MOU indicated that payments would be made to the aforementioned central auxiliary reserve department rather than to the central E&G reserve department that had made the loan. It is unclear why there was nearly a two-year delay in documenting the loan of E&G funds to finance the CHP project, though the new MOU appears to have

been prompted by the June 2014 payment. Merck of course declined to be interviewed as part of this investigation. Chase also declined to be interviewed but in an email stated that she recalled no detailed conversations about the project or its source of funding.

Since the execution of the second MOU, UCF has made six annual payments towards the CHP loan which, in addition to the June, 2014 payment, total $7.3 million. (Exhibit 42). These payments have come from funds derived from "energy savings." Under the MOU's self-financing arrangement, the University's Utilities and Energy Services ("UES") department would calculate and collect the energy savings to be applied to the loan installments by billing departments for utility costs. UES works with the Space Planning Administration ("SPA") to determine which departments occupy building space throughout campus. UES subsequently uses that information to assign a percentage of UCF's total utility costs to each department. UES enters those percentages into the "Energy Cap" system, which integrates with PeopleSoft and helps UES generate utility bills. Most departments pay their utilities bills from funds they generate during the normal course of operation (i.e., "auxiliary funds"). E&G departments, however, pay their utility bills with E&G funds specifically reserved for PO&M activity. PO&M funds must be specifically requested from and approved by the State, while any shortfall is covered by E&G carryforward funds. The kilowatt hour rate charged by the University to each department is based on the same rate billed by UCF's outside energy providers, e.g. Duke Energy. In other words, for the energy UCF produces itself through CHP, UCF bills the same kilowatt hour rate that Duke Energy would bill for the same amount of energy. For the self-produced energy, the difference between the amount billed by the University to its departments (i.e., Duke Energy's kilowatt hour rate) and the internal overhead costs constitutes the "energy savings."[30]

Each of the loan repayments funded by UCF's newly generated "energy savings" were made into the central auxiliary reserve within the University Resources Department, pursuant to the instructions in the second MOU signed by Merck and Chase. As a result, any payments from E&G departments for energy consumed from CHP were effectively reclassified as auxiliary funds to the extent the payments exceeded CHP's overhead costs (though, again, it is permissible to use E&G funds for *actual* PO&M costs). At no point has the central E&G reserve department that originally funded the CHP project ever received any portion of these payments. Although a revised MOU was circulated by Tracy Clark in July 2017 to eliminate the accrual of interest on the loan, this revised MOU was never executed and did not propose to change where the loan payments were made.

The most recent payment on the internal loan occurred on June 3, 2019. Like the previous payments, the funds were paid into the central auxiliary reserve rather than the

[30] For example, if Duke Energy charges 10 cents/kWh while UCF can generate electricity at 5 cents/kWh, UES will charge UCF's departments at the 10 cents/kWh hour for all energy consumption. If UCF generates 40% of its energy on a $100 bill, then $60 will go to pay Duke Energy, $20 will go to pay the overhead costs of UCF's energy production, and the remaining $20 will be "energy savings." These overhead costs include both the cost to generate the energy and the administrative costs of the UES department.

central E&G refund. In total, $11,137,183 in E&G funds were expended on the project, and none of these funds were ever restored to an E&G account.

e) *Neither the BOT nor the BOG Approved the CHP's Funding*

The BOT's only involvement in the CHP project was to approve an amendment to the campus master plan to add the new facility in July 2010. Thereafter, it received periodic construction updates but was not informed or consulted about the source of funding. Instead, the initial funding (i.e., the loan of auxiliary funds) was approved by President Hitt and CFO Merck at the time of the initial MOU, with subsequent funding (i.e., the replacement of the loaned auxiliary funds with E&G carryforward funds) approved by Provost Waldrop, and later memorialized in the Second MOU signed by Merck and Interim Provost Chase. Because the internal loan to fund the project met the $10 million threshold set in the BOG Debt Management Guidelines, the project and its financing were required to be submitted to the BOG for approval. BOG staff have indicated that Merck was involved in the revisions to the BOG Debt Management Guidelines and was present at related meetings in 2010. Merck therefore knew or should have known that BOG approval of the project was required.

f) *Knowledge and Understanding of Relevant Statutes and Regulations*

Some University officials claim to have believed the energy savings statute specifically authorized this financing arrangement. According to former interim CFO Kathy Mitchell, in conversations during the fall of 2018, Lee Kernek (Associate VP for Facilities and Safety) indicated that she believed the statute permitted using E&G funds to pay for energy savings projects like CHP. Kernek further stated that she had discussed the CHP project and its funding with BOG Assistant Vice Chancellor of Finance & Facilities Chris Kinsley, who had approved it. Mitchell explained that based on these conversations, she did not include CHP on the University's initial list of improperly funded projects that was presented to the BOT in September 2018.

However, as indicated, the energy savings statute is silent on the use of E&G funds for such projects, as well as on self-financing through internal loans to be repaid with "energy savings." Additionally, Kinsley was interviewed and stated that although he had early discussions with Kernek about CHP, these discussions were largely conceptual and dealt with whether to use third-party financing or an internal loan, and that no decision either way had been made at that time. Kinsley indicated he later understood that the project was funded with auxiliary funds (which was initially the case), and that he was never made aware of nor asked to approve the switch to using E&G funds as the principal for the internal loan. Kinsley further indicated he believed such a use of E&G would be improper and would not have approved it, as the purchase of cogeneration equipment for a new power plant, and the construction of a new building to house such equipment, is not an "operating activity" for which E&G funds may be used pursuant to BOG Reg. 9.007(3)(a)(1).

As has been discussed, Kernek and Clark declined to be interviewed as part of this investigation, and their PIE Committee testimony did not address the CHP project or whether they understood E&G funds could be loaned for energy savings projects. The

extent to which other UCF officials may have understood CHP's funding to have been authorized by or otherwise appropriate under the relevant statute and BOG regulations is unclear. Hitt, Merck, Waldrop and Chase also declined to be interviewed, and among them only Merck was subpoenaed by the PIE Committee to provide testimony during its investigation. However, like Kernek and Clark, Merck's testimony did not cover the CHP project or the financing arrangement for it. Nevertheless, as stated, Merck had notice of the requirements set forth in the BOG Debt Management Guidelines (and in fact was involved with the revision thereof), and thus should have known the project needed BOG approval. As Waldrop and Chase declined to be interviewed, it is unknown whether they understood the E&G transfer or the Second MOU to have been authorized by BOG Reg. 9.007(3) or whether BOG Reg. 9.007(3) was discussed at all at the time. Chase, however, did confirm by email that she recalled no detailed discussions surrounding the Second MOU.

Regardless, Provost Waldrop clearly approved the use of E&G funds for the project on the condition that they would be replenished with energy savings. (Exhibit 38). Despite this stated requirement, no repayments were ever made into the E&G carryforward account. Instead, the energy savings were transferred to the central auxiliary reserve account with the knowledge and approval of University officials. According to Mitchell, in the fall of 2018, Kernek and Clark indicated that they believed it was appropriate to use the energy savings from CHP to pay for additional energy savings projects, such as the District Energy Plant IV, a separate plant to produce both chilled and hot water for cooling and dehumidification of campus buildings, rather than repay the CHP loan.[31] However, the central auxiliary reserve department that received the energy savings payments receives funds from a variety of sources and has been used to fund many different projects and not just other energy savings projects. Additionally, as explained, the energy savings transferred into this department partly consisted of E&G funds. This effectively changed the color of the affected E&G funds to auxiliary funds, which have no restrictions on their use.[32]

g) *Timing Concerns*

The decision to replace the auxiliary funds with E&G funds coincided with an anticipated reporting deadline and was most likely motivated by that deadline rather than any actual need for the funds at that time. As noted, we have uncovered no discussion regarding the use of E&G funds for the construction of CHP (which, again, had already been fully funded with auxiliary funds) prior to September, 2012. Instead, the first discussions regarding the proposed transfer only arose *after* September 12, 2012 when the BOG informed SUS institutions that they would need to report their E&G carryforward balance as of September 30, 2012 "in preparation for the upcoming

[31] Kinsley indicated his understanding of CHP was that the energy savings would first be used to repay the loan in accordance with the amortization schedule, with only the excess savings going toward new energy saving projects.

[32] Because UES's metering system does not track the source of the energy consumed by each department (i.e, CHP or other university power-generating sources), the exact amount of energy savings (which only apply to energy consumed from CHP) derived from E&G department payments could not be determined.

Legislative session … ." Following this announcement, Fortier stated in an email that she and Merck wanted to proceed with the transfer of E&G funds to CHP *for the explicit purpose of ensuring the transfer was "reflected in the September 30 carry forward balance we must report to the BOG …* ." Again, although neither Fortier nor Merck agreed to be interviewed, the plain import of Fortier's statement is that they sought to reduce their carryforward balance so as to appear—to both the BOG and the Florida Legislature—that they had fewer E&G funds in reserve than would in fact have otherwise been available had the transfer not been made.

E. Global UCF Building

1. Overview

Global UCF is a nearly 52,000 square foot building on UCF's main campus which serves as its "international hub," with classrooms, offices, and support spaces for use by international students and internationally-focused programs. Plans for the building appear to have been first discussed in late 2013 or early 2014. Construction began in December 2014, and the building officially opened on August 31, 2016. The project was conceived from the beginning to involve the construction of a new building. The project's initial budget was approximately $15 million. Actual construction costs were $16.6 million. (*See* Appendix D at p.2).

As detailed in the chart at Appendix C, page 2, a significant portion of the funding for Global UCF came from E&G funds. In June 2014, E&G funds were first budgeted for furniture, fixtures and equipment ("FF&E") for the new building in the amount of $1.5 million for the 2015-16 fiscal year, though approximately $1.6 in E&G carryforward funds were ultimately transferred for that purpose in June 2016. Additionally, from May 2014 to December 2014, the construction account for the project was funded with $10 million in investment earnings derived from the investment of both E&G and non-E&G funds. Officials in UCF's Finance & Accounting ("F&A") Department did not allocate these investment gains to departments across the university (including E&G) in proportion to their pro rata share, as was UCF's normal practice. As a result, investment gains that would normally have been allocated to E&G accounts (and therefore unavailable for a new construction project like Global UCF) were instead included in the $10 million transferred to the project. Had the gains been allocated according to the methodology in place at the time, an estimated $3.8 million would have been treated as E&G and credited to E&G accounts. Thus, a total of approximately $5.4 million (the unallocated investment gains plus the direct transfer) of E&G funds were used to pay for the Global UCF building.

The decision not to allocate these investment earnings to E&G and other accounts and instead use them to pay for the construction of Global UCF appears to have been made by CFO Bill Merck without BOT or BOG approval and without significant BOT input. The BOT approved an amendment to the University's 2010 Campus Master Plan at its March 27, 2014 meeting, paving the way for the construction of Global UCF. Many details about the project, including its anticipated cost, were not shared with the BOT at that time, and the potential funding sources discussed during the meeting were hypothetical and ultimately not utilized. By May, however, a decision had been made to

use some E&G funds for the project (specifically, for the FF&E), and internal documents began to reflect that E&G was one of the funding sources. On May 22, 2014, the BOT granted approval to proceed with the construction of Global UCF. At that time, Merck informed the BOT about the project's estimated $15 million cost as well as the plan to use the $10 million of investment gains and $3.5 million of auxiliary funds to finance the project. However, he failed to disclose the anticipated use of E&G funds for the project or the fact that the investment gains were at least partly derived from E&G funds which, according to BOG regulations, should keep their E&G "color" and therefore may only be used for operating activities, not fixed capital outlay projects.

2. Timeline of Significant Events

a) *UCF's investment program*

Over 90% of Global UCF's construction costs were funded by investment earnings, including earnings that UCF ordinarily would have treated as E&G funds but did not in this instance. By way of background, starting in 2010, UCF assumed responsibility for investing funds that are being held to meet its current expenses in response to a devolution of authority enacted by the State in 2002. *See* Fla. Stat. §§ 218.415, 1011.42(5). (Exhibit 44). Legislation enacted in connection with the 2002 devolution gave SUS institutions the ability to direct and control their own investments if done pursuant to a written investment policy. In the absence of a written policy, the University's investment options would be largely limited to participating in the State Treasury's Special Purpose Investment Account ("SPIA"), a pooled investment program that invests in short-term liquid instruments and intermediate term fixed income securities. (Exhibit 44).

On May 22, 2008, the BOT approved the UCF Investment Policy. (Exhibits 45 & 46). UCF formed an Investment Work Group chaired by Trustee Conrad Santiago which conducted a search for potential investment advisors. (Exhibits 47 & 48). Following that search, UCF engaged Orlando-based The Bogdahn Group (now known as AndCo Consulting). (Exhibit 49). With the Bogdahn Group's assistance, UCF designed a number of internally segmented portfolios with differing investment objectives, to be administered by professional investment managers. (Exhibit 50). In January, 2010, UCF entered into a custodial agreement with BNY Mellon to serve as custodian for its investment accounts. (Exhibit 51). In March, 2010, UCF transferred $210 million from its SPIA account into its newly established custodial accounts. UCF retained some of its existing investments in SPIA, and to this day continues to maintain investments in the SPIA in addition to its custodial accounts.[33]

At all relevant times, a portion of the principal invested in the BNY Mellon accounts has derived from appropriations of E&G funds, and a portion of the investment earnings from those accounts was therefore subject to BOG Reg. 9.007(5).[34] The BOG

[33] During this period, UCF also maintained two tranches of CDARS investments with CNL Bank, which were not managed or overseen by the Bogdahn Group. (Exhibit 52).

[34] As further described below, UCF treated the makeup of the investment principal as being directly proportional to the makeup of UCF's total cash balance.

adopted BOG Reg. 9.007(5) in December, 2007, requiring "[i]nterest earnings … from the investment of current-year" E&G funds to be "subject to the same expenditure regulations" as the source E&G funds and generally prohibits their use on "fixed capital outlay projects." (Exhibit 53). The BOG proposed amending Reg. 9.007(5) in September, 2013 to clarify that "E&G interest earnings" could not be used for *any* "non-E&G related activities," in addition to fixed capital outlay projects. (Exhibit 54). These amendments were adopted in November, 2013, and also required universities to track the use of E&G interest earnings under Reg. 9.007(3). (Exhibit 54).

BOG Reg. 9.007(5) effectively requires interest generated from E&G funds to "maintain the same color" as E&G funds; that is to say, the interest is subject to the same restrictions on use as the E&G principal itself. The regulation does not explicitly state whether all types of E&G investment earnings, such as dividends and capital gains, must also maintain the same color; however, the BOG staff's interpretation of Reg. 9.007(5) is that they do. The State of Florida Auditor General shared this interpretation in a July 2019 audit report concerning Florida International University, which found that non-interest investment income (like realized gains on the sale of securities) is subject to BOG Reg. 9.007(5). (Exhibit 55). UCF's own methodology for allocating investment earnings, which we describe below, makes no distinction between different types of investment earnings, which indicates that UCF itself interpreted the regulation consistent with the interpretations of the BOG and the Auditor General.

The Investment Policy which UCF adopted shortly after the publication of BOG Reg. 9.007(5) did not prescribe any particular rules or standards regarding the investment of E&G funds and does not establish any methodology for implementing the rule. (Exhibit 46). Instead, UCF's investments were set up in a manner that contemplated that E&G and non-E&G funds would be commingled, which no law or rule prohibits. The investment portfolios held at BNY Mellon were not designed to segregate E&G funds from other funds; instead, all of the portfolios can be said to hold a mixture of E&G and non-E&G funds. UCF's agreements with its advisors and custodian do not delegate any of UCF's duties with respect to implementing Reg. 9.007(5), and in practice, UCF took upon itself the responsibility to allocate investment earnings.[35]

The Auditor General has indicated that "when restricted funds are commingled with other funds for investment purposes, it is important for records to demonstrate the equitable allocation of generated investment income to the respective funding source to ensure that restricted income is used for purposes consistent with the applicable funding restrictions." (Exhibit 55). Though UCF has no formal written policy for segregating E&G funds from other funds it invests, UCF did at all relevant times endeavor to provide E&G departments with their equitable share of investment earnings. Specifically, UCF developed a methodology for allocating investment earnings that appears to have been motivated in part by BOG Reg. 9.007(5). (Exhibits 56 & 57). Broadly stated, the goal of UCF's allocation methodology was to distribute net investment earnings (interest, dividends, and gains realized from the sale of securities,

[35] Troy Brown and Dave West, the Bogdahn Group consultants who assisted UCF, indicated that the funds were all treated as a "giant pool of money" by UCF and that E&G funds were not discussed.

minus expenses) across all major accounting departments on a pro rata basis. More precisely, on a monthly basis, F&A Department employees first determine the total cash balance held in all of its depository and investment accounts, as reflected in the statements received from the depository or investment institutions. Separately, UCF tracks how its total cash balance is allocated among its various internal departments based on what percentage of the total cash balance each department is authorized to spend. Therefore, when earnings were generated by UCF's investments, they were typically not withdrawn from the BNY account, but instead were allocated on the books as a portion of the total cash balance.[36] Details of the allocation methodology have changed over time, but this basic structure has been in place since at least 2010. The rationale for the methodology was that because each department's funds were simply treated as a portion of the total cash balance (instead of being invested in segregated accounts), each department should share equally in the risk of loss and the benefits of investment gains.

Between January, 2010 and August, 2014, UCF distributed its monthly net investment earnings across 15 to 16 different departments, including two E&G departments: Education & General - Main, and Education & General - College of Medicine. The distribution was based on a percentage of the Average Daily Cash Balance (ADB) of each department compared to the overall UCF ADB.

b) *Deviations from the distribution methodology and relation to Global UCF*

When UCF followed its distribution methodology as described above, E&G departments would be allocated a monthly distribution equivalent to their pro rata share of total realized investment earnings (interest, dividends and realized gains from securities transactions, minus expenses). The methodology, when applied faithfully, appears to have been a reasonable means of complying with BOG Reg. 9.007(5), given that UCF had decided to pool both E&G and non-E&G funds in the same investment accounts (which the regulation does not prohibit). But UCF sometimes deviated from this methodology. Between 2012 and 2014, there were at least three significant deviations that effectively deprived E&G departments of the portion of monthly earnings to which they would otherwise be entitled under the methodology. In essence, these funds were allocated to other departments where they could be spent in ways that violated the restrictions on the use of E&G funds.

(1) 2012 withdrawal of $2 million

On or about March 13, 2012, UCF decided to withdraw $2 million in realized investment gains amidst an announcement of significant state budget cuts. The decision to potentially utilize the investment gains was documented in a budget document titled "Funding Needs and Sources" which was circulated on that date between Tracy Clark

[36] UCF has only made two cash withdrawals from the BNY account, both in 2012. The first withdrawal, in the amount of $2 million, is discussed below. The second, a $6.75 million withdrawal, was from a money market account. The second withdrawal did not include any unallocated or improperly allocated investment gains.

(then-Assistant VP for Finance and University Controller), Christy Tant (then-Associate Controller) and Lynn Gonzalez (then-Associate VP for Academic Affairs). (Exhibit 58). The report identified the $2 million as a potential funding source for various, university-wide funding needs. (Exhibit 58). One day later, CFO Bill Merck asked the Boghdan Group how UCF could liquidate $2 million in "equity gains to help us offset our legislative budget cuts … ." (Exhibit 59). Afterwards, Merck sent letters of instruction to BNY Mellon and UCF's investment managers to carry out the withdrawals.[37] (Exhibits 60 & 61).

Typically, realized gains from the sale of securities were allocated across all departments in the same manner as the monthly allocations of interest and dividends. The $2 million in realized gains liquidated here, however, were never allocated. Instead, in June 2012, UCF created a new department called "University Resources" and used all of the $2 million to fund that department. University Resources was set up as an auxiliary department, which means that its funds were considered to have been earned by the University, with no restrictions on their use. (Exhibit 62). Based on the E&G departments' share of UCF's total cash balance as of June, 2012, an estimated $947,878 would have been allocated to E&G had UCF followed its normal methodology. Over the next three years, funds from the University Resources department, including the $2 million in realized gains, were used to purchase the broadcast license for WUCF TV, a PBS-affiliated television station, as well as broadcasting equipment.[38]

(2) 2012 - 2014 distributions to pay debt service

Additionally, in July 2012 and continuing for the next two years, approximately $88,000 per month was distributed outside of the methodology to repay an internal loan for the construction of the Morgridge International Reading Center ("MIRC"), a 16,726 gross square foot building on UCF's main campus designed to support literacy programs and initiatives with an international focus. MIRC was first conceived through a significant gift from John and Carrie Morgridge and the Morgridge Family Foundation and built in 2010 and 2011. In January, 2011, CFO Merck and Provost Tony Waldrop executed a memorandum of understanding ("MOU") that called for UCF to provide additional financial support to the project through a $2 million loan. The MOU provided that the loan would be repaid with Courtelis funds from the State, but that if such funds were unavailable, Merck and Waldrop would identify an alternative source. (Exhibit 64). No payments were made between March, 2011 and June, 2012, and nearly $50,000 in interest accrued. On August 1, 2012, Merck and Waldrop decided to change the terms of the MOU. According to an internal memo, Merck and Waldrop decided that "[e]ffective 7/01/2012, interest accruals will cease and the balance outstanding at 6/30/12 ($2,118,659) will be paid off from distributions of University cash and investment interest earnings on a straight-line basis over two years." (Exhibit 65). Over

[37] Although the first letter removed $2 million in cash from the BNY Mellon accounts, a second letter of instruction was required to ensure that the $2 million could be considered realized gains for accounting purposes.

[38] The Board of Trustees agenda item approving the purchasing of the license explicitly forbade the use of E&G funds for the purchase. (Exhibit 63).

the next two years, UCF made 24 monthly payments totaling $2,118,659 from its central investments reserve account using investment earnings that were not distributed through the established allocation methodology. Had UCF followed its methodology, an estimated $893,456 of these funds would have been allocated to E&G departments.

(3) 2013 movement of $10 million to the central reserve

The largest of the deviations—and one most relevant to this investigation—occurred in June 2013, when $10 million in realized investment gains were not distributed across all accounting departments but instead held in a central investments reserve account until 2014, when the funds were redirected to the Global UCF construction account in four installments: $206,941 on May 8, 2014, $121,685 on May 15, 2014, $380,418 on July 18, 2014 and the remaining $9,290,956 on December 17, 2014. The full history of this deviation and its relation to Global UCF is provided below. Had UCF's typical allocation methodology been applied to these $10 million in realized gains—i.e., based upon each department's share of UCF's total cash balance as of June, 2013—approximately $3.8 million should have been (but was not) distributed to E&G departments.

c) *Origins of Global UCF funding plan*

In June 2013, UCF decided to change its investment strategy by shifting to passive Vanguard funds, resulting in the realization of $10.4 million in gains.[39] (Exhibits 66 & 67). A small portion of the realized gains (totaling approximately $400,000) were allocated through the distribution methodology, but a decision was made to hold back most of it—$10 million in all. (Exhibit 66). The decision to hold back the $10 million was apparently made by Merck, as indicated in an e-mail from Tracy Clark. (Exhibit 68). Neither of those individuals agreed to be interviewed as part of our investigation and so we do not have their perspective as to why only $400,000 in realized gains were allocated pursuant to the established methodology while $10 million were held back and kept in reserve until 2014. A typical reason for holding investment gains in reserve would be to protect against a market downturn which could threaten to reduce monthly investment income, and F&A Department emails suggest that was the original purpose for holding back these funds. (Exhibit 68). Per the normal practice, none of the realized gains from this transaction were withdrawn from the BNY accounts.

There is nothing that ties the initial decision in June 2013 to hold $10 million in reserve to the Global UCF project. The earliest mention of Global UCF in FFC records appears to have been several months later, on February 12, 2014, when the Committee approved adding the project to the 2010 Campus Master Plan, though it appears no decision as to the funding source was made at that time. (Exhibit 69). On March 7, 2014, Clark raised with Merck the possibility of using the $10 million in undistributed investment earnings for Global UCF. (Exhibit 70). On March 27, 2014, the BOT approved adding Global UCF to UCF's Campus Master Plan to allow for the project to be built. (Exhibits 71, 72 & 73). At the time, Merck suggested the building could

[39] The BNY investments also generated $500,000 of other income (interest and dividends) in the same month, which were distributed according to the ordinary methodology. (Exhibit 66).

potentially "pay for itself" through fees charged by the international student program and by "rent[ing] it to ourselves a little bit," though he did not explain what this meant. Merck did not discuss the proposed plan to use undistributed investment earnings to fund the project and it is unclear at that point if he had accepted Clark's proposal. The FFC later approved a plan to finance the construction of Global UCF through an internal loan on April 3, 2014, but this plan does not appear to have materialized. (Exhibit 74).

On May 6, 2014, Merck granted approval via email to fund the Global UCF building with the $10 million in undistributed investment gains plus additional funds as needed coming from the University Resources Department, which, based upon a total estimated cost of $15 million, would have been approximately $5 million.[40] That same day, Christy Tant directed Associate Controller Wilson Rosario to set up a project account for UCF Global, leading to the establishment of a construction account in Facilities. Two days later, the first installment of $206,941 in undistributed investment earnings was transferred to the construction account. On May 13, 2014, Tant indicated by email that Merck's initial plan had been modified (presumably by Merck) to add $1.5 million in E&G funds for the purchase of FF&E, thus reducing the share from University Resources to $3.5 million. (Exhibit 75).

d) *Approval by the BOT and spending history*

The BOT did not officially approve of proceeding with the construction of Global UCF, or its funding source, however, until May 22, 2014. (Exhibits 76, 77 & 78). The agenda item for the meeting provided that "[f]unding for this approximately $10 million building will come from non-realized [sic] investment income that has not been previously allocated." (Exhibit 77). According to the audio recording of the May 22, 2014 meeting, Merck reported that the initial budget for the building was approximately $15 million, $5 million more than stated in the agenda item. Merck informed the Board that "10 million that we realized, got in the form of realized gains from our transfer from active funds into the S&P 500, Vanguard S&P 500 Index Fund" would be used for the Global UCF project, along with "about 3.5 [million] out of some auxiliary money that we put aside in the event that we had another cut to our budget" and "about another million and a half out of other funds, probably—well, just some other funds … ." Although the F&A Department had already decided that these "other funds" were to be E&G funds, this was not revealed to the BOT. Instead, Merck suggested that the $1.5 million "could be auxiliary funds too … ." (Exhibit 22).

Moreover, Merck did not explain to the BOT that the $10 million in investment gains had not been distributed to E&G and other accounting departments according to the typical allocation methodology. Although the BOT was regularly updated on the performance of UCF's investments, these updates did not address F&A's allocation

[40] Also, there were initial discussions within the F&A Department about funding the project with an internal loan, to be repaid by revenues earned from Shorelight Education. In 2013, UCF announced it was partnering with Shorelight Education to recruit international students to its campus. Shorelight planned to lease space in the to-be-constructed Global UCF building, which would help pay for the project. Although Shorelight does presently rent space in Global UCF, the plan to fund Global UCF through an internal loan appears to have never materialized.

methodology or the need to comply with BOG regulations regarding the investment of E&G funds. Therefore, even if the BOT had been told that F&A had deviated from its normal methodology in this case, it likely would not have understood the import of that fact. Trustees Marcos Marchena, Robert Garvy and Alex Martins, who attended both the April 3, 2014 FFC meeting and the May 22, 2014 BOT meeting, confirmed in separate interviews that this subject was never addressed with the BOT. Because Merck has declined to be interviewed in connection with this investigation, his reasons for these omissions—and whether he understood BOG Reg. 9.007(5) to apply to the $10 million in undistributed investment earnings—are unknown.

On July 17, 2014, just over a month after the BOT approved the project, Global UCF first appeared on an E&G Commitments List, indicating it was likely discussed in a "budget chat" meeting between the Provost, the CFO and their respective staffs. The list confirmed the plan outlined in internal emails (but not disclosed to the BOT) that $1.5 million in E&G funds would be used for FF&E expenses for the building during the 2015-2016 fiscal year. (Exhibit 79). The planned use of E&G funds did not appear on the Fund Balance Composition Report ("FBCR"), however, until approximately one year later, in August 2015. In that FBCR, the $1.5 million in E&G carryforward funds was categorized as being for "Equipment Replacements," apparently—according to Christy Tant in her interview—because that was the most appropriate category for furniture and equipment to fit into. Of course, the FF&E was going into a *new* building and not replacing anything. FF&E expenditures began on September 3, 2015, but the actual transfer of the E&G funds to cover these purchases, which totaled approximately $1.62 million, did not occur until June 30, 2016. (Appendix D at p. 2).

In August, 2016, Global UCF officially opened, housing the Global UCF program, the English Language Institute, International Affairs and Global Strategies, and the UCF Abroad Program. Construction spending, however, has continued through June 30, 2019, and totals approximately $16.6 million. (Appendix D at p. 2).

e) *Knowledge and Understanding of Relevant Regulations*

Internal emails indicate that Tracy Clark and other F&A employees were aware of BOG Reg. 9.007(5) around the time it was enacted in 2007, when the BNY Mellon accounts were established in 2010, and when the BOG amended BOG Reg. 9.007(5) in 2013. (Exhibits 56, 57, 81 & 82). Additionally, when questioned by PIE Committee investigators as to whether he recalled the regulation being amended in 2013 and that E&G that was invested had to keep the E&G "color," Merck testified that he "recall[ed] it being expressed. I don't remember reading particulars, but I know that when we started to allocate funds from realized gains, Tracy would be careful to make sure that she was using -- I don't know how she did it, whether it was on a percentage basis or what, but to try to make sure that she was using interest on everything but E&G, when we were trying to use those for non-E&G type things." (Exhibit 12 at 124). Clark was also questioned by PIE Committee investigators, but the scope of her testimony did not include the use of investment earnings for Global UCF, the University's investment allocation practices or her understanding of BOG Reg. 9.007(5).

The key individuals most likely involved in developing and implementing the allocation methodology, such as Merck and Clark, declined to be interviewed, and thus we do not know whether or why they believed the $10 million in investment gains used on Global UCF did not need to be allocated according to their normal methodology. Tant and Interim University Controller Brad Hodum, who were not directly involved in developing the allocation methodology and appear not to have been involved in discussions about BOG Reg. 9.007(5), suggested that these funds may have been treated differently because they were from a large, one-time selloff of securities rather than interest earnings like those explicitly mentioned in BOG Reg. 9.007(5). Tant further speculated it was the general understanding at the time that this requirement only applied to interest, and not to other kinds of investment earnings.

This speculation, however, is inconsistent with UCF's own historical practice, which generally allocated *all* investment gains—including capital gains realized from the sale of securities—in accordance with the stated methodology. Even for the Vanguard transaction that generated the funds used on Global UCF, at least $400,000 of the $10.4 million of realized gains were actually distributed in accordance with the allocation methodology, strongly suggesting that UCF understood at the time that there was no distinction between interest and other investment gains. While the BOG has no written guidance interpreting the regulation, BOG staff advised us they expected SUS institutions to treat *all* E&G investment income as E&G, and that they believed the regulation was sufficiently clear. This appears consistent with the practice of the State of Florida Auditor General, which has similarly applied BOG Reg. 9.007(5) to realized capital gains in addition to interest. (Exhibit 55). As discussed, the BOT was apparently unaware of and not informed about BOG Reg. 9.007(5) or the University's investment allocation methodology and practices.

F. CREOL Building Expansion

1. Overview

The CREOL Phase II expansion is a 14,000 square foot expansion of the Center for Research and Education in Optics and Lasers (CREOL) building, located on UCF's main campus and home to the College of Optics and Photonics (COP). This is the second expansion of the CREOL building and includes new labs and offices, along with the shell for an auditorium to be completed at a later date. Plans for the project appear to have first been discussed in the summer or fall of 2014. Construction began in the spring of 2017, and the new space is anticipated to open in late August 2019. Although an expansion of the existing building, the project was conceived from the start as involving new construction. The project's initial budget was $4 million, but later increased to $6.8 million. Actual construction costs through June 30, 2019 are approximately $5.2 million. (Appendix D at p. 2).

As detailed in the chart at Appendix C, page 2, a significant portion of the funding for the CREOL Phase II expansion project came from E&G carryforward funds. In July 2015, the University transferred $4 million of E&G carryforward funds from the University's central E&G reserve account to the COP's E&G carryforward account in order to fund the project. From there the funds were transferred to a construction

account set up for the project in February 2016, although the first significant spending for construction design did not occur until over a year later in March 2017. The University later transferred an additional $17,000 of E&G funds to the construction account in May 2018.

The initial $4 million of E&G funding for the CREOL Phase II expansion project was recommended by the University Budget Committee ("UBC"), co-chaired at the time by Provost Dale Whittaker and CFO Bill Merck, and approved by President John Hitt, as part of an effort to identify excess E&G carryforward funds held by the University's colleges and divisions and reallocate them to fund University-wide priorities identified by the UBC. The UBC members we interviewed were unaware of any restrictions on the use of E&G funds and trusted that the funds were appropriate for the uses that were proposed, including the CREOL Phase II expansion. Hitt, Whittaker and Merck declined to be interviewed as part of this investigation, but evidence from other sources as to their respective knowledge and understanding of the restrictions is discussed below. None of the three raised any concerns about the use of E&G funds for the CREOL Phase II expansion project.

We found no evidence that the BOT approved the use of E&G funds for the CREOL Phase II expansion project. In fact, it appears the BOT was not even made aware of the UBC's plan to reallocate excess carryforward funds in 2015. While the project was included in the Capital Outlay Budget for fiscal year 2017-18, approved by the BOT in May 2017, it was identified as being "internally funded" with no further explanation.

2. Timeline of Significant Events

a) *The CREOL building*

CREOL started as a research center in 1987, became home to the COP in 2004, and has continued to grow since. The current CREOL building was constructed in 1996 and originally consisted of two floors of labs and offices. (Exhibit 83 at p.18). The building has since undergone two separate renovations to expand the original footprint: Phase I and Phase II. The Phase I expansion added a three-story addition onto the north side of the building around 2009, (Exhibits 83 & 84), and is beyond the scope of this investigation.[41]

Continued growth of the COP, including the planned and eventual hiring of new faculty members, created the need for additional space in the CREOL building. The Phase II expansion is another three-story addition, this time to the east side of the building, totaling 14,000 square feet. The initial project budget was $4 million, but later increased to $6.8 million. While the building plans changed over time, the final plan includes an auditorium shell on the first floor, with built-out labs and offices on the second and third floors. (Exhibits 84 & 85).

[41] Phase I included a subsequent lab build-out of the third floor in 2014 and 2015 which was funded from non-E&G sources. This was approved in late 2014 and funded in early 2015, and references to this project appear at times in materials involving the Phase II expansion.

b) *Reconstitution of the UBC in fall 2014 and decision to reallocate excess E&G carryforward funds*

In the fall of 2014, at President Hitt's request, Provost Whittaker reconvened the UBC to prioritize and make recommendations regarding the allocation of University funds.[42] The UBC was comprised of faculty, administrators, staff and students. (Exhibit 86). UBC members identified during the relevant time period include: Sydney Alexander, Debra Copertino, Maribeth Ehasz, Grant Heston, Keith Koons, CFO Merck, MJ Soileau and Provost Whittaker. (*See* Exhibit 87). Senior Finance officials Tracy Clark (Associate VP for Finance) and Christy Tant (Sr. Associate Controller for Budget, Contracts and Grants, and Compliance) did not serve on the UBC but provided support and regularly attended meetings.

Over the next several months, the UBC developed a plan to identify E&G carryforward funds held by the University's colleges and divisions that exceeded their 3-year budget commitments and reallocate them to fund University priorities recommended by the UBC. Approximately $10 million in carryforward funds were identified pursuant to this plan and pooled together. The colleges and divisions were invited to then submit proposals for how the carryforward funds should be spent for consideration by the UBC. More than 50 proposals were submitted, with 15 ultimately approved for full or partial funding by the UBC using the $10 million in E&G carryforward funds. This process was explained in a July 27, 2015 email from Provost Whittaker, with the specific recipients of the funding notified shortly after. (Exhibit 86). As will be discussed, the CREOL Phase II expansion project was one of the proposals selected to receive E&G carryforward funding under this reallocation plan.

c) *The UBC approves the CREOL Phase II expansion project for carryforward funding*

The initial plan for the CREOL Phase II expansion appears to have been developed between August and October 2014, with an initial estimated cost of $4.125 million. (Exhibits 83 & 84). From the start, and through its various plan iterations, the project plainly involved new construction that would significantly expand the existing CREOL building. (*E.g.,* Exhibits 88 & 89). In early 2015, the project was submitted to Tracy Clark and Christy Tant to be considered for reallocation funding by the UBC.

In April 2015, Clark met with Mark Wagenhauser, the Associate Director and Business Manager of CREOL, to discuss the budget requests and carryforward plans that the COP had submitted to the Academic Affairs division, including the CREOL Phase II expansion project. (Exhibits 90 & 91). This was because the UBC would soon be considering the carryforward plans and funding requests. (Exhibit 90). Wagenhauser confirmed to Clark that the expansion project was a critical need, especially given the COP's plan to hire four new faculty members. (Exhibits 90 & 91).

A list of funding requests from the University's colleges and divisions, including the COP's request to fund the CREOL Phase II expansion project, was apparently

[42] The UBC had stopped meeting several years earlier due to the recession and state budget cuts.

discussed at the UBC's May 2015 meeting. (*See* Exhibit 87). In an email sent to Committee members before the meeting, Clark explained that she had discussed the need to prioritize funding requests with the budget directors of the colleges and divisions, and cited as an example that the COP had identified the $4 million CREOL Phase II expansion project as a critical need in fiscal year 2015-16. (Exhibit 87). At the meeting, the UBC selected the CREOL Phase II expansion project, among others, for further consideration to receive funding. Wagenhauser was notified, conferred with the COP Dean, and confirmed to Clark and Tant by email on June 1, 2015 that the CREOL Phase II expansion project was in fact a "High Priority." (*See* Exhibit 92).

The UBC met again on June 9, 2015 to recommend which proposals should be funded with the E&G carryforward funds that had been collected pursuant to the reallocation plan. Meeting attendees included Provost Whittaker, CFO Merck, Clark and Tant, along with Maribeth Ehasz (VP for Student Development & Enrollment Services), Deb German (Dean and VP for Health Affairs, College of Medicine), Grant Heston (VP for Communication & Marketing), Jarell Jones (Student Government Leadership), Keith Koons (Associate Director for Personnel and Faculty Affairs for the School of Performing Arts), and M.J. Soileau (VP of the Office for Research and Commercialization). (Exhibit 93).

As its first order of business, the UBC voted to formally approve the plan to redistribute $10 million in excess E&G carryforward funds by a 7 to 1 vote.[43] The Committee then allocated the $10 million between three categories of funding requests: 1) Student Success; 2) Graduate and Research Growth; and 3) Capital, Infrastructure, and IT. Next, subcommittees were formed to consider the funding requests in each category and make recommendations to the full Committee. Whittaker and Merck were assigned to the Capital, Infrastructure, and IT subcommittee, which evaluated the proposed allocation of $4 million for the CREOL Phase II expansion project, among others. (Exhibit 93). It appears that Whittaker and Merck made the preliminary recommendation to fund the CREOL Phase II expansion project, and that their recommendation was then accepted by the full UBC.[44]

According to the UBC members we interviewed who attended this meeting, there was no discussion of any restrictions on the use of the $10 million in excess E&G carryforward funds, which is confirmed by the minutes.[45] Moreover, these UBC members reported that neither Merck nor the other Senior Finance staff who were present warned them that there was any issue or risk in using the carryforward funds to finance a construction project like the CREOL Phase II expansion, such as, for example, that using the funds might result in an audit comment by the State Auditor General.

[43] The meeting minutes indicate an estimated $12 million in carryforward funds were identified for possible reallocation, but that approximately $2 million was "to be withheld for critical needs." The minutes do not identify who cast which votes.

[44] This conflicts with Merck's PIE Committee testimony that he "wasn't personally involved" in the CREOL Phase II expansion project and "didn't really pay much attention to it." (Exhibit 12 at pp. 71-72).

[45] UBC meetings are not recorded.

These UBC members also indicated they were unaware at the time of any restrictions on the use of E&G funds, they assumed the funds to be reallocated were proper to use for the various projects under consideration, they understood they were only picking the projects to prioritize for funding, and they did not know anything was potentially improper about the recommended allocation of $4 million to the CREOL Phase II expansion project.

d) *President Hitt approves the use of E&G funds for the CREOL Phase II expansion and the funds are transferred*

On July 27, 2015, several weeks after the UBC determined which projects to recommend for funding with reallocated E&G carryforward funds, Provost Whittaker sent an email to University faculty and staff explaining the reallocation plan and announcing that 15 projects had been approved for full or partial funding. (Exhibit 86). Since the UBC only made funding recommendations which were subject to final approval by President Hitt, it can be reasonably concluded that, prior to the date of Whittaker's email, President Hitt had approved the recommendation to allocate $4 million in carryforward funds for the CREOL Phase II expansion. Confirming this, just a few weeks later, Hitt approved the University's Allocation Document, which identified the University's planned allocation of E&G funds for fiscal year 2015-16.[46] That document listed "CREOL Phase II" under "University Budget Committee allocations" with $4 million in approved funding. (Exhibit 94). As Hitt declined to be interviewed, we could not ask him what he understood about the CREOL Phase II expansion project, the propriety of its funding with E&G funds or its inclusion on the Allocation Document.

On July 31, 2015, Megan Diehl, Assistant Director, Fiscal Administration, informed the COP Dean and Wagenhauser that the CREOL Phase II expansion project had been selected for funding under the reallocation plan. (Exhibit 95).[47] That same day, UCF transferred $4 million via a budget ledger entry from the central E&G reserve account to the COP's E&G carryforward account. (Appendix C at p. 2). We found no emails requesting authorization for, or execution of, this specific transfer. That is not surprising, however, since the transfer was made via the reallocation process approved by the UBC and was part of a larger set of similar transfers to multiple colleges and divisions.

On August 18, 2015, the University submitted its FY 2015-16 Fund Balance Composition Report ("FBCR") to the BOG. (Exhibit 96). This FBCR, which shared the University's E&G carryforward balance as of the start of the new fiscal year and the date

[46] As discussed earlier in this Report, the Allocation Document sets forth the University's plans to commit E&G funds during the current fiscal year, is used as written authorization to carry out budget transfers of E&G funds, and must be recommended by the Provost and approved by the President (which is evidenced by their signatures).

[47] Wagenhauser knew the $4 million was from E&G carryforward funds, but stated he was not involved in any discussions concerning whether the funds could be used for a project like the CREOL Phase II expansion, had no understanding about restrictions on the use of E&G funds, and assumed the use of such funds had already been vetted given the personal involvement of Finance leaders like Merck and Clark, among others.

of the report, included the $4 million in E&G funds budgeted for the CREOL Phase II expansion project in the "Commitments" section. The $4 million for the project was part of $13 million included in a subcategory of Commitments called "Research Support."[48] Christy Tant was responsible for preparing this FBCR and, in her interview, explained that she believed this was the most appropriate subcategory in which to include the planned commitment for the CREOL Phase II expansion project. She credibly denied any intent to conceal the use of carryforward funds for the project from the BOG, and further explained that at the time she believed E&G funds could be used for renovation projects, including buildouts like the CREOL Phase II expansion.

On February 18, 2016, UCF transferred $4 million from the COP's E&G carryforward account to a Facilities construction account set up for the CREOL Phase II expansion project (Appendix C at p. 2). The transfer was prompted by a January 28, 2016 email request from Wagenhauser to Bill Martin, the Director of Facilities Planning. Plans for the project were still being developed, no contractor had been selected yet, and the funds did not need to be encumbered. Nevertheless, Wagenhauser requested the transfer to the construction account and asked, for his planning purposes, if it would occur before the end of February. (Exhibit 97). As Wagenhauser explained in his interview, the July 2015 budget transfer had inflated the COP's E&G carryforward balance and he wanted to reduce that balance by moving the funds out.[49] Wagenhauser's reasons for this were not clear, since we found no evidence that a carryforward report was due to the BOG around this time.

e) *Additional plans and budget for the CREOL Phase II expansion project*

After the initial $4 million award and budget transfer to the CREOL Phase II expansion project in the summer of 2015, additional design plans were developed and discussed, resulting in new, higher cost estimates for the project. (Exhibits 83 & 84). The updated plans led the COP to make an exceptional funding request in January 2016 for an additional $2 million in funding for the project. (Exhibit 83). In March 2016, contract negotiations began with a design firm for the project, though no actual work began. (Exhibit 99). Over the next few months, additional design options were developed and evaluated while the COP's exceptional funding request was considered. (Exhibit 88). The final design plan was chosen in June 2016, which added $2.8 million to the total cost of the project. (Exhibit 100). E&G funds were not used for these

[48] The $4 million had been transferred from the central E&G reserve account to the COP's E&G carryforward account as of the date of the FBCR, hence its listing under the Commitments section, but these funds would not actually be transferred to the construction account until February 2016.

[49] An additional $17,000 of E&G funds was transferred from the COP's E&G carryforward account to the CREOL Phase II expansion construction account in May 2018. (Appendix C at p. 2). This additional transfer was prompted by a construction issue involving the auditorium floor and was not part of the original 2016 decision to fund the project. (Exhibit 98).

additional costs, and the additional funding is therefore beyond the scope of this investigation.[50]

f) *BOT involvement in the project*

The CREOL Phase II expansion project was brought to the BOT's attention on only a handful of occasions, and discussion on those occasions was limited. We found no evidence that approval to proceed with the project or to use E&G funds for it was specifically requested from the BOT or granted, nor does it appear the project was even disclosed to the BOT until *after* the decision was made to fund the project with $4 million in E&G carryforward funds and the funds had already been transferred to the construction account. Instead, the project appears to have been disclosed to the BOT for the first time in the summer of 2016 when it was included in the University's Five-Year Capital Improvement Plan ("CIP") and accompanying "BOB-2" forms, and later in connection with amending the Campus Master Plan to include the expanded building. However, the fact that the project was being funded with $4 million in E&G carryforward funds was not disclosed in those documents or discussed during the related meetings.

The first clear reference to the CREOL Phase II expansion project in any BOT materials came in June 2016, when it was included in the CIP presented to the Finance and Facilities Committee ("FFC"). (Exhibit 101). The project was listed on the CIP with an estimated cost of $6,784,228 under the heading "Requests From Other State Sources", but was not included on the accompanying BOB-2 form.[51] (*See* Exhibit 102). Of course, by that point, $4 million of E&G carryforward funds had already been transferred to the construction account for the project. During the meeting, Lee Kernek (Associate VP Facilities and Safety) discussed the status of active and planned construction and renovation projects on campus. While her presentation materials included a slide on CREOL Phase II noting the $6.8 million project as "University-funded – internal sources," according to the audio recording of the meeting the only specific mention she made of the project was that it was new and being added to the CIP. (Exhibit 103 at p. 40). This CIP was subsequently approved by the BOT at its July 2016 meeting. (Exhibit 102). The Board's approval of the CIP, however, did not mean it was approving the construction or funding for the CREOL Phase II expansion project.[52]

[50] The additional funding consisted of $1 million from CREOL and two separate $900,000 contributions from Academic Affairs. (Exhibit 100). Review of general ledger detail confirms the sources as auxiliary and contracts and grants funds, not E&G.

[51] The BOB-2 did include a crossed-out entry for "CREOL" for the now completed Phase I lab build-out.

[52] The CIP is a budget planning document intended to inform the BOG of capital projects the University plans to undertake during the next five fiscal years and is used primarily to identify projects for which PECO funding is sought from the Legislature. The accompanying BOB-2 form is intended to identify the University's future needs for state funding to operate and maintain academic-related facilities that may be constructed using non-state funds. During the relevant time, the CIPs were prepared by Kernek, presented to President Hitt or Provost Whittaker for review, and then presented to the BOT by Merck (or Kernek as his designee). The purpose of the CIPs was not to inform the BOT what projects were under way or how they were being funded, nor was the BOT voting to approve any specific projects or their funding. Instead, the BOT was approving what projects would be submitted for PECO requests. (*See* TCH Report at pp. 14-15).

Rather, it merely authorized the staff to submit the CIP to the BOG and to seek funding for the capital projects listed in the manner indicated on the form.

Even less information about the project was presented to the BOT when it approved the following year's CIP at its July 2017 meeting. CREOL Phase II was crossed out on the CIP but was now included as one of 23 projects on the BOB-2 form, with "E&G" listed as the funding source. (Exhibit 104). However, according to the audio recording of the BOT meeting, there was no specific discussion of this project, or its funding source, during the brief discussion of the CIP and BOB-2 during the meeting. (Exhibit 105). Similar information was submitted to the BOG as part of UCF's Fixed Capital Outlay Plan in July 2016 and August 2017, respectively. (Exhibits 106 & 107).

The FCC and BOT were also informed of the CREOL Phase II expansion project in December 2016 and January 2017, respectively, when asked to approve a minor amendment to the 2015-25 Campus Master Plan to include the CREOL Phase II expansion and certain other capital projects. The Capital Improvements List submitted in connection with these meetings did identify "E&G" as the "Fund Type" for the CREOL Phase II expansion project, but we found no evidence this was discussed with, or otherwise brought to the attention of, FFC or BOT members. (Exhibits 108, 109, 110 & 111).

Finally, the CREOL Phase II expansion project was not included in any of the University's Capital Outlay Budgets during the relevant time period except one for FY 2017-2018, approved by the BOT in May 2017. The project was listed in the budget under "Projects constructed or acquired with proceeds from other state sources," at an estimated cost of $6.8 million, and identified as being fully funded. (Exhibit 112). This was technically accurate; the University was, in fact, committing funds from state sources other than PECO, i.e., E&G, to the project. However, the very cursory discussion of the Capital Outlay Budget during the BOT meeting did not convey this fact to trustees. Rather, the FFC Chair merely noted that the budget had been presented by Kernek at the FFC meeting, and unanimously approved, after which the full Board voted to approve the budget. In her earlier presentation of the budget to the FFC, Kernek did not mention the CREOL Phase II project and merely explained that the category for projects constructed or acquired with proceeds from other state sources were "internally funded" and were merely included to give notice of them to the state. She did not explain what she meant by internally funded, nor did she reference E&G funds. While the BOT technically approved this project by approving the Capital Outlay Budget, based on the audio recordings of the FFC and BOT meetings, the document itself, and interviews of trustees, we conclude that the BOT did not know or understand that E&G funds had been transferred to the construction account for the project and was not approving their use after-the-fact.

In interviews, BOT members reported that they were not aware of the UBC, the decision to reallocate excess carryforward funds, or how those funds were spent, and some could not recall or said they were not aware of the CREOL Phase II expansion project at that time. None were aware that the project was funded in part with $4

million in E&G carryforward funds. Further, all but one trustee we interviewed indicated they were unaware of any restrictions on the use of E&G funds for capital projects at that time, and thus even if the source of funding for the project had been disclosed, it would have meant nothing to most Board members.

g) *Construction and actual costs of the CREOL Phase II expansion*

Construction of the CREOL Phase II expansion began in the spring of 2017. Although $4 million in E&G carryforward funds had been budgeted to the project in July 2015, and the funds had been transferred to the construction account for the project in February 2016, the first significant spending for design-related costs did not occur until March 2017, with construction spending continuing to the present. The total amount spent on the project as of June 30, 2019 is approximately $5.2 million. (Appendix D). The substantial completion date under the contract was May 31, 2019, but the project has experienced delays and no Certificate of Occupancy has issued yet. While some work remains to be completed, the expansion is expected to open by the end of August 2019.

h) *Knowledge and understanding of relevant regulations*

As discussed above, the UBC members we interviewed who voted to recommend that the CREOL Phase II expansion project receive funding (namely, $4 million of the $10 million in excess E&G carryforward funds) reported that they were unaware at the time of any restrictions on the use of E&G funds for capital projects. They further reported that there was no discussion of such restrictions during the UBC's June 2015 meeting or any concerns raised at all with regard to awarding E&G carryforward funds to the CREOL Phase II expansion project, either by CFO Merck or the other Senior Finance officials present (Clark and Tant), and that they assumed and trusted the funds were appropriate for all of the various uses proposed, including the CREOL Phase II expansion. We found no evidence to the contrary.

Provost Whittaker and Merck, who co-chaired the UBC, attended the June 2015 meeting, and at that meeting served on the subcommittee that actually recommended to the full Committee that the CREOL Phase II expansion project receive funding, declined to be interviewed as part of this investigation. As a result, their explanation for funding the project with E&G carryforward funds could not be fully determined or assessed. However, evidence of their awareness of the BOG regulations generally, and their understanding of the limits on the use of E&G funds specifically, is summarized below. More detailed discussion of this subject may also be found in the TCH Report.

With regard to Whittaker, during the TCH Investigation, he stated that he was not familiar with any restrictions on the use of E&G funds. (*See* TCH Report at pp. 10-11). During his PIE Committee deposition, Whittaker further testified he was never told that E&G funds could not be used for new construction, or that the use of E&G funds for TCH violated BOG regulations or state law. (Exhibit 113 at pp. 19-20).

Evidence collected during the TCH Investigation raises questions about those claims, however. First, in August 2014, shortly after Whittaker joined UCF, the

University's General Counsel, Scott Cole, emailed him links to the BOG regulations, including BOG Reg. 9.007 (which addresses the permissible uses of E&G funds in subsection (3)), and further indicated that he would provide copies of the regulations to him in a notebook. (Exhibit 114). Additionally, in December 2014, Whittaker was copied on an email from Merck to Clark, in which Merck commented on an email Clark had sent to another employee regarding a request to transfer E&G funds to the UCF Foundation to establish endowments. Clark wrote in the email that "BOG regulation 9.007 limits the use of E&G funds for E&G operating activities only - namely instruction, research, public service, plant operations and maintenance, student services, etc." (Exhibit 115). It is unclear if Whittaker read Merck's email (or Clark's earlier email)—we found no evidence he responded—but even if he did, Clark's email did not address whether E&G funds could be used for capital projects. Still, these emails at least suggest that Whittaker *may* have been familiar with the BOG regulations, including possibly the limits they place on the use of E&G funds.

Perhaps most significant, however, is that Whittaker admitted to hearing Merck state during a meeting with President Hitt that the funding for TCH might result in an "audit comment." (TCH Report at p. 36). As discussed in the TCH Report, it is unclear when this meeting occurred, although it may have been on May 20, 2015, just a few weeks before the UBC meeting where he and Merck recommended that the CREOL Phase II expansion project be funded with $4 million of E&G carryforward funds. (TCH Report at p. 36).[53] In his interview during the TCH investigation, Whittaker credibly explained why Merck's comments did not concern him at the time. It is also unknown if Whittaker, like Merck and others discussed below, believed that whatever issues there may be with using E&G funds for new construction like TCH, they did not apply to a renovation or buildout project like the CREOL Phase II expansion. In the end, due in part to Whittaker's failure to cooperate with this investigation, we are unable to answer these questions or to determine conclusively Whittaker's state of mind with regard to the funding of the CREOL Phase II expansion.

The same is generally true for Merck, although his awareness of the BOG regulations is less in doubt. Merck served as UCF's CFO for over 22 years, since 1996. In that role, he regularly dealt with the BOG and its staff, serving on the SUS Council for Administrative & Financial Affairs, and he was also at the University in December 2007 when the BOG adopted Reg. 9.007. As a member of the SUS Council for Administrative & Financial Affairs, he received any proposed amendments to the regulations, such as in July 2013 when BOG Reg. 9.007(3) was amended to clarify that "…E&G funds are to be used for E&G operating activities only… ." (Exhibit 118). In his PIE Committee testimony, Merck denied having ever actually read this regulation but admitted being generally aware of restrictions on the use of E&G funds, such that it was important to maintain their "color." (Exhibit 12 at pp. 124-126, 151). Additionally, Merck admitted that the use of E&G funds for TCH "was not a conventional way of paying for a

[53] Lee Kernek took notes during the May 20, 2015 meeting, which she translated for us in connection with the TCH investigation. According to Kernek's translation, Merck remarked during the meeting: "Not looking likely will get $ from state for Colbourn; have to do ourselves and may have to pull $ from CF balances; may take audit ding, but can't let it wait, and state after us on CF." Kernek further noted "pres agrees we have to do, no choice." (Exhibits 116 & 117).

building," which, together with his remarks in May 2015 concerning a possible "audit comment" based on the funding of TCH, shows he had some understanding of the limits on how E&G funds could be used. (Exhibit 12 at p. 29; TCH Report at pp. 8, 35). While Merck denied being aware of, or involved in, the CREOL Phase II expansion project or its funding, he nevertheless testified that he generally believed E&G funds could be used for renovation projects, which he explained in his mind included building expansions or buildouts. (Exhibit 12 at p. 37).

As for Clark and Tant, who did not serve on the UBC but provided support to the Committee and attended meetings, including the June 2015 meeting, they explained their understanding of the relevant regulations similarly. While Clark declined to be interviewed, emails prove she was familiar with BOG Reg. 9.007 and that E&G funds could only be used for operating activities.[54] Nevertheless, she testified to PIE Committee investigators that no one on the UBC, including herself, believed the allocation of E&G funds for the CREOL expansion project was improper. (Exhibit 13 at p. 75-80). She explained that in her mind the project was like a renovation project, for which she believed E&G funds could be used, and thus she did not question the use of E&G funds for the project even in light of earlier discussions regarding the use of such funds for TCH. (Exhibit 13 at p. 69). Tant provided a similar explanation in her interview during this investigation. Both had also stated when interviewed during the TCH Investigation that they believed E&G funds could be used for renovation projects; it was the use for new construction that concerned them. Clark confirmed this in her PIE Committee testimony: "I mentioned to [Merck] that I wasn't aware that we were able to use E&G funds for new construction … it hadn't been done before." (Exhibit 13 at 49). While a significant building expansion like the CREOL Phase II project seems more like new construction than renovation, Clark and Tant genuinely may not have appreciated the difference, and neither seems to have understood that even if it was renovation, no more than $2 million in E&G funds could be used.

Finally, President Hitt, who formally approved the funding for the CREOL Phase II expansion project, declined to be interviewed and also did not provide testimony to the PIE Committee. While Hitt was interviewed during the TCH investigation, he was not asked about the funding for the CREOL Phase II expansion. He did indicate, however, that he was not familiar with restrictions on the use of E&G funds and, while not disputing they could have been made, he also did not recall Merck's statements concerning an audit comment with respect to using E&G funds for TCH. (TCH Report at pp. 10-11).

[54] *See, e.g.*, Clark's aforementioned December 2014 email to an employee regarding a request to transfer E&G funds to the UCF Foundation to establish endowments. (Exhibit 115).

G. Research I Building - Furniture, Fixtures & Equipment and Lab Buildouts

1. Overview

The Research I building ("Research I") is a three-story, nearly 106,000 square foot interdisciplinary research building located on the University's main campus.[55] The building provides research space for faculty members from various colleges and centers. Construction on the building began in 2016 and it opened in January 2018, although some minor construction work continues. The total budget for the project was $46.6 million, but actual costs through June 30, 2019 are approximately $51.3 million. (Appendix D at p. 3).

The majority of funding for Research I did not come from E&G funds and is therefore beyond the scope of this investigation. However, as detailed in the chart at Appendix C, page 3, the purchase of furniture, fixtures and equipment ("FF&E") for the building and the cost of constructing and customizing its labs did come from E&G funds. Specifically, in May 2017, the University transferred a total of $9 million in E&G funds to Research I construction accounts for FF&E ($3 million) and for lab buildouts ($6 million). The FF&E funding originated from the University's central E&G reserve account and consisted solely of E&G carryforward funds, while the funding for the lab buildouts originated from six different E&G accounts, nearly all of which consisted of carryforward funds. The University primarily incurred expenses related to the lab buildouts and FF&E purchases during fiscal year 2017-18.

We found that Provost Dale Whittaker and CFO Bill Merck approved the $3 million in E&G funding for the FF&E for Research I, and that this was also later approved by President John Hitt. As for the $6 million in E&G funding for the lab buildouts, we found that Whittaker, Merck and Associate Vice President Tracy Clark were all involved in developing a funding plan for the lab buildouts, which involved pooling together E&G funds from various sources. We found no evidence that President Hitt was aware of this plan before the funds were transferred, and the evidence of his knowledge and approval afterwards was inconclusive. While $2.3 million (of the $6 million) in E&G funds from the central E&G reserve was listed on the University's FY 2017-18 Allocation Document, that document was not signed, and we cannot say for certain whether Hitt approved the funding allocations in it or what he understood about them (assuming he even reviewed it), in part because Hitt declined to be interviewed as part of this investigation.

Finally, we found no evidence that the BOT approved of the funding for Research I, including specifically the use of E&G funds for the FF&E and lab buildouts. Instead, the BOT received only limited and often conflicting information about the project and its funding.

[55] The building was originally referred to as the Interdisciplinary Research and Incubator Facility or "IRIF," and many documents related to the project use the original name or acronym.

2. Timeline of Significant Events

a) *The Research I building*

Research I is a new, three story, 105,775 square foot interdisciplinary research building on the University's main campus. It contains 84 individual offices and 79 labs, along with conference rooms, break rooms, and support rooms, and is occupied and used by faculty from several different colleges and centers. The building opened in January 2018 but minor construction work continues and the University has not closed out the project as of the date of this Report. (*See* Exhibits 119, 120, 121 & 122).

The initial total budget for the project was approximately $46 million. Due to funding limitations, the building was designed to be constructed in two phases. Phase 1 covered two-thirds of the building, while phase 2 covered the remaining third. The preconstruction and initial design stages of the project took place between 2011 and 2016. Construction on phase 1 began in January 2016, while phase 2 construction started in July 2016. The labs that were included in the phase 1 construction were initially built as generic labs, as it was unclear who would occupy the labs and what their specific needs were. After that was decided, the labs had to be redesigned and customized, resulting in additional construction work and expense as part of the Research I lab buildouts. However, the delay allowed for the project schedules for phase 1 and 2 to be aligned so that they could be completed together.

b) *Initial plans to secure funding*

UCF officials began to discuss the need for additional research space for the University's growing faculty, and how to fund such a project, as early as 2009. That year, references to the Research I project (as "Interdis. Research and Incubator Fac.") began to appear on the University's Capital Improvement Plan ("CIP") among the projects for which the University sought PECO funding. The University would continue to request PECO funds for the Research I project through the FY 2018-19 CIP, approved by the BOT in July 2017, to no avail.[56] During this period, the project's PECO priority ranking moved up from number 8 to number 2, while the estimated cost of the project increased from $39.8 million to $47.3 million. (Exhibits 104, 125, 126, 127 & 128).

The BOT approved the CIPs in these years and therefore was presumably aware of the planned Research I project and that PECO funding was being requested for it but not received. The Research I project also appeared in Capital Outlay Budgets approved by the BOT from 2011 through 2014 under the category of PECO projects, but was always identified as unfunded. (Exhibits 123, 129, 130, 131, 132, 133 & 134). No other plans to fund the project were shared with the BOT or presented for approval during these years. President Hitt was also likely familiar with the project because it was included in periodic "Status of UCF Projects Updates" given to him by Facilities staff.

[56] The University received $5.9 million in PECO funds for Research I in 2012, but decided to use those funds for another, higher priority project. (*See* Exhibits 123 & 124). We did not investigate whether this was permissible.

Those presentations also identified PECO funds as the anticipated funding source for the project. (*E.g.*, Exhibits 124 & 135).

In sum, UCF continuously sought PECO funds for the Research I project, but never received them (with the one exception noted above). As a result, UCF ultimately funded the project itself. As detailed below, this included using E&G funds for the FF&E and lab buildouts.

c) *The University opts to use E&G funds for the FF&E and lab buildouts*

The events leading up to the University's decision in May 2017 to transfer $9 million in E&G funds for the Research I FF&E and lab buildouts took place over several years. Accordingly, we address these events by fiscal year below.

(1) 2014-15 fiscal year (July 2014 through June 2015)

Despite repeatedly seeking PECO funding for the Research I project, and representing to the BOT and President that this was how the project would be funded, in January 2015, University officials began to consider instead using E&G funds to pay for the building's FF&E. On January 13, 2015, Provost Whittaker, CFO Merck, and their respective senior staff held one of their regularly scheduled "budget chat" meetings (referred to during this time period as "Budget Operations Group" or "BOG Jr." meetings). At this meeting, they discussed a document called the "Capital Projects Funding Update," intended to track all of the University's current capital projects and plans for their funding. The January 7, 2015 version of the document, which was circulated at the January 13 meeting and forwarded to Whittaker's budget officer afterwards, indicated under the "Proposed Funding Plan" that the $30 million needed for phase 1 of the Research I project would be funded using "Investments," "Interest Earnings," "Auxiliary - AA," and "E&G." The amount listed under E&G was $3 million and identified as being for FF&E. The document also noted that $46.6 million in PECO funds had been requested for both phases of the project. (Exhibit 136).

While the use of $3 million of E&G funds for FF&E for Research I appears to have been discussed at this January 2015 meeting, we did not find evidence that a decision was made to allocate the funds for this purpose until a budget chat meeting in June 2015. This evidence is in the form of the "E&G Commitments List" from a June 23, 2015 meeting, which includes a planned $3 million E&G expense in fiscal year 2015-16 for "Furniture for Interdisciplinary Research building."[57] (Exhibit 137). Based on this document, it is reasonable to conclude that Whittaker and Merck approved the decision to allocate $3 million in E&G funds for the Research I FF&E at this budget chat meeting. According to Christy Tant, who primarily maintained the E&G Commitments List at that time, a planned allocation of funding like this would not be added to the list unless it was approved by the Provost and CFO. As Whittaker and Merck declined to be

[57] As discussed in the TCH Report, the "E&G Commitments List" was a spreadsheet (actually titled "Planned E&G Budget Allocations") used by F&A employees to track decisions made in these budget planning meetings regarding the allocation of E&G funds. (*See* TCH Report at pp. 17-18, 23, 31).

interviewed, we were unable to ask them about this meeting or confirm that they approved the planned allocation. However, other witnesses confirmed the process described by Tant. This document did not indicate any planned E&G funding for the Research I lab buildouts, presumably because at that time the University was still seeking PECO funding for the rest of the project.

The Research I project was included in the FY 2016-17 CIP approved by the BOT at its June 29, 2015 meeting.[58] The project was actually listed twice: first as the number 2 priority PECO project with a total estimated cost of $46.6 million, and second as the number 5 priority project under "Requests From Other State Sources" with a total estimated cost of $3 million. (Exhibit 138). Witnesses indicated that funding for the lab buildouts was included in the $46.6 million PECO request (likely the $6 million listed for FY 2018-19). It appears from the amount that the $3 million from "Other State Sources" referred to the planned allocation of E&G funds for the FF&E for the building. However, this was not disclosed to the Board by Merck or Lee Kernek when they presented the CIP. During the meeting, Kernek explained that no PECO funding had been received for the project yet—which is why they were requesting funding again—and that the $3 million listed under "Requests From Other State Sources" (which she did not identify as E&G funds) had actually already been spent.[59] She further explained that the balance of funds spent on the project to date had come from non-state sources. (Exhibits 139 & 140).

To further confuse things, the BOT had been told the month before when it approved the FY 2015-16 Capital Outlay Budget that the University had received $6.04 million in PECO funding for the Research I project. (Exhibit 141). The following year's Capital Outlay Budget, however, would show the same budgeted amount and indicate it was not funded. (Exhibit 142).

Similarly confusing (and conflicting) information about the Research I project was included in the University's FY 2016-17 Fixed Capital Outlay Plan submitted to the BOG on June 30, 2015. In addition to being listed in the PECO section, the project was listed under "Requests From Non-State Sources, Including Debt" with a cost estimate of $27 million. (Exhibit 143). As with the CIP, the costs related to the FF&E and lab buildouts were not specifically identified.

(2) 2015-16 fiscal year (July 2015 through June 2016)

The University did not expend $3 million of E&G funds on FF&E for Research I in fiscal year 2015-16 as had been planned. Instead, Provost Whittaker and CFO Merck appear to have decided in August 2015 to push back the expense a whole year, to fiscal year 2016-17, presumably because of construction delays that had pushed back the

[58] As discussed earlier, CIPs were prepared by Lee Kernek and her staff, reviewed with the Provost and President, and presented for approval to the BOT by Merck.

[59] This statement conflicts with the conclusion that the "Other State Sources" listing was for the planned FF&E expenditure, as those funds were not transferred to the construction account until May 2017 and spent some time thereafter, as will be discussed.

building's opening date to June 2017. (Exhibit 144). As further evidence of this, the FY 2015-16 Allocation Document signed by President Hitt and Provost Whittaker on August 19, 2015, did not include the $3 million allocation of E&G funds for the FF&E. (Exhibit 94).

Despite this decision, funding for the Research I FF&E *was* included in the University's FY 2015-2016 FBCR, submitted to the BOG in August 2015, indicating a plan to use E&G carryforward funds for the project during the current fiscal year. (Exhibit 145). The $3 million was part of approximately $4.5 million included in a subcategory of Commitments called "Equipment Replacements". Tant was responsible for preparing this FBCR, and even though the FF&E was for a new building, and therefore would not be replacing anything, she explained in her interview that she believed this was the most appropriate subcategory in which to include the commitment. She credibly denied any intent to conceal the use of carryforward funds for the project from the BOG, and further explained that at the time she believed E&G funds could be used for FF&E without limitation. Tant further explained that the FBCR is a multi-year plan which permits the inclusion of amounts planned to be spent in future years, which BOG staff confirmed. Accordingly, the inclusion of this commitment in the FY 2015-16 FBCR is not necessarily inconsistent with the decision to delay spending the E&G funds until FY 2016-17.

Phase 1 construction of Research I began about six months later, in January 2016. Around the same time, different groups were discussing options for creating additional research space to accommodate the University's growing faculty, including at a January 26, 2016 University Budget Committee ("UBC") meeting and a February 12, 2016 Critical Laboratory Space Needs Meeting. Use of the new labs in the Research I building was among the options discussed. (Exhibits 146, 147 & 148). We found no discussion of how to fund any of the options at this time, however.

At a March 3, 2016 meeting between Whittaker, Merck and Tracy Clark regarding the need for additional research space, Whittaker and Merck decided to move forward with phase 2 of the Research I project, despite the apparent absence of funding for it. (Exhibit 148). Emails related to the meeting indicate that Lee Kernek was to coordinate funding with Clark and/or Tant. The lack of funding at the time is perhaps not surprising given that the estimated costs for phase 2 were in flux, as the building was being re-designed to maximize the amount of lab space. (Exhibit 148). By late March 2016, the University had begun to assign specific user groups to the various lab spaces in the building and determine their specific needs for the labs. (Exhibit 149).

On March 23, 2016, Whittaker called a meeting with President Hitt, which Merck and Mike Morsberger, CEO of the UCF Foundation, also attended, in an effort to better understand the University's growing list of unfunded capital projects, and develop a process for deciding how to prioritize them.[60] This meeting was described at length in the TCH Report. In advance of the meeting, at Whittaker's request, Clark and Tant updated the Capital Projects Funding Update document, and it was circulated to and

[60] The calendar invitation identified the topic of the meeting as, "An initial discussion to determine a sequence of building priorities at the university." (Exhibit 150).

reviewed by attendees at the meeting. The document included Research I (both phases) among the list of funded projects. Funding for Phase 1 was identified as coming from "Interest & Other" ($26 million), "Division/Unit Resources" ($3 million) and "E&G" ($3 million). Funding for phase 2 was identified as coming entirely from "Interest & Other" ($17 million). (Exhibit 151). Based on the amount and aforementioned budget chat discussions, it appears likely that the $3 million in E&G funding for phase 1 was for the FF&E. It is unclear if the Research I project, or the $3 million in E&G funding for phase 1, were discussed during the meeting. Notes from the meeting indicate that Merck was asked about the use of E&G funds for projects involving academic space (which included both TCH and Research I), and that the response he gave may have caused attendees to believe that such projects were being internally funded with interest earnings or other non-state funds rather than with E&G. (TCH Report at 40.)

At some point during 2016, a funding plan was developed for the Research I lab buildouts that involved having the occupants' colleges contribute to the cost of the buildouts. These discussions began sometime before April 2016 and continued into the following year. (*See* Exhibit 149). In her PIE Committee deposition, Clark testified that she and Whittaker worked on this cost-sharing plan together. (Exhibit 13 at pp. 66-67). Relevant documents (including those discussed below) confirm this, and also indicate that Merck was aware of and involved with the plan, and that Kernek was at least generally aware of it.

Although funding for Research I's FF&E had already been decided, and funding discussions were underway concerning the lab buildouts, it does not appear that the BOT received any specific information about these aspects of the Research I project during fiscal year 2015-16. For example, while the BOT approved the FY 2016-17 Capital Outlay Budget in May 2016, which listed planned expenditures for Research I of $6.04 million in PECO funds and $27 million in non-state funds (none of which had actually been received), the BOT was not provided with a breakdown of how the funds were to be spent and was not informed that any E&G funds had been allocated to any part of the project. (Exhibit 142).

The Research I project continued to be included on the aforementioned Capital Projects Funding Update, an internal document. A draft circulated on June 27, 2016 continued to list the $3 million in E&G funding for the building's FF&E. New listings were included for the lab buildouts (for both phases of the project), but no cost estimates were included and no funding sources were identified. (Exhibit 152).

(3) 2016-17 fiscal year (July 2016 through June 2017)

At the start of the 2016-17 fiscal year, University officials continued to provide limited information to the BOT and BOG regarding the Research I project. For example, the FY 2017-18 CIP approved by the BOT at its July 2016 meeting included the project, but the project was not discussed at all during the meeting.[61] (Exhibit 102). The FY 2017-18 Fixed Capital Outlay Budget Request submitted to the BOG in July 2016

[61] The CIP continued to list the project under PECO, but the $3 million listing under other state sources was crossed out and replaced with a new entry for $16.6 million for FY 2017-18.

included the same limited information. (Exhibit 106). Additionally, the $3 million in E&G funding for the Research I FF&E was once again included in the FBCR submitted to the BOG (in August 2016), although this time it was part of a $12 million line item entry for "Research Support" in the "Commitments" section. (Exhibit 153). This was a change in the classification by Tant, who had included the amount in the "Equipment Replacements" subcategory the prior year.[62]

President Hitt approved the allocation of $3 million in E&G funds for the Research I FF&E when signing the FY 2016-17 Allocation Document on August 31, 2016. The Allocation Document included $3 million for "Furniture for Interdisciplinary Research Building," from the central E&G reserve account. (Exhibit 154) As Hitt declined to be interviewed, we could not ask him what he understood about the Research I project, the propriety of funding the FF&E for the building with $3 million in E&G funds or its inclusion in this Allocation Document.

University officials continued to discuss the funding plan for the Research I lab buildouts throughout fiscal year 2016-17. A November 16, 2016 email from Clark to Kernek, copying Merck, indicates that funding for the lab buildouts was still undecided and might be brought before the UBC at its next meeting. Based on the UBC materials we were provided, however, the matter was not presented to the UBC at its next meeting, or at any subsequent UBC meeting. (*E.g.,* Exhibits 155 & 156).

By January 2017, the cost estimate for the lab buildouts had increased to $6.5 million. (Exhibit 157). Funding was still not finalized, but E&G funds were now being considered, as reflected in emails dated January 5, 2017 from Clark to Provost Whittaker, and from Clark to the representatives of the various colleges whose faculty would be occupying the labs. (Exhibits 158, 159 & 160). In her emails to the college representatives, Clark explained that the University would "centrally handle" $1.7 million in basic build out and infrastructure costs; that another $1.7 million would come from the Faculty Cluster Initiative (FCI); and that the colleges would have to cover the remaining costs using "startup funds, E&G funds, Aux. or C&G monies." Clark's email made no mention of any restrictions on the use of E&G funds or of any potential risk in using such funds for the lab buildout costs. (Exhibits 159 & 160). In March 2017, Clark reiterated to the colleges that certain costs would be funded centrally (by F&A) or using carryforward funds from the FCI, and further stated that one of the colleges "needs to reallocate carry forward/start up to fund the full $1 million [of its] build out." (Exhibits 161 & 162).

Although the precise date is unclear, it seems the approval to use E&G funds for the Research I lab buildouts was given by Provost Whittaker and CFO Merck no later than March 2017. This is based on the fact that the lab buildouts appear for the first time on the March 16, 2017 E&G Commitments List as "Base buildout - IRIF" with a

[62] Tant's work papers used to prepare this FBCR, and subsequently used to respond to a PIE Committee inquiry earlier this year, reflect that the $3 million for the FF&E was actually not included in calculating the $12 million for the Research Support subcategory. Instead, $3 million for a different item was included. Tant explained this was the result of a formula error, in which the wrong item was pulled into the calculation, and that she intended to include the $3 million allocation for the Research I FF&E.

planned expenditure of $2.3 million in fiscal year 2016-17. (Exhibit 163). The addition of the lab buildouts to the E&G Commitments List on this date indicates that the subject was most likely discussed at a Budget Operations Group meeting around that time, and that Whittaker and/or Merck approved the allocation of E&G carryforward funds for the project.[63]

In early May 2017, Clark asked representatives of the colleges and FCI to confirm their commitment to the cost-sharing plan for the lab buildouts. Her email copied Whittaker, Merck and Kernek, among others. (Exhibit 166). By responsive emails, the colleges and FCI confirmed their commitment to contribute a total of $4.2 million to the project, and it appears that Whittaker and Clark both confirmed the commitment of $2.3 million from the University's central E&G reserve account.[64] (Exhibits 166, 167, 168, 169 & 170). The entire $6.5 million committed to the project pursuant to this cost-sharing plan consisted of E&G funds. (Exhibit 157). Following this, on May 9, 2017 or shortly thereafter, Facilities established a separate construction account for the lab buildouts portion of the Research I project. (Exhibit 171).

On May 8, 2017, F&A employee Donna DuBuc (Associate Director, Budget, Planning and Administration) sent an email to the UCF Budget Office requesting a budget transfer of $3 million in E&G carryforward funds from the central reserve to Facilities to fund FF&E for Research I. DuBuc supported the request by referencing the FY 2016-17 Allocation Document, signed by Hitt and Whittaker in August 2016, which had authorized the allocation. (Exhibit 172). The budget transfer was made the same day, and the funds were later transferred to the construction account for the Research I FF&E on May 25, 2017 via a general ledger entry. (Appendix C at p. 3).

Between May 16 and 25, 2017, $6 million in E&G funds were also transferred to a construction account set up for the Research I lab buildouts.[65] The budget transfer requests were sent on May 16, 2017, apparently prompted by an email from Tant asking to have the funds transferred and attaching the May 2017 commitment emails as support. (Exhibits 174 & 175). Tant also stated: "We should work toward making these transfers prior to June 30, 2017." (Exhibit 173). Tant was unable to explain this statement or why the transfers needed to take place before the end of June, which was also the end of the fiscal year. On May 16 and 18, the Budget Office transferred $1.7 million from an Academic Affairs E&G carryforward account and $2.3 million from the central E&G reserve account, respectively, to the Office of Research's E&G carryforward

[63] We further note that the Research I lab buildouts appeared for the first time on the March 2, 2017 version of the Capital Projects Funding Update document, maintained at that time by Lee Kernek, with an estimated cost of $5.7 million for both phases but no funding identified. (Exhibit 164). Funding for the lab buildouts was still not identified in the April 21, 2017 version of the document. (Exhibit 165).

[64] We did not interview the representatives of the colleges and FCI who confirmed these commitments, and do not know their understanding of restrictions on the use of E&G funds or whether they had any concerns about using such funds from their respective departments. However, Clark did tell them in her January 5, 2017 email that E&G was one type of fund they could use to cover their portion of the project.

[65] Although $6.5 million had been approved, only $6 million of budget was actually transferred because one of the colleges contributed $500,000 less than the original commitment amount.

account. On May 25, 2017, these amounts, plus an additional $2 million from four more E&G departments (for the colleges and FCI), were transferred to the Research I lab buildouts construction account via a general ledger entry. (Appendix C at p. 3).

The Capital Outlay Budget presented for the BOT's approval on May 18, 2017 did not disclose that E&G funds were being used for any portion of the Research I project, nor was this shared with Board members during the meeting. Instead, Research I, with no indication as to which phase, was listed as one of the PECO funded projects (with $6 million being requested and $0 funded), while phase 2 for Research I was under projects funded from "other state sources" (with $16.6 million identified as funded, but no indication of the specific fund type(s) or what exactly the funding was for). (Exhibit 112). Hence, it does not appear the BOT was informed that $9 million in E&G funds had just days earlier been transferred to the Research I construction accounts to fund the FF&E and lab buildout costs.

(4) 2017-18 fiscal year (July 2017 through June 2018)

As with the Capital Outlay Budget presented in May, the FY 2018-19 CIP presented to the BOT in July 2017 contained limited (and conflicting) information regarding Research I. As with the prior year's CIP, this year's CIP still listed the project as number 2 on the PECO priority list with an estimated cost of approximately $47 million over the next three fiscal years, but apparently referenced the deletion of phase 2 of the project under "Requests From Other State Sources" with an estimated cost in FY 2018-19 of $16.6 million by striking through it. (Exhibit 104). This conflicted with how the Capital Outlay Budget, approved by the BOT just two months earlier, had described the project.

In August 2017, the University's F&A department prepared the FY 2017-18 Allocation Document, which included a $2.3 million allocation from the central E&G reserve account to the Office of Research and Commercialization and Graduate Studies for the "Interdisciplinary Research buildout" (apparently referring to the Research I lab buildouts). (Exhibit 176). The inclusion of this allocation is hard to understand and may have been a mistake, as the funds had already been transferred to the construction account for the project back in May. Regardless, this is the only evidence we found that President Hitt may have approved or was even apprised of some of the funding for the Research I lab buildouts.[66] The other $3.7 million in E&G funding for the lab buildouts (which had already been provided by Academic Affairs, various colleges and the FCI) was not included on the document. (Exhibit 176). Notably, this Allocation Document was never signed. We were told that the handling of the document was being transferred from the Controller to the Budget Office at this time, and its preparation was significantly delayed for various reasons. By the time the document was finally completed, the University's presidential transition was underway. As Hitt declined to be interviewed, we could not ask him if he ever reviewed this document, and if he did review it, what he understood about the lab buildouts for Research I, their fund source,

[66] As discussed earlier in this Report, we did not receive a signed copy of this document and therefore cannot confirm that President Hitt approved of the allocations.

this listing in the Allocation Document, or whether he understood and approved of this specific use of E&G funds.

The University's FY 2018-19 Fixed Capital Outlay Budget Request, submitted to the BOG in August 2017, included Research I and requested funding from both PECO funds and Other State Sources ($23.6 million each, for a total of $47.2 million), even though construction of the building had started in January 2016, approximately $32.7 million had been spent by that time, and the building would be substantially completed less than six months later in January 2018. (Exhibit 107). Nevertheless, UCF officials were invited to present the project at the BOG's annual PECO workshop, held on October 3, 2017. As discussed in the TCH Report, to be eligible for PECO funds, a project must be added to the BOG's 3-year "PECO priority list," which is a key component of the BOG's annual Legislative Budget Request ("LBR") to the Legislature. The Legislature then selects projects from the PECO priority list for inclusion in its annual appropriations bill. The BOG compiles its PECO priority list by reviewing the CIPs submitted by each SUS institution and consulting with the institutions to determine which projects should be included on the PECO priority list. The BOG holds its PECO workshop as part of this process, to learn more about projects it is considering for inclusion on its PECO priority list. (*See* TCH Report at 14-15).

At the BOG's October 3, 2017 PECO workshop, CFO Merck gave a recorded presentation on the Research I project in support of UCF's request for PECO funding. Merck explained that the University was only seeking funding for half of the project's total cost (apparently a change from what was requested in the FY 2018-19 Fixed Capital Outlay Budget Request), and that the PECO funds would be used to reimburse the University for other internal funds it had used to finance the project. Merck explained:

> … since we so desperately needed this building, we, since we are a large university, we have some fairly large cash balances. We also have significant overhead we're charging our auxiliaries and our grant & contract folks. So we've taken some of the cash that we have to fund the actual construction and created internal loans from the sources that those monies are coming from.
>
> This last 20, 20-um-3 million dollars, we, we've, uh, internally, um, committed that over the next five to seven years. So it'll take us about seven years of those accumulated overhead charges, interest, dividends, things like that, to pay our cash, that the accounts that cash came from back.

Merck further explained: "It's all internal money that we're shuffling around to be able … to handle this." (Exhibit 177). Merck did not specify the "internal money" being used for the project or disclose that it included $9 million of E&G funds, most of which were carryforward funds.[67] Also, despite his reference to the use of internal loans, we found

[67] Immediately prior to Merck's presentation, there was discussion of another institution's funding request, where it was explicitly stated that because the institution was new, it had special legislative authority to use operating funds (i.e., E&G) for capital projects, in contrast to other SUS institutions. Merck was present for this discussion according to the video of the workshop.

no indication that these E&G funds were loaned or that there was any intention to repay them. The BOG elected not to include the Research I project on its PECO priority list and, as a result, UCF did not receive PECO funding for the project from the Legislature. UCF opted not to include the project on any subsequent CIPs. (*See* Exhibits 178 & 179).

d) *Construction of Research I is substantially completed*

Construction of the Research I building began in January 2016 and was substantially completed by January 2018, when the building opened. The project is now expected to cost a total of $53.8 million, but through June 30, 2019, actual costs were only $53.1 million. Approximately $1.9 million of this amount was spent between June 2016 and September 2018 on the FF&E for the building. (Appendix D at p.3). As for the lab buildouts, design work for them began in November 2016. Construction work on the lab buildouts started in April 2017 and was substantially completed by the building's opening. As of June 30, 2019, the total amount spent on the lab buildouts was approximately $5.1 million. (Appendix D at p. 3).

e) *Knowledge and understanding of relevant regulations*

The individuals principally involved in the decision to use E&G funds for Research I, Provost Whittaker, CFO Merck and Tracy Clark, all declined to be interviewed, and therefore we cannot say with certainty what their rationale was or if they knew the funding was improper. Evidence of their respective knowledge of the BOG regulations, including the restrictions on the use of E&G funds, has already been discussed elsewhere in this Report.

In their PIE Committee depositions, Merck and Clark were asked about Research I generally but did not testify whether they believed the use of E&G funds for the building's FF&E and lab buildouts was proper. However, both testified they believed at the time that E&G funds could be used for FF&E. They also testified that they believed E&G could be used for building renovations, including building expansions or buildouts, as opposed to new construction. (Exhibit 12 at p. 37; Exhibit 13 at p.69-70). It is hard to see how this latter belief would justify the E&G expenditures on the lab buildouts for Research I, which was of course a new building. While the construction and customization of the labs was referred to internally as "lab buildouts," the construction work was clearly taking place inside a new building and was part of the completion of that building's construction. For her part, Clark testified that she did not distinguish between buildouts of existing buildings and buildouts of new buildings; she thought E&G funds could be used for both types. (Exhibit 13 at p. 69). The scope of Whittaker's testimony in his PIE Committee deposition did not include Research I or whether he believed E&G funds could be used for FF&E and buildout projects.

f) *Timing concerns*

Of the $9 million of E&G funds that were transferred to the construction accounts for the Research I FF&E and lab buildouts, $8.9 million came from E&G carryforward accounts, and the remaining $100,000 would have become carryforward as of June 30, 2017. The timing of these transfers—during May 2017, near the end of the fiscal year—raises questions about whether they were made at least in part to report

a lower carryforward balance to the BOG in the University's FY 2017-18 FBCR due in August but dated as of July 1, 2017. Our findings on this point, however, are inconclusive. On the one hand, a May 16, 2017 email from Christy Tant expressly requested that the transfers related to the $6 million in E&G funds for the lab buildouts be completed prior to the end of the fiscal year. On the other hand, the funding for both the lab buildouts and the FF&E were actually needed at this time because construction was underway. The Research I building would open just eight months later, in January 2018, and most of the funds transferred to the construction accounts for the lab buildouts and FF&E were spent during fiscal year 2017-18.

H. Downtown Campus Projects

1. Overview

In 2014, UCF decided to expand its limited presence in downtown Orlando and create a satellite campus there (the "Downtown Campus"). The Downtown Campus was conceived as a multi-phase, long term development in collaboration with Valencia College. The BOT approved the initial proposal for the development in January 2015. That summer, however, the Governor vetoed the initial State funding for it, resulting in a revised plan that included constructing several new buildings and renovating an existing building as the first phase of the project. The first phase is slated to open on August 26, 2019 and includes an academic commons building, a central energy plant, a parking garage, a student housing building developed by a third-party with leased space for a campus student center, a renovation of the existing Center for Emerging Media ("CEM") building and various infrastructure to support these buildings.

The State agreed to fund a portion of the costs for the academic commons building in summer 2015, but made it clear at that time that no additional state funding for any Downtown Campus capital projects would be available for several years. Nevertheless, the University moved forward with the first phase of the Downtown Campus and internally funded four of the aforementioned capital projects with a total of $26.7 million in E&G carryforward funds, as follows: 1) the CEM renovation, $5 million; 2) the Downtown Central Energy Plant ("Energy Plant"), $11.5 million; 3) the Downtown Student Services Center ("Student Center"), $5.4 million; and 4) the Downtown Infrastructure ("Infrastructure"), $4.8 million. We found that the decision to use E&G funds for the CEM project occurred prior to the decision for the other three projects, which occurred at the same time and also involved the use of internal loans. We further found that the timing of the E&G transfers to the latter three projects was driven at least in part by a desire to reduce the balance of E&G carryforward funds that the University would have to report to the BOG. Accordingly, the funding of CEM is discussed separately from the other projects. These four projects are the only Downtown Campus projects within the scope of this investigation.

a) *The use of E&G carryforward funds for the CEM project*

The CEM project involves the renovation of an existing building that the University was already occupying in downtown Orlando. It is a 28,000 gross square foot remodel of approximately one half of the building. The budget for the project was $5 million, and actual costs through June 30, 2019 are approximately $2.1 million. (*See*

Appendix D at p. 3). As detailed in the chart at Appendix C, page 2, E&G funds were used for the CEM renovation. Specifically, in November 2016, the University transferred $5 million in E&G carryforward funds from the University's central E&G reserve account to the CEM construction account. We found that the timing of this transfer was consistent with the need for funds to proceed with the project and not related to the timing of reporting of carryforward balances to the BOG.

We found that Provost Dale Whittaker and CFO Bill Merck approved the $5 million in E&G funding for the CEM renovation, and that Associate Vice President Tracy Clark was involved in the decision. The evidence is inconclusive as to President John Hitt's involvement, as will be discussed. We found that other University officials involved in developing the Downtown Campus, including current Interim UCF President Thad Seymour (who became Vice Provost for the Downtown Campus in July 2016), may have received documents indicating that the CEM project was being funded with E&G, but did not understand the significance of this and were not told of any risks associated with such funding. Finally, we found no evidence that the BOT approved of the use of E&G funds for CEM or was informed that E&G funds were being used, although the BOT was informed of the project generally.

b) *The use of E&G carryforward funds for the Energy Plant, Student Center and Infrastructure projects*

The Energy Plant is a new, 9,500 square foot central energy plant designed to meet the chilled water needs of the Downtown Campus. The budget for the project was $15.1 million, and actual costs through June 30, 2019 are approximately $9.4 million. (*See* Appendix D at p. 5). As detailed in the chart at Appendix C, page 3, in October 2017, the University transferred $11.5 million in E&G carryforward funds for this project from its central E&G reserve account.

The Student Center project involves the design and buildout of approximately 47,000 square feet of leased space in the UnionWest at Creative Village building, a privately owned and developed building that includes student residences. The leased space for the Student Center includes the Office of Student Services for the Downtown Campus and other student resources. The budget for the project was $6.7 million, which included a $1.4 million tenant improvement allowance pursuant to the lease. Excluding this allowance, actual costs through June 30, 2019 are approximately $2 million. (*See* Appendix D at p. 4). As detailed in the chart at Appendix C, page 3, in October 2017, the University transferred a total of $5.4 million in E&G carryforward funds for this project, with $2.7 million each coming from the University's central E&G reserves and the Academic Affairs E&G carryforward account.

The Infrastructure project involves the construction of telecommunications, data network systems, plumbing, sanitation, landscaping and other infrastructure needs for the Downtown Campus buildings. The budget for this project was $5 million, and actual costs through June 30, 2019 are approximately $4.2 million. (*See* Appendix D at p. 6). As detailed in the chart at Appendix C, page 3, in October 2017, the University transferred $4.8 million in E&G carryforward funds for this project from its central E&G reserve account.

The University transferred the $21.7 million of E&G carryforward funds to these three projects on the same day—November 1, 2017. However, the transfers were made effective as of October 31 in order to decrease the balance of carryforward funds that the University would have to disclose in an interim report to the BOG due a few weeks later. The BOG's request for this interim report, which the University received on October 17, specifically called for all SUS institutions to report their carryforward balances as of October 31, 2017.

The University recorded the E&G transfers to these three projects as internal loans, created a new budget account to track the transfers and repayments, and developed various plans to repay the loans. These plans included using donations to be raised by the UCF Foundation, auxiliary sources and anticipated future E&G reserves. However, no such plan was ever finalized or implemented, and no repayments had been made towards the $21.7 million of E&G funds loaned to these three projects as of late August 2018, when the University's use of E&G funding for capital projects came under scrutiny in the wake of the TCH scandal.

We found that Provost Whittaker likely approved the funding of these projects in consultation with Associate Vice President Clark, and that others were likely involved in the decision, including CFO Merck. Merck was clearly aware of the BOG's request for updated carryforward balance information that prompted the transfers, and it is highly unlikely that the University would make such large transfers without his knowledge and approval. We could not be more definitive, however, due to the limited documents that exist relating to this decision and because none of these individuals agreed to be interviewed.

The evidence is inconclusive as to whether President Hitt approved of the E&G transfers to these three projects or was even aware of them at the time. To be clear, Hitt was aware of the Downtown Campus projects generally, but he appears to have received only limited information about their funding. Significantly, he did not sign the University's FY 2017-18 Allocation Document, which listed the planned allocation of E&G funds to the three projects, and may not have even seen it, as it was prepared during the presidential transition period. We were unable to ask Hitt about these projects since he declined to be interviewed.

Once again, we found that other University officials involved in developing the Downtown Campus, including current Interim UCF President Seymour, either did not know that E&G carryforward funds were being loaned to fund the Energy Plant, Student Center and Infrastructure projects, or knew but did not understand the significance of this and were not told of any risks associated with such funding.

In March 2018, the University Budget Committee ("UBC") was presented with information about the status of funding for the Downtown Campus, including the aforementioned repayment plan. At that meeting, the UBC was told that "university resources" were being used to fund some of the projects. Although Merck and other senior Finance personnel attended this meeting, they did not disclose the fact that nearly $22 million in E&G carryforward funds had been loaned to three of the projects (or for that matter that $5 million in E&G carryforward funds had been transferred to

the CEM renovation project), or that there was anything potentially improper about the use of such funds.

Finally, we found no evidence that the BOT was informed of the use of E&G funds for the Energy Plant, Student Center or Infrastructure projects or that the Board approved of such funding. Indeed, as will be discussed, the BOT received only limited information about these projects and their funding. For instance, Merck initially told the BOT's Finance and Facilities Committee ("FFC") that the Energy Plant would be funded with a loan of auxiliary funds which would be repaid with future energy cost savings. When plans for the project changed, resulting in an increased budget that would not be repaid with energy savings, Merck did not tell the FFC that the source of funding for the project had also changed or that E&G funds would be used. With regard to the Student Center, the FFC was told that it would be paid for using auxiliary funds and "central funding," but was never told that "central funding" meant E&G carryforward funds. We found no evidence that the FFC or BOT were told anything about the funding for the Infrastructure project. Even when Merck addressed the BOT about these projects on various occasions *after* the November 1, 2017 transfers, he did not inform them that the transfers had happened, that they were being treated as internal loans or how they would be repaid.

2. Timeline of Significant Events

a) *Early plans to renovate the CEM building and secure funding*

For many years, UCF had a small presence in downtown Orlando with two academic facilities. The University leased one of these facilities, the CEM building, from the city of Orlando for $1 per year. By 2009, the University was discussing renovating the CEM building, but this was considered a low priority, long term project. As evidence of this, from 2009 to 2011, the University included the project on its Capital Improvement Plan ("CIP") for PECO funding but ranked it very low (ranging from 38 to 40) and projected that $6.3 million would be needed in the fourth fiscal year of each five-year plan. (Exhibits 125, 126 & 180). The project was listed the same way in the CIPs approved in 2012 and 2013, except it was moved from the PECO category to the lowest priority project under "Requests From Other State Funding." (Exhibits 127 & 181). Despite this, we found no evidence the University asked the State for other funds for the project during this time. A fair interpretation is that the University did not expect to obtain state funding during this time, but included CEM on the CIPs to inform the BOT and BOG that this was a significant, long term project under consideration.

The CEM building is shared with Valencia College and prior to the renovation was used by UCF for multidisciplinary graduate and undergraduate course offerings, including three graduate programs for Interactive Entertainment, Digital Media, and Emerging Media through the Florida Interactive Entertainment Academy ("FIEA"). The renovation project which the University eventually funded in November 2016 (as discussed below) is a 28,000 gross square foot remodel and renovation of the CEM building (roughly half of the building) to upgrade the existing structure and provide modern teaching facilities. The renovation also includes minor updates throughout the

entire building such as new carpeting and painting. The renovation adds general education classrooms, collaborative student learning environments and additional offices to support the Downtown Campus. The renovated CEM building (now called the Communication and Media Building) will house FIEA, the Center for Research and Education in Arts, Technology and Entertainment, and the Nicholson School of Communication and Media, and will offer both graduate and undergraduate programs. (*See* Exhibits 182, 183, 184, 185 & 186).

b) *The University decides to build the Downtown Campus*

By May 2014, the University was discussing expanding its presence in downtown Orlando and establishing a satellite campus there, to be developed in multiple phases. (Exhibit 186). The first phase would ultimately come to include several different capital projects, and is slated to open in August 2019. As part of the planning for this phase of the development, in July 2014, the University added several Downtown Campus projects to its FY 2015-16 CIP, specifically, a "UCF Downtown Presence" project with an estimated cost of $75 million and a "UCF Downtown Presence Garage" project with an estimated cost of $15 million, both listed under "Requests From Non-State Sources, Including Debt." The University continued to include the CEM project under "Requests From Other State Sources" with a slightly higher estimated cost of $6.5 million. (Exhibit 128).

In September 2014, President Hitt publicly announced that UCF and Valencia College wanted to build a joint campus in downtown Orlando and would seek funding from the State. (Exhibit 187). The University continued developing its Downtown Campus plan with many details still to be determined. As shown by a status of capital projects presentation given to President Hitt by the Facilities department in October 2014, the estimated cost for the initial "Downtown Presence" project was $57.8 million with funding to come from the State or to be determined, while the total size of the project, projected construction dates, and the architect and contractor were also undetermined. (Exhibit 135).

President Hitt delegated responsibility for the Downtown Campus project to Provost Whittaker, who in turn formed a working group comprised of individuals from different University departments, including the Downtown Campus, Facilities and the Finance & Accounting ("F&A") departments, to assist with the project. The Downtown Campus department members included Fred Kittinger (Senior Associate VP for University Relations and Director of State & Local Government Affairs), Paul Lartonoix (Assistant Vice President), and Mike Kilbride (Associate Director, UCF Downtown), along with Thad Seymour who was brought in as a contractor in September 2015 after a career in private practice. The Facilities department members included Bill Martin (Director of Facilities, Planning and Construction) and later Allen Bottorff (Director, Downtown Campus Facilities), who assumed Martin's role overseeing construction of the Downtown Campus projects once he joined UCF in 2016. The F&A department members included CFO Merck and Tracy Clark, with assistance from Christy Tant. In July 2016, Thad Seymour was named Vice Provost of the Downtown Campus and assumed primary responsibility for the development of the campus while still in his contractor role (he did not become a UCF employee until January 2018). Notably,

during the relevant time frame, Seymour, Kilbride and Bottorff received no training on the BOG regulations and were not even informed of them. In interviews, Seymour, Kilbride and Bottorff reported that they relied upon Merck and the F&A staff to handle funding issues, with Clark taking the lead.

c) *Initial plans for and approval of the Downtown Campus, and alternative plans in response to Governor veto*

The BOT approved the University's formal proposal for a Type I downtown campus at its January 29, 2015 meeting. Executive Vice Provost Diane Chase prepared the Downtown Campus proposal and Provost Whittaker presented it to the Board. The proposal described a multi-phase, long-term project with an estimated cost of $135.5 million for the capital projects portion to be incurred in the first two years. The proposal did not, however, address the funding sources for these projects. As part of the proposal, the city of Orlando agreed to gift 15-20 acres of land (valued at between $20-22 million) to the University and also transfer to it title to the CEM building (valued at $22.5 million). (Exhibits 186 & 188).

During the spring 2015 Legislative session, the University, with support from the city of Orlando, sought $57.8 million in funding from the State for the Downtown Campus project. (Exhibits 189 & 190). The Legislature allocated $15 million for one of the Downtown Campus buildings in the State budget for fiscal year 2015-16, but Governor Rick Scott vetoed that allocation as part of a larger set of state budget cuts on June 23, 2015. (Exhibits 191, 192 & 193).

Days after the Governor's veto, the BOT approved the University's FY 2016-17 CIP, which listed a number of different Downtown Campus projects. These included the CEM renovation ($6.7 million) and the Energy Plant ($15.1 million), which were both listed in two places, under "Requests From Other State Sources" and "Requests From Non-State Sources," each with planned expenditures in FY 2016-17. Two other Downtown Campus projects were also included in the PECO section of the CIP, UCF Downtown Campus Building I ($57.8 million) and UCF Downtown Campus Building II ($77.7 million). (Exhibit 138). The Fixed Capital Outlay Plan submitted to the BOG on June 30, 2015 included these same project listings. (Exhibit 143). These documents indicate the University was beginning to consider funding sources for specific parts of the Downtown Campus, but now had to develop an alternative plan in light of the Governor's funding veto.

During the summer of 2015, University officials negotiated a new funding plan for the Downtown Campus with the Governor and legislators. Under this plan, referred to by some as the "20-20-20 plan," the $60 million estimated cost of a new downtown academic building (what is now the Dr. Phillips Academic Commons building) would be split evenly between the State, the University, and the UCF Foundation (whose portion would come from fundraising efforts). (Exhibit 194). In agreeing to this plan, the Governor made it clear that the State would not provide any other funding for the Downtown Campus before fiscal year 2018-19, leaving the University on its own to fund any additional Downtown Campus projects it wished to undertake before then. (Exhibit 195).

In September, 2015, the BOT approved the University's updated proposal for a Type I downtown campus, which incorporated this new 20-20-20 plan. (Exhibits 196 & 197). The updated proposal, presented by Provost Whittaker, included the academic commons building, but also the CEM renovation, Energy Plant, Student Center and other projects. Provost Whittaker discussed the 20-20-20 funding plan for the academic commons building and explained that the CEM renovation would be paid for using "already allocated university resources." (Exhibit 194). Whittaker did not specify what these resources were or identify the specific funds that had been allocated. Despite this statement, and as discussed in subsection d) below, we found that discussions concerning the use of E&G funds for CEM did not begin until early 2016, and that the funds were not transferred to the project until November 2016.

On January 7, 2016, the BOT approved a Memorandum of Understanding ("MOU") with Governor Scott concerning the Downtown Campus project which, among other things, memorialized the 20-20-20 plan, including that there would "… be no further State of Florida investment for the UCF Downtown Campus beyond the current request of $20 million prior to fiscal year 2018-2019." (Exhibit 195). The following day, President Hitt signed the MOU on behalf of the University. (Exhibit 198). Given this MOU, the University and BOT knew that no additional State funds would be available for any Downtown Campus projects until July 2018 at the earliest.

Knowing that additional State funding for the Downtown Campus would not be forthcoming, the University looked to other sources, resulting in the decision—at two distinct points in time—to commit E&G carryforward funds towards the four projects at issue here. Below we first discuss the November 2016 decision to fund the CEM project, and then turn to the Energy Plant, Student Center and Infrastructure projects and the November 2017 decision to fund those projects through internal loans of E&G carryforward funds.

d) *The University opts to use E&G carryforward funds to renovate CEM*

We found that University officials began discussing the use of E&G carryforward funds to pay for the CEM renovation in early 2016, culminating in the transfer of $5 million to the project in November 2016. We could not pinpoint the precise date when this funding decision was made, but as discussed below, conclude it was made by Provost Whittaker and CFO Merck, with involvement from Associate VP Tracy Clark.

According to Christy Tant, Whittaker, Merck, Clark, Tant and others began discussing the need to find funding for the CEM project in February 2016. Tant bases this on a February 19, 2016 email she sent to Assistant Vice President Lartonoix, who was involved in the early planning for the Downtown Campus, to confirm the $5-$8 million cost estimate for CEM. (Exhibit 199). Also on February 19, Clark sent an email to Whittaker and Merck attaching a schedule she said Whittaker had asked her to prepare for an upcoming meeting they had with President Hitt. The schedule, entitled "Facilities Funding Plan as of 2/20/16," listed various capital projects and their anticipated funding sources. The schedule included the CEM renovation (identified as "FIEA Renovation") with the source of funding for its estimated cost of $8 million

identified as "Central Carryforward." Clark explained in her email that the cost estimate for the CEM project was being confirmed with Lartonoix. (Exhibit 200).

On February 20, Merck responded to Clark's email, stating "this plan will work." Merck also asked Whittaker and Clark to meet with him the following week "… to see if we can come up with additional options to put into the funding mix." Whittaker responded "agreed" on February 22. (Exhibit 201). It is unclear if Whittaker was agreeing to the proposed funding plan or merely agreeing to meet. Because Whittaker, Merck and Clark declined to be interviewed, we could not ask them about these emails or what they discussed in meetings about this funding plan. It is also unclear if Whittaker and Merck met with President Hitt at this time about the funding plan, and what was discussed if they did.

In early March, Whittaker, Merck and Clark continued to discuss funding options for the CEM project. In emails exchanged on March 11, Merck stated that he had never committed to find more than $4 million in funding for the project, to which Clark responded: "We have $5 million set aside right now." (Exhibit 201).[68] Based on the earlier Facilities Funding Plan, Clark appears to have been indicating that she had $5 million in the University's central E&G reserve earmarked for the project.

On March 23, Whittaker called a meeting with President Hitt, which Merck and Mike Morsberger, CEO of the UCF Foundation, also attended, in an effort to better understand the University's growing list of unfunded capital projects, and develop a process for deciding how to prioritize them. In advance of the meeting, at Whittaker's request, Clark and Tant updated a document listing the funding status of various planned capital projects at the University, and it was circulated to and reviewed by attendees at the meeting. The document, entitled "Capital Projects Current Funding Plan Updated 3/22/16," identified CEM as a funded project and indicated that the funding source for its $5 million estimated cost was "E&G." (Exhibit 151). It is unclear if the CEM project or its funding source was discussed during the meeting.[69] However, as detailed in the TCH Report and in this Report's discussion of Research I, meeting notes indicate certain questions were asked of Merck regarding the use of E&G funds for projects involving academic space (which included TCH and CEM) and his response may have caused attendees to believe such projects were being funded with internal funds other than E&G. (TCH Report at 40.)

As of July 2016, the University's FY 2017-18 CIP and Fixed Capital Outlay Plan no longer included the CEM project, indicating that the Facilities and Finance personnel who prepared these documents understood the project to already be funded, although Tant advised us that she still considered the funding to be in flux. (Exhibits 102 & 106). The funds, however, were not actually transferred to the project until late November 2016.

[68] According to UCF Downtown Associate Director Kilbride, in a meeting with CannonDesign, a firm consulting on the Downtown Campus, Merck said he could find $4 million for the CEM project, and the firm followed up with a $5 million renovation proposal.

[69] Notes from the meeting indicate the need for site improvements was discussed with respect to CEM, but do not reflect a discussion about funding. (Exhibits 202 & 203).

On November 22, 2016, Assistant Controller Rebeca Richards emailed the University's Budget Office to request the transfer of $5 million in E&G funds from the central E&G carryforward account to the CEM construction account. Richards copied Christy Tant on this transfer request, which was made by forwarding an email string discussing the need to transfer the funds in response to the project architect's request for approval to proceed with work on the project. In support of this request, Richards attached a one-page document titled "Draft Budget Without Square Footages UCF Downtown CEM Renovation" and dated November 14, 2016. The document set forth the total project cost but did not indicate who had approved its funding or when such approval was received. (Exhibit 204). The Budget Office processed Richards' request and $5 million was transferred from the central E&G reserve account to the Facilities E&G carryforward account on November 22. The funds were then transferred to the Facilities construction account for the CEM project on November 28. (Appendix C at p. 2).

We were unable to pinpoint exactly when the decision to transfer this $5 million in E&G carryforward funds was made. The use of such funds for the CEM project had been discussed for some time at this point by senior level employees, with the planned funding reflected in various planning documents.[70] We found no indicator of when Provost Whittaker and/or CFO Merck specifically authorized the transfer, but such authorization presumably came after the architect began pushing in late October and early November for approval to begin work.

In April 2017, the Facilities department gave one of its periodic status of capital projects updates to President Hitt. The CEM project was included in the presentation, with its funding source described as "University." (Exhibit 205). The presentation materials for subsequent updates to the President would similarly describe the funding for CEM in this vague manner.

Construction work began on the CEM project in November 2017. As discussed earlier, the project budget was $5 million. As of June 30, 2019, $2.1 million had been spent on the project. (Appendix D). The main renovation work is complete and the University has obtained a Temporary Certificate of Occupancy. University faculty members have moved into the building and the renovated portion opens to students August 26, 2019.

e) *The University loans E&G carryforward funds to pay for the Energy Plant, Student Center and Infrastructure projects*

On November 1, 2017, the University transferred a total of $21.7 million in E&G carryforward funds to the Energy Plant, Student Center and Infrastructure projects but made the transfers effective as of October 31 so they would not be included in an interim carryforward balance report the University had to provide to the BOG in November.

[70] While the CEM project appeared for the first time on an E&G Commitments List dated March 10, 2017, with a commitment of $5 million in FY 2016-17, Tant explained its omission in prior versions was an error and the project's funding decision had been made earlier than this. (Exhibit 163).

These transfers were recorded and tracked as internal loans, although no repayments had been made to the E&G accounts that provided the loans as of late August 2018. The events leading up to this funding decision are addressed chronologically below, followed by a discussion of the University's various plans for repaying the loans which were never finalized or followed. We begin, however, with a brief description of each project, including its status.

(1) The Energy Plant, Student Center and Infrastructure projects

The Energy Plant is a standard central energy plant that utilizes a chilled water system to provide for the cooling needs of the Downtown Campus. Heating for the Downtown Campus is provided by boilers at each building, while electrical power is provided by local utilities. The plant is housed within a 9,500 square foot building, and there is a large equipment yard for the exterior components (cooling towers, pumps and transformers). The University originally pursued a tri-generation plant option to provide electrical, heating and cooling with the idea of using future energy cost savings to repay the project, but ultimately determined that was not feasible and opted instead for the chilled water plant. The relevant significance of this decision is that it impacted the cost of the Energy Plant project and eliminated the possibility of repaying the project with future cost savings. The project budget was $15.1 million, and $11.5 million in E&G funds were transferred to the project account. As of June 30, 2019, approximately $9.4 million had been spent on the project. (Appendix D). The project is approximately 95% complete, with an anticipated substantial completion date of late September 2019 and final completion date of December 2019.

The Student Center is part of UnionWest at Creative Village, a privately funded and developed 15-story building with residences on the top floors and other amenities. The University is leasing approximately 47,000 square feet of space within the building's first five floors, and shares that space with Valencia College. The Student Center project includes the design and buildout of the leased space, as well as FF&E for the space. The leased space includes the Office of Student Services for the Downtown Campus, a welcome area, classroom and office space, and a recreation center. It also includes Valencia College's School of Culinary Arts and Hospitality. The University's expenditures for this project are subject to its lease agreement with the UnionWest developers, which included a $1.4 million tenant improvement allowance which was used as part of funding the buildout. The project budget was $6.7 million, and $5.4 million in E&G funds were transferred to the project account. Excluding the $1.4 million tenant improvement allowance, as of June 30, 2019, approximately $2 million had been spent on the project. (Appendix D). The Student Center is slated to open on August 26, 2019. While the University has a Temporary Certificate of Occupancy for the Student Center space, some work remains and the anticipated completion date is January 2020.

The Infrastructure project involves the construction of various types of infrastructure needed for the Downtown Campus. This includes the underground infrastructure consisting of the telecommunications and data network system connections, along with the storm water, sanitation and power infrastructure that

connect to the different Downtown Campus buildings. It also includes the data network system connections for the UnionWest building, including the Student Center. The project also includes above ground infrastructure such as street lights and landscaping. The project budget was $5 million, and $4.8 million in E&G funds were transferred to the project account. As of June 30, 2019, approximately $4.2 million had been spent on the project. (Appendix D). There remains some additional work to be performed, which is expected to be completed in September 2019.

(2) University officials consider using auxiliary funds for the Energy Plant but have no funding plans for the other projects

As discussed earlier, by early 2016, the BOT had approved the revised proposal for the Downtown Campus which incorporated the 20-20-20 plan for the academic commons building, and the University had signed an MOU with the Governor, confirming the plan and that no additional state funding would be provided to the Downtown Campus for several years. Against this backdrop, University officials began considering how to fund the other facilities they wished to build as part of the Downtown Campus, including the Energy Plant, Student Center and Infrastructure projects. Between March 2016 and August 2017, the University developed an initial plan to fund the Energy Plant using a loan of auxiliary funds, which would be repaid with future energy cost savings. The University also signed the lease for the Student Center during this time period, but does not appear to have identified funding for the project or even developed a funding plan. Funding for the Infrastructure project also received little attention during this time.

The Capital Projects Funding Plan document prepared for, and discussed at, Provost Whittaker and CFO Merck's March 23, 2016 meeting with President Hitt included the Energy Plant and Infrastructure projects, but identified them as unfunded. The Infrastructure project did not even have an estimated cost, while the estimated cost of the Energy Plant was $20 million, indicating these projects were still in the early planning stages. (Exhibit 151). The status of capital projects presentations given by the Facilities department to President Hitt in April 2016 and to the FFC in June 2016 similarly indicated that funding options for the Energy Plant were still being explored, and did not include the Infrastructure or Student Center projects at all. (Exhibits 103 & 206).

In May and July 2016, the BOT approved the FY 2016-17 Fixed Capital Outlay Budget and the FY 2017-18 CIP, respectively, each of which included the Energy Plant with an estimated cost of $15.1 million. The Fixed Capital Outlay Budget listed the project under non-state sources and indicated it was unfunded. The CIP listed the project as an anticipated expenditure in FY 2017-18 under Requests From Other State Sources as well as Request From Non-State Sources, indicating uncertainty as to its anticipated funding source, despite apparent plans to proceed with construction in the following year. Neither the Student Center nor Infrastructure projects were included on these documents, signaling that they were not yet being meaningfully pursued. (Exhibits 102 & 142).

The Energy Plant and Student Center projects were discussed with the FFC at its August 17, 2016 meeting. With respect to the Student Center, the FFC approved an MOU between the University and the private developer of the downtown student housing project. According to the agreement, UCF would lease approximately 30,000 square feet in the building for the Student Center and other uses. UCF would be responsible, however, for the costs to buildout and furnish the leased space, but would receive a tenant improvement allowance of approximately $1.4 million which would be applied first to such expenditures.[71] According to the FFC meeting minutes, Merck and John Pittman (Associate Vice President for Administration and Finance, Debt Management) also discussed the Energy Plant and recommended pursuing a state-approved performance-based contract for an outside company to finance and build the facility. This was a discussion item only, and the FFC was not asked to approve anything. Nevertheless, the FFC had reservations about this approach, and asked that alternative financing options be presented at a future meeting. (Exhibit 209).

The alternative plan which evolved from this was to finance the Energy Plant with a loan of auxiliary funds. This is reflected in meetings and emails during September 2016 involving a large number of people, including Merck, Clark, Tant, Pittman, Lee Kernek (Associate VP for Facilities & Safety), Lynn Gonzalez (Director of Budget Initiatives) and Brad Hodum (Associate Controller). Emails indicate that staff knew there were not enough auxiliary funds available to serve as principal for the proposed loan; nevertheless, they continued to pursue the plan anyway. (Exhibits 210, 211 & 212).

Merck, Pittman and Kernek presented the Energy Plant again at the FFC's October 12, 2016 meeting.[72] Materials they submitted to the FFC clearly identified the funding source for the project, stating: "Auxiliary cash balances will fund the construction of the facilities and purchase of the equipment, and the balances will be replenished with funds from the energy savings." (Exhibit 215). These materials did not disclose any concerns that insufficient auxiliary funds were available to make the loan. According to the audio recording of the meeting, Pittman told the FFC that the University planned to "self-fund" the construction, but did not elaborate on the description of funding provided in the meeting materials. FFC Chair Alex Martins asked that the project be brought back to the Committee once a final financing plan was in place. Merck responded that projects were not typically brought back before the FFC once they were approved and the funding source identified, but agreed nonetheless to bring the project back before the FFC at a later date as an informational item. (Exhibit 216).

In January 2017, the BOT approved a minor amendment to the 2015-25 Campus Master Plan to add the Energy Plant and various other Downtown Campus projects. A

[71] The BOT subsequently approved the Student Center MOU at its September 15, 2016 meeting. (Exhibit 208).

[72] In preparing for this meeting, Merck, Clark, Pittman and others compared the costs of the various options that had been requested by the FFC. Given the project's high cost and attention given to it by the FFC at the last meeting, Merck raised the question of whether it should be an approval item on the agenda, requiring a vote by the FFC and full BOT, or merely an informational item, and apparently decided to make it an informational item only. (Exhibits 213 & 214).

Capital Improvements List included in the meeting materials identified "E&G" as the "Fund Type" for the Energy Plant, but we found no evidence this was discussed with or otherwise brought to the attention of BOT members during the meeting. (Exhibits 110 & 111). This listing was inconsistent with the plan to fund the project with a loan of auxiliary funds that had been presented to the FFC just a few months earlier.

In or around March 2017, F&A staff prepared an internal loan repayment schedule for the Energy Plant, although the source of the internal loan funding was not specifically stated. (Exhibit 218). Internal emails from the same month, however, indicate that an auxiliary loan for the project had been approved, although it is not clear by whom. They also indicate that in May, the University signed a design contract for the Energy Plant, which reflected an increased budget from $10.3 million to $12.2 million. (*See* Exhibit 217). In July, Facilities established a construction account for the project, and Clark, Tant, Lee Kernek and others, including Allen Bottorff (Director, Downtown Campus Facilities), discussed how to address the project's increased budget, including the need for revised payback schedules and to present the new estimated costs to the BOT if the budget was not brought back in line. They also discussed the need for an MOU for the auxiliary loan, although we are aware of no such document being signed. On July 14, the University established a $1.5 million budget in the Downtown Energy Plant construction account to cover the design contract, although no official budget or general ledger (funding) transfers were made until later. (Exhibits 219 & 220).

In May 2017, the BOT approved the FY 2017-18 Capital Outlay Budget, which listed the Energy Plant as fully funded under "Other State Sources" with an estimated cost of $15.1 million. (Exhibit 112). This listing is curious since auxiliary funds are self-generated and not received from the state. When the FFC approved the budget earlier that same day, Lee Kernek explained (in reference to the CIP) that projects in the "Other State Sources" category were merely intended to "notice the Board of Governors" that the University was undertaking the projects and that they were all "internally funded." (Exhibit 221). Kernek did not specify that the internal funds to be used for the Energy Plant were auxiliary funds or that they were being loaned. The Capital Outlay Budget did not list the Student Center or Infrastructure projects and Kernek did not discuss them. There was no substantive discussion of the Capital Outlay Budget or any of the Downtown Campus projects during the BOT meeting.

The FY 2018-19 CIP approved by the BOT on July 20, 2017 did not include any of the three projects at issue (the Energy Plant was listed but crossed out, apparently indicating that funding was no longer needed for it). However, the accompanying "BOB-2" form listed "E&G" as the funding source for the Energy Plant. (Exhibit 104). According to the audio recording of this BOT meeting, the BOB-2 and the Energy Plant project were not specifically discussed. As noted in the TCH Report, BOT members interviewed were unfamiliar with the purpose of the BOB-2 form and likely would not have reviewed it specifically during the process of approving the CIP. (TCH Report at 29-30). Further, the BOB-2 listing conflicts with the Energy Plant plan to fund the project with an auxiliary loan previously disclosed to the FFC.

(3) University officials consider using E&G carryforward funds for the Energy Plant, Student Center and Infrastructure projects

We found that by August 2017, University officials were considering using E&G carryforward funds for some combination of the Energy Plant, Student Center and Infrastructure projects, although a final decision was not made until October.

For example, the FY 2017-18 Fund Balance Composition Report ("FBCR") submitted to the BOG on August 21, 2017 included $5.4 million in planned E&G funding for the Student Center (under the "Infrastructure, Capital Renewal, Roofs, Renovation, Repair" subcategory of E&G funds that were restricted or subject to a contractual obligation), but did not include the Energy Plant or Infrastructure projects. (Exhibit 210).[73] This is the earliest reference we found to funding the Student Center project with E&G funds. Christy Tant, who prepared the FBCR using the E&G Commitments List, said she did not include the Energy Plant or Infrastructure projects because the plan at the time was to use auxiliary funds for those projects, and she was not told that E&G funds would be used for them until October 2017. None of the projects, however, appear in the August 2017 version of the E&G Commitments List which would have been used to prepare the FBCR.[74] (Exhibit 223).

Adding further confusion, the FY 2017-18 Allocation Document includes all three projects, allocating E&G funding to them in the same amounts that were ultimately transferred on November 1, 2017 (as discussed in the next section).[75] The Allocation Document for a fiscal year is normally prepared in August of that fiscal year and signed by the President and Provost, authorizing the E&G allocations. However, as has been discussed, preparation of the FY 2017-18 Allocation Document was significantly delayed due to various reasons and never signed. There is no date on the copy of the Allocation Document we were provided, and therefore we cannot say when the three projects were added to the document, and it is possible they were added after the E&G transfers to the projects occurred in November.

---

[73] According to emails, Christy Tant shared a draft of this report with Provost Whittaker, who in turn appears to have shared it with BOT Chair Marcos Marchena. However, the draft did not include any amount under the "Infrastructure, Capital Renewal, Roofs, Renovation, Repair" subcategory for "Restricted/Contractual Obligations," and thus does not appear to have included or referenced the planned expenditures on the Student Center project. (Exhibits 210, 211 & 212). It is noteworthy that the emails between Tant and Whittaker indicate that Whittaker is unfamiliar with these reports.

[74] Tant explained that funding for the Downtown Campus projects was continuously being discussed and evaluated, the tracking documents were regularly being revised or corrected as costs and funding sources changed, that she did not attend many of the meetings where downtown funding was discussed, and that she would not normally update the E&G Commitments List until she was told that funding decisions had been approved. Nevertheless, it is curious that she included a planned allocation of E&G funds to the Student Center on the FBCR but did not also update the E&G Commitments List.

[75] The Allocation Document actually combines the Energy Plant and Infrastructure projects as "Chilled water and infrastructure" with a $16.3 million allocation (the combined total of both projects) from the F&A department, and lists the Student Center in two different entries for a combined allocation of $5.7 million, split equally between the F&A and Academic Affairs departments — all consistent with the actual transfers made in November 2017. (Exhibit 176).

The Energy Plant appears on the September 25, 2017 version of the E&G Commitments List, and is the first of these three projects to appear on this budget tracking document. This version lists the Energy Plant in the "Recurring allocations from nonrecurring funds" section, with anticipated installment payments over fiscal years 2018-19 through 2022-23 instead of the full $11.5 million expenditure in FY 2018-19. (Exhibit 224). The placement of this project under recurring allocations, and other notes in the document, reflect that the plan was still to treat the funding for this project as a loan, although now a loan of E&G funds rather than auxiliary funds. However, Tant's statements that the funding plans for all three projects remained in flux at this time, and that she was not told until October that E&G funds would be used, suggest that a final decision to loan E&G funds to pay for the Energy Plant may not have been made yet, despite the project's inclusion on this document.

On September 26 and 27, 2017, the building lease for the Student Center project was presented to, and approved by, the FFC and BOT, respectively. CFO Merck, Thad Seymour (Vice Provost for UCF Downtown) and Jennifer Cerasa (Associate General Counsel) presented the lease to the FFC, while Merck presented it to the BOT. (Exhibits 225 & 226). Mike Kilbride, the Associate Director for UCF Downtown, prepared talking points for Seymour to use at the FFC meeting which, among other things, addressed funding for the $5.3 million in buildout costs for the Student Center space. The written talking points and audio recording of the meeting confirm Seymour told the FFC this cost would be split between "auxiliary fund reserves and central funding." (Exhibits 227 & 228). In presenting the lease to the BOT the next day, Merck did not share the cost amount for the Student Center buildout or the specifics of the project funding.

Seymour and Kilbride cooperated in this investigation, answered questions about the talking points and Seymour's FFC presentation, and provided copies of relevant emails. Both confirmed that Kilbride used funding information provided to him by Tracy Clark to prepare the talking points, and both understood "central funding" to mean funds controlled by Merck's F&A department that were not committed to any colleges or units. They did not understand "central funding" to refer to E&G funds, although neither were aware of the BOG regulations limiting the use of such funds, and so the use of such funds for the Student Center project would not have concerned them anyway. Neither Seymour nor Kilbride were told after this meeting that auxiliary funds would not be used for any portion of the project, and that the entire cost of the project would be funded with a loan of E&G carryforward funds. Further, according to Seymour, he was not involved with the decisions on funding sources for any of the Downtown Campus projects, and understood that was being handled by the F&A department, specifically Merck and Clark. We found both witnesses to be candid and credible, and found no evidence contradicting their statements.

(4) University officials decide to fund all three projects using E&G carryforward loans

The decision to use E&G carryforward funds for the Energy Plant, Student Center and Infrastructure projects appears to have been made in the second half of October 2017, coinciding with a request from the BOG at that time to provide an interim FBCR in November, reporting the University's carryforward balances as of October 31, 2017.

As will be discussed, on November 1, the University transferred a total of $21.7 million in E&G carryforward funds to the construction accounts for these three projects but made the transfers effective October 31, so that the funds would not be included in the BOG report a few weeks later.

On October 17, 2017, BOG staff emailed a "Fund Balance Update" memorandum to all university CFOs, including Merck, through its standard data requests process. The memorandum explained that the BOG needed to provide an update on university carryforward fund balances to the Legislature, attached the fund balance report data each university had submitted in August 2017, and asked each university to provide their updated information (as of October 31, 2017) by no later than November 17. Merck received this email and forwarded it to Clark and Tant the same day, stating: "And, here it is." (Exhibit 229). According to Tant, this email and the BOG's request for an interim fund balance report prompted the E&G transfers for the three downtown campus projects two weeks later.

Clark instructed Tant to make the transfers of E&G funds to these Downtown Campus projects and have them posted in October. Clark did not inform Tant who had authorized the transfers. However, Tant explained that Clark gave her these instructions after returning from a meeting with Provost Whittaker and possibly others, and that Clark did not make these types of decisions on her own. We found no direct evidence that Merck was present at such meeting or authorized the transfers. However, the fact that he received the BOG Fund Balance Update memorandum and as CFO would likely need to authorize or at least be apprised of funds transfers of this size (exceeding $21 million) suggests he either approved the transfers or, at a minimum, was aware of them. We found no evidence that President Hitt approved the transfers or was even aware of them, with the exception of the aforementioned unsigned FY 2017-18 Allocation Document that listed the E&G allocations to the projects. Hitt, Merck, Whittaker and Clark all declined to be interviewed and thus could not be questioned about these events.

In his PIE Committee testimony, Merck stated that "there would have been a number of us involved in" funding decisions for the Downtown Campus projects. (Exhibit 12 at p. 75). He did not testify about the Energy Plant project specifically, but stated with regard to the Infrastructure project that "while I was involved in the discussions of what to do and that sort of thing, I wasn't directing money to be transferred from any particular place to do it." Merck further stated that the "commitments" to the Energy Plant and Infrastructure projects were discussed at University Budget Committee ("UBC") meetings prior to the actual transfers taking place, although we found no evidence of that, or that the Student Center project was discussed. (*Id.*). For her part, Clark testified that the transfers to the Downtown Campus projects "should have been discussed in a budget chat meeting, yes;" she did not know if they were also discussed in a UBC meeting. (Exhibit 13 at p. 66). The scope of Whittaker's testimony in his PIE Committee deposition did not include the funding of the Downtown Campus projects. In sum, none of them specifically identified the person(s) who actually approved the transfers.

On October 31, 2017, Tant met with Donna DuBuc (Associate Director, Budget, Planning and Administration) to discuss the fund transfers for the Downtown Campus projects requested by Clark, and asked DuBuc to set up a method to track these transfers as internal loans and post them effective as of October 31. (*See* Exhibit 230). The next morning, November 1, DuBuc sent an email titled "Downtown Construction Transfers" to staff accountants Meghan Nelson and Lea Mignone, copying Tant and Associate Controller Brad Hodum, among others, requesting that both budget and cash transfers of carryforward funds totaling $21.7 million be made as of October 31 to the construction accounts for the Energy Plant ($11.5 million), Student Center ($5.4 million), and Infrastructure ($4.8 million) projects. The email itemized the specific accounts and amounts of the transfers, but did not attach or reference any authorization or support for the transfers, as was normally required. (Exhibit 231).

The transfers were made on November 1, 2017, but as instructed, were recorded as of October 31. (Appendix C at p. 3). The transfers of $11.5 million to the Energy Plant construction account and $4.8 million to the Infrastructure account originated from a new budget account DuBuc opened to track this budget transfer and subsequent repayments separately from other E&G carryforward funds held in the central E&G reserve (the "E&G Central Carryforward Internal Projects Account"). The transfer of $5.4 million to the Student Center account originated in equal amounts from the E&G Central Carryforward Internal Projects Account and Academic Affairs' E&G carryforward account.[76]

On November 17 2017, the University submitted its interim FBCR to the BOG which reported its E&G carryforward fund balance as of October 31, 2017. This balance did not include the $21.7 million because it had already been transferred to the construction accounts for these Downtown Campus projects. (This amount was included in the "Expenditures to Date" line as part of the roll-forward of the E&G carryforward fund balance from July 1, 2017 to October 31, 2017, which had the effect of decreasing the reported E&G carryforward balance). (Exhibit 222).

Following this, one of the projects, the Energy Plant, was presented to the BOT, but its funding source was not disclosed as E&G funds. Indeed, the fact that $21.7 million in E&G funds had just been loaned to the Energy Plant and other two projects was not shared at all. In December 2017 and January 2018, the FFC and BOT approved the change in plans for the Energy Plant from a tri-generation plant to a central energy plant (providing cooling only) along with a budget increase to $12.3 million. The FFC and BOT members were not told that the project had already been funded with $11.5 million, or that those funds were E&G carryforward funds that had been loaned to the

[76] After the fund transfers on November 1, all three projects appeared on the E&G Commitments List. The November 16, 2017 version (which has an updated date of November 1) listed the Energy Plant the same way it was listed in the September version, and added the Student Center and Infrastructure projects with no amounts indicated. (Exhibit 232). The November 30, 2017 version includes all three projects and their respective E&G funding amounts that were transferred from F&A: Energy Plant ($11.5 million), Infrastructure ($4.8 million) and Student Center ($2.7 million). (Exhibit 233). The other $2.7 million transferred for the Student Center was not listed because it came from the Academic Affairs division's E&G carryforward account, not F&A.

project. (Exhibits 234, 235, 236 & 237). During the December 13, 2017 FFC meeting[77], FFC (and BOT) Chair Marchena asked Merck specifically about the funding source for the Energy Plant in the following exchange:

MARCHENA	Bill, what is the source of funding, uh, for the $12.3 million?
MERCK	We are using and, I'm going to get Christy to correct me if I'm wrong on this. Like I said, I like to have all my subject matter experts here to back me up so if I go astray they can corral me and-. But we're, **we're using the same source which is our internal, um, r-, uh, returns on investments, our interest earnings and so forth on, um, our auxiliary accounts and other accounts that are legitimately available for those purposes**. And then we let those, we'll, we'll borrow from our cash balances which are enough to handle it and then as those earning come in then we replenish the, the amounts that we took out of the cash that actually belongs to the people the different departments. Is that fair?
TANT	Yes.

(Exhibit 239 (emphasis added)). Merck did not clearly say the University was using E&G carryforward funds, even though such funds had just been transferred six weeks earlier, and Tant did not clarify this either. Nor did Merck say that the funds being loaned were not permissible for this purpose or that there was any possibility they were impermissible, even though the Energy Plant plainly involved new construction. As such, the Board members could not reasonably have been expected to understand that E&G funds were being used to finance the Energy Plant project, that such funds were being loaned to the construction account through an internal loan, or that there was anything possibly improper or risky about the funding. FFC members we interviewed

[77] Mike Kilbride prepared talking points for Merck to use at this FFC meeting which were shared with Merck, Seymour and Bottorf, and edited by Merck. These talking points indicated the University would use "central reserves" to fund the Energy Plant. (Exhibit 238). As discussed previously, Kilbride and Seymour did not understand "central funding" to mean E&G funds and would not have appreciated the significance of using E&G funds for this project at the time even if told such funds were being used.

who were present for this meeting, including Chair Marchena, confirmed they did not understand these points.[78]

The BOT did not receive any further specific information about the funding of the Energy Plant, Student Center or Infrastructure projects until September 2018 in connection with the TCH investigation. The FY 2018-19 Capital Outlay Budget approved by the BOT on May 24, 2018 included the Energy Plant but only under the "Plant Operations and Maintenance" category, indicating the University would seek state funds for the project's operating costs after it was completed. The other Downtown Campus projects at issue were not included. (Exhibit 207). Accordingly, the BOT did not approve the capital outlay for the construction of any of these projects during FY 2018-19, although construction began and funds were expended.

Similarly, the FY 2019-20 CIP approved by the BOT on July 19, 2018 did not list any of these projects. This makes sense considering that University officials knew the projects were already fully funded with E&G carryforward funds. However, the BOB-2 form accompanying this CIP did list the Energy Plant and Student Center as projects that may require State funding to operate and maintain, and identified their funding sources as "E&G (Reserve)-Private" and "Private," respectively. (Exhibit 178). As noted in the TCH Report, BOT members were unfamiliar with the BOB-2 from and likely would not have reviewed it specifically during the process of approving the CIP. (TCH Report at 30). Lee Kernek, who was responsible for preparing the CIPs and BOB-2 forms and presenting them at Board meetings, declined to be interviewed.

(5) University officials develop plans to repay the E&G loans, but no plan is ever finalized or implemented, and no repayments occur

Between October 2017 and August 2018, Tracy Clark and other F&A staff developed various plans to repay the $21.7 million in E&G carryforward funds that were loaned to the Energy Plant, Student Center and Infrastructure projects, including using donations to be raised by the UCF Foundation *and future E&G carryforward funds*. These plans, which were discussed early on by a group led by Clark that included Thad Seymour (Vice Provost for the Downtown Campus) and Mike Morsberger (CEO of the UCF Foundation), also addressed the funding of other Downtown Campus projects beyond the scope of this investigation. We found that none of these plans were actually implemented and that as of late August 2018, when the funding of TCH came under scrutiny, no repayments had been made towards the internal loans for the Energy Plant, Student Center and Infrastructure projects.

The primary document evidencing this repayment plan is called the "Repayment Schedule for Internally Financed Capital Projects," one version of which was titled "Downtown Funding Plan" (the "Repayment Schedule"). The Repayment Schedule was

[78] The BOT approved the change in facility type, budget increase and name change for the Energy Plant project at its January 18, 2018 meeting. Trustee Martins briefly explained the reasons for the changes provided by Merck and Kernek at the FFC meeting, but made no mention of project funding. (Exhibit 240).

an internal working document created to identify the proposed method of repaying internal loans that were used to finance the construction of various Downtown Campus capital projects. All of the different versions of the schedule include the Energy Plant, Student Center and Infrastructure projects. They also include the CEM renovation project, although it is clear there was never any plan to repay the E&G carryforward funds used for that project (which were not, after all, loaned). The Repayment Schedule lists each project in the first column with the repayment source(s) identified underneath or to the side of the project name, and then includes the total project cost, funded amount and planned repayment amounts by year in the columns to the right of the project. Clark and Christy Tant were initially responsible for updating and maintaining this document, with responsibility later shifting to Associate Controller Hodum and staff accountant Nelson.

The earliest version of the Repayment Schedule we identified is from mid-October 2017. Tant sent this version of the document to Clark, at her request, on October 19. This version indicated that "Central E&G reserve" would be used to repay the entire amount loaned for the Energy Plant, "Provost reserves" would be used to repay at least half of the amount loaned for the Student Center, while auxiliary funds would be used to repay the Infrastructure loan. None of the projects were identified as being funded, which makes sense as the transfers to their construction accounts would not be made for two more weeks, until November 1. (Exhibit 241).

On November 2, 2017, the day after $21.7 million in E&G carryforward funds was transferred to the three Downtown Campus projects at issue, staff from F&A, UCF Downtown, and the Foundation met to discuss funding plans for the Downtown Campus, including plans to repay internal loans that were being used to finance some of the projects.[79] In a follow-up email sent to the group members the next day, UCF Downtown Associate Director Kilbride summarized the meeting outcome that the group was "setting our next philanthropic goal (capital) for the current phase of the downtown project at **$12 Million**" and that one of the ways the funds would be used as they were raised was for "[a]ccelerated repayment of central university resources contributed towards the capital projects in Phase 1." After the meeting, Clark was to update the Repayment Schedule and share it with the group, which would then meet again in late January 2018. (Exhibits 242 & 243).

Clark emailed the updated Repayment Schedule to the group the next day. The new plan called for $6.5 million in future donations raised by the Foundation to be used to repay the $11.5 million that was loaned for the Energy Plant during fiscal years 2018-19 through 2021-22, with the remaining balance of $5 million to be repaid using "Central E&G reserve" funds during fiscal years 2019-20 and 2020-21.[80] Donations

[79] The attendees at this meeting were Clark, Seymour, Kilbride, Dorcas Wilkinson (Associate VP Advancement/Alumni Affairs), Karen Cochran (Associate VP Advancement/Alumni Affairs), Paul Baker (Senior Philanthropic Advisor, UCF Foundation) and Tamara Smith Darby (Coordinator Administrative Services).

[80] According to Tant, "Senior Leadership" (who she identified as Whittaker, Merck, Clark, Kernek, Pittman and others) sometimes redirected E&G funds committed to the additional utilities expenses anticipated at the Lake Nona medical school campus towards other needs. In the case of the Energy

would not be used to repay any portion of the loans for the Student Center and Infrastructure projects.[81] Instead, $2.7 million from "Housing reserves" and $2.7 million from "Provost E&G reserves" would be used to repay the Student Center loan in fiscal years 2018-19 and 2019-20, respectively, and the Infrastructure loan would be repaid using $2.5 million from the "Central E&G reserve" in fiscal year 2021-22 and $2.5 million from auxiliary funds in fiscal years 2021-22 and 2022-23. For reasons that are unclear, the Repayment Schedule included a column showing the amount funded for each project listed "*as of June 30, 2017*," so the Energy Plant, Student Center and Infrastructure projects were all shown as unfunded, even though they were fully funded only a few days earlier. (Exhibit 244).

Clark noted in her email that the group needed to meet with CFO Merck to get his support for this new plan.[82] Based on a calendar invitation, that meeting was scheduled for November 27, 2017. (Exhibit 245). It is unclear, however, if the meeting actually took place. Regardless, emails and other documents reflect that discussions about the Repayment Schedule continued into the following months and that the general plan did not change over that time, except for small changes in estimated project costs. (Exhibits 246, 247 & 248). Accordingly, it can reasonably be assumed that Merck concurred with the plan.

On March 26, 2018, Seymour and Kilbride presented an update on the funding for Phase I of the Downtown Campus to the UBC.[83] Because UBC meetings are not recorded, the meeting minutes are the best evidence of what was discussed. The minutes for this meeting indicate that Seymour and Kilbride began by giving an overview of the projects included in Phase I of the Downtown Campus. Kilbride then outlined the funding plan for each project, including using $12 million in donations to be raised by the Foundation, $6.5 of which would be used for "repayment of university

---

Plant, Clark informed Tant to redirect these utilities commitments to the Energy Plant over time to "make central whole for funding the project." In other words, the University planned to repay the costs of the Energy Plant with central E&G carryforward funds over time. This was reflected in notes in the September 26, 2017 version of the E&G Commitments List and subsequent versions thereafter, and confirmed in follow up conversations with Tant.

[81] The remaining $5.5 million of the $12 million philanthropic goal was earmarked for repaying portions of the Downtown Academic Building ($5 million) and the Downtown Centroplex ($500,000) projects.

[82] Clark's suggestion was to meet with Merck and Curtis Sawyer, the Associate VP of University Services, to get their support for the plan. Clark previously sent Sawyer the October 2017 Repayment Schedule, and was likely including him because he was with the University's direct support organization responsible for parking and transportation and the repayment plan included the downtown parking garage.

[83] UBC member attendees were Cristina Barreto (Student Government Leadership), Scott Cole (General Counsel), Maribeth Ehasz (VP for Student Development & Enrollment Services), Grant Heston (VP for Communication & Marketing), Elizabeth Klonoff (Vice President for Research and Dean of the College of Graduate Studies), CFO Merck, John Pittman (Associate Vice President for Debt Management), and, attending by phone, Deb German (Dean and VP for Health Affairs, College of Medicine). Non-member attendees were Donna DuBuc, Lisa Jones (Associate Provost of Strategy and Special Assistant to the President), Robert Taft (Chief Audit Executive), Mark Wray (Information Systems Training Specialist Lead), and, attending by phone, Mike Morsberger (CEO, UCF Foundation).

resources." The minutes do not indicate that UBC members were told what types of funds comprised "university resources" or that the University had loaned E&G carryforward funds to pay for some of the Phase I projects. For their part, Seymour and Kilbride advised us that they did not understand how the University was internally financing these projects or what specific funds were being used, and that the information they presented at this meeting had been supplied by Merck and/or Clark. They also indicated that they were not familiar with the BOG regulations or restrictions on the use of E&G funds and had no idea there was anything potentially improper about the funding of these projects. The UBC was not asked to vote or take any action on the funding update presented by Seymour and Kilbride. (Exhibit 249).

The minutes for this meeting do not reflect that the Repayment Schedule was shared with UBC members or discussed during the meeting. It was not included with the agenda or other meeting materials that were circulated in advance of the meeting or included in the PowerPoint that was presented. (Exhibit 250). In connection with the investigation, we received a copy of the December 2017 version of the Repayment Schedule (titled "Downtown Funding Plan") in a PDF file that also contained the UBC agenda and meeting minutes for March 26, 2018. This version of the Repayment Schedule indicates that "central E&G reserve" funds were used for the CEM project, but still shows the Energy Plant, Student Center and Infrastructure projects as unfunded. It does show, however, a plan to repay the costs of those projects using E&G funds. (*See id.* at 4-5). We found that, despite being included in the PDF file, this document was not provided to or discussed with UBC members in connection with the March 2016 meeting.[84] Moreover, UBC members we interviewed confirmed that they had never seen the document before.

University officials (primarily F&A staff) continued discussing plans to repay the loans for the Downtown Campus projects intermittently from April through at least September 2018. As reflected in the corresponding versions of the Repayment Schedule, as of April 2018 the University still planned to use E&G funds to repay portions of these three projects, but by September 10 had changed the plan so E&G funds would not be used, presumably in response to the TCH controversy. (Exhibits 248, 252 & 253).

We found no evidence that the University made any repayments towards these loans as of late August 2018, when the funding of TCH came under scrutiny and officials began repaying E&G funds that had been used to fund its construction. The Budget Office's intent with setting up the E&G Central Carryforward Internal Projects Account was to track the outstanding balances and repayments, but a review of the ledger for activity in this account confirmed the University made no repayments towards these projects as of August 23, 2018. Similarly, Associate Controller Hodum, who helped prepare the draft amortization and repayment schedule for the Energy Plant in March

[84] Donna DuBuc requested the 2017 Repayment Schedule from Mike Kilbride following the meeting and then apparently created a PDF that included it, as well as the meeting agenda and minutes. Kilbride advised us that he does not believe the Repayment Schedule was discussed or distributed at the UBC meeting, and that DuBuc asked him for it because she did not receive a copy at the meeting (which she attended). (Exhibit 251).

2017, confirmed no payments matching the repayment schedule were made through 2018.

Furthermore, it does not appear that the plans to institute a fundraising campaign to assist in repaying the Energy Plant loan and funding other Downtown Campus projects ever got past the planning stage. Multiple witnesses from the Foundation, including CEO Morsberger, confirmed there was never a formal fundraising campaign established for this purpose. Despite attending at least one meeting where the $12 million fundraising goal was discussed, Paul Baker (who was hired in 2017 as the Foundation's dedicated person for the Downtown Campus philanthropic efforts) remembered nothing about the goal or any plan to solicit donations to repay loans made by the University to fund some of the downtown projects. While the Foundation did raise approximately $1.65 million in donations for the Downtown Campus beyond the initial $20 million it raised for the Dr. Phillips Academic Commons building (as part of the 20-20-20 plan), Baker confirmed these additional donations were earmarked for specific purposes, such as naming rights for the plaza and fountain for the Dr. Phillips Academic Commons building and a Downtown Campus mentoring program. We found no evidence these funds were transferred to the central E&G reserve account that funded the loans for the Energy Plant, Student Center and Infrastructure projects.

While apparently not pursued—at least as of late August 2018—it is notable that the University's plan for repaying these loans included using *future* E&G carryforward funds from its central reserve. Thus, this is not a situation where the University was merely planning to temporarily fund these capital projects using impermissible E&G funds and then subsequently replace them with funds that could be permissibly used.

The absence of a viable plan to repay the loans is further reason why they should not have been made in the first place. As Merck himself explained at a BOT meeting in January 2017 in response to a question from Chair Marchena about the process for using internal loans to fund capital projects and the related limitations: "… we've gotta have a plan for replenishing that with some revenue source. … if we can't figure out how to pay it back, we can't borrow from ourselves." (Exhibit 254).

f) *Knowledge and understanding of relevant regulations*

The individuals principally involved in the decisions to use E&G funds for all four of the Downtown Campus projects at issue (CEM, Energy Plant, Student Center and Infrastructure), namely Provost Whittaker, CFO Merck and Tracy Clark, all declined to be interviewed, and therefore we cannot say with certainty what their rationale was or if they knew the funding for these projects was improper or potentially improper. Evidence of their respective knowledge and understanding of the BOG regulations, including limits on the use of E&G funds, has already been discussed elsewhere in this Report. Notably, the Energy Plant and Infrastructure projects involved new construction, which Merck and Clark have previously acknowledged E&G funds could not be used for (at least without risking an adverse audit finding by the State Auditor General). As indicated earlier in this section, while Whittaker, Merck and Clark each gave a deposition to PIE Committee investigators, their testimony did not address who

approved the funding for these Downtown Campus projects, the rationale for the funding or whether they personally believed the use of E&G funds for the projects was permissible.

Interim President Seymour, who served as the Vice Provost for the Downtown Campus during the relevant time, did not make the decisions to use E&G funds for any of these projects. Nevertheless, he received documents after the fact indicating that at least the CEM project, if not the others, was funded with E&G. He also received materials to present on the Student Center funding which included a vague description of the funding source. Seymour received no training on the BOG regulations, nor was he told about limits on the use of E&G funds or warned of any risks associated with using such funds for any of the Downtown Campus projects. We find, therefore, that if Seymour knew of the specific funding for CEM or any of the other three projects from these documents, he did not understand the significance of using E&G funds or that such funding was improper.

g) *Timing concerns*

We found that the timing of the transfer of E&G carryforward funds to the construction account for the CEM project ($5 million in November 2016) was based on a legitimate need for at least some of the funds; namely, a request from the architect to start design work. It does not appear to have been motivated solely by an impending carryforward balance report to the BOT or a desire to reduce the University's carryforward balance.

On the other hand, the timing of the transfers to the construction accounts for the Energy Plant, Student Center and Infrastructure projects ($21.7 million on October 31, 2017) does not appear to have been based on any immediate need for funding, but rather seems to have been driven primarily by the updated carryforward report due to the BOG a few weeks later and a desire to report a balance that did not include the transferred funds.

V. REPAYMENT OF IMPROPERLY TRANSFERRED E&G FUNDS

As part of this engagement, BCLP was asked to determine the current status of the E&G funds that UCF improperly transferred to the In-Scope Projects, as discussed in the preceding sections and summarized in Appendix B. BCLP asked PwC to perform this analysis, and specifically to determine whether the E&G funds that were transferred and/or spent have been returned or replaced with non-E&G funds.

As relevant background, in late August and September 2018, following the report by the State Auditor General that E&G funds had been misused for the construction of Trevor Colbourn Hall ("TCH"), UCF replaced the $38.2 million of E&G funds spent on TCH with non-E&G funds. Additionally, UCF Finance & Accounting and Facilities personnel, led by Interim CFO Kathy Mitchell, reviewed records from the previous ten years and identified other potentially inappropriate transfers of E&G funds to construction accounts for additional capital projects ("UCF Identified Additional Projects"). UCF determined that $46.5 million of E&G had been transferred to these projects, of which $14.1 million had been spent. In September 2018, UCF returned from the construction project accounts for the UCF Identified Additional Projects the $32.4 million of unspent E&G funds and replaced the $14.1 million of spent E&G funds with funds from non-E&G sources.

Some of the projects identified by BCLP during this investigation as having received improper transfers of E&G funds were also among the UCF Identified Additional Projects. For those projects, PwC performed procedures to verify that the University returned unspent E&G funds to E&G accounts and replaced spent E&G funds with funds from non-E&G sources. PwC discussed this effort to return or replace these E&G funds with Kathy Mitchell and requested and reviewed related accounting records and other documents including journal entries and supporting spreadsheets, email communications, internal memos and BOT materials.

We found that because the methodology used by UCF to identify the UCF Identified Additional Projects was different than the methodology used by BCLP in this investigation, the University replaced the E&G funds improperly transferred to some, but not all, of the projects identified by BCLP. Specifically, of the approximately $61.3 million of E&G funds improperly transferred to the projects identified by BCLP, UCF returned or replaced approximately $41.3 million. The table below provides these details[85]:

[85] The University also replaced approximately $5.1 million of E&G funds that had been transferred to four other UCF Identified Construction Projects which were not identified by BCLP as part of this investigation and are therefore outside the scope of this Report. Those four projects are: Facilities Surplus Showroom ($2 million of E&G transferred), Main Campus District Energy Plant ($1.2 million transferred), The Venue ($1.075 million transferred) and The Band Building ($862,704 transferred).

Project Name	Total E&G Transferred	Total E&G Returned	Difference
College of Medicine FF&E	$ 2,412,989	$ -	$ 2,412,989
CREOL Building Roof	2,622,723	-	2,622,723
Combined Heating and Power Plant	11,137,183	-	11,137,183
Global UCF	5,405,055	1,626,588	3,778,467
CREOL Phase II Expansion	4,017,000	4,017,000	-
Research I - FF&E	3,000,000	3,000,000	-
Research I - Lab Buildouts	6,000,000	6,000,000	-
Center for Emerging Media	5,000,000	5,000,000	-
Downtown Student Center	5,400,000	5,400,000	-
Downtown Energy Plant	11,500,000	11,500,000	-
Downtown Infrastructure	4,800,000	4,800,000	-
	$ 61,294,950	$ 41,343,588	$ 19,951,362

We determined that the University returned unspent E&G funds in the amount of $31,640,899 for the projects listed in the table above back to E&G accounts. We further determined that the University replaced spent E&G funds in the amount of $9,702,689 for the projects listed in the table above from the following non-E&G sources:

Research contracts and grants overhead accounts	$ 7,573,456
Various auxiliary accounts	2,129,233
	$ 9,702,689

Regarding the funds transferred from the contracts and grants overhead accounts, Kathy Mitchell explained that these funds were earmarked in University research contracts and grants for administrative overhead and were therefore legally available to be used on capital projects, and that these funds were used to replace the E&G funds that had been spent on Research I. We relied upon this representation and did not review the related research contracts and grants.

To summarize, we conclude that UCF has either returned or replaced $41.3 million of the $61.3 million in E&G funds that were improperly transferred to the In-Scope Projects, and that any replacement of spent E&G funds was done using non-E&G funds. Additionally, as noted in Section IV.C. above, we found that of the $2.6 million that was transferred for the CREOL roof, a portion was returned to E&G accounts and the balance was ultimately spent on deferred maintenance projects, which were an appropriate use of E&G funds. Accordingly, it is our conclusion that approximately $17.4 million of E&G funds still need to be returned or replaced by UCF as of the date of this Report.

APPENDIX A

List of Witnesses Interviewed

Interviewee	Date(s) of Interview	Position
Baker, Paul	7/22/2019	Senior Philanthropic Advisor, UCF Foundation
Bottorff, Allen	5/2/2019	Former Director of Downtown Campus Facilities
Bradley, Dale	7/30/2019	University Budgets Director, Board of Governors
Brown, Troy	5/22/2019	The Bogdahn Group

Re: Engagement of Bryan Cave Leighton Paisner LLP

Dear Mr. Burby:

On January 31, 2019, the Board of Governors approved a motion to continue the investigation into the use and/or transfer of Education and General Funds (E&G funds) at the University of Central Florida (UCF) for capital projects, beyond the funds used for the construction of Trevor Colbourn Hall. We would like to retain the services of your firm to conduct this broader scoped investigation into UCF's utilization of E&G funds for actual or planned capital projects.

Specifically, we are requesting you to identify all E&G funds transferred into UCF construction accounts since July 1, 2010, to determine the usage or intended usage of those funds and their earnings, and the current status of those funds. Additionally, we are asking you to determine how this was done, at whose direction, and for what purpose.

At the conclusion of the investigation, we are requesting a written report of your findings and conclusions, and a presentation of those findings and conclusions to the Board's Audit and Compliance Committee.

If this arrangement is acceptable, please let us know how to proceed to get a retainer agreement in place. UCF will be serving as the fiscal agent on this agreement to remit payment for services rendered, but the Board of Governors will be the client.

Thank you for your assistance and we look forward to hearing from you.

Sincerely,

Ned Lautenbach, Chair

CONFIDENTIAL – BY EMAIL

Ned Lautenbach
Chair, Board of Governors
State University System of Florida
325 West Gaines Street – Suite 1614
Tallahassee, FL 32399-0400

Re: Engagement of Bryan Cave Leighton Paisner LLP

Dear Chair Lautenbach:

We are pleased that the State University System of Florida Board of Governors ("Board of Governors") has chosen to engage Bryan Cave Leighton Paisner LLP ("BCLP" or the "Firm") to conduct an independent investigation into the utilization of Education and General funds by the University of Central Florida ("UCF") for actual or planned capital projects since July 1, 2010 (excluding the construction of Trevor Colbourn Hall), as discussed in your letter to me dated February 8, 2019 (the "Engagement"). We understand from your letter that the University of Central Florida Board of Trustees ("UCF Board of Trustees") will serve as the fiscal agent for this engagement and be responsible for the payment of the Firm's invoices.

Consistent with our normal practice, this letter and the attached Statement of Engagement Terms and Billing Practices (the "Statement") set forth the terms of our engagement. The Statement is important and is provided to our clients so that they understand in advance how various issues will be handled.

As we have discussed, BCLP is a large law firm and represents many other companies and individuals. To avoid any misunderstanding in connection with the Engagement, the Board of Governors confirms and agrees that you have not asked BCLP to act as counsel for any other subsidiary, affiliated university, or employee of the Board of Governors as a result of representing you in the Engagement. Furthermore, this letter confirms that the Board of Governors acknowledges and agrees that the Board of Governors is a separate entity from its subsidiaries, affiliated universities, and employees for conflicts of interest purposes and BCLP will not be deemed to have an attorney-client relationship with any subsidiaries, affiliated universities, and employees of the Board of Governors. Finally, the Board of Governors acknowledges that BCLP may have in the past represented, currently represent, or in the future may represent other clients whose interests are adverse to the subsidiaries, affiliated universities, and employees of the Board of Governors and that such adverse representations by BCLP will not give rise to a conflict of interest with the Board of Governors. In order for BCLP to represent any subsidiary, affiliated university, or employee in any Board of Governors matter, the Firm must agree to do so in writing via supplemental terms of engagement.

Our fees for legal services are based on the time we spend on the engagement. In the event the nature of the services requested justifies a departure from that approach, we welcome the opportunity to discuss alternative arrangements. We separately charge for expenses and other charges incurred in connection with rendering our services, all as described in the Statement.

A rate is determined for each of our lawyers, contract attorneys, and legal assistants on the basis of that person's seniority, experience or area of practice, and the geographic location of the office in which that person works. The hourly billing rates may be adjusted periodically most typically effective with the start of each calendar year. We will notify you of the increase in rates in advance, and if acceptable, an addendum to this contract will be executed to reflect the new rates. The rates for our professionals likely to be involved in rendering services in connection with this matter are as follows: Partner Joseph Burby/$550 per hour; Counsel/$470 per hour; Senior Level Associate/$400 per hour; and Junior Level Associate/$280 per hour. This represents a 17% discount off of the standard rates for these professionals in 2018. These are the same rates that were charged to the UCF Board of Trustees in connection with the Trevor Colbourn Hall investigation.

Our billing statements are normally rendered on a monthly basis and are due and payable upon receipt. We endeavor to include expenses and other charges in the statement for the month in which they are incurred. On occasion, however, accounting for certain expenses and charges (i.e., late-posted items or international charges), may be delayed, in which case late-posted items will be billed on the next regular statement. The Firm reserves the right to charge a late payment penalty in the form of interest on any statements not paid within 30 days of the statement date at twelve percent (12%) interest.

It is possible that some of our present or future clients will have disputes with the State University System of Florida ("SUS) or its member institutions during the time that we are representing you. Therefore, as a condition to our undertaking this engagement, you have agreed that if our Firm intends to represent existing or new clients in any matter potentially adverse to the SUS or its member institutions, we will follow the requirements of the Model Rules of Professional Conduct in dealing with the potential conflict. You agree to consent to such representation except where as a result of our representation of you we have obtained sensitive, proprietary or other confidential information of a non-public nature that, if known to any such other client of ours, could be used in any such other matter by such client to the disadvantage of the SUS or its member institutions.

Our attorney-client relationship is one of mutual trust and confidence. We do our best to see to it that our clients are satisfied not only with our services but also with the fees charged for those services. I will be the Responsible Lawyer for this matter. Whenever you have any questions or comments regarding our services or fees, you should contact me or any other attorney in the Firm with whom you are working. We also encourage you to inquire about any matters relating to our fee arrangements or monthly statements that are in any way unclear.

We appreciate the confidence you have placed in us and look forward to working with you. If this letter and the Statement correctly set forth our mutual understanding, please sign and date the enclosed copy of this letter and return it to us with the attached Statement. BCLP will also need the UCF Board of Trustees' express written consent in the space below in connection with the payment of our fees and expenses.

Very truly yours,

R. Joseph Burby, IV

THIS CONTRACT CONTAINS A BINDING ARBITRATION PROVISION WHICH MAY BE ENFORCED BY THE PARTIES.

THESE TERMS INCLUDING THE ATTACHED STATEMENT OF ENGAGEMENT TERMS AND BILLING PRACTICES ARE APPROVED.

Statement of Engagement
Terms and Billing Practices

BRYAN CAVE LEIGHTON PAISNER BCLP

1 Our Team

1.1 You may contact your client relationship lawyer at any time to discuss any aspect of our services.

1.2 Details of the team for each matter, including the Responsible Lawyer with overall responsibility, will be set out in our engagement letter. We may involve others as well or instead (if necessary without asking you first) including paralegals, contract attorneys, trainees, law clerks, non-practicing barristers and lawyers qualified or licensed in various jurisdictions.

2 BCLP Group

2.1 Bryan Cave Leighton Paisner (the "BCLP Group") is a global law firm comprised of a network of affiliated firms and entities ("BCLP Firms"). The locations of our offices and further jurisdiction-specific information, including a description of each of the BCLP Firms can be found at www.bclplaw.com.

3 Fees

3.1 Our general policy is to calculate fees for legal services on the basis of a rate for each lawyer, contract attorney, and legal assistant engaged in providing such services, multiplied by the number of hours (or fractions thereof) devoted to the rendering of such services by each such lawyer, contract attorney, or legal assistant.

3.2 In serving the client we attempt to utilize those lawyers, contract attorneys, and legal assistants having the lowest hourly billing rates commensurate with the legal knowledge and level of experience required in order to achieve the client's objective. Depending on the complexity of your matter, the Firm may use contract attorneys during our representation of you. Unless you are notified otherwise, contract attorneys will be supervised and billed by the Firm the same as other attorneys with similar experience. The selection of those lawyers, contract attorneys, and legal assistants who will render services will be made by the lawyer having overall supervisory responsibility for each engagement, taking into consideration the nature of the engagement, the office in which most of those services are likely to be rendered, the degree of legal experience and knowledge required in order to achieve the client's objective, the availability of lawyers, contract attorneys, and legal assistants to work on the engagement, and their hourly billing rates. We may involve others as well or instead (if necessary without asking you first) including trainees, paralegals, non-practicing barristers and lawyers qualified in various jurisdictions.

4 Conflicts of Interests

4.1 We have procedures in place to prevent our acting for clients when there is a legal conflict of interest. The conflicts of interest rules governing any instruction of the BCLP Group by you will be the applicable conflicts rules in the jurisdiction(s) where the work is being undertaken and which the lawyers of the BCLP Group working on such matter are subject to. If you are aware, or become aware, of a possible conflict, please immediately notify the responsible lawyer for your matter or your client relationship partner.

4.2 Occasionally a conflict of interest involving another BCLP client may appear after we have started acting for you on a matter. If this happens; subject to our duty of confidentiality, we will discuss the matter with you to try to resolve the conflict, but we may have to stop acting for you on that matter; and you agree that we will be free, taking account of applicable rules and law, best practices and your and any other concerned client's interests and wishes, to decide whether to act for both clients, for one, or for neither.

4.3 In certain cases, more than one of our clients may have an interest in the same subject matter of a transaction, or be competing for the same asset. Examples might be buying an entity through auction sale or tendering for a contract. If this happens, you agree that we are free to act for you and one or more other clients with the same interest.

4.4 You agree that you will not seek to prevent us from acting for other clients, including clients whom you may regard as competitors, on matters in which you may have an interest but have not hired us to represent you. This includes but is not limited to our acting in relation to regulatory, transactional or corporate matters where you and/or your affiliates are involved.

4.5 We reserve the right not to assist you in taking action which is adverse to another client of a BCLP Firm or Associated Firm and we will not be obliged to do so.

5 Deposits

5.1 Any deposits that we receive from you will be placed in our client trust account on your behalf and are refundable to the extent not subject to disbursement. In light of the amount of the deposit we have requested in this case, we expect that it will be placed by us in our unsegregated trust account. Interest earned on that account, pursuant to Georgia Supreme Court Rule, is paid to the Georgia Bar Foundation to be used for providing civil legal assistance to low-income individuals, improving the administration of justice and promoting such other programs for the benefit of the public approved by the Supreme Court.

5.2 Deposits are received with the understanding that we are expressly authorized to withdraw from the trust account the sums necessary to pay for services as they are performed and expenses as they are incurred. You will be notified in writing of the amounts applied or withdrawn, and you will also be provided with a statement explaining the services rendered and costs incurred. If the charges for services and costs exceed the balance on deposit, the statement will show the

excess due and payable. We may also request additional deposits to cover further services and costs, if circumstances warrant. When our services are complete or terminated, you will receive a final invoice. Any remaining balance after payment of our final invoice will be returned to the person or entity that paid the deposit. Thus, if a third-party pays the deposit on your behalf any monies remaining will be returned to the third-party unless you or the third-party instruct us otherwise prior to the distribution of such monies.

6 Litigation and Dispute Resolution Matters

6.1 The outcome, cost and the course of most litigation matters cannot be predicted. Should you ever have questions or concerns, we encourage you to contact us. Your timely and full cooperation and assistance will play a critical role in our efforts. You always retain the right to determine whether a compromise should be pursued and accepted, or, alternatively, whether the matter should be pursued to an adjudication on the merits at trial and thereafter to an appeal. While we cannot assure you that there will not be an adverse outcome, our efforts always are directed toward obtaining the most satisfactory resolution of this matter for you that is possible.

7 Criminal Finances

7.1 We have a legal obligation not to engage in any activity, practice or conduct that could facilitate the illegal evasion of paying UK, US or foreign tax.

8 Anti-Bribery and Corruption

8.1 We are committed to complying with all applicable anti-bribery and corruption laws and regulations to which we are subject, including the Bribery Act 2010 and the Foreign Corrupt Practices Act. To counter non-compliance, our firm and its staff operate under a zero-tolerance approach to bribery and corruption in line with the firm's policy.

9 Data Protection and Marketing

9.1 We are committed to complying with our privacy obligations. Our Privacy Notice at www.bclplaw.com explains how we collect and use your personal information (including personal information that you provide to us about other persons) (together, "Personal Information").

9.2 The BCLP Firm you engage is responsible (i.e. it is the 'Data Controller') for the Personal Information it collects from you in connection with our engagement and the manner in which it will be processed to enable us to provide you with our services and comply with our obligations. For further details, please see our engagement letter or contact the lawyer responsible for your matter.

9.3 The amount of clients' Personal Information we collect will typically be relatively limited (e.g. work details and client due diligence information). In certain circumstances, we will need to know more information about you and related persons (for example, where we are acting for an individual client in respect of personal matters). If you do not provide us with this information, or if it is not satisfactory, we may not be able to act, or to continue to act, for you. Your Personal Information will be used primarily to provide you with legal services, but also to comply with our legal and regulatory obligations and those relevant purposes set out in our Privacy Notice (including: (a) for business continuity purposes; (b) for marketing and business development purposes where appropriate; and (c) to manage complaints and claims).

9.4 Please note in particular that: (a) we are under legal and professional obligations to undertake appropriate client due diligence (which will, in certain circumstances, include collecting information about criminal and regulatory convictions and proceedings and verifying such information through electronic data sources); (b) we will monitor and record email, telephone and similar communications in certain circumstances to ensure compliance with applicable rules and law and our internal policies, and for training, quality and business continuity purposes; (c) your Personal Information will be shared on a need-to-know basis within the BCLP Group and, under certain circumstances, to select third parties who provide services to us and to regulators (for further details, see our Privacy Notice). Some of these recipients of your information will be located in other countries (whose privacy laws may not be as comprehensive to those where you are based); and (e) unless agreed otherwise in writing, we may disclose that you are a client of ours. Once details of a matter are in the public domain (otherwise than through an unauthorized disclosure by any party), we may disclose that we acted for you and the general nature of our work. We will disclose this information mainly in pitches and marketing materials.

9.5 Subject to limited exceptions, individuals may have the right under applicable privacy laws to access and correct their Personal Information. If we have to provide information in response to a request from someone whose information we hold in connection with your current or past matters (typically referred to as a 'Subject Access Request'), providing that information will form part of our services to you for which we will be entitled to charge a reasonable fee. We will not charge the requestor.

9.6 You also agree that you will treat personal information and confidential information that you receive from us as confidential and in accordance with applicable data privacy laws and will use it only for the purpose for which you receive it, or as otherwise required by law.

9.7 We understand the obligations on us to take steps to help provide a secure environment and we will seek to treat Personal Information securely and in accordance with our privacy and information security policies.

9.8 For details of your privacy rights (including the right to object, where there are legitimate grounds to do so, to our processing of your Personal Data), please see our Privacy Notice. If you have any questions regarding our processing of your Personal Information or if you wish to exercise your privacy rights, please contact your matter/relationship partner, or send a written and dated request to privacy@bclplaw.com.

10 Anti-Money Laundering

10.1 In certain jurisdictions where the BCLP Firm operates, we are obliged to obtain and hold satisfactory evidence of the identity of our clients and sometimes of related people to comply with anti-money laundering ("AML") and anti-terrorist financing legislation.

10.2 We take a risk-based and proportionate approach to identifying clients for AML purposes. Sometimes we may need to: see original documents; check the information you provide; use corporate, personal and/or confidential information to check identity through electronic data sources; and ask you for up-to-date evidence of identity.

10.3 If we ask for documents or information, you must provide them promptly. If you do not, or if they are not satisfactory, we may not be able to act, or to continue to act, for you.

10.4 We have a central team, who handle client identification and AML legislation compliance. They will have access to your corporate, personal and/or confidential information. Other BCLP Firms and Associated Firms may also have access to the information on a need to know basis.

10.5 We do not accept payments in cash whether for our charges or otherwise.

10.6 If we are unable to satisfy ourselves as to source of funds, monies paid to us will usually be frozen and not applied to the transaction, unless and until the appropriate authorities consent.

10.7 We will not make payments to anyone other than you unless this is a necessary part of the transaction, and then only if you instruct us to do so.

11 Termination of Engagement

11.1 You may terminate our engagement with or without cause at any time on written notice to us. Termination of our services will not affect your responsibility to pay for legal services rendered and all expenses and other charges incurred up to the date when we receive notice of termination, and for any further work required of us in order to facilitate an orderly turnover of matters in process at the time of termination.

11.2 We may terminate our engagement for any of the reasons permitted under the Georgia Rules of Professional Conduct, or any other applicable rules, including your failure to promptly pay our bills, misrepresentation of (or failure to disclose) any material facts, action taken contrary to our advice, or any other conduct or situation that in our judgment impairs an effective attorney-client relationship between us or presents conflicts with our professional responsibilities. This letter constitutes reasonable warning that we will withdraw from representing you in this matter if you fail substantially to fulfill an obligation to us regarding our services. Other grounds for terminating our representation are set forth in Rule 1.16 of the Georgia Rules of Professional Conduct, a copy of which we will provide you on request. We may request a stipulation executed by you allowing us to withdraw as your attorney in any judicial, arbitration or similar proceedings, in which event you agree in advance to our withdrawal.

11.3 Our attorney-client relationship will also terminate when a matter for which our Firm was hired has been completed, whether or not our bill to you for services has been rendered or paid. Upon termination of our relationship, the Firm has no duty to accept new engagements or to continue representation in any matters unless mutually agreed in writing.

11.4 Once a matter ends, we will not remind you about future time deadlines or obligations relevant to that matter unless we expressly agree to do so in writing.

12 Future Representation

12.1 In the event our engagement necessitates that we prepare an agreement which provides for ongoing rights and obligations on your part, a dispute concerning the interpretation or enforceability of that agreement may subsequently arise after our engagement has been terminated. In the absence of our express written agreement, you may not assume that the Firm will continue to be free to represent you in a future dispute concerning such agreement.

13 Retention of Files

13.1 Generally, we keep each client's legal files for ten years after we close the file. After ten years, we destroy those files unless the client tells us otherwise. If you want us to keep your files for a longer period of time, please tell us.

14 Arbitration of Dispute

14.1 The Firm and University of Central Florida Board of Trustees agree to arbitrate any disputes regarding services related to the Representation. In the event that a dispute arises between us concerning the services we have provided to you, whether claims for legal malpractice, breach of fiduciary duty, breach of contract, or any other claim based upon alleged attorney

misconduct, then that dispute will be settled by arbitration before the AAA. Such an arbitration shall be heard in the Atlanta metropolitan area by a panel of three arbitrators, all of whom must be attorneys or former judges practicing in that area, and who have been practicing law at least 15 years, with one arbitrator to be selected by each party and the third to be chosen by the two arbitrators or the parties to the arbitration. The rules for the Arbitration shall be consistent with the procedural rules of the American Arbitration Association for commercial arbitrations; the arbitrators shall have the power to award all relief available in a court of law; and the arbitration proceedings shall be private and confidential and shall not be disclosed to the public by either the arbitrators or the parties to the arbitration unless required by law. The award of the arbitrators must be by a majority vote and shall be final and binding, not subject to challenge by either party in any court of law. Each party shall bear its own costs of the arbitration and shall pay one-half of the full costs of the proceeding.

15 Charges

15.1 Our statements to our clients are normally rendered on a monthly basis, and ordinarily include certain charges other than fees for legal services. These charges may include third-party expenses (such as filing fees, court reporters and travel) and internal expenses. Under some circumstances, clients may be asked to contract with and pay directly larger third-party invoices. Other third-party expenses will be added to our bills with no markup. The Firm has elected to charge for certain support activities on the basis of each client's individual use instead of covering them in its hourly rates for fee earners. The internal charges will be billed in the following way:

15.2 **Mail**: There is no charge for regular mail. Clients are charged the actual cost of express mail and bulk mailings, as well as air express couriers.

15.3 **Messengers**: Clients are charged the actual costs of outside messenger service. In some instances, Firm personnel may be used in lieu of an outside messenger service to reduce delivery time. In those cases, delivery charges are competitive with those of the outside messenger.

15.4 **Reprographics Costs**: When required by size or time constraints of the specific project, reprographics services may be provided by outside vendors and will be charged to clients at actual cost.

15.5 **Binding**: The Firm charges $5.00 for each binding (velo, spiral, fastback, etc.) job.

15.6 **Data Transfers**: The Firm charges a fixed rate for burning CDs and DVDs at $8 and $12, respectively.

15.7 **Computer Research**: The Firm uses several databases to conduct computer-assisted research. The Firm contracts for the majority of those database services in bulk and for several years in advance. The Firm bills clients at a discount from the vendors' regular rates to third parties where applicable. Charges for usage of databases that are not included under these advance contracts, and all other research databases, are billed to clients at actual cost.

15.8 **Long-Distance Telephone Calls**: The Firm does not charge clients for long-distance telephone calls.

15.9 Travel expenses shall be reimbursed in accordance with Florida laws on travel.

pwc

March 1, 2019

R. Joseph Burby, Esq.
Bryan Cave Leighton Paisner LLP
1201 West Peachtree Street NE
Suite 1400
Atlanta, Georgia 30309

Dear Mr. Burby,

This engagement letter dated March 1, 2019 (the "Effective Date") confirms that Bryan Cave Leighton Paisner LLP ("Counsel") on its own behalf and as counsel for its client, the Board of Governors of the State University System of Florida ("Client") has engaged PricewaterhouseCoopers Advisory Services LLC. ("PwC") to perform the professional services described below. Client and PwC are sometimes referred to in this engagement letter as the "parties" and each, individually, as a "party."

PwC will work under the direction of Counsel in this matter. Accordingly, PwC's Services shall be subject to Client's attorney-client and work product confidentiality privileges. However, as a consultant, PwC makes no representation as to whether the privilege will apply, as the application of privilege is a legal question.

SCOPE OF PWC SERVICES, DELIVERABLES, AND TIMING.

(a) Services to be provided by PwC. Client is engaging PwC to provide the following professional services (the "Services"):

Forensic accounting services in connection with Counsel's independent investigation into the potential misuse of university funds for capital infrastructure projects at the University of Central Florida.

PwC is not required to perform services that are inconsistent with the scope of Services or terms and conditions set forth in this engagement letter. Either party may request changes to the scope of Services. To be effective, such change must be agreed in a writing and signed by the parties.

(b) Deliverables. PwC will provide the following Deliverables (as defined below):

We may, at the direction of Counsel, prepare summaries of procedures and analyses performed. The Deliverables will be unbranded.

FEES, EXPENSES, AND PAYMENT.

(a) Professional Fees and Expenses

PwC's fee is based on the time required by PwC professionals to complete the engagement and will be billed hourly rates between $350 and $630 per hour. Hourly rates may be revised from time to time, and the adjusted rates will be reflected in billings.

In the event that there are any Client-initiated changes to the scope, schedule, responsibilities, or Deliverables that impact the effort required, PwC will address these changes through the change control process.

If PwC is requested or authorized by Client or required by government regulation, regulatory agency, subpoena, or other legal process to produce PwC's Deliverables, working papers, or personnel for testimony or interview with respect to services PwC performed for Client, Client

will reimburse PwC for PwC's, the PwC Subcontractors' (as defined below), and their respective counsels' expenses and professional time incurred in responding to such a request.

The Client has designated the University of Central Florida ("UCF") to serve as the fiscal agent for this contract to remit payment for professional fees and expenses incurred.

(b) Payment Terms.

PwC will bill Counsel for reasonable out-of-pocket expenses in accordance with Florida law, any applicable sales, use, excise, or-value added tax, and PwC's internal per-ticket charges for booking travel. Amounts billed for Services performed by PwC or the PwC Subcontractors (as defined below) shall be considered fees and not expenses and will be billed as set forth above. PwC will invoice Counsel on a monthly basis in arrears. Counsel will pay each invoice within 15 calendar days after the invoice date. As noted above, UCF has the ultimate responsibility for payment of our professional fees and expenses.

DELIVERABLES; TERMS AND DEFINITIONS.

(a) Ownership and License.

Client will own each particular physical copy of the Materials (as defined below) prepared for and delivered to Client under this engagement letter that are identified as a "Deliverable" (collectively, the "Deliverables"). PwC shall own all intellectual property rights in and to the Deliverables and any other Materials (as defined below) that PwC, the PwC Subcontractors (as defined below), or their respective personnel may make, conceive, develop, or create during or as a result of the Services, including PwC's working papers (the "Work Product"). Each party will continue to own Materials made, conceived, developed, or created by or for such party independent from, or prior to commencement of, the performance of Services under this engagement letter and any intellectual property rights therein (collectively, the applicable party's "Background Materials"). Subject to Client's compliance with the terms of this engagement letter, PwC grants to Client under PwC's intellectual property rights a non-exclusive, non-transferable license to use the Deliverables and Work Product delivered to Client for Client's business purposes only, as set forth in this engagement letter. For the avoidance of doubt, neither the Work Product nor PwC's Background Materials include Client's Confidential Information (as defined below) or Client's Background Materials, both of which shall remain the sole and exclusive property of Client. As used herein, "Materials" means information, know-how, data, and other technology, including works of authorship and other creations and ideas, databases, compilations, inventions, developments, software, firmware, and other computer programs (in source code, object code, or any other format), documentation, technical information, specifications, configuration information, designs, plans, drawings, writings, schematics, documents, reports, methods, procedures, concepts, techniques, protocols, systems, elements, components, subsystems, devices, equipment and other hardware.

(b) Use and Disclosure.

(i) PwC provides the Services and the Deliverables, Work Product, and PwC's Background Materials solely for Client's use and benefit as set forth herein and not for any other person's or entity's use, benefit, or reliance, and PwC disclaims any contractual or other responsibility, liability, or duty of care to any other person or entity based upon the Services, Deliverables, Work Product, or PwC's Background Materials. Except as described in this section, Client shall not discuss the Services with, or disclose the Deliverables, Work Product, or PwC's Background Materials to, any third party without PwC's prior written consent. Client may disclose Deliverables to, or discuss information relating to the Services with, Client's third-party professional advisors (including subcontractors, accountants, auditors, attorneys, financial, and other advisors) that are acting solely for Client's benefit and on Client's behalf and that have a need to know such information in order to provide advice or services to Client (collectively, "Third-Party Professional Advisors"), provided that such Third-Party Professional Advisors agree: (i) that PwC did not perform the Services or prepare Deliverables

pwc

for such Third-Party Professional Advisors' use, benefit, or reliance and that PwC assumes no duty, liability, or responsibility to such Third-Party Professional Advisors; and (ii) not to disclose the Services or Deliverables to any other party without PwC's prior written consent. Notwithstanding the foregoing, PwC's prior written consent (which consent will include the requirement to enter into an access letter in PwC's standard form) shall be required if Client wishes to disclose the Deliverables or discuss the Services with any person or entity that is not a Third-Party Professional Advisor. For the avoidance of doubt, Third-Party Professional Advisors do not include any parties that are providing or may provide insurance, financing, capital in any form, a fairness opinion, or selling or underwriting securities in connection with any transaction that is the subject of the Services or any parties that have or may obtain a financial interest in Client or an anticipated transaction. Notwithstanding terms to the contrary in this engagement letter including without limitation the above section, the parties agree that Client can publicly disclose that Client retained PwC to provide the Services and may also disclose the results of the investigation and its findings.

(c) Except to the extent prohibited by law, Client shall indemnify and hold harmless PwC and the Beneficiaries (as defined below) from and against all third party claims, losses, liabilities, and damages (including but not limited to any costs, expenses, and reasonable attorneys' fees) arising from or relating to the Services and/or Deliverables.

(d) Oral Advice and Draft Deliverables.

Client may rely only on final, written Deliverables and not on oral advice, draft Deliverables, or other information provided by PwC. Upon Client's request, PwC will confirm oral advice in a Deliverable on which Client may rely.

(e) Other Materials.

PwC may provide or otherwise make available certain Materials that are not Deliverables, including spreadsheets and hosted, web-based, data analytics, internet, cloud, visualization, or other tools or software used to provide the Services or deliver the Deliverables (collectively, "PwC Technology"). If PwC Technology is provided or otherwise made available, PwC hereby grants to Client a non-exclusive, non-transferable license to use PwC Technology in accordance with PwC's instructions for Client's internal use and benefit only and solely in connection with and during the term of PwC's performance of the Services. PwC Technology is provided on an "as is" and "as-available" basis, and PwC does not represent or warrant that PwC Technology or any content therein will be uninterrupted or error free or that it will provide useful, accurate, or specific information or results. PwC Technology is subject to change without notice, and PwC may change the functionality of, or suspend or discontinue access to, all or any portion of PwC Technology at any time without notice. PwC Technology, and all Materials contained therein, are PwC's Confidential Information. PwC Technology and information contained therein are not intended to be Client's permanent records and, unless otherwise agreed in writing, access to PwC Technology and such information terminates upon expiration, completion, or termination of the Services. PwC will, in its discretion, make data and records that are directly connected with the provision of the Services available to Client via PwC Technology. Client is responsible for separately maintaining copies of any relevant data and records made available through PwC Technology that Client may need. Client will provide PwC with written confirmation (by email or otherwise) of the names and employer email addresses of those users that Client authorizes to access and use PwC Technology on Client's behalf ("Client Users"), and Client will promptly notify PwC in writing of any changes thereto. Client shall only authorize Client Users to use and access PwC Technology in accordance with and subject to the same restrictions set forth above in the Use and Disclosure of Deliverables section that apply to Deliverables. Client is responsible and liable for all Client Users' access to PwC Technology. Client shall not (and shall not allow any Client User to) misappropriate, infringe, reverse engineer, decompile, disassemble, or otherwise attempt to derive the source code, techniques, processes, algorithms, know-how, processes, formulae, methodologies, or other information or any of PwC's rights in PwC Technology, or otherwise use or access PwC Technology other than as expressly permitted herein.

PWC RESPONSIBILITIES.

(a) PwC will perform the Services in accordance with the relevant standards promulgated by the American Institute of Certified Public Accountants ("AICPA") as set forth below: Consulting Services will be performed under the Standards for Consulting Services; tax Services will be performed under the Statements on Standards for Tax Services; Accounting Advisory Services for non-audit clients will be performed under the Standards for Reports on the Application of Accounting Principles; and valuation Services that represent an estimate of value will be performed under the Statement on Standards for Valuation Services.

(b) PwC's role is advisory only. PwC will not provide an audit, accounting, or attest opinion or other form of assurance. PwC will not verify or audit any information provided to it. Because PwC will provide the Services solely for Client's use and benefit and pursuant to a relationship exclusively with Client, PwC disclaims any contractual or other responsibility, liability, or duty of care to others based upon the Services or upon any Deliverables or advice PwC provides.

CLIENT RESPONSIBILITIES.

(a) Client is responsible for all management functions and decisions relating to the Services, including without limitation evaluation and acceptance of the adequacy of the scope of Services in addressing Client's needs. It is Client's responsibility to establish and maintain its internal controls. Client also is responsible for the results achieved from using the Services or Deliverables. Client will designate a competent member of Client's management to oversee the Services. Client will provide reasonable assistance and accurate and complete information on a timely basis, and PwC will perform the Services on that basis. Client represents and warrants that it has the requisite right, consent, and permission to use and disclose, and to permit PwC and the PwC Subcontractors to use and disclose, all information, materials (including without limitation emails), software, or hardware (including those of third parties) provided to PwC or the PwC Subcontractors in connection with the Services and this engagement letter.

CONFIDENTIALITY.

"Confidential Information" means non-public information marked "confidential" or "proprietary" or information that otherwise should be understood by a reasonable person to be confidential in nature, provided by a party or on its behalf. All terms of this engagement letter, including but not limited to the fee and expense structure, are considered Confidential Information. Confidential Information does not include any information that: (i) is rightfully known to the receiving party ("Recipient") prior to its disclosure; (ii) is released by the disclosing party ("Discloser") to any other person or entity (including governmental agencies) without restriction; (iii) is independently developed by Recipient without use of or reliance on Discloser's Confidential Information; (iv) is or later becomes publicly available without violation of this engagement letter; or (v) may be lawfully obtained by Recipient from a third party without applicable restriction. Recipient will protect the Confidential Information of Discloser using reasonable measures commensurate with those that Recipient uses to protect its own Confidential Information. Recipient may use or disclose the Confidential Information of Discloser only: (1) to perform the Services; (2) as permitted in this engagement letter; (3) as requested or directed by Discloser; or (4) as required by applicable law, statute, rule, regulation, or professional standard. Except as set forth in this section, Recipient will not disclose the Confidential Information of Discloser to third parties without Discloser's prior consent. Notwithstanding the foregoing, without Discloser's prior written consent, Recipient may disclose Confidential Information to professional advisors, subcontractors, PwC Subcontractors, or employees on a need-to-know basis, provided that such entities and individuals are required to comply with confidentiality obligations. If disclosure of Discloser's Confidential Information is required by law, statute, rule, or regulation (including any subpoena or other similar form of process), or by professional standards, Recipient shall provide Discloser with written notice prior to such disclosure (to the extent permitted by applicable law); provided, however, that prior written notice is not required in connection

with requests for disclosures arising from or related to government audits, investigations, or supervisory examinations by regulatory authorities with jurisdiction over Recipient.

LIMITATIONS OF LIABILITY. Except to the extent finally determined to be prohibited by law, or except with respect to: (a) a party's express indemnification obligations hereunder; (b) Client's breach of Use and Disclosure restrictions; (c) Client's payment and reimbursement obligations hereunder; as to which the following limitations do not apply, each party's aggregate liability for all claims, losses, liabilities, or damages in connection with this engagement letter or its subject matter, whether as a result of breach of contract, tort (including negligence), or otherwise, regardless of the theory of liability asserted, is limited to no more than one time the total amount of fees paid to PwC for the particular Service giving rise to the liability under this engagement letter. Furthermore, except for a party's express indemnification obligations hereunder, Client's breach of Use and Disclosure restrictions, and Client's reimbursement obligations, neither party will be liable in any event for lost profits, consequential, indirect, punitive, exemplary, or special damages. Also, PwC shall have no liability arising from or relating to any third-party hardware, software, information, or materials selected or supplied by Client.

OTHER PWC FIRMS; PWC SUBCONTRACTORS. PwC is a firm in the global network of separate and independent PricewaterhouseCoopers firms (exclusive of PwC, the "Other PwC Firms"). PwC may draw on the resources of and/or subcontract to its subsidiaries and affiliates, the Other PwC Firms, and/or third-party contractors and subcontractors within or outside of the United States (each a "PwC Subcontractor") in connection with the provision of Services and/or for internal, administrative and/or regulatory compliance purposes. Client agrees that PwC may provide information PwC receives in connection with this engagement letter to the PwC Subcontractors for such purposes. PwC will be solely responsible for the provision of the Services (including those performed by the PwC Subcontractors), for the protection of any Confidential Information provided to the PwC Subcontractors and for compliance with the other terms and conditions of this engagement letter. The PwC Subcontractors and the partners, principals, members and employees of PwC and the PwC Subcontractors (collectively the "Beneficiaries") shall have no liability or obligations arising out of this engagement letter. PwC disclaims any contractual or other responsibility or duty of care to any of Client's subsidiaries or affiliates. Client agrees to bring any claim or other legal proceeding of any nature arising from the Services against PwC and not against the Beneficiaries; provided however, that PwC shall be fully responsible and liable for the acts and omissions of Beneficiaries. Client shall ensure its subsidiaries and affiliates do not assert any claim or other legal proceeding against PwC or the Beneficiaries related to or arising from the Services, or Deliverables. Client assumes responsibility and liability in the event that Client's subsidiaries and affiliates pursue such claims or proceedings. While PwC is entering into this engagement letter on its own behalf, this section also is intended for the benefit of the Beneficiaries.

TERMINATION. Any party may terminate this engagement letter without penalty upon written notice to the other party. Any provisions of this engagement letter that expressly or by implication are intended to survive its termination will survive and continue to bind the parties.

DISPUTE OF RESOLUTION. Any disputes that arise between the parties that are not resolved by mutual agreement shall be resolved by arbitration. The arbitration will be conducted in accordance with the Rules for Non-Administered Arbitration of the International Institute for Conflict Prevention and Resolution (the "Rules") then in effect. The arbitration will be conducted before a panel of three arbitrators selected using the screened process provided in the Rules. The arbitration panel and not any federal, state, or local court or agency shall have exclusive authority to resolve any dispute relating to the interpretation, applicability, enforceability, or formation of this engagement letter. The arbitration panel shall have no power to award non-monetary or equitable relief of any sort. It shall also have no power to award damages inconsistent with the limitations of liability provisions or any

pwc

other terms herein. Judgment on any arbitration award may be entered in any court having jurisdiction. All aspects of the arbitration shall be treated as confidential. Client accepts and acknowledges that any demand for arbitration arising from or in connection with the Services must be issued within one year from the date Client became aware or should reasonably have become aware of the facts that give rise to the alleged liability and, in any event, no later than two years after the cause of action accrued.

CHOICE OF LAW. This engagement letter and any dispute between the parties, whether in contract, tort, or otherwise, will be governed by and construed, interpreted, and enforced in accordance with the laws of the State of Florida, without giving effect to any choice of law principles or provisions relating to conflicts of laws that would require the laws of another jurisdiction to apply.

CPA NOTICE. PwC is owned by professionals who hold CPA licenses as well as by professionals who are not licensed CPAs. Depending on the nature of the Services, non-CPA owners may be involved in providing Services under this engagement letter.

NO LEGAL ADVICE; CHANGES IN LAWS. The Services do not include the provision of legal advice, and PwC makes no representations regarding questions of legal interpretation. Client should consult with its attorneys with respect to any legal matters or items that require legal interpretation under federal, state, or any other type of law or regulation. Changes in the law and/or its interpretation may take place before PwC's advice is acted upon or may be retrospective in effect; PwC accepts no responsibility for changes in the law or its interpretation that may occur after the provision of the Services.

MISCELLANEOUS.

(a) Non-Exclusive Engagement Letter; Other Matters.

This is a non-exclusive agreement, and subject to its confidentiality obligations, PwC and the PwC Subcontractors are not prevented or restricted from providing services to other clients. PwC is an independent contractor, not a fiduciary or agent of Client, and shall not perform any obligation of Client, whether regulatory or contractual, nor shall PwC negotiate on Client's behalf.

Notwithstanding any other provision of this agreement, PwC and the Other PwC Firms may use Confidential Information received hereunder, including tax return information, to develop, enhance, modify and improve technologies, tools, methodologies, services and offerings, and/or for development or performance of data analysis or other insight generation. Information developed in connection with these purposes may be used or disclosed to Client or current or prospective clients to provide them services or offerings. PwC and the Other PwC Firms will not use or disclose the Confidential Information in a way that would permit Client to be identified by third parties without Client's consent.

With respect to tax return information, Client may request in writing a more limited use and disclosure than the foregoing. The foregoing consent is valid until further notice by Client.

If PwC commenced Services prior to execution of this engagement letter, the terms of this engagement letter shall govern such Services.

(b) Order of Precedence. If there is a conflict between the terms contained in the main body of this engagement letter and any Exhibit to this engagement letter, the following order of precedence shall apply: (i) the applicable Exhibit and then (ii) the main body of this engagement letter.

(c) Entire Engagement Letter; Severability; Amendments. This engagement letter and its Exhibits represent the entire agreement between the parties with regard to the subject matter hereof and supersede any prior understandings, proposals, or agreements concerning the Services. If any provision (or any part thereof) of this engagement letter is

found to be unenforceable or invalid, the remainder of such provision shall remain enforceable to the maximum extent permitted by law.

(d) Assignment. No party to this engagement letter may assign or transfer this engagement letter or any rights, licenses, obligations, claims, or proceeds from claims arising out of or in any way relating to this engagement letter, any Services provided hereunder, or any fees for this engagement letter or such Services to anyone, by operation of law or otherwise, without the prior written consent of the other parties; and any assignment without such consent shall be void and invalid. This engagement letter shall be binding upon and inure to the benefit of the parties hereto and their permitted successors and assigns, and except as expressly provided herein, nothing in this engagement letter shall confer upon any other person or entity any legal or equitable right, benefit, or remedy of any nature whatsoever under or by reason of this engagement letter.

(e) Force Majeure. No party shall be liable for any delay or failure to perform any of the Services or obligations in this engagement letter due to causes beyond its reasonable control.

(f) Counterparts; Headings. This engagement letter may be executed in counterparts, each of which shall be deemed an original but all of which taken together shall constitute one single document between the parties. Counterparts may be exchanged by facsimile or attached as a pdf, jpeg, or similar file type to an email or by DocuSign, Adobe Acrobat, or other electronic signature. Headings in this engagement letter are for convenience only and shall not be used in interpreting this engagement letter or any provision of it.

(g) Florida Public Records Law. Nothing in this agreement shall be interpreted as requiring Client to violate Florida public records law, and Client's compliance with such law shall not be deemed a breach of this agreement.

Re: Florida Board of Governors Inquiry

Dear Mr. Burby:

This will respond to your letter of May 16, 2019, to our client, Dr. John C. Hitt, and your invitation to participate in another conversation about the University of Central Florida and its operations.

Our client indicates that in your prior interview of him he answered all of your questions in a forthright fashion to the best of his ability and recollection. He states that he does not have a transcript of the interview. He believes, however, that you maintained sufficient notes of the conversation and that you likely will be able to refer to his responses given to you at that time for purposes of your present inquiry.

Dr. Hitt does not have anything further to add to his previous responses to your questions on the matter. If you have specific reasons that cause you to believe an additional interview with our client is necessary, however, kindly provide those to me. I will take the matter under advisement with our client.

Sincerely,

James F. Heekin, Jr.

Subject: RE: UCF Investigation

Dr. Whittaker,

We do not believe at this point in the investigation (3 weeks before our final report is due) that it would be productive to send you written questions, particularly if they are limited to policy or process improvements which as I explained in our telephone conversation is beyond the scope of our engagement. We also have not offered that opportunity to any other witnesses, instead insisting on in-person or telephone interviews.

We will include both your May 20,2019 email and your July 29, 2019 email below as exhibits to our report, so there is no confusion about how you responded to our interview request. If the Board of Governors wishes to receive your assistance in identifying policy or process improvements, I'm sure they will contact you.

Regards,
Joey

Subject: UCF Investigation

Dear Joey,

Thank you for the conversation and for sending the materials regarding your charge from the Board of Governors. I read the charge letter and watched the June BOG meeting in which you reported and was disappointed to see that the focus of the questions was not on finding systemic issues at all levels.
I am concerned that the motivation of the investigation remains more heavily focused on punitive measures than on identifying and resolving the issues that would improve the entire system.

I am also disappointed that my response to your invitation for an interview was characterized as uncooperative. As I said in my email of May 20, 2019, I am willing to offer my experience and perspective to identify policy or process improvements, as I did while president.

Therefore, I invite you to send me questions that you have and I will respond in writing accordingly. I am pleased to cooperate with your investigation in this way.

Re: Florida Board of Governors
Investigation of Capital Projects Funding at UCF

Dear Dr. Waldrop:

This firm has been engaged by the State University System of Florida Board of Governors (BOG) to investigate the use of Education and General (E&G) funds by the University of Central Florida (UCF) for actual or planned capital projects. The investigation is being overseen by the BOG Inspector General and Director of Compliance, Julie Leftheris.

We would like to interview you as part of our investigation. We are focused on several projects which appear to have been approved for E&G funding in 2012 when you were serving as UCF's Provost. Please let us know if you are willing to be interviewed. If you are represented by an attorney, please have your attorney contact me. If you do not respond, we will interpret that to mean you are declining our interview request.

Thank you for your cooperation, and I look forward to hearing from you.

Sincerely yours,

R. Joseph Burby, IV

Joey,

Thank you for your email.

I don't think I can help you on this one. I don't recall being engaged in a detailed conversation about the project or the source of funds - and that would be typical as it was/is not an academic matter. I do recall that there were facilities presentations to the Board of Trustees about how the chiller would be cost effective and save the university funding over time.

Dear Dr. Chase,

As you may recall, we spoke last year in connection with my firm's investigation of the funding of Trevor Colbourn Hall at UCF for the University's Board of Trustees. My firm has since been retained by the Florida Board of Governors to investigate all capital project funding at UCF since 2010. This investigation is being overseen by the BOG's Inspector General and Director of Compliance, Julie Leftheris (copied).

We would like to speak with you again, this time concerning the funding of a Combined Heating and Power plant at UCF. Specifically, we would like to discuss your understanding of how the project was funded including the attached Memorandum of Understanding that you signed in July 2014 along with former CFO Bill Merck.

Please let us know if you are willing to be interviewed as part of our investigation and, if so, your availability over the next several weeks.

Thank you for your cooperation, and we look forward to hearing from you.

Regards,

Joey

Joey,

I don't believe I have much to add to the discussion, but I am happy to talk with you by phone. I am copying my assistant Sandie to help set up a time. Please send me whatever documents you believe would be useful for me to review.

Diane

Dear Dr. Chase,

My name is Joey Burby, and I am an attorney with the law firm of Bryan Cave Leighton Paisner LLP. We have been retained by the University of Central Florida Board of Trustees to investigate the inappropriate use of state funds for certain capital projects at the university. We are focused on one project in particular, the renovation of Colbourn Hall and construction of new Trevor Colbourn Hall, which appears to have been considered for funding while you were serving as Interim Provost in 2014.

We would like to interview you in connection with our investigation. We think a telephone interview would be sufficient and anticipate needing around one hour. There are some documents we would like to ask you about that we can send you by email to review in advance of the call.

Please let us know if you are willing to be interviewed and, if so, your availability over the next two weeks.

Thank you for your cooperation, and we look forward to hearing from you.

Regards,

Joey

Subject: Quadrangle and COM buildings

Lee:

Bill, Judy and I were discussing use of carry forward funds yesterday and had a few questions about some expenditures made from non-E&G sources that may qualify as E&G. We loaned funds from the auxiliaries for the $7.5 million renovation of the Quadrangle building and for the remaining $3.34 million that was on loan from Bank of America for outstanding pledges on the COM building. Can your team look at the expenditures for those buildings to see if E&G carry forward funds could be used instead of the auxiliary funds for some of these amounts? We are thinking there are at least some furnishing and equipment expenditures that could be justified and perhaps others.

Thanks.

Vanessa

Adjusted for Vetoes and Supplementals

FISCAL ANALYSIS IN BRIEF

For Fiscal Year 2012-13

The Fiscal Analysis in Brief is an annual report prepared by the Florida Legislature to summarize fiscal and budgetary information affecting the 2012-13 fiscal year.

The document contains graphical depictions and detailed listings of appropriations, fund sources, nonrecurring issues, vetoed items, financial outlooks, and legislation affecting revenues.

It also includes the Truth in Bonding Statement used to support the General Appropriations Act. The document reflects appropriated funds only and does not include local revenue for educational entities such as local property tax revenues and student fees.

Various sources were used to prepare this document. Among the most important were data from the Legislative Appropriations System/Planning and Budgeting Subsystem (LAS/PBS), multiple consensus estimating conferences, the General Appropriations Act and other fiscal-related legislation, the Governor's Veto Message, and explanatory information used during the appropriations process.

Published August 2012

FOOTNOTES

(A) The cash balance in the Budget Stabilization Fund (not shown here) at the time of this statement was $279.3 million. This balance does not include the transfers indicated in footnote (B), which will bring the total to $493.6 million in FY 2011-12 and $708.1 million in FY 2012-13. This figure also does not include the full repayment of hurricane-related budget amendments transferring funds to the Casualty Insurance Risk Management TF (EOG #2004-0483 for $11.0 million and EOG #2005-0205 for $11.8 million). At the time of this statement $2.0 million remains to be repaid.

(B) The amount of $1,072.4 million was transferred out of the Budget Stabilization Fund to the General Revenue Fund in FY 2008-09. Section 215.32(3) F.S. stipulates that repayments to the fund are appropriated in five equal installments beginning in the third year following the year in which the expenditure was made, unless otherwise established by law. Per the aforementioned statute, the repayments were appropriated for FY 2011-12 and FY 2012-13, and three additional repayments in the amount of $214.5 million will be required for FY 2013-14 through FY 2015-16. The FY 2012-13 repayment is authorized in Section 133 of HB 5001.

(C) This financial statement is based on current law as it is currently administered. It does not include the potential effect of any legal actions which might affect revenues or appropriations. The Attorney General periodically issues an update on any such litigation. In addition, it does not recognize any deficits in any spending programs unless specifically stated.

(D) The Total Funds Available do not contain the cash impact of pending refund requests related to the settlement reached in In re: AT&T Mobility Wireless Data 265 Services Sales Litigation, 270 F.R.D. 330, (Aug. 11, 2010). These refunds were previously estimated to total as much as $158.2 million. If approved by the Department of Revenue, the refunds will affect the Gross Receipts Tax, the State Communications Services Tax, and the Local Communications Services Tax; however, the timing and final amounts of the refund payments are currently unknown and could vary substantially from previous estimates.

(E) This estimate anticipates that the operation of slot machines will remain limited to eight pari-mutuel facilities in Miami-Dade and Broward counties. If additional slot machine operations or other casino-style gaming are authorized in other locations in Miami-Dade or Broward counties or in locations elsewhere in the state, payments to the state under the Gaming Compact Between the Seminole Tribe of Florida and the State of Florida may be reduced.

(F) The 2012 General Appropriations Act transfers an amount of $350.0 million from the Lawton Chiles Endowment Fund to the General Revenue Fund. House Bill 5301 requires an amount equal to the amount of Medical-Hospital Fees collected above the January 2012 revenue estimate be transferred back to the Endowment in the following fiscal year until repayment is complete. The estimates of repayments for the term of this outlook statement are as follows- FY 2013-14, $75.2 million; FY 2014-15, $34.8 million; and FY 2015-16, $2.1 million.

FOOTNOTES

(A)This financial outlook statement does not include the transfer from the Lawton Chiles Endowment Fund to the Biomedical Research Trust Fund under section 215.5601, Florida Statutes, nor does it include the appropriation from the trust fund. The projected amount of the transfer is $0.7 million for FY 2012-13.

(B)The funds available figures are not adjusted for any financial obligation related to the constitutional funding requirement for tobacco education and prevention. The amount of the financial obligation for FY 2013-14 is estimated to be $65.2 million, 2014-15 is estimated to be $66.4 million, and 2015-16 is estimated to be $67.9 million.

Any property remitted to the state from the Federal Deposit Insurance Corporation (FDIC) that is not claimed by owners during a ten year period following the remittance of that property must be returned to the FDIC. The state received approximately $29 million from the FDIC in the 2009-10 fiscal year.

Revised Final

6/13/2012

Chapter Law	BILL #	Issue	Tax	FY 12-13 GR Cash	GR Recur.	Trust Cash	Trust Recur.	Local Cash	Local Recur.	Total Cash	Total Recur.
		HB5301 transfer from GR to Lawton Chiles Endowment Fund		0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0

(1) Should the electorate approve the proposed amendment, the impact on school taxes would be -$.3 million in 2013-14, 2014-15, and 2015-16, and on non-school taxes -$.3 million in 2013-14 and 2014-15 and -$.4 million in 2015-16.

(2) The Appropriations Act authorizes 350 terminals. The Lottery is authorized to request funding for up to 500 additional terminals, with the Revenue Estimating Conference required to review the EETF impact of adding the additional terminals.

(3) This bill also has a 2011-12 impact of GR of -$29.8 million
(4) Assumes the bill only applies to aircraft engines and gas turbine engines.
(5) Assuming a statewide average millage rate of 7.8 mills for school taxes and 10.9 mills for non-school taxes, the impact on school taxes would be -$.1 annually and on non-school taxes -$.1 annually,
(6) Should the electorate approve the proposal and all the individual jurisdictions pass the necessary ordinances, the revenue impact statewide would be -$9.1m in 2014-15 and -$9.4m in 2015-16,
(7) Should the referendum be successful, the impact would be -$.6 million annually beginning in 2013-14, assuming current millage rates.
(8) Though the full scope of the impacts is indeterminate, the recurring annual impacts would be at least -$11.3 million for Gross Receipts Tax, -$2.9 million for state Sales and Use Tax, and -$21.3 million for local government communications services tax. The speed with which the minimum recurring impacts will be reached is unknown, so the cash impacts in FY 2012-13 are unknown.
(9) The 2012-13 impact is expected to be at least -$6.0 million (-$2.5m GR Sales Tax, -$.3 Local Sales Tax, -$1.0 Gross Receipts Tax, and -$2.2 local Communications Services Tax).
(10) This bill also has a 2011-12 impact on UC Tax of -$214.9 million.
(11) Should the electorate approve the proposal and the Legislature pass implementing legislation, the statewide 2013 impact is expected to be $20.2m, $11.4m in county taxes and $8.8m in school
(12) The impact is split as follows: Tobacco Settlement TF 2012-13 -$5.2m, 2013-14 -$4.0m, 2014-15 -$3.8m, 2015-16 -$3.9m; Biomedical Research TF 2012-13 -$.5m, 2013-14 -$.4m, 2014-15 -$.4m,

TRUTH IN BONDING STATEMENT
IN SUPPORT OF THE 2012-13 GENERAL APPROPRIATIONS ACT

There were no changes to the proposed bond sales listed here as a result of vetoes to the 2012 General Appropriations Act.

Turnpike Revenue Bonds

The State of Florida is proposing to issue $443.8 million of debt or obligation for Florida Turnpike construction projects. The debt or obligation is expected to be repaid over a period of 30 years. At a forecasted interest rate of 5.75%, the total interest paid over the life of the debt will be $483.1 million.

State Infrastructure Bank Bonds

The State of Florida is proposing to issue $82.9 million of debt or obligation for the State Infrastructure Bank. The debt or obligation is expected to be repaid over a period of 20 years. At a forecasted interest rate of 5.75%, the total interest paid over the life of the debt will be $58.8 million.

Right of Way Acquisition Bonds

The State of Florida is proposing to issue $101.2 million of debt or obligation for the purpose of advanced right of way acquisition and bridge construction. The debt or obligation is expected to be repaid over a period of 30 years. At a forecasted interest rate of 5.75%, the total interest paid over the life of the debt will be $113.5 million.

Everglades Restoration Bonds

The State of Florida is proposing to issue $50.0 million of debt or obligation for the purpose of funding up to $50 million in projects for the purposes of constructing sewage collection, treatment, and disposal facilities included in the Florida Keys Area of Critical State Concern protection program for the preservation of environmentally sensitive land. The debt or obligation is expected to be repaid over a period of 20 years. At a forecasted interest rate of 5.75%, the total interest paid over the life of the debt is estimated to be $35.4 million.

Lottery Revenue Bonds

The State of Florida is proposing to issue $109.4 million of debt or obligation for the purpose of funding $100 million in public education capital outlay projects. The debt or obligation is expected to be repaid over a period of 20 years. At a forecasted interest rate of 5.75%, the total interest paid over the life of the bonds is estimated to be $77.0 million.

Capital Outlay Bonds

The State of Florida is authorizing the issuance of debt or obligation in an amount to be determined, but not to exceed $141.2 million, for the purpose of constructing certain public school and Florida higher education fixed capital outlay projects. These projects may be funded in whole or in part by the sale of bonds or other debt or obligation pursuant to Article XII, Section 9(d) of the Florida Constitution.

SUMMARY OF OUTSTANDING STATE DEBT

As reported by the State Board of Administration in “Annual Debt Service Report (for the Fiscal Year Ended June 30, 2011)”, the State of Florida full faith and credit bonded indebtedness (principal and interest) was $22,347,762,000. For specific detail see page 9 of the report.

Lynn,
Please approve the transfer of $23,873 from the university's E&G carryforward reserve (department 00010107) to the COM BSC - Carryforward (department 20070710). This amount will be applied toward the furniture and equipment purchase at the Lake Nona campus operations.
This will be recorded as a temporary increase.
Please let me know if you have any questions.
Thank you,

S T I P U L A T I O N S

It is hereby stipulated by and between counsel for the respective parties that the reading and signing of the deposition be waived.

THE REPORTER: Would you raise your right hand, please.

THE WITNESS: (The witness complies.)

THE REPORTER: Do you solemnly swear that the testimony you are about to give will be the truth, the whole truth, and nothing but the truth so help you God?

THE WITNESS: I do.

WILLIAM F. MERCK, II,

having first been duly sworn, testified under oath as follows:

DIRECT EXAMINATION

BY MS. MITZ:

Q. All right. Good afternoon, Mr. Merck.

A. Good afternoon to you as well.

Q. Have you ever given a deposition before?

A. It's been a while, but yes.

Q. Okay. Since it's been a while, I just want to cover a couple of ground rules so that we're all on the same page.

As I'm sure you know, the purpose of today's deposition is just for Don and I to get a better understanding of what happened at UCF.

We have only been provided with documents. We didn't get to sit in on any of the interviews conducted

by Bryan Cave, so the last few days have been very enlightening for us to be able to hear from the people involved.

So we're just here to figure out what happened. We're not trying to get anybody in trouble. We're not going to be asking any trick questions. It's really just to get some information.

So for today, I ask that you speak loudly because I'm on the other end of the phone and I need to hear everything, and also because Madam Court Reporter needs to hear everything to be able to type it down accurately. Particularly if you're going to be giving like a yes or no answer, please try not to nod your head or say uh-huh, huh-uh; say yes or no so that it's clear for the record.

If you are going to guess at something or estimate or approximate, please let us know that you are doing that. If you don't know something, you can say I don't know. If you know something because someone else told you, please let us know that. And if at any time you are confused by our questions, and you want us to restate it or rephrase it, please ask us to do so and we will.

Do you have any questions of me?

A. Not at this time, I don't. Thank you for that

introduction.

Q. Okay, great. Well, let's just jump in and get started. Can you please state your full name for the record?

A. William F. Merck, II.

Q. And are you currently employed?

A. No.

Q. Okay. What was your last place of employment?

A. University of Central Florida.

Q. And what was your position there?

A. Vice president for administration and finance and chief financial officer.

Q. And how long were you at the University of Central Florida?

A. Twenty-two years.

Q. Were you always in the same position?

A. I was in the vice president for administration and finance position to start my tenure there, and a few years back, maybe seven, I was -- had the title chief financial officer added to the role.

Q. Okay. And who did you report to in that capacity?

A. The president of the university.

Q. Okay. Would that be true for your entire time at UCF?

A. Yes.

Q. Okay. And what relevant education, training or experience did you bring to UCF?

A. My experience, after part-time jobs in college, three years in the Army, was -- was 14 years at James Madison University. The last five I was vice president for business affairs there. And then I spent ten years at the College of William & Mary in the role of vice president for administration and finance, and then came here.

Q. Okay. And so as CFO at UCF, what were your job duties or responsibilities?

A. My job duties and responsibilities were to some extent intertwined with my role as vice president for administration and finance.

An easy way maybe to explain what my role was is to say it this way. The mission of the university is teaching, research, and service. In my division, administration and finance which has about a thousand people on the staff, our role was to provide the best environment that we could for those teaching, research and -- teaching, research, and service functions to function as well as they could with the resources that we had available to us to create that environment.

Q. Okay. When you say there was about a thousand

people in that division, did you supervise all those people?

A. It was a hierarchical arrangement. I had about eight direct reports, and they had their direct reports and so on down the line.

Q. Okay.

A. So my role was to provide a leadership level at about the 30,000-foot level for all the efforts of those performing those services.

Q. I understand. Okay. And under which presidents have you worked at UCF?

A. Dr. Hitt until Dr. Whittaker took over last July.

Q. Okay. Can you describe the relationship that you had with President Hitt? Did you guys work closely together? Did you have good lines of communication?

A. Yes. We worked very closely together. We had good lines of communication. He was, I think, perfect for the role as president.

Q. I would assume, and correct me if I'm wrong, that you probably had a lot of interaction with him and it wasn't just limited to noticed meetings. Is that fair to say?

A. That's fair to say.

Q. And then can you give me an idea of what sort

of relationship you had with Dale Whittaker when he came in as provost? Did you guys start working together immediately?

A. Yes, we did.

Q. Okay. And were you aware of the experience that he came to UCF with?

A. Based on what I had heard and seen from the search process that brought him here, I knew he was at Purdue. He had worked as a dean and some other capacities at that university.

MR. GREENE: Did you finish your answer about your relationship with Dr. Whittaker? It seems like you had a pregnant pause there. I wasn't sure. If you did, that's fine.

THE WITNESS: I think whenever you have a new relationship with -- with a president or anybody that you are reporting to, it takes a little time to start to learn how -- what they want, how they work, what their expectations are of me in this particular case. And so I was still going through that process of trying to work through that with Dr. Whittaker.

BY MS. MITZ:

Q. Oh, yeah, I get that. I totally understand that, and we'll talk about that relationship in depth in a little bit.

So can you describe in general the relationship that you had with the trustees?

And what I'm looking for is like did you just talk to them in meetings? Did you spend some time with them preparing them for meetings? Was there like kind of an open door policy in that if they had questions about things that were appearing on the agenda, they could call you? I mean, kind of talk about those things.

A. Sure. And as you know, the boards change over time. Someone's tenure ends, new board members come in. They all have their own personalities, their own interests, their own backgrounds, and some board members have much more interest in knowing how things operate. Some are maybe less interested.

But my door was certainly always open to them, and I encouraged them if they ever had questions or anything that they wanted to know about items that would be coming before them in board meetings, that I was always open to talk with them about it and try to explain it to them.

When a new board member would be coming in, I made a point of offering them an opportunity for me and usually one of our finance folks, like Tracy Clark or before her Vanessa Fortier, for us to have a one-on-one

meeting with them, just for us to review how budgeting worked in a university setting, which often was different from the accounting and reporting that they would do in the private sector. And I thought those were fruitful and really helped them with their understandings of how things went.

Also, prior to committee meetings that I was responsible for, like finance and facilities, I'd arrange a call or a personal meeting with the chair to review the agenda items to see what, if any, questions they might have about the agenda items so that we could better prepare them for the meeting that was coming up, and I found those useful.

Q. Okay. So did that also include Chair Marchena?

A. When he was chair of the finance and facilities committee, the answer is yes. When he rotated off and became board chair, the interaction was more between he and the president.

But I was certainly available to answer any questions that he might have, and if he wanted to meet with me, that would be fine.

And we had a -- I had a relationship with Dr. Hitt such that he had no qualms about me talking with board members off line without him being there or anything. You know, some organizations, there are

prohibitions against a staff member talking to a board member outside of a formal meeting. We didn't have that.

Q. Okay. So let me go back to something you said about a minute ago which was the orientation or the training that you provided to new chairs of the finance and facility committee.

A. It was -- I'm sorry. Let me interrupt for a second.

That orientation was to any board member, all board members, not just the chairs.

Q. Good. Thank you for that.

Do you recall specifically who you did that with, say, since 2013?

A. I can't answer that specifically. The only one that comes to mind that I did not do it with was Danny Gaekwad, who was a new member, and we just couldn't seem to meet his calendar requirements to have that orientation. But I believe we had that with all of the others.

There may have been an exception that I am not recalling, but I don't think so other than Mr. Gaekwad.

MR. GREENE: Can you spell Gaekwad for the court reporter?

THE WITNESS: Probably not.

THE REPORTER: I can find it.

THE WITNESS: I'll give it a shot. It's G-A-E-C-K-W-A-D [sic], I believe.

MS. MITZ: That sounds right. Okay.

BY MS. MITZ:

Q. So in those orientation training moments, did you guys talk about the different kinds of funding sources, including E&G?

A. That was the primary purpose for it, because we, in higher education, use terms that aren't used in the business world, things like education in general or auxiliaries or direct support organizations. The different auxiliaries sometimes are unfamiliar to them.

And we would give them an orientation as to the size of the budget, the general way that it was divided up among the various components of the university, and how the state played into it with general fund appropriations, the tuition from the students, and then all of the revenue-generating opportunities on a campus that bring in revenue as well, like the housing operations, the book stores, food service, those sorts of things.

Q. Okay. Do you recall whether in the orientation there would have been a discussion about the different ways that a source of funds could be referred to? And

the example that comes to mind is how some people think carryforward is E&G. Would you have discussions that specific?

A. We may have. I don't recall that, but we may have very well done that because those meetings would last an hour or more and it was free-flowing, and sometimes I would be talking, sometimes Tracy Clark or Vanessa Fortier would be talking with them.

Q. Okay. So as a result of having done this, has it surprised you to hear that some of the trustees have come out and said that they didn't know that carryforward could be E&G?

A. Yes.

Q. Okay.

A. It does.

Q. All right. Now, in your position, did you work particularly close with any specific department? I would imagine maybe facilities.

A. I worked with all of them and it depended on -- it depended on what was going on in their world at the time, whether they needed my input or advice or if it was something that was abnormal, something unusual. Often it would be issues with personnel, problems relating to HR type issues, things likes that. It could be budgeting issues. It could be anything. It was all

over the park. No one day was the same.

Q. Okay. Did you have occasion to work closely with any of the attorneys in the general counsel's office?

A. The three that I worked with the most would have been Scott Cole, Youndy Cook, and Jordan Clark, and it depended on the issue.

Q. Were they, like each attorney, assigned to a specific subject area?

A. Scott Cole would have been more of the generalist. Youndy Cook would have been more involved in maybe litigation-type matters or personnel issues that were contentious. And Jordan Clark was more oriented towards legal activities that involved the athletic association.

Q. Okay. I would like to take a step back in time and ask you about a conversation that I believe you had with Scott Cole approximately 10 years ago, maybe even 11 years ago.

MR. GREENE: Woo.

BY MS. MITZ:

Q. Do you recall having a discussion with him about the fact that funds were being either transferred or loaned to the athletic association and telling Scott that that -- that idea of transferring or loaning those

funds may lead to an audit hit or comment?

A. No. What I do remember -- what I do remember is that, and I don't remember the timeframe, I'll be clear on that. Probably ten years ago, I'll use that as a very round number.

Q. Okay.

A. After one of the board meetings, and that, I believe, was when the old board of regents was in place, not the board of governors. A question came up in a board meeting, not to me, but -- in fact, I was not even in the room, about could we help out the athletic department in some way to help them grow the program and move ahead?

So the president asked me if we could loan them a million dollars.

I double checked that with our then controller, Linda Bonta, and we agreed there was no prohibition against doing that, and so we did. And over the years we added to that.

And then a few years later, the state auditors had a problem with that that they expressed, and so we stopped doing that. And subsequent to that, the athletic department has been making annual payments back to repay those loans.

Q. Okay. I have -- actually, Don has a copy of

what I think might be the auditor general report that you just referred to. So if you could just flip to --

MR. RUBOTTOM: Document 1.

BY MS. MITZ:

Q. It should be page seven of the audit. It will be the first document in your packet. If you can kind of glance through that and see whether that is sounding like the situation you just described?

A. The -- it looks -- it looks -- I'm just generally looking at it, and it looks like it's appropriate except for the part where it says that only two of the loans have been approved by the university president and none of the loans were approved by the board of trustees.

I never was involved in loans to the athletic department that the university president was not aware of.

Q. Okay.

A. And so from there, I wouldn't have been involved with wanting to bring it up or even needing to bring it up with the board of trustees. That would have been something between the president and the director of the athletic association in some of their conversations and meetings.

So I didn't unilaterally make a loan without

having the president know that that's what we were doing.

Q. Gotcha, okay. Do you -- do you have any recollection of Scott Cole being involved in this?

A. No.

Q. Okay. Do you have any recollection of Scott Cole ever mentioning to you that something he was intending to do may end up in an audit comment or an audit ding?

A. I'm sorry. Say that again.

Q. Sure. Do you have any recollection of Scott Cole saying to you that an action he intended to take may result in an audit comment or an audit ding?

A. An action Scott was taking would result in an audit comment?

Q. Yes.

A. Not offhand.

Q. Okay.

A. Wait. Let me think for a minute.

Well, no. This was not a comment about an action to be taken. It was just a conversation about the -- the problem that was statewide with all the universities having to do with faculty reporting hours, and it was an issue that no one had a good way to really do that accurately.

And we knew that we would continue to get audit comments about that, and it was one of those problems nobody had a real answer to across the system. Those were the kind of conversations I might have had with Scott about audit issues.

Q. Okay. Was Scott Cole on the facility budget committee?

MR. RUBOTTOM: Hey, Carine, can I just go back and go through a few of the details on that?

MS. MITZ: Sure.

MR. RUBOTTOM: Because we are trying to figure out what that working relationship was like.

We don't know anything more about the loan than what we read in the audit reports. I think it was referred to again two years later, but they mentioned there were promissory notes. Were those promissory notes executed each time that monies were -- were loaned --

THE WITNESS: Yes.

MR. RUBOTTOM: -- to the DSO or were any of those executed later?

THE WITNESS: I can't define later. It would have been -- it would have been a reasonable amount of time.

MR. RUBOTTOM: You wouldn't have just put a

loan on the books?

THE WITNESS: No.

MR. RUBOTTOM: You would have --

THE WITNESS: No.

MR. RUBOTTOM: You would have evidenced those loans?

THE WITNESS: Absolutely. Those loans were evidenced in some sort of a document that would have been handled through finance and accounting, yes.

MR. RUBOTTOM: Thank you.

THE WITNESS: Yes.

MR. RUBOTTOM: And I'm not very good at this, so that's why I'm talking over you, so I'm sorry.

Would the general counsel's office have participated in or reviewed the promissory notes before they were executed?

THE WITNESS: I wouldn't have been involved in that transaction, so I don't know. It could have, but I know there was a good working relationship between finance and accounting and the general counsel's office. So there very well may have been conversations about the documents and how they were worded, but I wasn't involved in it.

MR. RUBOTTOM: One thing that I find interesting is that on that 2008 audit, there's

extensive discussions about the general counsel's opinion about the validity of those loans.

So the university was, in response to the audit, appeared to be disputing the auditor's conclusions, and we understand that happens in audits.

THE WITNESS: Right, right, right.

MR. RUBOTTOM: I'm trying to figure out if you have any recollection if the general counsel's office got involved before the exit interview or if that would have been interaction after the exit interview?

THE WITNESS: I don't recall that. I don't.

MR. RUBOTTOM: Do you recall any audit comment over the last ten years where you brought -- where the finance department brought or any department brought the general counsel in before the exit interview to help understand the validity of the auditor's concerns or anything like that?

THE WITNESS: Depending on the issue, I know we would have talked to the general counsel about various things. But I can't specifically -- if you're asking -- if you're asking me was there a working relationship between F&A and the general counsel's office, the answer is yes.

MR. RUBOTTOM: Right.

THE WITNESS: I can't really relate to you all the specifics of the conversations they might have had because there could have been telephone calls, there could have been meetings. They could have been brought up in other meetings. But there was a working relationship between those two departments.

MR. RUBOTTOM: Who would, in the process of dealing with the auditor -- I mean, we've got access to a bunch of e-mails from last spring where these, the Colbourn Hall issues were being discussed.

Who would ordinarily, in your department, engage general counsel in analysis at that stage of an audit?

THE WITNESS: It would have been somebody, probably, that reported directly to me. If it was a financial issue, it would have been Tracy Clark, more than likely. It could have been Misty -- not Misty, but Christy Tant, more likely Tracy. If it was a building issue, it would more than likely have been Lee Kernek, and she would have talked to Scott primarily, possibly Jordan Clark.

If it was a police matter that police reported to me, they would have more than likely worked with Youndy Cook. She got involved in a lot of the

police issues.

So there was that working relationship between my direct reports and general counsel on a regular basis depending on the issue involved and who was the knowledge expert.

MR. RUBOTTOM: This spring when the auditor was asking questions about Trevor Colbourn Hall and the funding source, is it -- who do you think was point on that, on that issue?

THE WITNESS: I believe there were two people that were point, and it would have been Tracy and Christy; Tracy Clark and Christy Tant.

MR. RUBOTTOM: And why would that not be Lee, because it's funding rather than a --

THE WITNESS: Exactly. It's a funding issue more so than a construction issue. Lee may have been in the conversation, but not as the point person.

MR. RUBOTTOM: Okay, okay. Did they consult with you during that process? When did you get brought into the loop on that?

THE WITNESS: They kept me informed of what the conversations were at kind of a 30-foot -- 30,000-foot level. I didn't get into the details of every conversation, but they would let me know we're

having this conversation, they're asking questions about this kind of thing, and these are the responses that were given. And it was for my information.

MR. RUBOTTOM: Right. Did you at any point before the exit interview bring the issue up to either Dr. Hitt, because it was going on during his last couple of months, or Dr. Whittaker after he succeeded the presidency?

THE WITNESS: I feel confident -- I can't say for sure, but I feel confident that Tracy Clark and Christy would have been talking to the provost about it because Tracy Clark reported -- she had a dual reporting relationship. She reported to the provost as well as reporting to me. And those -- in the last year or so, she actually had more regular meetings with the provost than she did with me.

So it would strike me as odd if that information wasn't conveyed to the provost.

MR. RUBOTTOM: Okay, Carine.

BY MS. MITZ:

Q. So was Scott Cole on the facilities budget committee?

A. I don't know if he was an official member, but I know that he or one of the other auditors would sit in

on those meetings when we were having the discussions. There's a record somewhere of who the official members were, and there may have been minutes as to who was there.

Q. Okay. Do you recall whether he was also on the university budget committee?

A. Again, officially, I am not sure, but I know I distinctly remember him sitting in on all the meetings, so he was there.

Q. Okay. So with that recollection that he was present at the meetings, would it be fair to say he would have heard discussion about the use of E&G for capital projects?

A. Absolutely.

Q. Okay. And do you recall him ever questioning it or objecting to it?

A. No.

Q. And do you think he would have heard those discussions on more than one occasion?

A. Absolutely, yes.

Q. Okay. Now, to your knowledge, do you know if documents that were prepared for the board of trustees, such as the five-year capital improvement plan and the annual capital outlay budget, do you know whether those documents passed through Scott Cole's hands before they

made it to the board of trustees?

A. Scott Cole got advance copies of all of the materials going to the board meetings, both the full board or the committee meetings in advance of those meetings, as did our internal audit -- auditor. And if I'm not mistaken, all those materials were forwarded to the board of governors as well.

And I know in recent times when we went from paper to electric copies of all the materials, the board of governors had access to all the materials, including the attachments that would be present in a board meeting. So everybody had everything in advance that we were giving to the board for their review and comment, if any.

Q. And would that everybody include Whittaker's chief of staff?

A. I don't know how the distribution was in the provost's office, but it was certainly available. It was nothing that would have been kept from them in any way. It was readily available.

So how the distribution went in the provost's office, I couldn't say.

Q. Okay.

A. But there was -- it was not controlled by the provost in that it was readily available to anybody that

wanted it. I'm just thinking of the official distribution list.

Q. Okay. All right. So what I would like to discuss now is the discussion or discussions that you had with President Hitt regarding the use of E&G funds for what was initially the Colbourn Hall renovation, and then what turned into the Trevor Colbourn Hall construction.

I understand that you had a conversation with him at one point, and so I'd like you to give me as much detail as you can. If you recall the date, who else might have been present, and what was said, I would greatly appreciate that.

A. Well, as we established earlier, I had a relationship with Dr. Hitt where I could drop in. We talked about things in formal meetings, but also just outside of formal meetings.

And this project started off as what was going to be -- well, first of all, that project started with increasingly mounting complaints about the health issues, the air quality and all that in the old Colbourn Hall. And so we initiated a formal request to the legislature for -- through the board for PECO money for renovation.

And so I know we talked about it, the board

talked about it. There was a lot of discussion about it. As time went on with that project and we got our professionals involved, the architects, the engineers -- you've probably read some of the documents. That project slowly morphed from a small -- smaller renovation into a bigger renovation, and the more we learned about that building, the worse we realized it was.

There was a period where we were going to build a new building that just replicated the size of the old Colbourn Hall, and once that was finished, move everybody into it. That turned out -- I'll get to this in a minute, but through those discussions until it finally got to the point of being the full-blown Trevor Colbourn Hall, at that point where the provost was really deeply involved in that one. And we added about 10 million because of the increased scope to the building to accommodate all the new faculty hires and so forth.

The president and I had off and on conversations about that through that process.

When -- and remember, our role in that process -- when I say "our," I mean administration and finance and some of the budget committees, our job was to make recommendations to the provost and the

president, and the decisions as to what to do fell to those two, and then if it required board action, it went there.

So I remember being in a meeting. I couldn't give you the exact date, but I remember being in a meeting with Dr. Hitt when it was getting to be a bigger project, up to that $38 million, and we were using carryforward money for it. I did not know that there was a specific legal prohibition against that, and I want to make that emphatic, that statement.

I really did not know there was a prohibition against it, but I knew it was something that had not been -- it was not a conventional way of paying for a building. In the past, before the PECO money dried up, we would make requests, we would get PECO money allocated by the legislature, and we would take care of things. If it was a revenue-generating building, we would issue a bond and take care of it that way.

But with the building deteriorating, life safety becoming a real issue, and we looked at the other sources, other avenues, and carryforward, the leftover money from the prior years seemed to be something we could use to get the people out of harm's way.

So that was my recommendation. I told him because of -- I don't recall exactly my words, but I

said because of the size, 38 million, and it was not done in a conventional way, that the auditors would certainly flag that for review and have some comment about it.

So I said we will probably get an audit -- I think I used the phrase, "audit hit," for the way we handled this, but I felt that I could explain it because of the emergency nature of what we were doing, and we'll work out some kind of solution with the auditors.

I didn't think it would be anything near what has turned out to be a concern for everybody now. And I think that's partly because I didn't know that it was -- I was going to be charged with doing something, quote, illegal.

Also, at that time, I didn't know -- and nobody seems to pay any attention to this, but there's also a state statute out there -- the calamity statute, I'll refer to it as -- that says under calamitous situation, E&G money is appropriate to use for a building, but I didn't know that, either.

Q. Okay.

A. Neither one of those things. I just thought that because it was 38 million, unconventional in the way we were doing it, the auditors would surely have something to say about it. And they did.

Q. Okay. President Whittaker has come out and has admitted to being in a meeting, just like the one you've described where that statement was made. Do you recall if the meeting that you are discussing right now is that one or whether you --

A. No.

Q. -- guys would have discussed this again with Whittaker in the room?

A. I don't recall that. What my memory is, is that was I focused on Dr. Hitt, and Lee Kernek was with me, and there was somebody else in the room, but I wasn't focused on that or them. So I would have to rely on others to say who else was in the room at the time.

Q. Do you recall whether you had that discussion with Dr. Hitt on more than one occasion?

A. I don't recall having a conversation with him necessarily directly about the -- about the potential for an audit comment. But I mentioned it so many times to -- I bet I talked about the fact that that was going to happen to over a hundred or more people in the course of that event.

It was just a way of preparing them for -- the way it would come up in a meeting is we'd talk about Trevor Colbourn Hall, the lack of funding from the state to do anything about it, the fact that Lee had -- Lee

Kernek had tried to go through the board of governors to get some assistance with that project, and she was told there was no money. And essentially, the way she expressed it to me, they said you're on your own.

And so I think another report that I got from -- from some of the folks that work for me was that through some of the legislative staff, they had said basically the same thing. You know, you're on your own on this one. You're not --

Q. Okay.

A. You're not getting any relief from the state.

So when I would bring that up with people and say because we're doing it in this way, which is unconventional, we'll probably get an audit comment for it, but considering the emergency that we were facing with students, faculty, and staff in a building that was going to harm them, all that I talked to agreed with me, we really had no other choice. We were truly between a rock and a hard place as far as what to do.

And my recommendation was certainly to take care of the people and worry about how to respond to an audit comment later, which I did not think would be that difficult to do.

As it turns out, in hindsight, it turns out to be a very difficult thing to respond to, but at that

time I did not think it would be because of the situation we were faced with.

Q. Okay. When you just said that most or everybody that you talked to about this understood and agreed that this was the route you had to take, would that include Provost Whittaker?

A. He was present in some of those conversations I'm sure, because some of the times I did it were at -- I was asked periodically to appear before different groups, maybe a meeting of faculty, a dean's meeting or different ones that the provost would be -- sometimes he'd be present, sometimes not. And that would come up in some of those meetings.

I know when I did orientations with student groups for the ones -- the students that were doing tours at campus and were explaining what the visitors were going to see, and we'd hit on the new construction that was going on, I would describe it there and often say that this is something that's unconventional, we'll probably take some audit criticism for it, but considering the safety involved, I think it's something that we should go forward with. And I really believe that was the right thing to do.

So I talked to a lot of people about it. I brought it up in a board meeting one time after we were

talking about --

Q. Okay.

A. We were talking about capital projects, and I made the comment after Trevor Colbourn Hall came up that I thought we would get an audit comment as a result of that. And I got no -- nobody on the board said anything, and the provost was there.

Q. Do you recall what board meeting that occurred at?

A. No, I don't. I'm sorry. It was not something that I was thinking about recording until the questions started coming up now.

But I distinctly remember doing it, and being a little bit surprised there was no comment or anything. It just went on.

And Scott Cole was there, too, at that meeting. It was a regular meeting so everybody was there that normally is, which would include either Scott or somebody on the general counsel's group and the board members.

MR. RUBOTTOM: Carine, let me ask a couple.

Was that the full board or the finance and facilities committee?

THE WITNESS: As I recall, it would have been the finance and facilities meeting.

MR. GREENE: Try to let him finish his question and try not to talk over him.

THE WITNESS: Okay.

MR. GREENE: You're doing pretty good.

MR. RUBOTTOM: You talked earlier about when the issue of the loan came up, of talking to the controller about that.

We've heard discussions about Lee and others around the state, who when they have a concern about the size of a capital project that they are doing with E&G, that they go to Chris Kinsley for counsel on that.

THE WITNESS: Yeah.

MR. RUBOTTOM: One of our questions that keeps arising is where we get our expertise when we lack it. And I'm curious why you wouldn't go to audit for a question about -- internal audit for a question about a loan, the legitimacy of a lending practice or go to general counsel about the -- why you would go to the controller.

Would you expect the controller to have a solid working knowledge of all those -- all the legal requirements about things like lending money?

THE WITNESS: That's an interesting question, but let me -- I'll have to answer it in the sense

that at any particular point in time, you have staff that have strengths and some that have weaknesses.

At that particular time, Linda Bonta had been around for decades and was probably the most knowledgeable person that I could go to, to answer a question about the efficacy, if that's the right word.

MR. RUBOTTOM: Propriety?

THE WITNESS: Propriety of a loan like that. She was -- and also, she was probably the most conservative financial person on the campus at the time.

MR. RUBOTTOM: Can you spell her last name for the reporter?

THE WITNESS: B-O-N-T-A.

MR. GREENE: V as in victor?

THE WITNESS: Linda Bonta, B, bravo.

MR. RUBOTTOM: I understand that.

Let's talk about facilities issues. And the reason I ask is, it's my understanding that in recent years, if a university came to Chris Kinsley and said we've got a renovation of $5 million, that his response would be you can't go over two.

And what I'm trying to figure out is, my understanding of this, the Colbourn Hall

renovation -- forget the new building.

THE WITNESS: Okay.

MR. RUBOTTOM: The Colbourn Hall renovation started, from my recollection, at five to seven. I believe sometime in 2013, you all committed about $8 million. We've seen an allocation document signed by Provost Waldrop and Dr. Hitt in August of 2013 that memorialized that commitment as an $8 million E&G carryforward to a renovation project. And at that time, that's the only project that was on the books.

Did you have audit hit concerns about that size of a renovation project?

THE WITNESS: No, no. At that particular time, we all thought that renovation projects were okay for E&G carryforward dollars. That was just what we all thought. We all believed that, and therefore nobody questioned it because we all believed that was okay.

MR. RUBOTTOM: Did you draw a line if a renovation like involved an expansion of a building or did -- yeah, let's just say expansion. Did you draw a line there in your understanding at that time?

THE WITNESS: I didn't; others may have, but I

didn't.

MR. RUBOTTOM: Do you have -- I've been learning a lot of accounting terms --

THE WITNESS: Okay.

MR. RUBOTTOM: -- that I never wanted to learn. Chris Kinsley talks about capital renewal.

THE WITNESS: It's confusing.

MR. RUBOTTOM: There's discussions of deferred maintenance. I think I understand what maintenance is. I think I understand what deferred maintenance is.

I'm curious what you -- what your understanding of fixed capital outlay is in the state university system.

THE WITNESS: Capital outlay refers to a physical asset. Fixed means it's exactly that, it's fixed in place. It's not things that are added to the building afterwards, like furniture, fixtures, equipment, all that sort of thing. So it would be the fixed, nothing added into it later. It's a capital asset, if that makes sense. It does to me.

MR. RUBOTTOM: It does.

Who in finance administration would have been the most expert on that definition for purposes of working with state funds and working -- putting

together PECO list, all those things?

THE WITNESS: Well, there's two questions sort of embedded in that one.

The expertise was in the people at the top of that organization. It would have also been in Lee Kernek's area. But when it comes to the second part of that question having to do with the forms that we fill out and send into the state, those were forms that the way they were to be filled out was dictated to us because there was a desire at the state level to be able to compare universities -- then 11 universities, later 12, but to compare all universities in how they were using their money.

And so there were -- I know there were a number of questions from our folks about how to fill out some of these forms, what expenditures to put in what columns. And I know that all of them felt and believed that they were filling them out appropriately as the instructions dictated.

And I also was told by them that they did make some calls to the board of governors about some of their issues to make sure they were putting them in the correct columns.

So there was no intentional misleading of anybody, if that's where this is going, on those

forms that were filled out, because they were filling them out the way they were told to fill them out. And upon questioning, they still believed they were doing them the way it was supposed to be done.

MR. RUBOTTOM: Okay. Thank you. Carine?

BY MS. MITZ:

Q. Okay. When Provost Whittaker assumed the presidency late last year or last summer, did you have any like kind of briefing with him or any meeting to kind of get on the same page or develop a game plan or anything?

A. Not really. We had meetings, but I didn't -- I was not -- I didn't -- I don't feel that I was really developing any deep rapport there, if that's fair to say.

Q. Okay. Sure.

MR. GREENE: It's fair if it's true.

BY MS. MITZ:

Q. Can you describe the status of the relationship prior to the president asking you to resign?

A. I think it was a surface relationship. I don't think he really understood the way that a university operated outside of some of the academic areas.

I mean, he understood them. Let me make a distinction there. He understood those operations, but

I don't think he was really that interested in them.

Q. Okay.

A. And that was worrisome for me because everything -- to make an organization function properly, everything has to be balanced within that organization.

An example would be if you are going to add a hundred new faculty, you need to add support staff to serve those faculty, and you're going to have more space being utilized. You're going to need more people to take care of the space. There's just a whole series of things that need to happen.

An example might be if you -- if you took a stock car, pick any car, and you decided you were going to add a bigger engine to it, that would be great. You'll get more power. But if you don't also beef up the brakes and the braking system, the tires that are going to be put under stress for all the -- the bigger engine, that sort of thing, you're going to have a mess on your hands.

And I've had a little sense of that, that we can add more faculty and do some of those kinds of things, but I don't know that there was a real understanding of the implications down through the ranks. So I think that was a little bit of my uneasiness.

Q. Okay. So when the news came out that the audit finding was made or going to be made and people started realizing that this was going to be an issue, I understand that the president talked to you about taking your resignation, and initially you were going to be working through the end of the year?

A. Yes.

Q. At that time, did he convey any disappointment in you or your decision to use E&G?

A. What he said was that he thought that I did the right thing; I chose the wrong method to do it. And he --

Q. Did he seem upset with you? Understanding?

A. No, no.

Q. Sympathetic?

A. No, not at all. He -- in retrospect, looking back -- of course, I was thinking about this since then. What he implied or said was that you did the right thing, you chose the wrong method. You are going to take some heat for this over the next few months, and then we'll get past this.

And thinking back on it, I think he clearly meant you will take some heat, not we, and I should have read something, figured something was going on there. We'll have -- you can offer your resignation, retire.

And I said how about December 31st?

And he said sure, that's fine, and we'll have a party in the meantime and all that.

I said that would be a little hypocritical. I don't think that's appropriate.

And then I wrote a letter of resignation, as he requested, citing retirement and so forth. And that's the way that was until the audit -- let's see -- until -- I'm trying to keep my sequence of events straight in my head here.

When I think it really started to go downhill for me was when the chancellor called a conference call with the president and several other people, including me, to talk about the audit and his concern about it. He started the conversation with asking if Bill Merck was present, and I said, yes, I am.

And then he -- the chancellor really was -- sounded angry and was asking me about, didn't I know that that was wrong, and what did I know, and blah, blah blah. And then he wanted to know -- just scratch the blah, blah, blah.

MR. GREENE: She's not going to scratch anything. Everything you said is on the record, so answer the question.

THE WITNESS: Okay. So when -- when he was

really drilling down on me about that, and Vikki Shirley joined in, too, about, well, you couldn't have done -- been involved in this stuff alone. There must have been other people involved.

And it was my feeling at that point, my sense was that there was no way I was going to start taking innocent people that work for me and start throwing them under the bus in some craven attempt to protect myself. I just wasn't going to go there and do that when I was being attacked like that.

So what I said was, to deflect that, I just said, look, I'm the chief financial officer -- I think I said CFO. I'm the CFO, and it's my responsibility as CFO, rather than getting into answering questions about who else was involved and all that sort of stuff.

BY MS. MITZ:

Q. Okay.

A. And later, my statement there later got morphed into a little larger statement where Dr. Whittaker started saying Bill took full responsibility for everything that happened.

That's -- that's an exaggeration in the sense that what I was trying to get across was things of a financial nature that the people that report to me were

involved in as CFO, that's my responsibility. That's what I was trying to get across; not that I was taking on the responsibility for the president, for the provost, for the general counsel, for the chief auditor. They all have responsibilities, too, in everything that happens.

But I think in the next few days in an effort to protect the president and the board, the theme started to be Bill took full responsibility, an exaggeration, and it's all on him and none of us knew anything about anything.

Q. Right.

A. That was not -- I was just, frankly, highly disappointed at the lack of integrity and the lack of honesty that I was experiencing with the leadership at that time, to the point that I can tell you I could never work with that group again under any circumstance, because I would not trust them at all.

Q. Sure. So were there any discussions between you and President Whittaker immediately before that phone call?

A. If there were, I don't recall them because they were so inconsequential.

Q. So it's not like anybody, the president or the general counsel or anybody like that came to you and

said, listen, we want you to accept responsibility. You did that, it sounds like, to protect Lee Kernek, Tracy Clark, those guys; is that right?

A. Exactly. You're right.

MR. GREENE: Well, Bill, tell them about the conversations that you had about your appearing -- your request that you be allowed to appear at the BOG.

MR. RUBOTTOM: Can we hold that for just a minute and let me go deeper?

One of the things that we're curious about that we really don't have information about is what the internal conversations were between the exit conference and the conference call with Chancellor Criser.

Do you recall any of the interactions between the -- the upper ranks of the administration? Do you recall who was at the exit conference?

THE WITNESS: At the exit conference, my memory is a little sketchy, but I can tell you it would have been Tracy and Christy and Joel Hartman, because of IT, not because of any of this. One or two of the internal audit staff would have been present. There was probably, I'd say, ten or more people in the room. I think there was somebody from

student affairs in the room. There were a lot of people in the exit conference meeting.

MR. RUBOTTOM: Was Bev Seay there?

THE WITNESS: No, Bev Seay was not there.

MR. RUBOTTOM: Was any trustee there?

THE WITNESS: I don't recall.

You know, when you said Bev Seay, I don't recall her being there. That's not to say she wasn't. I wouldn't have focused on it. But I don't remember her being there.

MR. RUBOTTOM: Did you hear about or participate in any conversations with trustees about the audit between the exit conference and the chancellor's phone call?

THE WITNESS: I don't recall. It was all happening pretty fast. There was only a couple of days or so there.

MR. RUBOTTOM: But you don't recall -- do you recall any -- any serious concerns from the general counsel, the president's office, Mr. Heston, Robert Taft, anybody else in audit about the finding with respect to using E&G for Trevor Colbourn Hall before the Criser phone call?

THE WITNESS: I don't recall. I mean, there was certainly always concern when you -- let me

think about it. In the exit conference, when -- in the exit conference when it came up, since I had been talking about getting an audit comment for probably a year before, if not that, to many, many people, when that was the last one he mentioned and when he brought it up, I said -- I think I said "This is on me," because it was -- it happened in an area I was responsible for.

And I think -- I don't know if people were surprised by that or not, but again, CFO, financial comment, that's my area. It's not an IT issue. It was not a student development services issue. It was in my area of responsibility.

MR. GREENE: You think he's asking you a different question than the one he asked. He's asking you who was there and were there any discussions with anyone from the administration before the actual report came out.

MR. RUBOTTOM: Well, from the time they stopped talking to the state auditor in the exit conference until they heard from Chancellor Criser his extreme disappointment, was there any conversation among the higher administration?

THE WITNESS: Nothing that I recall of any great significance.

MR. RUBOTTOM: Okay.

THE WITNESS: Nothing I recall of any great significance, because it all came down on me after the chancellor's call.

MR. RUBOTTOM: That's what we understand.

Now, when -- you were beginning to talk about how the leadership responded to you after that, the board meeting on the 6th, the governor's meeting on the 13th, those are all highly publicized.

THE WITNESS: Right.

MR. RUBOTTOM: We watched most of them. Carine came down to the September 20th meeting herself.

But in that timeframe, would you say that the focus of the board of governors was on understanding how it happened or would you say that their focus was on finding people to blame or neither?

THE WITNESS: Both. I would say both.

MR. GREENE: Tell him about the conversations that you had with them about your request you be allowed to appear at the BOG meeting on the 13th, all the things they were telling you.

So step back, take a breath, hold on. Take a breath, and now tell everything that happened before you resigned and the things you were being told.

THE WITNESS: Well, I was called to a meeting

right after that, but prior to a board meeting, a board of trustees meeting, by Grant Heston, who is the chief public relations officer for the president, his chief of staff and PR guy, and Scott Cole, who is the legal counsel to the president, who I believe sees his first duty is to protect the president.

They asked me at the board meeting the next day, what would I say, what would I do? And I went through some stuff with them.

And apparently they decided it was best if I didn't show up at the meeting, because I thought it would be important for me --

MR. GREENE: What meeting?

THE WITNESS: The board of trustees' meeting. It was very important for me at that time, since I could see I was starting to get accused of a lot of stuff, to explain why we did what we did.

It still hadn't sunk in, the reported illegality of it. It was the -- I didn't think people truly understood why we did it and how important it was to have done that, and I wanted to talk about that.

Well, anyway, they told me it would be best if I didn't come to the board of trustee's meeting. So

I never got a chance to answer questions or say anything to the board of trustees.

Following that --

MR. RUBOTTOM: Excuse me. That was a September 6th meeting, that first meeting?

THE WITNESS: It was the first meeting right after whatever date that was.

MR. RUBOTTOM: Okay.

THE WITNESS: And then following that, we were going to have -- there was a board of governors' meeting; right?

MR. RUBOTTOM: The 13th, I believe.

THE WITNESS: And it was suggested at first that I not show up. They said it's going to probably be kind of ugly; it's best that you're not there. I know I wasn't understanding that exactly.

And I said okay, and then I started thinking about it, and it didn't make any sense to me for me not to be there. First of all, I didn't want to make it appear that I was afraid to be there, because I wasn't.

The second part of it was, I started to not believe that they would explain anything about the circumstances, why we did it or that we didn't understand it was not legal.

And so I thought, this is a two-day meeting. And so right at the beginning of the first day, I guess it was, I called some of the people who were already down at the meeting site in Sarasota. And I called to talk to Scott and say that I would like to attend that meeting, even though they said they didn't think I should be there. I thought it was important that I show up at that board of governors' meeting so that I could explain some of those things.

And he said, no, the president doesn't want you there. But I said I think I should be there.

And he said if you show up when the president told you not to, it's going to be an act of insubordination.

Well, that means you get fired instead of resigning; didn't sound like a good choice.

And so he said, do you want to talk to the president about it? And I said yes.

So he put Dr. Whittaker on the phone. Dr. Whittaker repeated he didn't think it would be a good idea for me to be there. It wouldn't be good for UCF if I was there. It wouldn't be in the best interest of UCF for you to be there.

And I said, well, it could be in my best

interest because they're going to be talking about me, and I'm subject to losing -- well, I'm losing my job over it and everything. So it's important to me to be there.

And he said something about, well, I'll try to keep it -- I'll keep it away from you being fired in the meeting, but I don't want you here.

So what was I going to do? So I didn't. I watched it on the computer screen like everybody else did and was appalled at what I saw.

After the meeting was over, I think he was in a break room with some of the board members afterwards, and they were asking is this person that had been vilified -- me -- still on the campus?

And so he left the break room, called me on his cell phone, and said, they are giving me a lot of heat about you being there. I want you to -- I think we should up your resignation to right now.

So 15 minutes later, I left my office, and that was it, the end of a 22-year stint at UCF. Plastic bag in my hand with pictures of my wife. It was -- it was pretty brutal.

MR. RUBOTTOM: I understand.

Between the Criser phone call and that September 13th BOG meeting, did you have any

conversations with BOG staff about what happened, why it happened?

THE WITNESS: I talked to Chris Kinsley because I was afraid the story about why we were doing it wouldn't be told.

So I went over it with him, but he was not allowed to speak at that meeting. He normally gave the introduction to the facilities committee about what they were going to talk about and all that. So when I was watching it on the screen, I was surprised that he didn't do it.

And I called him ahead of time saying I wouldn't be there, but at least can you make sure people know why we were doing this, that we had a dangerous emergency situation on our hands.

MR. RUBOTTOM: Thank you. Thank you.

But they never reached out to you in that timeframe?

THE WITNESS: No.

MR. RUBOTTOM: Okay. Let's go back a week. Leading up to the September 6th, which I believe is the emergency meeting of the board of trustees, between the Criser phone call and that meeting, did any trustees reach out to you and ask how did this happen, why did this happen?

THE WITNESS: No.

MR. RUBOTTOM: Did you reach out to any of them.

THE WITNESS: Yes, yes. I don't remember the timeframe, but -- you know, down to the day.

MR. RUBOTTOM: Right.

THE WITNESS: But I reached out and I was in some meetings where one or two or three of the -- like one of them was David Walsh, another was Bob Garvy, and one was Mr. Lord, John Lord.

MR. RUBOTTOM: Who would have called these meetings?

THE WITNESS: One was a medical school meeting. It was totally unrelated to any of this.

MR. RUBOTTOM: Okay.

THE WITNESS: All three of these things were totally unrelated situations. They happened to be there, I happened to be there. And I was feeling that they didn't understand what had gone on with the -- they had heard me saying before there would be an audit comment.

And I was feeling really bad about everything that had happened at that point, and I wanted to make sure they understood the rationale, even though it had been talked to them before. I just felt

obligated, because I had respect for these guys, to at least talk to them about what had happened.

MR. RUBOTTOM: Thank you. I think Carine has some more questions about some of those interactions later. I just wanted to get the context within the framework of these meetings where --

THE WITNESS: Right.

MR. RUBOTTOM: -- your work was discussed.

THE WITNESS: Right.

MR. RUBOTTOM: One other thing: Did you watch the video or a recording of Scott Cole's presentation on the 6th where he went through the history of the project?

THE WITNESS: No.

MR. RUBOTTOM: You've never watched that?

THE WITNESS: No.

MR. RUBOTTOM: So have you reviewed the agenda items that were published for the 6th?

THE WITNESS: I probably did, but I don't remember it.

MR. RUBOTTOM: If you had, I was going to ask you if you disputed any of that.

On the 6th, he indicated that refunding had already occurred. Are you aware of any refunding of E&G that had occurred prior to September 6th?

THE WITNESS: No.

MR. RUBOTTOM: Are you aware of any planning of refunding prior to September 6th?

THE WITNESS: The first -- the first comment about refunding came up in the actual exit conference when Kathy Mitchell was -- she was one of the ones attending the exit conference, and she asked the auditors, is a potential remedy for this to replace those funds?

And they responded that they're just making the report up the chain. They will have to get back with us about responses to that.

MR. RUBOTTOM: But to your knowledge, between April when the questions started being asked and that, did finance and administration then begin to think about that possibility?

THE WITNESS: Oh, oh. When they started getting the questions that was leading to the potential that we didn't know it was wrong and they were saying it was, they started looking at some of the planned expenditures with carryforward money and started to reverse -- to replace some of that, yes.

That was in response to their -- the inquiries and where the audit was going, they felt like that was going to be an audit comment and we might as

well start taking some corrective actions now.

MR. RUBOTTOM: When you say they --

THE WITNESS: That would have been finance and accounting.

MR. RUBOTTOM: And who particularly?

THE WITNESS: It would have probably been Tracy and Christy.

MR. RUBOTTOM: Okay. Thank you. I'm sorry, Carine. I know we'll get back to some of that again later.

MR. GREENE: I'm sorry for interrupting.

BY MS. MITZ:

Q. Okay. I want to ask you some more questions about President Whittaker.

So at any time during discussions between the two of you after the BOG call, did he express any disappointment in you or did he appear upset or even accuse you of having misled him?

A. No, no. I could tell he was not happy -- not happy is not the right word. Let me rephrase it.

He was concerned about the criticism.

Q. But he never outright accused you of having misled him or not informed him of what was going on?

A. That all came later.

Q. Okay. So apparently, President Whittaker

contacted Trustee Walsh at some time while Trustee Walsh was in England. I don't know what time that was. I'm suspecting it was after the BOG call.

And it's alleged that President Whittaker told Trustee Walsh that he had signed documents authorizing the use of E&G funds for the Trevor Colbourn Hall project, and that he was furious with you because you had -- you basically tricked him into signing that form.

Number one, do you know when Trustee Walsh was in England so I can figure out when this phone call would have happened?

A. And so the fairytale began. I don't know when he was in England and I don't -- I was not told about that particular conversation, and I did not -- I did not.

Q. Do you know what form President Whittaker would have been referring to?

A. No, I was not privy to the conversation so I don't know what they were talking about at all.

Q. Did he ever tell you that you tricked him into signing a form?

A. No.

Q. Okay.

A. Nope.

Q. Did he -- did Provost Whittaker start

discussing the university budget immediately or almost immediately after joining UCF?

A. He was very interested in the budget, yes. The way it works at UCF is that the president looks to the provost to be the number two-person on the campus, the chief academic officer, and also the chief budget officer.

And so he was interested in budgets, and over time made moves to get more involved, like, for instance, with Tracy Clark who reported to me as an associate vice president. He came to me and wanted to split her responsibility between me and him.

And so we gave her another title that's so long I can't remember it, but he -- he wanted her to be able to tell him about budget matters in some great detail. And I know they met quite frequently after that.

Q. Did you ever object to that request, that she start reporting to him as well?

A. I had concerns about it that I expressed and we talked about it.

And I said I've had dual reporting relationships before; they often don't work out. It will only work if the people involved want them to work and we are cooperative about it. And I felt that -- that with Tracy and me and Dale, we could make it work.

But I had trepidation about it.

I think in one of Tracy's annual evaluations, I wrote that in there that initially I had reservations about the dual reporting, but it appeared that it was working out well and so my concerns were alleviated. I said something to that regard in an annual evaluation of Tracy's.

Q. Okay.

MR. GREENE: Do you need a break? Do you need the bathroom or anything? You're not chained to your chair.

MR. RUBOTTOM: I'm going to need one in about 15 minutes.

MR. GREENE: Good.

MS. MITZ: Okay. I'll keep moving then.

MR. RUBOTTOM: Are you okay, Carine?

MS. MITZ: Yes, I'm fine. I can wait 15 minutes. Yes, I'm good. Thank you.

BY MS. MITZ:

Q. So Mr. Merck, did Provost Whittaker ever seem intimidated by you --

A. Oh, no.

I'm sorry for interrupting. I'm sorry for interrupting. No.

Q. Okay. Did he sometimes challenge your ideas or

your position?

A. Not really.

Q. Did he ever question you or your decisions?

A. No, not that I recall.

Q. Okay. Did he seem to grasp the budget information that he was being provided when he first came on board?

A. I can't answer that. I don't know what he was grasping versus what he was told or given.

Q. Okay. In discussions that the two of you had, did he ever refer to his experience at Purdue working with state-appropriated operating funds?

A. No. If he did, it was in general terms, not that specific. I don't recall it.

Q. Okay. Did you -- when you used the term or hear the term carryforward, what does that mean to you?

A. It means leftover -- leftover operating money from the prior year.

Q. And when you say operating money, do you mean E&G?

A. In the context of carryforward, yes.

Q. Are there other carryforward funds in university accounts?

A. Yes. There would be a carryforward, say, in some of the auxiliaries, like the housing budget would

have money left over in the housing budget that would carry over to the next year or the parking services budget would have money left over that would carryforward.

But in the context of carryforward in the meetings that we were talking about here, it was E&G.

Q. And so with Provost Whittaker regularly attending those meetings, would you expect that he, too, would have understood that the term carryforward meant E&G carryforward?

A. Yes.

Q. Did he ever express any confusion about the term or ask what does that mean?

A. No.

Q. What does the university's annual budget include? Does it go beyond the academic budget?

A. The annual budget of the university last year was right at $1.8 billion, and that's a little hard for people to grasp, and that's why we have the meetings with the trustees to go over it. And I could elaborate on that if you want, but I don't know that it would help.

Q. No, I don't think that's necessary right now.

MR. RUBOTTOM: Let me ask. I think our question goes to when you refer to the budget

responsibilities of the provost, which I take means Waldrop, before. This is just --

THE WITNESS: Right, right.

MR. RUBOTTOM: -- how Dr. Hitt ran the university.

THE WITNESS: Exactly.

MR. RUBOTTOM: So those budget responsibilities, obviously, they entailed academic budgets, the E&G budget. Would that include the auxiliary budgets?

THE WITNESS: At a high level, yes.

MR. RUBOTTOM: Would that include the capital budgeting at a high level?

THE WITNESS: Yes, absolutely.

MR. RUBOTTOM: Okay. Would that include the non-academic operational -- I assume there's got to be some plant, physical plant operation that's not necessarily --

THE WITNESS: Right.

MR. RUBOTTOM: -- designated as academic, infrastructure.

THE WITNESS: I'm thinking about that. I'm not quite sure how to answer because I'm not quite following the question.

MR. RUBOTTOM: Well, there's nothing that goes

in to the entire budget of the university that's not under that umbrella you described in the provost office; is that correct?

THE WITNESS: Correct, yeah.

BY MS. MITZ:

Q. Did at any time Provost Whittaker try to distance himself from having responsibility over the university's entire budget and just claim responsibility over the academic budget?

A. I think that really became clear after the audit and after the chancellor was expressing displeasure. I think that's when that distancing began in earnest, yes.

Q. Okay. All right. Did the provost have approval authority over the operating budget presented to the board of trustees?

A. He recommended -- well, my role was in recommendations, not decision making. He and the president would make the decision, but usually it was the provost's recommending it to the president, but the two of them would make the decisions as to what would go before the board of trustees.

Q. Did the provost have approval authority over proposed capital projects?

A. Only to the extent that he would be part of

formulating the recommendations that would go to the president, that he presented to the president and went to the board. But he was intimately involved in the process, yes.

Q. Okay. And did he have approval authority over the source of funds for capital projects?

A. That's a complicated question. It depends on the project and what's -- what we're talking about. If it was -- if it was a PECO project, the legislature decides what we're going to get and appropriates it. So he wouldn't be in an approval process there.

If we were issuing bonds for housing or something like that, he wouldn't be in the approval process for that.

When it comes to money that comes in, say for purposes of making this simple, in a lump sum from the state and its apportioned among the different entities on the campus, yes. He's involved in approving those things, how it's distributed internally.

MR. RUBOTTOM: Let me ask a follow-up to that, Carine.

Would he also be -- have approval authority over any E&G -- any central reserve E&G commitments to capital projects?

THE WITNESS: He would be -- he would be

intimately involved in the discussions among -- well, repeat the question. I'm starting to lose my answer.

MR. RUBOTTOM: Would he have approval authority over any commitments of central reserve, E&G carryforward to a capital project?

THE WITNESS: Yes.

MR. RUBOTTOM: And then it's my understanding that the university earns overhead from the auxiliaries --

THE WITNESS: Right.

MR. RUBOTTOM: From the various services that are provided --

THE WITNESS: Right.

MR. RUBOTTOM: -- and that those revenues are seen as kind of an enterprise revenue or whatever, but they don't have strings attached, like E&G or PECO.

THE WITNESS: Left over E&G, correct.

MR. RUBOTTOM: So those are revenues that are in the big mix.

Would the provost have approval authority over commitments of those funds to -- to a capital project?

THE WITNESS: Yes, yes.

MR. RUBOTTOM: Thank you.

MR. GREENE: Is this a good time to take a break?

MR. RUBOTTOM: It probably is.

(Brief recess.)

MS. MITZ: Back on the record.

BY MS. MITZ:

Q. Mr. Merck, I would like to ask you a little bit about Tracy Clark. How long had you worked with her prior to her taking on the additional responsibility of reporting to Provost Whittaker?

A. Oh, gosh. I can't tell you exactly. I think probably -- I'm guessing maybe four years before, maybe four or five years -- four years before we split the role.

Q. Okay. Can you describe her as an employee?

A. I can't say anything but good things about her. She is very intelligent. She is -- knows accounting, a good personality, easy to work with.

She does the work of two people. In fact, that's one of the things that I am really sad about when I hear that the president is getting rid of Tracy and Christy Tant, because between the two of them, they seriously do the work of four people. They are just absolute assets to UCF.

Q. So knowing the type of employee that she was, would you have expected her to fully explain and educate Provost Whittaker on budgetary matters or documents that she provided him so that he would be knowledgeable and prepared to discuss them?

A. Absolutely. No doubt in my mind.

Q. Did you ever instruct Ms. Clark, Ms. Tant or any other employees to withhold information from Provost Whittaker?

A. No, never.

Q. Did you ever instruct any employee to withhold information from anybody?

A. Nope, nope.

Q. Did Ms. Clark ever discuss her meetings with Whittaker with you?

A. If she thought I needed to know the information they discussed, she would. She liked to try to keep us both informed of important things, so it depended on the importance of the topic.

Q. And do you know whose idea it was to form the facilities budget committee?

A. It was Dr. Whittaker's.

Q. Okay. And was it also his idea to resurrect the university budget committee?

A. I'm hesitant. I'm hesitating because it was,

but it might have been with input from the president.

Q. Okay.

A. But he was the one that implemented it.

Q. All right. Well, did either one of those committees remove any budget powers from you?

A. Well, my role is really recommending things, not approving things at that level. So it didn't take any of my input away.

Q. Very good. Okay.

Did the provost have approval authority over all the budget decisions made in the budget chat meeting and the meetings of the university budget committee and facilities budget committee?

A. There's really two parts to my answer on that. One of them is if it were smaller things, like in the hundreds of thousands, a few hundred thousand dollars, he would decide and implement things. If it gets into the millions, he should and I believe he did go to the president for approval for those things.

Q. Okay. Do you recall any time when you took something over Provost Whittaker's head to the president to override Provost Whittaker?

A. I'm thinking, and I'm not coming up with -- I'm not coming up with anything, no.

Q. Okay. Did you ever discuss using E&G funds for

other capital projects with President Whittaker?

A. In the -- in the budget meetings when we were looking, this university budget committee, the one that you just mentioned that he reinstituted, when we would have a big meeting, we would talk about what our needs were that would bubble up from the deans and the other vice presidents.

And then we'd look at the resources that were available to meet those needs. There would be a mix of things like E&G carryforward or the overhead dollars or state appropriated -- you know, we looked at all of the revenue sources and then planned expenditures all as a group like that. And so he was intimately involved in all of that.

Q. Okay. Do you recall a time when Provost Whittaker offered funds from his -- from the provost budget to be used to fund CREOL, the CREOL Building?

A. It seems to me I've seen something later about that, but I wasn't really focused on that particular project. There -- in the things that I do with facilities, at any given time we probably have close to 300 minor projects that are under way, and we'll have two or three, depending on the year, large projects that I'll get involved in.

And that CREOL project fell kind of in the

middle there, and I didn't really pay much attention to it. It was something the budget committee wanted to do, and if the provost volunteered money from his budget to accomplish that because of his interest in research, that easily could have happened.

Q. Okay.

A. I wasn't -- I wasn't personally involved in that one.

Q. Okay. Do you know who directed that E&G funds be transferred for the band building?

A. That one was one that I was involved in, unlike CREOL. The problem was expressed to me by the dean of the College of Arts and Humanities. They were undergoing an accreditation review at the time, and the accrediting members -- the body of the accrediting group had told them that we had an unsafe situation for our band members practicing on the field on the south side of campus. In the season of the year when they practice, there were frequent thunderstorms, lightning and thunderstorms, and there was no close-by place for them to get out of inclement weather.

And they had said that if we don't have a plan, a way to get a shelter down there to prevent them from being harmed, that we could lose our music accreditation.

So I know I talked with several people. I'm sure I talked with the provost and the dean, and then there was no -- there was an urgent situation. There was no real money available. So Lee Kernek and I pooled some money from our two budgets. We might have gotten a little bit from one of the deans to build the band shelter, and avoid a negative accreditation report.

And everybody was really thrilled with the outcome. Provost Whittaker did kind of a ribbon cutting ceremony down there and praised everybody that was involved, including me. I wasn't there, but he did that.

I know I felt good because the band members, after, they took two base drum heads and had all 300 members of the band sign -- autograph the drum heads, and gave one to me and one to Lee as thank you for getting them out of the situation they were in.

MR. RUBOTTOM: And Carine, let me interrupt for just a minute.

Mr. Merck, just to save time, we appreciate all of the sound reasonings for doing the projects. We understand the needs of this university over the past -- during this growth the past 20 years. We understand all those pressures were there.

We're really trying to get just to the issue of

who was making decisions how to fund those projects and when those decisions were made vis-a-vis transactions. So I don't want to discount at all the validity of all of the policy reasons for doing the projects, but it's going to save us some time if we can just save those -- those narratives. I appreciate them, but I want to get home tonight, so.

THE WITNESS: Okay. I understand. I understand and I appreciate that. You'll have to forgive me because I just get exited when some of these projects that I was so intimately involved in, I am so proud of the way they turned out, and so happy that we were able to solve a problem, I can't resist talking about them, but I will do my best in the future to do that.

MR. RUBOTTOM: Thank you.

BY MS. MITZ:

Q. Do you know who directed the transfer of E&G funds for purposes of building the Research 1 building?

A. Here again, it would have been a discussion in our small group, I'm sure, between the provost, me, Tracy, Christy, and so that would have been -- the provost would have been the one involved in that. His interaction about the president on it, I don't know.

Q. Okay. How about the Center for Emerging Media?

A. I'm not really familiar with that one.

Q. Okay. And the downtown campus infrastructure?

A. There would have been a number of us involved in that one. I'm trying to couch my answers so I don't give you a story that will take time.

But to be as concise as I can, that project was initially going to be a $60 million project. It was one that the legislature said we'll give you 20 million, if you come up with 20 million philanthropically and 20 million out of your budget. They didn't specify what budget or anything, just out of your budget.

And so that was there. And as the project progressed, there were some infrastructure needs that were above and beyond that. So we had to figure out how to get water, sewer, some of that kind of stuff all incorporated into it.

And so while I was involved in the discussions of what to do and that sort of thing, I wasn't directing money to be transferred from any particular place to do it.

Q. Okay. How about the venue?

A. I'm not that familiar with that particular project. Can you be more specific about what was happening?

Q. That's all I know. I don't know what the venue

is. I just know it's called the venue.

A. Okay. It's -- it's an attachment to the convocation core that is a university-owned asset. It does not belong to a DSO or anything.

Q. Okay. But you don't recall having any involvement in the transfers of E&G funds to that construction account?

A. No. I'm not trying to get out of anything. I just don't recall. It is not on my radar as something that I would have been that much involved in.

Q. Okay. Well, the same question for the main campus district energy plant. Do you know who directed the transfer of E&G funds for that project?

A. It would have been another one of those discussions among a number of people that were looking at budgets, available resources against what we were trying to accomplish.

And having been away from there since September 13th, when they talk about -- now when they talk about the district energy plant, I'm not sure which -- what they're talking about exactly. There was a plant to produce chiller water on the north side of campus. Is that the one they were talking about?

Q. I'm not sure.

A. Yeah. If so, it was one of those necessary

things to not allow -- so we did not allow air conditioning to fail on the north part of the campus. And the building part of that was more metal and brick facade to cover equipment. It was primarily chilling type equipment that the expenditure was for, if that's the one they're talking about.

Q. So that's something that would have been discussed at the UBC meeting?

A. Yes, yes. In fact, our energy person made a presentation to the UBC about the need for it and the things that would happen if we didn't meet that need. So it was discussed in detail.

Q. So it sounds like that project, the district energy plant, along with Research 1 were discussed in the UBC meetings?

A. Right.

Q. So is it proper for me to assume that Dale Whittaker, as provost, was present?

A. Absolutely, yes, no -- no question about that.

MR. GREENE: Let her finish her questions. You're talking over her a little bit.

BY MS. MITZ:

Q. And he also heard that E&G funds were going to be transferred for purposes of those projects?

A. I don't know if he heard it, but I'm sure he

saw it on written documents that were provided to him by facilities and accounting.

Q. Okay. So, I have two more projects to ask you about. The Global UCF Building, do you know who ultimately directed transfer of E&G funds for that project?

A. I understand your question, but let me -- and I don't want to get into a story here, but that particular building was funded -- it was a $16 million project. The bulk -- all of the construction funds came from earnings on our equities in our investment portfolio. The money that came from E&G was for furniture, fixtures, and equipment that were placed in the building. And as I understand today, that is an acceptable use of E&G funds.

Q. Okay. All right. And we've already talked about CREOL, so we don't need to talk about that one again. Let's see here.

MR. RUBOTTOM: Carine, I've got the transfer list up. Can I just go through those three downtown projects?

MS. MITZ: Sure.

MR. RUBOTTOM: Okay. I think Kathy pulled together E&G transfers into construction probably during the September, October period or at some

point maybe in early September.

And Bev Seay made a major presentation to the board about that last -- at the last, I think, the September 24th meeting. I don't know if you followed that at all.

THE WITNESS: I didn't.

MR. RUBOTTOM: The last big transfers like that were all on October 31st of 2017. There's 4.8 million for downtown campus infrastructure, which I think you might have just discussed the project. There was 11.5 million for the downtown central energy plant, and there was 5.4 million for downtown student center.

So with those -- all of those commitments -- we haven't talked about the commitments list yet, but all of those commitments prior to those transfers in October, would all of those commitments have been made by the university budget committee or be reviewed by the university budget committee before those decisions were made?

THE WITNESS: Yes, except I'm not certain about the student center thing that you mentioned.

MR. RUBOTTOM: Okay.

THE WITNESS: That one I am not clear on, but the rest of them would. Thad Seymour, T-H-A-D,

Seymour, S-E-Y-M-O-U-R, was the person, the associate provost that was responsible for the downtown campus.

And so he would have had a lot of conversations with the provost about some of the things happening down there and been involved in a lot of the recommendations for that.

MR. RUBOTTOM: I'm sorry. I zoned out. Did you say he is the provost for the downtown campus?

THE WITNESS: He reports to Dale. He's an associate provost, and his --

MR. RUBOTTOM: So he reported to the provost last year?

THE WITNESS: And his responsibility was to oversee the construction -- well, when I say construction, I don't mean the brick and mortar project of it, but oversee the scheduling and working with Valencia College and our academic people about what's going in there, just the whole operation.

And he had people under him that were looking at the budget needs to complete all of the facilities, so.

MR. RUBOTTOM: But those issues -- you would have expected those issues were brought up in the

university budget committee?

THE WITNESS: Yes, except for I just said I don't recall that student center piece.

MR. RUBOTTOM: Let me have a couple more follow-ups on some of the things that we've -- that you talked about.

I think that Carine asked you about the level of approval authority the provost had, and I took your answer to mean that he might have had a delegation up to a certain amount, but the president would have had final authority on those larger things.

THE WITNESS: Right, basically.

MR. RUBOTTOM: You've described your role as recommending?

THE WITNESS: Right.

MR. RUBOTTOM: Others have described your -- the role of both of you in the university budget committee as co-chairs of that committee?

THE WITNESS: Right.

MR. RUBOTTOM: That you co-chaired that group.

THE WITNESS: Right, right.

MR. RUBOTTOM: So those major decisions that the provost wouldn't have had any kind of delegation from the president, would you consider those

proposals to be joint recommendations of yourself and Dr. Whittaker --

THE WITNESS: I didn't dis --

MR. RUBOTTOM: -- to the president?

THE WITNESS: I didn't disagree with anything. The provost would be the one that would actually make the recommendation to the president based on everything that happened, and I supported the recommendations.

MR. RUBOTTOM: Okay. And then finally, we watched a video of yourself and Dr. Whittaker in front of the BOG. There was a facilities workshop in, I think, October of 2017.

THE WITNESS: I'm sorry you had to watch me on video.

MR. RUBOTTOM: Well, I hope you're not watching me on video.

And you were discussing the Research 1 project, which was almost through, and you were making a plea for PECO.

And they were -- I think Chair Huizenga was questioning, and some of the trust -- the governors, the way this is already built, why should we give you PECO?

And I believe you said that, well, we've

actually funded this with some internal loans in the university, and if we are given the PECO money to pay for the project, we'll be able to repay those internal loans, and be able to -- it sounded to me like you were talking about research --

THE WITNESS: Yes, yes.

MR. RUBOTTOM: -- goals.

Would all of those loans that you were talking about that day have been from research funds, grant and research type funds? Would any of those loans have been -- let me just ask it that way. Would all of those have been research revenues?

THE WITNESS: Probably not all together. It was kind of open-ended. To save time, I'll try to make this short.

MR. RUBOTTOM: That's fine.

THE WITNESS: But we had an extreme shortage of square footage in research needs on the university campus. We were hiring faculty hand over fist, a lot of whom had research commitments to make, and we were out of space altogether. So we weren't getting the PECO money, so we figured out how we could do that Research 1 on the campus and get everybody in it, but it didn't nearly cover all of the needs.

So if we could have gotten PECO money to repay

what we had internally done on that, then that would have freed us up internally the same kind of way to do some kind of internal borrowing or something, unknown at the time, but something to get another research building that we desperately needed.

So sometimes we talk about using these internal funds so early we're not defining exactly what they will be at that moment.

MR. RUBOTTOM: But at that point, a building was almost completed, so you had taken cash from somewhere?

THE WITNESS: Yes.

MR. RUBOTTOM: Were any -- is it your recollection, were any E&G accounts used there?

THE WITNESS: That would be a Tracy Clark and Christy question. I don't know.

MR. RUBOTTOM: Would any investment earnings have been used for that project?

THE WITNESS: It's possible.

MR. RUBOTTOM: Okay. We're going to talk about investment earnings in a minute.

THE WITNESS: Okay.

MR. RUBOTTOM: Okay. Carine, are we done with the other projects?

MS. MITZ: Yes.

MR. RUBOTTOM: Okay.

MS. MITZ: Yep.

BY MS. MITZ:

Q. So Mr. Merck, I want to go back to the statement that you made in Provost Whittaker's presence about -- about the possibility of an audit comment for the use of E&G funds in relation to the Trevor Colbourn Hall building.

A. I don't know how he could not have heard me talk about that since I talked about it so frequently, including at a board meeting.

Q. Did he ever ask you what that meant?

A. No.

Q. Did he seem confused?

A. No.

Q. Okay. Did you -- prior to making that statement, did you ever have discussions with Provost Whittaker about the auditor general and how they routinely conduct audits of universities?

A. I don't recall any conversations like that, but anybody that works in a university is pretty familiar with the way that works; any university, not just UCF.

Q. Right. I would imagine that would include universities outside of the state of Florida, too?

A. Absolutely, particularly if they are public

institutions. We all have similar state audits, financial audits and operational.

MR. RUBOTTOM: Carine, let me --

BY MS. MITZ:

Q. Do you have any recollection of him discussing audits being conducted while he was at Purdue?

A. I never had a conversation with him like that.

MR. RUBOTTOM: Carine, let me ask something on that real quickly.

Have you ever heard an academic equate an audit comment to an accreditation type comment?

THE WITNESS: No; two separate animals.

BY MS. MITZ:

Q. I mean, accreditation means you're asking for something, right, you're seeking accreditation?

A. Yeah. You're asking -- well, if you've been accredited, whatever the body was that gave you the accreditation usually comes back periodically, maybe every five or ten years to review what they accredited before to make sure they want to allow you to keep that accreditation.

Usually, you seek it in the beginning. If you have a program that's not accredited, you ask the accrediting body to come in, do an assessment. And if you meet their criteria, you will become accredited.

Q. Okay. All right. So what I would like to do now is kind of explore your knowledge of former Chairman Marchena.

What was your relationship with him? Did you work with him often?

A. Not extremely often, no.

Q. And I know earlier you said that you worked closely with him or maybe more closely with him when he became the chair of finance and facilities. He's an attorney; right?

A. He is an attorney.

Q. Did you ever witness him to or have knowledge of him offering his legal training and experience to assist either staff, administration or his fellow trustees?

A. Not legal training. He -- he opined often on how he thought we should bid out capital projects, and he professed to be an expert in concessions when we were doing concession contracts.

Q. Okay. Are you aware of what he practices, what types of law?

A. No.

Q. Would you describe him as a trustee who did his homework and was usually prepared and knowledgeable of the issues that were coming before him?

A. Selectively is the way I would say that. Things that were of interest to him, like the -- like the College of Medicine or when we were entertaining taking over Sanford Burnham, things like that, he would be intimately involved in. But just general? Not so many.

Can I go back to your earlier question? I know he is -- his -- him personally, I don't know. His staff, I know, have advised clients on things like small business, airport operations, things like that. But I'm not familiar with the niche that his firm involves overall.

MR. RUBOTTOM: Carine, let me ask this.

Did you know that he was general counsel for the Airport Authority?

THE WITNESS: Yes.

MR. RUBOTTOM: And in that role, he would have had some interaction with major facilities and --

THE WITNESS: Airports, yes.

MR. RUBOTTOM: -- colors of money --

THE WITNESS: Yes.

MR. RUBOTTOM: -- federal money, state monies, revenues.

THE WITNESS: Absolutely.

MR. RUBOTTOM: Operating revenues.

THE WITNESS: Yes, absolutely, yes. No question about that.

BY MS. MITZ:

Q. All right. As a board member, did he appear to be shy about asking questions?

A. No, just the opposite.

Q. Was he shy about voting against matters he wasn't comfortable with?

A. Not at all.

Q. Was he shy about complaining?

A. About complaining?

Q. Yes.

A. No, not shy about complaining.

Q. Do you recall an instance when he actually came to you or somehow you got wind of a complaint that he had about facilities, which led to an audit of that department?

A. I do.

Q. Okay. And what, if you could just state briefly, what was his complaint related to facilities?

A. He -- he had, I believe, heard that some of the people that he had worked with in other venues weren't getting work at UCF. And I think they had told him that they believe they weren't getting the work there because the people that were getting the work were getting

favorable treatment or were offering some sort of kickback or some word like that, none of which was true, but somebody had whispered that in his ear.

He believed it, and he told me he would like to have that -- that work done.

He also had some -- some of his own ideas about how projects should be awarded through hard bid versus CM or some of those other type of delivery methods, design/build. He had very strong opinions about that, and I think in some cases he would disagree with Lee Kernek's way of doing it.

And these kind of comments come up periodically with any organization that invests a lot of money in construction. People that don't get the work always feel there's something nefarious going on and that's the reason they didn't get the work, so they complain about it.

And that had come up long before Lee Kernek was there. I've been there 22 years, and it comes up about every six or seven years. And I would get our internal auditors to go and do an investigation to see if there was anything to any of those claims, and it always came out negative, zero.

But he insisted that we hire somebody to look into it again, and we did. And they actually reported

in the board meeting that they found nothing in the way that anything was being handled incorrectly, in that sense. But they did have a lot of recommendations for how to improve operations, which was great, and we took those seriously.

Q. Okay. Did you observe enough of Chairman Marchena's interactions with Whittaker to be able to describe what kind of relationship they had?

A. No, but he did seem protective of President Whittaker. Other than that, I don't have an impression.

Q. When did you say you first noticed that he seemed protective of him?

A. Certainly when this audit came up. That became, to me, fairly obvious.

Q. Based on what?

A. Well, I felt like there was a concerted effort to shift any blame for anything that was being criticized to me, and to protect Dr. Whittaker from any -- any culpability or responsibility for anything that was going on.

And I just felt like the chairman was very much in favor of protecting the president, as I believed that the general counsel and the chief of staff were.

Q. Do you have any thoughts on the interim CFO, Mitchell? Do you think she has the same motive?

A. No. I worked with Kathy Mitchell for a number of years and I found her to be a very straight shooter, very straightforward, and she -- she believes that the university is a great place, as I do. And I think her motives are to do whatever she can to protect the -- not protect the university, that's the wrong choice of words -- to -- to advance the university's mission. And so I just wish her the best in this interim role.

Q. Okay. Do you know -- well, can you say whether Marchena appeared to have a good understanding of capital funding sources?

A. I would say yes.

Q. And do you know whether he was ever told about carryforward meaning E&G carryforward?

A. I don't know how he would have not known that.

Q. Okay. And what do you base that on?

A. Everybody else knew it. I mean --

Q. Okay.

A. -- it was --

Q. Do you remember doing one of those orientations with him?

A. I don't recall that specifically, no.

Q. Do you ever recall telling him directly that E&G funds were going to be used for either Trevor Colbourn Hall or any capital project?

A. I know we told him in one of the meetings that carryforward funds would be used for Trevor Colbourn Hall. That was in response to a direct question, and we have in some of the material, I think, a transcript of that meeting where we were going over Trevor Colbourn Hall, and he asked what the source of funds was.

Tracy Clark responded "Carryforward."

And I asked -- and this is on the transcript. I asked Tracy if she could explain it a little bit more. And she explained that it was basically the leftover money from the prior year and so forth.

Q. Right. I've seen that. I've heard it, too.

Okay. Do you recall any other trustee complaining about staff or an individual department?

A. No. Staff -- I mean, the trustees that I talk to felt like things were really well managed and handled. I had a number of conversations, for example, with David Walsh who was -- he told me quite a number of times how well he thought things were managed and run at UCF.

Q. Okay. So let me ask you a little bit about the board meeting.

What do you know about the process for recording the committee and board meeting?

A. I don't know. That's --

Q. Okay.

A. I don't handle that, so it's usually somebody in the president's office that lines that up for the recordings.

Q. So you don't know who actually did the recording?

A. No. I think it probably -- I shouldn't say I think. I don't know.

Q. Okay. So a number of trustees apparently reported during a Bryan Cave interview that you had come to them after Bryan Cave got involved or at least after the audit findings were released, and that you told these trustees that you would have never told them that E&G was being used because you knew that the board wouldn't approve it.

Do you recall making such a statement to any of the trustees?

A. I remember those conversations. I don't remember exactly what I said, but I can tell you for sure what I intended.

And that was I was still reeling from the accusations that were being made and the audit comments and the chancellor being upset and all of that kind of stuff.

And I had a lot of respect for Dave Walsh and

John Lord and Bob Garvy, and I saw them independently of some other meetings, and I wanted to express to them how important it was to do what we did, the danger to the students and so forth. I wanted to make sure they understood that part of it.

And I was trying -- I was trying to get across that -- that I felt that we were going to get an audit comment for what we did. And when I was describing that, I'm sure I mentioned E&G on that. But not because I thought it was illegal, but because -- I thought because of the size of the project it was going to get the audit comment.

I wish I had better prepared them for all of it. I don't think I communicated it very well, and they obviously took away from that something that I didn't really intend.

And if you really look at it, when I said -- I didn't tell them because whatever, they said we had done all that. They had gotten information, both written and in presentations, that showed E&G was being used -- E&G carryforward was being used.

So they knew. They had been told in writing and orally what we were doing prior to me making some comment about that, where I was trying to -- I was feeling really bad about being told I had done stuff

wrong and accused of all kinds of stuff.

So I'm sure I was not communicating it very well at that particular time, and I'm sorry they got what they did out of it.

Q. Okay. Let me point you to the second document in the packet that Don has there. It's like an agenda item for the May 22, 2014, board meeting.

Can you just take a look at that and let me know when you've had a chance to read it?

A. Item FF-4, up in the top right corner?

Q. Yes.

A. Yes.

Q. So my question is, if -- if most people equated carryforward with E&G, why did this background information refer to the funds as UCF nonrecurring funds and not carryforward or even E&G?

A. That's the way we refer to those kind of funds in all the documents in all the other projects that we worked with. It's -- it's a broader term. It means that they are UCF funds in the sense that they are not a new appropriation or they are not philanthropic or anything like that. They are some of our -- it's UCF money.

And nonrecurring, referring to the fact that in the case of carryforward, it's leftovers. It's not

going to be replaced by new funds in the following year. Use it for one-time expenditures because you're not going to get it back.

And so we use that term historically when we're describing these kind of things. That was not, as some would intimate, an attempt to conceal. It was not. It was normal.

Q. So do you think that you guys used the term nonrecurring more often than carryforward?

A. Probably.

Q. I'm sorry?

A. Sometimes, yes.

Q. Okay. All right. So we listened to the full board meeting that followed this May 22, '14 meeting.

Now, in that meeting, it seems like the funding discussion is cut short, and I believe it was by Trustee Marchena.

Can you say with any degree of certainty whether by May or June of 2014, Trustee Marchena had a clear knowledge that Trevor Colbourn Hall was going to be built with E&G carryforward funds if PECO funds were not available?

A. 2014, hard to say. Hard for me to say. That was four or five years ago. And I know nothing was being concealed from him, and any discussions we're

having about the funding were all being discussed. But I don't have a recollection of the specifics of what we were talking about there.

Q. Okay.

A. So if there's an intimation that we were trying to conceal something or not tell somebody how things were going to be funded, that's entirely erroneous.

Q. No. I mean, I'll tell you, it sounds like during the discussion that Chair Marchena kind of cut the conversation short, which left us wondering if maybe he knew it was carryforward and just wanted to move on and move the discussion along.

So if you don't recall, that's fine.

A. No, I don't.

MS. MITZ: All right. Don, do you want to address the replenishment questions?

MR. RUBOTTOM: But first I've got a couple of follow-ups.

When Tracy was dual reporting, did she ever share any concerns with you about Dr. Whittaker lacking interest in the budget information she was providing or lacking some capacity to comprehend what she was telling him.

THE WITNESS: I think it was the opposite. I think he was very interested in the budget

information she was providing, and I don't -- I didn't get the impression that there was any lack of comprehension.

MR. RUBOTTOM: And you would have gotten that information from her reports back, as well as you were all meeting in these budget chats on a regular basis.

THE WITNESS: Exactly.

MR. RUBOTTOM: And later the university budget committee.

THE WITNESS: Right. I absolutely didn't get any sense of non-comprehension, and I didn't get a sense of a lack of interest, either.

MR. RUBOTTOM: Well, nonrecurring and recurring is a concept that I do understand.

THE WITNESS: Okay.

MR. RUBOTTOM: Because it's talked about a lot at the capital when they are doing their budgeting.

And it's my impression, and I need you to correct -- is it accurate to say that nonrecurring is a much broader term than carryforward?

THE WITNESS: Yeah -- yes.

MR. RUBOTTOM: For instance --

THE WITNESS: I'm sorry. Yes.

MR. RUBOTTOM: -- if the university sold a

patent, those proceeds would be a nonrecurring funding source; correct?

THE WITNESS: It would depend on the -- on the contract and whether they were recurring or not.

MR. RUBOTTOM: Sold it outright.

THE WITNESS: It would be a nonrecurring revenue, yes, yes.

MR. RUBOTTOM: But you would never characterize that as carryforward?

THE WITNESS: No.

MR. RUBOTTOM: I'm just trying to establish, you agree that's a much broader term.

THE WITNESS: In our instance, it would have included carryforward, though.

MR. RUBOTTOM: I understand that. I think we all know how that building was built.

So -- but it's your representation that when you -- that all those categories of monies you would describe as nonrecurring in these kind of board documents, sort of?

THE WITNESS: Right, yes, yes.

MR. RUBOTTOM: Did you ever hear any questions -- I think you said earlier that the BOG has access to all these documents?

THE WITNESS: Right.

MR. RUBOTTOM: Did they ever question or ask follow-up questions about board activities?

THE WITNESS: No, not really.

MR. RUBOTTOM: Okay. So let's talk about -- we talked briefly about beginning efforts to replenish E&G accounts, and I think you indicated that Tracy and Christy might have begun working on that.

THE WITNESS: Right, when they heard the concerns of the auditors --

MR. RUBOTTOM: Right.

THE WITNESS: -- during that audit.

MR. RUBOTTOM: Were you, during that time, particularly keeping an eye out for available cash to replenish those funds with?

THE WITNESS: Not me personally.

MR. RUBOTTOM: That would have been their initiative?

THE WITNESS: Well, they were the ones that had the most knowledge of where the replenishment funds were or could come from, because that's what they worked with every day.

MR. GREENE: Let him finish his question. You keep talking over him, and let him -- let him get it out.

THE WITNESS: I get excited. I'm sorry.

MR. RUBOTTOM: I understand, believe me.
I know you've become a little bit acquainted with BOB-2 forms in the recent months based on your letter.
Were you always very familiar with the BOB-2 form that attached to the capital improvement plan submitted, the five year capital improvement plan submitted to the BOG.
THE WITNESS: Yes.
MR. RUBOTTOM: What is your understanding of the purpose of the BOB-2 listing?
THE WITNESS: I want to make sure that I'm -- BOB-2, in my understanding, is the same, because -- have you got a copy of what we're talking about? Is it the one where we show our priorities, all of our projects that we're submitting for consideration?
MR. RUBOTTOM: The capital improvement plan that lists the -- that lists the PECO requests.
THE WITNESS: Right.
MR. RUBOTTOM: Direct requests --
THE WITNESS: Right.
MR. RUBOTTOM: -- for this year and the next five years.
THE WITNESS: Yes, yes.
MR. RUBOTTOM: That's, my understanding, the

main capital improvement plan. There used to be three; now there's two attachments to that.

BOB-1 is -- my understanding, is the bond-funded projects.

THE WITNESS: Okay.

MR. RUBOTTOM: So that is submitted to obtain legislative approval of that category of projects.

THE WITNESS: Right.

MR. RUBOTTOM: BOB-2, the heading is something to the effect of -- I don't know if I have one in your documents, but --

THE WITNESS: Other sources?

MR. RUBOTTOM: I think it's -- it's requests for projects that are being built with other sources, but that anticipate a claim of E&G plant operation and maintenance --

THE WITNESS: Right, right.

MR. RUBOTTOM: -- funds after the building is built.

THE WITNESS: Right, right, right. I'm with you.

THE REPORTER: One at a time.

THE WITNESS: Sorry.

MR. GREENE: Wait for him. Don't go "right, right, right." Wait for him to finish his question.

Listen to it.

MR. RUBOTTOM: So the BOB-2 is the one that in 2015 and 2017 and 2018, Trevor Colbourn Hall was on that list all three years showing E&G as a funding source.

That form has about five columns of information, or six. The most interesting one is the PO&M expectations --

THE WITNESS: Correct.

MR. RUBOTTOM: -- that our staff has to begin to build in, forward-looking to recurring demands later on. We don't need to talk about whether we fully fund those.

MR. GREENE: Wait for the question to finish.

MR. RUBOTTOM: But it includes source of funds. And for Trevor Colbourn Hall, all three of those years it said E&G. I think I understand why E&G was put there. I think you mentioned it in your letter.

But are you familiar with the fact that Trevor Colbourn Hall was on that list three different years?

THE WITNESS: Specifically, no. However, I will say that when anything that we were doing that could be eligible for PO&M money, we always put it on there because we did not -- there were times in

past years when we failed to put a building on -- to request PO&M, and we missed one or two years of funding for that particular building.

So we always err on the side of too much information as opposed to too little when we're requesting these kinds of things.

MR. RUBOTTOM: Is there any consultation with the BOG or with the general counsel or with your own audit people about the proper projects to put on that list?

THE WITNESS: Yes. Lee Kernek talks with Chris Kinsley quite a bit about all those things.

MR. RUBOTTOM: Okay.

THE WITNESS: Occasionally, I think Tracy Clark would probably talk with him, but I think it's mostly Lee and Chris.

MR. RUBOTTOM: Okay. This last July while the audit process was still ongoing, before the president and trustees knew that the audit comment was going to be made, Trevor Colbourn Hall shows up on a BOB-2 list again, and this time it shows CFAUX in that funding source.

THE WITNESS: I've seen that since not working there anymore, and I'm just as confused by that as you are.

MR. RUBOTTOM: Okay. Who would you think -- it's my understanding that people in finance administration put those forms together.

THE WITNESS: Right.

MR. RUBOTTOM: Who would you have expected to be responsible for that -- for that form?

THE WITNESS: Finance and accounting.

MR. RUBOTTOM: So that would have been Tracy and Christy?

THE WITNESS: Or someone working with them or for them.

MR. RUBOTTOM: Okay, okay. Thank you. But to your -- you had no knowledge of that in July?

THE WITNESS: I'm still confused by what it means, so no, I didn't have any knowledge of it then.

MR. RUBOTTOM: Okay.

MR. GREENE: You need to wait for him to finish and then answer the question, because sometimes it may be a different question than you think you're answering, in addition to you're talking over him.

MR. RUBOTTOM: Did you understand the legislature had authorized the building in three separate years?

THE WITNESS: Not specifically, no.

MR. RUBOTTOM: And do you know in what form the authorization comes on those projects on that list?

THE WITNESS: I'm thinking the appropriation act.

MR. RUBOTTOM: Did you -- have you read the audit finding? I believe it discusses the appropriation act.

Have you read the audit report that was published? I guess the final one was published in January; the preliminary and tentative findings were published or provided to the university and to us and the BOG on November 27th.

THE WITNESS: I was gone September 13th. Some things I've seen; some things I haven't.

MR. RUBOTTOM: Okay.

THE WITNESS: I will say that I'm just disappointed that I was not there to be able to play a part in responding to that audit request.

MR. RUBOTTOM: In the past, if an audit finding was on your department, would you work with the audit department to help prepare the president's response?

THE WITNESS: Yes.

MR. RUBOTTOM: Okay. Thank you for -- for reminding me about that subject matter, but I did

lose my train of thought.

Okay. The general appropriation act, the way it deals with those buildings, it says these buildings are authorized to be constructed with non-appropriated funds and may be eligible for plant operation and maintenance after completion.

Were you aware that that language is in the general appropriation act?

THE WITNESS: Generally aware, but the way it worked at UCF was when the appropriation act came out, our vice president for governmental relations would go through the appropriation act with a fine-tooth comb, and he would come to the president's staff and with a summary sheet of the things that we should know coming out of it.

So I didn't spend a lot of time working through the details of the appropriation act because the vice president for governmental relations and his staff did that, and basically told us what we needed to know.

MR. RUBOTTOM: And that report might be -- those buildings have been authorized?

THE WITNESS: I don't think it would have been -- it may or may not have. I don't recall.

MR. RUBOTTOM: Would it surprise you to know

throughout the State University System there's a lack of comprehension of the results of putting buildings on that list?

THE WITNESS: It would not surprise me at all to think there's a lack of comprehension about a lot of the capital process.

(Discussion off the record.)

MR. RUBOTTOM: Back on the record.

Are there -- are you aware of new construction projects for which E&G funds were used prior to the Colbourn Hall commitments?

Let me rephrase that; more than $2 million projects, because that seems to be the number that's important.

THE WITNESS: I don't really recall.

MR. RUBOTTOM: Okay.

THE WITNESS: And it's because prior to that, we were getting PECO funding for most things, and it was not an issue. So I don't think that would have been happening.

MR. RUBOTTOM: Okay. These questions might not seem fair, but I feel like it's important we ask them.

Are you aware of any other inappropriate issues of restricted funds at UCF?

THE WITNESS: No.
MR. RUBOTTOM: At the DSO's of UCF?
THE WITNESS: No.
MR. RUBOTTOM: Did you hear -- well, Trustee Walsh has raised the issue about a prepaid lease that he claimed that he came to talk to you about in, I think, August, thinking that the prepayment amount was larger than would be normally economical.
THE WITNESS: Yes.
MR. GREENE: Wait for him to finish his question.
MR. RUBOTTOM: Do you -- are you familiar with that circumstance and do you know why a large prepayment was planned on that lease?
THE WITNESS: Yes.
MR. RUBOTTOM: Can you explain that to us?
THE WITNESS: It was -- was a lease on a property in the research park for one of our academic departments, and they had money in their current budget that they felt that they could use for the lease.
They weren't sure if they -- this is the way I remember it. They weren't sure they would have the same amount of money in future years, so they thought it would be good idea to make a large

prepayment on the lease while they had the money for the lease, and then that would relieve some of their problems downstream. That's what I remember about it.

He was concerned because if something happened and you made a big prepayment, that was not appropriate and we would have lost any earning or anything we might have had on the money had we not spent it for that purpose.

MR. RUBOTTOM: Do you recall saying anything to him in that context that it's important to spend down carryforward or to get this money off our books so the legislature doesn't think we're sitting on money or anything like that?

THE WITNESS: I don't remember that in the conversation with him, but there was always constant pressure to spend down carryforward, constant.

MR. RUBOTTOM: Okay. Carine, do we have any more? You have the rest of the documents you wanted to walk through.

MS. MITZ: Yes. Real quick, I'll breeze through.

BY MS. MITZ:

Q. Okay. Mr. Merck, if you don't mind turning to Document 3. That should be an e-mail sent out from the

State University System in July, 2013. Can you take a look at that, get familiar with it, and let me know when you're ready?

A. Okay.

Q. All right. So the BOG has told us that included in the group address for SUS counsel for admin and financial affairs included all the CFOs of state universities. So based on that and seeing that e-mail address on the top, do you agree that this was sent to you?

A. It would have -- if this -- if it's copied to the counsel for financial and administrative affairs, it would have come to my office, yes.

Q. Do you just not recall receiving it?

A. No.

Q. Okay. Clearly, Scott Cole was also copied on the e-mail. Do you recall him ever discussing it with you?

A. No.

Q. Okay. Do you recall Tracy Clark or Christy Tant ever discussing this e-mail with you?

A. No.

Q. What I would like you to do next is flip to tab four or document four, and take a look at that e-mail. And when you're done, let me know.

A. Okay.

Q. All right. This was the e-mail that was obtained, I think, from Bryan Cave, who would have obtained it from UCF.

Your name is in the CC line. Do you dispute that this e-mail was sent to you?

A. I don't -- I'm not disputing. I don't remember this particular e-mail. I remember another one on the same topic that was distributed to me and to the provost.

Q. Okay. Let's get to that. Why don't you flip to tab five, and I think that might be the e-mail that you are referring to.

A. Maybe. There might have been another one, but this one has the same thought that I had.

Q. Okay. So this e-mail was sent, it looks like, on December 2nd of 2014.

A. Correct.

Q. Do you recall when Dale Whittaker started with the university?

A. No. It was four years prior to him becoming president, so that would probably have been around 2014.

Q. Okay. Do you recall why you cc Dale Whittaker on this e-mail, on your reply?

A. Because the College of Medicine reports to him.

Q. And do you have any recollection of having any discussions with him or him replying to your e-mail?

A. No.

Q. Okay. I don't think I have any further questions.

Actually, yes. I wanted you to flip to the next tab. That should be six, and there should be an e-mail from Tracy Clark to you and Dale.

A. Uh-huh.

MR. GREENE: He's got it.

THE WITNESS: I've got it.

BY MS. MITZ:

Q. Okay, great. Does this appear to be something that was routinely either e-mailed or printed out and discussed with you and Dale, the attachment?

A. Yes.

Q. And does this attachment, which let's call it capital projects current funding plan, does it reflect that certain projects, including Trevor Colbourn Hall and the Colbourn Hall renovation, as being funded by E&G?

A. Yes, it does.

Q. Okay. And do you recall whether Provost Whittaker ever replied to this e-mail or sent you a subsequent e-mail?

A. I don't know if it's this particular one, I think it is, that he wrote back to Tracy with -- there was a handwritten commentary on the form that if it's not this one, it looked just like this, that had a lot of questions for her which obviously showed he had reviewed it in some careful detail and had questions, follow-up questions about it, but no question about the E&G for Trevor Colbourn.

Q. All right. Thank you. Very good. Thank you, sir.

MS. MITZ: Okay, Don. I pass it on to you.

MR. RUBOTTOM: I have a follow-up. What we've been learning is there's a lack of guidance from the BOG. There's a lack of training at the university level. The BOG themselves have mentioned last month that there's a lack of training for trustees.

So what we've learned from employees is that they learned on the job.

THE WITNESS: Right.

MR. RUBOTTOM: That Document 5 e-mail where you forwarded to Dr. Whittaker an articulate explanation by Tracy of E&G, is that the type of sporadic communications that an administrator at UCF would -- through which an administrator at UCF would be trained on issues like that regulation?

THE WITNESS: Unfortunately, yes.

MR. RUBOTTOM: And so your own learning on those things would have come through similar types of sporadic interactions, whether it was BOG e-mails or general counsel or audit whatever?

THE WITNESS: Or internal conversations.

MR. RUBOTTOM: Okay. I want to talk about E&G investments. You told us on the phone a few weeks ago about how you recognized that you had large cash reserves that could maybe be better placed.

THE WITNESS: Right.

MR. RUBOTTOM: I am not an investments expert. I am not a cash management expert. I did grow up in a household of someone that had some expertise in that area.

It kind of surprised me at the time that you -- that operating cash might be invested in various equities, whatever.

I have looked at the investment policy. I know you are familiar with that. And it does have the category, the pools of what kinds of funds are supposed to be.

THE WITNESS: Right.

MR. RUBOTTOM: And yet we hear discussions of using unrealized gains to pay for a project.

And the best I can understand about that is that you reallocate the ownership shares of the investment pools when you make those kinds of transactions on your cash books. Is that an accurate -- a fair representation of how those things have been managed?

THE WITNESS: That's fair, and it's also fair to say that's confusing.

MR. RUBOTTOM: My representation is confusing?

THE WITNESS: No, the way that's handled.

MR. RUBOTTOM: And you understand that would confuse observers?

THE WITNESS: Yes.

MR. RUBOTTOM: Who made the decision in February, 2010, to move 210 from the SPIA account at the SBA to Bank of New York?

THE WITNESS: In 2010?

MR. RUBOTTOM: February, 2010, is my understanding of when that occurred.

THE WITNESS: That -- I'll have to give you a little bit more.

When the big financial crunch hit, all of our money was split between SBA and SPIA. SPIA [sic] had a run on the money. It was frightening to everybody. We got out right before it was shut

down, and left about $5,000 or so in there as a placeholder.

That left all of our cash in SPIA, which was concerning. Although SPIA has some agencies like the highway department that have -- that are required by law to keep their cash there so you wouldn't have that danger of a run.

But that prompted us to start to look at should we be doing something else.

MR. RUBOTTOM: Let me stop you there so I can go back and be clear, because I think you misspoke. You said you took your cash out of SPIA?

THE WITNESS: No, out of SBA.

MR. RUBOTTOM: And what SBA was that account taken out of?

THE WITNESS: I don't know. I just know that SBA, that was the group. That was the fund that the state treasurer ran that had cash balances from state agencies in it.

MR. RUBOTTOM: And those were invested at interest, they were liquid? Is that your understanding?

THE WITNESS: Yes, yes, yeah.

MR. RUBOTTOM: But interest rates also went to zero in those times.

THE WITNESS: Yeah, right.
MR. RUBOTTOM: So you were trying to figure out what to do with what you had in that particular account?
THE WITNESS: And we moved it over to SPIA.
MR. RUBOTTOM: Did you get any guidance from --
THE WITNESS: Yes.
MR. RUBOTTOM: -- the capital or from the BOG or the SBA about making those kinds of transactions?
THE WITNESS: One of our university trustees was a financial advisor with Ameriprise, and he was the chair of the finance committee at the time.
MR. RUBOTTOM: Which trustee was that?
THE WITNESS: I knew you were going to ask me. Let's come back to that.
MR. RUBOTTOM: Was it Mr. Gary or another one?
THE WITNESS: It was an early -- Conrad Santiago. Conrad Santiago was the chair of the finance committee at the time and had a really good understanding of these things.
So the board had us create a small subgroup with he as the chair to look at what we should do going forward as a result of the financial crisis. And the recommendation that we all came to, to the board was that we -- we found that there's a statute

that allows us to have alternate investments of our cash, alternate to SPIA, if we had a board approved investment policy.

MR. RUBOTTOM: Right.

THE WITNESS: So then while we were looking at it, interest rates, as you said, were minimal to zero. And so we thought this might be an opportunity to get a little bit more cash.

So we established the principle that we wanted safety of the corpus to be paramount, we wanted liquidity, and we wanted to earn a little bit of money. The third priority was to earn a little bit more money, potentially, than SPIA would give us.

So when we looked at all the balances, it's kind of like the gas in your car's tank. I mean, if you're fairly conservative and you go to the pump and fill up your tank on a fairly regular basis, there's always some residual gas in the tank, and we saw that was what was happening with our cash balances. We have cash flowing in in the fall and then January and the summer, and then spending it down. But there was always this residual that we never touched as that money churned through there.

So we thought a way to up the returns a little bit and still be safe would be to put a percentage,

maybe 10 to 14 percent of our cash in equities, because we thought if the -- if the market went down 50 percent, we would lose 6 percent, maybe. It seemed like a fairly minimal risk.

Plus since we never had needed that for liquidity purposes, we could ride out a downturn anyway. So the board, everybody agreed that was pretty safe.

MR. RUBOTTOM: When you say the board, you mean the finance and facilities --

THE WITNESS: Board of trustees.

MR. RUBOTTOM: -- committee or the full board?

THE WITNESS: The full board, the full board.

MR. RUBOTTOM: The full board adopted the investment policy?

THE WITNESS: Yes, yes, they did.

MR. RUBOTTOM: Who made the particular allocations and did the board approve the allocations?

THE WITNESS: We -- we hired a consulting firm, The Bogdahn Group. They've changed their name since, but it was The Bogdahn Group as our outside consultant who helped us work through what would be an appropriate analysis and distribution of those funds, being conservative in mind.

So with our finance group that the board had appointed, working with The Bogdahn Group, we came up with that policy, and we still use that company to come back annually to make sure we're adhering to all of the things in the policy, sort of a fiduciary check.

MR. RUBOTTOM: I understand that.

THE WITNESS: Okay.

MR. RUBOTTOM: And I understand your discussion of cash.

THE WITNESS: Okay.

MR. RUBOTTOM: Was there any discussion at the time of whether that was a permissible use of E&G cash?

THE WITNESS: No, because there's no reason to think that it's not permissible. It was all either in SPIA or somewhere already invested in whatever they invested in, bonds. I don't know if they had equities in SPIA, but they invested it in financial instruments that earned interest, and we were doing similar, the same thing.

MR. RUBOTTOM: But those weren't all central reserves. Those was cash that was in various departmental and subdepartmental --

THE WITNESS: Right.

MR. RUBOTTOM: -- programs.
THE WITNESS: Right, right.
MR. RUBOTTOM: -- or accounts. I don't even know what you call all the pieces.
THE WITNESS: Right.
MR. RUBOTTOM: So you started with a listing of entities within the university that owned pieces of that. I mean, you knew whose money it was you were putting there.
THE WITNESS: And then it pretty much lost its identity once it was in there, but everybody owned shares. It was like a mutual fund.
MR. RUBOTTOM: I understand. But how did you track the shares? And how would you assign -- when somebody needed to cash out their share, how would you reassign, because you didn't -- my understanding is there were only about two liquidations in that period --
THE WITNESS: Right, right.
MR. RUBOTTOM: -- of a total of around 20 million.
THE WITNESS: Right.
MR. RUBOTTOM: And I'm assuming that some of those departments or subdepartments needed some of their money sometimes. So how would you re -- what

process would you use to reallocate that?

THE WITNESS: I don't know. I don't know.

MR. RUBOTTOM: Okay.

THE WITNESS: I think Tracy could answer your question there.

MR. RUBOTTOM: Okay. Do you remember when the regulation was amended in 2013? The BOG made specific reference to interest on E&G, because apparently some universities may have been using that interest for investment gains for non-E&G purposes.

MR. GREENE: Wait for the question.

MR. RUBOTTOM: For non-E&G purposes. Do you recall that regulation being expressed, that E&G interest had to keep the E&G color?

THE WITNESS: I recall it being expressed. I don't remember reading the particulars, but I know that when we started to allocate funds from the realized gains, Tracy would be careful to make sure that she was using -- I don't know how she did it, whether it was on a percentage basis or what, but to try to make sure that she was using interest on everything but E&G, when we were trying to use those for non-E&G type things.

MR. RUBOTTOM: But Tracy was responsible for

tracking all of those; is that right?

THE WITNESS: Right, right.

MR. RUBOTTOM: I believe Christy or somebody delivered to Kathy or somebody a spreadsheet with about 15,000 rows of these various allocations of those investment funds.

THE WITNESS: I didn't see that.

MR. RUBOTTOM: Some of them had negative balances, some of them had positive balances.

Would that, in your mind, on the date of that, that would have been the result of all those allocations over the ten or so years that those funds had been invested?

THE WITNESS: I didn't see that. I think I was gone by the time she was doing that, so I'll take your word for it.

MR. RUBOTTOM: Did you ever review -- it's my understanding you were the chief executive of investment policy?

THE WITNESS: Right.

MR. RUBOTTOM: Did you ever review the accounts that she was keeping as to whose money was where?

THE WITNESS: Not at that level, not at that level.

MR. RUBOTTOM: How did you allocate the

earnings? I know you had four different pools. Did you share the earnings alike or did you allocate the earnings to the funds that were appropriately in the particular pool?

Let's put it this way. Would everybody's money be spread over the pool pro rata?

THE WITNESS: Everybody's money would have been spread over the pool pro rata.

MR. RUBOTTOM: Okay.

THE WITNESS: Yes. So what they received from the earnings would have been a calculation that Tracy would have done, maybe with The Bogdahn Group; I don't know. But I know the intent was to try to make sure whoever put the money in, got an appropriate amount out after the expenses for running it and those sorts of things.

MR. RUBOTTOM: Okay. Did you have any long-term plan on liquidations and reallocations or was that just all using cash to make those kind of reallocations as people needed their money?

THE WITNESS: If I'm understanding the question now, the long-term plan?

MR. RUBOTTOM: Yes.

THE WITNESS: The long-term plan was to build up the unrealized gains to a point that we felt that

we could withstand market drops and so forth without going negative on the gains.

And when we got beyond that point, and we were thinking about 15 or 20 million, if we got above that point, then we could start thinking about allocating those to university needs, and we --

MR. RUBOTTOM: So the goal would have been to make sufficient security of the -- or surety of the principal, that the principal is absolutely safe --

THE WITNESS: Oh, yeah, right.

MR. RUBOTTOM: -- before you start withdrawing funds to spend?

THE WITNESS: Right.

MR. RUBOTTOM: Earnings.

THE WITNESS: Right, precisely.

MR. RUBOTTOM: Okay. Do you know -- are you familiar with a transaction in June of 2013 with respect to 10.9 million realization of gains or liquidation of some kind?

THE WITNESS: I can't -- I know it was -- at the time I did. I've lost it now.

MR. RUBOTTOM: Okay. Did you ever discuss this cash management strategy with other university CFOs?

THE WITNESS: I did, and most didn't know -- were not familiar with what I was talking about and

there were -- very few were doing it. UF might have been doing it.

And I did -- when we'd get the reports of the earnings and everything, every time they would come in from The Bogdahn Group with their analysis of what was going on, I would forward a copy of that to the chair of the finance committee. And I also forwarded it to Bob Garvy, whether he was chair of the committee or not, because he was -- his background was more into that financial area, and I know he had an interest in it.

So I always made sure that every time I would get a monthly report or quarterly report of how those funds were doing and what's going on, I would send it to the chair of the finance committee and the BOG.

MR. RUBOTTOM: Okay. Did you report regularly to the finance committee --

THE WITNESS: Yes.

MR. RUBOTTOM: -- about the progress of the fund and --

THE WITNESS: Yes.

MR. RUBOTTOM: -- would that be quarterly or monthly or --

THE WITNESS: It was not monthly. It probably

would have been quarterly. I don't remember the frequency. I know it was not monthly, but we did, and that was one of our points that The Bogdahn Group did was to make sure that we were making the required reporting to the board. And that -- and we had the Bogdahn representative there, that were our advisors, present at the meetings to answer any questions that people might have.

MR. RUBOTTOM: Okay.

THE WITNESS: It might have been annually, the more I think about it.

MR. RUBOTTOM: Did anybody consult you at any time before you left about attributing some of the unrealized gains in the fund to repayment of Trevor Colbourn Hall E&G?

THE WITNESS: It would have been a logical thing to do.

MR. RUBOTTOM: But nobody consulted with you about that?

THE WITNESS: They might have been forwarded to me, but not consulted in that sense.

MR. RUBOTTOM: I think on September 20th at the board meeting that they laid out, I think Kathy laid out a repayment plan or schedule that included about 13 or -- between 10 and 16 million in unrealized

gains as part of the refunding mechanism.

THE WITNESS: And that makes sense.

MR. RUBOTTOM: I understand why it makes sense economically and financially.

Where it didn't make sense was when people are expecting E&G cash to be made whole, because they don't understand that some of that money is in the investment pool. So people began to ask questions about it. The auditor commented on that particular mode of refunding.

Would you have expected that plan to be developed by Kathy and Tracy during that September period when they were trying to figure out how to repay?

THE WITNESS: Yes, yes.

MR. RUBOTTOM: Okay. Would you -- when you had the liquidation, would you report that to the finance committee at the next meeting or would you get approval beforehand or --

THE WITNESS: Like I said, there were only two, and I don't remember the exact ones, who was involved in it, but it was reported. From then on, if you look at those reports now, they still show even today where those two liquidations occurred.

MR. RUBOTTOM: Right.

THE WITNESS: So it was totally transparent in that sense. I just don't remember the -- the detail of who was involved in doing it at the time.

MR. RUBOTTOM: But you can understand why people would ask questions in light of the fact that the university has taken the position that we can refill a hole with this particular class of asset?

THE WITNESS: Sure. I don't see those as hostile questions at all.

MR. RUBOTTOM: I believe that category, when they presented that, they showed E&G and they preserved that share of earnings. They showed some federal funds.

What categories of federal funds would we have in the investment pool over a ten-year period?

THE WITNESS: I don't know.

MR. RUBOTTOM: Have you ever been involved in any federal audits questioning that we parked their money or anything?

THE WITNESS: No.

MR. RUBOTTOM: Okay.

MR. GREENE: Can we take a three-minute break?

(Brief recess.)

MR. RUBOTTOM: Let's go back on the record. Carine, you're next.

BY MS. MITZ:

Q. Okay. Mr. Merck, is there anything else you think we need to know in order to complete our investigation about the knowledge on the part of certain employees that E&G was being used for construction?

A. I think we, the employees, shared a common understanding or a common belief that we were not doing anything illegal. There was no -- no thought that what we were doing was illegal, nothing intentional in that regard. I just want to clarify that.

And that really brings me to the four employees that were -- are in the process of being terminated, if they haven't already been. I just want to, on the record, say how unfair I think that is. They didn't deserve that.

They were, I believe, intended to divert attention from people higher up in the chain. I think the chairman and the president felt a need to show action in response to the things, the negative things that were being said, and they wanted to, for lack of a better term, to produce some scalps to show. And these four people were on the receiving end of that unfairly.

I just --

Q. Okay. Thank you for that. If anything else comes to your mind that would help us in our

investigation, particularly involving the people who had knowledge of the use of E&G for capital projects, as well as people who had the knowledge that wasn't permitted, would you be willing to put that in a sworn statement or an affidavit for us?

MR. GREENE: Yes, we're cooperating. Bill was looking to me, but yes, we'll supplement.

MS. MITZ: Okay. Thank you for that. Mr. Merck, do you already know what you want to tell the committee on Tuesday?

THE WITNESS: No. I was just hearing from Don a few minutes ago or a few hours ago now, that I'll probably be asked to make about a five-minute opening statement.

MR. RUBOTTOM: Likely not more than that. I think we could talk about that off the record.

THE WITNESS: Okay.

MR. RUBOTTOM: Carine, I do have a couple more, because, I think, of what she asked earlier.

Is there anything that -- that you think we might not know about the knowledge level of Dr. Whittaker or any or all of the trustees with respect to the matters that have created -- the use of E&G funds for capital projects over the past six years?

THE WITNESS: My sense is that they were informed in writing. They were informed orally. Dr. Whittaker was even more so informed through correspondence, reports, conversations with Tracy, Christy and others in our various meetings.

I find it difficult to believe that there are people who are saying they were clueless about the use of E&G funds or carryforward funds towards Trevor Colbourn. That just astounds me that people would say they didn't know that.

MR. RUBOTTOM: I just lost my train of thought again. There was one more I had.

Oh. I can't remember if we asked you, have you read the Bryan Cave report?

THE WITNESS: Yes.

MR. RUBOTTOM: Have you reviewed the exhibits in that report?

THE WITNESS: Yes.

MR. RUBOTTOM: Is there anything in that report you dispute?

THE WITNESS: Absolutely.

MR. RUBOTTOM: Would you tell us what those matters are?

THE WITNESS: I've got some notes here I made, hoping that you would ask me that.

MR. RUBOTTOM: Thank you.

THE WITNESS: Some are minor and some are more important.

The first one that's just me is page 7 says, Merck took full responsibility for the decision to use the E&G funds for TCH. That is a total overstatement.

My expression of responsibility was my role in what happened as the chief financial officer, not to take on the responsibility for the general counsel, for the president, for the provost, for the board, for the BOG, all those.

It was a narrow expression of mine, but they continued to hammer on that full word that they added as time went on.

I felt like -- going back one page, page 6 refers to Bill Merck as a "key figure in all of the decisions." To me, that just started off that report with a bias that Bill Merck is going to be loaded up with everything that follows.

Page 7 says "the evidence does not support a conclusion that Colbourn presented an imminent health or safety risk requiring emergency action." I just want to say I totally disagree with that and I think that anybody that read the engineer's report

would have to conclude that that was a dangerous situation.

And then page 7, he says, "nor does it support the claim that there was no other -- " alternative use but "-- alternative but to use E&G funds." I disagree with that, too; that the suggestions that he had about a couple of projects, they just weren't practical or financially feasible to shift those funds at that point. It's just not right.

And then page 7, too, he says at Merck's discretion "a new international student center" ... used "permissible funds that could have been applied," et cetera, et cetera. To refer to it as an international student center makes it sound like it's discretionary, kind of frivolous, when in fact the building was an academic building.

We had a contract with a company called Shorelight to increase the number of international students on campus. And part of what they offered coming in was to build the facility on our campus if we didn't have adequate facilities to handle it. None of us wanted that. We did not want that. We didn't want them to have a building on our campus. So we and the board, we all decided we would build an academic building to house the academic programs

and the academic support functions for those -- all incoming students. So I thought that was downplaying what that building was.

Page 8, "We found no evidence that Merck, or anyone acting at his direction, ever specifically told the BOT that the source of funding for TCH was E&G funds." And I disagree, and we provided written documents, and I think also the transcript where we were answering Marchena directly disputes some of that.

Page 8 says "We found no evidence that Merck, or anyone acting at his direction, ever explained to the BOT that the funding of TCH was not permitted under BOG regulations and may lead to adverse consequences for the university." On the surface, that's true, but false in that I was not aware of that particular regulation during the decision-making process.

Page 8. "Merck clearly understood that state auditors might find the project to be in violation of the restrictions on the use of E&G funds." That's, to me, a mischaracterization. I thought it would go against the conventional use of carryforward funds, but not a violation of a specific restriction.

On page 8, "Merck acknowledged on several occasions that he could not have disclosed the relevant risks to the BOT, because he knew the BOT would not have gone forward with the project had he done so." I think we address that in my letter and the one at Dr. Hitt's, too, that we were talking about -- that we didn't believe it was going to be -- it was not -- we didn't think it was illegal, to start. We thought it was something that we could address and handle, and we didn't want to distract anybody from the major point which was we have a bad building that's going to hurt somebody.

Page 9 says speak of Clark and Tant. Burby accused them of mischaracterizing the allocations as being for deferred maintenance, and that is just wrong, wrong, wrong. They followed the BOG reporting guidelines.

Page 9. Speaking -- Burby was speaking of Clark and Tant. "Their actions had the effect of concealing the use of those funds for a construction project." No intent was there to conceal use. This word was -- that "conceal" word was picked up by Chairman Marchena later, and I think Mr. Burby used the phrase "the effect of" to sort of cover his speculation that that was what was going on.

Page 9. This is not too major, but told by Merck that he might draw an audit comment which he could handle. I didn't know I was doing something that would be considered illegal, so, yes, I thought I could reasonably handle it, talking with reasonable people.

Page 10. "Chase denied being aware of any restrictions on the use of E&G funds." My comment is: Like everyone else.

Page 10, "We found evidence that ... Whittaker received vague and arguably misleading" evidence "about the source of funding for TCH from Merck and others." That's just patently not true.

Page 10. "Perhaps more importantly, Whittaker stated that he was not familiar with restrictions on the use of E&G funds, and we found no persuasive evidence to the contrary." Again, protect the president; blame Merck. As chief budget officer, he was unfamiliar, but Merck as CFO should have been. I am not buying all of that.

Page 10. "Whittaker recalled hearing Merck state that the funding for TCH might lead to an 'audit comment,' which he said did not worry him because he" -- Whittaker -- "was not familiar with state audits at the time." A career in higher ed

and the new president and he's not familiar with state audits? That's difficult to buy.

Page 10 [sic]. "Whittaker ... did not feel he was in a position to challenge Merck because he appeared to have the full confidence of the president." My response is Whittaker reported to the president, as did I. The provost is a number two position in the university. He couldn't challenge me?

Page 10. Let me just skip that one.

Page 13. This is Burby. "There is no available case law or Florida Attorney General opinions interpreting the BOG's regulations during the relevant period, and the BOG does not publish any formal guidance." That's Burby talking. And then -- and I'm saying, and that is the evidence that I should be completely aware, but no one else?

And there was a proposed amendment that was circulated in redline format for comment, and no comments were received from the SUS institutions. And that's -- okay.

And pages 13 and 14 goes into carryforward funds specifically, finally having the same restrictions as annual E&G funds, "except where expressly allowed by law." So why was there no

mention of the statute referenced in our letter, Section 1013.74 of the Florida statutes, which says you can use E&G funds for calamity for a building project?

Page 14. Under section three, Colbourn Hall, says by the late -- "By the late 2000s, it was experiencing structural and other problems, some typical of a building of its age." By inserting the phrase "some typical of a building its age," it made the whole sentence seem like there was no emergency. I object to that.

Page 18. "Several participants in the budget chats indicated that they believed E&G funds were permitted to be spent on renovation and repair projects. In fact, E&G funds may be used for this purpose, but only up to a limit of $2 million according to BOG staff. The budget chat participants who were available for an interview stated that they were unaware of the $2 million limit." I, too, was unaware of the $2 million limit.

Page 20. "Gonzalez stated that she understood that E&G funds could be used for renovations and was unaware of any cap on the use of E&G funds for this purpose." I was of the same mind.

Page 21. Speculation by Burby that "It is possible that Hitt, Merck, and others understood that this authority allowed Hitt to add Colbourn as a capital project in the allocation document without seeking further authorization from the board of trustees." That's -- that whole statement is news to me. For Burby -- this speculation on Burby's part adds to some sort of a conspiracy theory that he was trying to weave.

The transcripts on page 34, we've already talked about those. That's where Tracy and I explain carryforward in response to a question from Chairman Marchena.

Page 34 [sic]. "Both Clark and Tant indicated in their interviews that they were unaware of the specific regulation or law that restricts the use of E&G funds for new construction. Rather, they said it was just something they had learned on the job." And my response is: Me, too.

Page 39 was confusing. Quoting: "And in at least one instance, discussed below, Merck" may have -- "may have affirmatively misrepresented to them the source of funding for the projects." What follows this theory of Burby's is a meeting attended by several people looking at a document I did not

prepare. I am not sure what he was really talking about there.

Page 41, he was -- I think Burby was trying to make a point that the building was not an emergency because he's -- he's saying Kernek's comments regarding the building being safe for occupants for at least the next two years was what I believed to be -- to further the false narrative that there was no emergency. It takes at least two years to design and replace a building, and the clock was ticking. So for a while, it is safe, but it's on its way to being unsafe, and it's not that safe, even at that.

At page 46, Merck's conversation with Walsh on August 10th following the August 7th meeting with auditors, exit conference. I was still in shock. I was distressed that I was being accused of doing something illegal. I was trying to address my feelings to Walsh and my regret for the concern that was coming. I was trying to convey my concern for not expressing my thought that we would get an audit comment because that was, as I believed, a minor matter that I could address and didn't want to distract from the emergency. The actual facts show that we did disclose the funding source to the board, regardless of what I was obviously

communicating poorly.

At page 47, at the September 12th conversation with John Pittman. That twisted up the concern over an audit comment for use of carryforward for a project that is large with the funds themselves. Record of events over the four years show that -- over the four years prior showed disclosure was there and nothing about the source of funds was concealed.

And somewhere, I don't recall the page number, but there was an e-mail, another one besides what we've already talked about, referencing moving E&G to the College of Medicine's endowment. I think there's another one besides what we looked at, and it mentioned the rule. And that was for an endowment, moving E&G to endowment, which I thought was not right. I did not connect that e-mail with the T -- with the Trevor Colbourn project at all in my mind.

And that was supposedly proof that I knew about it, when in fact that same e-mail was addressed to me and Dale Whittaker, and somehow Dale didn't necessarily pick up on it, but I was supposed to have. That, I thought, was fairly ludicrous.

But those are my comments on the Burby report.

MR. RUBOTTOM: Let me go back to the deferred maintenance issue. We've had discussions with Christy about those. I think she was responsible for the fund composition reports submitted to the BOG.

And here's -- here's the logical difficulty that I have, and I would ask you to explain it.

I understand the first 8 to 10 million committed to the renovation being placed under the category of deferred maintenance. In 2014, in the spring board meetings, the board approved construction of the new building, and there was no active -- there was a desire to renovate the old one, but that project had not been approved by anybody yet. The board approved building the new building. Obviously, you had to put the people somewhere before you could -- that's very clear. That's spring of 2014.

The August filing with the BOG, and somewhere in that timeframe, the provost and the president committed another $18 million to -- now what we have is two projects pending, but certainly a $23 to $26 million new building. There was 10 already there; the 18 was also put under the category of deferred maintenance in August of 2014 when the only

project approved was a new building.

And no renovation that I've ever seen totaled 28 million. I think the highest number I've seen is on the CIP's at 19, but I think your internal budgets usually showed the renovation at 15 and Trevor Colbourn Hall at 23, and that the 38 is there.

So I have a difficulty accepting any money for a new building categorized as deferred maintenance. So you already moved 10 under the category of deferred maintenance, and the university was planning in that fiscal year a movement of another 18, but categorizing it as deferred maintenance.

Do you understand why that's confusing to me? Because that's a total of 28 million deferred maintenance. There's no renovation ever proposed that reached 20 million.

THE WITNESS: First, let me just say that I am sure Christy did not do that in an effort to conceal something or deceive anybody.

I am confident that she did fill out that form the way she thought she was supposed to, and maybe there could have been some other way to do it, but there was no ill intent on her part doing that, and it is just what it is now. But there was no intent

to conceal.

MR. RUBOTTOM: Is it possible that the different components were not talking to each other? That this capital -- informal capital budget that you all kept working on in your budget group, that maybe that wasn't communicating to this report that's made to the BOG to where there was any ability to reconcile the different -- different documents?

THE WITNESS: Let me make sure I understand your question. Are you asking if you think there was a communication disconnect between the budget group and the people filling out the forms as to what we were doing?

MR. RUBOTTOM: Yes.

THE WITNESS: And I think the answer is yes to that.

MR. RUBOTTOM: Okay. Would you also suspect maybe there was disconnect between the people that built the master plan, the people that built the capital improvement plan, the people that built the annual capital budget?

THE WITNESS: Yes, yes. I would definitely say that.

MR. RUBOTTOM: If -- if somebody was to

describe the problem at UCF being culture, do you think those type of elements would be included there in addition to the kinds of communications with the board, that whatever -- that any cultural problem that contributed to this might be much broader than the administration and finance operation?

And we talked about training, how people were educated.

THE WITNESS: That's what I was trying to -- I'm not sure I would use the word "culture." I think there is a lack of formal training of some of these matters, and that lack of training I think leads to some of the miscommunication problems that we're having between the departments and with the uncertainty about how to fill out the BOG forms with the information that we're trying to plug in there. I think all of those elements led to some misunderstanding in terms of interpreting documents and what was supposed to be being done.

Dr. Whittaker referred to the administration and finance as having a broken culture. It's not broken. I think the culture there is strongly in favor of trying to do whatever we can do to make the students' experience the best we can. I think that's a whole different thing than having

communication issues that I think stem out of lack of training and understanding.

MR. RUBOTTOM: Carine, do you have anything else?

MS. MITZ: The only thing I have is, Mr. Merck, we've been asking everybody who's been deposed to agree to not discuss their deposition with anybody. So that would include the questions that we've asked and the answers that you've been providing. Do you agree to do that?

THE WITNESS: Yes.

MS. MITZ: Okay. Thank you. That's all I've got.

MR. GREENE: I've got a few questions and I'm going to try to go fast.

CROSS-EXAMINATION

BY MR. GREENE:

Q. Before today, you weren't given a chance to respond to the accusations that have been made against you, were you?

A. No, I was not.

Q. You could have spoken to Mr. Burby, but as I read your letter to him, you did not think he would be an unbiased audience, did you?

A. Absolutely did not think he would be unbiased.

Q. In fact, after reading his report, it is clear to you and to others, isn't it, that he was, indeed, biased, and had the answers he had to get before he even began his investigation?

A. Yes.

Q. He attributed to you the same documents to attribute -- for example, that e-mail from Tracy, that was sent to him that refers to BOG regulation 9.007, he used that to attribute a level of guilty state of mind to you, but absolved Whittaker who got the same regulation, didn't he?

A. Yes.

Q. And he ignored the fact that the E&G funding sources, as Mr. Burby was told by Tracy and Christy Tant and others before they were fired and had no reason to not tell them anything other than the truth, he ignored the fact that Dale Whittaker was intimately involved in the decisions to use E&G carryforward for capital projects, didn't he?

A. Right.

Q. So I'm little bit surprised today when you're given a chance to tell your story, that you're a little less passionate than I would be. You have been accused of doing everything but kidnapping the Lindbergh baby.

This is your chance to speak up, so I'm going

to ask you some pointed questions.

Did you purposefully violate any law, rule or regulation while you were at UCF?

A. Absolutely not.

Q. Did you know of any statute, rule or law that barred the use of E&G carryforward?

A. No.

Q. You have seen e-mails and things that referred to regulation 9.007, but did you ever read that rule itself before this --

A. No.

Q. -- matter began?

A. No.

Q. Did you connect that regulation to the Trevor Colbourn project in any way?

A. No.

Q. If you had known that there was a statute that barred the use of E&G carryforward to fund Trevor Colbourn Hall, would you have recommended that?

A. I would not have recommended it if I knew we were breaking the law, absolutely not.

Q. Did you purposefully do anything wrong, that is, violative of a rule or a statute or a regulation or something you were told you should not do while you were at UCF?

A. No.

Q. Did you counsel anyone else to do so?

A. No.

Q. Did Trevor Colbourn Hall present a real emergency?

A. It absolutely did.

Q. Were you told by the engineers that people literally could die if the facade of that building crumbled and bricks fell off of it while they were going in and out?

A. They didn't tell me they could die, but I knew they could because I've been around buildings that had faulty brick, and I knew the conditions in that building. In a heavy wind, you could have had an avalanche of bricks cascading off the side of that building, and anybody walking below would have been killed.

Q. Did everyone that was involved in the discussions concerning Trevor Colbourn Hall always agree that there was an emergency situation?

A. Yes.

Q. Did anyone other than Mr. Burby ever question the fact that there was a real emergency as confirmed by four different engineering firms?

A. He was the only one.

Q. Did you feel as the person whose job it was to try to find a way to allocate limited resources to fulfill the mission of the university, that you had a duty to the students, staff, and faculty who were at the university?

A. Yes.

Q. Did you tell the trustees that there might be an audit comment with respect to the funding of Trevor Colbourn Hall?

A. In one of the meetings, I did.

Q. There is no doubt in your mind you told the full board of trustees?

A. I told the -- I'm sure it was the financial and facilities committee; whether the full board was there, don't know, but actually, most of the time we had those committee meetings, the other members were present.

Q. Is there any doubt in your mind that the board members who you gave your orientation talks to would know what carryforward meant?

A. They should have, even though that was not -- carryforward has gotten a lot more attention since this latest audit. But I'm sure we talked about it, maybe not with quite the emphasis we would today when we talk about it, but yes.

Q. Is there any doubt in your mind that when

Marcos Marchena was told in 2014 that carryforward was being used to fund Trevor Colbourn Hall, that he knew what it meant?

A. He knew what it meant.

Q. Carryforward, as that term was used by you to the board of trustees, meant E&G, didn't it?

A. Yes.

Q. You didn't have -- did you make the decision to use E&G carryforward to fund Trevor Colbourn Hall?

A. I recommended things. I don't make the decisions.

Q. Did you have the final decision making authority with respect to how E&G carryforward was used?

A. No.

Q. Who made the final decisions with respect to the Trevor Colbourn Hall carryforward?

A. Provost and the president.

Q. Was general counsel aware that E&G carryforward was being used to fund Trevor Colbourn Hall?

A. There is no question he was, because he was in meetings where that was discussed.

Q. Did you expect the general counsel would advise you if something that you recommended or an action being taken by UCF was going to violate some sort of rule or regulation, is that something that you would expect

general counsel would tell you?

A. Absolutely would expect that.

Q. Would you even -- do you think you would even know the questions to ask with respect to the propriety of funding sources or is that something general counsel should bring to your attention?

A. Should bring it to my attention. Like the saying goes, I didn't know what I didn't know.

Q. Did you bring the audit issue to the attention of President Hitt?

A. Yes.

Q. Did you bring the potential for an audit comment to the attention of President Whittaker?

A. He was in meetings where it was discussed, so he had to know about it.

Q. Was it -- was, in fact, the potential for an audit comment with respect to Trevor Colbourn Hall discussed in multiple meetings where Whittaker and Scott Cole were present?

A. Yes.

Q. And was it also discussed in meetings where Marcos Marchena was present?

A. Yes.

Q. Now, the Trevor Colbourn Hall, Colbourn Hall dilemma, would you agree that it was unique for many

reasons?

A. It was totally unique.

Q. Why?

A. It's a little bit longer answer. I'll try to make it short. But we were in a -- in a time period where the state -- the traditional state funds for buildings had dried up. The buildings were continuing to age. We were facing an emergency situation, the likes of which I had not experienced in my 47 years in higher ed -- 46 years. And so it was a unique situation, unusual.

Q. So you agree it's unique for -- first of all, because it was an emergency that threatened the life, health, and safety of students?

A. Yes.

Q. Did you ever have that situation before in your career where somebody said you need to do something to this building or somebody could get sick or die?

A. Not to the extent of Trevor Colbourn Hall.

Q. And was Trevor Colbourn Hall unique in the way the project evolved from a minor renovation to a more major renovation, to a renovation with a partial new building and then to a total new building?

A. That was new in my experience.

Q. And this -- this evolution of the project, was

it ongoing for years?

A. Yes.

Q. Was Dale Whittaker there, even though not at the beginning, there for most of the evolution of that project?

A. Yes, he was.

Q. He was there when it was a minor renovation and when it became a major renovation and then when it finally became what it became; isn't that true?

A. Yes, that's true.

Q. And you had said earlier on that the provost added $10 million to the Trevor Colbourn Hall building. Do you recall that?

A. Yes.

Q. The provost you referred to was Whittaker?

A. Yes.

Q. Was it Whittaker's decision to add the additional space to the new building that added $10 million to the price tag?

A. He added scope to the building because it was hiring additional faculty, and then the prices were determined to be in the neighborhood of 10 million to add that additional scope.

Q. Is it accurate to say by the time it got to that point, that Whittaker, assuming you had these

weekly budget chat meetings every week, discussing the funding sources for E&G, that he was there at least at a hundred meetings where the funding source for Trevor Colbourn Hall was discussed?

A. I'll put it this way. He was there at numerous meetings. I wouldn't want to make a count of them.

And another thing that we did, we didn't meet every week because sometimes he was not available. So we would cancel the meeting because we wanted to make sure that anything that was discussed in a budget chat meeting was in the presence of the provost.

Q. So the meetings of the budget committees could occur without you, but they could not occur without Provost Whittaker, could they?

A. That was our -- our modus operandi.

Q. Was anything ever concealed concerning Trevor Colbourn Hall from Dale Whittaker?

A. No.

Q. Was anything concerning Trevor Colbourn Hall concealed from anyone internally within UCF?

A. No.

Q. Was anything concerning Trevor Colbourn Hall concealed from the board of trustees?

A. No.

Q. Was anything concerning Trevor Colbourn Hall

concealed from BOG?

A. No.

Q. Now, you were asked by Mr. Rubottom about some of the forms that were submitted. Did you fill out the forms yourself?

A. No.

Q. Did you fill out the form where the deferred maintenance was reported or --

A. No. I'm sorry.

Q. -- where Trevor Colbourn funding was reported as deferred maintenance?

A. No.

Q. Did you instruct Christy Tant or anyone how to fill out that form?

A. No.

Q. Do you believe she did it to the best of her knowledge and ability?

A. Yes, I do.

Q. Do you believe she did it based upon guidance that she got from BOG?

A. Yes.

Q. Do you think that this woman was trying to do anything illegal or immoral when she filled out that form?

A. No. Emphatically, no.

Q. Tell me about your conversations with Whittaker post-audit. What did he say to you and what did you say to him?

A. He said that basically that he thought I had done the right thing, I had chosen the wrong method to do it; that I, not we, but I would take some heat for it for a few months and then we could go on.

Q. Now, Whittaker, did he ever tell you he was surprised at the funding source for E&G when you were having these post-audit conversations?

A. No.

Q. In fact, he knew what the funding source was before the money was spent, didn't he?

A. Yes.

Q. And he signed off on the allocation document, didn't he?

A. Yes.

Q. So when he said you -- you did the right thing, he did it, too, didn't he?

A. Yes. The implication, though, was if heat comes from it, it was going to be my heat, not his.

Q. Have you ever been advised by anyone, other than me, that Dale Whittaker made a comment or told a group of people after you were terminated that he was going to come forward and tell the whole story about how

this was an emergency and UCF was doing the right thing, but that he had been coached instead to find somebody to blame so that UCF could move on from this dilemma quicker?

A. The only deviation I would say from what you just said was not someone to blame, but me to blame.

Q. When Whittaker said you did the right thing but by the wrong method, he was the person that finally, along with President Hitt, on the allocation document approved the method of funding of Trevor Colbourn Hall, wasn't he?

A. Exactly.

Q. I want to talk to you about your conversations with Dave Walsh that are mentioned in the Burby report and the other trustees where they say you essentially admitted you did something wrong and you had failed or hid something from the board. Do you recall that part of the Burby report?

A. Absolutely, I do, clearly, because I was shocked by it.

Q. Did you hide anything from the board of trustees?

A. No, I didn't.

Q. Did you tell Mr. Walsh that you hid anything from the board of trustees?

A. If I recall correctly, I was trying to express to him that I didn't bring up the audit report in a board meeting to distract them from the major problems we were having in the building, but that was not an accurate statement on my part, even then, because we had actually done that. We had brought it up in the meetings.

Q. Did you -- did you advise the board of trustees that the funding source for Trevor Colbourn Hall was the E&G carryforward?

A. Yes.

Q. Did you tell the board of trustees and/or the chair of the facilities and finance committee that there might be an audit comment --

A. Yes.

Q. -- as a result of that funding decision?

A. Yes.

Q. Did you think that if there was an audit comment, that it would be something that the university would be unable to defend?

A. I thought we would be able to defend it, absolutely would be able to defend it.

Q. Did you say that you might receive an audit comment, did you mean to say by that that we're going to break a law or rule or regulation?

A. No, no, I did not.

Q. What did you mean?

A. I meant that because we were using -- we were into an area that was not conventional, we had not received the historical funding from the state to cover this kind of an event, we were charting new territory, that auditors would surely pick out a $38 million expenditure in a way that was novel and flag it, and we would have to respond to that.

Q. Isn't it true that by recognizing that you're probably going to get an audit comment about the Trevor Colbourn project, that you knew from the very inception that this was going to be closely scrutinized?

A. Yes.

Q. Would you have broken a rule or violated a statute or regulation if you knew it was going to be closely scrutinized?

A. No.

Q. Would you have violated a rule or regulation if you didn't think it would get any scrutiny at all?

A. No, no.

Q. Did you mislead Dale Whittaker about anything?

A. No.

Q. Did you mislead any of the board of trustees about anything?

A. No.

Q. Did you trick Dale in any way?

A. That's ludicrous. No, I did not.

Q. From the very beginning of his joining UCF, isn't it true that Dale Whittaker threw himself into budget matters and tried to gain control over them to an extent greater than the provosts that were before him?

A. Yes.

Q. Isn't it true he reactivated the university budget committee and created the facilities budget committee just so that he could be more apprised of and know about the budget decisions?

A. Yes.

Q. And he was involved in the budget of the entire university, not just the budget at the academic level; isn't that true?

A. That's correct.

Q. Let me show you what we'll mark as a composite Exhibit 1.

MR. RUBOTTOM: Can we go ahead and mark ours? I don't think we've done that yet, that big group that we gave you.

(Exhibit No. 1 was marked for identification.)

MR. GREENE: So I'm going to show you what's composite Exhibit 2.

(Exhibit No. 2 was marked for identification.)
BY MR. GREENE:
Q. Is this just the type of information that would have been submitted to Dale Whittaker on a weekly or frequently periodic basis concerning budget matters at UCF?
A. The answer is yes.
Q. And did the materials that were presented to Dale Whittaker regularly, did they specifically refer to E&G carryforward and what was being done with that source of funds that were available to UCF?
A. Yes.
Q. Do you believe that Tracy Clark was a competent, honest, and capable employee at UCF?
A. She was one of the most competent, hard-working, honest people I know.
Q. Is there any doubt that she would have regularly reported all the matters that concerned the budget issue that were relevant to Dale Whittaker?
A. I have no doubt that she would.
Q. Do you know of anyone that ever tried to disguise that Trevor Colbourn Hall funding as deferred maintenance?
A. Not deliberately disguise it, no.
Q. You agree that there are problems as

exemplified by Trevor Colbourn Hall that need to be fixed, wouldn't you?

A. I do. I would totally agree with that.

Q. You agree there needs to be more training and better training at UCF?

A. I think that's true for all 12 universities, including UCF and the board of governors.

Q. Do you agree that there needs to be better communication between the BOG and UCF?

A. There needs to be clear, more discrete -- more discrete direction, yes.

Q. Do you think it would be a preferable practice that when the BOG was asked for written guidance so that there could be a uniform source of interpretation of permissible uses of E&G, do you think it would have been preferable that Chris Kinsley and others would have provided that guidance when asked?

A. Certainly.

Q. Do you believe that there needs to be better communication between the board of trustees and perhaps better education in the board of trustees concerning budgetary matters that affect UCF and other universities?

A. Yes.

Q. Do you think the blame for all of those issues

should be placed upon your shoulders?

A. No.

Q. Did you intend to take the blame for everything wrong with the system when you said I'll take responsibility for this?

A. No.

Q. Did you resign because you felt some responsibility by virtue of your position with respect to a decision that was obviously -- that people relied upon your recommendation in making, and that in hindsight might not have been the right thing?

A. Repeat that.

Q. Did you -- did you, by resigning, acknowledge your responsibility and your willingness to take responsibility for any role that you had in what happened with respect to Trevor Colbourn Hall?

A. Yes.

Q. Did you intend to absolve others who are your peers or your superiors or with other agencies, like the board of trustees, from their responsibility?

A. That was not my intent, and the word "full" responsibility, that word, "full," that was added later was not my intent.

Q. The Burby report says there's a culture issue at UCF, and he implies that the culture was that people

were scared to speak up because of the cabal that consisted of you and Dr. Hitt, so that everybody -- everybody else, including President Whittaker, was just scared to say anything. Did that sort of culture exist at UCF?

A. No, no, no. It was a very collegial culture and we had no problems speaking with each other about things we agreed with or disagreed with.

Q. Did Lee Kernek speak up when she disagreed with things?

A. Yes.

Q. Do you think you could have shut her up if you wanted to?

A. I'll take that as rhetorical.

Q. Did others speak up when they had problems at UCF?

A. Yes, yes.

Q. Did you try did -- did you listen to them and take corrective action if needed?

A. I certainly did.

Q. Did you ever try to dissuade criticism, discussion or any efforts to make sure everybody was doing the right thing?

A. No.

Q. Would it, in your view, be more of a

communication and education and training issue that is responsible for what happened at UCF rather than a cultural issue?

A. I would, and I believe I said that earlier.

Q. You were asked a lot of questions, and I'm confused about them because I don't know as much as you and Mr. Rubottom about your investment policy, your liquidation of assets. Was it your policy or was it UCF's policy?

A. It was UCF's policy as adopted by the board of trustees.

Q. So this was something the board did, not Bill Merck, just to be clear?

A. Just to be clear, that was the board's action.

Q. You were asked about who was involved in dealing with the auditors during the audit process in 2018. Do you recall that?

I believe you said it was Christy Tant and Tracy Clark were probably the first --

A. Oh, yes.

Q. -- level of communication?

A. Yes, yes.

(Exhibit No. 3 was marked for identification.)

BY MR. GREENE:

Q. And as Exhibit 3, can you identify that as an

e-mail that was sent -- e-mail that was exchanged between you, Christy Tant, and Jeff Brizendine from the auditor's office in April and May of 2018?

A. Yes.

Q. And does Christy Tant tell the auditor expressly on April 26, 2018, that the construction of Colbourn Hall was fully funded from centrally held E&G carryforward funds?

A. Yes.

Q. You -- you were asked did Whittaker ever challenge your decisions, and you said no. And I think you -- you read that -- you heard that question in the sense of did he object to things that you did more narrowly than I heard it.

So I want to ask you this. When you had to -- did you have to go before the budget committee and ask for budgeting for your division from time to time?

A. Yes.

Q. And did Dale Whittaker rubber stamp all of your requests?

A. No.

Q. In fact, wasn't there some insurance issue for which you had to fight to try to get funding for, and Dale Whittaker really pushed back hard on it?

A. I'm fuzzy on that, but I'm pretty sure the

answer is yes, it was.

Q. Did Dale Whittaker agree with everything you said?

A. No, no. I had some other requests that were -- that I thought were pretty important that were turned down.

Q. You know that Whittaker knew that carryforward -- that the carryforward was Trevor Colbourn Hall came from E&G, don't you?

A. Yes.

Q. You're not guessing at that?

A. I am not guessing at that, no.

Q. And you're not guessing that Marcus Marchena knew, are you?

A. No, I'm not guessing, no. They knew.

Q. You were asked if the provost had approval authority over capital projects.

The final approval authority, at least within UCF, actually rested exclusively with the provost and the president as far as the use of carryforward for capital projects was concerned, didn't it?

A. Correct.

Q. The allocation documents for E&G carryforward were signed by the president and the provost; right?

A. Right.

Q. Not by you?

A. Not by me. I don't believe they are even copied to me.

Q. Tell me more about the four people who were fired, or whatever happened to them, that Whittaker said were fired at UCF. Why do you think they were treated unfairly?

A. I think they were treated unfairly as a smokescreen, as a way to deflect attention from the provost and the chairman -- yeah, from the president and the chairman, rather. I think they were -- they were just sacrificed to divert attention from their story that they didn't know anything.

Q. You didn't know the law concerning the prohibition against the use of carryforward for new buildings, did you?

A. No.

Q. It appears Dale Whittaker didn't know because he never told you about that when you were discussing the use of carryforward for Trevor Colbourn Hall, did you or did he?

A. No, he didn't.

Q. Scott Cole was aware that E&G carryforward was being used for Trevor Colbourn Hall, wasn't he?

A. Yes.

Q. He never told you it was wrong, did he?

A. He did not.

Q. Marcos Marchena, who was an experienced construction lawyer, he never told you it was illegal or wrong in any way, did he?

A. No, he didn't.

Q. Do you know why Burby would go out of his way to find that these four employees that were under everybody I just named in the UCF hierarchy, that they somehow knew, but that Whittaker and others didn't?

A. I think there was an objective when that whole Burby report was commissioned, and whether it was written or -- well, it was not written, certainly, but unwritten, and that was to protect the president.

Q. Did you ever hear of the "Save the Dale" campaign?

A. Yes, I did.

Q. What did you hear about that?

A. I just heard that when Dale Whittaker was a candidate for a presidency at Iowa State, there was an interest in not letting him leave UCF, but to stay and become president.

And so there was conversation among board members and others about let's save Dale, keep him here.

Q. Did you ever get the sense that one of the

primary proponents behind that move to "Save the Dale" was Marcos Marchena?

A. Certainly involved in it heavily.

Q. Did you ever get the sense that -- that Marcos Marchena was behind that so strongly because he felt that he might have a little more control over Dale than he had over Dr. Hitt?

A. That would be speculation on my part, but it would be speculation that I would endorse.

Q. You were asked about Marcos Marchena and some of the things that he did at UCF. He was trying to get an ever-expanding role over capital projects at UCF, wasn't he?

A. Yes.

Q. He was trying to bring in some of the people he worked with at the Orlando Airport and bring them in to some level of involvement with the administration of construction projects at UCF?

A. That was an impression I had, and I know that he was very interested in having these owner's representative type companies come in and manage our projects for us.

Q. And Lee Kernek and you had discussions about Marcos Marchena's efforts to bring in OARs, didn't you?

A. Yes, yes.

Q. And did Marcos Marchena complain about Lee Kernek when she brought the efforts of Marcos Marchena to the attention of President Hitt and objected to them?

A. Say that again now?

Q. Did Marcos Marchena complain about Lee Kernek when the she resisted his efforts to bring in OARs?

A. He had complained about her before and after, so that didn't help, the resistance to OARs, which I didn't think was a good idea, either. Our projects were too simple to handle the extra overhead of an OAR.

Q. Did you have some concern that Marcos Marchena was trying to bring in some of his cronies from the airport so that they could make money on the back of UCF when their services really weren't needed and would have added a lot more money to the UCF budget problems?

A. That would be speculation on my part, but I would not disagree with that speculation.

Q. Did you ever tell Scott Cole or Trustee Walsh or anybody else that you had lied to the board of trustees?

A. No.

Q. Did you ever tell them that you had concealed anything from the board of trustees?

A. They interpreted my --

Q. Forget how they interpreted. Did you --

A. No.

Q. -- ever tell them you concealed anything from the board of trustees?

A. No, no, no.

Q. Did you ever lie to or conceal anything from the board of trustees?

A. No.

Q. Tell me again, what is it you were trying to explain to Trustee Walsh when you had these conversations about the audit comment and your feeling of embarrassment and remorse at what was going on?

A. Well, I obviously felt bad about what was going on, no question about that. And I wanted those guys that I had respect for to understand, first, why we were doing what we were doing, the safety, trying to protect students, faculty, and staff from harm.

And that I had not gone into great depth about the potential for an audit comment in a meeting where we were discussing some of those things, although we did actually do it. But I didn't want to make a big deal out of the audit comments, which I thought were -- would have been a very manageable comment to deal with, when I was not aware that it was something illegal.

Q. Let's switch gears. The term -- strike that.

The board of trustees at UCF was specifically

told, at least in some verbal reports and/or some written documents, that E&G carryforward was being used for Trevor Colbourn Hall. Do you agree?

A. Yes, I agree.

Q. And in some of the slides and things we've seen, the more general term, nonrecurring or UCF internal funds, things of that nature, were used. Are you aware of that?

A. Yes.

Q. Was there any -- ever any effort to use those terms to conceal in any way --

A. No.

Q. -- the fact that E&G was being used?

A. No.

Q. Do you know who prepared those slides and things, which department it was? Would that have been facilities and finance or would it have been budget? Do you know who prepared those things for the trustees?

A. Depending on the project, but typically it would have been finance and accounting in conjunction with whatever project was being presented. So there would often be a joint effort on the preparation of the form, the subject expert, and then some of the F&A folks would be involved with the funding source.

MR. RUBOTTOM: Excuse me, for clarification. I

think you mentioned slides? And I don't know if you're talking about some of the facilities reports that were made. He's talking about forms, which sounds like he's talking about the capital improvement plan.

MR. GREENE: I'm talking about the slides and the presentations that were made annually to the board of trustees where the terms "nonrecurring" are used.

BY MR. GREENE:

Q. Do you know who prepared those slides and things? Would that have been --

A. Not specifically.

Q. -- Lee Kernek's division?

A. Not specifically, but it wasn't me, I know that.

Q. Did you ever direct anybody as to how to fill out those?

A. No.

Q. What to put on those slides for information?

A. No, no.

Q. Did you instruct all of those below you to be open and honest and try to answer as completely as they could any questions or requests for information that they received from the trustees?

A. Of course, for sure.

Q. Was Trevor Colbourn Hall in the reports that were submitted to the state, as far as you know, were those -- were the same reports submitted to the state for Trevor Colbourn Hall as would have been submitted for other, similar projects?

A. Yes.

Q. Was the same process and procedures followed for Trevor Colbourn Hall, the reporting process --

A. Yes.

Q. -- the same?

A. Yes.

Q. Was anything understated or concealed or purposefully hidden?

A. No.

MR. RUBOTTOM: Chuck, I've got a long way to drive and she has a lot to type up in the next few days, so if we could bring it --

MR. GREENE: This will be it. Done, sorry.

(Exhibit No. 4 was marked for identification.)

BY MR. GREENE:

Q. Is Exhibit 4 a list of the other projects as far as you know that were identified by UCF post-audit that involved questionable uses or uses of E&G that should be looked into further?

A. Yes.

Q. Are you aware that Beverly Seay has said that in connection with the dismissal of the four terminated UCF employees, that these projects were the same people, same -- same process, same pattern, same trickery, essentially, as was attributed to them with respect to Trevor Colbourn Hall?

A. No.

Q. Are you aware of that comment?

A. I've heard it, and I disagree with it totally.

Q. Were the -- were these other projects completely different from Trevor Colbourn Hall?

A. Yes, they were.

Q. Did anyone ever say that there might be an audit comment or something might be made with respect to any of those other projects?

A. No.

Q. Were different people involved in approving and overseeing those projects than were involved with Trevor Colbourn Hall?

A. There was an overlap with the budget committee and budget chats and things like that, but all these projects have their own individual identities and there were different subject experts on all of them, so they were handled differently. You cannot compare this list

with the Trevor Colbourn Hall business.

Q. And at least with respect to most of those projects, Dale Whittaker was involved in approving all of them, wasn't he?

A. Virtually all.

Q. And are some of those actually the -- was Dale Whittaker intimately involved in a few of those projects? Were these his babies, so to speak?

A. Yes, yes.

MR. GREENE: That's all we have.

So we'll waive reading for purposes of expediting.

And Don, do you agree that I haven't had the opportunity to do a full cross-examination that I would do, so that nobody can use this in other litigation? It would essentially remain open?

MR. RUBOTTOM: I would agree, yes.

MR. GREENE: Thank you.

THE REPORTER: Can I confirm that you want this transcript as soon as possible?

MR. RUBOTTOM: Yes.

(The deposition was concluded at 5:23 p.m.)

CERTIFICATE OF OATH

STATE OF FLORIDA:
COUNTY OF ORANGE:

I, Emily W. Andersen, RMR CRR FPR, Stenograph Shorthand Reporter, certify that WILLIAM F. MERCK, II, personally appeared before me on February 16, 2019 and was duly sworn.

WITNESS my hand and official seal this 16th day of February, 2019.

Identification:
Produced Identification
Florida Driver's License

Emily W. Andersen

EMILY W. ANDERSEN,

It is hereby stipulated by and between counsel for the respective parties that the reading and signing of the deposition be waived.

THE REPORTER: Would you raise your right hand, please.

THE WITNESS: (The witness complies.)

THE REPORTER: Do you solemnly swear that the testimony you are about to give will be the truth, the whole truth, and nothing but the truth so help you God?

THE WITNESS: Yes.

TRACY CLARK,

having first been duly sworn, testified under oath as follows:

DIRECT EXAMINATION

BY MS. MITZ:

Q. Good afternoon, Ms. Clark.

A. Hi.

Q. Have you ever given a deposition before?

A. One time, yes.

Q. How long has it been?

A. Let's see. Fourteen years.

Q. Okay. So let me give you a little refresher on what's going to happen today and some of the ground rules.

So we've asked you to come today just to get some more information about what happened at UCF. As you know, we didn't sit in on the interviews conducted

by Bryan Cave, so this has been our first opportunity to see people face-to-face and get some context behind the words that we've seen on paper.

We're not going to be asking any trick questions. There is no right or wrong answer. We're just simply trying to fill the holes where we just don't know what happened.

As you know, the court reporter is taking everything down, so please speak up and speak, you know, clearly; no nodding of the head or uh-huh, huh-uh. If you know something because someone else told you, let us know that. If you're estimating or approximating something, please let us know that you are doing that.

If you don't know something, "I don't know" is a great response. I don't want you to guess at something if you don't know. If you need something reasked again or rephrased, just let us know and we'll ask the question again or rephrase it for you, and I think that's about it.

So are you ready to start?

A. Yes.

Q. Okay. Can you please state your full name for the record?

A. Tracy Clark.

Q. And have you discussed this deposition with

anybody aside from your attorneys?

A. No.

Q. Did you have an opportunity to review your interview notes from the Bryan Cave interview?

A. No.

Q. Okay. Did you review anybody else's interview notes?

A. No.

Q. Okay. How many times were you interviewed by the Bryan Cave firm?

A. Three.

Q. Okay. And was everything that you told Mr. Burby true?

A. I felt like that interview was intimidating, so I never got to review my notes. I felt like there was a lot of times he was trying to lead me to certain answers, so that's the best I can say.

Q. Okay. Let me ask you this. Do you recall making a statement that you felt wasn't accurate or wasn't truthful?

A. I don't know.

Q. Okay. All right. Well, we'll go through our questions and I ask that you be honest. If you recall as you're answering one of our questions that you gave a different response to the Bryan Cave investigator,

please let us know that.

A. Okay.

Q. All right. At any time while you were still at UCF, after this whole Trevor Colbourn Hall audit thing came about, did anybody interview you or start asking you questions: Your immediate supervisor, the general counsel's office, the president's office?

A. Can you -- can you state that again?

Q. Sure. Basically, what I'm trying to find out is if anybody at UCF asked you to come in for an interview or answer questions about this or if Bryan Cave was the only one who ever asked you questions about this.

A. So Scott Cole, general counsel, asked me about this.

Q. Okay. Is that the meeting that occurred in September?

A. Yes.

Q. Is that the meeting at which Ms. Mitchell was also present?

A. Yes.

Q. And Ms. Tant, I think?

A. Yes.

Q. Let's go ahead and talk about that.

I actually have a copy of an e-mail that I

would like to show you.

Don, do you have that packet out?

MR. RUBOTTOM: Yes, I do. Which tab is it?

MS. MITZ: I think it's tab seven.

BY MS. MITZ:

Q. Ms. Clark, if you wouldn't mind taking a look at that, and once you're done, let me know.

A. Okay.

Q. Do you recognize that e-mail?

A. Yes.

Q. Do you remember it?

A. Yes.

Q. Do you recall what the attachments were?

A. The attachments were projects that my office had identified, and Facilities and Safety had identified that had used E&G funds that exceeded the $2 million that we were made aware of at that time.

And so that's what was on the -- they were projects to discuss with Scott Cole and Kathy Mitchell.

Q. And is that what was discussed at the meeting referred to in this e-mail?

A. Yeah. That was part of what was discussed in the meeting. That was the purpose of the meeting; that was the intended purpose of the meeting.

Q. Okay. And it was just the four of you; you,

Ms. Tant, Ms. Mitchell, and Mr. Cole?

A. Yes.

Q. And were all four of you in the meeting the entire time?

A. Yes, to the best of my recollection.

Q. Okay. So why don't I just have you tell me what happened? You got to the meeting and what was said?

A. So we were talking about the projects that were on the list and whether -- trying to determine whether or not there was a question about whether or not they were allowable uses of E&G funds and whether or not we should reverse them under the rules that were sort of being brought to our attention at that time.

So we were trying to get -- they were all projects that we had thought were allowable use of E&G, but we were trying to get the general counsel's opinion at that point because of the investigation that started and some of the rules that we were hearing at that time. So that was kind of what started the meeting.

And then at some point during the meeting, Scott Cole started asking Christy and I questions about what Dale knew, when Dale knew it, what exact words were used.

So this e-mail -- I got upset because it was

kind of -- I felt like we were getting interrogated and I felt like the general counsel was trying to get us to say, in his specific words, that Dale was not aware of the issues that were, you know, coming forward about Trevor Colbourn Hall.

Q. So did he succeed in getting you to say that?

A. No.

Q. Okay. What did you tell him?

A. I said that I -- I knew that Dale knew that the use of E&G funds might produce an audit comment and that, in my opinion, that would have told Dale that there was something to question.

Q. Okay. Did the conversation address only Trevor Colbourn Hall or all the projects?

A. The -- well, the projects were discussed separate from that line of questioning about Trevor Colbourn Hall. So the general counsel's questioning of what Dale knew about what and when and what exact words were used was only about Trevor Colbourn Hall.

Q. Okay.

A. If that's what your question is.

Q. It is; yes.

So did you ever volunteer to Mr. Cole that Dale was aware that E&G had been used on multiple projects?

A. At that meeting?

Q. Yes, at that meeting.

A. Not at that meeting.

Q. Okay. Did you tell him before or after that meeting?

A. After that meeting. After that meeting, I -- my office produced information for both Scott Cole and -- well, for leadership. I'll say for Kathy Mitchell, who shared it with the rest of leadership, and that was shared with Dale Whittaker, the other projects that used E&G funds.

Q. Okay.

A. I'm not sure if that was responsive or not.

Q. You answered my question. That's good.

So is there anything else from that discussion with the four of you that was said by you that you haven't already told us specific to Dale Whittaker's knowledge?

A. Just that I told Scott Cole who was saying specific words, like, well, was X, Y, Z, said? And I said, well, not those exact words were said, but -- so I felt like he was trying to pin me into, you know, if it was phrased this way, then that meant that Dale Whittaker knew. But if it wasn't phrased that way, then, you know, then that says he didn't know.

And I tried to say it wasn't phrased that way,

but, in my opinion, he knew.

Q. I got you. So then did you become upset because of the way he was questioning you or were you upset because of what you had to say?

A. I was upset because I felt like he was trying to put words in my mouth and trying to make me reach conclusions based on his words versus my own conclusions.

Q. Okay. Very good. So let's go back to the introductory stuff.

What was your position before you left UCF?

A. Associate provost for budget planning and administration and associate vice president for finance.

Q. And how long had you been with UCF?

A. Almost 12 years.

Q. And who did you report to?

A. I reported to Dale Whittaker and Bill Merck. I had a dual report.

Q. So let's talk about that. Did Dale Whittaker start with the university on August 1st of 2014?

A. Yes, sometime around then, yes.

Q. Okay. How soon after that did you start reporting to him?

A. He -- in March of 2015, he started a reorganization analysis, if you will, or had HR work on

a reorganization analysis of the provost's office. And that took several months, but that was started, I would say, within three to four months after he got there. And then it took a while for that to happen, and then the reorganization got put in place.

Q. So did you start reporting to him as part of that reorganization or before?

A. As part of that reorganization, my reporting to him was part of all of that, yes.

Q. So in about March?

A. Yes, 2015.

Q. Prior to March, did you provide him any information --

A. Yes.

Q. Okay. You did?

A. Yes.

Q. All right. Okay.

MR. GREENE: Let her finish her question.

MS. MITZ: No, I had stopped. I had to think.

BY MS. MITZ:

Q. So let's talk about that initial period. From the time you started in August until March, what did he ask you for in terms of budget documents?

A. Well, from the time he started, we participated in what were called budget chat meetings or budget

operations group meetings. They had a couple of different names. Those were meetings that were started by a prior provost, between the provost and their support personnel, and the CFO and their -- his support personnel. So those meetings continued once Provost Whittaker came.

So it was in those meetings that I ended up working with Dr. Whittaker. So those meetings started right away. They were either every week, sometimes every two weeks.

At that time Christy Tant and I both attended from the CFO's office; the provost attended and his support staff. And so during those meetings, I was asked to produce lots of budget information and answer lots of budget questions and help educate the provost on the budget at the university.

Q. When he -- when you started working with him, did he seem to have any level of understanding of university budgeting or did you have to help him along to get there?

A. Well, I would say he had an understanding of university budgeting, but I helped educate him on university budgeting.

Q. Did he ever talk about funds that he would have worked with at Purdue that would have been similar to

E&G funds here in Florida?

A. I don't recall.

Q. Okay. Who else would have regularly attended the budget chat meetings besides you, Christy, the provost, and his staff? Like did Mr. Merck attend?

A. Yes. In fact, Christy and I were there to support as Bill Merck's support staff, and the provost had his support staff which I think at the time was Lynn Gonzalez and Megan Deal (phonetic).

Q. So tell me about the documents that would have been presented or reviewed in those budget chat meetings. I've heard a lot about E&G commitment lists and E&G allocation lists. Were those documents reviewed in budget chat meetings?

A. Yes. So the E&G commitments list was a staple in those meetings. It was a tracking document that kept track of all of the decisions that were made -- that the provost made and all the allocation decisions from the central reserve that the provost approved in those meetings. That's what we call the E&G commitments list.

Q. Okay.

A. It went out five years, and would keep -- it was the tracking document. It was created before Christy and I were involved in this process, so we carried it on.

Q. Did -- I'm sorry. Go ahead.

A. That's okay. Go ahead.

Q. Finish your answer.

A. So that was a common document.

There were lots of documents produced for those meetings. The -- what the balance in the central reserve would be rolling forward multiple years was a document that we produced so that you could see, you know, basically what available funds there were.

After all of those commitments that were on the E&G commitments list were fulfilled, capital funding projects, if any existed, you know, would have been brought to those meetings. Any -- any topic that was coming up that needed kind of a financial schedule put together to help explain or help inform the discussion would have been brought to those meetings.

Q. So these meetings weren't limited to just academic budgeting matters. It also included capital funding issues, too; right?

A. Yeah. It was actually not limited to academic only. It was -- it was for the whole university budget; anything to do with the whole university budget, whatever that was a facility issue, whether that was union negotiation issues which had financial consequences, whether it was requests for more police

force, whether it was a request for a raise for the faculty. You know, any university conversation that might require resource decisions or resource allocations.

Q. Okay. So the few documents that you discussed that were presented during those meetings, did you ever -- like how carefully did you review those with the provost? I mean, was he just handed a copy, he looked at it and if he had questions he asked them or did you go line by line through it? What was the interaction there when he was given documents?

A. So we would go basically line by line.

So if they were documents that were prepared by finance and accounting, then we would explain the documents thoroughly.

Q. Would that include project by project?

A. Yes.

Q. So it would have been clear to him that Trevor Colbourn Hall or the Colbourn Hall renovation was on the list, E&G was used to fund it, and X amount of dollars?

A. Absolutely.

Q. And he would have seen numerous versions of those documents as the construction plans changed?

A. Yes.

Q. Okay. So you can definitively say it wasn't

just one document that he saw with E&G for those projects. He would have seen multiple?

A. Correct.

Q. Okay. And then in addition to the documents, did you guys ever have conversations about the use of E&G for either the Colbourn Hall renovation or the Trevor Colbourn Hall construction?

A. Yes. That would have been discussed when the resource allocation decision for the $10 million, which was when Dr. Whittaker was here, was made. When that decision was made to allocate an additional $10 million towards Trevor Colbourn Hall, that would have been a discussion with the provost and with Mr. Merck.

Q. And would you have been there?

A. Yes, because it appears it occurred at a budget chat meeting.

Q. All right. Did you ever inform Provost Whittaker about the regulation 9.007 and what E&G funds could be used for?

A. No.

Q. Did you ever tell him what E&G funds could not be used for, aside from the audit comment?

A. I don't recall.

Q. Okay. Were you the one that presented the August, 2014, E&G allocation document that required his

signature, as well as President Hitt's?

A. Yes.

Q. And do you recall that time when you presented it to him?

A. I recall that I would have had a meeting and gone over that report with him in detail, yes.

Q. Okay. So then identifying each project and their funding or why they are on the form to begin with?

A. I think it was -- I think it was either a two- or three-page document. We would have gone over those couple of pages. Was it a two-page document? In 2014, was it a two-page document?

MS. MITZ: We may have it.

MR. RUBOTTOM: It may be in your packet. I'm not sure. I'm trying to find out here.

MR. PARKER: 2013/14 was a two-pager.

MR. RUBOTTOM: The 2014/15.

UNIDENTIFIED SPEAKER: It was a three-pager.

THE WITNESS: If I could look at it, it would be helpful.

MR. GREENE: Do we have it? Oh, don't just put it in my hand. Make it clear.

MR. RUBOTTOM: Tracy, could I see the big packet and see if it's in there, because then we can discuss the particular tab.

But go ahead and look at that. That's fine.

THE WITNESS: So I would have spent a considerable amount of time with Dr. Whittaker going through this document, explaining what it was for, what it represented, why I was giving it to him, what the process was for him to sign it and for him to take it to Dr. Whit -- Dr. Hitt, sorry, for Dr. Hitt to sign.

And we would have gone through -- I don't know if we went through line by line every single, you know -- police, three new officers, but we would have gone through what this document -- what the components of this document were, what it was doing; that it was giving the budget office authority to allocate these items, how it related to the overall university budget. So I would have --

BY MS. MITZ:

Q. Okay.

A. I -- I would have extensively gone over how this document fits in to the university's budget, what it was -- what the authority that -- the authority that it was giving us and why he was receiving it and why he was having to take it to Dr. Hitt.

Q. Okay.

A. For both their signatures.

Q. Very thorough. Okay. So do you recall whether he asked a lot of questions?

A. Yes, he would have asked a lot of questions.

Q. Okay. And were you in a position to answer all of those questions?

A. Yes.

Q. And did he ultimately sign the form?

A. Yes.

Q. Okay. During the time that Dale Whittaker was the provost, can you give me an idea -- and I am asking for an estimation here -- of how many times he would have been presented with these various documents that reflected the funding for either Colbourn Hall or Trevor Colbourn Hall as being from E&G?

A. So can you restate that again?

Q. Sure. What I'm looking for is an estimation of how many times you think Dale Whittaker would have seen documents that showed E&G as the source of funding for the Trevor Colbourn Hall or the Colbourn Hall project? Would it be one document? Did he see ten? Did he see fifty? Can you estimate?

A. Yes. So it wouldn't be just one type of document. The E&G commitments list had it, the allocation documents had it, capital funding documents had it, e-mails that he was copied on where the budget

transfers were occurring, he was copied on those as the source of the -- as the decision source on those allocations.

So I would say -- I would give an estimate of at least 30 documents that he would have seen that on.

Q. Okay. And at no time in looking at those approximately 30 documents did he ever ask about E&G and why it was being used for these projects?

A. No, not to my knowledge.

Q. He didn't ask you?

A. Right.

Q. Okay. And correct me if I'm wrong, but my understanding is when he took the position as provost, he was responsible for the university's annual budget. Does that sound right to you?

A. Yes, that's right.

Q. So that encompasses the whole budget; right?

A. Yes, yes.

Q. Okay. While he was provost, did he claim ownership over the university's budget or did he limit himself to the academic budget?

A. No. He claimed ownership over the whole university's budget.

Q. Did he give himself a name like university budget officer or something to that effect?

A. I don't have knowledge of him giving himself a name.

Q. Okay. Did you ever get the sense that Provost Whittaker was intimidated by Mr. Merck?

A. No, not at all.

Q. Did you ever get the sense that Provost Whittaker was afraid to stand up for anything that he believed in or to ask for anything that he wanted?

A. No, not at all.

Q. Have you heard his statements, his public statements about how he didn't think that he could question Mr. Merck's decision to use E&G because he had been with the university for so long and was effectively tight with Dr. Hitt? Have you heard that statement?

A. Yes.

Q. And do you disagree with that statement? Well, let me ask you this way. Do you disagree that it appeared that he felt like he couldn't question Mr. Merck?

A. Yes, I disagree with that.

Q. Okay. Did you ever see him question Mr. Merck --

A. Yes.

Q. -- or challenge him?

A. Yes.

Q. Can you give us an example?

A. I can't think of a specific example, but it --

Q. Let me ask -- go ahead.

A. So in the budget chat meetings, there were requests for funding that were brought forward either by people contacting Dr. Whittaker for a funding need or people contacting Bill Merck for a funding need.

All of those funding needs were discussed in those meetings between those two, and it would not be uncommon for Dr. Whittaker to question or not approve or disagree with a funding request that had come forward.

Q. From Mr. Merck?

A. Yes.

Q. Okay. That's a good example. Okay.

A. I wanted to say one more thing, if it's okay, for the budget chat meetings. The other --

Q. Okay.

A. The other thing that became a conversation at the budget chat meetings was the -- the budget processes that were being developed under Dr. Whittaker's leadership.

So the university budget committee was resurrected. We talked in those meetings about who should be on that committee, how that committee should operate, how many people -- you know, what types of

processes we wanted to implement in those committees. That type of a conversation would occur, not just a resource decision.

And Dr. Whittaker and I worked very closely on the university budget committee processes, procedures, and that was a university-wide committee or -- that committee dealt with university-wide budget issues.

I was going to say, and in fact one of the big things that that committee did was about a little over a year after Dr. Whittaker was here, we held a -- what was called a budget philosophy meeting where we were trying to sort of educate the university community, all the VPs, all the deans that had all the -- that had all the units about, you know, kind of the university budget philosophy, resource -- you know, the appropriate use of good, fiscal, sound resource management, if you will, of those units. And considering all of the resources and making smart, you know, use decisions of their resources.

And Dr. Whittaker basically recommended that budget philosophy meeting, and we presented that to the whole university community.

Q. Okay. And you guys also worked on the facilities budget committee together; is that correct?

A. Yes.

Q. And is that the -- was it your idea, his idea, a combination of both of your ideas to form that committee?

A. It was my idea.

Q. Okay. And how did that come up, I guess?

A. Well, the university budget committee became a collaborative way for representation across the university units to have sort of a say in resource allocation decisions or at least, you know, have a voice. And so that same process wasn't really happening with facilities decisions.

And so because that one was working well, I brought it up as an idea to Dr. Whittaker. He had seen something similar at Purdue, so he liked the idea, had some immediate knowledge of how that could be, you know, an effective process. And so we started that so that prioritization of what facilities were needed on campus could be collectively discussed by multiple -- you know, represented areas.

Q. Who attended the facilities budget committee meetings?

A. They were attended by the members of the committee which had a representative, kind of a senior representative, like normally a vice president or maybe another senior officer within an area across campus. So

there was probably about 12 to 14 members of the committee.

It was -- Dale Whittaker was the executive sponsor of it, as well as Mr. Merck. There were support staff that attended, so myself was a support staff, Christy was a support staff, a couple more people in my office were support staff, and some members of the Facilities and Safety department were support staff. And some members from -- it's called SPA, like the academic affairs space office. They attended as support staff.

So we were there to help provide information to the committee for the committee to consider and work with.

Q. When you say Provost Whittaker was the executive -- executive sponsor?

A. Sponsor, yes.

Q. Is that effectively a chair?

A. Yes.

Q. Okay. All right. How often did that committee meet?

A. I think it met monthly.

Q. And was E&G funding discussed in those meetings?

A. Yes. The meetings were more discussing what

the facility needs were.

Q. Okay.

A. It really had just gotten up and running. I think it had been in existence -- it was getting its legs so the first sort of task of the committee was to start trying to identify what the university's facility needs were and to help prioritize those needs. And with the ultimate goal of once that occurred, helping to figure out how we could get that accomplished.

Q. Okay. Do you recall whether the Colbourn Hall renovation or the Trevor Colbourn Hall construction project were discussed in the facilities budget committee meetings?

A. I don't recall.

Q. Okay. Do you have any recollection as to whether that was discussed in the university budget committee meetings?

A. It was not.

Q. All right. If you don't mind, I would like you to flip to tab one in that packet. I just want to run a couple of documents by you.

The document at tab one should be the agenda for the March 13, 2017, facilities budget committee meeting. Do you see that?

A. Yes.

Q. Do you recognize that?

A. Well, I recognize it's the minutes prepared by Mark Wray from that meeting.

Q. Okay.

A. I don't recall that I read them --

Q. Right.

A. -- previously.

Q. I want to ask you a couple of questions. So the first page, there's a line that's highlighted. It says "four categories on the list," and then what follows is one, PECO, two, CITF funding, and then on the bottom of the following page, three, other state sources and then four, non-state sources.

Am I to understand that these four categories were discussed in this meeting and that's why they are reflected in the minutes?

A. Yes. It looks like that.

MR. GREENE: Do you have a copy for us?

BY MS. MITZ:

Q. And that's specific to what --

MR. GREENE: I apologize.

MS. MITZ: That's okay.

BY MS. MITZ:

Q. The four forms of funding, do you recall discussing that with members of the committee or that it

was discussed?

A. So it looks like in reading the beginning of these minutes, this was what was being discussed in this meeting as the CIP, the capital improvement plan. So it looks like these -- these categories which are, I think, on the CIP were being described to the committee as what they were.

Q. This was like introductory material to them for the CIP?

A. This was the -- so the committee was formed. I don't recall exactly when it was formed, but it was -- soon after it was formed, one of the tasks that it sort of took on was at least familiarizing itself with the CIP, with the intent that, going forward, it would be able to influence or -- help, not influence -- but help inform the projects on the CIP list.

Q. Okay.

A. And so the problem was the committee hadn't been up and running well enough yet to really be able to inform, I think, the CIP list that was due then. But it was kind of the first time it was presented. The folks on the committee were not necessarily familiar with the form, so it was more of an educational process.

And to the extent that there was any thoughts or conversation about the projects on the CIP form, it

would have been discussed.

Q. Okay.

A. So that's my memory that happened in the beginning of this committee, was the CIP sort of came first before the committee had had a chance to work on what it -- what it thought the internal priorities were and what it thought was a good list for facilities, and it was presented with this form that was due. And so we were trying to kind of educate the committee and work through that.

Q. Okay. If you could flip to page 2 of that document, there's a portion in the third full paragraph that's highlighted, and it says the review sequence is budget committee, to Hitt, to trustees, to BOG.

Do you agree with that statement, that the five-year capital improvement plan would go through those hands before making it to the BOG?

A. So the process -- so by budget committee here, I'm not sure which budget committee it's referencing, if it's referencing the facility's budget committee.

What I recall -- I don't know if these are the right minutes for it, but what I recall is that the plan was for that document to go from the facility -- the facilities budget committee, once it was up and running and had its legs, then to Dr. Hitt, and then to the

trustees, and then to the board of governors. I don't know if it happened. I don't know if it was happening at this time or not.

Q. Okay. Let's say prior to this, so prior to March of 2017, did the five-year capital improvement plan also go through the hands of the general counsel and the chief of staff prior to making it to the board of trustees?

A. Well, prior to the facilities budget committee, I had no involvement with the capital improvement plan --

Q. Okay.

A. -- other than to see it in the facility, on the agenda. And my office kind of did a quality control of materials presented to the -- to the facilities and finance committee, made sure things footed and, you know, were aesthetically nice. So that's the only involvement that we had on the CIP is when it was on the agenda.

Q. Okay.

A. So I don't know who it went through and I didn't really understand it until -- until the facilities budget committee started to get educated on it.

Q. That makes sense.

A. And I was involved in the facilities budget committee.

Q. Okay. One last question on this document. If you glance towards the bottom, the last paragraph on page 2, "'internal' list" is highlighted. If you could read that, that sentence or that paragraph, and my question for you is, do you know what the internal list is?

MR. RUBOTTOM: What about referencing the March document, Carine -- I mean the September, the September document.

MS. MITZ: What tab is that?

MR. RUBOTTOM: Three. If you look to the attachment, would that be what you are calling the five year internal list?

THE WITNESS: Yes.

MR. RUBOTTOM: It looks different from a CIP. It seems to have the same buildings.

THE WITNESS: Yes, yes.

MR. RUBOTTOM: But it includes sources of funds categorized as external or internal and then funding needs.

THE WITNESS: Yes. So what we were trying to go with the facilities budget committee was come up with an internal list that was maybe more realistic.

We hadn't gotten there yet, but my understanding of the CIP is any potential project that might come up has to be on that plan or there's no authority to do it or something like that.

And so it oftentimes was described as the wish list, and so that was -- and always totaled this huge dollar amount that was unrealistic and unreasonable.

And so what we were trying to do with the facilities budget committee, Dr. Whittaker and I, was actually get to something more realistic that the university was functioning from as opposed to a big long list of every potential project that might happen.

So we started off with, okay, this is really the internal list based on the way things used to work, which was gathering of facility needs by different people before the formation of the facilities budget committee. But the intent was to move forward with the facilities budget committee actually informing and having input into that internal list and have it be a more realistic list.

So we started off with just here's an internal list of everything that we know, but the plan was and we had a facilities budget retreat at some point

after this time period to start to better -- better -- create a list that was more appropriate for the university's priorities.

BY MS. MITZ:

Q. Okay.

A. Does that make sense?

Q. It does, yes.

So let me have you flip to tab two. It's another set of minutes from the facilities budget committee meeting that occurred on April 7, 2017. In the fifth paragraph down, you see Colbourn Hall is misspelled, but also highlighted.

So I wanted to see if you had any recollection about any discussions that occurred about Colbourn Hall at that meeting.

A. So it looks like here we're discussing the capital improvement plan. I'm not sure.

Q. Do you have any recollection about discussions surrounding Colbourn Hall at that meeting?

A. I am not sure what -- I'm not sure -- I'm not sure what list this is referring to. If this is referring to the capital improvement, the CIP, or the internal list.

Q. Okay. Fair enough.

A. So I don't know about what the discussion

around it would have been.

Q. Okay. On the second page we've highlighted the sentence that starts out, Whittaker confirmed that the arts building amount, in parens, $33 million, is supported internally. Do you know what he meant by supported internally?

A. I think that means -- I don't know how to phrase it; like wanted, like that it was a priority for the university, not funding. I think -- I think -- that's what I think this is talking about is that the university desperately was interested in getting a performing arts center and had been for years, and that interest was still strongly there.

Q. Okay. I appreciate that clarification.

Let's see. So let's go back to the third tab, back to that September agenda, and I want to direct you to the attachment we were just at a few minutes ago, the five-year internal capital improvement plan.

The second page lists Trevor Colbourn building and Colbourn Hall demolition under the heading academic?

A. Uh-huh, yes.

Q. It has the full amount, $38 million, and then under secured funding sources, the $38 million appears under total internal.

So when Provost Whittaker would have seen this

document, would he have an understanding of what internal and external secured funding sources were?

A. Yes, I think he would.

Q. And do you think that based on conversations that you had with him or your review of this document with him?

A. I think that based on the fact that it -- E&G had been represented on many prior documents that had the 38 million.

Q. Okay. So not being familiar with any of this stuff, I guess my question is, why do some lists break down the funding sources down to E&G, auxiliary, the other CITF, and this one is more -- less detail. Why is there a difference in the two forms?

A. I think this one, the purpose of this one was to -- this one was more exhaustive. It was -- the bigger purpose was to identify projects that had funding needs that had not been fulfilled, not to really -- not to really inform of what the secured funding source was for the other projects.

If any questions were asked, they could have been answered, but because I think actually the funding sources are in this document, you know, in hidden rows.

Q. Oh, I see.

A. But the purpose of this was to come up with,

kind of like I said, that total list of what's being -- what's been brought forward as a facility need up to this point in time, and whether or not it had -- funding had been identified for it already or not.

And the focus would have been more on the large 400 million of projects on the list that don't have any funding source identified.

Q. All right. Let's see. Can you flip to document number four? If you could just take a look at that e-mail and let me know when you've had a chance to review it.

A. Okay.

Q. All right. Do you know -- do you recall what was meant by, we're going to "review the status of the facility reserves and to discuss the potential use of such reserves"?

A. So the only facility reserves, if you will, at the university was a $1.5 million allocation that the university budget committee had made towards facility -- deferred maintenance and facility needs.

So I don't recall the year that allocation was made, but it was an allocation made of recurring money so that every year there was at least a million, five available for, you know, projects that popped up like a lab renovation or a clean up of a lab or anything that

-- and that, that reserve was given to the purview of the provost and Mr. Merck to decide what the most critical uses of that million, five was each year. That's what I think this is talking about.

Q. Okay. And just to skip backwards for a second, when we were looking at the attachments to the agenda for the September meeting, would you have given those sorts of things to Provost Whittaker ahead of the facilities budget meeting so that he could be prepared for the meeting or would he be seeing those sorts of documents for the first time in the meeting?

A. Both would occur.

Q. Okay.

A. So we might -- we would oftentimes give him documents that we were preparing also for the facilities budget committee, or any meeting, actually. So it's likely that he would have received this, yes.

Q. Okay. Did you ever intentionally withhold any information from him concerning funding sources for any capital project?

A. No, no, absolutely not.

Q. All right. Let me ask you about the statement that Mr. Merck made in Provost Whittaker's presence and possibly President Hitt's presence about the audit comment.

Were you there when Provost Whittaker heard the comment?

A. Yes, I believe I was.

Q. Can you kind of set the stage for me and tell me where, what they were talking about, what was said?

A. So my recollection of -- I have a recollection of a meeting where I was in Dr. Hitt's office. I wasn't usually in Dr. Hitt's office, rarely, so I have a recollection of that. I was there with Bill Merck and Dr. Whittaker, and I don't recall the materials we had, but I am sure we had a list of projects and the funding sources of those projects.

That would have been the common way. That's probably why I was there was my team might have produced that document, and so therefore I was there to answer any questions about it.

And the funding sources for the projects on that list were discussed. It was brought up that it would have been like the other capital project lists that have been produced in this investigation that showed, here's the project, here's the funding sources that are -- have been identified for those projects, and that the projects and the funding sources would have been discussed in that meeting.

Q. Okay. And so in what context did Mr. Merck

make the comment that proceeding this way might result in an audit comment or audit hit?

A. So in the context of talking about Trevor Colbourn Hall or the Colbourn Hall renovation and the replacement building, and the fact that it was being funded from E&G, that would have been on the schedule, the comment that it might produce an audit comment was made.

Q. And did either Dr. Hitt or Provost Whittaker respond to that statement?

A. I recall Dr. Hitt responding to the statement that he and -- you know, that they felt like that was a -- it was an emergency situation and a justifiable use of the funds.

Q. So he okayed it?

A. Yes, absolutely.

Q. Do you recall -- okay.

Do you recall Provost Whittaker saying anything?

A. I don't recall if he did or not.

Q. Okay. Do you think you would have recalled if he said, wait a minute, that doesn't sound right, I need to better understand this, or if he started questioning it, do you think that would have stayed with you?

A. Yeah. He absolutely didn't challenge the

decision or the -- to me, this was a decision that he was involved in, so there was -- I don't recall him even saying anything necessarily about it, but there was definitely no challenging the decision.

Q. Okay. And did you ever witness any other conversations where that audit comment was made in Provost Whittaker's presence?

A. I think it would have been made in a budget chat meeting, but I don't have a specific recollection of who was present when that comment was made.

Q. Why do you say you think it was made? Like do you recall hearing it, you just don't know the specifics or someone else told you that may have happened?

A. No. I recall hearing that comment many times. I just don't recall the exact locations, forum, people who were in attendance as it was stated.

Q. Okay. So what I'm hearing is that you may not be able to tell us definitively that Whittaker was told that it may result in an audit comment more than once, is that correct, in your presence?

A. I don't have a specific recollection.

Q. Okay. That's fair.

A. I do know that Dr. Whittaker, after the investigation started, told me that he recalled Bill saying it would cause an audit comment or would cause an

audit hit or whatever term.

Q. He made that admission to you after Bryan Cave was retained?

A. Yes. The day that he met with all of Bill's direct reports to say that -- that, you know, Bill had resigned and was gone, and Misty Shepherd and Kathy Mitchell were interims. He met with all of Bill's direct reports.

And after that meeting, I met with him and that's when he said he recalled Bill saying it would produce an audit comment or might produce.

Q. Okay. Were you in the meeting or did you just meet with him after the meeting?

A. I met with him after the meeting and I was in the meeting.

Q. Okay, good. I have some questions for you then.

What exactly -- what was the purpose of the meeting that he called? Was it just to let everybody know that Merck was leaving and there would be other people to report to?

A. Yeah. That was the purpose, as well as to talk to the team.

Q. Okay. And do you recall President Whittaker making any comments about maybe initially wanting to

present what happened in one way, but then had been swayed or coached to present it another way?

A. Yes, I recall that.

Q. Can you tell me a little bit about that?

A. So in that meeting he stated that -- I think they had just come back from the board of governor's meeting. And in the meeting he was praising Bill, he was telling, you know, all of us that we should reach out to Bill, thank him for his service, that he respected Bill's decisions, that Bill had built this campus, that kind of thing. So he was speaking very highly of Bill.

Q. This is after the BOG meeting?

A. Yes.

Q. Okay.

A. And encouraged all of us to reach out to Bill.

And he said that he wanted to -- I think -- I don't recall in what order, but with -- with regard to how he handled this topic at the board of governor's meeting, he said that he wanted -- that he wanted to discuss more than -- than the UCF incident that was being considered a violation. He wanted to talk about the lack of capital funding and less restrictions on the use of funds, but he was advised not to, sort of in the halls of Tallahassee, and to just sort of be contrite

for this situation that UCF was in.

Q. Okay. So it sounds to me like what he was saying was, listen, I was coached not to tell the BOG that we had justifications for doing this, and just to basically accept responsibility and kind of keep quiet. Is that kind of what you are conveying?

A. Yep. Be contrite and, in my words, take the beating and raise other questions or concerns with the system, if you will, at a later date.

Q. Okay. Did he ever mention who suggested this? The coaching, did that occur by someone in Tallahassee or someone at UCF or do you know?

A. I interpreted it to be in Tallahassee --

Q. Okay.

A. -- and possibly governors and possibly other -- you know, other people.

Q. Okay.

A. So he didn't name names, I can say that.

Q. Gotcha, okay. And so what was discussed in the meeting that you had with him right after? Was it just the two of you?

A. Yes.

Q. Okay. What did you guys discuss?

A. So I just stopped in to ask him to actually speak to Christy Tant. She was very upset -- everybody

was very upset about the situation. And so I wanted to -- Christy and I worked very closely with him over the years.

And I asked him -- it had been a nice meeting, that he spoke to all of us to talk to us about, you know, Bill's departure, and basically it was a good leadership meeting to make you feel like, okay, things aren't going to fall apart here. Bill, our strong leader, was gone, but we're all still here.

And so I asked him to have that conversation with Christy, and he wouldn't. He said -- he said -- he said, well, with you there? And I said, well, no. I just wanted him to speak to Christy because they worked very closely together.

And so he said, you know, no, that that wouldn't happen.

So that was the nature of the meeting. And then he said he didn't even know what was going to happen to him out of this investigation, and that he -- you know, that he knew that Bill had said that it might produce an audit comment. So that's what I remember about that meeting.

Q. Okay. So during your course of employment and I guess particularly when you worked closely with Provost Whittaker, did you have occasion to work closely

with any of the trustees?

A. No, not really. The only trustee I worked closely with was Bob Garvy on the investment policy, the investments of the university.

Q. Okay. And I think we might have some questions for you about that later.

Just as a side note, is that athletic building named after him, the Garvy athletic something or other?

A. Yes. He was a donor. That donation occurred just within the last couple or three years or within the last few years. He made a large donation for the Garvy Nutrition Center, I think it is.

Q. Okay.

A. I think his son played football here, so he had a big interest in nutrition for the athletes and made a large donation for it.

Q. Very nice. Okay. So I understand from the things that I've read that you were aware of the regulation 9.007 before this happened, and that you may have mentioned it to Mr. Merck when you found out that E&G funds were going to be used for Trevor Colbourn Hall.

And that he told you, well, if it's something we have to do, we might get an audit comment. And you respected his seniority and believed that he was doing

the right thing and you didn't object anymore. Is that kind of a condensed version of what happened?

A. Well, I was not aware of the regulation, and I didn't bring the regulation to Bill Merck's attention.

Q. Okay.

A. So I was -- or at least I was not aware of the regulation. I had seen e-mails now where it's attached and -- but I didn't -- it wasn't in my mind, that regulation.

And I didn't understand that regulation to relate to the Trevor Colbourn Hall situation and I didn't bring it to Bill Merck's attention --

Q. Okay.

A. -- in that vein.

Q. Okay. Did you ever tell him, oh, this might not be right or voice any concerns about the use of E&G for that construction project?

A. So when the construction project first started, it was a renovation. So at a point in time it became a renovation and then a replacement, kind of a combination of the two.

And at that point, I mentioned to Bill that I wasn't aware that we were able to use E&G funds for new construction. I didn't know -- it hadn't been done before.

So I brought that to his attention, that that wasn't a normal -- a normal course of using E&G funds.

Q. Okay. And what was his response?

A. His response was that -- that he didn't feel that he had other options, that there was an emergency situation -- it was an emergency situation, and so he felt like it was justifiable use of E&G funds or -- or a justifiable use of funds or a justifiable situation. I'm paraphrasing what he said, obviously.

Q. Of course, of course, yeah.

Can you estimate about how long before the meeting we talked about earlier, the meeting in Hitt's office where the audit comment was made, how long before that that you had this conversation with Mr. Merck?

A. I have no idea. I don't know.

Q. Okay. All right. So if you don't mind, I would like you to flip to Document 5 in the packet. It's another e-mail, so I'd just ask that you take a look at it, get familiar with it, and let me know when you're ready.

A. Okay.

Q. Okay. Do you remember this e-mail?

A. I remember it now that I've read it.

Q. Okay. So if you can, if you know, what I'm trying to figure out is what happened before this

e-mail.

So I see David Noel is initially e-mailing, asking about using that $3 million. Do you know anything about any conversations that happened prior to this e-mail being sent?

A. I don't recall, but the e-mail infers that David had asked whether it was -- in some form, I don't know if it was by phone. I don't know if it was asked to Lynn, and Lynn asked me. I'm not sure.

Q. Okay.

A. I'm not sure what precipitated this e-mail. But clearly, it was him asking if they could do this.

Q. All right. Yeah, yeah. Okay.

Who is David Noel?

A. He was the CFO, I think his title was, for the College of Medicine.

Q. And who was Deborah German?

A. She is the Dean of the College of Medicine.

Q. And who is Steven Omli?

A. He is the director of finance for the College of Medicine.

Q. Okay. So all medicine people, gotcha. Okay.

Now, do you have any recollection as to whether you had to do some research to send this e-mail or if you were already familiar with the regulation by the

time you sent this e-mail?

A. I don't recall.

Q. Okay. Do you recall whether you got a lot of e-mails like that, asking whether E&G could be used for whatever reason?

A. Not normally like this.

Q. Okay. So if you don't mind, flip to tab six. It's another e-mail. This time you were just cc'd on it. But if you could take a look at that and let me know when you've had a chance to review it.

A. Okay.

Q. Do you remember this e-mail?

A. I do not. I mean, I read it now, but --

Q. Okay, yeah. No one seems to have any recollection of this e-mail.

At this time in March of 2015, was Ronnie Korosec Dale Whittaker's chief of staff?

A. Probably not.

Q. Okay.

A. Only because I think March of 2015 is when the reorganization first went into place -- sometime in March, 2015 -- and Ronnie was not chief of staff right off the bat, is my recollection.

Q. All right. Do you have any recollection as to whether you would have followed up on this, because you

were cc'd on it? Do you know if you would have responded or chimed in?

A. I would not have. A lot of times, E&G -- these kind of questions would go to internal audit, and internal audit would address the issues. Whether it was coming from a college or a unit or somebody at the university, they would -- university audit was sort of the source of these kinds of answers.

So unless I was involved in whatever was underneath this, receiving this as a cc would not have prompted a response from me.

Q. Okay. All right. We've already talked about the e-mail at seven.

Let's talk a little bit about the presentations to the board of trustees. Do you have any recollection of discussions of E&G being the funding source for either Colbourn Hall or Trevor Colbourn Hall at any committee meeting or any board meeting?

A. I've seen the transcript where it was -- where I said that carry forward funds were being used for Trevor Colbourn and Colbourn Hall, so.

Q. Let's talk about that. What does -- what does carry forward mean to you?

A. It's E&G funds that are not spent in one year or E&G funds that are received by the university that

are not spent in the year that they are received and they carry forward to the next year.

Q. Okay. So in your normal practice when you were employed at UCF and you were talking about E&G with Christy Tant or someone else in your office, would you refer to it as carry forward or would you refer to it as E&G or something else?

A. The funds that roll over would be referred to as carry forward.

Q. I should have clarified. So would you call it E&G carry forward or would you just call it carry forward?

A. Carry forward.

Q. Okay. And was that common in the finance and accounting world in that part of the university?

A. Yes.

Q. Do you know whether the trustees would be familiar with that term and know that carry forward meant E&G?

A. In my opinion, yes.

Q. Okay. Why do you say that?

A. Well, carry forward funds was not -- it was a topic over multiple years, carry forward funds. It was a state topic, it was a university topic. And so I just feel like carry forward funds were known across the

whole university and by the board of trustees and what they were, because it wasn't -- it wasn't a topic not normally discussed.

Q. Okay. Do you recall any other time during the board meeting when you would have referred to carry forward as a funding source for any other project?

A. I don't recall.

Q. Okay. If you read the Bryan Cave report, then you probably read that some of the trustees disagree that this can be an E&G.

So aside from what you just described, is there anything else that you can point to, like do you know if they were trained when they first became trustees on the different sources of funds?

A. On a couple of occasions, I do think -- on a couple of occasions I accompanied Bill to meet with a new trustee to explain the university's budget. We would go through kind of the -- you know, the budget packet, if you will, to try to explain the terms, the categories, that kind of thing.

So I -- so that training sometimes happened that I was involved in. I think Bill Merck did that more often. I was involved in, I think, training a couple of trustees that way.

Q. So it would be done on an individual basis. As

a new one came on board, you would spend some time with him or her?

A. Yes, the couple of times that I was involved, that was the case.

Q. Do you have any recollection as to which trustees you sat in on?

A. I know I sat in on trustee Alex Martins' because I had to go down to the Amway building, and I forget who the other trustees were. I might have done one or two other trustees.

Q. Okay. And you feel confident during that meeting it would have been explained that carry forward meant E&G?

A. I can't say that those specific words were used, but we talked about, you know, all the different categories, E&G, auxiliary, the overall university budget, DSOs, that kind of a training occurred.

Q. And do you recall whether the trustees that you sat with were engaged, asking questions, or sitting there absorbing everything?

A. I would say a little of both.

Q. Okay. And then back to that board meeting where you were asked to describe the source of funding, and you said carry forward. Did any trustee ask you any questions about that?

A. No.

Q. So did you feel as if they accepted that answer and were comfortable with it?

A. Yes. In fact, I think Mr. Merck asked me to even expand a little bit on what carry forward was. So I think I tried to explain that it rolled over from one year to the next, unspent funds in the prior year, and received no questions.

Q. Okay. Did you have --

MR. RUBOTTOM: Let me ask, do you recall which board meeting that was? Because we've listened to a bunch of tapes that were committee and board meetings in '14 and '15 -- at least a committee meeting in '15 where these projects were discussed. Certainly in '16, the committee and the board both met on the final plan.

Do you recall which meeting you are talking about where you explained carry forward?

THE WITNESS: It's in the Bryan Cave exhibits or it's in his report.

MR. RUBOTTOM: So one of those meeting that he had excerpts from?

THE WITNESS: One that he has transcripts, because I didn't even recall it until he showed it to me.

MR. RUBOTTOM: Okay. Since then, have you gone back and listened to any of those meeting tapes or reviewed any of those meeting materials to recollect for your own recollections of how those meetings went down?

THE WITNESS: No, because I don't know how to get to the recordings. They are not on the website. In fact, we even asked. After Bryan Cave asked me about that transcript, we asked for a copy of that transcript, and he wouldn't give it to me and my attorney.

MR. RUBOTTOM: Did you ever ask the president's office for copies of the tapes or the transcripts?

THE WITNESS: No.

MR. RUBOTTOM: That was all while you were still employed; correct?

THE WITNESS: Yes.

MR. RUBOTTOM: Do you have any recollection of the April 14th finance and facility committee meeting where Colbourn Hall construction, those three options or three subdivided options of -- and they talked about deferring renovation. Do you have any recollection of the committee meeting where finance and facilities first approved the new building?

THE WITNESS: No.
MR. RUBOTTOM: Okay.
THE WITNESS: I don't have specific recollection.
I didn't recall that later meeting until Bryan Cave showed me the transcript.
MR. RUBOTTOM: How many times do you think you've addressed the board or a committee about carry forward or other categories of money?
THE WITNESS: So, I normally did not address the board of trustees unless there was an agenda item that I was presenting.
So we presented the annual operating budget, which has all the categories, E&G, auxiliary, concession funds. So I would present that to the board for the annual budget. I would present the quarterly investment reports, so I would address the board then.
But normally, unless there was an agenda item under my name, I wouldn't be addressing the board unless somebody asked me a question, like Mr. Merck did that day.
MR. RUBOTTOM: But that was a finance and facilities meeting, I believe?
THE WITNESS: Yes. That's what I'm actually

talking about.

MR. RUBOTTOM: But on a building, it would have been usually Merck and Kernek explaining the project?

THE WITNESS: Yes.

MR. RUBOTTOM: You wouldn't ordinarily be getting up and talking about sources of funding?

THE WITNESS: Right.

MR. RUBOTTOM: So Bill called on you in that meeting?

THE WITNESS: Yes.

MR. RUBOTTOM: And you gave an answer, a direct answer, and I think Merck followed that up with some comments.

THE WITNESS: Yes.

MR. RUBOTTOM: Did you have any sense in that meeting -- well, your only recollection is from reading that.

Okay. I'll stop interrupting, Carine.

MS. MITZ: It's okay. I think we've covered a lot of stuff already.

MR. GREENE: Do you want a break?

MR. RUBOTTOM: Do you guys want to take a break?

THE WITNESS: I'm okay.

MR. RUBOTTOM: Well, let us know when you want to stop. We'll probably need to stop at least once.

BY MS. MITZ:

Q. Ms. Clark, did you ever get the sense -- well, let me ask it this way.

When you started working closely with Provost Whittaker, did it appear to you that he was grasping the information that you were sharing with him or trying to teach him or show him or did it seem like he was having difficulty following?

A. No, he was -- he was grasping it.

Q. Okay.

A. We spent a lot of time together, me going over information.

In fact, what I had heard as to why he wanted me to be a direct report to him is he thought I explained things very well. He liked the quality of the information me and my team produced, and he felt like I explained things in an understandable way.

And so -- and I'm kind of a teacher in that regard, so I usually go into a lot of detail. I can start at a bigger picture and then walk people through the details.

And so I did that continuously, and he was very engaged, always asked a lot of questions. I tried to

always make sure he and anybody else I was, you know, trying to get to understand an Excel spreadsheet that they didn't prepare, that you or your team did, that they understood what the spreadsheet said.

We oftentimes prepared summaries that then worked their way down to the detail level so the people understood what, you know, the finance and accounting office was putting together, because it was a lot of detail. And so I spent a lot of time doing that.

Q. And I mean, he was effectively your boss when you had the dual reporting; right?

A. Yes, yes.

Q. So you wanted to prepare your boss?

A. Yes.

Q. Was there any incentive for you to not adequately prepare him?

A. No. I was a huge supporter to Dr. Whittaker.

Q. Okay. I just want to skim through the other capital projects that were later discovered to have been funded with E&G.

Do you know who -- I think I know the answer, but I want to know if you know the answer.

Do you know who directed those E&G funds to be transferred to those construction projects?

A. So which projects are you talking about?

Q. For instance, the band building.

MR. RUBOTTOM: Hey, Carine, I have on my screen that -- that date-ordered list that I use. Can I just show that to her?

MS. MITZ: Sure.

MR. RUBOTTOM: I think you're familiar with that, Tracy. These are kind of the short versions of the transactions that Bev Seay provided me a few weeks ago. And I sorted them by date order because it was real informative to us how decisions were being made and timely.

So, for instance -- and let's try to talk about the bigger transfers. There's a global transfer in June, June 30th of 2016, for the global UCF 1.6 million. Who would have directed that transfer in June of 2016?

THE WITNESS: So the -- the -- so there's a difference between making the commit -- making the resource allocation decision and then the transfer itself.

MR. RUBOTTOM: I was going to get to that, yes.

THE WITNESS: So before we were fired, I wasn't asked to look into any of those answers to these questions -- for these projects, like who asked for the transfer, when did it occur. So I never got an

opportunity to look at, say, Christy's e-mails where she was making the transfer and what she might have been referencing as to what prompted it.

MR. RUBOTTOM: Okay.

THE WITNESS: So I can't answer that question. I can answer some questions on like when -- how the decisions were made.

MR. RUBOTTOM: Well, let's talk about that one. When would the commitment have been made to the global -- that level of commitment made to the global UCF project?

THE WITNESS: I don't know when it was made, but it was made -- it was on one -- it was on an E&G commitment list, which that was kind of a constantly changing document. And I've seen --

MR. RUBOTTOM: Would that have been -- I'm sorry.

Would that have been discussed in the budget chats with Dr. Whittaker in the meeting?

THE WITNESS: Yes, absolutely.

MR. RUBOTTOM: I cut you off.

THE WITNESS: That's okay.

MR. RUBOTTOM: You had said you had seen --

THE WITNESS: Just I've seen that on some of the E&G commitment lists, so that tells me it was

centrally -- it was funded from the central resources.

MR. RUBOTTOM: Now, I've seen capital projects lists that don't have years out there. And then I've seen like that one we looked at a while ago that kind of has a five-year plan on when funds were being allocated or planned.

Did you always have a five-year plan on when funds would be transferred?

THE WITNESS: No. So that --

MR. RUBOTTOM: Okay.

THE WITNESS: That five-year plan that we looked at for the facilities budget committee, that was a new endeavor.

MR. RUBOTTOM: Okay.

THE WITNESS: So we -- we were -- one of the things that Dr. Whittaker and I talked about when I started working for him was we need a five-year operating plan and we need a five-year capital plan. So those were actually goals or -- you know, goals that I was going to start to be held accountable to trying to get a five-year operating plan for this university done, which is a bear, and a five-year capital plan.

MR. RUBOTTOM: Did Dr. Whittaker understand

those goals?

THE WITNESS: Yes. He and I spoke about them, and those were the goals he was going to hold me to for my performance for the next year. So that five-year capital plan for the facilities budget committee was the first time we ever tried to do anything out multiple years.

MR. RUBOTTOM: Let's go to the last big day, because October 31st, there was about $20 million transferred for three downtown projects.

When would those have been programmed or when would those have been approved on a commitment list?

THE WITNESS: I don't know when those would. I don't know the dates.

MR. RUBOTTOM: Would they be discussed in a budget chat?

THE WITNESS: They should have been discussed in a budget chat meeting, yes.

MR. RUBOTTOM: The university budget committee had been meeting for some time. Would those commitments have been discussed in the university budget committee?

THE WITNESS: I don't know if they were or not.

MR. RUBOTTOM: Okay. What about -- what about the $3 million and $6 million commitments for

Research 1, both of them in May of 2017? Would those have been before the -- would those have been committed before the university budget committee had started working or --

THE WITNESS: Well, those were -- so those were not discussed in the university budget committee. They -- that was -- a lot of the funding for those came from the different units that were going into the research building. So that was a funding plan that Dr. Whittaker and I worked on with the different units that were putting researchers into the research building and trying to get different people to be -- you know, different people to contribute towards the build out and the furniture and fixtures and equipment in the research building. So a lot of that funding didn't come from central. A lot of it came from the units, like the College of Engineering and different colleges.

MR. RUBOTTOM: But those would have been on commitment list, E&G commitment lists or would those have been secondary institutional transactions between these departments?

THE WITNESS: Exactly. They would have been second.

So they wouldn't have been -- the E&G

commitment list was only a commitment against central resource.

MR. RUBOTTOM: So these would have been E&G funds in those departments who were contributing that?

THE WITNESS: Exactly. So we worked on what the total -- the total contribution plan, Dr. Whittaker or I did with all of these units, working with Dr. -- with Dale who the deans were working with, reporting to him. The provost's division, which had some of its own funds, contributed towards some of the common areas that the different colleges would be using.

So that was kind of a whole plan put together to help fund the build out, furniture and equipment in the research building, and those funds came from multiple units, including the provost's office.

MR. RUBOTTOM: Okay. I heard you earlier mention that you saw a distinction when we went from renovation to new construction, that you saw -- that gave you pause about proper use of E&G.

I am confused about the build out deal. I understand furniture and equipment. I understand that systemwide everybody agrees furniture and equipment for a new building is a proper E&G

expenditure.

How do you -- how have you come by clarity or do you have clarity about the build out part of a new -- a new construction? To me, it's one thing to come into an old building and remodel for lab space for a new use, but it's a curiosity to me that you -- that your internal finish is somehow treated different from the internal of a new building.

So can you explain to me how you got or if you have clarity about the appropriateness of build out funding?

THE WITNESS: So it was my understanding that build out, furniture, fixtures and equipment were all allowable uses of E&G funding. I didn't differentiate if it was build out for an existing building and build out if it was a new building, particularly if it was build out to a particular researcher's specifications.

MR. RUBOTTOM: I guess what I'm trying to get, what's the difference between furniture and equipment which tend to be things that can be moved around, some of them might be fixtures, but they are subject to being maybe repurposed at some point. And I was thinking build out included cabinetry and maybe internal walls and, you know, glass

enclosures, things like that.

Did you categorize all those things in one category or did you distinguish furniture and equipment from internal walls and space -- internal dividing walls and things like that?

THE WITNESS: So I just use the -- or I just understood the term build out, not what the components of the build out would be. And I didn't differentiate between, you know, build out -- I don't know that that included internal walls, but I think it would include, you know, cabinetry, tables, some things like that, that maybe were fixed, you know, or fixtures or build out.

MR. RUBOTTOM: Well, I'm sorry I don't have those listings, but I've seen a lot of listings where this was furniture and equipment. It says furniture and equipment, and then other times it says build out.

So it doesn't seem to me like the words are used interchangeably. So I'm just exploring that. I have no clue, and I just want to know what your understanding of that is.

THE WITNESS: So I do think build out is different than furniture, but I thought build out and furniture and equipment was all an allowable use

of E&G.

MR. RUBOTTOM: Well, and everybody might think that. We're kind of asking the whole system right now.

THE WITNESS: Yeah.

MR. RUBOTTOM: Thank you for that. Okay, Carine.

BY MS. MITZ:

Q. So what I would like you to do is take a look at the document behind tab eight. It's another e-mail. Let me know when you've had a chance to review it.

A. Yes.

Q. Do you recognize this?

A. Yes.

Q. Okay. Did you have any discussions with anyone after you received this e-mail?

A. So, yes, I had conversations with Kathy Mitchell and Christy Tant.

Q. Okay. And what did you guys talk about?

A. So we talked about, I guess after this, what came back to Christy and I was the more limited list of -- of projects that were going to be presented to the board of trustees, which was, I think, 13.8 million.

So we talked to Kathy about why is the full 46.5 million not being presented? And she informed us

that the president's office wanted to just present the 13.8, and we expressed some concern about that because we had put forward the whole list.

We were sharing that with or shortly thereafter we shared all of that with the auditor general's office, the full 46.5 million, and so we had concerns about only presenting the 13.8.

Q. And what was her response again to why she wasn't going to provide that to the board?

A. Well, my recollection is it was the president's office call, not hers.

MR. RUBOTTOM: Do you know if that would have been Mr. Heston or the president or --

THE WITNESS: I would be guessing that it was probably a combination of the two. This e-mail went to Dr. Hitt or -- I mean Dr. Whittaker.

MR. RUBOTTOM: Thank you.

THE WITNESS: I don't know because I wasn't actually in those meetings.

MR. RUBOTTOM: And who else was privy to that conversation with Kathy?

THE WITNESS: So, Christy.

MR. RUBOTTOM: Christy?

THE WITNESS: Christy and I.

MR. RUBOTTOM: And this was a verbal

conversation?

THE WITNESS: Yes.

MS. MITZ: Very interesting. Okay.

BY MS. MITZ:

Q. So did you ever -- were you ever tasked with locating any of the funds that were used to replenish the E&G accounts?

A. Yes, Christy and I were.

Q. Okay. And --

A. Is that what you were asking, the 13.8, the replenishment of the -- yes, yes.

Q. Okay.

A. Christy had to do the most of that work because I broke my wrist and was out for a couple of days at this point.

Q. Okay. All right. Do you ever recall Dale Whittaker asking that money out of a provost budget be used to fund, in part or entirely, either the CREOL Building or the nursing building?

A. Yes.

Q. Okay. Which one?

A. So the provost's office had some funding that it set up as like a loan fund to the colleges so that if the colleges had a need, instead of just asking the provost to contribute towards something, he wanted to be

able to do a -- loan them the money so that there could be an ROI on, you know, the use of money and just not sort of provide it without asking them to pay it back.

So on the CREOL Building, the university budget committee was involved in the CREOL allocation for the first $4 million. It was a decision made by the university budget committee to fund the $4 million for the CREOL expansion.

MR. RUBOTTOM: Was that E&G?

THE WITNESS: Yes.

MS. MITZ: I wanted to know, too. Okay. Wait a minute. I have to interrupt you. I'm sorry.

THE WITNESS: That's okay.

BY MS. MITZ:

Q. So Provost Whittaker is offering E&G money out of the provost budget for construction of a building?

A. So the loan fund was not E&G.

Q. Okay.

A. The loan fund was from auxiliary money. The university had some sold some broadband capacity at one point and received money, you know, money from, I think, Clearwire and Sprint.

So there was a balance of that -- of that sort of windfall to the university, if you will, that Dale wanted to then make available, a part of that broad --

I'll call it the broadband money. It was auxiliary money to provide loans to the colleges and have them pay those loans back.

So the CREOL -- the CREOL project, originally the request to the university budget committee -- units submitted requests to the university budget committee. It was called an exception funding request process. So CREOL submitted a request for $4 million for the CREOL expansion, so that was one of the items on the list that was being considered. The university budget committee only had available to it E&G funds to distribute.

So in that first year of the university budget committee, the CREOL Building was approved to be funded to the tune of the $4 million dollars, which is what the request was, and that was from E&G carry forward funds.

What happened that year is the university budget committee -- actually, there was no new money, so it decided it was going to reallocate carry forward from units that had it. The carry forward at the university is held by all the units and then there's some that are held centrally. There might be some held at a division level, and then -- but mostly all the units keep their carry forward year after year.

So that year we evaluated the funding held at the unit level, and decided there were areas that had

more than they needed, and we wanted to reallocate that to more critical needs.

So $10 million was identified to reallocate. We basically took that $10 million from those units, and then used it for whatever the university budget committee decided, from the long list of requests, were the most strategic priorities.

So in that process, the $4 million was selected by Dale, Bill Merck, Dean German, M.J. Soileau, who was a VP for research. Dean German was the dean for the College of Medicine, and Bill and Dale. They worked together. We split up into groups to decide how to allocate that $10 million.

And a chunk of the $10 million was given to Deborah German and M.J. Soileau who are researchers or have research areas under them to decide how to use that funding. Dale and Bill were given $2 million for deferred maintenance and facilities projects, and decide how to -- what was most critical on the list for that, and then there was a student success group.

Dale and Bill and the research group got together, and the $4 million CREOL project was on Dale and Bill's list, but they got together and decided that was the most critical need, and so they combined their money. Basically, there was $4 million and $2 million,

and put $4 million of that $6 million towards the CREOL project.

MR. RUBOTTOM: So Dale and Bill with the concurrence of the research group chose to put the CREOL Building ahead of deferred maintenance?

THE WITNESS: Yes, ahead of any other projects on the list.

MR. RUBOTTOM: Do you know when this -- when this UBC meeting was?

THE WITNESS: I can -- I can find out. It was -- I'm guessing now. I want to say May of '15, possibly.

MR. RUBOTTOM: Do you know whether that $4 million was ever transferred to construction for this project?

THE WITNESS: Yes, it was. That's this $4 million on this list.

MR. RUBOTTOM: Oh, I didn't see that.

THE WITNESS: Uh-huh.

MR. RUBOTTOM: I'm still looking for it.

THE WITNESS: It's the $4 million number. It says CREOL.

MR. RUBOTTOM: Wait a minute. I've got a mistake. That happens to me every time I open this thing. It -- it starts on line 17. So there we go.

There's the $4 million. Okay.

Gotcha. So it was transferred in February of '16. And when was the UBC formed?

THE WITNESS: Oh, I don't recall.

MR. RUBOTTOM: Okay.

THE WITNESS: And this is when the transfer might have -- so I don't -- I don't have the information of the dates the money --

MR. RUBOTTOM: Can we look at that September '17 document again for the FBC?

THE WITNESS: So this is the UBC that I am talking about.

MR. RUBOTTOM: I understand. I want to see if CREOL -- do you know when construction was started?

MS. MITZ: CREOL expansion is there.

THE WITNESS: That's the same thing.

MS. MITZ: Okay.

MR. RUBOTTOM: 6.7. And that was estimated to be spent in FY18 on this chart, and total internal was 6.7.

THE WITNESS: Right.

MR. RUBOTTOM: So $4 million came from that collaborative process. Where did the other 2.7 million come from?

THE WITNESS: So a part of that came from the

loan fund, the broadband loan fund money.

MR. RUBOTTOM: Okay.

THE WITNESS: And so -- so after the $4 million was approved, you know, by the university budget committee, then the dean of CREOL or the dean of optics and photonics, in the next year they started working with facilities on cost estimates for this expansion. And there were multiple options that kind of got put forward, you know, some having more space than others.

So I recall working with that dean and Dale on options for the CREOL expansion that ranged from like $5 million to $6.8 million. I've recently seen an e-mail to this effect.

And, you know, they just had more space, more offices, more labs. Really, the interest was to get more lab space. There was an auditorium that they were also trying to build.

So the decision got made to go with the $6.8 million option. And so then the UBC had only allocated $4 million, so the dean had to come up with the balance if he wanted that larger -- that better building, if you will.

MR. RUBOTTOM: Could he spend his E&G on that project?

THE WITNESS: Well, we didn't discuss what he could spend on it or not.

Well, I mean, I remember him identifying sources, but I don't remember us discussing what he could or couldn't use.

MR. RUBOTTOM: Okay. Well, back to the broadband and the loan fund.

In that context, do you believe Dr. Whittaker had a pretty clear notion of colors of money and that he could use that money differently than he could use E&G funds?

THE WITNESS: No.

MR. RUBOTTOM: You don't think he had that clear notion?

THE WITNESS: Well, I guess this allocation was made by the UBC and nobody thought it was wrong. So nobody -- that was just the available, like the broadband money was what the loan fund just happened to be funded from.

MR. RUBOTTOM: Okay.

THE WITNESS: Does that make sense?

MR. RUBOTTOM: Yes, it does, with the exception that -- so why wouldn't he just treat all of his funds the same in the provost's office? Why would there be a separate categorization that this is

broadband money and that the loan fund would just be limited to that piece?

THE WITNESS: Well, that was just an available source of money that he had to be able to make these loans from.

MR. RUBOTTOM: Okay.

THE WITNESS: He could have done the same thing with some available E&G carry forward he had if he had wanted to.

What we were going to do with the loan fund was there was -- you know, he received annually some funding from continuing education, a share of the continuing education funding to the tune of about $400,000 a year. So we were going to use that to replenish the loan fund as colleges maybe started to use it, because otherwise the loan fund would be gone.

The thing is, none of the colleges hardly ever used the loan fund so we kind of ended up disbanding that practice.

MR. RUBOTTOM: I saw a long range kind of funding plan that was at the department level, kind of the vice president level. And it looked like the provost's office had showed their annual revenues and it showed their accumulations. It looked like

the provost's office was accumulating a large amount of money over a period of time.

Do you recall anything like that?

THE WITNESS: So the provost's office was accumulating a large amount of carry forward funds.

MR. RUBOTTOM: What was the purpose of those accumulations?

THE WITNESS: Well, so the reason that was happening is a lot of the new performance funding that the university was receiving was going towards a hiring plan. So I don't know if you've heard, there was like a plan to hire a lot more tenure-track faculty because we had a bad student/faculty ratio.

We had, during the economic downturn, colleges had turned to adjunct faculty, and there's accreditation issues with that. And so there was a need for more tenure track faculty.

MR. RUBOTTOM: But you're accumulating carry forward, and it's really hard to commit carry forward to a recurring expenditure like a faculty member.

And when was that going to start being spent and how was -- how was the recurring, was that going to be used to like five-year or ten-year fund a

position?

THE WITNESS: So the hiring -- so the hiring plan, the provost lines we called them, were that money was held at the provost level. It was expected that when we would get the recurring money from the State, we would allocate it to the colleges for them to hire faculty. They would start searching for that faculty either that year or the next year, and the accumulation of those funds would help the -- would fund the start up packages for those new faculty.

So that's why all those funds were accumulating is it takes a while to hire the faculty. There is actually a need to accumulate those funds because there is a big startup package commitment.

And so that was all happening in the provost's office because until the colleges hired the faculty member, it was kept at the -- at the divisional level, if you will.

MR. RUBOTTOM: But there were recurring funds to support those positions?

THE WITNESS: Yes.

MR. RUBOTTOM: And so those -- those reserves, they would be reported in the fund composition report to the BOG as carry forward that's committed

to some faculty project?

THE WITNESS: Yes, yes.

MR. RUBOTTOM: Okay. That helps me a lot, because a lot of the universities had some big numbers there, and that -- that makes sense to me.

THE WITNESS: And one reason over the last few years that UCF carry forward had grown was because we were -- we were very lucky and successful in receiving performance funds and a whole bunch of it got committed to hiring faculty.

They were put towards cluster, you know, research clusters were created and developed. Those were harder to -- those positions were harder to fill because you're really looking for top-notch experts, like one was a cyber, a cyber cluster, one was like a prosthetics cluster.

So we were looking, you know. We wanted to hire the best faculty, not do it quickly.

MR. RUBOTTOM: Right.

THE WITNESS: And so that was causing some of those funds to accumulate; some purposely so we could use them for startup, and then others just if it took longer to hire the faculty members, it caused some accumulation of funds that then were available for the provost to use for other things.

MR. RUBOTTOM: Thank you. Do you believe the BOG understood those kinds of accumulations?

THE WITNESS: Well, the universities have been trying to explain that, and I do think that they do, because I heard them describe that in meetings, whether it's staff, talking about this -- you know, this issue with the need to have startup funds sitting around.

MR. RUBOTTOM: Right.

THE WITNESS: It looks like they're reserves, but they're really not.

MR. RUBOTTOM: Okay. Thank you. And we're trying to stay away from true academic expenditures and we've been focusing on capital.

But back to the CREOL decision in 2015. You described your reaction in 2014 to the decision to take those E&G commitments for the new Trevor Colbourn Hall, but you said in May, '15, nobody even questioned the CREOL commitment.

Is that because everybody got comfortable with the Trevor Colbourn Hall decision and moved on or in your mind was it just a totally different --

THE WITNESS: In my mind, it was like a renovation, so we didn't.

MR. RUBOTTOM: The CREOL was a renovation?

THE WITNESS: Yes. It was actually an expansion, but we didn't know anything different between a renovation, a $4 million renovation for the CREOL Building. In fact, the third floor was currently being renovated with labs prior to this allocation and expansion.

MR. RUBOTTOM: Have you ever looked at the statutory definition of fixed capital outlay?

THE WITNESS: I have since this investigation started. I did not before.

I didn't know there were any laws or regulations that governed these capital appropriations, these capital expenditures.

MR. RUBOTTOM: Now that you have reviewed that, can you see why an expansion would seem to fit under that definition and not under a renovation/maintenance type of definition?

THE WITNESS: Well, I've learned now that additional square footage, you know, makes it different than a renovation, but I --

MR. RUBOTTOM: Did the BOG provide any guidance on those things to the university?

THE WITNESS: Not that I know of.

MR. RUBOTTOM: Who would you expect to train you, the other finance and facilities staff, on

those types of policies?

THE WITNESS: I would have expected it to come from general counsel and the board of governors.

MR. RUBOTTOM: Do you consider the -- I understand the idea of the president hiring bright people and counting on them to do their job.

Do you see the president as having any responsibility to ensure that those people understand their job and the rules within which they've been called to work?

THE WITNESS: Yes. I think that -- I think the lack of training and education at the institution -- at this institution, and I can't speak for any others, but it's the responsibility of the institution.

So if you're going to hire people from the corporate world, if you will, and have them come do your accounting, then there needs to be a training process so that they understand the difference between, you know, expansion or renovation.

My office, there's still confusion on these rules.

MR. RUBOTTOM: I understand.

THE WITNESS: And in fact, that list, they're still saying some of those are okay and some aren't.

MR. RUBOTTOM: Right.

THE WITNESS: And after like four months of talking about this, ad nauseam, really, there's still not clarity. And I know my office did not understand this clarity.

MR. RUBOTTOM: Do you think -- have you heard the various reforms, that the university has instituted policies? Do you think those policies address that clarity issue?

THE WITNESS: No. I should say I do think that going through multiple people helps, if those multiple layers of people are educated as well. So it does no good for the CFO and the general counsel and the president to sign a form unless they know the rules, you know, clearly as well.

So the education has to come first and the clarity has to come first, you know, a real list of what the rules are.

And the conversations that I've had since this all started, that I got to sit in when the CFOs are talking, there's still not the clarity amongst the universities -- amongst the different universities.

MR. RUBOTTOM: There's been a number of systemic kind of reshapings in the past 18, 19 years. The BOG was created by referendum, which

took some authority from the legislature and gave it to this new board. The legislature reorganized the education statutes in the early 2000s and put universities and college boards under some policies that had been applicable to school boards.

In those major transformations -- you were here before 2000, weren't you? When did you come?

THE WITNESS: 2007.

MR. RUBOTTOM: 2007. So that would have been after the statutory. Was that after the BOG was created?

THE WITNESS: Yes.

MR. RUBOTTOM: So you weren't here when those changes happened, so you wouldn't know what training or university-wide communications went out with, oh, we've got a new legislature, they're called the BOG, anything like that?

THE WITNESS: Right. So I think the devolution I've heard occurred in 2003. So by the time I came, the university was very independent.

MR. RUBOTTOM: Right.

THE WITNESS: So those of us who came from corporate sort of brought that work experience with us.

MR. RUBOTTOM: So there would have been

mentality there that the board of trustees is kind of the law giver, like in a corporation?

THE WITNESS: Yes.

MR. RUBOTTOM: And not a consciousness that there's these state statutes and BOG regs?

THE WITNESS: Absolutely.

MR. RUBOTTOM: Okay.

THE WITNESS: In fact, I looked to the board of governors' staff as kind of liaisons, and they -- you know, they just ask us for lots of information. So we always provided them lots of information, you know, not so much the other way back.

I didn't -- one of the challenges I found when I came to the university was you don't have that like CPA firm that you can go ask questions, you know, like you can in the private world if you don't understand something or -- you know, you have resources to help you understand.

MR. RUBOTTOM: Well, would you take those -- some questions like that to the internal audit department?

THE WITNESS: Yes, I would take questions to the internal audit department if they came to mind.

MR. RUBOTTOM: Did you ever take questions to the IG at the BOG?

THE WITNESS: No. I never even heard of the IG until this investigation.

MR. RUBOTTOM: Wow.

THE WITNESS: Until they sat in on the Bryan Cave.

MR. RUBOTTOM: Are you familiar that with -- that Lee would on occasion call Chris Kinsley at the BOG to ask about some of these renovations, maintenance, can we do this, can we not do that?

THE WITNESS: Yes, I am familiar with that, mostly now.

MR. RUBOTTOM: But you weren't --

THE WITNESS: Right.

MR. RUBOTTOM: -- being advised of those things at the time. That's just how she is spending money that's already been in her -- already in her E&G or PO&M money or some of these other transfers?

THE WITNESS: Yeah, yes.

MR. RUBOTTOM: And so that was just advisory from BOG facilities to UCF facilities.

THE WITNESS: Yes.

MR. RUBOTTOM: So there wasn't any real legal or audit type of inquiry and response?

THE WITNESS: I think that was just Lee's way and she developed a relationship with Chris Kinsley.

MR. RUBOTTOM: Right.
THE WITNESS: And that gave her a source. We didn't have, you know, that relationship --
MR. RUBOTTOM: Right.
THE WITNESS: -- with the board of governors.
MR. RUBOTTOM: They were working regularly on PECO lists and things like that --
THE WITNESS: Right.
MR. RUBOTTOM: -- that created that.
Did you feel like the general counsel's office was available for those kinds of inquiries?
THE WITNESS: Well, if the inquiry -- if you had a question, then yes, you could ask the general counsel's office. I would say we would go to internal audit more often than general counsel.
MR. RUBOTTOM: Okay.
THE WITNESS: They seemed to have more answers, I would say.
MR. RUBOTTOM: Okay. And I don't know if I asked this, but did budget chats continue after the UBC was formed?
THE WITNESS: Yes.
MR. RUBOTTOM: Would those be like preliminary? Would they prepare documents to present to UBC or would the issues come from totally different places

and the results go to totally different places?

THE WITNESS: I would say both. So we might discuss what was going to happen on the -- what would be on the UBC agenda. So it could be preparatory for the agenda for the UBC or we might discuss other budget issues.

MR. RUBOTTOM: Do you recall any capital project that was considered by the budget chat group after the UBC was formed that was not put before the UBC for its recommendation?

THE WITNESS: Yes. I think this whole list, except for CREOL, was decided by -- outside of the UBC.

MR. RUBOTTOM: And who would you think made the final decision as a result of the budget chat? Would that be Dr. Whittaker or Mr. Merck?

THE WITNESS: Dr. Whittaker.

MR. RUBOTTOM: Okay. Carine, that's all I've got right now.

BY MS. MITZ:

Q. I just want to go through the remainder of the exhibits real quick.

So Ms. Clark, if you don't mind flipping to tab nine?

A. Yes.

Q. Do you recognize that e-mail?
A. Yes.
Q. So I found it interesting that this is August 11th. So 11 days on the job, and Dr. Whittaker apparently is asking for a lot of information that goes beyond the academic budget; is that correct?
A. Yes.
Q. Okay. And the e-mail that Christy Tant sent at the bottom, at 6:06 p.m., that listing continues on to the next page or the back of the page. It bears Colbourn Hall, does it not?
A. Yes.
Q. And what's the amount there?
A. $18 million remainder of $28 million commitment made in '13/'14.
Q. So this may have been -- this would have been the second document that we know of that would have gone past Dr. Whittaker's eyes reflecting E&G funds to Colbourn Hall within the first two weeks on the job?
A. Yes.
Q. Is that about right?
A. Yes.
Q. Okay. Let's flip to the next tab, number 10. And we should both be looking at an e-mail from you to Whittaker and Merck sent on March 22, 2016. Is that

what you have in front of you?

A. Yes.

Q. Can you explain to me what's being provided here?

A. So this was a list that Dr. Whittaker asked me to have prepared that showed funded and -- like unfunded and funded capital projects for him to discuss with Dr. Hitt.

Q. Okay. Capital projects?

A. Yes.

Q. We're talking about buildings?

A. Yes.

Q. Not faculty salaries or electric bills; right?

A. Correct.

Q. Okay. And do we see Colbourn Hall here?

A. Yes.

Q. We do. We see Trevor Colbourn Hall, and it appears to list it at $23 million under E&G; is that correct?

A. Yes.

Q. And if you slide up to the top of the page, I see CREOL Building, phase two build out. Is that the $2 million that -- no, we were talking about $4 million previously.

Is this related at all to the discussion we had

earlier?

A. So if you look down below, it looks like CREOL, under -- below Trevor Colbourn Hall.

Q. Yes.

A. There is CREOL lab phase one and phase two, $6 million. I would expect that to be --

Q. Go to the right. There's the four on your division unit resources?

A. Yes.

Q. So is that the $4 million we were just talking about?

A. Let's see.

MR. RUBOTTOM: It's only showing $2 million E&G there.

THE WITNESS: Right.

MR. RUBOTTOM: Would that --

THE WITNESS: I'm not sure why this list had -- unless --

MR. RUBOTTOM: That's central reserve.

THE WITNESS: Well, the $2 million here for central reserve is based on -- I'm not sure why there's $2 million in the E&G column and $4 million in the division unit resources, unless --

MR. RUBOTTOM: Would department E&G be in that $4 million?

THE WITNESS: It might be. Although $4 million was -- my memory is $4 million was allocated from central.

MR. RUBOTTOM: And that was transferred. We just saw that.

THE WITNESS: Yes.

MR. RUBOTTOM: But that was transferred before this.

MS. MITZ: Yeah.

MR. RUBOTTOM: That was transferred in February.

THE WITNESS: That's okay, though. This wasn't showing what wasn't transferred. It was showing what funded it.

So I think that $4 million should be in the E&G column there and $2 million in the division unit resources, if that CREOL lab phase one and phase two is talking about --

MR. RUBOTTOM: Well, this is about a month after. Is it possible who created that list just hadn't -- and who would --

THE WITNESS: Yeah.

MR. RUBOTTOM: And who would have created that list?

THE WITNESS: Christy, Christy or her team.

BY MS. MITZ:

Q. So if we want to track, on the documents we've already received, if we want to track the funding on CREOL, which description do we look at? Because I have -- I'm now seeing expansion, I'm seeing CREOL lab, phase one and two, CREOL Building, phase two build out. So what should we be following?

A. I don't know.

Q. Okay.

A. I'm not sure what the phase one and phase two is.

Q. But there's only one CREOL Building?

A. Yes.

Q. Okay.

A. I think -- I think that the CREOL phase one and phase two, $6 million is probably the -- it was $6.8 million, though, so I'm not sure why this says $6 million.

The phase two build out of $2 million where funding hasn't been identified, I think was the -- in the CREOL project was an auditorium that wasn't built out because there wasn't enough money to do that. So the dean of optics and photonics was going to -- at least wanted the auditorium built, because if you didn't do it when you were doing the expansion, you couldn't

come back and do it. So they did it. They were not going to build it out, and then he was going to try to fundraise to get the money to build out the auditorium.

And so that's what I'm thinking maybe this build out for phase two up top is referring to, is the additional need to go raise some money to build out the auditorium.

Q. Okay. All right. So let's move on to the next tab, number 11, please. And this is the page that I've heard a lot about that bears handwriting, and I would like you, if you are able, to tell me whose handwriting is on the attachment identified as the Capital Projects Current Funding Plan.

A. That's Dale Whittaker's handwriting.

Q. Okay. Were you with him when he made these notes?

A. No.

Q. Okay. Do you -- were you briefed after the meeting at which these notes were made?

A. It looks like his secretary was telling me that he wanted a follow-up phone call.

Q. Okay. Do you have -- go ahead.

A. Nothing.

MR. RUBOTTOM: Would he have made those notes -- I'm sorry.

Would he have made those notes by himself studying that document or would that have been in a meeting, do you think?

THE WITNESS: I would be speculating.

MR. RUBOTTOM: Okay.

BY MS. MITZ:

Q. Do you recall whether you had that follow-up conversation with him?

A. I don't recall, but I probably did, but I don't recall the conversation, the phone call.

I mean, if I wanted to -- I was just going to say that I would think these would have been made during the meeting, because I don't think all of this information would have come from just the schedule that I gave him.

MR. RUBOTTOM: Would you frequently do follow-up conversations with him after those kinds of meetings and analyses?

THE WITNESS: Just if he had something that he needed to run by me.

MR. RUBOTTOM: Okay.

THE WITNESS: So yes and no.

BY MS. MITZ:

Q. Okay. There should be another, tab 12. Okay. And you may have actually touched upon this earlier. I

think we may have been talking about this without having identified it.

If you could look at your e-mail to Mr. Merck that you sent on November 23, 2016 at 1:37 p.m.?

A. Okay. Yes.

Q. What are you referring to by saying your "challenge 2020 meeting with Dale." What is that?

A. That was a performance review type meeting.

Q. Okay. Is this where you discuss those goals that you were addressing earlier?

A. Yes.

Q. All right. So again, you're talking about doing work for him, information you are going to provide to him about the operating budget and the capital budget?

A. Yes.

Q. That's well beyond the academic budget; correct?

A. Yes. There is no doubt that all the work I did for Dale Whittaker was about not -- about the whole university budget. That's all -- that's all I do. I mean, I do the complete picture.

I shouldn't say that. The other thing I did when Dale brought me under him is that we also supported -- we also played the role of supporting the academic

affairs budget division needs, which means I started to work with the deans and learned a little bit about the deans' needs and work with them, attending his meetings with all his vice provosts, which included more than just the deans, but all the other -- many other areas of university research, student development and enrollment services.

So I did -- we did also do the academic affairs divisional budget work out of my shop, and then -- but for the most part, Christy and I did the total university budget information.

Q. Do you have any idea why people who are employed at UCF would have believed that Dale Whittaker dealt with only the academic budget for the first year or year and a half of his employment?

A. No.

Q. All right.

MR. RUBOTTOM: Have you heard Dr. Whittaker say that in his public statements about this whole investigation?

THE WITNESS: Yes.

MR. RUBOTTOM: What's your reaction to his statements that he -- that his focus was academics or he only had responsibility for academic budgets?

THE WITNESS: I think that's false. That was

not -- my interactions with him was not just on academics, the academic budget.

The academic budget is about two-thirds of the budget of the university. So the allocation document is the entire E&G budget. It's the authority to distribute the E&G budget to all of the divisions. The university budget committee received requests from everybody.

He did ask me to create a college budget model which was going to funnel the student tuition funding, like growth funding from increased credit hours, basically, if you will. We have two of the colleges where sort of the burden of those additional credit hours fell, and we also put some performance metrics in there.

So the university budget committee used to have authority over all of the incremental E&G money, which included any new state appropriations and growth -- additional tuition money, if we grew credit-hour wise.

By creating the college budget model, it was about half and half, depending on the year of the state appropriations. By creating the university -- or the college budget model, we basically took away from the university budget committee all the tuition

money. That funded the colleges, and then what we were left with was any performance funding or state funding that we received.

So that university budget committee then had to address all the rest of the university's needs out of that -- out of that half, if you will.

MR. RUBOTTOM: Under that design, what responsibilities would go to those colleges? Would they have to pay for their own maintenance of the buildings that they occupied? Would they have to pay for the landscaping of those buildings? Would they have to pay for their utilities of those buildings? What -- what non-payroll? Would they pay for their janitorial?

What responsibilities were -- were going to go with that, that delegation of money?

THE WITNESS: So we started the budget -- the budget model, I want to say, three years ago now, if I've got that correctly. And we were still in that hiring plan for faculty.

So by taking a large chunk of the money away from this central process, if you will, the university budget committee, to the colleges, there wasn't -- there wasn't money to hire -- to continue to allocate funds towards the new hiring plan.

It was a 400 faculty member hiring plan. Before the university budget committee was formed, 200 lines were funded from performance funding that we received. That left another 200 lines to fund. And the college budget model went into effect, and so we basically had to ask the colleges to fund some of those lines.

So the first couple of years they didn't have as much discretion over how to use those funds as they would have liked, because Dale was very strict on continuing this 400-person hiring, this 400 faculty hiring plan.

MR. RUBOTTOM: Was that focus to reduce the ratio or would that 400 include expansions of areas of scholarly pursuit? In other words, expanding programs as opposed to lowering ratios. Was it both?

THE WITNESS: It was both. It was tenure track, so we were looking to grow research. So you grow research -- this is what I understand now. You grow research through hiring tenure track faculty because they tend to do -- they do research.

It was also to help address, you know, the teaching load, if you will. But it was to get -- it was to get our tenure track ratio in better line

with what I understand accreditation looks for with regard to -- they want you to have tenure track faculty of some percentage. I don't really know the criteria.

So it was to promote research. It was to promote -- provide more instructional support.

MR. RUBOTTOM: And do you believe that Dr. Whittaker knew when these E&G allocations were being made to capital projects, do you think he understood that that was reducing the amount of money available for these other initiatives?

THE WITNESS: Well, the hiring of the faculty needed recurring money. So these projects were coming from nonrecurring money. So that's a little bit of an apple and an orange, although there is the need for startup.

But because there's the delay in hiring, allocating the new recurring money towards faculty helps accomplish that.

MR. RUBOTTOM: Okay. Thank you.

MS. MITZ: Don, I don't think I have anymore questions.

MR. RUBOTTOM: Are there -- are there facts that you know that have not been brought out in the Bryan Cave investigation or that we have not covered

today that you think that the house committee that's trying to understand all this needs to know, information that you have that's relevant to the investigation?

THE WITNESS: So with regard to the Bryan Cave report, there's a few things that I feel about that.

One is I think it falsely attributes decision making responsibility or authority to finance and accounting that wasn't there. Sorry, but you know, finance and accounting, and myself included, had no authority to allocate money in this university.

We had no -- we couldn't have taken that central reserve and said -- any of those, and allocated any of those funds. Those decisions were made either by the UBC, which we were the support staff to, and it was a well-run process by us so that that group of VPs could make intelligent decisions.

If it didn't go through the UBC, then it was the provost, the CFO, the president making allocation decisions. No other VP could come to us and make an allocation request and we would have processed it. So the vice president for research didn't get to come, you know, say, hey, Christy, Tracy, you know, I need a million dollars for, you

know, grad stipends, put it on the list. We wouldn't have accepted anything like that. It had to come from those four areas.

We explained that to Bryan Cave very strongly, and yet I feel like that report just attributes all the decision making to either Bill Merck or sometimes he talks about other university officials, like he's inferring that we had any of that authority. So that's number one.

I also feel like the report downplays the importance of the allocation document and excuses, if you will, senior executives who signed it to say "I didn't really understand what that was." Because that document was around long before I even was working with budget to the level that, you know, I did halfway through my career at UCF.

That document was created -- I think it was originally created by my predecessor. She was extremely detailed oriented and very well at explaining things. It was signed by the provost and the president every single year, and it was explained to us as the authority for us to do the budget transfers that we did.

MR. RUBOTTOM: Let me ask a follow-up about that because I'm not sure I've seen all the

allocation documents.

Is it your testimony that all of those projects that we've looked at, that have been talked about within this $85 million of transfers, that all of those projects and purposes would have been on an allocation document signed by a provost and a president?

THE WITNESS: Not necessarily.

MR. RUBOTTOM: Okay. There were mid-year commitments, but they would have checked off on those commitments?

Would there be anything that Merck and the president would do without the provosts being aware of it in that timeframe?

THE WITNESS: Not to my knowledge, there wouldn't have been.

Now, a decision -- the allocation document is at a point in time. So that E&G commitments list that we talked about, if -- you know, if it was on -- if it was on that commitment list, which it only got on there if we had approval from the provost who usually worked with the president and the CFO to decide what -- you know, to tell us what they approved to go on that list. If at the end of -- you know, if at June 30th, it was -- it was

authorized to be allocated in the next fiscal year, it went on that allocation document.

If, let's say, October 1st a decision was made to allocate -- to make an allocation from central reserve, let's just say for a project. Let's say for a lab renovation for a million dollars, and then that transfer occurred within that fiscal year, it wouldn't make its way to the next year's allocation document.

In fact, that's what I think happened with the $10 million on Colbourn Hall is it wasn't on the next allocation document because it got approved and transferred.

MR. RUBOTTOM: Let me go back though to 2014, okay. The board decided to build a building and it looked like the budget in that period was around 23 to 26 million. The board deferred a decision on renovation, which the budget put up in front of them in that 2014, in those options lists, I believe was around seven or something like that.

I think there was a big -- a total renovation budget of between 15 and 19 at that time, but there was a commitment by the board to build the building for 23 to 26. There was already 10 set aside for renovation; 18 more was committed in that 2014

allocation document, and that 18 says renovation. And to my knowledge, that one number is bigger than any internal renovation budget. I've seen PECO lists that show 19, but everything that we've looked at here shows like 15 for renovation.

THE WITNESS: Right.

MR. RUBOTTOM: So in what sense was that 18 able to be categorized as renovation when the -- when the board was already committed to building a 23-plus million dollar building, and there was no renovation in the works that would cost 18? How was that characterized as renovation?

THE WITNESS: Well, I think it was just added to the same line and the title wasn't changed or the line description wasn't changed.

And also, from my memory, it never really totally went away from a renovation project. It became a combined renovation, because even when they approved the new building, there was still work that had to be done on the old building to keep it eligible, if you will, or keep it up to a certain standard so that it could be renovated as they continued to discuss at what point it was going to be or how it was going to be renovated or when it was going to be renovated. It never dropped off as

a renovation until that -- much later when I guess it was --

MR. RUBOTTOM: 2016.

THE WITNESS: -- when it was decided to demolish it, right.

So from our perspective, this was like a combined renovation, new building project. You can see that as we started to create new schedules, we started to separate it and tried to separate the dollars associated with the two pieces.

MR. RUBOTTOM: But those were never separated outside the allocation documents?

THE WITNESS: Right. They were not done at that -- at that -- that happened, like right after the board decided that, it got added to the list, got transferred to the allocation document that way, and got signed.

MR. RUBOTTOM: Do you think in Christy's files there would be a commitment list where that division first occurred or would that only be on your -- on your budget, on your capital projects list or your internal capital plan, do you know?

THE WITNESS: I think on the capital, because I think on the E&G commitments list, it kind of went on and then went off.

MR. RUBOTTOM: It went off when the money was transferred?

THE WITNESS: Right, right. So I think that it didn't necessarily maybe get separated on there. Plus, you had pieces of the dollars on there. You didn't have the whole project dollars like you did on the capital projects list where you could separate 23 and 15. You had some other incremental number on that list.

MR. RUBOTTOM: You're accumulating funds for whatever you were going to do later?

THE WITNESS: Yeah. So we -- we just didn't separate it.

MR. RUBOTTOM: Well, I interrupted you. You were talking about how serious those allocation documents were.

THE WITNESS: Yeah. And you were saying -- so again, the projects on those -- that project list, some of the projects on that project list I never even saw. They were funded from a unit who has control over their E&G budget and their E&G carry forward. And if they made a -- you know, if they decided to fund a project, they would make those journal entries, if you will.

So those wouldn't have come through central,

and they wouldn't have ended up on the allocation document, and they wouldn't have ended up on -- they would have been in the allocation document in the overall dollars allocated to the -- if it was a college, academic affairs. But it wouldn't have been as a line item -- the line items on the allocation document were like individual allocations that Christy's office was planning to make. Either new money came in and we knew where we needed to allocate it, so it would be its own line item, or decisions from central funds were on that list.

MR. RUBOTTOM: But this 46.5 that was not Colbourn, those were all central reserve transfers to construction; is that right?

THE WITNESS: No, no.

MR. RUBOTTOM: Those included some divisional or departmental transfers?

THE WITNESS: Yes. So the surplus building was divisionally funded.

MR. RUBOTTOM: Okay.

THE WITNESS: The district energy that's on there was funded from a unit. The band building was funded from a couple of units, I think.

MR. RUBOTTOM: So they've done that full systemwide search for those transfers is your

understanding, and that's how they developed this list?

THE WITNESS: Yeah. So the way we -- my office helped develop that list. We just ran any transfer to construction from the E&G fund, and so that picked up whether -- any -- any transfer.

MR. RUBOTTOM: Okay. Thank you. So go on. I didn't mean to interrupt you.

THE WITNESS: So I was just going to say, so the ones that were unit-funded would not have shown up on the allocation document. Ones that were mid-year would not have shown up on the allocation document.

But ones that did cross over a year were on the allocation document and that allocation document was our authority on an annual, you know, once-a-year basis to allocate out all of the E&G funds. And it also showed the central funds that stayed in central.

And then the working document throughout the year would have been the E&G commitments list for central. And then anything that the units did with their own funds, that was decentralized down to, you know, their authority.

So at that point, you know -- so the allocation

document, it's just an important document. So for people to say they didn't know it was E&G or they didn't understand the importance of it, well, that's -- I don't believe that because -- and I know I went with Dr. Whittaker to Dr. Hitt's office not August, 2014, but the next two years. He asked me to join him.

And I know I went over that document extensively as to what it was. I created some summaries so that it was easier to understand, and so I could kind of tie it to the overall picture of the university.

So I feel like that's understated, the importance of that document.

I also feel like the report applies a double standard like crazy, you know, and says things like oh, they didn't understand what they were doing or they didn't understand the laws and the rules and the regulations, and they didn't know what they were signing. Yet we were fired for not understanding these rules, and it implies that we did it intentionally, which is false. It implies we concealed, which I think you can see there was no concealing coming out of finance and accounting. And it implies that we knowingly and deceptively did

things that's false.

Yet it takes the senior executives and just excuses their knowledge or their, you know, responsibility in, you know, what happened here. We operated, you know, under the supervision and direction of these highly experienced senior leaders. So we wouldn't have even thought to challenge, you know, the nature of Dr. Hitt's experience, Dale Whittaker's experience. He wasn't here very long, but he was the shining star and he was the heir apparent in my mind from the get-go. He was a very strong leader.

There was -- you asked at one point about him coming up to speed. He was a very strong leader. He was absorbing everything. He was engaged in the whole university's strategic plan. He was, you know, very respected by those of us who were operating under his direction. And the same with Mr. Merck.

And I feel like the report applies all this culpability to the four that they decided they wanted to fire, and yet no culpability to the ones who have 20, 30, 40 years of higher ed experience, were making the decisions, were supervising us. You know, we had to report to them, and yet we lost our

jobs and our careers and our reputations over this, and that's just wrong.

MR. RUBOTTOM: So when they say that the elimination of these five or six people has eliminated the problem, if the problem is lack of understanding in the institution, that lack, in your mind, still remains. Is that --

THE WITNESS: Right. They will implement improvements. I'm not saying there were no mistakes made or you know, a lack of knowledge that the university clearly should have had.

But we didn't -- we didn't do anything wrong. We didn't do anything intentional. We worked with, you know, the skill set and the knowledge that we had. We worked very, very hard. We were -- you know, the group of people that got fired were some of the hardest working people at this university and really had huge amounts of improvement to this university.

I mean, the facilities budget committee, the university budget committee, all the work that Christy and her team have done improved the quality at this university very, very much, and most people think that, I think. And now we've just been, you know, defamed as being totally, you know, deceptive

and incompetent and -- so they'll learn from what was wrong before and do better, but it wasn't wrong because of us. And yet, you know, very severe consequences were cast upon us.

That's all I can think of.

MR. GREENE: Let me ask you a couple of questions.

You worked for UCF from 2007 until you were put on administrative leave --

THE WITNESS: Yes.

MR. GREENE: -- in January of this year?

THE WITNESS: Yes. Actually, I resigned, and they -- they gave me the option to resign or go on administrative leave and go to a predetermination hearing and basically fight the termination.

They told me if I resigned -- the misconduct packet that they were waving in my face, they had the regulation attached to it for misconduct and everything. That if I resigned, that would not go in my file.

And I said would I -- what would the press be told? Would they be told I resigned?

And they said yes, it would be portrayed that it would be said that I resigned.

And then three hours later, they said I was

terminated and it's been all over the papers that I was terminated for misconduct.

MR. GREENE: Prior to being fired, were you evaluated annually every year, your performance?

THE WITNESS: Yes.

MR. RUBOTTOM: And how were your evaluations?

THE WITNESS: Outstanding.

MR. GREENE: You came from the corporate world, you said?

THE WITNESS: Yes.

MR. GREENE: So this was your first experience in higher education?

THE WITNESS: Yes.

MR. GREENE: Were you trained as to the meaning of or what the permissible uses of E&G carryforward were?

THE WITNESS: No. We just learned on the job as we went along.

MR. GREENE: Did anybody ever bring BOG regulation 9.007 to your attention specifically or is that something you found?

THE WITNESS: Nobody -- nobody brought it to my attention or gave me any education about it. I know it was -- it was circulated when they were making some edits to it, along with some other BOG

regulations.

We were more concentrated on -- I know Burby put that in his report, and he never even asked me about those e-mails. And the e-mails -- the people I sent that to for them to review were the bursar's office and the people that did the student tuition and fees. And the one that was materially changing in all of those regulations was the tuition and fees regulation, so that's where we were asking. You know, I asked them if they had any comments or concerns, and they said no. And so we sent it back up through -- you know, no, F&A has no concerns.

MR. RUBOTTOM: Let me ask one question about that, though, because one of the changes was that the BOG specified that interest on E&G could only be spent on E&G purposes.

That was a new addition, I believe. Is that your recollection?

THE WITNESS: Yes. We had heard that was happening.

MR. RUBOTTOM: Right. Was that something that Mr. Merck was paying attention to? I mean, he was the one collecting all these investment earnings and interest, et cetera. Is that something that he took note of and adjusted whatever plans for those funds

accordingly?

THE WITNESS: So I recall being told that E&G interest earnings needed to retain the flavor of E&G by Vanessa Fortier, and so we started accounting for it that way. I don't remember when that was, whether that was the first time when that regulation came out that that happened. But we didn't use to account for it that way, and we changed to that. But I remember being informed of that by Vanessa.

And then the other big change which we knew about, we had heard it was happening, was that we were going to start in the operating budget submission report including carryforward expenditures, because in the past all you had to submit was your current annual expenditures. No carryforward expenditures were submitted as part of the OB process, they call it.

So, that was -- you know, all the universities were kind of talking about that because now there was going to be this weird comparativeness because it was -- you know, the numbers would go way up because you spent carryforward on expenditures and so that was part of that. Those were the things I remember from those -- those edits.

MR. RUBOTTOM: But you understand that before

and after that, the board has never budgeted carryforward, and that's an --

THE WITNESS: Yes.

MR. RUBOTTOM: -- administrative kind of loose set of money, that if they save it, then they get to spend it without the board's authorization.

THE WITNESS: Yes. And my predecessor taught us that we -- we didn't put forward to our board carryforward for approval because they had already approved the spending of that money.

So, you know, if in one year you had $5 million and it got approved and then you only spent four, that $1 million left over was already approved. So the next year, we had our board approve the new budget, which was another $5 million dollars, not six.

And her explanation -- and that five, that was a control total for what gets submitted up to the board of governors, which was that $5 million. So we always had our board approval tied to the control total that we send up to the board of governors, and that didn't include carryforward.

So, you know, since this investigation, Christy actually went out and was asking all the universities, like well, what do you present to your

board for approval? Do you ask them to approve carryforward? And she got all kinds of -- you know, a hodgepodge of some do, some don't. We never did, and we really followed my predecessor's package in how -- you know, in what we had the board approve.

MR. RUBOTTOM: I'm sorry. I don't know if we asked about capital outlay budgets. Did you work with those at all?

THE WITNESS: Not at all.

MR. RUBOTTOM: Okay.

MR. GREENE: Did you try to follow the laws, rules, and regulations that guided your conduct while you were employed at UCF?

THE WITNESS: Yes, absolutely.

MR. GREENE: Did you at any time, though, purposely violate any law or rule or regulation that you knew about?

THE WITNESS: No.

MR. GREENE: Did you know there was a rule or statute or regulation that barred the use of E&G carryforward on new buildings?

THE WITNESS: No.

MR. GREENE: If you had a concern about anything that the university was doing, did you bring it to the attention of your superiors?

THE WITNESS: Yes.
MR. GREENE: Was there ever a time when you felt like your superiors were doing something wrong that you had brought to their attention?
THE WITNESS: No.
MR. GREENE: With respect to the $46 million of other projects that were identified by UCF post-audit, did you believe all those involved permissible uses of E&G?
THE WITNESS: Yes.
MR. GREENE: Did anyone ever raise any questions about those and say there might be an audit comment or anything else?
THE WITNESS: No.
MR. GREENE: Now, when you brought the issue to Mr. Merck's attention about the use of the funds for TCH, were you satisfied when he told you that there's an emergency and he thought the use could be justified?
THE WITNESS: Yes.
MR. GREENE: And later on when there were comments -- when Mr. Merck made a comment about UCF possibly receiving an audit hit, was that something that was concealed?
THE WITNESS: No. I heard it said multiple

times.

MR. GREENE: Was it widely disseminated throughout UCF that this project is being funded by E&G and that we might receive an audit comment for it?

THE WITNESS: Yes.

MR. GREENE: Were you ever instructed to conceal or hide that or any other information concerning Trevor Colbourn Hall from anyone?

THE WITNESS: No.

MR. GREENE: You were asked where you might go if you had questions. Didn't general counsel participate in the meetings to the board of trustees and some of the budget committee meetings and other matters concerning the monies that UCF was spending?

THE WITNESS: Yes. So they were at every board meeting, and I actually had Scott Cole added to the university budget committee about one year after it got its legs.

MR. GREENE: So as a result of his participation in those meetings, Scott Cole and other members of the general counsel had to know that E&G carryforward was being used to fund capital projects, didn't they?

THE WITNESS: Yes.

MR. GREENE: Did anyone from the general counsel's office ever raise a question and say, hey, this might be illegal, we need to look into it, or raise any concerns whatsoever?

THE WITNESS: No, they did not.

MR. GREENE: Would you expect general counsel, when they're advised of the facts that show that something being done by the university might break a rule, would you expect that it's general counsel's job to know what that rule is and to bring it to the attention of the employees of the university?

THE WITNESS: Yes.

MR. GREENE: Did they ever do that?

THE WITNESS: No.

MR. GREENE: You were asked about what Dale Whittaker called himself. Is it true that he was the chief budget officer for the university?

THE WITNESS: That's what I understand, yes.

MR. GREENE: That was the title given to him by President Hitt, wasn't it?

THE WITNESS: That's what I understand.

MR. GREENE: And whether he actually had that title or not, he acted in that capacity, didn't he?

THE WITNESS: Yes.

MR. GREENE: Is there anything about the

post-audit investigation that was done by UCF or presentations UCF made to the board of trustees after that investigation began that you think was questionable?

THE WITNESS: So the presentation of the 13.8 million to the board of trustees you said, right --

MR. GREENE: Yes.

THE WITNESS: -- or the board of governors? Board of trustees.

So we questioned the 13.8 million. We questioned -- I questioned not bringing to the board of trustees the approval for the $40 million in the constellation fund and the $20 million in the deferred maintenance fund.

I sent e-mails to Kathy saying I feel like the board of trustees needed to approve those, and --

MR. GREENE: Do you think --

THE WITNESS: -- she pushed back.

MR. GREENE: Go ahead.

THE WITNESS: I said she pushed back and was going to get the president's office approval to do that, and she just assured me that at the very least, he would mention that those allocations had been made.

MR. GREENE: Do you think the university was less than forthcoming when it was reporting to the -- I don't remember if it was the board of trustees or the board of governors -- making a report with respect to the $46 million of other projects?

THE WITNESS: That's who was --

MR. GREENE: When Kathy Mitchell made a presentation concerning -- I think she was reacting -- it had to be the board of trustees because she was reacting to Marcos Marchena's questions concerning why are you just bringing this to our attention, and she said, "We just found that out." Do you recall that?

THE WITNESS: Yeah. She said we just found it out. That was totally false.

So one of the things I've been hearing recently is the question of when did administration, which to me administration means the president and the president's, you know, closest confidantes, when did they know about this 46 million?

Because even, I think, our board of trustees is acting like, oh, we knew about this 13.8 and now, through further investigation, we've found this additional money. And you know, they're attributing a lot of that blame to my office, and my office

found it.

My office looked for it before the board of governors even asked for the lookback period. We immediately -- once we heard about that $2 million limit, which we didn't know about before, we went to look because we knew we had renovations for more than $2 million. So we went to, you know, self-find it.

And now the board of trustees, I heard some of them speaking like, you had the opportunity back in September to self-report it and you didn't do it. And administration is acting like they didn't know it. Well, they did.

And we, my office, you know, and in conjunction with Lee and her office, did self-report. And we brought it to general counsel to ask them, what should be on this list? You know, what should we reverse?

And in an abundance of caution -- that's the terminology they kept using -- Marcus Marchena kept saying, you know, we're going to just reverse everything that might have an issue. So that was a little bit concerning to me because it made it look like this really big number, but I didn't feel like I could challenge that because I felt like it would

look like I'm being aggressive on the issues and I didn't want to look that way.

So I let them do that or -- you know, of course we did it. And now this $85 million number is out there all over the place that, you know, that we've done wrong. And throughout the whole four months, they're still trying to figure out, you know, what -- there was still a thought that there was a large amount of overcorrection here, and there was still a thought of we don't really know which ones are right and which ones are wrong.

There was even conversation about overcorrection on Trevor Colbourn Hall, because were there parts of that cost that could have legitimately been funded from the E&G? So --

MR. GREENE: So you brought the information to the attention of the administration back in September of 2018?

THE WITNESS: Yes.

MR. GREENE: And it was the administration's decision not to report that; is that correct?

THE WITNESS: Yes, absolutely.

MR. GREENE: What about this parking of $60 million of E&G elsewhere after the investigation by -- the Burby investigation began?

THE WITNESS: So the board of governors asked for all the universities to have their board of trustees approve a carryforward plan of the part of carryforward that is considered committed. It's the part that's not contractually restricted. It's not encumbered. It's not part of your statutory 5 percent reserve. It's -- you know, it's the amount of your carryforward that you have plans for, but no sort of contractual commitment against or statutory commitment against.

So UCF's carryforward, because of all of these, you know, reimbursements back to carryforward, was a huge number. And one of -- back to the confusion on whether or not we had overcorrected, Kathy Mitchell was trying to get clarity on which of those projects were considered overcorrections and which weren't, because we had to do this carryforward report as of November 30th. And if there was overcorrection, we wanted to reverse the overcorrection so that the carryforward number wasn't this huge number, falsely.

And so she didn't -- she didn't get that clarity. All that carryforward came back in. The number was really large. The university didn't want the carryforward to be swept. So the vice

presidents, at Dale's -- with Dale's leadership, started to try to figure out how -- how could they reduce the carryforward number.

And first they all started -- and this happened within about a ten-day period. And so they all started trying to find ways to spend it. So, you know, I told them, well, you can't just say, oh, let's go to the cloud, you know, which is a big ticket number, because if you haven't spent it, it's still sitting in carryforward.

And so they decided to do -- originally they decide to do $25 million in financial aid and $20 million in deferred maintenance to remove that from the carryforward numbers so that there wasn't this huge exposure for it to be swept from the university.

Dale ended up, after that decision was made -- and in fact, all the deans were even informed of the $25 million. There was a phone call between Kathy, Dale, Marcos, and the provost, Elizabeth Dooley, and they decided to increase the amount of the scholarship fund from 25 million to 40 million, because they felt like what was being left in the committed section was too big of a number.

At that point, it was estimated it was going to

be about 45 million, which was going to put UCF on the high side of everybody's, you know, committed section, if you will, of the carryforward.

And so they decided to -- the provost said to me and all the deans, you know, they got some intel that that would be too high of a number. And so they raised the scholarship amount to 40 million.

MR. GREENE: Did anybody ever discuss why they put the money in the scholarship fund?

THE WITNESS: Well, they thought that would be a good public relations event or way to use the funds. Clearly, they wanted to support the students.

MR. GREENE: Is it unusual to fund scholarships for multiple years?

THE WITNESS: Yes. We had not done that before.

MR. GREENE: Did anybody make a comment about the state won't ever come back and take this money because they don't want to take money out of the mouth -- the hands of the students or something to that effect?

THE WITNESS: Yes.

MR. GREENE: Who said what and when?

THE WITNESS: I can't tell you for sure which

one of the VPs said it, but I was in the VP meeting. I was there as a subject matter expert. And, you know, Dale went around the room and had all the VPs vote to do this $25 million and the $20 million for deferred maintenance.

And so one of the VPs said, you know, they were -- because I said, I mean, I wasn't -- I didn't even know that -- I was concerned that just because we did that doesn't mean that the board of governors or the legislature wouldn't reverse that. And so that's when they said that.

MR. GREENE: And then the 25 million increased to 40 million after a phone call between Dale Whittaker and Marcos Marchena?

THE WITNESS: Yes.

MR. GREENE: Let me switch gears to the meeting with Scott Cole in September where he interrogated you about Dale's knowledge of the use of E&G.

THE WITNESS: Yes, yes.

MR. RUBOTTOM: Did you feel intimidated as a result of Scott Cole's questions from being forthcoming about what Dale Whittaker knew?

THE WITNESS: Yes. I felt uncomfortable with the pressure that I felt like he was putting on me to cast Dale's knowledge in a certain way.

MR. GREENE: Was he trying to get you to say that Dale knew less than he really knew?

THE WITNESS: Yes. In my opinion, he was.

MR. GREENE: Let me go through a few documents.

MR. RUBOTTOM: Let me ask a question about that meeting because I've got about six or seven I forgot.

MR. GREENE: Okay. Go ahead.

MR. RUBOTTOM: And I want to finish them, but I don't want to interrupt your flow.

But on that meeting, does Scott Cole come and go during that meeting or was he present throughout the bulk of that meeting?

THE WITNESS: My memory, he was present throughout the meeting.

MR. RUBOTTOM: Okay. Was the questioning about Whittaker's knowledge, was that about a particular incident, like the audit hit comment meeting, or was that about your overall communications with him over the four or five years?

THE WITNESS: My overall knowledge, communication, you know, anything that -- that Dale might know.

MR. RUBOTTOM: And then on the -- where you heard the audit comment, I think you said Whittaker

was in the room?
THE WITNESS: Yes.
MR. RUBOTTOM: Was Hitt in the room?
THE WITNESS: Yes.
MR. RUBOTTOM: Was Lee in the room?
THE WITNESS: I don't recall for sure.
MR. RUBOTTOM: Could she have been in the room?
THE WITNESS: She could have been in the room.
MR. RUBOTTOM: Okay, because she has a similar recollection, and I'm just trying to figure out if we have two clearly different meetings or if it could have been the same meeting.
THE WITNESS: It could have been the same.
MR. RUBOTTOM: Okay. Thank you. I'm sorry, Chuck. I'll save the rest of them for later, but I thought those were all connected.
MR. GREENE: That's fine. Jump in any time.
I'm going to go through a few documents with you.
(Exhibit No. 1 was marked for identification.)
MR. GREENE: Just for the record so we have it in there, is that the e-mail that Kathy Mitchell sent you after this meeting with Scott?
THE WITNESS: Yes.
(Exhibit No. 2 was marked for identification.)

MR. GREENE: And among other things, she says in here that Bill's decision was widely known among university administration?

THE WITNESS: Yes.

MR. GREENE: Was the decision she was referring to, could it have been anything other than the decision to use E&G for the construction of Trevor Colbourn Hall?

THE WITNESS: No.

(Exhibit No. 3 was marked for identification.)

MR. GREENE: What is Exhibit 3?

THE WITNESS: This is the e-mail that Kathy sent to Dr. Whittaker, copied to Grant Heston and Scott Cole on September 18, 2018, informing them that, in addition to the $38 million for Trevor Colbourn Hall, we will reverse the funding for 46.5 million of funds inappropriately used for 12 additional projects, and the list of the projects was attached.

And the list showed, you know, the total reversal and then the cash replacements that were necessary. Two of these, the numbers are listed at the budget amount, but the actual amounts of cash spent on them actually changed, which is why this is 14.4 million instead of the 13.8.

MR. GREENE: So you put that information together that is attached sometime before the date of this e-mail?

THE WITNESS: Yes.

MR. GREENE: And gave it to the administration?

THE WITNESS: Yes.

(Exhibit No. 4 was marked for identification.)

MR. GREENE: What is Exhibit 4?

THE WITNESS: This is an e-mail from Kathy Mitchell to the auditor general saying that based on a call, a CAFA call, which is -- CAFA is all the CFOs of all the SUS schools, all the state universities; that "it does appear that UCF overcorrected when the E&G funds were reimbursed last month. After the group's final decisions are distributed and we get feedback from BOG, we may be reversing" a part of the "46.5. But we won't know how much, if any, until after we've submitted our report to" the board of governors "and see the guidance they provide."

So that was her talking with the auditor general about that we think we've overcorrected, we still don't really know, we're waiting for guidance.

MR. RUBOTTOM: Is that October? I'm sorry.

THE WITNESS: Yes, October 7th.

MR. GREENE: Now, you've been fired. When you were fired, did they give you any reasons for firing you as Dale Whittaker announced was done?

THE WITNESS: They said it was because of the Bryan Cave report.

MR. GREENE: Did they tell you any reasons other than that?

THE WITNESS: No.

MR. GREENE: Are there any reasons expressed in the Bryan Cave report as to why you should be fired, something you can tell other than the general accusations that it makes?

THE WITNESS: No. And in fact, a lot of the -- I mean, anything that they say, they say the same things with regard to others who weren't fired, namely the president and the --

MR. GREENE: Now, one of the things the Bryan Cave report criticizes you and the three other innocent employees who were fired about is your failure to advise Dale Whittaker and others about the restrictions on the use of E&G carryforward. Would you agree with that?

THE WITNESS: Yes, or tell anybody.

MR. GREENE: Now, the administration itself is very confused about what E&G carryforward can be

used for, isn't it?

THE WITNESS: Yes.

(Exhibit No. 5 was marked for identification.)

MR. GREENE: And Exhibit 5 is what?

THE WITNESS: Exhibit 5 is Kathy Mitchell, the interim CFO, asking Tracy or Christy and I and Lee and her team to come up a list -- with a list of all the questions that we wanted to present to the board of governors with regard to what was an allowable use of E&G.

MR. GREENE: So the administration didn't ask you to answer those questions about the permissible uses. They told you to ask the BOG; correct?

THE WITNESS: Right.

MR. GREENE: And did you ask the BOG?

THE WITNESS: Well, they told us to put together a list, and Kathy was going to ask the BOG.

MR. RUBOTTOM: What's the date of that request?

THE WITNESS: October 25th.

(Exhibit No. 6 was marked for identification.)

MR. GREENE: And what's Exhibit 6?

THE WITNESS: So Exhibit 6 is Kathy sending -- let me back up a little bit.

We were trying to get all this clarification because we were trying to do the two ten-year

lookback periods. Prior to that, there had been this call with all the other CFOs and there was -- you know, the rules were different than what we were hearing from the board of governors, that the school system thought the rules were. And we clearly didn't have a good, you know, knowledge of what all the rules were. So we're trying to --

MR. GREENE: Let me stop you there. Sometime after this began, you participated in a conference call with other universities, and they were similarly confused about the permissible uses of E&G?

THE WITNESS: Yes.

MR. GREENE: All right. Please continue.

THE WITNESS: And there was inconsistency amongst the universities, you know, as to what was allowable and what was not allowable.

So they were -- we were trying -- you know, and everybody had to do that certification. So we were trying to do it, and we had all these questions about, you know, is this allowed, is this allowed.

Like you mentioned earlier, if it's an existing building, is this -- is this allowed? But if it's a new building is the exact same, you know, construction type activity allowed? So questions

like that.

So we put that list together.

And so Kathy Mitchell, on October 24th, sent an e-mail to Scott Cole, the general counsel, and Janet Owens who is the university relations vice president to let them know, do any of you "have any questions or concerns about my sending this list of questions to the BOG for clarification? Mr. Rubottom has also requested a copy of the questions we send to the BOG, as have the investigators. I shared with Grant and he said it looked okay to him."

So Scott Cole comes back and tells -- basically tells her, hold off on sending the list of questions. He said that he and Janet had had a meeting with the General Counsels that morning, and that they were going to be discussing with Vikki Shirley, who is the BOG general counsel, I think, how to best clarify these ambiguities.

MR. GREENE: And that date of that e-mail from Kathy Mitchell is October 25, 2018?

THE WITNESS: Yeah.

(Exhibit No. 7 was marked for identification.)

MR. GREENE: And then a week later on November 2nd, Kathy Mitchell sent an e-mail to Chris Kinsley.

THE WITNESS: Yes.

MR. GREENE: That's Exhibit 7, right.

THE WITNESS: So Kathy never sent our list of questions.

We moved forward with our understanding from the CAFA call of what the rules were to do our certification. The day before that -- actually, it looks like the day of, the day the certification was due, I think, the day of or the day before, Kathy sent an e-mail to Chris Kinsley and Tim Jones saying, you know, basically here's the criteria we're using. Please confirm that this is okay.

So basically, I'll read it. "In an effort to ensure UCF provides complete and accurate information to the board of governors, I'm providing the understanding with which we're certifying the appropriateness of E&G funds utilized for capital projects. Based on prior board guidance, we will certify based on the following." And it lists five rules.

And asks, "Please let us know early this afternoon if our understanding is incorrect so that we may have time to provide complete and accurate information for the certification the board has requested by the close of business today."

(Exhibit No. 8 was marked for identification.)

MR. GREENE: And what is Exhibit 8?

THE WITNESS: So Kathy didn't get a response to this. We went ahead and filed the certification saying we had no problems other than Trevor Colbourn Hall.

So then that was November 2nd.

The next week was a board of governors meeting, and Kathy went and she had a -- she confronted or had a conversation with Chris Kinsley to say, you know, I asked for this clarification. Are you going to get back to me?

And he -- first he said to her, Nobody asked me for any clarification on the rules or the guidance.

And she said, Well, yes, I did. I sent you this e-mail on this date.

And he said, Well, I'm not going to answer that e-mail.

So she was livid. She came back and told me this, and then she wrote an e-mail summarizing. She was -- she was, like I said, she was livid. She came back and wrote an e-mail to Joey Burby, as well as the Pricewaterhouse person, and she included Julie Leftheris from the board of governors. And basically says "I had a conversation with Chris

Kinsley. I've copied Julie ... since she was standing" there "at the time. I know Julie hasn't been in the weeds with us on all of the capital project funding questions, but since she was there, she may have heard some of this differently."

This is Kathy saying this to Joey Burby.

"I asked Chris if the BOG was going to give the university some written guidance on the use of E&G funds for capital projects. Chris first said that no one had asked for guidance, but I countered that I had indeed sent an e-mail directly to him and to Tim Jones on 11/2 asking precisely for that guidance. He said that he wasn't going to respond to that e-mail. To which I asked if he could understand the position that puts us in? He said he understood. I told him that in the absence of anything definitive from the BOG, the SUS Council of Counsels and the CAFA group, the CFOs, had agreed upon a common set of guidelines, and that UCF had certified as to the use of E&G funds on capital projects using those guidelines."

This is her telling Joey Burby.

"The time pressure for us now is that BOG has asked all universities to come up with a plan for their carryforward balances, present the plans for

approval by the local BOTs, then present the plans for BOG approval by January 4th ... So backing into that timeline, we've picked 11/30 'as of' date as the latest we can --" you know, basically come up with our carryforward number.

"Which means that before 11/30, we need to make any reversals to the E&G corrections that were made, including about $10 million of the $38 million for Trevor Colbourn Hall, plus all of the $13.8 million on the other buildings. Chris definitely doesn't want us to reverse anything related to Trevor Colbourn Hall before the AG's report comes out and would prefer that we wait until after the first of the year. But BOG has tied our hands by requiring us" to "send in a report on our planned use of carryforward funds and telling us we'll have to send in another report next year about the actual use of those funds." We have to have our carryforward balances straightened out -- "We have to have our E&G carryforward balances straightened out by 11/30 to accomplish both of those things, but we have no control over when the AG report will be released."

MR. GREENE: So just a couple -- go ahead.

THE WITNESS: Let me just --

MR. RUBOTTOM: I missed the beginning. Did

Burby solicit this information from Mitchell or did she volunteer it?

THE WITNESS: She volunteered it to him.

MR. RUBOTTOM: Do you know who may have directed her to send that information in?

THE WITNESS: To Burby?

MR. RUBOTTOM: Yes.

THE WITNESS: No. I think she was trying to let him know, like look, here's the rules we followed.

Because at that time I think he was still going to look at these other projects, and he wasn't limited to Trevor Colbourn Hall at some point. So she -- because what she kept telling us is that -- that, you know, Burby had a stricter interpretation of what the rules were than what we were coming up with.

And so I think this was her just trying to let him know, hey, look, this is where we're at and this is what we've done and we're not getting the guidance we need.

MR. RUBOTTOM: Who is copied on that e-mail?

THE WITNESS: Burby, Price -- the Pricewaterhouse guy and the Pricewaterhouse gal, Michelle, and Robert and this Julie from the Florida

Board of Governors.

MR. RUBOTTOM: Robert Taft?

THE WITNESS: Nobody else. And then she said --

MR. RUBOTTOM: Which Robert?

THE WITNESS: He's the Pricewaterhouse investigator.

MR. RUBOTTOM: But Cole is not copied; Bev Seay isn't copied?

THE WITNESS: No, but I'll tell you what happened with Bev Seay after this.

So -- and down here, she goes on to say, "For BOG," underlined, "to not allow UCF to reverse the overcorrections we've made to our E&G funds puts UCF at a disadvantage compared to our SUS peers. So long story short, we're no better off than we were before the BOG meeting. Can you hear the frustration in my voice?"

And she says, "We plan to discuss the situation and possible next steps with" the Board of Trustees "Chairman Marcos Marchena, when he's on campus."

MR. GREENE: So just a couple of months before you were fired, the university was still looking for what were permissible issues of E&G carryforward, and they fired you for not knowing that precisely

four years before?

THE WITNESS: Right.

And the other thing -- and so then after this, Joey -- I don't have the e-mail because I can't find it and I don't have access to my e-mails anymore, but Joey Burby wrote back. Joey Burby had a call with Chris Kinsley, got answers to all of these items.

MR. RUBOTTOM: We've seen that.

THE WITNESS: Sent that to Kathy Mitchell. It was basically a "no, you're wrong here; no, you're wrong here; you're wrong on all of these," which then made our certification maybe, like, was that wrong possibly?

And so Joey sent that to Kathy. It basically said I think on all but maybe one of them, you know, you were wrong on this, you were wrong on this, you were wrong on this.

And so then I -- Kathy also told me that Bev Seay was involved in that, somehow got involved in this, and told Kathy, Don't put the investigators in the middle of us and the BOG again.

So Kathy then backed off of, you know, I guess, talking with Joey Burby as much, and was kind of told to.

(Exhibit No. 9 was marked for identification.)
MR. GREENE: And what is Exhibit 9? I think I took it out of order.
THE WITNESS: Let's see. Oh, one more thing on this. So then our certification is now up in the air.
And so Kathy told me that -- so then Kathy and Dale had a call with Chancellor Criser to basically explain this situation and ask what he wanted them to do about the certification that we had filed, maybe based on the wrong set of rules.
And he said, oh, don't worry about it. Those aren't the kind of projects that we're looking for.
So we never recertified or anything.
This e-mail is just an e-mail from -- that Bill Merck's old secretary found and shared with Kathy Mitchell and Misty Shepherd, who ultimately shared it with me, I guess. That's where Tim Jones, Chris Kinsley and Mike McKee, who is the CFO for the University of Florida, were talking about a meeting that -- I think probably a CAFA meeting, because it's titled "Open Questions from CAFA."
MR. RUBOTTOM: What's the date of that?
THE WITNESS: The date is September 17, 2018, is the last response from Tim Jones. So it's in the

September '18 timeframe. And apparently Chris sat in for Tim.

Mike says "Tim, Chris did a yeoman's job filling in for you." One of the things -- this is -- here's a couple of items still pending. One of them is a discussion about E&G for renovations, the $2 million threshold. Mike McKee says, "Chris was going to send the statutory authorization and what kind of work can be done. I think we felt good about where we are at this time in terms of guidance on what is allowed, although the UCF deal may blow that up."

Then Chris -- let's see. "I think that was it. Maybe Chris could confirm if I got everything?"

Chris then writes, "Good job," Mike -- Mike, "on the summary." And down here he just says researching, and will get back to you with feedback on the E&G for renovation discussion.

Chris says what you said about -- Chris Kinsley. "What you said about using E&G for renovations is right; each CAFA member thinks they are following the rules. However, when I talk to folks one-on-one, they interpret the rules differently, which is concerning. We're going to talk about this more as well I am sure."

MR. GREENE: Just a couple more questions.
Did you make the decision to use E&G carryforward for any project at UCF, ever?
THE WITNESS: No.
MR. GREENE: Were those decisions made by people who were senior to you both in age and levels of experience?
THE WITNESS: Yes.
MR. GREENE: Did you trust and respect the people who made the decisions?
THE WITNESS: Yes.
MR. GREENE: Was the decision to use E&G carryforward for Trevor Colbourn Hall, was that hidden from anyone within the administration?
THE WITNESS: No.
MR. GREENE: Was it known by Bill Merck, President Hitt, Provosts Waldrop, Chase, and Whittaker --
THE WITNESS: Yes.
MR. GREENE: -- and Scott Cole?
THE WITNESS: Yes.
MR. GREENE: Was it widely known amongst staff and faculty members?
THE WITNESS: It was known by staff. I don't know about faculty.

MR. GREENE: Was it known by Marcus Marchena?
THE WITNESS: Yes.
MR. GREENE: Did everyone in the budget and finance department know about it?
THE WITNESS: Yes.
MR. GREENE: Did other departments, including the office --
THE WITNESS: Well, let me -- I mean, not everybody in finance and accounting. There's like a 140 people there, and so they wouldn't all know.
MR. GREENE: Did many people --
THE WITNESS: The poor people in the Pcard department don't know.
MR. GREENE: Did many people within the department know?
THE WITNESS: Yes. All of the relevant people in budget and --
MR. GREENE: Was it ever hidden from anybody within that department or any other department?
THE WITNESS: No, no.
MR. GREENE: Was it concealed -- the decision to use E&G funds, did you conceal it from anyone?
THE WITNESS: No.
MR. GREENE: Do you know if anybody intended to conceal it from anyone?

THE WITNESS: No.
MR. GREENE: Did anybody ever tell you to conceal it from anyone?
THE WITNESS: No.
MR. GREENE: If you thought it was illegal, would you have participated in the use of E&G funds?
THE WITNESS: No.
MR. GREENE: That's all I have.
(Discussion off the record.)
MR. RUBOTTOM: Did you ever discuss with Dr. Whittaker plans to construct buildings with donor funds or auxiliary funds?
THE WITNESS: Yes.
MR. RUBOTTOM: Okay.
THE WITNESS: Yes.
MR. RUBOTTOM: You described earlier your explanation of the allocation document and some of this other information to Dr. Whittaker.
Would that August, 2014, allocation document that he signed on August 8th, would that have been the first time that you had the opportunity to have that kind of extensive discussion with him about the carryforward commitments and the allocation document and --
THE WITNESS: Well, I know -- I think that he

would have already seen the E&G commitments list by then.

MR. RUBOTTOM: In what context would he have seen that in his first eight or ten days on the job?

THE WITNESS: Well, we probably had a budget chat meeting.

MR. RUBOTTOM: So he probably participated in a budget chat meeting before?

THE WITNESS: Yeah. And one of --

MR. RUBOTTOM: Thank you.

THE WITNESS: One of the e-mails that I found in asking to produce all these e-mails, but I didn't really do anything with it because I didn't have the file it was referring to. But on those E&G commitments list, you might have seen those little ones and two on the left-hand side? Well, that was a Christy legend where -- I'm not going to get this right, but like one meant it had been allocated out and two meant it would be a -- it hadn't been allocated out. So those little ones and twos meant something as to the timing of whether the allocation had occurred or not.

So I have an e-mail where Dale is asking me about what do those little ones and twos mean. And I looked around the date of that e-mail for an E&G

commitments list that maybe was dated the same, and I couldn't find one.

So I can't --

MR. RUBOTTOM: Do you know what the date of that e-mail was?

THE WITNESS: Well, it was in August of '14.

MR. RUBOTTOM: But you don't know if it was before the August date, signing of the allocation document?

THE WITNESS: I think it was right around that time, and I can't remember whether it was August -- before that time, that day, the day before, the day after, but it was right around then.

MR. RUBOTTOM: The August 11th list of questions that we looked at earlier, is it likely that those questions arose out of those -- your discussion about the allocation document and any budget chats he had been to in those first couple of weeks?

THE WITNESS: Well, and he was also going to see Dr. Hitt with that allocation document so, you know, you didn't go see --

MR. RUBOTTOM: So that was in context with him taking the allocation document to Dr. Hitt?

THE WITNESS: That's my assumption.

MR. RUBOTTOM: Okay. I didn't check the dates.

THE WITNESS: So, you know, but what that e-mail told me, and because I couldn't tie it to what exactly he was referring to, I didn't feel like it was good evi -- that I was -- I didn't share that e-mail with Joey Burby because I couldn't really tie it down.

But what that tells me is he was looking in detail at the E&G commitments list at that point, and it was around the time of signing the allocation document. So he was, you know, in an -- he was making the effort to come up to speed on what that was.

And then, like I said, I would have spent at least an hour with him explaining it, and then he would have been going -- he would have been preparing himself to go ask Dr. Hitt to sign this.

MR. RUBOTTOM: Okay.

MS. MITZ: You started to say something about -- it sounded like you were going to say you don't go to Hitt --

THE WITNESS: You don't go to Dr. Hitt without being prepared to answer questions. That's my understanding. That's my understanding.

MR. RUBOTTOM: Do you recall when -- the

timeframe when Dr. Whittaker went to talk to Dr. Hitt, about January 20th of 2015, where they made the decision to do the combined project and raise the Trevor Colbourn/Colbourn renovation up to $38 million?

Do you recall the fact that he had that meeting with Dr. Hitt? Were you involved before that at all?

THE WITNESS: Yes. There was a budget chat meeting one week before that, and there's a bunch of attachments to that -- you know, Christy sent me an e-mail that said here's the documents for tomorrow's budget chat meeting.

It had a capital projects list. It showed the 10 million shortage, if what he took to Dr. Hitt got approved, and it showed other projects. It showed all of the funding sources, whether it was auxiliary, interest earnings or E&G. That was one of the documents.

The E&G commitments list was one of them. Where the central reserve sat and would sit over the next four years so that you could make decisions on if we took money from the central reserve, is there enough money there to use.

And then there was another document for some

central auxiliary resources that were accumulated to help with some of these facility projects.

So those four documents Christy prepared and had -- we had ready for the budget chat meeting the next day.

MR. RUBOTTOM: We've discussed those with another witness.

What I'm trying -- and you weren't directly reporting to him at that time. But you didn't prepare him for that meeting with Dr. Hitt; is that correct?

THE WITNESS: Well, I would think that --

MR. RUBOTTOM: Other than the activities in that budget chat meeting.

THE WITNESS: Right. And the budget chat meeting should have talked about the funding before he went to Dr. Hitt to say, let's go the additional 10 million. We would have talked about how are we -- can we do that financially?

MR. RUBOTTOM: And it would be your expectation that he would have taken all that knowledge, maybe those documents into that meeting with Dr. Hitt. And would that be the time that you consider that last 10 million was committed, when he came out and said -- told Merck it said yes?

THE WITNESS: Yes. So my -- once he got Dr. Hitt's approval to move forward with this change in the plan, if you will, and then Bill forwarding that back to us, referencing back to our conversation a week before about where that was going to come from, then that would have been our -- the closing the loop, if you will, to add $10 million to the commitments list.

MR. RUBOTTOM: Okay. When we talked about the UBC, you said something that confused me a little bit.

Would you consider Dr. Whittaker to have been the chair of that as provost or would you consider Dr. Whittaker and Dr. Merck as cochairing that university budget committee?

THE WITNESS: They were cochairs.

MR. RUBOTTOM: Okay. I want to ask you about something and it's because I'm curious and I'm not asking if somebody did something.

I just -- I noticed that the capital improvement plan that was put in front of the board in July included Trevor Colbourn Hall on the BOB-2 list.

THE WITNESS: Which July?

MR. RUBOTTOM: Last July, '18.

THE WITNESS: Okay.

MR. RUBOTTOM: This is after the auditors were asking questions and before the exit conference when the administration found out about the issue, okay.

Trevor Colbourn is back on the BOB-2 list for this last year's submission, and where, in the -- I still don't understand why it was on the BOB-2 list three times. The legislature approved the building three times with non-appropriated funds, but it's on the BOB-2 list again.

And this time the only difference I can tell from the previous submission is that the source of funds, it doesn't say E&G anymore. It says CFAUX.

Are you familiar with that BOB-2 notation?

THE WITNESS: No. And I didn't even know what the BOB-2 was until this investigation. So, you know, I don't know why -- the CF clearly means carryforward; the AUX clearly means auxiliary, so.

MR. RUBOTTOM: Does that mean to you carryforward auxiliary funds or carryforward E&G and auxiliary funds?

THE WITNESS: Carryforward E&G and auxiliary is what that would mean to me.

MR. RUBOTTOM: Okay. And you don't have any idea who would have put that on the BOB-2?

THE WITNESS: No.
MR. RUBOTTOM: Okay. It gave me the sense that maybe Bill Merck was beginning a refunding plan, knowing that the audit was going to come out and discuss this.
Was there any discussion like that --
THE WITNESS: No.
MR. RUBOTTOM: -- in June or July or August?
THE WITNESS: Nope, not at all. There was no discussion of changing the funding source.
MR. RUBOTTOM: Does that surprise you that they put the building back on the BOB-2 list when it was going to be completed before that list was even submitted to the BOG?
THE WITNESS: I don't know because I don't even really understand what the -- I mean, what I've heard recently is that BOB-2 list asks for PO&M for the building. I don't know if that's accurate or not.
MR. RUBOTTOM: Yes. We can talk about it later.
THE WITNESS: So I don't know.
MR. RUBOTTOM: You wouldn't have anything to do with the Trevor Colbourn Hall building program document that was published in '17 -- in February or

March of '17, would you?

THE WITNESS: No. I didn't see it until this investigation.

MR. RUBOTTOM: When you saw that funding appendix that says PECO zero, CITF zero, something else zero, university, 38 million, when you see university funding, does that mean anything particularly to you?

THE WITNESS: To me that could mean different sources, so I would -- I would use university to be -- it could be -- it could be anything. It could be auxiliary, it could be interest, auxiliary interest earnings.

MR. RUBOTTOM: Would that be comparable to the use of internal on that -- on that document we looked at?

THE WITNESS: Yes, yes.

MR. RUBOTTOM: Which just means it's not coming from outside?

THE WITNESS: Right.

MR. RUBOTTOM: But it could mean donor?

THE WITNESS: I don't think it would mean donor, no, no.

MR. RUBOTTOM: Okay.

THE WITNESS: No, no. Donor I think would be

considered external.

MR. RUBOTTOM: Oh, on the e-mails that discuss E&G, who would David Noel -- would he be asking that question to the provost's office, would you think, or just directly to Ronnie?

THE WITNESS: I think it went to Lynn.

MR. RUBOTTOM: Was that the one that went to Lynn?

THE WITNESS: That was the one that I think went to Lynn.

MR. RUBOTTOM: Oh, I'm sorry. That's right.

Would that have been a request to the provost's office that Lynn processed?

THE WITNESS: No. It was just a question to Lynn as the provost office budget person back then, because they would have used -- sounded like they were going to use their own money.

So the College of Medicine has their own -- you know, it's a little different because it has its own budget entity.

MR. RUBOTTOM: All right. But they have E&G?

THE WITNESS: And they have E&G. Yes, they have their own E&G budget.

MR. RUBOTTOM: Would you have expected Lynn to communicate that exchange to the provost, that that

question had been asked and that she'd gotten that answer from the audit folks?

THE WITNESS: I don't know for sure whether she would have; maybe more to say they want to use $3 million to set up an endowment fund. I'm not sure.

MR. RUBOTTOM: And then your e-mail to Ronnie then, would she have been asking on behalf of the provost or as a recipient of the provost office or --

THE WITNESS: Well, that was Tina's response to Ronnie.

MR. RUBOTTOM: Oh, that was Tina. You responded to --

THE WITNESS: I was just cc'd.

MR. RUBOTTOM: -- Lynn?

THE WITNESS: So I responded to David Noel.

MR. RUBOTTOM: So Tina's response to Ronnie. I'm sorry for confusing that.

THE WITNESS: That's okay.

MR. RUBOTTOM: Would that have been a provost office pass-through question to your mind? How would you process that?

I know you don't remember it, but --

THE WITNESS: So I don't know what the

underlying question there was between -- you know, I don't know. I don't know what prompted Tina to send that answer to Ronnie.

MR. RUBOTTOM: But you wouldn't have any expectation either way of whether she would have shared that answer with -- with the provost?

THE WITNESS: It probably depends what the underlying question was, whether that was a provost level conversation or just something --

MR. RUBOTTOM: Okay. Forgive me for not going back and doing those before.

THE WITNESS: That's okay.

MR. RUBOTTOM: Carine, do you have anything else?

MS. MITZ: No.

MR. RUBOTTOM: Do you have anything else to close with?

MS. MITZ: Well, the only thing we request, Ms. Clark, and we've requested this from everybody, is that you agree to not discuss the deposition with anybody, the questions that we've asked and the answers that you provided. Can you agree to that?

THE WITNESS: Yes.

MS. MITZ: Thank you.

MR. RUBOTTOM: We would appreciate it if she

would waive review just because of our timeframe. She has every opportunity to correct anything that shows up in our record, and we would solicit that, but I know the reporter needs an answer to that question.

MR. GREENE: Would you agree that I would have a lot more cross-examination, when I haven't had a full and fair opportunity to complete the record and we're going to agree to complete this without reading for purposes of expediting the investigation.

MR. RUBOTTOM: I would agree.

THE REPORTER: Can I confirm that you have requested today's transcripts to be prepared on an expedited basis?

MR. RUBOTTOM: Yes.

(The deposition was concluded at 6:03 p.m.)

CERTIFICATE OF OATH

STATE OF FLORIDA:
COUNTY OF ORANGE:

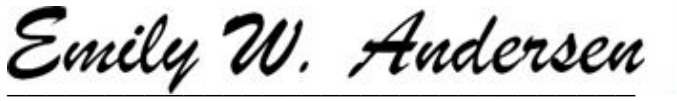
I, Emily W. Andersen, RMR CRR FPR, Stenograph Shorthand Reporter, certify that TRACY CLARK personally appeared before me on February 15, 2019 and was duly sworn.

WITNESS my hand and official seal this 15th day of February, 2019.

Identification:
Produced Identification
Florida Driver's License

Emily W. Andersen

EMILY W. ANDERSEN,
Notary Public State of Florida
Commission No. GG 258112
Expires October 14, 2022



CERTIFICATE OF REPORTER

STATE OF FLORIDA:
COUNTY OF ORANGE:

I, Emily W. Andersen, RMR CRR FPR, Stenograph Shorthand Reporter, certify that I was authorized to and did stenographically report the foregoing deposition of TRACY CLARK; that the review of the transcript was requested; and that the foregoing Pages, 4 through 168, inclusive, are a true and complete record of my stenograph notes.

I further certify that I am not a relative or employee of any of the parties, nor am I a relative or counsel connected with the parties' attorneys or counsel connected with the action, nor am I financially interested in the outcome of the action.

DATED this 15th day of February, 2019.

Emily W. Andersen, RMR CRR FPR

(Whereupon, the proceedings began at 9:39 a.m.)

THE COURT REPORTER: Raise your right hand, please.

Do you swear or affirm that the testimony you are about to give will be the truth, the whole truth and nothing but the truth?

THE WITNESS: Yes, I do.

Thereupon,

PRISCILLA LEE KERNEK,

having been first duly sworn or affirmed, was examined and testified as follows:

EXAMINATION

BY MS. MITZ:

Q. Ms. Kernek, have you ever given a deposition before?

A. Not that I recall.

Q. Okay. Let me just go over some ground rules with you.

First and foremost, we want you to be honest. You just have sworn to tell the truth. We ask that you be truthful in your responses.

For Madam Court Reporter, we need to be audible. So if you're going to answer a yes or no, we ask that

you say yes or no. And not uh-huh, uh-uh, because the court reporter can't take that down.

If you don't know the answer to something, that's a perfectly reasonable answer. If you don't remember, that's fine. If you're going to tell us something that you know only because someone else told you, I ask that you let us know that.

If you're going to be estimating anything or approximating anything, please let us know you're doing that.

And I am guilty of this: I have a tendency to speak fast. And I know court reporters hate that. So if that's a tendency that you have, I ask that you try to be conscious and speak slowly. And answer the question that's being asked. I know there's a lot of information, probably a lot more than we are going to cover today. There may be things that you feel are important for us to know.

I just ask that you answer the question that's being asked. We will give you an opportunity at the end to tell us anything else that may be important to our investigation.

Your attorney will probably have an opportunity to ask some questions. And we can always talk at another time to get that additional information.

Do you have any questions?

A. No. I think we're ready to go.

Q. Okay. Let's get started then.

State your name and spell your last name for the record.

A. My name is Priscilla Lee Kernek, K-E-R-N-E-K.

Q. And are you currently employed?

A. I am not.

Q. Okay. Where was the last place of employment?

A. I worked for the University of Central Florida from 2007 to January of this year.

Q. All right. And while you were employed by UCF, were you interviewed by the firm Bryan Cave concerning the use of E&G carry-forward funds for the renovation of Colbourn Hall and/or the construction of Trevor Colbourn Hall?

A. I was.

Q. And were you put under oath prior to that interview?

A. No.

Q. Okay. Despite that, were your responses honest and truthful?

A. They were.

Q. Okay. What was the last position that you held at UCF?

A. I was the associate vice president responsible for facilities and safety.

Q. And was that always the position that you held there?

A. It was.

Q. Okay. And what were your duties?

A. I oversaw several departments. And I will try to list them off.

Q. Okay.

A. Facilities planning and construction. Facilities operations and maintenance; sustainability and energy management; landscape and natural resources; sustainability and initiatives. And it's not actually sustainability and energy management; we changed that. It's now actually utilities and energy services. Environmental health and safety; quality management and improvement; resource management.

And for a time I also oversaw the UCF Police Department and emergency management.

Q. Okay. And in that position, who did you report to?

A. I reported to Bill Merck, who was the vice president for administration and finance and CFO.

Q. And how would you describe the relationship you had with him? Did you guys work well together?

A. I thought we worked well together.

Q. Okay. Did you work closely together?

A. We had a lot of autonomy. But, yes, I believe we worked closely together.

Q. Are you close to the speakerphone, by any chance?

A. Yes. Can you -- he's going to turn it, in case it will be better.

MR. GREENE: Is that better?

MR. RUBOTTOM: You were cutting off a little bit.

BY MS. MITZ:

Q. Okay. So have you kept in contact with Mr. Merck since you left UCF?

A. I have talked with him.

Q. Okay. And have you guys talked about this investigation?

A. We seldom talk about the investigation. I try to do a pulse to see how he's doing.

Q. Okay. When you did talk about the investigation, what was it that you guys discussed?

A. I think that we both feel we're in a wronged position. I know that I, personally, feel that I am in a wronged position. That I have been scapegoated because of others who are trying to save themselves.

Q. We'll definitely get to that this morning.

You didn't really talk about the facts so much as your feelings about what happened; is that correct?

A. That's correct.

Q. While you were employed at UCF were you -- did you work closely with either Tracy Clark or Christina Tant?

A. I didn't work closely with them or often with them. But, yes, I worked with them.

Q. Have you maintained contact with either of them since you left UCF?

A. Only to tell them I was sorry for them as well. Again, more about feelings.

We haven't really talked about matters related to the investigation.

Q. Okay. Under which president did you work?

A. I worked under John Hitt. And recently under Dale Whittaker.

Q. Okay. Can you describe the relationship that you had with President Hitt, if there was one.

What I am trying to understand is if you worked closely with him; if you only saw him in meetings; or if you had a better relationship, where you just could pick up the phone and call him. Can you kind of just set that scene for me?

A. Yeah. I really didn't have a close relationship

with him. I would sometimes be taken to meetings where he was present, or I had to present something to him. Other than that, we didn't speak often.

Q. Okay. Do you recall who his chief of staff was?

A. Early on his chief of staff was Beth Barnes. And it later became Rick Schell; his actual name is John Schell; he goes by Rick.

Q. And did you work closely with them?

A. I don't think I can say that I worked closely with them. We actually had to send materials through them, when they would go to the board of trustees. So I worked with them on those types of materials.

Q. And did either of those chiefs of staff that you just identified ever ask you questions about anything that you provided them?

A. Yes. They would edit documents that were sent forward, or they would ask questions about documents if they felt there may be editing needed.

Q. In the event that there was some editing done by either one of those chiefs of staff, would the document come back to you? Or would it go from the chief of staff to the board?

A. Sometimes I saw the edits come back; sometimes I did not.

Q. Okay. Can you describe President Hitt's mental

state during the last few years of the presidency; was he completely plugged in?

A. I don't know that I am in a position to answer that. I really wouldn't know.

Q. Okay. That's fair. Thank you for that.

Can you describe your relationship with President Whittaker, beginning when he came in as provost. Again, did you work closely with him?

A. I did not work closely with him. I had worked more closely with other provosts in the past. But I did not spend much time with him. The only time I was with him was when called forward to go over documents.

Q. Is there any particular reason why you worked more closely with other provosts and not Whittaker?

A. I don't know that answer.

Q. Okay. Who was -- did Provost Whittaker have a chief of staff, or did he only get a chief of staff when he became president?

A. Well, he formed a position and had a person by the name of Ronnie Korosec in that role, to act as the chief of staff, chief of operations for him.

Q. And did you communicate with her often?

A. Not often. But, yes, I did communicate with her more often.

Q. Okay. And then the same question I asked

concerning President Hitt, did you have to provide documents to her that would then go to Whittaker?

A. Yes. Or have conversations with her that would then be relayed to him.

Q. Do you recall what sort of documents?

A. We exchanged emails. She probably had documents that were related to space. When they were -- when they were redoing their office. She had documents related to Trevor Colbourn Hall that would have gone to him.

Q. Do you recall what those documents were?

A. Not offhand.

Q. Okay. Do you recall whether they would have had any information concerning the funding for the building?

A. I don't recall those kinds of documents going forward from my office to him. There would be something relating to the rising costs relating to the building.

Q. Okay. Let's move on to the trustees.

What was your working relationship with the board of trustees?

A. My normal working relationship with the trustees would be through my boss, and possibly through the chief of staff.

Q. When you say through them, do you mean that you would relay information to your boss and/or chief of staff who would then relay it to the board?

A. Yes. That was normally the case, unless I was giving a presentation. There were conversations where one of the trustees might want to talk to me about something. I always make sure that my boss was aware of those conversations.

Q. Okay. So would the same be true for Chair Marchena? Any communications would go through Mr. Merck or the chief of staff?

A. Or the president, normally. I do have -- I have had some conversations with him when my boss specifically asked me to call him or to meet with him.

Q. Do you recall what any of those discussions pertained to?

A. Some of the conversations pertained to delivery methods on how we were delivering a building. He expressed more than once that he was opposed to construction management at risk. He expressed his desire that we take on owner's authorized representatives. We did talk about Trevor Colbourn Hall, along with the architect, when we were trying to convince him that we needed to use a construction manager at risk for that facility.

Q. Okay. That discussion that you just described, is that what led to the -- your department being audited?

A. I don't know the answer to that.

Q. Okay. We'll get to that later.

All right. Did you see much of the interaction between Chair Marchena and the other trustees outside of board meetings?

A. No.

Q. Okay. Did you attend most, if not all, board meetings?

A. I attended most of the finance and facilities committee meetings. I often did not attend the full board meetings, unless there was something relevant to what I was doing in my area.

Q. When you attended the finance and facility meetings, was Mr. Marchena the chair of that committee?

A. He was the chair of finance and facilities for quite some time. And later became the chair and Alex Martins became the chair of finance and facilities.

Q. Okay. While Mr. Marchena was the chair of finance and facilities, did you have an opportunity to observe him in those meetings?

A. Yes.

Q. And would you be able to say whether he appeared to be prepared and knowledgeable of the matters that were coming before the committee?

A. Yes.

Q. Okay. Did he appear to be shy about asking questions?

A. No.

Q. Did he appear to be shy about voting against matters that he disagreed with or wasn't comfortable with?

A. No.

Q. Did you ever observe any interactions between Chair Marchena and President Hitt?

A. Only in meetings.

Q. Okay. And could you pick up anything from their interactions to describe what kind of relationship they had?

A. The interactions appeared to be professional.

Q. Okay. Same question for Chair Marchena's interactions with Mr. Whittaker, in both the capacity of provost and president; did you observe their interactions?

A. Again, only in meetings.

Q. Okay.

MR. RUBOTTOM: Lee, this is Don. I want to ask one follow up on Marchena's chairmanship.

BY MR. RUBOTTOM:

Q. Did he seem prepared for the meetings? Did he look at the agenda and ask "what's this about"?

A. He seemed prepared for the meetings. He was engaged in the meetings. He had packets ahead of time in order to be prepared for the meetings.

Q. Do you know if he got briefings from anybody on staff, like the chief of staff or Mr. Merck?

Did he ever ask for any briefing from you before leaving on one of the projects or anything?

A. I believe that Bill Merck did brief him often before the meetings.

Q. Do you believe that Mr. Merck briefed him about the sources of funds of these various projects that were planned, including Trevor Colbourn Hall?

A. I don't know that he did in separate meetings. But I do know that, regarding Trevor Colbourn Hall, Chair Marchena asked about the source of the funding for that. And he was told that it was carry-forward funds.

MR. RUBOTTOM: Right. Well, we'll get to those meetings. I think 2014 and 2015 there were discussions. But I will let Carine finish her questions. Thank you.

BY MS. MITZ:

Q. Okay. So I understand that at some point Chair Marchena did seek, I guess an audit is the best way to describe it, of facilities and safety.

Can you tell me a little bit about that, when it

occurred; how it came about?

A. Prior to that, I had asked -- actually, I had had one audit performed by McGladrey, specifically looking at our funding on our projects.

Q. When was that?

A. It was a long time ago. Maybe '14 or '15.

Q. Okay.

A. We made a number of changes based on that. In particular, looking at our contracts in order to develop some cost avoidance measures.

Chair Marchena -- we were in the process of looking for a firm to look at facilities planning and construction, to advise us on how we could best reorganize so that we could put best practice measures in place. So we had undertaken that initiative. And I had spoken to Bill Merck about that initiative. At the same time I understand that Chair Marchena decided to undertake an audit of that particular department.

We had already put out an invitation to negotiate. We had developed the parameters for that through purchasing, and we had formed a committee in order to make a selection.

And Chair Marchena decided that he was concerned that there might be bias in the selection. So he left the ITN in place. And he hired people to evaluate the

proposals, which actually resulted in the same company that I had rated first. And I do not know what other committee members had done.

That company did -- did come in and Chair Marchena was -- from what the gentleman told me, who was running it, Chair Marchena was interested in -- in bringing on owner's authorized representatives to lead rather than the project managers we had. And that is not the result of the -- of the study. The study clearly showed that owner's authorized representatives would cost us more than what we were doing with our project managers.

BY MR. RUBOTTOM:

Q. Lee, was that the Hill report, the Hill --

A. That is the Hill report, yes.

Q. When you say he decided to hire somebody to evaluate, did, like, the board of trustees vote on that? Or did the finance and facilities committee vote on that? Or did he do that on just his own authority?

A. I don't know if anyone voted on it.

What I learned is that Rhonda Bishop, who was our chief compliance officer, in working with the trustees, that they were hiring outside consultants to review the proposals.

Q. That would have been through the president and

the compliance office then?

If there was authority outside of -- Mr. Merck didn't want to do it that way; he didn't want to do it that way, then -- and if the board didn't vote on it, would it have been the president and the compliance office -- had the authority to do that?

A. I don't know.

MR. RUBOTTOM: Okay. That's -- thank you very much.

BY MS. MITZ:

Q. Okay. So did that report conclude with recommended changes?

A. It did. It had a number of changes. We undertook the changes that we were able to undertake. Some of the changes were internal; some of them were external to us; some of them involved money to do them.

The chair leaned over in the board meeting and whispered to me, "I really am helping you here. Because I am going to give you some money to do the things you need to do." That did not happen.

Q. Okay. Okay. How did that work --

A. That did not happen.

Q. Okay. Did Marchena's act in seeking this audit affect your relationship at that point?

A. No.

Again, I didn't really have a close relationship with him. We were trying to undertake that -- that audit ourselves. Because we believe that we needed to see -- to -- to revamp that department. We had about ten project managers managing 500 projects at any -- at a given time, we had project managers managing 30 to 35 to 40 projects apiece. And we knew we needed to reorganize; we needed additional funds; we needed to staff up in order to do our jobs.

So we had requested that that study be done before anything else happened.

Q. Okay. You've kind of touched upon earlier your contact with trustees before board meetings, if they had questions or needed to be prepared.

In your experience, were there any trustees that were more apt to contact you for assistance than others?

A. Yes. In the past --

Q. Okay.

A. -- Harris Rosen often contacted me. Chair Walsh -- not Dave Walsh -- but Rick Walsh, Mickey Grindstaff contacted me. Dave Walsh, on this particular board, contacted me. Bev Seay often contacted me.

Q. Okay. So I would like to actually get into Dave Walsh, Trustee Dave Walsh.

Did he ever ask you for assistance in better

understanding the documents that you have presented, such as the capital improvement plan or the capital outlay budget?

A. He did ask about the capital improvement plan in the board meetings. He talked about needing a capital expenditure budget, often referred to as Cap-Ex.

With my boss's permission, I spoke to Dave Walsh about how we would go about doing Cap-Ex budgeting. And he did spend time with me helping me learn to do the Cap-Ex budget.

The problem with Cap-Ex is that you also need your operational expenditures to feed into that. And I was unable to do the Op-Ex that would feed the Cap-Ex.

Q. Why weren't you able to get those documents?

A. At that same time that Dave Walsh -- and I did also speak to Marcos Marchena about the Cap-Ex -- at the same time the trustees had asked me to do Cap-Ex budgeting Dale Whittaker had asked Tracy Clark to -- to -- to look at how facilities budgeting was working. And I was unable to get the information I needed from finance and accounting to do that.

BY MR. RUBOTTOM:

Q. About when was that?

A. Probably 2017.

Q. Did any other -- did any trustees ever ask you

about the annual capital outlay budget?

A. No.

BY MS. MITZ:

Q. Okay. I want to clarify something that I think I heard you say. Around the same time that Trustee Walsh is asking for assistance about the Cap-Ex, Provost Whittaker was asking Tracy Clark for information about how facility budgeting worked; is that correct?

A. They were trying to form the facilities budget committee and put it in the line with the university budget committee. So he was asking Tracy to set up the facilities budget committee and how facilities would be budgeted.

Q. Okay. And I have got more questions on that, but we'll get to that in a little bit.

Okay. So ultimately, then, with Trustee Walsh you would ask for the information from Chair Marchena and then he never provided it?

A. He did say that he would notice a meeting, if necessary, so that he and Dave Walsh and I could be present. And he could get the information we needed to complete the Cap-Ex budgeting, but that did not happen.

Q. So did Trustee Walsh come to you and ask you what the status was or what was going in?

A. No. Instead when the facilities budget committee

had been convened, there was a determination made that in order to get our arms around a true five-year budget need for facilities, each of the colleges would present their needs. And they were allowed their top two needs and then one slide on the other.

And so each college would come present. We would hear from athletics; we would hear from facilities and safety on some of the things we felt were great needs.

And presentations were made. Dave was allowed to sit in on those presentations to hear what people were presenting for -- for their needs and then to watch the process. Because it was a brand new process to the -- to watch the process to see how those facilities were going to be prioritized. So Dave participated at that point.

Q. Okay. Were there any other departments, outside of the one that you oversaw that you worked closely with?

A. Well, because what I oversee is a service organization, we support others. So everything we do is in support of what others do for the university. So I would -- I would often have meetings with folks in the colleges, athletics. I worked closely with -- I thought closely with -- audit, compliance, general counsel --

Q. Okay.

A. -- government relations.

BY MR. RUBOTTOM:

Q. What did audit focus on in working with your -- with your areas?

A. So audit explained to me that they had -- that they had a schedule of audits that they would perform on -- on areas; that's routine. If something came to their attention where they needed to do an audit, they would do that. I often brought things to their attention. Not just in other areas, but in my own area. And I asked them to look at things that I thought might be -- might be an issue.

So I had interactions with them on that level. I also had interactions when one of the departments was going to be audited by them, and on the results that came out of those audits.

BY MS. MITZ:

Q. Was there ever a time when you asked the audit department to look into something and they declined?

A. There was a time, at least one time, when I talked to them about decisions that were being made above me that I thought were problematic. And what I was told was those were vice presidential decisions. It was a vice presidential risk and that it was not my problem.

Q. Would that have anything to do with what we're talking about today, about Trevor Colbourn Hall or the Trevor Colbourn Hall renovation?

A. I don't know if that was on the list. There was a list of things. I do know that athletic funding was on the list.

Q. Would you by any chance have a copy of that list?

A. I can certainly look.

Q. Yeah, that would be appreciated.

And do you recall when -- what year this happened?

A. No. But it was quite some time ago. I am guessing three years ago.

BY MR. RUBOTTOM:

Q. Do you remember anything else that was on your list?

A. I don't. But I specifically remember athletic funding, because that has been a problem issue.

Q. Welcome to America.

A. Yeah.

It possibly also involved permitting. A lot involved athletics and doing things without permits, and how to get that under control.

BY MS. MITZ:

Q. Okay. As part of your job, were you required to

be familiar with applicable law and regulations?

A. Actually, I would go to general counsel for -- if I had questions on law. Or I would go to BOG staff, if I had questions on law or regulation.

Q. Okay. How did you -- did UCF have a method in which they would disseminate information to staff about the possibility of a new BOG reg being amended or when a reg was going to be amended? Would the general counsel's office provide that information to you guys?

A. No, they wouldn't.

Q. So how were you supposed to know when something changed or something was adopted?

A. That was one of my problem areas. And I brought that up more than once.

Q. Who did you bring that up to?

A. I brought it up to Bill Merck. And I also talked to at least one of Scott Cole's attorneys.

Q. Someone who would have been junior to him?

A. Yes.

Q. Okay. And how long ago did you bring that up?

A. A long time ago. Probably eight or ten years ago, because --

Q. Nothing changed?

A. Nothing changed.

Q. Okay. How did you become aware of the regulation

that is at issue in this investigation, Regulation 9.007, which basically sets forth the authorized uses of E&G funds?

A. I wasn't even aware of that regulation until the investigation.

Q. Who told you about it?

A. I believe that Tracy Clark told me about it.

Q. All right. Now, were you ever present for any discussions between Mr. Merck and President Hitt concerning the use of E&G funds for either the Colbourn Hall renovation or the investigation of Trevor Colbourn Hall?

A. I was present in about May of '15 when -- I believe we were with Dr. Hitt to discuss return on investment documents, or something that we were preparing. And Bill Merck told him at the time that we had this problem with Trevor Colbourn Hall, and that he didn't see any other way -- we had people's lives at risk. And Dr. Hitt said he did agree with him. He didn't see another way, that we had to do it.

Q. Would he be responding to Mr. Merck 's suggestion that they use the E&G?

A. Yes.

Q. So that was in May of 2015?

A. I think so.

Q. Okay.

BY MR. RUBOTTOM:

Q. Do you believe they'd ever discussed that issue before?

Because I know the building -- the new renovation was planned in '12 or '13; monies were already being targeted for that. The building was approved 2014. Dr. Hitt made the decision to do the combined project in January 2015.

Do you believe that Merck and Hitt had discussed the E&G aspect of it prior to the May meeting?

A. I don't know if they would have or not. I do know there was a meeting in September with Tracy Clark, where she advised Bill about the funding. And he said he needed to tell Dr. Hitt.

Q. Was that September 2014?

A. Yes.

MR. RUBOTTOM: Okay. Thank you very much.

BY MS. MITZ:

Q. Okay. So in that meeting did Mr. Merck say that he would talk to the president?

A. Yes.

Q. Okay. And do you -- did you ever find out whether that actually occurred?

A. I did not find out whether it actually occurred.

But I was in the meeting in May of the following year when it was discussed.

Q. Okay. All right. Were you present for any other discussions with any -- the same people or other people when this was addressed again?

A. Prior to that, I had been in meetings where various people were talking about how they were going to fund this building. The provost at the time, or acting provost at the time was committing some funds. Different people were trying to find out how they were going to -- they were talking about, yeah, we have 10 million of it, but we are going to need more.

So I was present -- it was not my area of discussion, but I was present when they were talking about some of the -- the ways that they were looking at funding the building.

Q. And would that provost have been Ms. Chase?

A. There was quite a turnover during that time. But I believe that Tony Waldrop might have been in some of those, Diane Chase.

So as the provost turned -- as the provost turned over, they -- they were still discussing the project.

Q. Okay. Do you recall whether Provost Whittaker was involved in any of those discussions, once he came aboard?

A. He created a position for Tracy Clark to report directly to him. And they had meetings set up weekly and conversations almost daily about funding.

Q. Do you know whether those discussions about funding were limited to academic, such as, you know, faculty salaries? Or if it encompassed the entire university budget?

A. It encompassed the entire university budget, which is why he created the position. In the past provosts concentrated on academic funding and had a person or people in their office for that. He revamped the way budgeting was being done. So he would have oversight for all budgets for all of the university.

And he reinstituted a university budget committee that met every month to talk about the funding and how funding was being spent. And one of the regular topics was the use of carry-forward funds.

BY MR. RUBOTTOM:

Q. Lee, did Tracy, during the time that she was in that report -- having the regular meetings with Whittaker, did she ever tell you or give you any indication that they had discussed funding sources, and particularly E&G on the construction program?

A. I believe that in -- in admin and finance meetings, I believe she did talk about funding. You

know, that she and Dale were talking about funding. And that's how I knew that they had -- that it had changed and that all funding was going through him.

Q. So this was department meetings?

A. These would be like admin and finance meetings where Bill Merck would have his direct reports convened --

Q. Right.

BY MS. MITZ:

Q. Did you attend all or most of the facilities budget committee meetings?

A. I did attend most of the facilities budget committee meetings, after it was put in place.

But I was a voting member of the committee. I did not lead the committee. And we were not making decisions on fund sources. The facilities budget committee determined what needed to be funded and to prioritize those. And then those recommendations would go to the university budget committee where funding decisions were made.

Q. I see.

BY MR. RUBOTTOM:

Q. Is it your understanding that the university budget committee would have committed E&G funds, say, for any of the downtown projects?

A. If they were committed for that, yes. That is my understanding.

Q. So for anything after the formation of that committee, that committee would have checked off on the commitment of E&G for -- I mean, there's eleven or twelve projects on the list that we're looking at, I think.

But that committee would have checked off on that; is that your understanding?

A. That is my understanding.

Q. Thank you. That's very helpful.

BY MS. MITZ:

Q. And Whittaker was also on the UBC?

A. He chaired the UBC. And Scott Cole was also a voting member. I was not on the UBC. But Scott Cole was a voting member of that committee.

BY MR. RUBOTTOM:

Q. Was Cole or anybody from the general counsel on the facilities budget committee?

A. I don't remember seeing him in the room on that. There were other vice presidents on the facilities budget committee. But I don't recall seeing Scott on there. I would have to go back through to find out who the committee had on it.

BY MS. MITZ:

Q. Okay. Do you know anything about the working relationship between President Hitt and then-Provost Whittaker, now President Whittaker?

A. I know I was told by Dr. Hitt and by a couple of trustees that Dr. Hitt recruited Dale Whittaker to the position of provost. And that he said that it was in his belief that Dale would be his successor.

Q. Okay. Do you know whether the general counsel's office was aware that capital projects were being funded with E&G funds?

A. I don't see any way that they could not be aware. Scott sat in on the university budget committee. He received all of the packets that went to the trustees ahead of time.

He saw all of the forms that were put together ahead of time. I don't see any way he could not be aware.

Q. And he never approached you, contacted you, to ask what was going on with the funding for these projects, correct?

A. Correct.

Q. Okay. All right. So we have been provided with notes that were taken during your interview with the attorneys at Bryan Cave. And so I want to address some

of the things that were jotted down to see if, one, if you have a recollection. And, two, if you can provide more information, more context to these notes.

So the first thing I have is that the notes indicate that you had reported, that you had heard Scott Cole say something to the effect of we'll just have to take that ding, in referring to an audit comment possibly made by Mr. Merck.

Do you recall telling Mr. Burby that?

A. I do.

Q. Can you tell us -- give us some context; explain the situation, please.

A. It would have been early on, when I was at UCF. And I was in a -- a meeting where Bill Merck and Scott Cole were in the meeting. I don't recall exactly the issue at the time. But I do recall that -- that it had to do with athletics funding again, and expenditures of E&G for athletics, possibly moving money to athletics. And Scott's position, I think at the time, was that DSOs are allowed to use university property. That the athletics DSO was created for that purpose. And that the moving of funds to them met the requirements of being university property.

And the auditors -- the State auditor had disagreed with that. And Scott still felt that his

position was the right position. And he said, "Well, we'll just have to take that audit ding; we're not changing."

BY MR. RUBOTTOM:

Q. So this was in the context of a previous audit and -- and they just disagreed with the auditor?

A. Correct.

Q. Do you know what year that was?

A. No. But it would have been fairly early on.

Q. Was that in -- and was it your understanding that was recorded in the audit?

A. Again, it was a limited conversation, with me having limited knowledge. Because I had just -- --

Q. Right.

A. -- not been there very long. But I do recall him saying to take the audit ding on that.

Q. Thank you.

BY MS. MITZ:

Q. Okay. So I am trying to better understand how the funds that UCF has get distributed to the different departments. So I am hoping that you can educate me in the next few questions.

So your department had, like, a pot of E&G carry-forward funds; is that correct?

A. Primarily, what we had was plant operations and

maintenance money, and so --

Q. What was that money supposed to be used for?

A. That money is for maintaining your physical plant, for operations, for maintenance, for utilities -- utilities services. And for, again, whether it's -- talking to Chris Kinsley and getting a lot of guidance over the years. I asked a number of questions about it.

So I would ask, "Can PO&M be used for renovations?" And he would say yes. "Can PO&M be used for replacement?" We talked about that last week. And he said yes. Can interest funds be used for projects? And he said as long as they were related to the project.

So my understanding of what we could do with those plan operations and maintenance monies came almost entirely from Chris, or from other universities where we had these discussions. And we had them a number of times. And I asked a number of times for written guidance on it. And I was always told there was none.

BY MR. RUBOTTOM:

Q. We've asked for that guidance too.

Can -- and when did you learn that PO&M is E&G?

A. I didn't learn that until this investigation. Because it always came into us as PO&M funds.

Q. Other than the construction projects that we've looked -- that we're looking at, do you recall any other

E&G carry-forward funds from the central reserve being transferred to facilities?

A. No. In the normal course of me doing business, I really wouldn't even see that. So I look at the document you gave to me, and I see these -- I normally wouldn't even see a document like this. Finance and accounting -- or even admin and finance, it was their funds -- would transfer funds into a construction account. And the facilities and safety business office would see those funds coming in.

Normally, I didn't even see what the funds were coming in. And I think that's -- that may --

Q. So how would --

A. -- be true that --

Q. How would you know that a project was fully funded so you could go out and contract?

Would that just be -- you would inquire when you were in that procurement process?

A. If we were moving forward with a project, the facilities and safety business office had a responsibility for ensuring that all of the funds were in the construction account.

Normally we insisted that 100 percent be in the construction account prior to starting. If it was something that was being funded internally, we allowed

that those funds could be put in over -- over time, as long as they were there prior to being needed. And that was --

Q. Did you ever --

A. -- that was --

Q. I'm sorry.

A. -- only within the division.

Q. I'm sorry. I interrupted you.

A. It's okay.

Q. Would you just restate your last statement.

A. That was only within the division. So if it was a college, we wouldn't allow that. If it was athletics, we definitely wouldn't allow that. The money had to be there in order for us to do the project.

Q. Do you ever recall any of those -- I mean, I understand some of these funds were accumulated over time. Do you ever recall any time when any of those accounts loaned money to other projects or other activities?

A. I think -- speaking -- you know, we speak now from what we know now, as opposed to what we knew then, and that becomes problematic. Because I know now that funds were loaned to the combined heat and power plan and paid back with energy savings from that plan. But I didn't know at the time what those funds were.

BY MS. MITZ:

Q. So the money that -- that you're -- was allocated to your department, was there anything in writing that specified who had the authority to say, okay, use this money for this reason?

A. No. When I got there, there were very few policies or procedures. And I worked very carefully with audit, and with general counsel, to develop policies and procedures to be able to say, you know, who has to sign change orders; who can spend the funds within their department. Those kinds of things.

Q. So which department actually monitored the -- the movement of funds in the account that was designated for your department?

A. So we have a facilities and safety business office. It resides within the directorate called resource management.

Resource management comprises a number of consolidated operations.

Q. And did they, then, pass that on to finance and accounting? Or did that information just stay in that department?

A. They had regular contact with finance and accounting.

Q. Do you know -- and this may be outside of your,

you know, understanding or knowledge, but I will ask it anyway: Do you know whether your department was ever allowed to carry a negative balance in either an account or on a project?

A. I don't know that. It took quite a while for me to explain the difference between cash and budget.

Q. Okay. All right.

Okay. I think I want to direct your attention now to the documents that we have provided.

A. Okay.

Q. If you can flip to the first page of Number 003 at the bottom, it's like a spreadsheet.

A. Okay.

(Whereupon, Exhibit 1 was marked for identification.)

BY MS. MITZ:

Q. Okay. So this was a document that we received that purports to show all of the E&G funds transferred for projects that were constructed in addition to Trevor Colbourn Hall.

So what I would like to do is kind of go through the projects and see what -- what information, if any, you have concerning them.

So let me start with the venue. What was your involvement in the construction of that project?

A. The venue, so I went back through some -- tried to go back through some things last night. Because again I didn't even see a form like this until the investigation.

Q. Right.

A. And that's when Kathy Mitchell and others started meeting to say -- I think the State had asked what all funds had been spent. So they started coming with the spreadsheet to say, "Well, what is this? Is this one okay or not?" And these projects were determined to be permissible within E&G in those. This first $75,000 was for an investigation of retrofit. The venue had -- and don't know if was boilers or HVAC, something that was falling apart at the time. And the $75,000 was used to do an investigation to determine if the retrofit was possible.

Q. Okay. Do you know who would have directed the transfer of those funds?

A. I don't.

Q. Okay. All right. How about the next project, the facilities surplus showroom?

A. That's what it says here. That was never a facilities surplus showroom. And it wasn't even noticed to the State as that. It was a warehouse and storage facility. It was used for warehouse. It was used for

surplus; it was used for storage. And the project was less than 2 million in construction, which is what Chris said it needed to meet, less than 2 million in construction. So it was a minor project.

Per the BOG regulation, Chris Kinsley okayed the use of two things: One was surplus monies as part of putting the facility together. And the other one was E&G funds. Chris had okayed both of those.

This, I know, was directed by Bill Merck. And I actually told Bill Merck, "I went behind your back and I asked Chris Kinsley if it was okay. And Chris told me yes, based on the fact that it was part of our plan." And that it was used for swing space for space for -- for renovations, that it was used for the storage and maintenance. That it was okay to use those funds.

Q. Okay. What -- what is surplus money?

A. So when you have surplus, you form a surplus committee and you determine what to do with that surplus. And what to do with the funds that occur when you sell off surplus. It's usually things like -- well, they used to have compounded bicycles, and then it sat for a year. It might be things like old computers that people have turned in. It might be furniture that they might not be using. It could be things that are surplus to the university. And we would actually put those out

first to see if somebody else could use them. Because the best use is reuse.

So we would first put them out to see if someone else could use them. Then we would put them up for sale; funds for those sales are only allowed to be used for certain purposes as well.

And the committee oversees that. And that's why we asked Chris if the surplus funds could be used towards this project as well. And they were.

Q. Okay. Thank you for that explanation.

All right. Moving along, then. Global UCF, what involvement did you have in that project?

A. Global UCF was a facility for international students. I am not sure what the $6,500 was used to do.

Q. On a sidenote: Do you have any idea of where the students for Global UCF were located or recruited?

A. Yes. There was a company that was brought in, I think their name is Shorelight. And that company was the one that was determining the best fit students, because they didn't want to just bring in anybody and not have them be successful.

BY MR. RUBOTTOM:

Q. Would the university pay Shorelight for that service?

A. I don't know the answer. But I am guessing that

they would have to pay them.

BY MS. MITZ:

Q. Okay. All right. I see Global UCF again at a million-6. But you're not -- even though that figure is there, you still don't recognize -- you don't remember any involvement in that, right?

A. The million-6 could have been because of the chilled beam. It was an energy measure to save money and provide better comfort for the occupants of the building. And I had thought that that was coming from auxiliary. But, again, I don't know the source of funds. But it looks like the amount is probably for the chilled beam.

Q. Okay. How about the band building?

A. The band building, we were at risk of losing accreditation on our music department because we had kids marching in the lightning. And they had their equipment in the trailer. And they had no place to store the equipment. And the trailer had holes in the floor. And the accreditation folks said you've got to do something about this.

One of the 300,000 here I think came from the college. One of them came from central reserves. And the 262,704, I put a question. It might have been administration and finance carry-forward. I was trying

to look at sheets last night to find out the sources of the moneys, based on the meetings we had during the investigation.

Q. I appreciate that.

All right. Moving along, then, the Center For Emerging Media?

A. The Center For Emerging Media is an existing building located downtown. And the $5 million would be for renovation.

Q. Okay. And then how about the Research 1 building?

A. The Research 1 building, the 3 million and 6 million, I believe, was for buildout. We had a building that had a lot of shell and undetermined research. And Dale Whittaker determined that faculty clusters needed a home. And that they were going to go into a research building. And so they needed to apply funds for buildout of those facilities for the faculty clusters. And I believe that Dale made the decision on those funds.

BY MR. RUBOTTOM:

Q. Did you ever talk to Kinsley about buildouts on -- I am --

A. Yes, we did.

Q. I think I understand furniture and equipment, in

the four months I have been studying this, but -- and I think understand the renovation of old facilities -- what I am curious about is you have a new building. It seems to me like buildout is completion of the new building.

How would Chris Kinsley discuss buildout with you in a new building?

A. Chris Kinsley told us that we could use funds for buildout. That was verified on a CAFA call during the investigation, when the universities were looking at what we knew or didn't know about what we could spend. CAFA members were verified the use for buildout.

Q. And what would a buildout entail?

A. In that particular research building, the vice president for research at the time, had decided he wanted more space, less stuff. And that's his quote. And so they might not have included fume hoods for some of the labs. They might not have included case work in some of the labs.

And then you have researchers who come in, and generic labs don't work for them anyway. They have very specific needs within a lab building -- within a lab for their kind of research. And so it could entail specific research needs, buildouts, or it could be the case work, for example.

Q. Would case work be like the -- the cabinetry and the --

A. Yes.

Q. -- and work the --

A. Yes.

Q. -- the horizontal workspaces and things like that?

A. Yes.

BY MS. MITZ:

Q. I will lump the three downtown projects into one. Did you have any involvement about those projects?

A. I didn't have any involvement on the source of funding on the projects. But on -- actually, getting the projects done, that's where I come in, is getting them built; overseeing that. The downtown campus infrastructure is related to what goes underground. And it might be hardscape, landscape, piping, all of these kinds of thing, the infrastructure to support putting a campus on that site.

The downtown central energy plant, would be -- we looked at several things for this. We actually looked at whether it would be a co-gen plant whether it would be a tri-gen plant, whether it would be a central energy plant, whether we could just fund through OUC utilities.

And we did some analyses. We had engineers that we brought in to do analyses on -- which would be better, financially, and which would possibly give us a return on investment.

So in our area, we did those kind of analyses. But we never did look at the source of funds for it.

Q. Okay.

BY MR. RUBOTTOM:

Q. Did you have any conversations with Chris Kinsley on those three projects?

A. There were a number of conversations about the downtown and all the projects related to the downtown. These were not like one-on-one conversations that I had with Chris, which would be normally what I'd have. I did sit in some of the other meetings. I know there were a lot of other meetings, which I wasn't involved in where they were talking about these projects.

Q. There's something that I am not clear on. And I am just trying to get clear -- because you've talked about not knowing about the regulation and limitations on E&G, but you talked about frequent conversations with Kinsley about whether you were permitted to use -- I -- I am thinking we're talking about E&G on these various repairs, renovations, whatever. Was that -- why would you talk to Kinsley if it wasn't about the funding

source?

A. It was about the funding source. I was asking for guidance to say, can I -- can I do this with this money? Is there anything that tells me what I can and can't do with this money?

Q. So you were just --

A. Just give us something.

Q. After the money was committed you would be clarifying with Kinsley; is that accurate?

A. What I am saying -- the one I had the conversation with him is on the facilities surplus showroom, that conversation was prior to the funding. Because I said I am being asked to fund this through surplus funds and carry-forward funds. So I explained to him what the building was going to do. And he said, yes, you can do those things.

Q. Okay. But in your mind, did you make a distinction between carry-forward and E&G or were you even aware of the idea of E&G?

A. And when I would ask questions of Chris, it was about my PO&M carry-forward.

Q. Yes, ma'am. That makes a lot of sense to me. And it clears up a lot of the things that you've talked about, those conversations. So thank you very much.

BY MS. MITZ:

Q. Okay. Let's address the last project. Did we do --

A. No. And we have the downtown student center. I believe that is a buildout. That is a -- the downtown student center is not a UCF building. It was a buildout to do things like students coming in to make their payments. Some of that -- some of the student development- and enrollment-type space. That is a buildout space.

BY MR. RUBOTTOM:

Q. Is that property being leased or loaned to the university? You said it's not university property?

A. I believe it's under a lease to the university.

Q. Okay.

A. It's going to go in the housing project, as far as I understand it.

BY MS. MITZ:

Q. Okay. How about your involvement in Creole?

A. I don't know what the $17,000 is on Creole. I do know that Creole -- the Creole has had expansions and renovations over time.

And I know that they are -- they are -- you have, again, the -- the Creole up above the 4 million and then the 17,000 down below. Those go together. And I

believe that the 4 million and the 17,000 are related to what they're currently working on, which is an addition and buildout. And that was Dale -- I was in a meeting where Dale said that he was funding that.

Q. But Dale Whittaker said he was funding the Creole project?

A. That's correct.

Q. What do you -- what did you get from that?

Like, meaning coming out of the provost budget, or...

A. Yes.

Q. Okay. Do you recall when he said that --

A. No. It would have been -- yeah, I don't really -- it would have been within the last couple of years.

BY MR. RUBOTTOM:

Q. Well, that transfer was in February of '16. Would it have been before that?

A. It would have probably been before that.

BY MS. MITZ:

Q. Okay. Do you know whether that actually happened, money from the provosts' office was used?

A. I don't know. And I don't know if that was part of the payback. And then they decided the funds could be used. I don't know if that was part of the payback

or not.

Q. Okay. All right. So do you know -- I'm sorry hold on just a moment.

So are you aware of any transfers out of your department back into central E&G carry-forward that would have occurred after the State auditor began questioning the funding for Trevor Colbourn Hall?

A. I know that I received a call from Tracy Clark saying that they were going to be taking all of the auxiliary funds. At the time I said, "Well, we have auxiliary funds for a purpose; that's to run the auxiliaries. Because they are business operations. And won't be able to run those business operations, such as surplus, if I don't have any auxiliary funds to do so."

BY MR. RUBOTTOM:

Q. When was that call?

A. I am guessing September of this last year.

Q. And you didn't hear about any refunding activities before then?

A. No. That was the call when they were telling us they were going to be taking -- sweeping auxiliaries in order to repay those funds.

Q. Thank you.

BY MS. MITZ:

Q. Do you know whether they did take your auxiliary

money?

A. I know that they did take it. And, again, when we started having the meetings, to tell the State what else we had spent. I brought up the point that I had certain auxiliaries that could not run at all without their -- without their funds. And Kathy Mitchell was marking those to come back to later, to say, you know, if we find out that we don't have to pay this one or that one back because it does meet the requirements, then we'll make sure that those funds come back early.

Q. You said that was a meeting with the State. What state official was involved in that? And do you know when that meeting was?

A. I don't know about a meetings with the State. I do know that there were conversations where the State had said that they wanted all of the universities to go back to them with a report on any other projects, like Trevor Colbourn Hall, where E&G funds had been spent.

And as part of that, Kathy Mitchell pulled Tracy, Christy Tant, LaShanda Brown-Neal, and me into meetings to look over spreadsheets on funds. And that was at that time that I saw something similar to what you have here on Page 3.

Q. So you think -- it sounds to me like that they were moving money back to E&G, so they wouldn't have to

report those on that certification; is that what you --

A. I don't think that was the intent. I think the intent was that auditor had said you can't spend that kind of money. And so they were digging to find out sources of money to pay that back.

Q. I understand that process was going on. But none of us understand why the university only certified Trevor Colbourn Hall as built with E&G when they said these other -- some of these other projects were built, so --

A. I think it was because of the assumptions that the counsel of counsels set forward, and the other projects they felt met those assumptions. And I am here to tell you --

Q. So were those assumptions in writing?

A. Yes. Kathy Mitchell sent those forward. I believe the counsel of counsels also put something together -- I heard that they had put something together and that it had gone forward as well.

Q. Thank you. That helps a lot.

BY MS. MITZ:

Q. All right. Besides the people you just identified as having sat in meetings with to go over the spreadsheets, has anybody else talked to you about these additional projects, in either August or September?

A. No. It would have been -- it would have been that time frame when we started looking at them.

Bill Martin -- we asked Bill Martin as well about certain things. Because he said, you know, what was this money used to do? So he would have had the information on -- specifics on where the money was applied.

Q. Did anyone from the general counsel's office inquire?

A. Not of me.

Q. Okay. And did any trustee talk to you about these additional projects?

A. No.

Q. Okay. All right. Were you ever instructed to omit details or provide as little information as possible to trustees concerning any matter?

A. No.

Q. Was it ever suggested or was that maybe an understanding amongst staff?

A. I don't believe that we were ever instructed or that there was any understanding that we were to conceal.

I personally have no spin. I tell it like it is; some people don't like that. And so I have often been counseled not to just put things on the table.

As far as any of this funding was concerned, I was never asked to conceal anything; we didn't try to conceal anything.

Q. Okay. Was there ever a time in a committee or board meetings where you intentionally didn't identify funds of E&G?

A. No.

Q. Okay. If you had described the funds of something other than E&G, would there -- would there have been a reason to do so?

A. It would have only been because we didn't know. You'll see oftentimes when I put "internal funds," it's because that's all I knew, that it was coming from internal. So it wasn't an attempt to disguise. That's what I knew.

Q. Okay. Do you know whether this term "E&G" was used more frequently with the presidents and the provosts than the trustees?

A. I don't know.

Q. Okay. Did you ever hear Mr. Merck say something to the effect of, "If I told the trustees that E&G was funding Trevor Colbourn Hall, they would have never approved the project"?

A. I never heard him say that. Scott Cole told me after the fact that he heard that said. I did -- I told

him I didn't believe it.

Q. Okay. Okay. So I would like to direct your attention, now, to the second document in the packet, which is the --

MR. GREENE: Can we take a 90-second break?

MS. MITZ: Sure.

MR. RUBOTTOM: Three minutes is great.

(Whereupon, a break was taken from 10:54 a.m. to 10:57 p.m.)

(Whereupon, Exhibit 2 was marked for identification.)

BY MS. MITZ:

Q. I would like to draw your attention to the second document in the packet, which starts with Page 7.

Do you recognize this?

A. I do.

Q. Is this a letter that you typed?

A. This is a letter that I wrote.

Q. Okay. Who is it addressed to?

A. It was addressed to Misty Shepherd, who is the interim vice president for administration and finance.

Q. Okay. And was this in response to a letter that she wrote you?

A. It was.

Q. Okay. Can you give me some background on what

her letter said that prompted your response?

A. I wish I had it with me. But she told me that I was going to be held in insubordination.

And I would like to give you a little background.

Q. Okay.

A. After meeting with Joey Burby, I came away from there feeling very abused and upset. I told him in the interview that I didn't know if I could trust him. And I knew that I didn't trust others at UCF. And that I had the notes, and I was going through my notes. And I was willing to provide information from the notes. He told me that he would contact me the following day and would probably want those notes.

He didn't do that. The day of that was a Friday and I was on personal leave. And I was sent an email from compliance and ethics saying, "Bring us all of your notes we're going to copy them here with general counsel." And I said, "Please don't take offense, I don't trust you with my notes. And I can't bring them."

I was also told to turn in my phone and they were going to scan everything on my phone, and that they could go through anything on my phone. And I said, "I have a lot of personal information. This phone is personal, and I also use it for business. But I have my bank account information. And I have notes to my

husband. I have all kinds of things on here. And I can't allow you to do that either."

They waited. And I was still trying to go through the notes for them to find out things. They waited until a Friday afternoon, when I was in a meeting and they knew I was in the meeting with Kathy Mitchell going through documents. They waited until I was in that meeting and at 3 o'clock on that Friday afternoon, I was sent an email and a letter was dropped off in my office -- where I wasn't -- telling me if I didn't deliver everything that was pertinent to this investigation by Monday close of business, I would be held in insubordination.

Q. Okay. And so did you respond, then, the following week with this letter?

A. I responded with this letter. I responded with copies of pertinent texts from my cell phone. I went through about, I don't know, 10,000 or more texts on my phone to try to find anything that was pertinent, not just to Trevor Colbourn Hall, but to Trevor Colbourn Hall, to funding, to reporting that I had done.

And I printed out, I think, a thousand pages of screenshots from my phone. I also continued to work through trying to find pertinent notes from my notebook.

And on that Monday, I was also -- I was supposed

to be in meetings and that I could not get out because I was on a selection committee. And the State says, you must serve throughout. And I was in a selection committee from 1:00 until 5:00.

And so I had my husband deliver -- not to Joey Burby, because by that time I had retained counsel. And so I had him deliver the letter. I had him deliver the documents that I had come up with. And a -- a piece of paper that I asked that Misty sign saying that she had received the information.

Q. Okay. So we've been -- we were privy -- I guess UCF agreed to allow us to seek Bryan Cave's investigative material because we were asking for a lot of the same stuff.

At some point we did get some text messages that we were led to believe were from your phone. We were also given copies of what appear to be your handwritten journals or notebooks.

The difficulty I am having is determining whether we -- what we were provided was what you had attached to this letter.

So do you know whether any of the information that you just described, the texts, the notes that you provided to Bryan Cave, are valuable but yet are not mentioned in the Bryan Cave report?

A. I believe that the notes that I provided had value in more than one way. So some of them were related to Trevor Colbourn Hall. Again, some of them were -- were related to questions that I might have been asking Chris Kinsley, or information that I was given by others in order to do my job.

So I didn't create these notes for -- for a deposition. I didn't create these notes for -- for lawyers. These notes were created by me in meetings or discussions for me to be able to do my job.

Q. Sure.

MR. GREENE: The question was: Did you -- were any of those notes left out of the Burby report that you thought were significant in some way that was important to the investigation.

THE WITNESS: I believe they were significant.

MR. GREENE: Explain to them what you believe.

BY MS. MITZ:

Q. If those notes were not addressed in the report, what I would like to know is if we can get copies of the notes, the texts, whatever you had that you think was important that did not show up in the report?

MR. GREENE: Yes.

A. Yes. I think I can do that for you.

MS. MITZ: That would be really appreciated.

Thank you.

MR. RUBOTTOM: Would it be possible to accompany an affidavit to authenticate them.

THE WITNESS: Yes.

MR. GREENE: Yes.

MR. RUBOTTOM: Is that okay, Chuck?

MR. GREENE: Yes.

MR. RUBOTTOM: Thank you.

BY MS. MITZ:

Q. In this letter -- I think we're on the first page -- you describe your interview as an interrogation. And you stated that Mr. Burby did not like the answers that you were providing to his questions.

And I think later on in the letter you say that he kind of had an idea, basically, of how he wanted this to go. And that your answers weren't fitting into that.

Can you explain to me how you got that impression; what was going on in that interview?

A. So I wrote notes during the interview. And I will share those as well.

Q. Okay. Did he --

A. He was --

Q. -- try to -- go ahead.

A. He was accusing, with his tone, with his demeanor, with his words. He was, I felt, threatening

saying things like, "You're confusing everyone in here. Just answer the questions. Just give me a yes or no. Did you know this or didn't you? Seriously, you expect me to believe that," those kinds of things throughout the interview.

Q. Okay. Your letter also says that you feel that President Whittaker and Chair Marchena are disseminating false narratives to conceal their responsibility or roles in approving the use of E&G for these projects.

Can you tell me a little bit about that, what the false narratives are, why they would be doing this?

A. Well, I think when someone says "one day," the staff never told us about sources of funding. And then the very next day, when he goes before the board of governors, and he changes his story to say the staff deceived us about the source of funding.

One of those can't be true.

Q. Okay.

A. When someone says, "I didn't know anything about funding. I was the provost. And I only did provost stuff and Bill Merck did all of the other stuff," and yet on his own curriculum vitae, he was the university budget officer. He takes credit for all of the funding things, as well as facilities and other things in his curriculum vitae.

He formed -- reformed the university budget committee and chaired it. He reformed the newly formed budget facility. He created Tracy Clark's position to report directly to him and met with her regularly on funding.

Leave that to say that something is also not truthful there.

Q. Okay.

MR. GREENE: Are we finished?

BY MS. MITZ:

Q. All right. Do you know anything about the missing audio recording of the board meeting that has become an issue in this matter?

A. No. But I believe that that's further attempt on their part not to provide all of the information.

Q. Do you know who was in charge -- or who would have been in charge of recording meetings in 2014 and 2015?

A. I don't know who was in charge of it. They generally had someone sitting in on those meetings who ran audio-visual. But those -- those documents are housed in the office of the president. So the chief of staff and the president would have those.

Q. Would have access to them, okay.

All right. Continuing on in your letter you

discuss an ethics complaint that you previously filed against Dale Whittaker for falsifying his résumé. You just touched upon it. I believe that's the résumé that he submitted to Iowa State.

Can you tell me how you learned about the résumé; whether you saw it; who you talked to about it?

A. Well, one of my employees -- I didn't, at the time, even know that he was competing for the position at Iowa State. One of the employees walked in my office and dropped it on my desk and said, "You're not going to believe this." And so, yes, I saw it.

And he showed me in there where information that we had been requested to provide -- such as all of the facilities under design, construction, and where they were in the process -- his office had asked that we provide that; and we provided it. And it went in there verbatim in his résumé.

He had not done any work on any of those facilities, other than spent quite a bit of time on Trevor Colbourn Hall and on his office suite. Other than that, he didn't work on any of the other facilities.

And so looking throughout the résumé, it appeared he took credit for everything that happened at UCF during the time that he was there.

Q. Okay.

A. This employee said that he was going to report it; later asked if I would report it. I talked to Bev Seay. I talked to Dave Walsh. I told them to stay clean. That the -- that this wasn't clean; they needed to stay clean.

I also sent a hidden mail, ProtonMail, to a couple of news sources and to Florida BOG. The Florida BOG was rejected. I sent a couple of emails to the chancellor; they were not rejected. So those emails did go through. And I --

BY MR. RUBOTTOM:

Q. Was that Chancellor Keyser?

A. Yes, it was.

Q. What email address did you send those from?

A. I send it from a ProtonMail address. And I can look it up. I think --

Q. That's your private email, right?

A. It's actually an email that doesn't let someone know your name.

Q. Okay.

BY MS. MITZ:

Q. So he -- he could have read the email, but not known who to reply to?

A. He could have replied to that email address that

was sent to him. You can -- you can send email and you can reply to email. You could have replied to, but he did not.

Q. Okay. Okay. Did you ever confront Whittaker about this, or you just talked to people you just described?

A. I did not confront him. I talked to, again, the two trustees. Dave Walsh then went to UCF compliance and ethics and told them that my staff and I had concerns. They called me to speak with them.

And I spoke with them, Christina Sera, on compliance and ethics. Our chief audit officer, Robert Taft. And I know there was an HR person in the room for at least part of the discussion.

Q. Okay. And what was the result of that discussion?

A. I don't believe anything happened. Because the process continued. Dale Whittaker's résumé was changed. His CV was changed. One of the knight news folks picked up on -- or somebody had seen Christina with his CV on her desk working on it. It said she was only changing a comma, and she didn't know she couldn't work on it in her professional duty time. And that they would tell her she couldn't do that.

The entire CV was changed. And the process went

forward. And he was selected as president.

Q. Okay. So just for clarification, although it sounds like a lot of the information on his CV was not accurate, that he was taking credit for things he didn't actually do. The fact -- the listing of Trevor Colbourn Hall was something that he was involved in; is that correct?

A. Yes.

Q. And the fact that he took responsibility for the university's budget on his CV is also a fact, correct?

A. Yes.

Q. Okay. So it's just the other projects that he took credit for, he didn't have any involvement in?

A. That and I think there were other areas where he's taking credit for everything that happened at the university, some of which wasn't even under him.

BY MR. RUBOTTOM:

Q. Lee, I am a little confused now on timing.

Because I believe he filed this CV with Iowa State or something?

A. That's correct.

Q. And when would that have been? Was that like 2017 or something?

A. Probably. He was -- he was in the final four for Iowa State when I was told by one of the trustees that

they conducted a save-the-Dale campaign outside of the Sunshine, in the president's football box, the trustees had -- and they had a lot of high-level people make commitments to him to get him to withdraw from Iowa State.

Two days later Dr. Hitt announced his retirement and our selection process began.

Q. When did you file your complaints?

A. I filed it during the period that this was all going on.

Q. After he withdrew from Iowa State or before?

A. I think it was right after he withdrew from Iowa State, when all of this was going on.

Q. So at that point, he was in the process of preparing to apply for the UCF job?

A. Yes.

Q. Okay. That might have been kind of scary, wasn't it?

A. I don't know.

It's just -- I kind of feel like the university and the students deserve somebody with ethics running it.

BY MS. MITZ:

Q. Yeah.

All right. Now, did you notice whether the

people that you spoke with, Mr. Taft, Ms. Sera, or whoever from HR, were they taking notes?

Was there any documentation prepared at the time of this?

A. They were taking notes.

Q. Okay. Do you have any idea how long they maintain things like that?

A. I don't.

Q. Okay. All right. Back to your letter.

You also discussed having filed a complaint or having complained on multiple occasions about Chair Marchena trying to get people from the Orlando airport involved in overseeing projects at UCF.

I think you touched upon this in the beginning of our deposition. I want to ask you about your complaints.

Were they verbal or written, and who you went to about them?

A. They were verbal complaints. I discussed it a number of times with Bill Merck. I discussed it a number of times with Scott Cole. I also discussed it with Chris Kinsley.

Q. Okay. And did you pretty much provide the same information to --

A. Yes.

Q. So could you tell me what each person's response was?

A. I know Scott told me that it was not the chair's business to be involved in our operations. And if he contacted me again, I should just say that I passed it to Scott, which I did, at least one time.

Bill Merck didn't believe that there was much that could be done about it. Chris Kinsley told me that I could backdoor information to him about the chair's involvement, if I wanted to. I also reported that to Bill Merck. And he said that he did not believe that we should backdoor the information.

Q. Do you know whether anybody talked to Marchena about this?

A. I do not know.

Q. Okay. After you had these discussions with these three individuals, did Chair Marchena persist?

A. He persisted over time. And as I go back through notes, I can see several times where he, again, wanted to bring in owner's authorized reps. He was determined to direct the delivery method of our projects so that it would result in hard bid, where some of the folks speaking to him would have better opportunities to get in as opposed to qualifications-based selections.

And he did persist over time with trying to push

forward with us putting OARs in place on projects, even though we showed it would cost us a lot more money to do so.

Q. Is sounds -- and like correct me if I'm wrong. But it sounds like, then, these requests of Chair Marchena happened after the Hill report was done?

A. They happened before and after.

Q. Before and after, okay.

Okay. Your letter also states that you and others have documents and proof that demonstrate that both President Hitt and Whittaker expressly approved the use of E&G carry-forward funds to construct Trevor Colbourn Hall.

We discussed a lot, I am familiar with the building program, with the capital outlay budgets that went before the board.

Is there any other documents that would demonstrate that, their knowledge?

A. The university budget committee had those spreadsheets that showed funding sources.

BY MR. RUBOTTOM:

Q. Would those be the spreadsheets that had, like, auxiliary, bond, E&G, et cetera? We've seen those from a lot of staff meetings.

A. Yes.

Q. I'm trying to -- we're trying to nail down that Whittaker or Hitt or any trustee ever saw those spreadsheets.

A. I know that Whittaker would have seen those. He saw them regularly. And the university budget committee saw those.

Q. Would Tracy have given those to him?

A. Yes.

Q. Okay.

BY MS. MITZ:

Q. All right. I am assuming that you've read the Bryan Cave report?

A. I have read all of the pertinent sections that I thought were applicable to -- to facilities and to me, yes.

Q. Okay. I want to kind of dive into any parts that you disagree with, with the caveat that I understand that you're going to disagree with the conclusions that they have reached regarding you, your knowledge. Let's put that aside for a moment and focus more on the knowledge of higher-ups, the knowledge of Provost and then-President Whittaker and President Hitt.

Is there anything in the report that you disagree with in terms of their knowledge of the use of E&G?

A. I believe that the report seeks to absolve Dale

Whittaker and his knowledge, but he was instrumental in funding decisions on the budgets. Again, he created those committees. He worked with Tracy side by side.

He, at one point, made a statement that he only did provost things and he relied on Bill Merck to do financing. And when asked about why his name appeared on documents, he said, yes, his name appeared there as if by magic and that Bill Merck had told him to sign.

I don't think a name appears on documents, and I don't think somebody at that level just signs things that somebody else tells them to sign. So I think that the report does not point out the full knowledge that Dale Whittaker had.

I think that one of the failures in the report is that it was led by the UCF trustees and the general counsel, who should have been included in the investigation.

Q. What do you mean by "led by" the general counsel?

A. Dale Whittaker wrote to Scott Cole and told him that he was to find the company that was going to do the investigation and that he would be working with that company to do the investigation. And Scott Cole was receiving information from the investigation.

Q. Tell me about that.

How do you know that, and what did he receive and

when?

A. Recently, there was some documents surfaced by local news that showed that he had copies of the draft report before it became a report and had opportunities to review those.

BY MR. RUBOTTOM:

Q. Right. We understand that.

But was there anything before that, that you know of?

A. We don't know.

BY MS. MITZ:

Q. Okay. All right. Do you have any information that Chair Marchena was told that E&G carry-forward funds could not be used for capital projects?

A. I don't have anything where he would be told that it could not be used for capital projects. But the same general counsel who was supposed to advise the staff was also supposed to be advising the trustees.

Q. All right. Okay. Are you aware of anybody making the audit comment or audit Hitt comment in Chair Marchena's presence with regard to the Trevor Colbourn Hall project?

A. I am not.

Q. Okay. And just briefly, when you talked to the BOG and Chris Kinsley specifically -- we touched upon

this last week -- you asked about permission for replacement, renovations. You didn't ever ask if you could -- if it was okay to construct a brand-new building with E&G funds, correct?

A. I didn't ask about a brand-new building.

Q. Okay. Your letter indicates that you have spoken to representatives of other universities and that they, too, have identified E&G funds they have used for capital projects.

Do you recall which universities those were?

A. I don't, because there is an -- there's a group of people called CAFA, and it's the vice president -- vice president through administration and finance of the universities. They regularly met, usually on conference call. And I think they also had meetings. And when I sat in on a CAFA call during the investigation, when all of the universities were being asked to talk about the other projects, that's where I think some of the assumptions came out and where, also, they said that they had talked to Chris Kinsley and they had received similar guidance, similar verbal guidance.

Q. All right. So I want to direct your attention to the third document in your packet, which is on Page 13. It's just a one-page text conversation.

(Whereupon, Exhibit 3 was marked for identification.)

Let me know when you're there.

A. Yes.

Q. Do you recognize that?

A. I do.

Q. Is that a text message -- or a text conversation from your phone?

A. It is.

Q. Okay. Who was Elliot?

A. Elliot Potter was working for me at the time. I had hired him on an emergency hire to do contracts and real estate.

Q. Did you say his last name was P-O-T-T-E-R?

A. It is.

Q. Okay. So I am interested in the bottom portion. The last text says: "Honestly, I do now" -- maybe that's --

A. Not. Should be not.

Q. -- "know how you maintain any motivation when it is obvious no one cares about standards and possible illegality and corruption."

Who wrote that text?

A. Elliot wrote that. And --

Q. Okay. Yeah, can you tell me, do you remember why

or what this was about?

A. I do. This was about a building. It's actually the South Orlando campus.

And what had -- Elliot had surfaced -- we were trying to give that property back to the state. And so Elliot was looking at the real estate portion of that and found that UCF had two private leases on that property, one to a Christian academy and the other one to Acorn Stairlifts.

And Elliot went back through the documents and found that that property, when given to us from the state and when donated to the state, had language in there that said that the property was to be used only for public higher education and research purposes.

And so when Elliot brought it to my attention, we did report this, first of all, to Bill Merck, who told us that we needed to report it to general counsel, and we did.

General counsel was the one that had formed the lease to the private Christian academy. And we showed them language in there that would allow them to get rid of that lease. And to my knowledge, they never did get rid of the lease.

Q. Okay.

BY MR. RUBOTTOM:

Q. What was the end result of that property? Did it ever get reverted back?

A. It has not yet been reverted back. And you'll see this was 2013, I think. It has not yet been reverted back.

But the county has some interest in the property. And so we have been working -- our government affairs office has been working with the county on their possible interest.

So when we did not get where we were trying to go with general counsel on this, we did report this to the division of state lands.

BY MS. MITZ:

Q. Division of state lands?

A. Yes.

BY MR. RUBOTTOM:

Q. Would that --

A. This appears in here --

Q. I'm sorry. I didn't mean to interrupt you.

A. Go ahead.

Q. Did UCF take in a lot of property they didn't really have any need for and would just lease out or -- later or --

A. No. This -- this South Orlando campus had been

used in prior years, my understanding is. And they no longer had a use for it. They didn't have the population there to use it. And so they wanted to -- to give it back to the state.

Q. And who was -- who wanted to give it back to the state, and why didn't they accomplish that?

A. I wanted to give it back to the state because it was a money drain. This was one of the properties that was old, and so fit into that base budget PO&M. So I wasn't even getting enough money to maintain the property. We wanted to turn it over. It was not being used. We wanted to get it off our books. We didn't want a failing property and homeless people in the buildings and, you know, issues about the liability of having the property. And in --

Q. Did Mr. Merck agree with you on that?

A. He agreed with us, yes.

Q. Was the president told?

A. I don't know. Bill Merck would have had to tell the president. But Mr. Merck agreed with us that we needed to give this back, and we undertook actions to do that.

Q. Would there be documents of those actions?

A. There should be documents within the general counsel and with the contracts and real estate office

and with the division of lands. There were a lot of things -- we had to do surveys. We also did an environmental because we found that the creek running behind it had environmental issues. So there were surveys done. As part of trying to give this back, we had certain documents that we had to do.

And so there should be records of those, yes.

Q. And do you know what authority blocked that from happening? Was that somebody at the state didn't want it or --

A. No. It became that, again, the county has an interest in the property. And so UCF, as part of its relationship with the county, is working to turn it over to the county.

Q. When was that started?

A. Probably during the time that they were working on the downtown.

So it was part of partnership with the county on the downtown and the county wanting this property. So government --

Q. How long -- how long between the time that you started to try to give it back to the state and that interest, how long a time period was that?

A. It was a matter of years.

Q. And in those years, what kept y'all from giving

it back to the state?

A. Those leases that were still on the property were one of the reasons.

Q. Okay. That -- that makes sense. I -- that's just the piece that was missing. Thank you.

A. Uh-huh.

Q. Okay. I'm going to go through, now, a little bit about capital outlay budgets and the capital improvement plans. And I will be coming back to those later. I appreciate your patience with us.

Mr. Merck called us a few weeks ago. And we just kind of had a general ranging conversation. I asked him about capital outlay budget and -- and he acted like he really didn't know anything about that and others did it.

So who was responsible for preparing the annual capital outlay budget?

A. The capital outlay budget would have been prepared within facilities and safety. I would have reviewed it. It was then also reviewed by finance and accounting. It was also then sent forward in packets. So the vice president for government affairs, the CFO, our chief audit officer, general counsel, chief of staff, a number of people would see that as it was going into packets for the trustees. And then it would go

into the finance and facilities committee packets, and UCF tried to have those packets out 30 days prior to the board meetings.

Q. You reviewed them, but who put them together?

A. They would be put together by Gina Seabrook.

Q. Were there any instructions on doing that for them? Was there any -- any standard methodology that went into completing that form?

A. No. There was nothing that told us how to do it. We tried to follow the board of governors regulation, which is what we were told to do. The board of governors regulation doesn't even tell you what to put in it.

Q. And if it tells you more than you were doing, who would have been responsible to figure that out?

A. If the regulation told us more than we were doing?

Q. Yes, ma'am.

A. Then we would be advised by Scott Cole or it would have come to us from an audit or from any of those people who looked at it.

Again, we passed this through a number of hands every year.

Q. Right. And it looks kind of the same every year. And so that's --

A. It does.

Q. I understand how -- how it happened -- in a bureaucracy.

A. It was used the same way --

Q. Was this circulated -- was this circulated with the capital improvement plan --

A. No.

Q. -- and the university -- with the operating budget? Would they circulate all together or separately or what?

A. It did not go to the capital improvement plan. They were submitted at two different times.

Q. Okay.

A. I do believe it was on the same agenda as the operating budget.

Q. Typically, yes.

A. Uh-huh.

Q. Okay. So did you instruct Gina how to fill them out?

A. Actually, the knowledge of how to fill them out came when I got there to say this is how we have always filled this out. So historical knowledge of this is how we've always filled this out. So and I didn't instruct her how --

Q. How did you educate yourself to improve that?

A. By going through -- now, I read the board of governors regulation on it, which didn't really tell us anything. And the -- the changes we made were to try to improve it. So you'll notice that at one point we put -- put some of the PO&M on there, even though it's not capital, and I explained that to the trustees, that I was putting that on there so that they could see that they weren't getting that money. Because lack of PO&M and deferred maintenance was becoming a hot topic, so we added that.

We added the separate columns so that they could say -- so that they could see a column that says here's what we asked for in one column and then here's what we got in the second -- in the -- it's actually the third column because the title is in the first column.

So we say, okay -- for example, we asked for $38 million for Trevor Colbourn Hall. And then at the second column, you'll see a dash that's a zero. So here's what we asked for. Here's what we got.

Q. So when you were making those changes, did you ask for help from the general counsel's office?

A. No.

Q. Were you aware that there was a statute that also regulates capital outlay budgets?

A. We were not aware of that until this year.

Q. Okay. Did the auditor's findings on that surprise you? Did you read those findings?

A. I did. Now -- and it surprised me a lot.

Q. Did that --

A. I was curious, first of all, why I had not been invited to the -- the exit interview. Normally, when there's an item that's your item, you're invited to that exit interview so that you can have discussion. I believe if I had been invited to that interview, we could have had that discussion to say, wait a minute, this is not how we use this form. Certainly, we're open to learning better on how we should use this form.

Q. Is it possible that the legislature, the BOG, and everybody above the university level has been lax in -- in directing and instructing and holding accountable on those regulations and laws?

A. Absolutely. Absolutely. I can't tell you how many times I asked for guidance and did not get it.

Q. Did you ever ask for guidance on capital outlay budgets?

A. We asked for guidance on capital improvement plans, capital outlay budgets, any of the other forms we were required to fill out. We asked for guidance almost every time.

Q. Well, one of our hopes is that they will be

getting that after we're through with this project.

A. I do too.

Q. What is your understanding of the purpose of the capital outlay budget?

A. Well, again, my knowledge now and my knowledge then are two different things. My knowledge now, after finding the statute and reading the statute, is that it is to show all fund sources for your capital outlay.

Q. Right. But before this --

A. Until that, we understood it that the state told us what -- what funds were coming in. We presented it to our trustees and they approved that. You would hear -- if you listen to any of the transcripts, you would hear me saying to the trustees every year, well, here you are again approving the budget that the state just gave you.

Q. Did it ever strike you as odd that you would -- let's think about 20 -- think about the '16-'17 fiscal year. I guess that would have been adopted in May of -- of -- of '16, or sometime in the spring.

A. Uh-huh. Uh-huh.

Q. Did you know that you would be starting Trevor Colbourn Hall before the end of the next fiscal year?

A. We knew that we were moving forward with Trevor Colbourn Hall. And we had a project approval by the

trustees. And we thought that that --

Q. Did it strike you as odd --

A. We thought that that was what we needed, was that project approval.

Q. Right. I understand that.

But did it strike you as odd that you put a budget in front of them for that building and it said zero?

A. No, it said zero next to PECO. So it shows --

Q. It meant zero PECO?

A. Yes, it shows that for PECO, I asked for 38 and I got zero. That's what those columns showed.

Q. Right. So you just -- I don't want to go further on that because we really have more important things to talk about.

So you talked about the board authorization, I guess the 2014 authorization, the 2016 authorization.

Those -- those board approvals, that was the only board approval of Trevor Colbourn Hall construction; is that right?

A. As far as I know, yes.

Q. And you -- and that was board approval of funding as they were discussed in those meetings, right?

A. Yes.

Q. Do you remember anything -- well, I'm going to

get to that later.

What -- what documents would the president have approved to authorize the building? Was it programs -- the TCH program documents published in February or March of '17? Would that have been the only document that the president would have signed?

A. He signed that document. Can't think of others that he would sign.

Q. Do you know if Mr. Merck had any delegation of authority from the president to approve projects or transfer funds for capital projects?

A. I believe he had up to $500,000.

Q. Okay. So on his authority would have transferred -- I mean for Trevor Colbourn, there was 10 million the first year, 18 million the second year, and 2 million the third, whose authority would those transfers -- would that not have been in your area of responsibility?

A. It would not. So we would be on the receiving end of transfers. And then normally, I wouldn't even see which funds were being transferred.

Q. But that generally -- back to the annual capital outlay budget, do you recall any annual capital outlay budget that showed any source of funds that was university funds or internal funds?

A. No. Again, we did not even -- it had never been used that way before I got there or after to show internal funds. It was always used to show here's what the state has allocated this year. And then the trustees approved it.

Q. So let's go to the capital improvement plan. Who was responsible for preparing those?

A. Those also were prepared by Gina Seabrook and then came to me. I would take them to Bill Merck first, to the provost second, and then to the president third for their input and changes. And then we would mark those changes. At some point we started marking them in red because the trustees had asked that they wanted to see the line-throughs and see the changes. So at some point we started marking them. And then they would go to the trustees.

Then after the trustees had their say on any changes they wanted made, they would clean them up and then send them to the board of governors.

Q. How would the trustees direct changes? Because my -- the meetings I have looked at, they voted for the plan. I don't remember any amendments being voted. How would the trustees direct changes?

A. I recall only -- I only recall one year when they wanted to make a change. It was in a -- it was in one

of their board meetings. And they -- we made the change. I don't recall what project it was. But we made the change.

Q. Okay. Would that have been a priority change --

A. I think it was a priority change.

Q. -- or adding a project?

A. I think it was a priority change.

Q. Okay. Thank you. I just missed that one.

Do you get a form for that from the BOG, or do you guys develop your own form?

A. This came to us from the board of governors. And we're filling it out as we've been instructed by them.

Q. If a project was on there, like Trevor Colbourn, that the administration had already identified and secured university funding for, would either provost, would Waldrop or Whittaker, or President Hitt have ever asked, Why is this on PECO when we're paying for it ourselves?

A. No, we actually had those discussions. Chris had advised us to put a project anywhere it might be funded. And if we --

Q. I understand.

A. If we were still requesting PECO, perhaps as a payback for what the university was funding, we would still put it under PECO. And Chris was aware that Bill

was asking for payback. And that happened on --

Q. Were there other projects that Bill asked for payback? I think I saw a facilities workshop in 2017, where Merck and Whittaker were asking the BOG for payback on the research, for research 1.

A. Yes. Yes, on research 1. There were conversations with Chris on research 1 about self-funding first and then using PECO as a payback. There was also a -- you can't call it a joint use facility because it gets into other issues.

So Chris had advised us on a building in Osceola, where one of the state colleges needed 7 1/2 million dollars and had come to us for that, that we could put it on the PECO list, understanding that -- and fund it ourselves with the understanding that PECO may not come. So that was a risk. But yes, you could put it on there and ask for the payback.

Q. Do you know of any building that you did get PECO for after you had spent university funds to do the project?

A. I don't know of any.

Q. When -- when you say Chris said it, was that something he would volunteer or would that be something that he would say, yeah, that makes sense to try?

A. On that Valencia -- Valencia or Seminole State --

I can't remember which -- on that building, there was a meeting and there were several people in the room having -- asking the questions. On the board of governors' side, Chris and Mickey, I believe, were both in the room. Scott and Bill and I were in the room on our side. I think Vanessa Fortier was also in the room, maybe some others, where they were talking about how to go about doing this -- putting the money onto that building because they didn't have enough money to complete the building. And so it was a -- it was a large group talking about how to fund that.

And that's how the discussion came out that we could put it on there. And they gave us several things to do, like move it up on the priority list, make sure that we asked for a spot survey. And he gave us time frames. And the reason I am remembering this clearly is because I saw it last night. Make -- making sure that we have the survey on time, sending them a memo on what they were going to do with it, and that they would try to help get the funding, but with the understanding that we may not get the payback.

Q. Okay. Let me ask you to look at the document that starts on Page 17. I think that's the capital improvement plan that was adopted in 2014 --

A. Uh-huh.

Q. -- which would have been right after the board approved the new building. And I guess this is the first time Trevor Colbourn Hall, then, would have appeared on the capital improvement plan.

A. I think that's correct.

(Whereupon, Exhibit 4 was marked for identification.)

BY MR. RUBOTTOM:

Q. Okay. And I'm sorry I didn't -- I don't know which year to look at. But let's just look at that form.

When -- there's once or twice where I think Trevor Colbourn and/or the renovation were included in PECO and then also included in the other state sources category.

Do you recall putting them in both categories?

A. That's correct. And that was based on guidance from Chris Kinsley to say, put projects in any place where you might get funding or spend -- spend money. And so oftentimes we would have projects in more than one category.

Q. Okay. Do you ever recall putting one on one of those state categories, but also on the request from nonstate sources?

A. That could also possibly happen. So it might be

like a building that we might have donor funds for some of it. And so we might have put it under possible state funding as well as nonstate, which would be the donor funds portion.

Q. Okay. Would -- did you ever consider putting Trevor Colbourn Hall in that category, given the fact that you were funding it internally?

A. No, because my understanding was that they were spending internal funds. And to me, internal funds could mean a number of things. Primarily, their internal funds would be E&G funds, but it could also be auxiliary sources or other sources.

Q. So when you look at nonstate funds, that would haven't included internal. That would have been donations and debt?

A. It would have been donations and debt, for example.

Q. Okay. Well, that makes sense. I think that helps me.

MR. RUBOTTOM: I'm going good. But does anybody need a break?

MR. GREENE: We're fine.

MR. RUBOTTOM: Okay.

BY MR. RUBOTTOM:

Q. There's three -- in there, I think 17, 16, and

14.

A. I think you have --

Q. Do you recognize those?

A. I think you have them maybe out of order.

So you have the one upfront on Page 18 that's '15 through '20.

Q. Uh-huh.

A. And then you have the one on Page 25 that's '17 through '22. And then you have the one on Page 31 that's '18 through '23.

Q. Right. I intentionally left the -- the third one out.

A. Okay.

Q. Those were the three years that you included the building on the BOB-2 form, I believe.

Were these CIPs ever discussed with the board chair -- with the financing facilities or the board of trustees' chair prior to the meeting?

A. Not by me.

Q. Okay. The BOB-2 in 14 and 16 both showed Trevor Colbourn at $20 million. On Page 27 is the BOB-2 forms. They don't have the year, but that would be the -- the 2016 BOB-2.

And the first one also shows -- the 2014 also shows 20 million.

A. I think the 2014 at 20 million was correct. It was 80,000 gross square feet. And I think when it went to 135-6, the project amount didn't get changed there.

Q. Think that's just a mistake?

A. I think it's a mistake because that's when the building went up.

Q. Okay.

A. So if you look at the CIPs and the story they're telling, if you go to the first one -- sorry. In the first one what you see is Trevor -- you have Colbourn Hall renovation. And that's when we were still thinking we were going to renovate the building and then build the smaller new building, Trevor Colbourn Hall.

Q. Uh-huh.

A. When you get to the next one, the 17 through 22, you see that it now becomes one building.

Q. Right.

A. So the renovation comes off and you have one building and a demolition.

Q. Right.

A. And what you see in the other state sources is they come off of there because Chris said all we had to do was notice, notice the -- the board of governors that they were doing that. So when they were on there before, they noticed the state that we were doing it and

they could come off at that point.

And so the story, then, goes is that you're taking the renovation off and you're putting the -- now it's one building and the demolition, that happens there.

And then --

Q. Right.

A. -- in '18 through '23, you see the full, again, at the top, Trevor Colbourn, and the -- and they disappear from the state sources because they've already been noticed.

Q. Why do -- why -- why was the building added again to the BOB-2 for the '18 -- 2018 through '23, or whatever. That -- the one adopted in July of 2017? Why is --

A. So you see that in red?

Q. Right.

A. Red is what -- how Gina was showing that we had already requested it. And no money had come. This was -- this got caught up in the part where PO&M wasn't coming to us anymore.

Q. Right.

A. And so she was putting the things on there that said, hey, these are all the ones we've asked for before, but no money came. So they're in red. And the

ones in black are the new adds.

Q. Did you-all understand what the legislature did with the BOB-2 list?

A. Well, Chris just told us to put it on here this way and that they -- that he, then, would take the -- the -- the board of governors staff would, then, take the BOB-2 lists and they make up their own BOB-2 that would be sent forward to the legislature for their approval.

Q. Right. But what I'm asking is, did you know the legislature approved the building in the 2015 general appropriation act and the 2017 general appropriation act? So those first two requests, the second one was the larger -- the larger. So it made sense to request approval for the larger building?

A. Uh-huh.

Q. Were you aware that the legislature had approved the building both of those years?

A. Not that I recall.

Q. Well, that helps me understand a lot. And there it goes back to the -- to the guidance. Okay?

Because the legislature did approve it, and then they reapproved it in last year's general appropriation act. Okay? So the legislature has repeated itself on that building. And we didn't -- we didn't understand

why it was on the list. And that's why you kept putting it back on the list. So --

A. Correct.

Q. Am I -- am I summarizing your understanding accurately?

A. That's correct.

Q. Okay. I start talking about what I know sometimes, and I know it messes up the deposition.

So -- okay. Thank you for that.

And just -- just to kind of shorten the time, I believe that we have heard you say, or others say, you -- I just want to see if this is accurate to your understanding.

You would put E&G as the funding source on a BOB-2 if you weren't certain whether or not you would get any other money for it and -- but you didn't have donations or bonds or something; is that accurate?

A. On the BOB-2, Chris had instructed us that if we didn't know the source of the building -- source of funding, but we knew that it was an E&G building, we should put E&G as the source. Or if it was E&G, E&G went there. But he said on the buildings we didn't know what the source was, we should put E&G there, if it was meant to be an E&G building.

Q. Okay. Okay. Has -- has anybody ever asked you,

any trustee, any president, any provost, anybody at the BOG, ever asked you about an E&G notation on a BOB-2 for any building?

A. Not until all of this started, no.

Q. Okay. Did you think that the BOG was approving E&G as a funding source when -- when the process -- was ongoing?

A. Based on guidance from Chris, I believed that -- that by us noticing it under the other state sources, we had told them that we were doing it. And -- and no one told us that we couldn't do it.

Q. Right. I understand. But I'm talking about the BOB-2, particularly. Did you consider that an additional notice?

A. I do consider that a notice. But, again, it could go two ways, based on the guidance we had from Chris that it could be there just because it's an E&G building or it could be there because it's E&G funding. And we got that guidance both ways from Chris.

Q. Okay. Well, that's helped me a lot.

But you understand -- did you understand that the main purpose of the BOB-2 was to authorize future plan operation and maintenance --

A. Yes.

Q. -- funding for those buildings?

A. Yes.

Q. Okay. In 2015, I think we see on a calendar for a meeting. It's Document 5, Page 37. Show you on a calendar for a meeting with Dr. Whittaker to talk about the capital improvement plan for that year.

A. Yes.

(Whereupon, Exhibit 5 was marked for identification.)

BY MR. RUBOTTOM:

Q. Was that -- would that kind of meeting occur every year?

A. It would.

Q. Okay. What -- what was the purpose of that meeting?

A. That would be -- as I was talking about earlier, the way capital improvement plans would flow, Gina would put anything that she knew on there. She would reach out to sources to find out what was -- you know, what's happening with the -- with the projects. She would bring it through me. I would take it through Bill Merck, would be the next stop. And then I would go to the provost, that's the next stop. Then I would go to the president. And he would make --

So they all had their opportunities to say what they thought should be changed or added or deleted. And

after the president had his stop, then that's how we put together what was going to -- the -- the trustees.

Q. Okay. Other than the current draft of the CIP -- let's say that was the May 20th meeting. Other than the current draft of that CIP, what other information would you provide to Dr. Whittaker in that meeting?

A. It would have the other forms with it as well. And we would talk about what those other forms were, you know, the -- the authority to -- to take on debt, which I think is the BOB-1, and the PO&M, BOB-2. So we would go over all of the forms, not just the first one.

And we would talk about anything that had come to us. So perhaps athletics was coming to us for projects or housing or, you know, something that he might not have from his own deans. We would tell him what we were getting from the general population on the needs. And we might -- depending on questions that were asked, we might talk about the educational plant survey at the same time.

Q. Would you talk about funding sources?

A. Not really, no.

Q. Did they ever ask questions about the BOB-2, other than what is -- what buildings are on this list?

A. No. They never asked a question about it.

Q. Okay. Last July, the board of trustees

considered the current capital improvement plan. And last June, the finance and facilities committee considered that plan. And for the 2018 capital improvement plan, BOB-2, Trevor Colbourn Hall is there again. And it shows CF auxiliary as the funding source. And that's document -- I think that's on Page 48.

No, I'm sorry. Let me figure out what document I am on.

I'm still looking at the previous year. No, I don't -- I don't think I have it in the list.

Do you recall that funding source being on the BOB-2 for the current CIP?

A. No. And the only -- and I would not have made that change. The only way it would have changed is when it went forward to finance and accounting. Because they reviewed these each year. Finance and accounting could have made that change.

Q. So Mr. Merck or Tracy could have made that change?

A. They could have. Or the chief of staff could have. I'm not sure that he would know a funding source. Again, the document went through a number of people before it ever was put in their packets. And it was reviewed by finance and accounting every year. It was reviewed by the CFO. It was reviewed by -- I believe --

I believe all of those kinds of document were reviewed by the vice president for government affairs, the chief audit officer, general counsel.

Q. But in the months of June and July, you didn't hear Mr. Merck or Tracy talk about trying to refund the E&G that the auditor was asking about?

A. No. And I don't even know exactly when that exit interview was. If the exit interview --

Q. The exit interview was August. This is what I'm trying to get to -- and I'm going to ask Tracy and Mr. Merck -- it looks like there was a -- they were beginning to plan the refunding, which makes perfect sense.

A. Uh-huh.

Q. I'm just trying to figure out who -- who -- who knew about those decisions.

A. I did not know --

Q. If you saw CFAUX, would that mean carry-forward auxiliary to you?

A. Yes, it would.

Q. Okay. If you didn't know anything about that, that saves me a lot of time.

Let's talk about master plans for a minute. I know we had a conversation last week about that. But for the record: Who was responsible for developing the

2015, 25 master plan?

A. That was also within facilities and safety. We had brought back the former director, Pete Newman, to assist with that because we had a brand -- new planner, Maria Timouri. And Maria and Pete led that effort. The master plan is not written by an individual. We have the element group leaders for each of the element groups. And the facilities and safety team works with those element group leaders to get their changes made and to incorporate them into the master plan.

The only element that we outsource is the transportation element because that's usually the most critical element, and it's usually also the one that our host local government concentrates on as far as concurrency. We --

Q. There's a funding element, isn't there?

A. And that would have gone to the element group leader responsible for funding. There are seven.

Q. Who would that have been?

A. I would have to look. We actually keep record of who the element group leaders are for each element.

Q. If I ask the university, they could provide me that list?

A. Yes.

Q. Okay.

A. And the person that you would ask is probably -- Maria Timouri is still there. She's no longer in that role. She's now doing more project management-type things. And I hired someone -- as I mentioned last week, I hired Suzy Hutson from Purdue to come in and look at -- to do our planning, master planning, space planning, working with us on space planning because she did that job specifically at Purdue.

Q. Okay. Who developed the master plan amendments that were submitted to the board in December, this last December?

A. This last December would have been Suzy Hutson, Susan Hutson, H-U-T-S-O-N.

Q. Do you know who would have worked with her on that?

A. Yes, she was working -- and always all of our amendments would be put together in facilities and safety. I would review them. They would go forward to Scott Cole. And instead of one of his junior attorneys, Scott would review all of the master plan amendments and master plan himself.

Q. Did you see the changes -- next to the building name, there were changes in those amendments that changed the funding source.

Are you familiar with those changes?

A. No, I'm not even sure which amendment we're talking about.

Q. I'm sorry I didn't -- I'm sorry I didn't -- did you review the amendments that were put in front of the board in December?

A. If I was there, I reviewed them. Remember I --

Q. I didn't send you the document, but --

A. I got very ill after.

Q. I understand.

A. Yeah, and so I was -- I was out for some time.

Q. I understand.

Do you ever recall putting funding sources on the building line in the master plan?

A. Oh, I know what you're talking about because Gina Seabrook showed them to me. You're talking about the capital improvements list that goes in the master plan.

Q. Exactly, yeah. I'm sorry.

A. And Gina added that column because I asked about it. I said, "Do we have this column on all of the things, Gina? Because this would clearly show that they had an opportunity to see this." And she said, no, they had not been on there. She, at some point, decided that it would be helpful to have them on there. And so she started putting them on there.

Q. You don't know if anybody directed her to do that

or if there was any discussion that that might be a good idea or not?

A. She normally would ask me. She didn't. And I didn't direct her to do it.

Q. Is it possible that Scott Cole or Kathy Mitchell or President Whittaker or President Whittaker's chief of staff might have directed that?

A. It's possible. Gina also had a lot of conversations with Chris Kinsley. So Chris could have suggested it. Scott could have suggested it --

Q. Well, what -- what bothered me is -- is when you amend something, you're changing what it was to what it is. And that thing shows E&G crossed out and CF auxiliary added. And I have never seen a master plan -- I have never seen a capital improvement list component of a master plan that included the E&G, so I didn't understand. We'll talk to Gina about that.

A. And I had not seen it either.

Q. Okay.

A. As I was digging through documents to find out who knew what, I saw that and said, "Hey, Gina, was this on all of the years?" And she said, no, she had added it. So I'm not so sure if anyone else suggested that it be added. I know I did not. I found it as I was going though documents.

Q. Do you think the trustees would have understood that change when it was presented to them in December?

A. I think that because we made our changes in red so that they could see what we were doing, many of the trustees who had asked us to do that said that they were -- they would specifically look at those changes.

Q. Thank you very much.

Let's talk briefly about the plant survey. There was a full plant survey completed in late 2015 that found Colbourn Hall satisfactory.

Do you recall that plant survey?

A. I do recall the 2015 survey.

Q. I think Mr. Kinsley was on the survey group.

Do you recall that?

A. I don't know if he was on the survey group or not. Those surveys are --

Q. Those are peer groups --

A. That's correct.

Q. -- of the university to the BOG people?

A. That's correct. And it's usually Ken Ogletree from the BOG. It's usually not Chris. It's usually Ken and then Peter.

Q. Do you consider the plant surveys to be serious planning activities or do you -- or do you consider them just another hoop to jump through in the process?

A. I believe that they can be extremely helpful in how you're planning. I don't know if -- I don't know if they are taken seriously by all parties. I think we try to -- we try to take them seriously.

Q. Right. But there's some discussion about Colbourn Hall and they look at it and they find it satisfactory, and yet very shortly thereafter you-all decided to demolish it.

Did anybody ask about the satisfactory rating on that building?

A. No, but I did have conversations with Chris Kinsley later, when we were looking at demolition. And Chris said he felt all along it should have been demolitioned and that he believed that the building was in demolishable state. That's when I was asking them to come back out and do a spot survey. And Chris and Kim decided that no one needed to come back out, that they were fully aware of the conditions of -- of -- of Colbourn Hall. And Chris said that he believed that it was a smart move on our part to demolish that building and that it was definitely in demolishable state.

Q. I understand that.

But if he was on the plant survey team, would it make any sense for him in the -- in -- in the fourth quarter of 2015 to say satisfactory on that building?

A. It was definitely not satisfactory at the time.

Q. Okay. Thank you.

I have a bunch of questions about carry-forward commitment lists.

Have you ever worked on those carry-forward commitment lists or allocation lists?

A. That's the carry-forward -- I think there's a report that's still not -- you're talking about the report -- it goes forward --

Q. The final one with the BOG. In August, and then sometime asked for supplement.

A. No. Those are done in finance and accounting. Christy Tant had, I know at least one occasion, maybe more, asked about buildings that we were working for deferred maintenance. And we provided lists to her of the buildings and what we were doing with deferred maintenance at the time.

And that's -- we didn't really fill out the list. I understand it was a form that had certain categories she had to fill out. And she filled those out with the BOG categories. We provided those.

Q. Do you have copies of those lists that you provided her each year?

A. I don't know. I'm trying to think who might. I have very little access at this point.

Q. I understand.

A. But it's possible that LaShanda Brown-Neal might have copies of the list that were provided.

Q. Are you aware of the -- of the -- of the amounts of deferred maintenance dollars that were on those documents in 2013, '14, '15, '16, and '17?

A. No. I think that there was an email at one point -- I saw one email in one year saying something about whether they had a certain amount of deferred maintenance.

We always could have had enough deferred maintenance. You can't -- you can't spend the money fast enough to do everything you have to do at one time. But we have enough deferred maintenance that could fill up a list.

Q. Understand.

Did -- do you know who made the decision of how much of your deferred maintenance would go on that list?

A. No, I don't know.

Q. Did you ever hear anybody discussing putting money for Trevor Colbourn Hall or any other new projects into the deferred maintenance number on that list?

A. No. I think Isis recently told us our deferred maintenance is sitting at about $260 million. So we don't have to -- we don't have to fudge it.

Q. Do you know who would have presented that commitment list to -- to -- to Provost Waldrop or Provost Whittaker for an allocation list about the time of the commitment list? Do you know who would have presented those to -- to the provosts for signature before they went to the president?

A. No. Sorry. I don't.

Q. Okay. Okay. I'm going to let Carine take back over. We actually skipped some stuff. So I'm sorry.

MS. MITZ: No, we're trying to get through this.

BY MS. MITZ:

Q. I was just reviewing the notes again that Mr. Burby took while -- or -- or the other attorneys said while they were interviewing you. And I want to ask you about some of those things mentioned in the notes.

They jotted down that you had mentioned a meeting that occurred on September 27th of 2014 with Tracy Clark and Mr. Merck in his office in which a discussion occurred regarding the $9 million that had been allocated for Colbourn Hall. And then apparently Tracy Clark mentioned something about an auditor having told her that there would be a problem with using those funds.

Based on what I just said, do you recall that conversation?

A. I do.

Q. Can you tell me a little bit more about it?

A. The conversation I believe was in one of my one-on-ones, and there were a number of topics being discussed. I noticed -- when I -- when I was trying to pull that note for -- for Burby, that it said with Tracy, which to me means that she's entered the room or something. And she does talk about -- I think at the time, maybe it was $29 million on the project and 9 of it was -- was E&G and that the use of that could be the other funds at risk or that the auditors were unhappy.

And then we went on and talked about a number of other topics again. And at the end of the conversation, Merck came back and said that he would need to tell the president.

Q. Okay. So when Tracy Clark referred to the auditor, do you know whether she was referring to a state auditor with the auditor general's office or one of your internal auditors?

A. I don't know.

Q. Okay. And do you know whether Merck reported to the president?

A. I don't know what happened after that. But I --

again, in May of the following year, when we were talking about -- I think we were there talking about return on investment or CIP, we were there talking about one of those kind of things, and I know he discussed it with him then.

Q. Okay. Another notation in the interview notes says that you said audit has said that VP/president can make the decision. I can't determine the context of that statement within these notes.

Do you recall saying something to that effect?

A. Yes, I think it was similar to what we talked about. It might have been the exact thing we were talking about earlier in the conversation today, where -- when I had reported that I thought some things weren't compliant with the vice president level, the audit office told me -- and I believe it was Kathy Mitchell -- told me that's at the -- the presidential/vice presidential level, it's their decision.

First question was, "Did you make the decision?" And I said, "No." And then the answer that I got back then was, "Well, that's at the vice presidential/president level. It's their decision. It's their risk. It's not your problem." And I believe I responded, "It might be their risk, but it still could

be my problem."

Q. Okay. And what was that -- I know we talked about it earlier, but in the last three hours, everything is so jumbled up in my mind.

What was the initial subject that led to her making that comment?

A. It was a list that I had taken to her of issues. And I believe that primary on that list was the athletics funding and athletics -- athletics and DSOs going around facilities, not getting permitting, hiring their own vendors, and the funding going to those DSOs.

BY MR. RUBOTTOM:

Q. But you never discussed E&G spending for construction with Kathy Mitchell in that context?

A. No, because I didn't -- you know, again, if I was reporting something, it's because I thought there was something was wrong. And I didn't -- I didn't see anything wrong. So I didn't report it.

BY MS. MITZ:

Q. Okay. All right. And, you know, feel free to let me know if I've asked this question before. I feel like some of the questions I'm asking two or three times.

And I think we did touch upon this earlier. But when Dale Whittaker came in as provost, he was

responsible for the university's annual budget; is that correct?

A. I don't know if that was correct immediately when he came on board.

Q. Okay.

A. But yes, he did -- he did become responsible for the -- for the university's budget.

Q. Do you know whether that came in time or with a promotion or was there anything that led to that responsibility?

A. I don't know, but I know that when a person comes on new as provost, they're provost. And when they are well within performing all of the duties, they become provost and executive vice president. And Dale Whittaker did become provost and executive vice president.

Q. Do you know whether Dale Whittaker, when he first came on board, met with Mr. Merck regularly?

A. Yes, he did.

Q. He did, okay.

Were you involved in any of those meetings?

A. No.

Q. Okay. Okay. I would like to direct your attention to Document 6 in the packet, which I believe is Page 51 and 52. Let me know when you've had a chance

to take a look at that.

A. Okay. 51 I have. 52 I have.

(Whereupon, Exhibit 6 was marked for identification.)

BY MS. MITZ:

Q. I would like you to pay particular attention to Page 52. It's a chart. I think it's entitled "Capital Project Funding Update." And I know that Don asked you a couple of questions about a form like this earlier.

You see how there's different columns of -- for different forms of funding?

A. Yes.

Q. Okay. Do you know whether documents like this would have been provided to Provost Whittaker routinely?

A. They were. I know that Tracy Clark -- again, they set up -- they set up weekly meetings. They didn't always meet weekly, but they set up weekly meetings. And she was corresponding with him almost daily. And she was providing him all of these kinds of documents.

Q. And would you have seen documents like this in the facilities budget committee meeting?

A. I did not see this one. This is the first time I have seen this one. But there's a longer spreadsheet that we did see, if it was passed out in the facilities budget committee, so that -- the facilities budget

committee could be educated by Tracy on the funding, Tracy and Dale. And then it also went to the university budget committee. And that's the longer version. I don't know where this one came from.

Q. So on that note, why don't you flip to the next document, on Page 55. Is that by any chance the longer version that you're talking about?

A. Yes, this looks like one that I have seen.

Q. Now, this, however, does not show the different forms of funding?

A. There's one just like this that -- that is expanded, that has all of the forms of funding on it. And it was presented to the university budget committee.

Q. Okay.

BY MR. RUBOTTOM:

Q. Would that have been presented the same time as this shorter version?

A. Yes, I think the shorter version was the one that was sent out to the facilities budget committee. The longer version with all the funds sources I understand went to the university budget committee, and it also went to Dale Whittaker. And Tracy had meetings with him about this spreadsheet.

Q. Let me ask you something about facilities budget committee meeting, looking at this, where it just says

"total external, total internal."

Did any participants in those facilities budget committee -- I think the September 2017 meeting would have been where this one was discussed. Did anybody ask, Now, remind me what the internal sources are?

A. No.

BY MS. MITZ:

Q. Okay. How soon after starting with the university did Provost Whittaker begin referring to himself as the university budget officer?

A. I don't know that. But he began meeting with Merck and Tracy immediately upon becoming provost. Because those meetings had been started by the person sitting in the chair before him. Tony Waldrop started those meetings. So he immediately went into having those meetings with Bill and Tracy to understand all of the budget activities.

Q. Okay. Okay. Did you ever hear Mr. Merck tell Chair Marchena that E&G carry-forward funds were being used for the downtown electric plant?

A. I believe that on a board meeting day -- oftentimes on board meetings days, they have side bars in the -- you know, the break room. And Chair Marchena had asked us about the -- some information on the downtown plant. And in the side room, I seem to recall

Merck discussing that with him. And he talked about options for it. And I believe that Marchena was fine with all of the different options, whichever way we could go.

And I seem to recall Merck saying that the state seemed to think that we had a lot of cash reserves and that this would probably be a good way to spend down some of those cash reserves, the carry-forward.

Q. Do you recall whether Marchena said anything in response?

A. I don't. And I didn't -- you know, if I took a note, I didn't have it. But I don't -- I don't recall him saying anything about it.

Q. All right.

BY MR. RUBOTTOM:

Q. Was this in the context of Merck offering to Marchena faster ways to fund that project?

A. I don't know that it was faster ways to fund the project. We were having discussions, the whole -- it was a bigger discussion. And it was about, do we go with a tri-gen? Do we go with co-gen? Do we simply produce our chilled water needs? Do we try to hook on with OUC?

And so there were options that were presented. And we talked -- I think at that time, I believe that

the -- some of the analysis had been done. Because originally, we were talking about doing tri-gen. And we thought that from -- from the engineering reports that had been done early on, it looked like there would be a great return on investment by doing that.

And later, some of the assumptions were proven inaccurate. And so a later analysis showed that it would not be smart to proceed with a tri-gen plant, but just to produce the chilled water that we needed. It would still be a payback versus what we would be charged by OUC to do it ourselves.

And so it was a bigger discussion. And as part of that discussion, they talked about the funding.

Q. Was that discussion happening because that project was on the agenda that day or just coincidence?

A. I do not believe it was on the agenda that day.

Q. Okay. Okay. So going back to interview notes. I actually reviewed the notes of President Whittaker. And he indicated in his interview that he held a meeting with all of Mr. Merck's direct reports the day after the September BOG meeting, during which he told all of the direct reports, including yourself, to be transparent.

Do you recall that meeting occurring?

A. I do recall that meeting occurring.

Q. Great. I'm interested because the notes also say

that you asked President Whittaker, "Does that mean you want us to be completely honest, even when we've been asked to be less than forthright in the past?"

Do you recall making that statement?

A. I do.

Q. Okay. Can you tell us about that?

A. He -- as part of his meeting with us, he said that originally when this investigation -- before this investigation -- when the auditor came out with saying that the funds had been misspent, his initial reaction was to step up and say we had a building in trouble, life and safety was more important than the old money, and that he was going to take that tack, but that he had been coached to respond differently and that he had been coached to -- to show to the board of governors and the legislature and others that -- that we were going to admit that we had done something wrong and that we were going to try to rebuild their trust by being open and transparent.

And when he went around the room to ask questions, I was sitting across from him. And I said, Sir, just as you have been coached about how to respond to this investigation, I want to tell you that I have no spin. I'm not able to -- to say things that are partly true. My daddy used to talk about lies of commission

and lies of omissions, and I think they're still lies. And I have been coached over time to be careful about what I say. So are you telling me, sir, that I can be completely open and transparent about -- about what I know?

And he was physically taken aback. Not only did I notice it, but the chief human resources officer noticed it. And he stepped back and then he said, Oh, oh, of course, Lee, of course.

Q. Okay. Do you know who he was referring to when he was describing that he had been coached?

A. He did not say who had been coaching him.

Q. Okay. All right. So based on that comment that you made, have you been forthright about everything since that discussion with President Whittaker?

A. I absolutely have.

MS. MITZ: Do you want to --

MR. RUBOTTOM: Okay. Yeah, I've got just -- walking through a little bit of history of things, and I'll try to skip the things that we've already covered or that you've clarified you might not know about.

BY MR. RUBOTTOM:

Q. In the 2015 finance and facilities meeting, you were talking about the combined project, I think.

And -- and that's after it came out that Mr. Merck was apologizing for not going back to the board when that decision was made earlier that year. You said something about the Trevor Colbourn Hall building program was about complete, but you needed some time on the Colbourn Hall. That building from -- because y'all call the same -- multiple things the same name.

Is that just the listing of space allocation? Is that what you're talking about?

A. So over time, that changed.

Q. I understand.

I'm just trying to figure out what -- you had that big document, that 50-something-page document --

A. Correct.

Q. -- that everybody signed in February. And that's called Trevor Colbourn Hall building program?

A. Correct.

Q. You weren't talking about that kind of document in June of '15, were you?

A. We had begun preparation of that type of document at the time. And we were --

Q. Had you -- had you gone past just the space allocation listing?

A. I think we probably had space allocation listings done at that time.

Q. Okay.

A. Although, it kept -- it kept changing. That also kept changing. Because the provost wanted to continue to add faculty to go into the building and --

Q. Oh, I understand. Yeah.

A. Yep.

Q. I understand that was the constant conversation.

A. Yes.

Q. So what other elements of that would have been worked on?

A. We had been working on developing a template. Because before that, the building program was really usually taking the concept to the president and him approving that in concept. That was the building program. And I had spoke -- in speaking with Chris Kinsley, I said, I don't think that that's what a building program is. Do you have any others or do you have something that you could provide?

And he said he didn't, but I could reach out to the other universities. He said some of them had, you know, very thick documents and some of them had a few pages. So there was no uniformity in the building program throughout the system either.

Q. Did he direct you to any regulations that were relevant to that issue?

A. No.

Q. That -- that -- that big document that was signed by everybody in February -- I understand people signed at different times -- was that the first time you had done that kind of a document on a new building?

A. It was.

Q. And who -- who put together that little history discussion that included the BOB-2 references that everybody has been talking about on Page 25 and 26?

A. Suzy Hutson is the lady whom I had hired to do building program. She was trying to base it on a template that had been developed by Pete Newman, the former director. But coming in new and trying to put everything in there she possibly can, doing a lot of research to put what she could in that document.

Q. Well, that helps a lot. Because that's in a section about master plan compliance. And I can see how in doing what you described she's doing, that she might contain a history discussion, but it just -- it seemed to me extraneous to the conformity to the master plan. So that's -- I was curious about that.

Oh, when did -- when the decision was made -- I think Mr. Merck said in that meeting the design team came up with an opportunity to actually renovate the old building and tie it in mechanically with the new

building.

Was that at you-all's request -- were you part of the design team?

A. No, the design team is a -- we hire an architectural engineering group. So it would be an architect firm, usually, and may bring engineering consultants with them.

Q. Were they just noodling the possibilities and came up with tying the two buildings together? Or do you know how that came about?

A. Yes. They actually put that together as part of their presentation to be given to us to compete for selection. And that was one of the novel ideas that they put on the table to say, We think we can save money by tying the two buildings together with -- the share of mechanical.

Q. But that was after the board had voted to build a new building and put the renovation kind of on hold - --

A. Uh-huh.

Q. -- right.

A. Yes, but they said we -- that would still -- that would still follow through and build the new building. And they were trying to figure out how, then, they could build the mechanical so that later, when we could do the renovation, it would tie into that mechanical.

Q. But that was on their own initiative?

A. Yes.

Q. And you don't think Mr. Merck asked him to consider that?

A. No.

Q. Okay. I'm trying to skip some things. That's why I'm taking just a second.

I notice in that meeting particularly, and I can't -- I think maybe the -- April -- maybe the 2014 board meetings, I haven't looked at those notes lately. But I noticed there was funding. April 15th finance and facilities meeting when I think you were presenting maybe -- both facilities, I'm not sure. But Colbourn Hall, and Trevor Colbourn came up. And funding was discussed again. As soon as somebody asked you, I think Mr. Merck asked Tracy to answer the question.

Is that because she was responsible for funding sources?

A. That's correct. Because I would not have known the funding source. And so he turned to Tracy, who would have known.

Q. Okay. He noticed that times Mr. Merck or Tracy -- so Mr. Merck might answer questions as well.

A. Uh-huh.

Q. Would that -- he would address funding, also,

because that wasn't your responsibility?

A. Correct.

Q. Okay. I think it might have been the full board meeting in 2014, when the new building was being approved, and I know that Mr. Marchena was chair of finance and facilities, so he had been through a meeting on that building. I think it was that building -- that meeting where there was a discussion of funding and it almost was like Trustee Marchena tried to cut off the discussion or cut it short.

I think he said something about let me just be clear or something. It look -- sounds like he was looking directly at Mr. Merck, because you-all have identified appropriate funding; is that correct?

Do you recall that? Do you recall Marchena doing that in meetings?

A. That wouldn't be the first time that -- that he did that in meetings. But I don't know that I recall that specific time.

Q. Would -- when he did something like that. Would that be because he had a better understanding of the issues than the other board members who were asking the questions?

A. I don't know his motive for doing it, but I do know that that was pretty typical.

Q. Would Trevor Colbourn have been one of the agenda items that Mr. Merck would have briefed Marchena on before facilities -- finance and facilities meeting?

A. I believe it would, yes. I think they had regular meetings before the finance and facilities where he would go over the items with the chair.

Q. Did it surprise you that Marchena was surprised that the combination project was in the works?

A. Yes. I'm sure that he knew.

Q. So if he expressed surprise in that 2015 meeting, that would have been -- he's just trying to bring it before the other board members or --

A. Again, I don't know why he would react that way. But I would be -- I would be extremely surprised that he didn't already know. Because he and Mr. Merck had regular meetings before the finance and facilities. And Merck -- if there was something problematic, Merck would also have individual conversations with the other members.

Q. Okay --

MR. GREENE: Can we take a comfort break?

BY MR. RUBOTTOM:

Q. -- we go further to what we have on the --

MS. MITZ: What's that, Mr. Green?

MR. RUBOTTOM: I'm sorry?

MR. GREENE: Can we take a comfort break?

MR. RUBOTTOM: Yeah, I think I've only got about five more minutes. Let's take a break. I need to check my office.

MR. GREENE: Great.

MR. RUBOTTOM: Let's take five minutes.

(Whereupon, a break was taken from 12:42 p.m. to 12:45 p.m.)

BY MR. RUBOTTOM:

Q. I think we're talking about Marchena. You do believe he was briefed by Merck before those meetings and -- okay. Let's -- let's -- in the meetings -- and I understand people use different words and they mean things and people would say carry-forward or central reserve or university funds or internal funds at different times.

I'm just curious if it was ever thought of using university on the BOB-2 form and not E&G. I know other universities have done that on a BOB-2 form. Was there any thought of using those other words besides E&G?

A. No, because both Gina Seabrook and I had conversations with Chris Kinsley about how to fill out the form. And we were following the directions we were given.

Q. Okay. But it never occurred to you-all in the

board meetings to use the words E&G to be just more specific?

A. No. On funding, I use words if I -- based on what I knew. So if I knew something was E&G, I would say "E&G." But if I just knew that -- that it was internal, then I would use the word "internal."

So it was all -- my words are all based on what I knew or had asked direction and was told to do.

Q. Okay. Well, I -- I -- I don't want to be on a touchy subject here, but let's just be real clear.

A. Okay.

Q. Is it your testimony you did not know that Trevor Colbourn was funded with E&G funds?

A. I knew that they had had discussions. I was in meetings when they talked about pulling sources of funds together. Until September, I didn't know that the entire $38 million was E&G. That was in a conversation I had with Tracy in September. But yes, I knew that some was because I was in the room when they were talking about it.

Q. Well, I -- if you go back to Page 52, and this is an email -- this was attached in an email that you sent to Judith DeJesus in November of '15. And Page 52 is one of those attachments, the capital projects funding update. It's dated January 17th. And that shows for

the combined project 38 million of E&G. And that was -- You would have seen that document?

A. If I sent it, I would have seen it. But I really don't recall this document.

Q. Okay. Okay. Well, I -- I -- thank you. And I know you're -- I know you're trying to be honest, and I appreciate that.

A. I am. I really do not recall this document.

Q. The confusion -- the confusion of everybody -- people using different words and saying everybody knew what that meant, but you wouldn't necessarily know -- when they said carry-forward in the meeting, you wouldn't necessarily know that meant E&G? Is that what you're saying?

A. I would know that carry-forward funding was carry-forward from year to year, and that probably most of it would have been E&G. It could be other sources, but most of it, I think, would be E&G.

Q. Okay.

A. My own carry-forward, most of it would have been PO&M, or all of it would have been PO&M.

Q. Okay. I understand that.

A. And I can -- I'm not sure who prepared this document. And you say it's in an email I sent, then I sent it. But I can tell you I didn't write it, because

I wouldn't misspell Colbourn.

Q. Got ya'.

Later in that April 2015 meeting -- oh, wait a minute. During the 2015 finance and facilities meeting, Dr. Whittaker is quoted as saying, "I would just add, the way I was looking at it also, would, you know, we considered this -- moving forward with this 83,000 square feet per net 10 million minus the demolition cost."

Sounds like he was trying to describe the economic benefits of the combined project.

Would I be correct to infer from that that Dr. Whittaker had a very good grasp on the cost and value of that project?

A. He did. Because when we had meetings with him, that's the kind of conversation we would have. We wouldn't have been talking about funding source with my group, but we -- we were talking about rising construction costs. We were talking about options. We provided him options on what we needed to do to try to get where he wanted to go. There are documents that he had showing what his options could be to get where he wanted to go and, you know, what the cost per square feet might look like for those options.

So he had all of that from my team, yes.

Q. Do you know if he had discussions about the project with any trustees during that time period, say, from January of '15 until -- until the -- the demolition was -- was decided in 2016?

A. I wouldn't know.

Q. Okay. Later in that meeting, Mr. Merck mentioned the shortage of PECO funds, talks about carry-forward money, interest earnings, a whole bunch of other things.

Do you know what he meant by a whole bunch of other things?

A. Can you tell me again what was said?

Q. He talked about the shortage of PECO funds and how they were making it up with carry-forward money, interest earnings, a whole bunch of other things.

Do you know what he meant by a whole bunch of other things?

A. No, I really don't.

Q. Okay. Do you think the trustees would have known?

A. No.

Q. Okay. After that, you mentioned, continuing your presentation in that meeting, in carry-forward funds continuing services contract.

Were you talking about your PO&M money?

A. That's correct. And I had had a state IG look at

that several years before. And he had said that that was fine, what I was doing with the continuing services contract and encumbering those -- the only carry-forward funds there.

Q. So describe that in detail. You would encumber those. You would enter some kind of long-term contract, and those funds would be then -- then committed to paying that contract?

A. They're not committed to paying a specific contractor. So we are allowed to have continuing services contracts. And we would have continuing services construction management firms, continuing services general contracting firms, even some continuing services trades.

And at the end of the year, when we had PO&M and carry-forward, we would obligate the funds to -- on a -- sitting in an account to be able to pay any of those contractors for the work that they might be doing. And then those would become projects, individual projects.

Q. So how would you obligate the funds if they weren't committed to a particular contract?

A. Getting over my head again. But our business office would put those funds in a -- an account. And it might be called "deferred maintenance carry-forward" or something. She would call it a name, "deferred

maintenance account." And she would put the funds in that account. And we would have -- so we had contracts with these continuing services vendors.

And then when we had a project, then we went through the full -- the full process for accounting for a project. And then the funds would then be removed to that project.

Q. Okay. So that would become the funding source for those contracts which were only paid, what, on invoices or --

A. We would put POs and we also had contract terms. Again, once a project became a project, then there would be a -- an amendment to the main contract showing that they had -- you know, what project they were on.

So perhaps I had -- let's just use a company. Let's use a -- Balfour might be one of the companies that was under continuing services. But then maybe I had a -- a boiler that was problematic in an engineering building. And in order to do the repairs to that boiler, we -- we got in and we found the duct work was bad. We found a whole bunch of other stuff bad. And so it became a million dollar problem. And so then we would award individual projects.

So legal said we could just choose, but I didn't really want to do that. And so we would have these

contractors compete. Even though they were selected based on the qualifications basis, we still often had them go through a competition using a GC quote, general contractor quotes, hidden email, so that there couldn't be collusion in my own shop by telling somebody, oh, this guy's going to bid 500,000. You better bid 4.

So we had those opened up separately in order to make sure that we were not only having the contractors, we selected them on qualifications, but now we can get the best price.

And so then they would get a contract for that project. And the monies would be put onto that project at that point.

Q. You stated in that meeting -- again, this is April 2015 -- that you had bought down deferred maintenance from over 200 million to about 116 million at that time.

Do you recall that?

A. I thought it was about 146 or hundred -- a few numbers I remember it was down to 146 and then back up to 164.

Q. Would another $85 million for deferred maintenance have been helpful?

A. Well, it's always helpful to buy down what you have. You know, I think we got our -- I think the

university got into that. We talked about this a little bit the other day. I don't think I totally answered your question the way you wanted it to be answered.

But over time, the -- some inefficient operations, you have your maintenance guys walking their building, which is what they told me they did. You don't -- you don't -- your money doesn't go as far.

Q. I understand.

A. So we've put a lot of -- we've put a lot of efficiencies in place, both in the operations and maintenance side and in the utilities side, that's allowed us to have money that can then go back and fix the things that were deferred for so long.

Q. Right. I think I understand that.

A. Yep.

Q. What I'm trying to understand is what the university did.

And what would you estimate the deferred maintenance number was at the end of the last fiscal year, last July -- last June 30th?

A. Probably -- based on the reports -- I have a company by the name of Isis that comes in and looks at our buildings.

Between combining deferred maintenance and capital renewal, which go hand in hand, I think we're at

about $260 million.

Q. Would it disappoint you to know that UCF characterized $85 million for these building projects as deferred maintenance in their reports to the BOG and to the legislature?

A. It would disappoint me to know that if I didn't have records in my facilities and safety business office to show that.

Q. Did Kinsley or anybody at the BOG ever -- after they got the August reports on carry-forwards, did Kinsley ever come to you and say, Hey, can you verify this 37 million or 27 million dollar deferred maintenance number?

A. No, because that -- I would have had good records in my facilities and safety business office to show exactly what we had spent.

Q. So like if you -- if you gave them a list -- if you gave the finance people a list of 130 -- 130 million in deferred maintenance, and they put 7 of that in this form and added $18 -- 18 million for Trevor Colbourn Hall, you would have been able to show people the combined number in deferred maintenance to ostensibly justify it, even if the administration intended 18 million of that for Trevor Colbourn; is that right?

A. Yes, we have a pretty good record on what we were

actually buying down. I call it "buying down." It's the things that we're fixing.

Q. Right. But they could put any number on that -- on that form they filed with BOG, they put up to 260 million and say we have that much deferred maintenance to do, right?

A. I think the BOG would have objections to that, but I guess so.

Q. I don't think they'd have much objections as they have to building new buildings --

A. Well, I do have $260 million of deferred maintenance, according to Isis.

Q. And I believe you. And I'm glad I don't have to be the one to figure out how to do all of that work.

Are you aware -- are you aware of any backdating of transfers to facilities from the central carry-forward?

A. No. I'm not even sure what you mean by that.

Q. Well, there were some emails that were going on in July of '16, I think, that said the 18 million needs to be backdated to last year, or maybe that was the next year.

But the -- the -- the levers weren't pulled to move the money until July, but they dated them June transfers.

A. No.

Q. But you didn't monitor those --

A. No.

Q. -- those construction numbers when you weren't getting ready to build, right?

A. That's right.

Q. Okay. Just real curious. If you had done the full renovation of Colbourn Hall, what would you have expected the life span to be of the renovated building? Do you have an idea?

A. If you can do a complete renovation, you're probably talking another 50 years again. Generally, we look at a 50-year life span on a building.

Q. Okay. Okay. Mr. Cole publicly went through a timeline last September I think at one of the board meetings or something saying that the 2014 engineering study established the nonfeasibility of renovation.

When did you understand that renovation was no longer feasible? Was that based on your total maximum budget or was that based on rising costs?

A. I don't know exactly when that was. But the same design team that was working on this and the engineers that were working on this and -- you know, we had a lot of things happening. The construction costs were going up. We -- there are some standard kinds of rules on

when you decide to demolish versus renovate.

And when -- the -- as my daddy used to say, poking money down a rat hole to do it, you don't do it.

And so we did those analyses. And if you look at the board -- I think there's some notes in the board meeting where we talked about the demolition, during that demolition, the percentages that far outweighed what the investment would -- it would take to renovate that building. And that's what was presented to the board.

Q. Okay. Let's go back to -- did Dr. Whittaker participate in a decision to abandon the joint project and demolish the old building?

A. Yes, he did.

Q. Who took that decision to Dr. Hitt?

A. He did.

Q. Do you know when Dr. Hitt agreed to demolish the old building?

A. I think that there was email that came out from Dale to Mr. Merck saying that Dr. Hitt approved it. It might have been an email. Either that or a -- or Merck called me. I don't remember which. But I was told that the president had approved it.

Q. I mean, the board took that up in -- I guess May or June of 2016. It would have been shortly before the

board meeting, or it would have been three or four months before?

A. Well, there -- I'm seeing an email Tuesday, January the 20th of '15 --

Q. Well, that was -- that was the decision to do both buildings. I'm talking about the decision to demolish the old building.

A. Okay. So then the demolition came -- we actually had meetings with Dale -- the design team, facilities planning and construction team, and I believe he had some of the folks from the -- from the original Colbourn Hall there, talking about what the team had found and that it was going to be just entirely too costly to -- to do the renovation on Colbourn. And so they presented options to Dale about increasing the size of Trevor Colbourn with the same money and demolishing the building.

So that was presented to Dale. And I believe either Dale or Bill Merck would have taken that to the president.

Q. Okay. Okay. Thank you.

Let's go back to the first decision to build the new building in 2014.

I understand that everyone realized that we got to put these people someplace during the renovation, and

so the most efficient thing is to build a new building that will hold them. And I understand the options that were presented to finance and facilities committee in April of '14 and the full board later.

Marchena was chair of the committee at that time; is that correct?

A. I think so.

Q. Do you recall him asking how the new building would be paid for?

A. No, I don't recall.

Q. Do you recall anything about that April 2014 meeting where the recording is lost?

A. No. I recall preparing for it and working with David Norvell on what those options would look like and what the costs would be to do those. So I recall preparing the options for the board. I don't really recall the board meeting.

Q. Did you keep notes from the board meetings?

A. I normally would take notes from the board meetings, not in my notebooks, but on the -- whatever document I had in front of me. And I tried to go through filing rooms to find any of those. And I was not able to find many of those.

Q. Okay.

A. But those would have been filed in filing

cabinets somewhere.

Q. If the committee had discussed sources of funds, would Mr. Merck and Tracy have been answering those questions?

A. Yes, they would.

Q. Okay. After that -- and, again, I -- I'm not trying to -- I'm not trying to mischaracterize anything. But the board seemed pretty explicit in 2014 to put the renovation on hold. But that October, you -- you presented to a BOG facility workshop about a $19 million PECO request for Colbourn renovation.

What -- what -- why were you competent enough to present that project to the BOG in September of '14, that the renovation was going to happen?

A. Because what the board had said was that they were going to put it on hold until such time as the source of funds had been determined. And I recall reading that somewhere in my notes over the last few days. But they said that they were putting it on hold until they could determine how to pay for it.

Q. Okay. The capital improvement plan on the PECO list only shows like 19 million for total cost on the renovation.

A. Uh-huh.

Q. But the internal budget reports like the one on

Page 52 doesn't ever get above 15.

Can you explain the difference between a $15 million price on an internal budget document and 19 million in the capital improvement plan, PECO request?

A. Yeah, I found differences like that on a number of budgets in reviewing them.

On the capital improvement plan, we're asked to inflate the numbers by the market. So when construction was rising at 4 percent per year, we inflated by 4 percent per year. When it was rising by now 11 and 12 percent per year, we're inflating by 11 and 12 percent per year.

If there were other things that we were trying to include, those would have also been in there. And we would have explained those in the memo that would go to the state to say, this building includes forest protection, for example, on a partnership building or something.

But I have found a lot of discrepancies in budget until numbers are firmed up through an architectural plan.

Q. When they're working on capital projects and you have a budget, are those just -- you keep a number for a couple of years until you're working with contractors and decide, oh, it's going to be more than that, or you

don't have any built-in inflation on those; is that correct?

A. Yeah, we often base it on what the current cost per square foot is. And then as we're --

Q. Like on Page 52, your office would have provided the current estimate of cost on those projects, wouldn't you?

A. I believe we would, yes.

Q. And that would be based on per square foot and the type of building --

A. Yes, at that time.

Q. Okay. Okay. That helps me a lot.

Do you think that -- back to the BOB-2s and when you would go through the capital improvement plans with Dr. Whittaker, do you believe he understood the plan -- plan operation and maintenance role of the BOB-2s?

A. Yes, he understood it. He said he was quite familiar with that. He had known it when he was at Purdue.

BY MS. MITZ:

Q. Was that before?

A. Not -- no, not the Florida form, but --

BY MR. RUBOTTOM:

Q. PO&M authorization?

A. Yes, but seeking plan operations and maintenance

money to -- to operate and maintain facilities.

Q. Okay. Do you -- do you ever find academics to try to act like they know more than they do?

Chuck doesn't like it when I tell lawyer jokes.

A. Well, they often think that they not only know all of the amazing things that they know, but that they know how to do all of our jobs better than we do. They'll often tell me that, you know, I can go down to Home Depot and do that for $1.98.

Q. Do you believe that Dr. Whittaker was diligent in his role as chief budget officer?

A. I believe that he was diligent in -- in trying to understand those budgets. I believe he did understand those budgets. And I believe he -- I believe he was diligent in control of those budgets.

Q. Did you find Dr. Whittaker prepared and well informed at the facilities budget committee meetings?

A. Yes. He had -- he had meetings prior to the facilities budget committee meetings with Tracy so that he would be prepared.

Q. Did those meetings ever discuss the limitations on use of E&G funds?

A. No.

Q. Did you ever discuss, in those committee meetings, your interactions with Chris Kinsley about --

about different funding sources and -- or different projects and the ability to do them.

A. No. In the first couple of meetings, we did have some educational sessions for people who were coming to the facilities budget committee new. In those, we were more explaining the forms, the capital improvement form. They said why do we have, you know, projects in two or three places. And so we explained that. Chris had told us to put it in all of those places.

Tracy -- Tracy did a lot of education in those early meetings to talk about what we were trying to do and how we were trying to really get our arms around what facilities we could build in the next five years, what the priorities were, what facilities you could build or renovate or whatever in the next five years.

And so that -- so that we had a -- a smaller list, a list of what you actually could do in that amount of time, and not just a wish list.

Q. Okay. Thank you.

I think I saw some May 2016 emails about the larger building plan. And I think I saw something that said 26.8-gross-square-feet occupiable shelf. And that was in the context of how the building was going to be used.

Was that plan at that time that there was a

portion of that building that was not yet occupied or planned, that that was gross space in that building?

A. That was -- based on what Dale had -- had discussed with his faculty about current needs and what their planned hires and not knowing what some of those hires were going to be, that was actually supposed to be shelf space for the growth in those departments.

Q. Do you know if the downtown expand -- the downtown presence was already in the works in -- in -- in May of 2016?

A. I don't know. But I -- I believe that they had already started discussions on it.

Q. Did the expansion to downtown change the space needs of -- I know Dr. Whittaker has his plan to add all of the faculty. And did that downtown expansion change those space demands?

A. So we have a group called "SPA," and it's space, planning, and allocation something. They actually report to the provost. Unlike many institutions, you know, that group is tied in with facilities. At UCF it reports to the provost. And that group has spent a -- quite a bit of time working with faculty, working with the deans on what their space needs are and how space will be filled when programs move to the downtown.

Q. Okay. Okay. Thank you very much.

BY MS. MITZ:

Q. So, Ms. Kernek, we're going to wrap up now. Is there anything else that you think we need to know that we have not asked today that would help us in our investigation for the misuse and misdirection of E&G funds at UCF?

A. Well, I think that what you have is a really hard working group of people. We have all tried to do our jobs to the best of our abilities. I think not having written guidance from the state, from our own general counsel is a -- a huge part of this problem, not just for the staff, but also for the trustees.

I think we had a lot of conflicting guidance, where on one meeting where I have with -- with Chris Kinsley and I ask can PO&M and carry-forward be used to -- upon research fume hoods, or break rooms, or whatever? And he says no. And then the next meeting, when I say, How can PO&M carry-forward be used, and he and Tim Jung say, It's your decision.

Yeah. And so I have notes saying those thing s. Our general counsel hasn't given us any training, minimal advising. Yes, they'll answer questions, but that would then mean that we have to know the questions to ask. So I didn't ask a question about the capital outlay budgets because I didn't know a question to ask.

I didn't know that there was anything wrong with it.

We have a lot of circular direction in those -- in the who do we ask. So we -- we go to BOG staff. We go to audit. We go to general counsel. We go to our boss. And if you go to one of those, they send you back to the other one.

Q. Got ya'.

A. So audi would say, Ask Merck. Or Merck would say, Have you talked to general counsel? Or general counsel would say, Have you asked audit? And we would try to do those things.

You'll see that I -- that one instance that you saw in there of -- of a reporting is one of many. I put that in the -- in my screenshots on purpose, to show that we had incidents of reporting what we thought was wrong. Whether it was because we thought it was a compliance issue or legal issue, we reported those things.

And so if you don't see me reporting this E&G funding, it's because I didn't know it was wrong. I would have reported it. I'm --

Q. Sure.

A. I'm going to report things that I think are wrong.

Q. Yeah. You've demonstrated that with just the

things you've told us today.

Well, we're going to ask that if anything else comes to mind, if you're still reviewing all of your stuff and something pops out at you and you think that we would benefit from knowing about it, just please either ask Mr. Green to communicate to us, give us the stuff, call us, prepare an affidavit, whatever you need to do to let us know. Because our investigation is still ongoing and it's not going to end in the immediate future.

And I also ask -- in the beginning we talked about those notes that you had prepared. If you can get us copies of those, that would be greatly appreciated.

And lastly, we're going to ask that you don't discuss this deposition, particularly the questions asked and the answers that you've given, with anybody else who we intend on speaking to, at least until our investigation is closed out.

A. I have been avoiding those -- I've been avoiding those calls -- you know, our conversations on purpose.

Q. Okay. Good.

MR. GREENE: And I need to ask Ms. Kernek just a few questions that -- about the nature of what's going on.

MS. MITZ: Sure.

MR. GREENE: But can we agree I haven't had an opportunity for a full and fair cross-examination like I would do if this was a lawsuit; that the purpose of the investigation is limited? And so if somebody should try to use this deposition against Ms. Kernek in another context, I haven't had the opportunity of cross-examination and it's effectively not closed?

Do you guys agree to that?

MR. RUBOTTOM: Yes. And, Chuck -- yes, we agree. And, Chuck, I would also add that our rules allow that if anything is brought up in our committee meeting, speaking about somebody that's not present, they have -- they have a right to -- to send a written statement or appear in front of the committee, depending on time availability. But they have a right to respond to anything said about them.

So I think I have given you our rule number on that, but --

MR. GREENE: Yeah, you've been very helpful. And ordinarily if this were a lawsuit, I'd probably do a three-hour cross-examination just to elaborate on some points that you made and maybe bring out some facts that -- that you might not be aware of or that might not have been punctuated.

We're going to try to get your documents and things that will help you in that regard. Let me just ask you, Ms. Kernek, a few questions.

EXAMINATION

BY MR. GREENE:

Q. You're employed at UCF from 2007 until January of 2019?

A. Correct.

Q. Were you evaluated annually during that time for your performance?

A. I was.

Q. Were your performances generally positive?

A. They were all exemplary.

Q. And were you commended for your good work you did for your UCF community?

A. I was.

Q. Did you strive to fulfill your duties honestly?

A. Absolutely.

Q. Did you strive to fulfill your duties competently?

A. Yes, sir.

Q. Did you try your best to comply with the rules, regulations, and statutes that you thought applicable to your job?

A. I did.

Q. When you didn't know the answer, did you seek guidance from general counsel and other sources?

A. Yes, I did.

Q. Did you ever, at any time while you're at UCF, do anything that you considered to be immoral?

A. No.

Q. How about illegal? Did you ever do anything that you considered to be illegal?

A. No.

Q. Did you, at any time while you're at UCF, participate in any action that you thought violated the law or the rules or regulations that governed you?

A. No.

Q. You were asked about your relationship with Mr. Merck and Christy Tant and Tracy Clark.

Do you recall that?

A. Yes.

Q. Have you in any way tried to influence anything that they might have to say in connection with this investigation?

A. No.

Q. Have any of them tried to influence you?

A. No.

Q. You were asked about being interviewed by the attorneys from Bryan Cave.

Do you -- do you recall that?

A. Yes.

Q. And have you seen a -- what purports to be notes of what you said during your interview?

A. Yes.

Q. Are those notes -- do they accurately reflect the things that you said?

A. They do not.

Q. Do they tell everything -- do the notes accurately reflect all the things that were said and done to you during the interview process?

A. They do not.

Q. And you said earlier you felt you were treated hostilely?

A. Yes.

Q. And did you feel that the investigators were looking for the truth or looking for answers that they had set out to get when they started their investigation?

A. I think that they had predetermined their answers and they were forcing us to give the answers that they wanted to hear.

Q. And did they react hostilely when you deviated from the narrative that they wanted you to tell?

A. Yes.

Q. You were asked whether your office gave information to Dale Whittaker about the funding for TCH being specifically designated as E&G.

Do you recall that?

A. Yes.

Q. And you said your office did not provide that information to Dale Whittaker; is that right?

A. That's correct.

Q. But you know that as part of the facilities budget committee, that Dale Whittaker was given information at least -- at least monthly?

A. He was given that information, yes.

Q. And that information related specifically to the carry-forward of E&G; is that right?

A. That's correct.

Q. And Dale Whittaker was at least monthly given spreadsheets showing the projects that were funded by E&G?

A. Yes.

Q. And that would include Trevor Colbourn Hall?

A. It would.

Q. You were asked whether Dale Whittaker diligently pursued his job as provost. He was also chief budget officer, wasn't he?

A. Yes, he was.

Q. And would it be accurate to say that when it came to UCF, he immediately began staking out his territory as being the person in charge of budget matters?

A. That would be accurate.

Q. Did he play a role in forming the facilities budget committee?

A. He did form that.

Q. And did he have Tracy Clark act as his direct report to give him information about the funding of projects?

A. He did.

Q. And would that have included Trevor Colbourn Hall?

A. It would.

Q. Now, in your -- what was your title while you were at UCF?

A. I was an associate vice president responsible for facilities and safety.

Q. Did you as part -- as -- was your job essentially to oversee the projects that were being built and renovations that were doing done at UCF?

A. It was to oversee the facilities, whether it was design, engineering, construction, operations, maintenance, sustainability, and the safety of those facilities.

Q. Did you have the authority to allocate funds to your department?

A. I did not allocate funds to facilities and safety, no.

Q. Did you have any authority to designate the funds that were used for Trevor Colbourn Hall?

A. No.

Q. Did you play any role -- did you decide to use E&G funds to construct Trevor Colbourn Hall?

A. No.

Q. Were you asked for any input before that decision was made to use funds for Trevor Colbourn Hall?

A. No.

Q. Did you give any input?

A. No.

Q. Were you ever -- after the decision -- who made the decision to use E&G carry-forward to fund Trevor Colbourn Hall?

A. I would say the president made that decision in consultation with the CFO.

Q. Did anyone at UCF ever ask you to conceal the fact that E&G funds were used to construct Trevor Colbourn Hall?

A. No.

Q. Was the fact that E&G funds were used to

construct Trevor Colbourn Hall reported internally throughout various departments throughout UCF?

A. It was.

Q. Was it reported in the same manner that other projects being conducted by UCF were reported?

A. It was.

Q. Was there anything done to change the method of reporting so that the funding source could be in any way concealed?

A. No.

Q. Did you ever try to conceal anything connected with Trevor Colbourn Hall?

A. No.

Q. Were you ever instructed to conceal anything connected with Trevor Colbourn Hall?

A. No.

Q. Do you know of anyone else who was instructed to conceal anything connected with Trevor Colbourn Hall?

A. No, I don't.

Q. Now, you were asked about whether Dale Whittaker gave information to the board of trustees.

Do you recall that?

A. Been a long interview. No, I don't recall.

Q. I'm going to show you a couple of emails dated in March of 2017 and ask you to look at those for just a

second.

And here is one from May of 2016.

Do you recall that the department that Tracy Clark headed gathered information for Dale Whittaker concerning the funding of the projects that were ongoing at UCF in 2015?

A. Yes, they did.

Q. And did the projects for which the department headed by Tracy Clark gathered the information include the funding source for Trevor Colbourn Hall?

A. Yes, it did.

Q. And was Dale Whittaker provided with information that specifically showed the funding source for Trevor Colbourn Hall being E&G?

A. He was.

Q. And that was on multiple reports that were given to him; is that right?

A. That's correct.

Q. And was it Dale Whittaker who -- was he invested with the responsibility to report the funding sources for the capital projects being undertaken at UCF to the board of trustees?

A. He was, as the university budget officer.

Q. In 2016 didn't he specifically gather information so that he could tell the trustees about the funding

sources for all the capital projects?

A. He did. This was in preparation for a presentation he was giving to the trustees.

Q. And at the time he -- before he gave that presentation, was he provided with information that specifically showed that the funding source for Trevor Colbourn Hall was E&G?

A. It showed that it was internally funded.

Q. And specifically on the -- on the reports in your hands -- by the way, of those has nothing on it, doesn't it?

A. Yes, it does.

Q. Whose handwriting is that?

A. That appears to be Dr. Whittaker's handwriting.

Q. And he's circling and making notes about funding sources for Trevor Colbourn Hall?

A. That's correct.

Q. And then after he did that, he gave a presentation to the board of trustees?

A. It does appear that it's after this, yes.

Q. And would you expect that if Dale Whittaker was fulfilling his duties as the chief budget officer, that he would accurately report everything he knew to the board of trustees?

A. He should do that, yes.

Q. And if he didn't do that, whose fault would that be -- never mind.

He had the information available to him to make an accurate report, didn't he?

A. Correct.

Q. Now, you were asked about Marcos Marchena. He was chair of the facilities and finance committee; is that right?

A. He was.

Q. And was he a -- a potted plant who sat around and didn't ask questions at the meetings where you attended where he was present --

A. No.

Q. -- and in charge?

A. He directed those meetings.

Q. And you were asked, did he prepare for the meetings and gather information in connection with those.

Do you recall that?

A. Yes.

Q. Isn't it true that at least 30 days ahead of every board meeting, that Marcos Marchena and the other trustees were provided with a package that gave them information about the things that they were going to consider during the upcoming board meeting?

A. As a matter of course, those packages were provided 30 days prior.

Q. And when the thing that was going to be considered was a project that was being funded, would that include information related to the funding sources for that particular project?

A. The board packets?

Q. Yes.

A. They -- if it were under the -- the -- the things that we provided, yes.

Q. And did the board members have the opportunity of -- in advance of and during the meetings to ask questions?

A. Yes, they did.

Q. Do you know of anyone at UCF who ever hid anything from the trustees concerning Trevor Colbourn Hall?

A. I don't.

Q. Do you know anyone at UCF who ever hid anything from the trustees or tried to disguise in some way of funding source for any project that was being done at UCF?

A. I don't.

Q. Was a package that was provided to the trustees in advance of the meetings -- was that package also

provided to the general counsel?

A. That package would normally go through a number of -- of parties. It would go through finance and accounting if there was finance on it. It would go through the CFO. It would go through the vice president in charge of government affairs. It would go to the chief audit officer. And it would go to general counsel prior to the -- to going to the trustees.

That is my understanding.

Q. And with respect to the Trevor Colbourn Hall project, would information have went through each of those departments that included information concerning the funding source for the project?

A. It's my understanding, yes.

Q. And so Scott Cole, the general counsel, would have had information showing that E&G was used to construct Trevor Colbourn Hall?

A. Yes, and he also would have had it as part of the university budget committee.

Q. And did Scott Cole readily attend the university budget committee?

A. Yes, he did.

Q. And was carry-forward -- the balance carry-forward and the demand to spend that down that were being relayed by the state to UCF, were they the

subject of discussion at those meetings?

A. My understanding was that's a regular agenda item.

Q. Did Scott Cole or anyone from the general counsel's office ever tell y'all that it was wrong to use E&G to construct the new building?

A. No.

Q. Did Scott Cole or anyone from the general counsel's office ever tell y'all about BOG Regulation 9.009?

A. No.

Q. Did anyone from the general counsel's office ever tell you that there were any -- they had any concerns of that -- or that there was anything wrong with the way that Trevor Colbourn Hall was being funded?

A. No.

Q. If you had thought that there was something illegal or in direct violation of the statute of rule concerning Trevor Colbourn Hall, would you have reported that?

A. I absolutely would have.

Q. You, in fact, throughout your tenure at UCF, reported things that you thought were wrong when they came to your attention, didn't you?

A. I did. And changes were often made because of

it.

Q. There's been much ado made about some of the reports that your office prepared that said the trustees don't say E&G, they say UCF internal funds, nonrecurring funds, and similar terms.

Were those funds -- were those funds used in any way to disguise the fact that E&G was used to fund Trevor Colbourn Hall?

A. No. It said internal funds. That's what we knew. Because we don't control fund sources. All we knew was that the university was funding it. So we would have said university funds or internal funds.

Q. Is there anyone who could possibly know about the finances of -- of UCF the way that the chairman of facilities and finance committee should, the way a chief budget officer should?

Is there any way they possibly could not understand that the term "carry-forward" included E&G?

A. Not if they were doing their jobs, no.

Q. Because isn't it true that carry-forward was composed primarily of leftover E&G?

A. I believe so, yes.

Q. And so the lingo that y'all used internally -- nonrecurring funds, UCF funds, carry-forward -- were all of those funds used by y'all to -- to -- with the

understanding, at least as you understood it, to include E&G?

A. Yes.

Q. And do you think that the persons that you had conversations with using those terms had a similar understanding?

A. I do.

Q. The audit ding you were in -- in a meeting where Bill Merck told President Hitt that there may be an audit comment or an audit ding, something of that nature; is that right?

A. Correct. Yes.

Q. Now, when that was said, did Bill Merck tell President Hitt or did President Hitt tell Bill Merck or did anyone say that they thought they were going to receive an audit ding because they were violating a rule or statute?

A. No.

Q. Did either of them, Dr. Hitt or Mr. Merck, indicate that they thought they were doing something illegal?

A. No.

Q. Did you think they were doing something illegal?

A. No.

Q. Did you feel that there was an emergency that

justified the action they were taking?

A. I did.

Q. Was there an emergency at Trevor Colbourn Hall?

A. There was.

Q. Why? Or at the old Colbourn Hall. Why?

A. I had -- the engineers do the reports. The engineers said to me, "You might be able to get by with this building for a couple of more years. I can tell you your building is standing, but I can't tell you how it's standing. And in a strong wind, I would evacuate."

Q. When the engineers told you that you had about two years, did they tell you you had about two years before the building fell?

A. They did.

Q. And how long would it take to construct a new building?

A. It would take me that long to design and construct a new building.

Q. Now, going back to the audit ding comment, was it uncommon for UCF to receive audit comments?

A. No. I think -- we often invited audit in. I invited audit into my mix because that was the way that I would learn how we could do things better. And there were audit comments on other audits in the past. I had heard our general counsel say on other issues, Well, we

might take an audit ding, but we're going to do it anyway. I think UCF saw it as -- we're either going to disagree with this and we'll -- you know, we need to know about it. We'll disagree with it. Or we'll see it as a way to improve.

Q. So audit dings were not uncommon?

A. No.

Q. Would you agree with the statement that the fact that somebody thinks there's going to be an audit ding does not mean that they think that their actions would be found to be illegal?

A. That's correct.

Q. And were -- the fact that somebody said there's going to be an audit ding, did that, to you, profess an understanding that, Hey, we're going to get looked at very closely here and we're going to have to explain?

A. Yes.

Q. You didn't -- you were asked about the allocation of E&G funds to various departments.

You didn't have the authority to allocate those funds, did you?

A. No.

Q. I think you testified you did not even know that the PO&M funds you were allocated originated from E&G?

A. I didn't. I was always told those were PO&M

funds.

Q. You testified about conversations with Chris Kinsley. He's from the board of governors, isn't he?

A. He is.

Q. He's a staff member?

A. He's staff.

Q. He was a liaison between UCF and the state as well as other universities in the state?

A. As well as others, yes.

Q. And did he give you conflicting guidance on the permissible uses of the funds that were allocated to UCF?

A. He did. On some occasions, he would say, yes, can do that. On other occasions, he would say, no, you can't spend it for that. On some occasions, he said it was our decision. And every time I asked for guidance, there was no guidance.

Q. Did you ask for written guidance?

A. I did.

Q. Did they refuse to give it to you?

A. I don't know if it was a refusal, but they never did give it to us.

Q. If you had had written guidance that clearly told you about Regulation 9.009 or otherwise told you that the use of E&G for Trevor Colbourn Hall might not be

appropriate, would you have reported that somewhere?

A. I would have followed it and I would have reported it.

Q. Were the trustees -- without going through all the detailed information -- but the slides and everything that were attachments to letters that I sent to the board of governors on a couple of occasions, did you have a chance to review those?

A. Excuse me?

Q. Did you review the slides and other information that were attached to letters I sent to the board of governors?

A. Yes, I did.

Q. That reported -- that included some of the information that was given to the trustees about Trevor Colbourn Hall?

A. Yes.

Q. Were the trustees specifically given information that showed that E&G was used to construct Trevor Colbourn Hall?

A. They were.

Q. Would one of the instances where they were given that information include when Marcos Marchena, during a transcribed meeting in September of 2014, was expressly told that carry-forward was being used for Trevor

Colbourn Hall?

A. He was.

Q. Is there any -- knowing Marchena and what he knew in your other discussions with him, is there any way that he could not have known that the carry-forward being used to construct TCH included E&G?

A. No.

Q. I'm just briefly, on the Burby report, you were asked about whether you disagreed with it. Let me just ask you a few quick questions so we can wrap this up.

Do you believe the report of Joseph Burby downplays his stint of Whittaker's knowledge and participation in the Trevor Colbourn Hall project?

A. It definitely does.

Q. Does the Burby report inherently contradict itself when it uses a letter from Tracy Clark to attribute a guilty mind to Bill Merck, yet absolves Whittaker, who was also copied on that same email?

A. He was on the same email, yes.

Q. Does Joseph Burby's report at all reference Whittaker's handwriting on the E&G budget carry-forward that's attached to one of the emails I showed you earlier?

A. It does not.

Q. And you know that he had that because I sent that

to him before the report was prepared?

A. He had it.

Q. Does Joseph Burby's report reflect a misunderstanding of how the terms carry-forward and nonrecurring funds and UCF internal funds were used interchangeably with E&G?

A. I believe it does.

Q. As a person who was fired as a result of the Burby report, do you think it was fair that Marcos Marchena, who was within scope of the possible targets of the investigation, drafted the scope of the investigation for Joseph Burby?

A. I have stated on a number of occasions that it wasn't right or fair.

Q. As a person who was fired as a result of the Burby report, do you think it's fair that Scott Cole, who is called "the boy" to Dale Whittaker, had a chance to review and revise that report before it was finalized?

A. It was not fair.

Q. Switching gears. The capital outlay budgets and the capital improvement plans, there's been mention of those in the Burby report and questions here today.

Did you in any way try to conceal or disguise or hide anything that was a subject of those reports when

you reviewed them?

A. No, I didn't.

Q. Did you instruct anyone who worked under you to hide or use those to disguise anything?

A. No, I didn't. And anyone working for me, even now, not working for me, would tell you that I have always told them to tell the truth.

Q. And did you fill out those forms to the best of your ability --

A. Yes.

Q. -- as you understood them?

Did -- by the way, did Dr. Hitt or Bill Merck review those forms?

A. They did.

Q. After they were done?

A. Yes.

Q. Did they instruct you -- either of them instruct you as to what to put on the forms or to change anything on them, to your knowledge?

A. No. And nor did Scott Cole, our general counsel, who also reviewed them.

Q. You said that Whittaker told you that he had been coached as to how to respond to the investigation; is that right?

A. I said that he had -- yes, that he had been

coached as to how to respond to what had come out from the auditor, yes.

Q. And he -- when he said that he had been coached, he said that he was initially going to tell the investigators that there was a sick building and that UCF was trying their best to take care of it. Is that what he said?

A. Along those lines, yes.

Q. And you believe -- do you believe if he had said that, that would have been the truth?

A. Yes, I do.

Q. But he said he had been coached to say something else?

A. That's correct.

Q. He had been coached to -- to blame other people rather than the sick building?

A. I agree.

Q. Is that what -- is that what he said?

A. I believe that -- what he said was that he had been coached to admit wrong, to say that our CFO took full credit to admit wrong, to pretty much let the university take its licks to -- to show that he was going to be open and transparent.

Q. Did he ever tell you who had coached him to tell this story?

A. He didn't.

Q. Part of the coaching was that he downplayed the emergency that existed because of Trevor Colbourn?

A. That is correct.

Q. And the emergency that the Burby report also downplays?

A. That is correct.

Q. Have you been forthright here today?

A. I absolutely have.

Q. Have you been forthright throughout this investigation?

A. Yes, I have.

Q. Do you feel you were wrongfully terminated?

A. I do.

Q. Why?

A. Every day I have done the best I can do with what I have to work with. I have saved the university millions of dollars. When we start talking about taxpayer money, I have saved the university millions of dollars through efficiencies, through energy savings measures, through cost avoidance in contracting, through any number of -- of measures. We've made that an efficient organization.

We know that we have additional areas that we need to work on. We tried to work on those. Some of

them we work on with -- without the funds to be able to do that.

I have a number of employees and my direct reports, who are the best and brightest because I have hired the best and brightest and allow them to do their jobs.

I believe that I was scapegoated by Marcos Marchena and now Dale Whittaker with him. Dale because he was put in place by Marcos Marchena. The very trustees who aren't being investigated and who are leading the course of the investigation are the ones who put Dale in place, and who also were operating outside of the sunshine and putting him in place.

The general counsel, who also should be investigated, is -- is providing -- is selecting the law firm that's doing the investigation, is corresponding with the outside investigator through -- through the process.

And so people who should have been investigated are: Dale Whittaker, driving the investigation; Scott Cole, leading the investigators; the trustees, who are -- who do know are all covering themselves by scapegoating people at lower levels.

And so I do believe that it's wrongful termination. The report in there nowhere says that I

was guilty of misconduct, and yet that's what they have said, that they are firing me for misconduct. They then also gave me the opportunity to resign or go to predetermination hearing, which means that it's not yet settled, and yet my name is all over the media. And Dale Whittaker is further saying horrible things about the four of us.

And I have not even gone to predetermination yet.

Q. Let's just make that clear, and then I'll stop.

You were given the option to either be fired for misconduct or to resign so that the misconduct would not be on your record; isn't that right?

A. They said I could resign and it would not go on any of my records, or I could go to predetermination hearing.

Q. And then you were given five days to make that decision, weren't you?

A. That's correct.

Q. And then the very same day the university, through Dale Whittaker, announced publicly that you and the three others who were fired were fired for misconduct?

A. That's correct.

Q. That was before you had the opportunity to weigh that decision of the five days that had purportedly been

given to you?

A. That's correct.

Q. Is there anything else you want to say to the investigators?

A. (Shakes head.)

MR. GREENE: That's all I have, Don.

MS. MITZ: Don stepped out because he had a meeting. So I'm the lone soldier left.

Madam Court Reporter, I think for this time we can say that the depo has been concluded and we can go off the record.

(Whereupon, Exhibit 7 was marked for identification.)

(Whereupon, Exhibit 8 was marked for identification.)

(Thereupon, the proceedings concluded at 1:48 p.m.)

CERTIFICATE OF OATH

THE STATE OF FLORIDA)

COUNTY OF ORANGE)

I, the undersigned authority, certify that PRISCILLA LEE KERNEK personally appeared before me and was duly sworn on the 12th day of February, 2019.

Signed the 1st of August, 2018.

In Re: 02/12/2019, Deposition of PRISCILLA LEE KERNEK

Dear PRISCILLA LEE KERNEK:

This letter is to advise that the transcript for the above-referenced deposition has been completed and is available for review. Please contact our office at (800)275-7991 to make arrangements for read and sign or sign below to waive review of this transcript.

It is suggested that the review of this transcript be completed within 30 days of your receipt of this letter, as considered reasonable under Federal Rules*; however, there is no Florida Statute to this regard.

The original of this transcript has been forwarded to the ordering party and your errata, once received, will be forwarded to all ordering parties for inclusion in the transcript.

Sincerely,

JAZZMIN A. MUSRATI, RPR
Orange Legal, Inc.

To: Gina Seabrook <Gina.Seabrook@ucf.edu>
Subject: Creol Roof

The following items are what I suggest for Scope of Work to apply a spray coat over the existing single ply membrane roof system:

1. Check and tighten all drain collars prior to cleaning roof.
2. Clean roof with recommended product and procedures by Fibertite.
3. Check all roof area and identify any ponding areas and correct the discrepancy.
4. Remove large curb mounted sheet-metal caps, install iso-board(match existing) and single ply Fibertite membrane to match existing.
5. Remove existing coping stones. Install single ply membrane to extend up and over parapet and install brushed aluminum coping cap.
6. Remove all stucco and replace with Thermocromex. Provide alternate pricing to repair all stucco cracks, patch and paint to existing color with elastomeric paint.
7. Areas around curbs that roof system membrane is not adhered to curbs, apply new membrane in accordance with Fibertite details. Obtain details from Fibertite.
8. Check and repair all lightning protection cables, attachment devices, air terminals and down leads.
9. Check all sealant and backer rods for proper sealant and replace all areas as required.
10. Repair any gaps between mechanical equipment and curbs.
11. Remove any penetrations with improper approve sealant by Fibertite and re-seal with approved sealant by Fibertite.
12. Apply spray coating approved by Fibertite. This application must have a 10 year product warranty and a 5 year application NDL warranty.
13. Use Moisture Intrusion Evaluation completed by Gale Associates, Inc. dated December 16, 2011 (provided)

Frank Ballentine

Re: CMC Executive Summary Report
for Roof Condition Survey

Dear Mr. Ballentine:

Construction Moisture Consulting, Inc. (CMC) recently completed a roof condition survey at the above referenced project in accordance with the University of Central Florida (UCF) directive to "inspect the roof system and recommend a roof system, renovation, or repair that meets UCF Standards and the Florida Building Code (FBC)." Accordingly, our survey included a detailed field investigation to evaluate roofing conditions, a nuclear moisture survey to determine the presence/ extent of subsurface moisture beneath the roof membrane and laboratory gravimetric analysis to determine the percentage of moisture within extracted roof core samples. CMC also reviewed the November 14, 2010 ICC Thermal Mapping & Surveying (ICC) report and applicable "Issued for Bid and Construction" drawings dated December 4, 1992 prepared by SchenkelShultz Architects (SSA). Additionally, areas of construction immediately adjacent to roof sections were reviewed to determine if conditions exist which are contributing to water intrusion within the facility. Further, CMC participated in a tour of the building interior and exterior led by Scott Wiles (UCF) who shared his knowledge of leak history and identified areas where water intrusion has occurred. Further, attachments include our roof moisture survey, the "2010 Florida Building Code, Energy Conservation" (FBC-EC) and a copy of an email correspondence from Sarnafil which are referenced within this summary.

1.0 SUMMARY

1.1 Construction/History

1.1.1 The existing low sloped roof sections are comprised of a single-ply thermoplastic roof membrane (FiberTite) mechanically fastened through rigid roof insulation (3 1/4" thick polyisocyanurate at non-tapered areas -

average R19) into structural concrete roof decks which are believed to be approximately 18 years old with 2 years remaining on the 20 roof warranty. The majority of the roof section's primary slope appears to be provided within the structural concrete deck in conjunction with tapered insulation to further divert surface water to drains. Emergency overflow drainage is typically provided via scuppers placed through perimeter cavity walls comprised of the base wall, an air space, dampproofing, brick cladding, etc. Perimeter roofing conditions along parapet walls, clerestory junctures, screen wall piers, etc., have integral wood blocking which are generally the full height of the roof membrane base flashing. The clerestory structure roof drainage is accomplished via slope to gutters. There are significant amounts of rooftop equipment, many of which are no more than 8" above the finished roof membrane surface and areas exist where new equipment has apparently been added since original construction impeding the original roof surface drainage scheme. Adjacent construction generally includes parapet walls capped with sheet metal flashing beneath precast concrete coping units, exterior walls and screen walls clad with standing seam metal panels and brick, windows, sealants within joint cavities, an access door leading to the main roof (threshold height is 5 1/2" above the roof membrane surface), and stucco wall cladding on the addition at the north elevation above the building expansion joint. Additionally, the small roof over the south elevation main entrance terminates into a glazed curtain wall sill condition and into surrounding metal wall panels resulting in base flashing heights ranging between 4 1/2" and 6". Further, the existing lightning protection system meanders throughout the main and clerestory roof levels, on rooftop equipment, on parapet walls, screen walls, etc. During our tour of the facility, Mr. Wiles (UCF) pointed out areas of repeated water leakage which correspond to rooftop equipment rather than the roof membrane assembly itself. Additional areas where water leakage has occurred typically correspond with clerestory windows, other windows within exterior walls and/or building sealants within various joint cavities.

1.2 Roof Condition and Adjacent Construction

1.2.1 As previously noted, CMC conducted a detailed field evaluation of all low sloped roof areas including visually inspecting the roof membrane, identifying current sources of water intrusion where possible, and conducting a nuclear moisture survey which entailed obtaining instrument readings at 5' grid intervals throughout each roof section. In summary, although the roof membrane system is nearing the end of its warranty period, it is generally performing well (no areas of membrane shrinkage or unusual deterioration observed) and there was <1% of overall roof area where moisture was identified beneath the roof membrane which is typically isolated to areas that appeared to have been mechanically damaged/

punctured. Additionally, several small areas were noted where the roof membrane and/or roof insulation has been damaged resulting in raised roof membrane attachment fasteners causing the membrane to "tent" and breach through the roof membrane (included within the aforementioned <1% areas). Reference the attached roof moisture survey for additional information. Further, several areas of ponding water exist on the roof surface which appears to be primarily resultant of rooftop equipment added since original construction.

1.2.2 Multiple areas of rooftop equipment include HVAC air handlers and ducts, laboratory fans, fan motors on vibration pads, perforated unistrut stands, etc., installed/fastened directly into galvanized sheet metal curb covers which solely rely on sealant/caulking for watertightness. Be advised, many of these areas have severely weather deteriorated sealant/caulking which correspond with locations of interior leakage as pointed out by UCF. Additionally, the sheet metal covers have been penetrated by tie-down eye bolts, conduit, pipes, fan motor fastening anchors, makeshift cuts/patches within sheet metal curb covers, etc., which also rely on sealant/caulking to prevent leakage. Further, sheet metal curb covers deflect when subjected to foot traffic often causing the sealant/caulking to shear resulting in seals failing and avenues for leakage. Also, tight conditions (<1") between the top of sheet metal curb covers and fan motors, etc., do not provide ample clearance for effective flashing and or sealing attempts. Further, until these conditions are redesigned and although repair attempts have been made (sealant/ caulking), UCF should anticipate such ongoing repairs whenever water leaks arise since these conditions do not allow for long term solutions (e.g., flashing, etc.). As such, replacing the adjacent roofing alone will not stop all the water leaks.

1.2.3 Other areas of adjacent construction observed in need of attention include weather deteriorated sealants within brick expansion joint cavities, windows and substantially fractured stucco along the north elevation above the building expansion joint. Although the precast concrete coping units have been set on sheet metal cap flashing on top of the brick for water penetration resistance, all coping joints have deteriorated sealant which need to be removed and replaced. Additionally, several areas around windows were pointed out by Mr. Wiles (UCF) as areas of water intrusion.

1.3 Conclusions/Recommendations

1.3.1 As noted within Report Item 1.2.2 above, the majority of water intrusion is related to rooftop equipment rather than the roof membrane itself. Additionally, the current conditions require structural and mechanical engineering design to incorporate the modifications needed to implement

long term solutions such as appropriate detailing, flashing, etc., rather than relying solely on mere sealant applications. More specifically, the sheet metal curb covers should be stainless steel and must be properly supported to eliminate deflection from foot traffic. Further, seal welded steel pipe stanchions of sufficient height with base plates and top plates must be provided to mount fan motors, tie-down eye bolts, etc., thin aluminum sheet metal duct cladding terminating directly onto sheet metal curb covers must be redesigned on elevated curbs, transition flashing between the sheet metal equipment curb cover and intersecting metal wall panels must be addressed, etc. Accordingly, it should be noted, damage to the roof membrane system should be expected as a result of construction traffic associated with these required modifications. Based on the above, we recommend this area of construction undergo an engineering study, redesign, etc., to ensure all such conditions are addressed and long term solutions are achieved before replacing the existing roof. Lastly, all redesign of rooftop mechanical equipment should be coordinated with future re-roofing design.

1.3.2 In our opinion, although the existing roof membrane assemblies are serviceable and should perform satisfactorily through the remaining duration of the warranty, damage to the existing main roof resulting from redesigned modifications to the rooftop equipment should be anticipated thus replacing the roof membrane system beforehand is not recommended. Once the roof system is replaced, adding an additional 3 1/4" of polyisocyanurate roof insulation appears to be generally required to meet the 2010 FBC requirements for thermal resistance of R-38 (reference attached FBC-EC "Envelope Prescriptive Measures for Renovations and Alterations"). Please note, Page 2 of the FBC-EC document reads "Renovations: Meet code for the components being changed where the work (over a one year period) exceeds 30% of the assessed value of the structure. Example: If the cost of the job is less than 30% of the assessed value of the building, the code is not applicable unless it is an addition, new building system, new conditioned space or change of occupancy type." As such, we interpret this to mean the current thermal resistance of R-19 is acceptable which should be reviewed with and confirmed by the building official. Accordingly, we believe this aspect of the roof renovation must be carefully considered since increasing the insulation thickness to achieve R-38 will require costly modifications such as addressing overflow scuppers within cavity wall construction with brick cladding, changing/raising the main roof access door height involving modifying the surrounding brick and the lintel above the door, raising fixed roof drains, increasing the height of most roof appurtenances, etc.

1.3.2.1 Once the existing roof is replaced, CMC recommends a high performance single-ply PVC roof membrane assembly due to the multiple roof appurtenances and since the original roof surface

drainage scheme has been impeded. During our research and in order to comply with the UCF Standard for a 25 year warranty with a 130 MPH "Wind Rider", the recommended replacement roof system is based on a 72 MIL Sarnafil mechanically fastened roof membrane system over 2 layers of 3 1/4" rigid polyisocyanurate insulation board (R-38) in accordance with the attached email message. Be advised, the PVC roof system is limited to the single roof manufacturer noted (Sarnafil) due to other PVC and KEE roof system manufacturers unwillingness to provide the aforementioned UCF standard roof warranty requirements. Lastly, we recommend applying a high performance fluid-applied coating over the small roof above the main entrance to avoid disrupting the intersecting glazed curtain wall and the adjacent metal wall panels.

Should you have any questions, please feel free to contact me directly at (813) 695-4048 at your convenience.

Re: CMC Roof Moisture Survey Report

Dear Mr. Ballentine:

Construction Moisture Consulting, Inc. (CMC) recently performed a roof moisture survey on existing low slope roofing assemblies utilizing a non-destructive nuclear roof moisture gauge to evaluate conditions beneath the roof membrane with respect to the presence and extent of subsurface moisture. CMC further extracted and analyzed roof core samples to qualify moisture gauge readings and to quantify moisture content (weight %) within underlying materials via laboratory gravimetric analysis. Our survey was performed on May 9, 2012 and May 10, 2012. A roof plan depicting moisture gauge readings/core locations and laboratory test results have all been included as attachments. We herein offer the following for your review and use.

1.0 ROOF MOISTURE SURVEY

1.1 Approach and Purpose

1.1.1 Our approach for identifying roof subsurface moisture combined both non-destructive and destructive test methods which included obtaining nuclear moisture gauge readings on a 5' grid pattern. Roof core samples were extracted for purposes of verifying roof assembly components, and conducting laboratory gravimetric analysis on insulation materials to qualify and quantify nuclear readings by obtaining weight percentage of moisture content within each core sample. The purpose of performing this roof moisture survey was to identify the potential extent and degree of roof subsurface moisture whereby an informed determination could be made with respect to locations of elevated moisture within the roofing assembly.

1.2 Nuclear Gauge Moisture Detection

1.2.1 CMC obtained nuclear readings utilizing a Troxler Model 3216 gauge to

evaluate hydrogen content beneath the roof membrane surface. Once nuclear baseline readings or "counts" of the roof assembly's normal hydrogen content contained within roof membranes, insulation, etc., are determined, higher nuclear counts will generally be associated with increased hydrogen associated with either subsurface moisture or increased amounts of membrane layers or underlying roofing materials of the type evaluated for this project. Reference attached Nuclear Moisture Survey Roof Plan.

1.2.2 Roof core samples were extracted at locations which produced low, medium and high nuclear gauge readings to evaluate moisture contents within underlying insulation materials over the range of nuclear readings obtained. This procedure entailed immediately placing each roof core sample in a sealed container followed by weighing the sample. The sample was then oven dried in a laboratory environment. Once the drying process had been completed, re-weighing the sample allowed for measuring and comparing the before and after drying weights whereby the percentage of moisture content (by weight) may be calculated. Reference attached Driggers Engineering Services, Incorporated (DES) report for results of gravimetric analysis and roof core information.

2.0 RESULTS

2.1 Roof Cores

Core No. (Nuclear Reading)	1 (33)	2 (30)	3 (11)	4 (14)
Polyisocyanurate Moisture Content (Weight %)	143.0	69.2	8.7	66.7

Physical Condition at Structural Concrete Deck	Dry
Polyisocyanurate Base Layer Thickness (Flat)	3 1/4"
Additional Polyisocyanurate Layers Thickness (Tapered)	2 1/2"

Total Core Thickness	5 3/4"
Roof Membrane Layers (Single Ply Membrane)	1

3.0 REVIEW OF DATA

3.1 Results of laboratory analysis revealed polyisocyanurate roof insulation cores ranged from .7% to 143.0% moisture content by weight. As published in "The Manual of Low-Slope Roof Systems, Third Edition", the equilibrium moisture content (EMC) for polyisocyanurate insulation is 2.9% when stabilized at 75°F and 90% RH. Based on our observations and experience, it is our opinion that moisture content of polyisocyanurate insulation equal to or less than 10% (by weight) will adequately decrease when exposed to ambient conditions and allowed "drying time" during re-roofing activities and therefore replacement of insulation is not necessary.

3.2 Elevated nuclear gauge readings were obtained at isolated locations which did not correlate to elevated moisture content of the underlying polyisocyanurate insulation, specifically Core Nos. 12, 11 and 8. Likely sources of elevated readings at these locations appeared to be resultant of a combination of increased roof membrane layers and/or varying insulation thicknesses.

3.3 Additionally, several small areas were noted where the roof membrane and/or roof insulation has been damaged resulting in raised roof membrane attachment fasteners causing the membrane to "tent" and breach through the roof membrane. This insulation will require replacement prior to new roofing installation should a roof recovery system ("roof over") be a desirable option.

3.4 Based upon nuclear readings and gravimetric analysis, suspect "wet" conditions potentially exist within a small percentage, less than 1%, of the total roof area which are generally confined to the main roof. Polyisocyanurate insulation replacement will be required during any future roof recovery work ("roof over") should this option be selected which would require removal/replacement of approximately 400 square feet (SF) of wet insulation. Be advised, this quantity may increase over time should future damage to the roof membrane occur or should adjacent construction deficiencies exist.

Should you have any questions or wish to further discuss any aspect of this report, please do not hesitate to contact our office at your convenience.

RE: Gravimetric Analysis of Roof Samples obtained from
UCF - Creol Building 53 - Roof Renovation
Our File: L129088
Report No. 01

Dear Mr. Hunt:

As per your request, the roofing samples that you delivered to our office on May 11, 2012 were subjected to gravimetric analysis (moisture by weight testing) in accordance with ASTM Test Method D1864.

The components of each core sample were separated at the site and consisted of a layer of Polyiso foam insulation. Each component was individually placed in watertight plastic bags and delivered to our office for testing.

Each component was cleaned of debris and immediately weighed. "Wet" weights were recorded and tabulated in accordance with their respective labeling.

The samples were then oven dried for 48-72 hours at 100-110°F ±5°, reweighed, and the results recorded. After this weight measurement, all samples were placed back into their respective drying oven for one additional hour. At the completion of this one hour drying time, the dry weight was recorded and showed no additional loss of moisture.

Moisture by weight was determined for each component (see appended data sheet). Results from gravimetric analysis can be used to calibrate the nuclear readings taken during non-destructive testing.

DRIGGERS ENGINEERING SERVICES, INC. is pleased to have had the opportunity to assist you with this project. If you have any questions pertaining to this report, please do not hesitate to contact this office at your convenience.

Respectfully submitted,
DRIGGERS ENGINEERING SERVICES, INC.

#13	Polyiso Foam Insulation	N-10	1.1

2010 FLORIDA BUILDING CODE, ENERGY CONSERVATION[1]

There have been several changes to the energy code of Florida, beginning with its name. Once again it is printed as a separate volume of the Florida Building Code; it will now be referred to as the *Florida Building Code - Energy Conservation (FBC, EC)*. The most noticeable changes are as follows:

- Reorganization of the code. Based on the 2009 International Energy Conservation code (IECC), the document now addresses most residential in Chapter 4 while commercial and high-rise residential are covered in Chapter 5.
    - Code compliance methods previously described as Method A (Performance) or Method B (Prescriptive) are now designated by code section numbers.
        - Prescriptive code compliance ("cookbook" approach):
            - Residential: Section 402, Form 402-2010 or UA Alternative
            - Commercial: Section 502, Form 502-2010
        - Performance code compliance (computer energy simulation approach):
            - Residential: Section 405, Form 405-2010
            - Commercial: Section 506, Form 506-2010
- Florida specific amendments. Efficiencies specific to Florida's climate and law have been integrated into the new base code, the most notable of which is an increase of 5% in mandated stringency above the 2007 code, making the Florida specific amendments 20% more stringent than the 2006 IECC.

Computer Software. The code no longer requires compliance with a specific program. All code compliance software has to be approved by the Florida Building Commission.

Reorganization of the Code

Since the current FBC, EC is based on the IECC, all of the previous formatting is gone. Accordingly, all design professionals, building officials, and inspectors alike need to be prepared to learn all new code references for evaluating plans and job inspections for code compliance. Below find the formatting for the FBC, EC and a breakdown of the changes in each chapter.

Chapter	*Title*
1	Administration
2	Definitions
3	Design Criteria
4	Residential Energy Efficiency
5	Commercial Energy Efficiency
6	Referenced Standards
Appendix A	Jurisdictional Data
Appendix B	Criteria for Computer Modeling
Appendix C	Forms

Chapter 1 – Administration

Chapter 1 contains the applicability criteria of Florida law.

Scope (101.2) – This is primarily a numbering change. As with past editions of the Energy Code, as it applies to residential and commercial buildings, the FBC, EC is a "uniform" code and cannot be changed to make it either more efficient or more lenient.

Existing Buildings (101.4.1): Existing buildings shall meet the criteria in Table 101.4.1.

1 DISCLAIMER – This piece is intended only to give the reader factual information that is current at the time of printing. This piece is not a substitute for professional advice and should not be used for guidance or decisions related to a specific design or construction project. This piece does not reflect the opinion of any of the entities, agencies or organizations identified in the materials and if any opinions appear they are those of the author and should not be relied upon in any event. Applicable to the 2010 Florida Building Code, Building, and Residential.

- Renovations: Meet code for the components being changed where the cost of the work (over a one year period) exceeds 30% of the assessed value of the structure. Example:
  - If the cost of the job is less than 30% of the assessed value of the building, the code is not applicable unless it is an addition, new building system, new conditioned space or change of occupancy type.
- Building systems: Meet code where new products are installed for HVAC, water heating, lighting and motors. New requirements:
  - Equipment sizing required for total replacement of evaporators and condensing units using approved nationally recognized sizing method. Block sizing is okay; no audit required.
  - Accessible ducts (30 inch clearance) inspected and sealed where needed at time of total replacement of evaporators and condensing units. Signed certification by contractor that this was done. No testing or investigation of duct is required.

Compliance (101.5) - Residential buildings not more than three stories above grade in height shall meet the provisions of Chapter 4. Commercial buildings and residential buildings greater than three stories shall meet the provisions of Chapter 5.

Chapter 2 – Definitions

The new edition of the code introduced some new terminology into the base code with which users of the Energy Code should become familiar.

ABSORPTANCE - The ratio of the total absorbed radiation to the total incident radiation; equal to 1 (unity) minus the transmittance.

***C*-FACTOR (THERMAL CONDUCTANCE) -** The coefficient of heat transmission (surface to surface) through a building component or assembly, equal to the time rate of heat flow per unit area and the unit temperature difference between the warm side and cold side surfaces.

DAYLIGHT ZONE

1. **Under skylights.** The area under skylights whose horizontal dimension, in each direction, is equal to the skylight dimension in that direction plus either the floor-to-ceiling height or the dimension to a ceiling height opaque partition, or one-half the distance to adjacent skylights or vertical fenestration, whichever is least.
2. **Adjacent to vertical fenestration.** The area adjacent to vertical fenestration which receives daylight through the fenestration. For purposes of this definition and unless more detailed analysis is provided, the daylight *zone* depth is assumed to extend into the space a distance of 15 feet (4572 mm) or to the nearest ceiling height opaque partition, whichever is less. The daylight *zone* width is assumed to be the width of the window plus 2 feet (610 mm) on each side or the window width plus the distance to an opaque partition or the window width plus one-half the distance to adjacent skylight or vertical fenestration, whichever is least.

***F*-FACTOR -** The perimeter heat loss factor for slab-on-grade floors expressed in (Btu/h x ft. x °F).

HIGH-EFFICACY LAMPS - Compact fluorescent lamps, T-8 or smaller diameter linear fluorescent lamps, or lamps with a minimum efficacy of:

- 60 lumens per watt for lamps over 40 watts,
- 50 lumens per watt for lamps over 15 watts to 40 watts, and
- 40 lumens per watt for lamps 15 watts or less

MULTI-SCENE CONTROL - A lighting control device or system that allows for two or more pre-defined lighting settings, in addition to all off, for two or more groups of Luminaires to suit multiple activities in the space, and allows the automatic recall of those settings.

NORMATIVE - Made an integral part of a standard or code.

STOREFRONT - A nonresidential system of doors and windows mulled as a composite fenestration structure that has been designed to resist heavy use. *Storefront* systems include, but are not limited to, exterior fenestration systems that span from the floor level or above to the ceiling of the same story on commercial buildings.

Chapter 3 - Design Criteria

General (301.1) - While the table indicates that only three counties (Broward, Miami-Dade and Monroe) are in climate Zone 1, and all other counties are in Climate Zone 2, there is no difference in the prescriptive envelope compliance criteria by climate zone. The performance-based code compliance methods are based on climate data from weather data collection stations nearest the building's location.

General (301.2) - All Florida counties are considered **warm humid counties.**

Insulation product rating (303.1.4) - The *R*-value (thermal resistance) of insulation shall be determined in accordance with the U.S. Federal Trade Commission *R*-value rule, CFR Title 16, Part 460, May 31, 2005.

Insulation Installation (303.2) - Insulation materials shall comply with the requirements of their respective ASTM standard specification and shall be installed in accordance with their respective ASTM installation practice in Table 303.2 in such a manner as to achieve rated R-value of insulation. Open-blown or poured loose-fill insulation shall not be used in attic roof spaces when the slope of the ceiling is more than three in twelve. When eave vents are installed, baffling of the vent openings shall be provided to deflect the incoming air above the surface of the insulation.

Exception: Where metal building roof and metal building wall insulation is compressed between the roof or wall skin and the structure.

Compressed insulation (303.2.1) - Insulation that has been compressed to 85% or less of the manufacturer's rated thickness for the product shall use the R-values given in Table 303.2.1. These values are to be used except where data was developed by an independent testing laboratory.

Substantial Contact (303.2.2) - Insulation shall be installed in a permanent manner in substantial contact with the inside surface. Flexible batt insulation installed in floor cavities shall be supported by supports no greater than 24 inches on center.

Exception: Insulation materials that rely on airspaces adjacent to reflective surfaces for their rated performance.

Recessed Equipment (303.2.3) - Lighting fixtures; heating, ventilating, and air conditioning equipment, including wall heaters, ducts, and plenums; and other equipment shall not be recessed as to affect the insulation thickness unless:

1. The total combined area affected is less than one percent of the opaque area of the assembly, or
2. The entire roof, wall, or floor is covered with insulation to the full depth required, or
3. The effects of reduced insulation are included in calculations using an area weighted average method and compressed insulation values obtained from Table 303.2.1.1.

In all cases, air leakage through or around the recessed equipment to the conditioned space shall be limited in accordance with Section 404.2.5 or 502.3.8, as applicable.

Insulation Protection (303.2.4) - Exterior insulation shall be covered with a protective material to prevent damage from sunlight, moisture, landscaping operations, equipment maintenance, and wind. In *attics* and mechanical rooms, a way to access equipment that prevents damaging or compressing the insulation shall be provided. Foundation vents shall not interfere with the insulation. Insulation materials in ground contact shall have a water absorption rate no greater than .3 percent when tested in accordance with ASTM C272.

Materials Testing and Thermal Properties (304)

304.1	Building material thermal properties, general
304.1.1	Commercial and residential high rise
304.1.2	Residential one- and two-family
304.2	Testing of Building Materials Thermal Properties
304.2.1	Single materials
304.2.2	Assembly U-factors
304.3	Calculation procedures and assumptions

Chapter 4 - Residential Energy Efficiency

With the new changes to mirror the IECC, it also applies to the individual chapters. Previously known as Chapter 13-6, the new Chapter 4 of the FBC, EC has a new format. The new format is as follows:

Section	*Title*
401	General
402	Building Thermal Envelope
403	Systems
404	Electrical Power & Lighting Systems
405	Simulated Performance Alternative

RESIDENTIAL - What's NEW

- **Air infiltration (402.4.2.1)** Blower door test to ≤7 ACH **or** checklist for inspection
- **Recessed lights (402.4.5)** Shall be IC-rated and labeled to meet ASTM E 283
- **Window limits (402.5)**
  - Prescriptive compliance: Maximum 20% of conditioned floor area; U-factor ≤0.65; SHGC ≤0.30
  - Performance compliance: Maximum weighted average SHGC 0.50 except if 4 ft. overhang
- **Heating, Ventilating and Air-Conditioning:**
  - **Equipment efficiencies and duct construction**: Referenced to Chapter 5
  - **Programmable thermostat**: Required for forced air furnaces. (403.1.1)
  - **Ducts.**
    - **Prescriptive compliance method:** Ducts must be in conditioned space, must be an R-6 (402.1.1), and tested by a Class 1 BERS Rater (403.2.2.1) to be substantially leak-free (Q_n=0.03).
    - **Performance compliance method:** All supply and return

ducts not completely inside the building envelope shall be insulated to a minimum of R-6 (405.2).
        - Supply ducts located in attics or on roofs shall be insulated to R-8 (403.2.1). Not applicable under prescriptive or performance method for new buildings.
- **Lighting:**
    - A minimum of 50% of the lamps in permanently installed lighting fixtures shall be high efficacy lamps (404.1). **Examples** of high efficacy lamps include:
        - Compact fluorescent lamps, T-8 or smaller diameter
        - Linear fluorescent lamps or lamps with a minimum efficacy of:
            - 60 lumens per watt for lamps over 40 watts,
            - 50 lumens per watt for lamps over 15 watts to 40 watts, and
            - 40 lumens per watt for lamps 15 watts or less
- **Residential Swimming Pools (403.9):**
    - Shall have an accessible on-off switch outside the heater to allow shut off without adjusting thermostat. (403.9.1)
    - Shall have time switches to allow for heaters and pumps to turn off on a preset schedule. (403.9.1.2)
    - Gas pool heaters will have to meet a new national standard of 82% thermal efficiency on April 16, 2013.
    - Heated pools shall have a vapor-retardant cover or a liquid cover or some other means to reduce heat loss.
    - Pool filtration pump motors shall:
        - Not be split-phase, shaded-pole or capacitor start-induction
        - Motors with ≥ 1 hp shall have capability of operating at two or more speeds; low speed no more than ½ the motor's maximum rotation rate
        - Motor controls shall have capability to operate at ≥2 speeds; default residential filtration speed with higher speed override capability--except can be higher for not to exceed 24 hours

        Exception: Solar pool heating systems during periods of usable solar heat gain.
    - In addition to the requirements contained in 403.9 the energy requirements for residential pools and inground spas shall be as specified in ANSI/APSP-15. The energy requirements for portable spas shall be in accordance with ANSI/APSP-14.

Residential - What's NOT New

- Florida "Standard Reference Design" (baselines) for mechanical equipment did NOT go to "same as Proposed Design" as in the IECC. The IECC does not give credit for higher efficiency systems. Florida follows federal law, which requires state codes with baselines to have equipment baselines at federal minimums.
- Florida's increase in overall stringency comes from a multiplier of 0.80 applied to the entire Standard Reference Design budget…which makes the code 20% more stringent overall than the baseline features.
- The requirements of Florida's prescriptive compliance method reflect a building that would minimally comply with Florida's performance-based code.
- Credits may be claimed as per previous performance-based code.

Chapter 5 - Commercial Energy Efficiency

With the new changes to mirror the IECC, it also applies to the individual chapters. Previously known as Chapter 13-4, the new Chapter 5 of the FBC, EC has a new format. The new format is as follows:

Section	*Title*
501	General
502	Building Envelope Requirements
503	Building Mechanical Systems
504	Service Water Heating
505	Electrical Power and Lighting Systems
506	Total Building Performance

COMMERCIAL - What's NEW

No prescriptive compliance method provided as an option to the performance compliance method. Performance compliance method must be used in all cases with exception to shell buildings, renovations and additions (see below).

Envelope Prescriptive Measures for Shell buildings (101.4.9)

- The building envelope shall meet the requirements of Table 502.1.1.1(1)
    - Roof: Absorptance ≤0.22, R-40

  - Walls: Absorptance ≤0.3, R-30
  - Windows: U≤0.45; SHGC ≤0.25 (0-40%WWR), ≤0.19 (40-50%WWR)
- OR Sec. 506, list all assumptions made about features not installed until later
- Either way, Sec. 506 must be submitted upon completion of the building

Envelope Prescriptive Measures for Renovations and Alterations (502.1.1.1(2))

- Changes to window SHGC to 0.25
- Roof: Absorptance ≤0.22, R-value (U-value) to ≥ R-38 (≤ U-0.027)
- Above Grade Exterior Wall R-value to ≥ R-19 (≤ U-0.052)
- Below Grade Exterior Wall - No Requirement
- Raised Floor Insulation - R-value (U-value) ≥ R-19 (≤ U-0.052)

Fan Power Limitation 2 (503.2.10.1(1)) - Added to clarify the intent of ASHRAE 90.1 Energy Cost Budget Method (ECBM) code compliance in case of fan power suggests this methodology to be the correct approach.

Pools (504.7)

- **Pool Heaters:** All pool heaters shall meet the minimum efficiency listed for that type of pool heater in Table 504.2 and shall have a readily accessible on-off switch that is mounted outside the heater to allow shutoff without adjusting thermostat (504.7.1).
  Additional Exception: Where pumps are powered exclusively from on-site renewable generation.
- **Pool Covers** - Heated swimming pools and inground permanently installed spas shall be equipped with a vapor retardant cover on or at the water surface or a liquid over or other means to reduce heat loss (504.7.3).
  Exception: Outdoor pools deriving over 70% of the energy for heating from site recovered energy or solar energy source computed over an operating season.

Calculation Software Tools (505.6 B-2.3) - Provision given to the FBC to approve additional software tools that can meet the provisions laid out in this chapter.

Requirements specific to credit options (506.3.3) - Credit claimed in the compliance calculation for technologies that meet the criteria for various options below.

- **Vegetative Roofs (506.3.3.1)** - Credit may be claimed in whole building performance method calculations for the area of a proposed building's roof that is covered with a vegetative roof that is designed and installed in accordance with ANSI/SPRI VF-1, with a minimum growth media depth of 4 inches. The credit shall provide a 45% reduction in the heating and cooling roof heat flux rates for the roof area covered with the vegetative roof. Minimum roof/ceiling insulation levels shall be code minimums as per Section 506.2.1.
- **Enthalpy Recovery Ventilation System Credit (ERVs) (506.3.3.2) -** Credit may be claimed in whole building performance method calculations for Enthalpy Recovery Ventilation systems used in the proposed building. The credit for buildings in Climate Zone 1 is 6%; Climate Zone 2 gets 4% if:
  - Every HVAC system has a design supply air flow < 5,000 cfm, or
  - One or more HVAC systems have a design supply flow ≥ 5,000 cfm but outdoor air < 70% of design air flow for the system.

ENERGY CODE GUIDELINES FOR EXISTING BUILDING REPLACEMENT SYSTEMS

SUBJECT	RENOVATION[3]/ALTERATION
BUILDING SYSTEMS[1,2,3]	
HVAC equipment replacement	
Duct sealing	**RESIDENTIAL:** **At the time of total replacement of HVAC evaporators and condensing units**, all accessible (min. 30" clearance) joints and seams in the air distribution system shall be inspected and sealed where needed; certified by contractor. 1. Inspection through observation. 2. Not an inspection through investigation or testing 3. Only joints and seams that are observed to need sealing (i.e. loose joints) should be sealed. **COMMERCIAL/RESIDENTIAL:** This provision does not apply to partial replacement of equipment (i.e. where the air distribution system is not unique to the partial replacement of equipment)
Sizing calculation	An a/c contractor or licensed Florida PE shall submit a nationally recognized method based sizing calculation to the code official at the time of permit application **for total replacement of the condensing and evaporator components of HVAC systems** in accordance with Florida law and the provisions of Sec. 403.6.2.2 or 403.6.2.3. **RESIDENTIAL:** 1. Several "recognized" sizing calculation methods for existing buildings are available from HVAC equipment manufacturers and ACCA accredited software that are subject to approval by the ode official. 2. Per Section 101.5[4] of the *FBC-EB*, original systems installed on buildings constructed under the 1993 Energy Code or later have already been sized for the building and, without changes to the building, may be assumed to have been sized per code. 3. If a copy of a previous sizing calculation is provided, it is deemed to meet code. **COMMERCIAL/RESIDENTIAL:** This provision does not apply to partial replacement of equipment (i.e. where the air distribution system is not unique to the partial replacement of equipment)
Duct testing[8]	**RESIDENTIAL:** Replacement or extension of an existing air distribution system is not required to be tested.
RENOVATIONS[1,5,7]	
Windows	If cost of job exceeds 30% of assessed value of structure, meet Sec. 402 requirements. If cost of job does not exceed 30% of assessed value of structure, don't have to meet Energy Code requirements.
Pool filtration pumps[6]	If cost of job exceeds 30% of assessed value of pool structure, meet Sec. 403.9.4 requirements If cost of job does not exceed 30% of assessed value of pool structure, don't have to meet Energy Code requirements.

In general, Florida law trumps what's in the code. Florida law has been incorporated into the *FBC-Energy Conservation* in Table 101.4.1.

1. Section 553.903, *Florida Statutes*, Applicability, states: "This part shall apply to all **new and renovated buildings in the state, except exempted buildings**, for which building permits are obtained after March 15, 1979, ***and*** **to the installation or replacement of building systems and components with new products** for which thermal efficiency standards are set by the Florida Energy Efficiency Code for Building Construction." [NOTE: 2 clauses]
2. Section 101.4.7 of the *FBC-Energy Conservation*, states: "Thermal efficiency standards are set for the following building systems **where new products are installed or replaced in existing building** and for which a permit must be obtained. New products shall meet the minimum efficiencies allowed by this code for the following systems: Heating, ventilating or air conditioning systems; Service water or pool heating systems; Electrical systems and motors; Lighting systems."
3. Section 202 of the *FBC-EC* defines HVAC SYSTEM as "The equipment, distribution systems, and terminals that provide, either collectively or individually, the processes f heating, ventilating, or air conditioning to a building or portion of a building." It further defines a SYSTEM as "A combination of equipment and auxiliary devices (e.g., controls, accessories, interconnecting means, and terminal elements) by which energy is transformed so it performs a specific function such as HVAC, service water heating, or lighting". **Commercial buildings where the system is comprised of multiple air handlers, chillers, evaporators and/or condensers do not constitute "replacement of the building system with new products" unless the whole system is replaced.**
4. Sec.101.5, *FBC-Existing Building*, provides the following exception for repairs and alterations: "Subject to the approval of the code official, alterations complying with the laws in existence at the time building or the affected portion of the building was built shall be considered in compliance with the provisions of this code unless the building is undergoing more than a limited structural alteration.
5. Sec. 553.902, *Florida Statutes,* defines RENOVATED BUILDING as "a residential or nonresidential building undergoing alteration that varies or changes insulation, HVAC systems, water heating systems, or exterior envelope conditions, **provided the estimated cost of renovation exceeds 30 percent of the assessed value of the structure**." Section 202 of the FBC-*Energy Conservation*, further clarifies that the cost shall be cumulative **over a 1 year period**.
6. Pool filtration pumps are not a pool heating system.
7. An existing building or portion thereof may not be altered such that the building becomes less energy efficient than its existing condition.
8. FORM 402 - 2010
   Ducts & AHU installed substantially leak free per Section 403.2.2.1. Test by Class 1 BERS rater required.
   Exception: Ducts installed onto an existing air distribution system as part of an addition or renovation; duct must be R-6 installed per Sec. 503.2.7.2

This message was sent with High importance

Mr. Macias:

Sarnafil can provide a 25 year NDL, 130 mph Wind Warranty for the UFC CREOL Building.
The Engineered system using minimum 72 mil S327 over fastened AC Foam IV insulation.
The Sarnabars will be placed at in rows 5' apart in the field, 3' apart in the perimeters and 2' in the corners.
Fasteners are to be spaced 12" oc through the Sarnabar into the concrete deck, a cover strip of membrane welded over the Sarnabar.
This is provided the fastener pull test and the structure also meet the design standards needed to secure the roof system.

The Engineered specification will be sent in a separate email.

Please call me if you have any questions about the system.

Thank you for considering Sarnafil

Subject: UCF CREOL Blgd. #53 (TIME SENSITIVE!)

Robert:
This is the project I discussed with you last week is the University of Central Florida (UCF) "CREOL" Building No. 53 in Orlando, Fl. UCF has adopted the latest Florida Building Code and there are structural concrete roofs decks. UCF has "Design Standards" which mandate a 25 year "Full System No-Dollar-Limit Warranty" which must include a 130 mph "Wind Rider" and a min. 60 MIL membrane. Please email Mr. Carey Hunt (see Cc) with what information you need to determine if you can provide the warranty with the mandates noted and what system is recommended. This is time sensitive so we need this information asap.

Thank you,

Jon-Eric Macias, RRC, RRO, RCI

PROPOSAL

To: The University of Central Florida
Attn: Mr. Lawrence Chmura
Date: Wednesday, June 13, 2012
Re: UCF CREOL Building

We propose to furnish all materials, labor, and any other incidentals needed to perform the following scope of work:

Scope:

1. Provide secure, exterior access to roof and temporary flag lines to keep the public away from operations.
2. Provide and install temporary fencing.
3. Test and remove existing lightning protection system as specified.
4. Test existing roof drains as specified.
5. Provide and install new retro-fit drains with extensions to accommodate new insulation heights as specified.
6. Raise mechanical curbs to accommodate code requirements as specified.
7. Remove existing roof system and insulation to existing concrete deck as specified.
8. Re-fasten wood blocking as specified.
9. Provide and install new R=38 minimum (6") insulation with cover board as specified.
10. Provide and install Sarnafil PVC as specified.
11. Provide and install Sarnafil PVC roof system accessories as specified.
12. Provide and install GeoGuard coating where specified.
13. Provide signed and sealed engineering for roof system by Florida Registered Engineer as specified.
14. Provide and install all associated flashings for a complete and watertight roof system as specified.
15. Provide and install a new aluminum lightning protection system with LPI certificate (UL certification is not included).
16. Provide and install new pre-manufactured, stainless steel coping and edge flashing as specified.
17. Provide caulking wet seals and stucco as specified.
18. Provide areal infrared roof scan report as specified.
19. Provide manufacturer's 25-year "No Dollar Limit" warranty (highest available for specified manufacturers), 130-mph wind-rider warranty, and 5-year installers warranty.

Total Price (Approximately 40,000sf of roof area).....$ 1,820,000.00
Price includes a 10% contingency of $182,000.00, insurance, payment and performance bond, and all permitting fees.

This proposal is based on being able to complete the work during regular business hours (M-F). Surge protection for lightning protection system will be by other if needed.

Exclusions: Surge protection for lightning protection and UL Certification for lightning protection.

Alternate #1: Provide a UL certification for the lightning protection system.....$ 4,300.00

Unit Prices
1. Wood repair.....$ 6.00 / lf
2. Metal deck repair.....$11.00 / sf

Delphini Construction is a locally owned and operated, Service Disabled Veteran Owned Small Business (SDVOSB).

Subject: CREOL Re-roof

Jon, Lee has decided that UCF will not be re-roofing this facility due to budget. We will still pursue the investigation of the phase II attachment upon issuance of a separate purchase order. In the meantime, please close out this project and keep your records on file in case budget becomes available in the future. Attached is Tecta America's invoice for their services on this project. Please add this to the final invoice for CREOL and issue them a check for the amount of the invoice. Please call me if you have any questions. Thank you for your excellent service and comprehensive report. Frank

May 22, 2014 Board of Trustees Meeting Trancript

Speaker	Dialogue
1:09:38 - 1:11:00	
MARCHENA	That's true. Uh, the, the first item we have, uh, for, for action, uh, Madam Chairman, is the Colbourn Hall renovation. Uh, Mr. Merck, came, uh, to the committee with Lee Kernek and, uh, they recommended or discussed several options, the, uh, recommended option, uh, that we're here to present to you today is to build a new 75,000 square foot building adjacent to the current building. Uh, when it is complete, of course, we'll, uh, move the employees and departments housed in Colbourn Hall into that new building, and then revisit what possibilities there are with respect to Colbourn, the existing Colbourn building at that, at that time.
MERCK	Right, right.
MARCHENA	Um, you have anything to add to that, Bill?
MERCK	Only again that you, we talked this morning about no, uh, money coming from the state right now for construction, so we're basically having to take this out of our hide as well.
MARCHENA	But, but …
MERCK	And it's something we need to do so …
MARCHENA	But, but they have assured us we, we have identified the funding to be able to accomplish that, right? So I would uh, move, uh, the Board to approve moving forward with the Colbourn Hall renovation as described.
CALVET	Thank you.
UNIDENTIFIED SPEAKER	Second.
CALVET	Is there a second?
UNIDENTIFIED SPEAKER	Second.
CALVET	Thank you very much. We have a motion and a second. Does anybody have any further questions? If not, all in favor signify by saying aye.
MULTIPLE SPEAKERS	Aye.
CALVET	Anyone opposed? Motion carries.
1:11:00 – 1:13:18	
MARCHENA	I'm gonna ask Bill to go ahead and address the Global UCF facility.
MERCK	That was one, too, that you've heard about—the Global Academy and what we're doing. One of the requirements for us to make available in the course of this project is to have small classrooms available for that—that first year, the pathway year. And so, since we are virtually—maybe not totally—but virtually maxed out on the classroom space around the campus, we need a new facility to handle that. So what we are doing is—and I think I mentioned in the committee meeting this morning—we're taking 10 million that we realized, got in the form of realized gains from our transfer from active funds into the S&P 500, Vanguard S&P 500 Index Fund. That 10 plus another 5,

May 22, 2014 Board of Trustees Meeting Trancript

Speaker	Dialogue
	making the total of 15 million for the project. About 3 and a half of that will come out of some auxiliary money that we put aside in the event that we had another cut to our budget from the state this year, which we didn't. So we want to use that. And then about another million and a half out of other funds, probably—well, just some other funds. It could be auxiliary funds too, for the equipment when that comes due, to outfit the building, making the total of 15. So I'm pretty pleased with this. This gives us what we needed. We're planning it to be ready in January of 2016. Some of the utility work will happen this summer, getting ready for it. And we're working around the football schedule, so we shouldn't interrupt the tailgating activities in those parking lots over--
CALVET	That's important.
MERCK	--the first part of the year. And that'll give us the building we need. And we will own it and control, so I feel good about that.
MARCHENA	Any questions in connection with that item? If not, we'll recommend that approval of that item as well.
CALVET	Thank you, we have a motion. Is there a second?
MULTIPLE	Second.
CALVET	We have a motion and a second. Any further discussion? If not, if you're in favor, signify by saying aye.
MULTIPLE SPEAKERS	Aye.
CALVET	Anyone opposed?

ITEM: FF–13

University of Central Florida
Board of Trustees

SUBJECT: 2011-12 Capital Outlay Budget

DATE: May 26, 2011

PROPOSED BOARD ACTION

Approval of the university's 2011-12 capital outlay budget, and authorization for the president to make necessary adjustments to the 2011-12 capital outlay budget.

BACKGROUND INFORMATION

Pursuant to 1013.61, Florida Statutes, each university board of trustees must adopt an annual capital outlay budget that designates proposed expenditures by project. The attachment lists the projects approved during the legislative session and is subject to final approval by the governor. We request approval of the attached budget and authorization for the president to make changes to this budget as necessary during the year.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Facilities Committee
September 15, 2010

SUBJECT: Approve Amendment of the Board's State University System Debt Management Guidelines

PROPOSED COMMITTEE ACTION

Approve amendments to the Board's State University System Debt Management Guidelines and require University Adoption by January 19, 2011.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution and Section 1010.62 Florida Statutes

BACKGROUND INFORMATION

The Board of Governors adopted Debt Management Guidelines (the "Guidelines") for the university system on April 27, 2006. The purpose of the Guidelines is to confirm that the state universities and their DSOs engage in sound debt management and issuance practices. Section 1010.62, Florida Statutes became law on July 1, 2006, and works in parallel with the Guidelines.

The Board Office of Finance and Facilities held a debt management workshop on May 19, 2010. The purpose of the meeting was to review and discuss proposed changes to the Guidelines. The proposed amended guidelines have been shared with all 11 institutions.

The proposed changes are intended to provide clarification and better written guidance to the universities on matters concerning debt management and issuance. The proposed amendments do not alter existing Board policy. Accordingly, upon acceptance by the Facilities Committee, the full Board shall consider immediate adoption of the recommended revisions to the Guidelines.

University boards of trustees will be required to adopt the revised Board Debt Management Guidelines and notify the Chancellor of adoption no later than January 19, 2011.

DEBT MANAGEMENT GUIDELINES FOR CAPITAL OUTLAY PROJECTS

I. INTRODUCTION

The Need for and Purpose of Debt Management Guidelines

The state universities of Florida and their direct support organizations ("DSOs") have funded significant investments in infrastructure, such as buildings, equipment, land, and technology, to meet the needs of a growing student population and to upgrade and maintain existing capital assets. A significant amount of the funding for this investment in infrastructure has been provided through the issuance of debt by the State for the benefit of the state universities and by the state universities' direct support organizations ("DSOs").

The purpose of these guidelines is to confirm that the state universities and their DSOs must engage in sound debt management practices and, to that end, the Board of Governors ("Board ~~BOG~~") has formalized guiding principles for the issuance of debt by the state universities and their DSOs. Each state university shall adopt a debt management policy which is consistent with these guidelines and which shall be approved by the Board ~~BOG~~.

The following guidelines set forth guiding principles regarding state university and DSO debt-related decisions related to:

a) The amount of debt which may prudently be issued.
b) The purposes for which debt may be issued.
c) Structural features of debt being issued.
d) The types of debt permissible.
e) Compliance with securities laws and disclosure requirements.
f) Compliance with federal tax laws and arbitrage compliance.

These principles will facilitate the management, control and oversight of debt issuances, for the purpose of facilitating ongoing access to the capital markets which is critical to the financing of needed infrastructure.

In furtherance of this objective, the provisions of these guidelines shall be followed in connection with the authorization, issuance and sale of university and DSO debt. However, exceptions to the general principles set forth herein may be appropriate under certain circumstances. Also, additional guidelines and policies may be necessary as new financial products and debt structures evolve over time.

For purposes of these guidelines:

i) "debt" means bonds, loans, promissory notes, lease-purchase agreements, certificates of participation, installment sales, leases, or any other financing mechanism or financial arrangement, whether or not a debt for legal purposes, for financing or refinancing, for or on behalf of a state university or a direct support organization, the acquisition, construction, improvement or purchase of capital outlay projects;

ii) "capital outlay project" means (i) any project to acquire, construct, improve or change the functional use of land, buildings, and other facilities, including furniture and equipment necessary to operate a new or improved building or facility, and (ii) any other acquisition of equipment or software; and

iii) "financing documents" means those documents and other agreements entered into by the state university or the DSO establishing the terms, conditions and requirements of the debt issuance.

iv) <u>"auxiliary enterprise" means any activity defined in section 1011.47(1), Florida Statutes, and performed by a university or a direct-support organization.</u>

II. DEBT AFFORDABILITY AND CAPITAL PLANNING

Concept of Affordability

One of the most important components of an effective debt management policy is an analysis of what level of debt is affordable given a particular set of circumstances and assumptions. More comprehensive than simply an analysis of the amount of debt that may be legally issued or supported by a security pledge, the level of debt should be analyzed in relation to the financial resources available to the university and its DSO's on a consolidated basis, to meet its debt service obligations and provide for operating the university.

An analysis of debt affordability should address the impact of existing and proposed debt levels on an issuer's operating budget and offer guidelines or ranges to policymakers for their use in allocating limited resources within the guidelines.

Debts That May Be Issued Without Board of Governors' Approval

The following types of financings, subject to specific approval by the university board of trustees, may be engaged in by the state universities and their DSOs, as applicable, without Board approval:

- Universities may finance the acquisition of equipment and software provided such financings are accomplished in accordance with the deferred-purchase provisions in Chapter 287, Florida Statutes.

- DSOs may finance the acquisition of equipment and software financings provided the overall term of the financing, including any extension, renewal or refinancings, hereof, does not exceed five years or the estimated useful life of the equipment or software, whichever is shorter.

- DSOs may issue promissory notes and grant conventional mortgages, in an amount not to exceed $1 million, for the acquisition of real property, including improved real property. However, no mortgage or note shall exceed 30 years.

- University and DSO debt secured solely with gifts and donations and pledges of gifts so long as the maturity of the debt, including extensions, renewals and refundings, does not exceed five years and so long as the facilities being financed have been included in the university's five-year capital improvement plan that has been approved by the Board.

- Refundings for debt service savings where final maturities are not extended.

- ~~Financing of any projects approved by the BOG or University Boards of Trustees prior to, or existing, as of January 26, 2006.~~

- Fully collaterized lines of credit intended to be used for temporary cash flow needs.

- Energy Performance-Based Contracts, in accordance with the provisions of section 1013.23, Florida Statutes, not to exceed $10,000,000.

- Universities may borrow up to $20,000,000 from a university DSO on a non-recourse basis to finance a capital project. The term of the borrowing may not exceed thirty (30) years, and the interest rate, if any, may not exceed current market interest rates. The university retains legal title to any capital project financed in whole or in part by such loan irrespective of whether the loan is repaid. The DSO is prohibited from transferring the

note or any other instrument associated with the borrowing to any other entity.

III. GENERAL DEBT ISSUANCE GUIDELINES PROCESS FOR SUBMITTING DEBT FOR APPROVAL

Timing. The submission of proposed debt for approval by the Board ~~BOG~~ shall be governed by the following process[1]:

a) The university shall formally transmit to the Board Office a request for debt approval no later than 60 days prior to the next regularly scheduled meeting of Board. The university shall also provide a copy to the State Division of Bond Finance ("DBF"). The formal transmittal to the Board Office shall be in duplicate, hard copy, and bound in a three-ring binder, and include all the information required by these guidelines. Electronic copies of supporting documentation should be provided to the Board Office and the DBF, to the extent available. The formal letter of transmission must be signed by the official point of contact for the university, and any exceptions to these Debt Guidelines shall be noted and explained. If the university board of trustees has not yet formally approved the debt being requested, the proposed board of trustees meeting date shall be provided. ~~No later than four weeks prior to the time agenda titles are due to the BOG, a copy of all information required to be submitted by these guidelines in support of the request to issue debt shall be provided to BOG staff for review.~~

b) During the review ~~four-week~~ period~~prior to the agenda title due date~~, the Board ~~BOG~~ Office ~~staff~~ shall ~~provide such information to the State Division of Bond Finance (the "DBF"),~~ review the information submitted for compliance with these guidelines and State law, analyze general credit issues associated with the proposed indebtedness, and review any analysis provided by the DBF staff.

c) Board ~~BOG~~ and DBF staff shall jointly discuss with the university or DSO any issues, concerns or suggestions resulting from the review during the ~~four-week~~ review period. As a result of these discussions, the university may amend the information submitted or explain ~~give reasons~~why the suggestions were not incorporated. The Board ~~BOG~~ Office will advise the university if it believes that any amended information is so significant that re-authorization by the board of trustees and/or DSO is required. During this period, if the debt being requested for approval is to be issued by the DBF on behalf of a

[1] Although not required, universities are encouraged to consult with the Board Office and the State Division of Bond Finance 30 days prior to formal approval of debt by the university board of trustees or the DSO, particularly for any debt with unusual features.

state university, DBF shall submit to the Board ~~BOG~~ Office a form of a resolution for adoption~~by the BOG~~ requesting that DBF issue the debt.

d) After the ~~four-week~~ review period, the Board ~~BOG~~ Office ~~staff~~ shall submit the ~~its agenda title,~~ agenda item with supporting documentation and all appropriate and required analyses to the Board ~~BOG~~ for consideration at its next meeting. Supporting documentation for the agenda item shall also include ~~the adopted resolution of the BOT and DSO, if applicable, and~~ the resolution to be adopted by the Board ~~BOG~~ requesting issuance of the debt by DBF or a resolution approving issuance of the debt by the DSO.

Information Required for Submission. The following information shall be submitted to the Board ~~BOG~~ Office ~~staff~~ in support of a request for approval of the issuance of debt. Additionally, the university or DSO shall complete the "Checklist of Information Required for Submission to the Board Pursuant to Debt Management Guidelines", and provide any additional information requested by the Board ~~BOG~~ Office or DBF staff in connection with review of any proposed debt issuance.

a) A resolution of the DSO board of directors approving the debt issuances, if applicable, and a resolution of the university board of trustees ~~BOT~~ approving the debt issuance and authorizing the university to request Board ~~BOG~~ approval of the debt issuance. For debt to be issued by DBF, at the request of the university, DBF staff will work with the university to determine a not-to-exceed amount of debt to be included in the board of trustees ~~BOT~~ requesting resolution to the Board ~~BOG~~ and in preparing required debt service and source-and-use schedules.

~~b) A proposed agenda item.~~

b) The project program, feasibility studies or consultant reports (if available), and an explanation of how the project being proposed is consistent with the mission of the university.

~~d) For debt issued by DSOs, a form of a resolution to be adopted by the BOG approving issuance of the debt.~~

c) Estimated project cost, ~~draw schedule~~ with schedules drawn by month and including start and completion dates, estimated useful life, and the date bond proceeds are required.

d) The sources-and-uses of funds, clearly depicting all costs, funding sources expected to be used to complete the project and the estimated amount of the debt to be issued.

e) An estimated debt service schedule with the assumed interest rate on the debt clearly disclosed. If the proposed debt service is not structured on a level debt service basis, an explanation shall be provided which gives the reason why it is desirable to deviate from a level debt structure.

f) One consolidated d~~D~~ebt service schedule~~s~~ separately showing all outstanding debt related to or impacting the debt being proposed, the proposed debt and the new estimated total debt service.

g) A description of the security supporting the repayment of the proposed debt and the lien position the debt will have on that security. If the lien is junior to any other debt, the senior debt must be described. Furthermore, a description of why the debt is proposed to be issued on a junior lien basis must be provided. A statement citing the legal authority for the source of revenues securing repayment must also be provided.

h) If debt is to be incurred on a parity basis with outstanding debt, a schedule showing estimated compliance with any additional bonds requirement set forth in the documents governing the outstanding debt. The applicable provisions of the documents for bonds of DSOs should be provided.

i) Financial statements for five years, if available, for the auxiliary, if auxiliary revenues are pledged.

j) A five-year history, if available, and five-year projection of the revenues securing payment and debt service coverage. To the extent applicable, the projections must be shown on the individual project as well as the entire system. All revenue items securing repayment must be clearly set forth as separate line items. An explanation ~~should~~ must be provided with regard to growth assumptions, and to the amount and status of approval of any rate increases. The effect of the rate increases on the projections and expected revenues and expenses for the new facility should be clearly set forth as a separate line item. If rate increases are necessary, a commitment must be made to increase rates to the needed levels. Major categories of any operating expenses should be set forth as separate line items with an explanation of assumptions regarding increases or decreases.

k) Evidence that the project is consistent with the university's master plan or a statement that the project is not required to be in the master plan.

l) For variable rate debt proposals:

    i) the expected reduction in total borrowing costs based on a comparison of fixed versus variable interest rates;

ii) ~~the average monthly balance, over the last year, of the short-term investments which will be hedged or the other products, such as interest rate caps, which will be used to mitigate the effect of rising interest rates, or an explanation as to why such protections are not being provided;~~ a variable rate debt management plan that addresses liquidity and interest rate risks and provides, at a minimum: a description of budgetary controls, a description of liquidity arrangements, a discussion of why the amount of variable rate debt being proposed is appropriate, and a plan for hedging interest rate exposure. If interest rate risks are to be mitigated by the use of derivatives, then evidence that the counterparty has a long term rating of at least an A/A2 and a swap management plan as set forth in the Board's Debt Management Guidelines must be submitted;

iii) a pro forma showing the fiscal feasibility of the project using current market interest rates plus 200 basis points;

iv) ~~the amount of debt proposed for approval as a percentage of the total amount of university and DSO debt outstanding;~~ the total amount of variable rate debt including the proposed debt as a percentage of the total amount of university and DSO debt outstanding; and

v) the individual or position that will be responsible for the reporting requirements for variable rate debt as set forth in these guidelines.

m) If all or any portion of the financing is contemplated to be done on a taxable basis, then evidence demonstrating that the issuance of taxable debt is in the best interest of the university must be submitted.

n) A statement explaining whether legislative approval is required, and if required, an explanation as to when legislative approval will be sought or evidence that legislative approval has already been obtained.

o) A statement that the debt issuance is in accordance with the university's debt management policy or, if not, an explanation of the specific variances as well as the reasons supporting the variances.

p) If a request is made to employ a negotiated method of sale, an analysis must be provided supporting the selection of this method that includes a discussion of the factors set forth in section IV of these Guidelines.

q) A description of the process used to select each professional engaged in the transaction, showing compliance with the competitive selection process required by these Guidelines. Specific contact information for each selected professional, must be included, and at a minimum, should disclose the

professional's name, firm name, address, email address, phone number and facsimile number.

r) The most recent annual variable rate debt report.

Approval. The Board ~~BOG~~ will consider the following factors in connection with its review and approval of university or DSO debt issuance.

a) The debt is to provide funding for needed infrastructure of the university for purposes consistent with the mission of the university.

b) The debt is being issued in compliance with the principles and guidelines set forth herein.

c) The project information submitted is reasonable and supportable.

d) The five-year projection of pledged revenues available to pay debt service should provide debt service coverage of at least 1.20x for both outstanding parity debt and for the proposed new debt for all years within the five-year projection period after giving credit for any capitalized interest and other revenues available for payment.

e) Any requirements for the issuance of additional parity debt can be reasonably expected to be met.

Purposes For Which Debt May Be Issued

Debt may be issued only to finance or refinance capital outlay projects as defined in these guidelines, including equipment and software; debt may not be approved to finance or refinance operating expenses of a university or a DSO.

Refunding bonds may be issued to achieve debt service savings. Refunding bonds may also be issued to restructure outstanding debt service or to revise provisions of Financing Documents if it can be demonstrated that the refunding is in the best interest of the university.

Committing University Resources for Debt Issued by Direct Support Organizations

There may be occasions where the university considers committing its financial resources on a long-term basis in support of debt issued by a DSO or other component unit. While the nature of the commitment may not constitute a legal debt obligation of the university, it may affect the university's debt position and its available financial resources. Therefore, the university should evaluate the long-term fiscal impact upon the university's debt position and available resources before authorizing any such financial commitment. Additionally, the debt of any DSO may not be secured by an

agreement or contract with the university unless the source of payments under such agreement or contract is limited to revenues that the university is authorized to use for the payment of debt service. Any such contract or agreement shall also be subject to the requirements set forth under "Security Features – Pledged Revenues" herein.

Credit Ratings

In order to access the credit markets at the lowest possible borrowing cost, it is recognized that credit ratings are critical. Therefore, for all publicly offered debt:

a) For existing bond programs, universities and DSOs shall strive to maintain or improve current credit ratings without adversely impacting the amount of debt which may be issued for any particular program.

b) For all new financings, the university or DSO shall seek to structure the transaction to achieve a minimum rating of "A" from at least two nationally recognized rating agencies. Credit enhancement may be used to achieve this goal.

Tax Status

The universities have traditionally issued tax exempt debt which results in significant interest cost savings compared with the interest cost on taxable debt. Accordingly, all university and DSO debt should be issued to take advantage of the exemption from federal income taxes unless the university demonstrates that the issuance of taxable debt is in the university's best interest. With respect to debt which has a management contract with a private entity as part of the security feature, the management contract should comply, to the greatest extent practical, with tax law requirements to obtain tax exemption for the debt.

Security Features

Pledged Revenues. The debt issued by universities and their DSOs may only be secured by revenues (including fund balances and budget surpluses) authorized for such purpose. The revenues which may secure debt include the following:

a) Activity and Service Fee, subject to the limitation that annual debt service payable from these fees does not exceed five percent of the revenues derived therefrom.

b) Athletic Fee, subject to the limitation that annual debt service payable from these fees does not exceed five percent of the revenues derived therefrom.

c) Health Fee.

d) Transportation Access Fee.

e) Hospital Revenue.

f) Licenses and Royalties for facilities that are functionally related to the university operation or DSO reporting such royalties and licensing fees.

g) Gifts and Donations for debt not longer than five years.

h) Overhead and indirect costs and other monies not required for the payment of direct costs of grants.

i) Assets of University Foundations and DSOs and earnings thereon.

j) Auxiliary Enterprise Revenues, e.g., housing, parking, food service, athletic, retail sales, research activities.

Revenues which are not enumerated above may not be pledged to secure debt unless authorized by law for such purpose. In the case of university-issued debt, the pledge of revenues which secures debt should specifically identify the sources pledged and not use general or vague terms such as "lawfully available revenues." Specifically identifying revenues used to secure debt will provide certainty and transparency as to the revenues that are encumbered and avoid ambiguity or uncertainty as to the issuer's legal liability and universities and their DSOs should take this into consideration when determining the nature of the security it will provide in connection with a debt issuance. The guidelines for pledging revenues and securing debt shall also apply to debt structures which involve an agreement, contract or lease with a university or its DSOs, i.e., the revenues being pledged to secure debt must be specifically identified and lawfully available for such purpose. It is preferable, whenever possible, to secure debt with system pledges comprised of multiple facilities within a system, e.g., housing and parking, rather than stand-alone project finances.

Functional Relationships. ***See attached Versions A & B***

Lien Status. All bonds of a particular program should be secured by a first lien on specified revenues. Additionally, bonds should generally be equally and ratably secured by the revenues pledged to the payment of any outstanding bonds of a particular bond program. However, the creation of a subordinate lien is permissible if a first lien is not available or circumstances require.

Reserve Fund. Debt service reserve requirements may be satisfied by a deposit of bond proceeds, purchase of a reserve fund credit facility, or funding from available resources over a specified period of time. In the submission of a request for debt issuance, it is preferred, though not required, that the bond size for the proposed debt

include provisions for funding a reserve from bond proceeds. This will ensure that in the event the university is unable to obtain a reserve fund credit facility it will still have an authorized bond amount sufficient to fund its needs. Debt service reserve requirements may also be satisfied with cash balances.

Credit Enhancement. Credit enhancement is used primarily to achieve interest cost savings. Accordingly, the state universities and their DSOs should consider the cost effectiveness of bond insurance or other credit enhancements when evaluating a debt issuance and the overall cost thereof. Any bond insurance or credit enhancement should be chosen through a competitive selection process analyzing the cost of the insurance or credit enhancement and the expected interest cost savings to result from their use. The primary determinant in selecting insurance or other credit enhancement should be price and expected interest cost savings; however, consideration may also be given to the terms of any arrangement with the provider of insurance or other credit enhancement.

Capitalized Interest. Capitalized interest from bond proceeds is used to pay debt service until a revenue producing project is completed or to manage cash flows for debt service in special circumstances. Because the use of capitalized interest increases the cost of the financing, it should only be used when necessary for the financial feasibility of the project.

Structural Features

Length of Maturity. In addition to any restriction on the final maturity imposed by the constitution or laws of the State, as a general guideline, the final maturity on bonds should not exceed thirty years.

Debt secured by gifts and donations shall not be considered long-term financing but may be used as a temporary or construction loan to accelerate construction of facilities. Accordingly, the maturity of debt secured by gifts and donations shall not exceed five years, including roll-overs or refinancings except refinancings to implement permanent financing. Debt issued to finance equipment and software may not be longer than five years or the useful life of the asset being financed, whichever is shorter. Lastly, the final maturity of the debt should not exceed the estimated useful life of the assets being financed.

Debt Service Structure. Generally, debt should be structured on a level debt basis, i.e., so that the annual debt service repayments will, as nearly as practicable, be the same in each year. A deviation from these preferences is permissible if it can be demonstrated to be in the university's best interest, such as restructuring debt to avoid a default and not to demonstrate feasibility of a particular project.

Redemption Prior to Maturity. A significant tool in structuring governmental bonds is the ability to make the bonds callable after a certain period of time has elapsed after issuance. This provides the advantage of enabling the issuer to achieve savings

through the issuance of refunding bonds in the event interest rates decline. Although the ability to refund bonds for a savings is advantageous, there may be situations where a greater benefit of lower interest rates may be realized by issuing the bonds as non-callable. Accordingly, there is a strong preference that bonds issued by a university or DSO be structured with the least onerous call features as may be practical under then prevailing market conditions. Bonds of a particular issue may be sold as non-callable if it is shown to be in the best interest of the university or DSO.

Debt Issued With a Forward Delivery Date. Debt issued by a university or DSO may be issued ~~that has~~ with a delivery date significantly later than that which is usual and customary. This debt typically carries an interest rate penalty associated with the delay in delivery. There are also additional risks that delivery will not occur. Debt with a forward delivery date may be issued if the advantages outweigh the interest rate penalty which will be incurred and the university and DSO are protected from adverse consequences of a failure to deliver the debt.

Interest Accrual Features

Fixed Rate, Current Interest Debt. Fixed rate debt will continue to be the primary means of financing infrastructure and other capital needs. However, there may be circumstances where variable rate debt is more appropriate, in which case, the state university or DSO shall provide documentation as noted in these guidelines for such debt.

Derivatives. Alternative financing arrangements, generally referred to as derivatives, are available in the market as an alternative to traditional bonds. Under certain market conditions, the use of alternative financing arrangements may be more cost effective than the traditional fixed income markets. However, these alternative financing instruments, such as floating to fixed swap agreements, have characteristics and carry risks peculiar to the nature of the instrument which are different from those inherent in the typical fixed rate financing. Although the universities and their DSOs should normally continue issuing conventional fixed rate bonds, alternative financing instruments may be used when the inherent risks and additional costs are identified and proper provision is made to protect the Board ~~of Governors~~, the university and the DSO from such risks. In determining when to utilize alternative financing arrangements, the availability of the requisite technical expertise to properly execute the transaction and manage the associated risks should be evaluated along with any additional ongoing administrative costs of monitoring the transaction. Also, a comprehensive derivatives policy should be established by the university or their DSOs and approved by the Board ~~BOG~~ prior to approving transactions using derivatives products.

Capital Appreciation Bonds. Normally capital appreciation bonds, which do not require current debt service payments, should not be used. However, when a

compelling university interest is demonstrated, capital appreciation bonds may be issued.

*Variable Rate Bonds. V*ariable rate debt may be issued where, considering the totality of the circumstances, such bonds can reasonably be expected to reduce the total borrowing cost to the university or the DSO over the term of the financing. The availability of the requisite technical expertise to properly manage the risks and execution of the variable rate transaction should be evaluated along with any additional ongoing administrative costs of monitoring the transaction. There should be a solid understanding of the liquidity risk and interest rate risks associated with variable rate debt. Further, there should be a debt management plan that mitigates, to the extent possible, these risks over the life of the debt. The following guidelines should apply to the issuance of variable rate debt:

a) *Expected reduction in total borrowing cost*. In determining reasonably expected savings, a comparison should be made between a fixed rate financing at then current interest rates and a variable rate transaction, based on an appropriate floating rate index. The cost of the variable rate transaction should take into account all fees associated with the borrowing which would not typically be incurred in connection with fixed rate bonds, such as tender agent, remarketing agent, or liquidity provider fees.

b) *Limitation on variable rate debt*. The amount of variable rate debt and interest derivative exposure is dependent on several factors associated with these types of debts. Included in the factors associated with these instruments are the university's/DSO's operating flexibility and tightness of budget, access to short and long term capital, the likelihood of a collateral call or termination payment, and the university's/DSO's financial expertise. The level to which universities may utilize variable rate debt obligation (VRDO) and interest derivatives (like swaps, collars, and caps) is subject to an understanding of the risks associated and a debt policy that adequately addresses the additional risks.

c) *Budgetary controls*. To avoid a situation in which debt service on variable rate bonds exceeds the annual amount budgeted, the following guidelines should be followed in establishing a variable rate debt service budget:

   i) A principal amortization schedule should be established, with provisions made for payment of amortization installments in each respective annual budget;

   ii) Provide for payment of interest for each budget year using an assumed budgetary interest rate which allows for fluctuations in interest rates on the bonds without exceeding the amount budgeted. The budgetary interest rate may be established by: (1) using an artificially high interest rate given current market conditions; or (2) setting the rate based on the last 12

months actual rates of an appropriate index plus a 200 basis point cushion or spread to anticipate interest rate fluctuations during the budget year. The spread should be determined by considering the historical volatility of short-term interest rates, the dollar impact on the budget and current economic conditions and forecasts; or, (3) any other reasonable method determined by the university or DSO and approved by the Board ~~BOG~~;

iii) The amount of debt service actually incurred in each budget year should be monitored monthly by the university or DSO to detect any significant deviations from the annual budgeted debt service. Any deviations in interest rates which might lead to a budgetary problem should be addressed immediately; and

iv) As part of the effort to monitor actual variable rate debt service in relation to the budgeted amounts and external benchmarks, the university or DSO should establish a system to monitor the performance of any service provider whose role it is to periodically reset the interest rates on the debt, i.e., the remarketing agent or auction agent.

d) *Establish a hedge with short-term investments*. In determining the appropriate amount of variable rate debt which may be issued by the universities or their DSOs, consideration should be given to mitigating the variable interest rate risk by creating a hedge with short-term investments. This "hedge" mitigates the financial impact of debt service increases due to higher interest rates because, as debt service increases, the university's or DSO's earnings on short-term investments also increases. Appropriate personnel should monitor the hedge monthly. Short-term investment as a hedge is one of several methods of mitigating interest rate risk. The ratio of such short-term investments to variable debt needs to be examined in conjunction with other interest rate risk hedging, striking an overall balance to minimize interest rate risk.

e) *Variable interest rate ceiling.* The bond documents should include an interest rate ceiling of no greater than 12%.

f) *Mitigating interest rate risks with derivatives*. Universities and DSOs are allowed to use various derivatives to mitigate the risk of rising interest rates on variable rate debt. However, the introduction of these derivatives also presents other risks for which the university must mitigate. These risks include rollover risk, basis risk, tax event risk, termination risk, counterparty credit risk and collateral posting risk. At a minimum, a university/DSO engaging in this type of interest rate risk mitigation must provide:

i) Evidence that the counterparty has a long term rating of at least ~~is rated at a minimum of~~ an A/A2~~1~~; and

ii) A swap management plan that details the following:

a) Why the university is engaging in the swap and what the objectives of the swap are.

b) The swap counterparty's rating.

c) An understanding by the issuer of the cash flow projections that detail costs and benefits for the swap.

d) The plan of action addressing the aforementioned risks associated with swaps.

e) The events that trigger an early termination (both voluntary and involuntary) under the swap documents, the cost of this event and how such would be paid.

f) The method for rehedging variable rate exposure should early termination be exercised.

g) A list of key personnel involved in monitoring the terms of the swap and counterparty credit worthiness.

g) *Liquidity*. One of the features typical of variable rate debt instruments is the bondholder's right to require the issuer to repurchase the debt at various times and under certain conditions. This, in theory, could force the issuer to repurchase large amounts of its variable rate debt on short notice, requiring access to large amounts of liquid assets. There are generally two methods for addressing this issue. With the first method, issuers that do not have large amounts of liquid assets may establish a liquidity facility with a financial institution which will provide the money needed to satisfy the repurchase. The liquidity provider should have a rating of A1/P1 or higher. The liquidity agreement does not typically run for the life of long-term debt. Accordingly, there is a risk that the provider will not renew the agreement or that it could be renewed only at substantially higher cost. Similar issues may arise if the liquidity provider encounters credit problems or an event occurs which results in early termination of the liquidity arrangement; in either case the issuer must arrange for a replacement liquidity facility. With the second method, issuers with significant resources may choose to provide their own liquidity. This approach eliminates the costs that would be charged by a third party liquidity provider and could mitigate the renewal/replacement risk. If a university/DSO chose to provide its own liquidity, the institution must maintain liquid assets or facilities equal to 100% of the outstanding variable rate debt obligations ("VRDOs").

h) *Submission of periodic reports*. The university will prepare and submit to the ~~BOT~~ board of trustees and the Board ~~BOG~~ an annual variable rate debt report showing the position during the previous period of the university or DSO variable rate debt with respect to the following measures:

i) the total principal amount of variable rate debt to principal amount of total debt;

ii) the amount of debt service accrued during the reporting period in relation to the pro-rata amount of annual budgeted debt service for the reporting period. If the amount of debt service which accrued during the reporting period exceeded the pro-rata amount of annual budgeted debt service for the period, the university shall explain what actions were taken to assure that there would be sufficient revenues and budget authority to make timely payments of debt service during the subsequent years; and

iii) the amount of variable rate debt in relation to the amount of the university's and/or DSO's short-term investments, and any other strategies used to hedge interest rate risk.

Other Types of Financings

Refunding Bonds. Generally, refunding bonds are issued to achieve debt service savings by redeeming high interest rate debt with lower interest rate debt. Refunding bonds may also be issued to restructure debt or modify covenants contained in the bond documents. Current tax law limits to one time the issuance of tax-exempt advance refunding bonds to refinance bonds issued after 1986. There is no similar limitation for tax-exempt current refunding bonds. The following guidelines should apply to the issuance of refunding bonds, unless circumstances warrant a deviation therefrom:

a) Refunding bonds should be structured to achieve level annual debt service savings.

b) The life of the refunding bonds should not exceed the remaining life of the bonds being refunded.

c) Advance refunding bonds issued to achieve debt service savings should have a minimum target savings level measured on a present value basis equal to 5% of the par amount of the bonds being advance refunded. The 5% minimum target savings level for advance refundings should be used as a general guide to guard against prematurely using the one advance refunding opportunity for post-1986 bond issues. However, because of the numerous considerations involved in the sale of advance refunding bonds, the 5% target

should not prohibit advance refundings when the circumstances justify a deviation from the guideline.

d) Refunding bonds which do not achieve debt service savings may be issued to restructure debt or provisions of bond documents if such refunding serves a compelling university interest.

Certificates of Participation and Lease-Type Financing. The universities or their DSOs may utilize these financing structures for all purposes, but it shall be considered as debt for the purposes of these guidelines and the universities shall always budget and make available monies necessary to pay debt service, notwithstanding the right to cancel the lease. Additionally, for lease purchase financings of equipment, universities and DSOs should consider using the State's consolidated equipment financing program if it will reduce costs and ensure a market interest rate on the financing.

Conversions of existing variable rate debt. A conversion between interest rate modes pursuant to the provisions of variable rate financing documents does not require Board approval. However, ten days prior to the conversion, the universities or their DSOs must notify the Board Office of a conversion and provide a summary of the terms of (i.e. interest rate, debt service schedule, etc.) and reasons for the conversion. The universities and DSOs should answer all questions and provide any additional information that the Board deems necessary to fully understand the conversion.

IV. METHOD OF SALE AND USE OF PROFESSIONALS

Analysis of Method of Sale

It is in the best interests of the universities and their DSOs to use the method of sale for their debt that is expected to achieve the best sale results. Based upon the facts and circumstances with regard to each individual financing, it may be more appropriate to sell debt through either a competitive sale or through negotiation. Accordingly, the universities and their DSOs may utilize either a competitive or negotiated sale. If, however, a request is made for a DSO to sell debt using a negotiated sale, the university must provide the Board ~~BOG~~ with an analysis showing that a negotiated sale is desirable. The analysis should include, but not necessarily be limited to, a consideration of the following factors:

a) Debt Structure

   i) pledged revenues – strong revenue stream vs. limited revenue base;

   ii) security structure – conventional resolution, cash flow, rate and coverage covenants vs. unusual or weak covenants;

iii) debt instrument – traditional serial and term bonds vs. innovative, complex issues requiring special marketing; and

iv) size – a smaller transaction of a size which can be comfortably managed by the market vs. a large size which the market cannot readily handle.

b) Credit Quality

i) ratings – "A" or better vs. below single "A"; and

ii) outlook – stable vs. uncertain.

c) Issuer

i) type of organization – well-known, general purpose vs. special purpose, independent authority;

ii) frequency of issuance – regular borrower vs. new or infrequent borrower; and

iii) market awareness – active secondary market vs. little or no institutional awareness.

d) Market

i) interest rates – stable; predicable vs. volatile;

ii) supply and demand – strong investor demand, good liquidity vs. oversold, heavy supply; and

iii) changes in law – none vs. recent or anticipated

Bonds may also be sold through a private or limited placement, but only if it is determined that a public offering through either a competitive or negotiated sale is not in the best interests of the university or DSO.

Allocation of Bonds

In the event a negotiated sale by a DSO is determined by the university to be in the university's best interest, syndicate rules shall be established which foster competition among the syndicate members and ensure that all members of the syndicate have an opportunity to receive a fair and proper allocation of bonds based upon their ability to sell the bonds.

Report on Sale of Bonds

The university or DSO shall prepare a report on the sale of bonds or anytime it incurs debt. The report shall be prepared and provided to the Board ~~BOG~~ as soon as practicable but in no event later than one month ~~seven business days~~ after closing the transaction, in the format and manner provided by the Board, which at a minimum shall include the following: ~~. including the following:~~

a) The amount of the debt.

b) The interest rate on the debt.

c) A final debt service schedule or estimated debt service schedule if a variable rate debt or the interest rate is subject to adjustment.

d) Any aspect of the transaction that was different from the transaction submitted for approval.

e) Itemized list of all fees and expenses incurred on the transaction, including legal fees.

f) For negotiated sale of bonds:

i) the underwriters' spread detailing the management fee;

ii) takedown by maturity and aggregate takedown;

iii) any risk component and an itemized list of the expense component;

iv) orders placed by each underwriter and final bond allocation;

v) total compensation received by each underwriter; and

vi) any report or opinion of the financial advisor.

g) Final official statement for publicly offered bonds.

h) Bond insurance or any other form of credit enhancement and the terms thereof.

i) Credit rating reports.

Selection of Financing Professionals

The use of underwriters for negotiated financings and the use of financial advisors for negotiated and competitive offerings is necessary to assist in the proper

structuring and sale of debt. To assure fairness and objectivity in the selection of professionals and to help select the most qualified professional, the selection of underwriters and financial advisors should be accomplished through a competitive selection process. A competitive selection process allows the universities and their DSOs to compare more professionals and obtain the best price and level of service.

V. DISCLOSURE

Primary Disclosure

Universities and DSOs shall use best practices in preparing disclosure documents in connection with the public offer and sale of debt so that accurate and complete financial and operating information needed by the markets to assess the credit quality and risks of each particular debt issue is provided.

The disclosure recommendations of the Government Finance Officers Association's "Disclosure for State and Local Governments Securities," and the National Federation of Municipal Analysts' "Recommended Best Practices in Disclosure for Private Colleges and Universities" should be followed to the extent practicable, specifically including the recommendation that financial statements be prepared and presented according to generally accepted accounting principles.

Continuing Disclosure

DSOs shall fulfill all continuing disclosure requirements set forth in the transaction documents and as required under Rule 15c2-12 of the Securities and Exchange Commission.

VI. POST-ISSUANCE CONSIDERATIONS

Investment of Proceeds of Debt Issued by DSOs

Construction Funds. Funds held for payment of debt service and all other funds held as required by the documents of any financing shall be invested consistent with the terms of the Financing Documents.

Arbitrage Compliance

The university will comply with federal arbitrage regulations. Any arbitrage rebate liabilities should be calculated and funded annually.

VII. EFFECT

The foregoing guidelines shall be effective immediately and may be modified from time to time by the Board ~~of Governors~~ as circumstances warrant. The guidelines are intended to apply prospectively to all university and DSO debt, and not to adversely affect any university or DSO debt currently outstanding or projects approved by the Board ~~BOG~~ or board of trustees ~~University Boards of Trustees~~ prior to, or existing, as of January 26, 2006.

Authority: Section 7(d), Art. IX, Fla. Const., History: New 4-27-06, Amended _____.

Functional Relationships
Version A – With Factors:

Functional Relationships. Revenues from one auxiliary enterprise (a "Supporting Auxiliary Enterprise") may not be used to secure debt of another auxiliary enterprise unless the Board, after review and analysis, determines that the facility being financed (the "Facility") is functionally related to the Supporting Auxiliary Enterprise's revenues being used to secure such debt. The Board must determine whether a functional relationship exists whenever revenues from a Supporting Auxiliary Enterprise will be used to pay or secure the debt of a Facility or when proceeds of bonds issued by a Supporting Auxiliary Enterprise will be used, directly or indirectly, to pay costs relating to a Facility. When a functional relationship is established between a Facility and a Supporting Auxiliary Enterprise, only that portion of the Supporting Auxiliary Enterprise's revenues that exceed its operating requirements and debt service, if any, may be pledged to secure such debt; provided that such pledge may be on parity with outstanding debt if permitted by the covenants and conditions of the outstanding debt.

A functional relationship exists when a nexus is established between the Facility and the Supporting Auxiliary Enterprise's revenues. Whether a Facility is functionally related to the Supporting Auxiliary Enterprise's revenues must be determined on a case by case basis, taking into consideration the unique facts and circumstances surrounding each individual situation. The Board may consider, but is not limited to, the following factors in determining whether a functional relationship exists between a Facility and a Supporting Auxiliary Enterprise's revenues; however, no single factor should be considered determinative of a functional relationship without an analysis of a totality of the circumstances:

- The Facility cannot be successfully operated without the benefit of the services provided or activities offered by the Supporting Auxiliary Enterprise.

- The Facility will directly enhance or augment the services, activities, or facilities of the Supporting Auxiliary Enterprise.

- The services, activities or facilities offered by the Supporting Auxiliary Enterprise will directly enhance or augment the services or activities to be offered by the Facility.

- The Facility will include infrastructure, such as utilities, roads, walkways, plazas or parking, that will afford cost savings to the Supporting Auxiliary

Enterprise or a reduction in environmental impact; or will otherwise be shared or jointly used by the both the Supporting Auxiliary Enterprise and the Facility. (For example, a reduction in the reliance on offsite facilities, reduced transportation costs and related emissions, or reduced public safety costs.)

- The Facility and Supporting Auxiliary Enterprise are operationally or administratively interrelated.

- Such other criteria as may be determined by the Board on a case by case basis.

Examples of functional relationships include, but are not limited to, a parking facility intended to provide parking to residents of a student housing facility and located within reasonably close proximity to a student housing facility; a food services facility intended to serve residents of a student housing facility and located within reasonably close proximity to a student housing facility; or shared infrastructure (e.g. water lines, sewer lines, utilities, plaza areas) located within reasonably close proximity to both the Facility and the Supporting Auxiliary Enterprise. While representations that a Facility will provide general benefits to or enhance the experience of the student body are desirable, this factor alone is not determinative in and of itself to establish a functional relationship between the Facility and the Supporting Auxiliary Enterprise's revenues.

Functional Relationships
Version B – Without Factors:

Functional Relationships. Revenues from one auxiliary enterprise (a "Supporting Auxiliary Enterprise") may not be used to secure debt of another auxiliary enterprise unless the Board, after review and analysis, determines that the facility being financed (the "Facility") is functionally related to the Supporting Auxiliary Enterprise's revenues being used to secure such debt. The Board must determine whether a functional relationship exists whenever revenues from a Supporting Auxiliary Enterprise will be used to pay or secure the debt of a Facility or when proceeds of bonds issued by a Supporting Auxiliary Enterprise will be used, directly or indirectly, to pay costs relating to a Facility. When a functional relationship is established between a Facility and a Supporting Auxiliary Enterprise, only that portion of the Supporting Auxiliary Enterprise's revenues that exceed its operating requirements and debt service, if any, may be pledged to secure such debt; provided that such pledge may be on parity with outstanding debt if permitted by the covenants and conditions of the outstanding debt.

A functional relationship exists when a nexus is established between the Facility and the Supporting Auxiliary Enterprise's revenues. Whether a Facility is functionally related to the Supporting Auxiliary Enterprise's revenues must be determined on a case by case basis, taking into consideration the unique facts and circumstances surrounding each individual situation.

Examples of functional relationships include, but are not limited to, a parking facility intended to provide parking to residents of a student housing facility and located within reasonably close proximity to a student housing facility; a food services facility intended to serve residents of a student housing facility and located within reasonably close proximity to a student housing facility; or shared infrastructure (e.g. water lines, sewer lines, utilities, plaza areas) located within reasonably close proximity to both the Facility and the Supporting Auxiliary Enterprise. While representations that a Facility will provide general benefits to or enhance the experience of the student body are desirable, this factor alone is not determinative in and of itself to establish a functional relationship between the Facility and the Supporting Auxiliary Enterprise's revenues.

Checklist of Information Required for Submission to the Board Pursuant to Debt Management Guidelines

1. ☐ A resolution of the DSO board of directors approving the debt issuance, if applicable, and a resolution of the university Board of Trustees (the "BOT") approving the debt issuance and authorizing the university to request Board approval of the debt issuance. *For debt to be issued by DBF, at the request of the university, DBF staff will work with Board staff and the university to determine a not-to-exceed amount of debt to be included in the BOT requesting resolution to the Board and in preparing required debt service and source-and-use schedules.*

~~2. ☐ A proposed agenda item for BOG meeting.*~~

~~3~~2. ☐ The project program, feasibility studies or consultant reports (if available), and an explanation of how the proposed project is consistent with the university's mission.

~~4. ☐ For debt issued by DSOs, a form of a resolution to be adopted by the BOG approving issuance of the debt.*~~

~~5~~3. ☐ Estimated project cost, ~~draw schedule~~ with schedules drawn by month and including start and completion dates, estimated useful life, and date bond proceeds are required.

~~6~~4. ☐ The sources-and-uses of funds, clearly depicting all costs, funding sources expected to be used to complete the project and the estimated amount of the debt to be issued. *This information must follow the Board model template and be provided in Microsoft Excel format to Board staff.*

~~7~~5. ☐ An estimated debt service schedule with the assumed interest rate on the debt clearly disclosed. *If the proposed debt service is not structured on a level debt service basis, an explanation shall be provided which gives the reason why it is desirable to deviate from a level debt structure*.

~~8~~6. ☐ One consolidated d~~D~~ebt service schedule~~s~~ separately showing all ~~any~~ outstanding debt related to or impacting the proposed debt, the new debt and the new estimated total debt service.

~~9~~7. ☐ A description of the security supporting the repayment of the proposed debt and the lien position the debt will have on that security. If the lien is junior to any other debt, the senior debt must be described, and a

~~*BOG will prepare this item provided that the university submits sufficient information to Board staff for preparation of same.*~~

description of why the debt is proposed to be issued on a junior lien basis must be provided. A statement citing the legal authority for the source of revenues securing repayment must also be provided.

~~10~~8. ☐ If debt is to be incurred on a parity basis with outstanding debt, a schedule showing estimated compliance with any additional bonds requirement set forth in the documents governing the outstanding debt. The applicable provisions of the documents for bonds of DSOs should be provided.

~~11~~9. ☐ Financial statements for five years, if available, for the auxiliary, if auxiliary revenues are pledged.

~~12~~10. ☐ A five-year history, if available, and five-year projection of the revenues securing payment. The 10 years must be shown on one table and debt service coverage ratios must be included.~~,~~ *The information should also be provided to Board staff in Microsoft Excel format* and:

i) to the extent applicable, the projections must be shown on the individual project as well as the entire system;

ii) all revenue items securing repayment must be shown as separate line items;

iii) an explanation must ~~should~~ be provided with regard to growth assumptions, and to the amount and status of approval of any rate increases;

iv) the effect of the rate increases on the projections and expected revenues and expenses for the new facility should be shown as a separate line item;

v) if rate increases are necessary, a commitment must be made to increase rates to the needed levels; and

vi) major categories of any operating expenses should be shown as separate line items with an explanation of assumptions regarding increases or decreases.

~~13~~11. ☐ Evidence that the project is consistent with the university's master plan or a statement that the project is not required to be in the master plan.

~~14~~12. ☐ For variable rate debt proposals:

i) the expected reduction in total borrowing costs based on a comparison of fixed versus variable interest rates;

ii) a variable rate debt management plan that addresses liquidity and interest rate risks and provides, at a minimum: a description of budgetary controls, a description of liquidity arrangements, a discussion of why the amount of variable rate debt being proposed is appropriate, and a plan for hedging interest rate exposure. *If interest rate risks are to be mitigated by the use of derivatives, then evidence that the counterparty has a long term rating of at least ~~is rated at a minimum of~~ an A/A2~~1~~ and a swap management plan as set forth in the Board's Debt Management Guidelines must be submitted*;

iii) a pro forma showing the fiscal feasibility of the project using current market interest rates plus 200 basis points;

iv) the total amount of variable rate debt including the proposed debt as a percentage of the total amount of university and DSO debt outstanding; and

v) the individual or position that will be responsible for the reporting requirements for variable rate debt as set forth in these guidelines.

~~15~~13. ☐ If the financing is contemplated to be done on a taxable basis, submit evidence demonstrating that the issuance of taxable debt is in the best interest of the university.

~~16~~14. ☐ A statement explaining whether legislative approval is required, and if required, an explanation as to when legislative approval will be sought or evidence that legislative approval has already been obtained.

~~17~~15. ☐ A statement that the debt issuance is in accordance with the university's debt management policy or, if not, an explanation of the specific variances as well as the reasons supporting the variances.

~~18~~16. ☐ If a request is made to employ a negotiated method of sale, an analysis must be provided supporting the selection of this method that includes a discussion of the factors set forth in section IV of the Board Debt Management Guidelines.

~~19.~~ ☐ ~~If a request is made to use revenues from one auxiliary enterprise to secure debt of another auxiliary enterprise, explain which of the functional relationship criteria are applicable.~~

~~20~~17. ☐ A description of the process used to select each professional engaged in the transaction, showing compliance with the competitive selection process required by the Board Debt Management Guidelines. Specific contact information for each selected professional, must be included, and at a minimum, should disclose the professional's name, firm name, physical and mailing address, email address, phone number and facsimile number. ~~A financial advisor is required. Specific contact information for the financial advisor and bond counsel and how they were selected for the project must be included. The information must include their name, the name of their firm, address, e-mail address and phone number.~~

~~21~~18. ☐ The most recent annual variable rate debt report. ~~as provided to the university BOT.~~

ITEM: FP-3

University of Central Florida
Board of Trustees

SUBJECT: Minor Amendment to 2010 Campus Master Plan

DATE: July 22, 2010

PROPOSED BOA|RD ACTION

Approve a minor amendment to the University of Central Florida Campus Master Plan to add a new Combined Heat & Power (CHP) facility.

BACKGROUND INFORMATION

The purpose of the proposed amendment is to add the Combined Heat & Power facility to the Capital Improvements and Urban Design elements. This will allow the university to construct a new CHP facility adjacent to the South Utility Plant on Gemini Blvd. As more particularly outlined in the attached memorandum, the change would constitute a minor amendment that needs only Board of Trustees approval for adoption.

Memorandum from James Davis (Attachment A)
Campus Map Site (Attachment B)
Capital Improvements List (Attachment C)
Urban Design Map (Attachment D)

Prepared by: James K. Davis, Assistant Director, UCF Facilities Planning

Submitted by: William F. Merck II, Vice President for Administration and Finance and Chief Financial Officer

MEMORANDUM

TO: Scott Cole

FROM: James Davis

SUBJECT: Minor Amendment to 2010 Campus Master Plan for Combined Heat and Power Plant

DATE: July 1, 2010

The University of Central Florida proposes a minor amendment to its 2010 Campus Master Plan to change the Urban Design and the Capital Improvements elements to support a new Combined Heat and Power (CHP) facility.

The proposed CHP facility will be erected adjacent to building 3 (South Utility Plant) and will provide for approximately 5,000 square feet that will house the engine, generator, and absorption chiller, with a mezzanine level for the control and electrical room. The intent of the project is to provide a facility that will produce approximately 5.2 mega-watts (1/3 the total campus demand) of power to be utilized by the campus. Additionally, the power generation equipment will be designed and furnished by Mitsubishi Power Systems.

Please find below an analysis of the statutory thresholds and university responses that reflect the nature of the amendment request as a minor amendment. The thresholds are referenced under section 1013.30(9), *F.S.*

An amendment to a campus master plan must be reviewed and adopted under subsections (6)-(8) if such amendment, alone or in conjunction with other amendments, would:

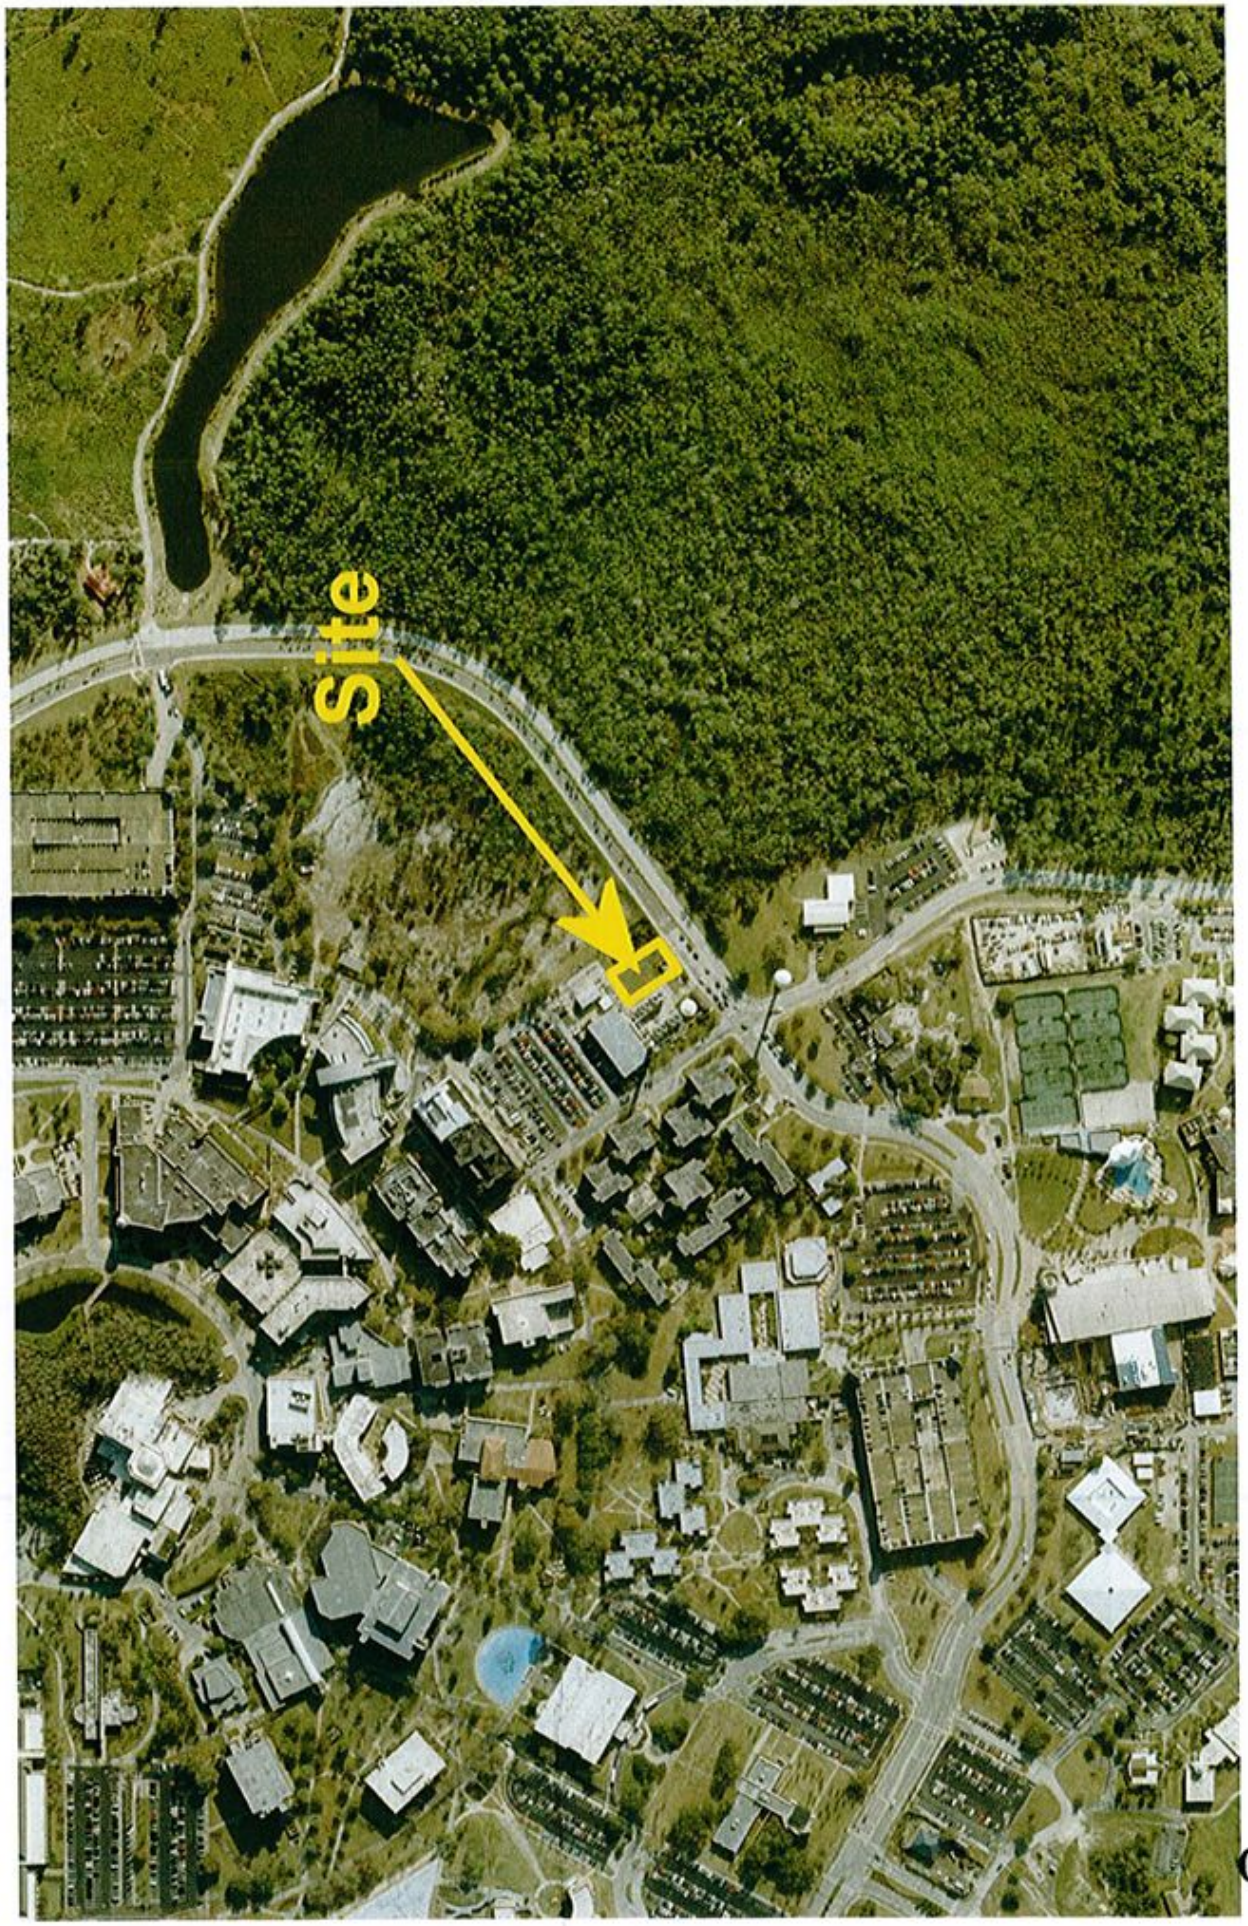
(a) Increase density or intensity of use of land on the campus by more than ten percent;

University response: The proposed CHP facility is approximately 5,000 square feet. The total square footage for buildings on campus is approximately 8.9 million square feet, and therefore, the 5,000 square foot building is far less than ten percent.

(b) Decrease the amount of natural areas, open space, or buffers on the campus by more than ten percent;

University response: The proposed amendment will not affect natural areas, open space or buffers by more than ten percent. Acreage on campus designated for natural areas, open space and buffers exceed 1,000 acres, therefore, the increase to 5,000 square feet will not trigger the 10% threshold.

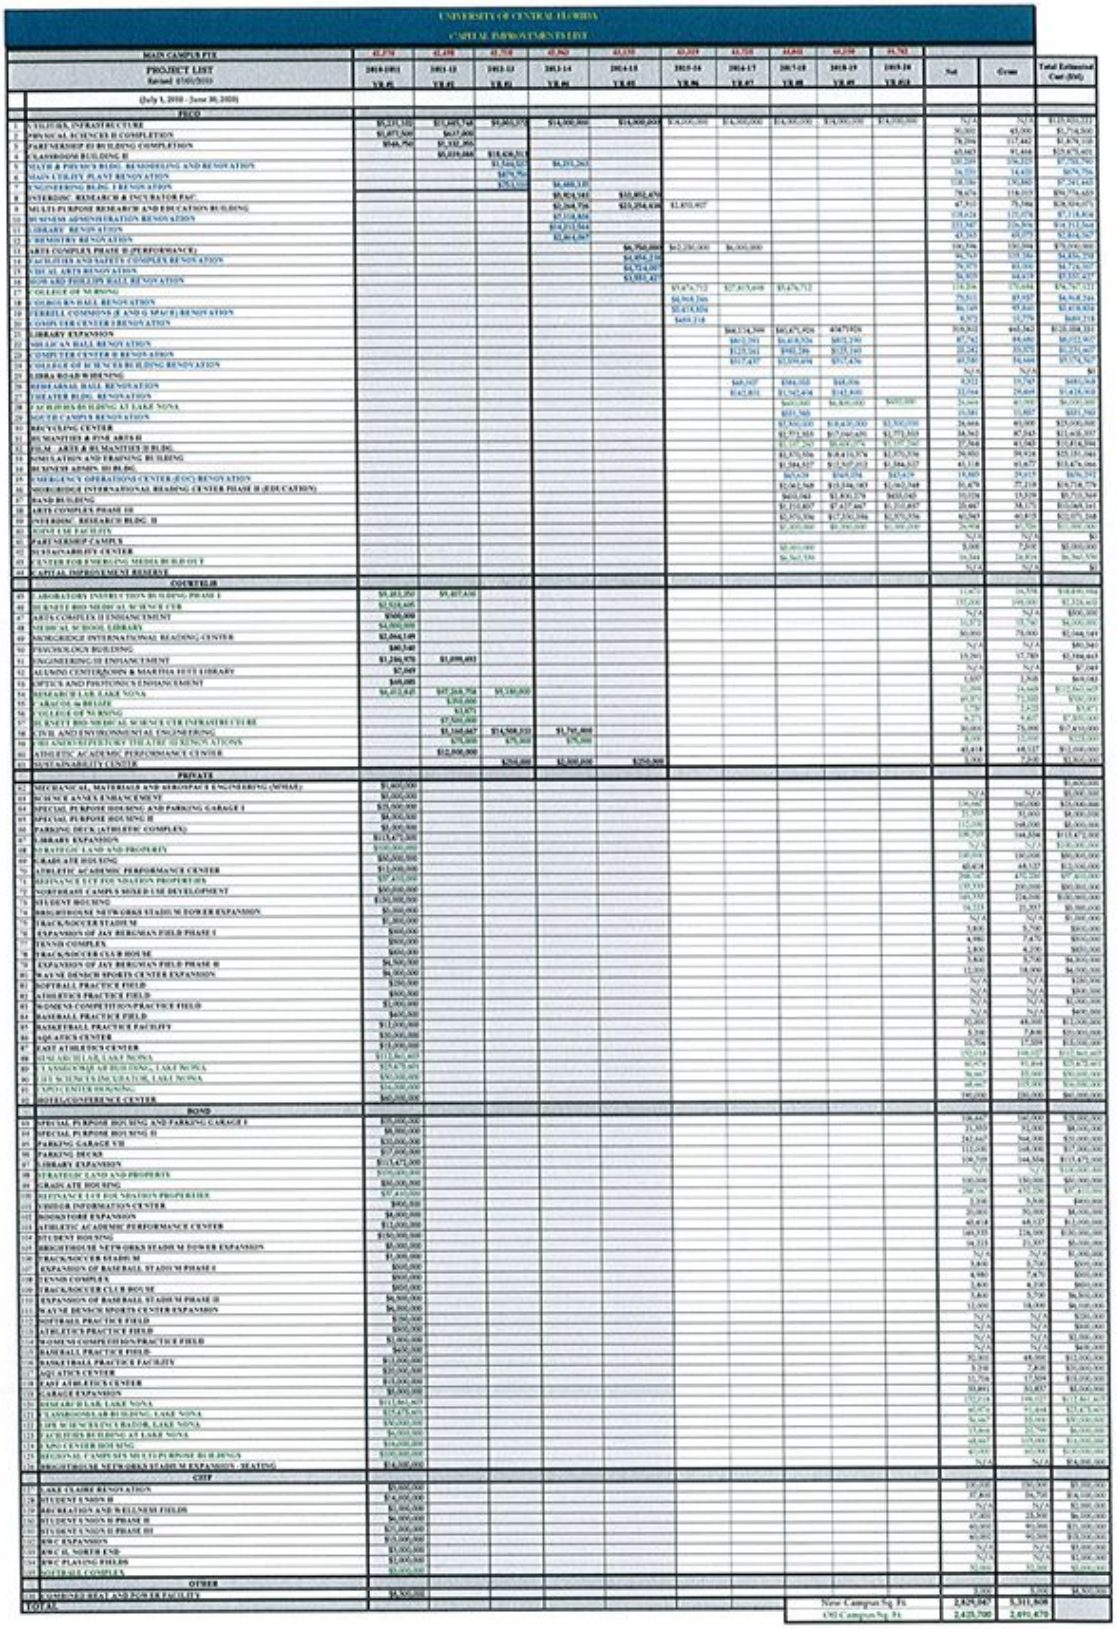
Attachment A



044

(c) Rearrange land uses in a manner that will increase the impact of any proposed campus development by more than ten percent on a road or on another public facility or service provided or maintained by the state, the county, the host local government, or any affected local government.

University response: The proposed site is currently designated as Utility and does not require a land use change. Therefore, the addition of the CHP facility will not affect the impact by more than ten percent on a road or on another public facility or service provided or maintained by the above referenced entities.



In summary, the proposed land use change does not exceed the amendment threshold criteria in 1013.30(9), *F.S.* and may therefore be treated as a minor amendment.

Thank you for your time and attention to this matter. If you require additional information, please contact James Davis at (407) 823-3050.

CONTRACTUAL AGREEMENT

For

REQUEST FOR PROPOSAL (RFP) #: 1019LC

ENTITLED: Combined Heat & Power (CHP) Plant System Purchase

Between

THE UNIVERSITY OF CENTRAL FLORIDA

And

MITSUBISHI POWER SYSTEMS AMERICAS, INC.

This Agreement is entered into upon signature of all parties, by and between the University of Central Florida, on behalf of its Board of Trustees ("University" or "UCF"), and Mitsubishi Power Systems Americas, Inc. ("Payee"). The parties agree as follows:

1. **ACKNOWLEDGMENT.** Payee acknowledges that:
   - **A.** The University is a public entity of the State of Florida;
   - **B.** The University is exempt from federal and Florida taxes;
   - **C.** UCF's liability is regulated by Florida law. Except for its employees acting within the course and scope of their employment, UCF shall not indemnify any entity or person and, then, such indemnification is limited to the express terms of §768.28, Florida Statutes. The State of Florida is self-insured to the extent of its liability under law and any liability in excess of that specified in statute may be awarded only through special legislative action. Accordingly, UCF's liability and indemnification obligations in this Agreement shall be effective only to the extent expressly required by §768.28, Florida Statutes. Any provision requiring UCF to provide insurance coverage other than the State of Florida self-insurance shall not be effective.

2. **DESCRIPTION OF SERVICES.** The Payee is an independent contractor pursuant to Florida law and assumes full responsibility for completion of the services/delivery of the goods, as described in detail in Attachment "A" to this Agreement, which is incorporated herein for all purposes. Units of deliverables, if any, for such services/goods are stated in Attachment "A". Such services/goods shall be rendered/delivered in accordance with the schedule and for the amounts set forth in Attachment "A".

3. **TOTAL AMOUNT OF AGREEMENT. (Confidential – Trade Secret Information)** The total amount of this Agreement shall not exceed $6,238,661.00 for the purchase of a Combined Heat & Power Plant System.

4. **SOURCE OF PAYMENT.** If applicable, payments to Payee under this Agreement shall be paid out of the University's account N/A.

5. **PERFORMANCE CRITERIA.** Criteria, if any, and the final date(s) by which such criteria must be met to complete this Agreement are described in detail in Attachment "B," which is incorporated herein for all purposes. Such criteria, if any, shall be met in accordance with the schedule set forth in Attachment "B".

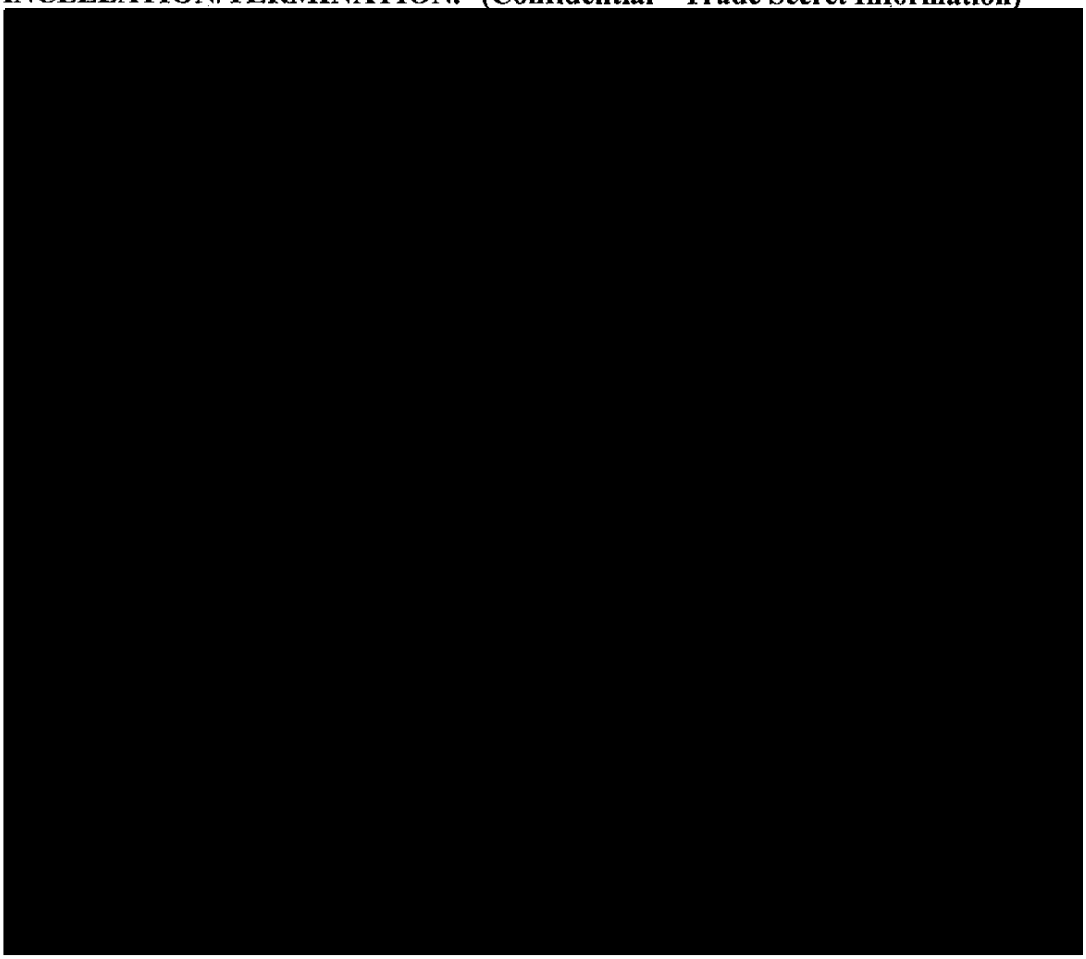
6. **PERIOD OF PERFORMANCE.** This Agreement is for the one time purchase and commissioning of a Combined Heat and Power Plant System. This Agreement shall be effective upon the fulfillment of the following events:

   a) execution of this Agreement by both the University and Payee; and

b) receipt by Payee of the initial milestone payment due upon signing of this Agreement.

7. **PAYMENT. (Confidential – Trade Secret Information)**

8. **VENDOR OMBUDSMAN STATEMENT.** The University has established a Vendor Ombudsman who acts as an advocate for vendors who may be experiencing problems in obtaining timely payment(s). The Vendor Ombudsman may be contacted at (407) 882-1000. Further information may be found in University Policy 3-208, Prompt Payment Compliance.



9. **ANNUAL APPROPRIATION.** The University's performance and obligations under this Agreement are subject to and contingent upon annual appropriations by the Florida Legislature and other funding sources. University shall give notice to Payee of the non-availability of such funds when University has knowledge thereof.

10. **ASSIGNMENTS.** Under no circumstances shall the Payee or University assign to a third party any right or obligation of Payee or University pursuant to this Agreement without prior written consent of the other party. If Payee is, or during the term of this Agreement becomes, an individual on the payroll of the State of Florida, Payee represents that he or she has complied with all applicable provisions in the Florida Statutes and

Florida Administrative Code regarding outside or dual employment and compensation.

11. **BILLING.** The University shall only submit payment to the Payee, if Payee has provided the University with approved invoices. Mere statements in lieu of approved invoices will not be accepted by the University. All invoices must specifically describe the services and/or goods provided, the dates and/or hours that the services were rendered and/or goods delivered and the fee charged. Payee shall deliver the invoices to UCF's Finance and Accounting Department, unless Payee has been otherwise instructed in writing by the University. The Payee must display the applicable contract and/or purchase order number on the face of each of Payee's invoices to the University. Except for the goods and services provided under this Agreement, the University will not be responsible for any goods or services delivered without a properly completed University purchase order or other order provided in writing by a duly authorized University signatory or designee. If Payee's invoice lists any freight or cartage charges, such invoice must attach all of Payee's receipted transportation bills. It being understood that any freight or cartage charges incurred for the transportation of goods delivered pursuant to this Agreement are included in the contract price and Payee shall not be required to separately identify such charges in its invoice or attach any receipted transportation bills.

12. **CANCELLATION/TERMINATION. (Confidential – Trade Secret Information)**

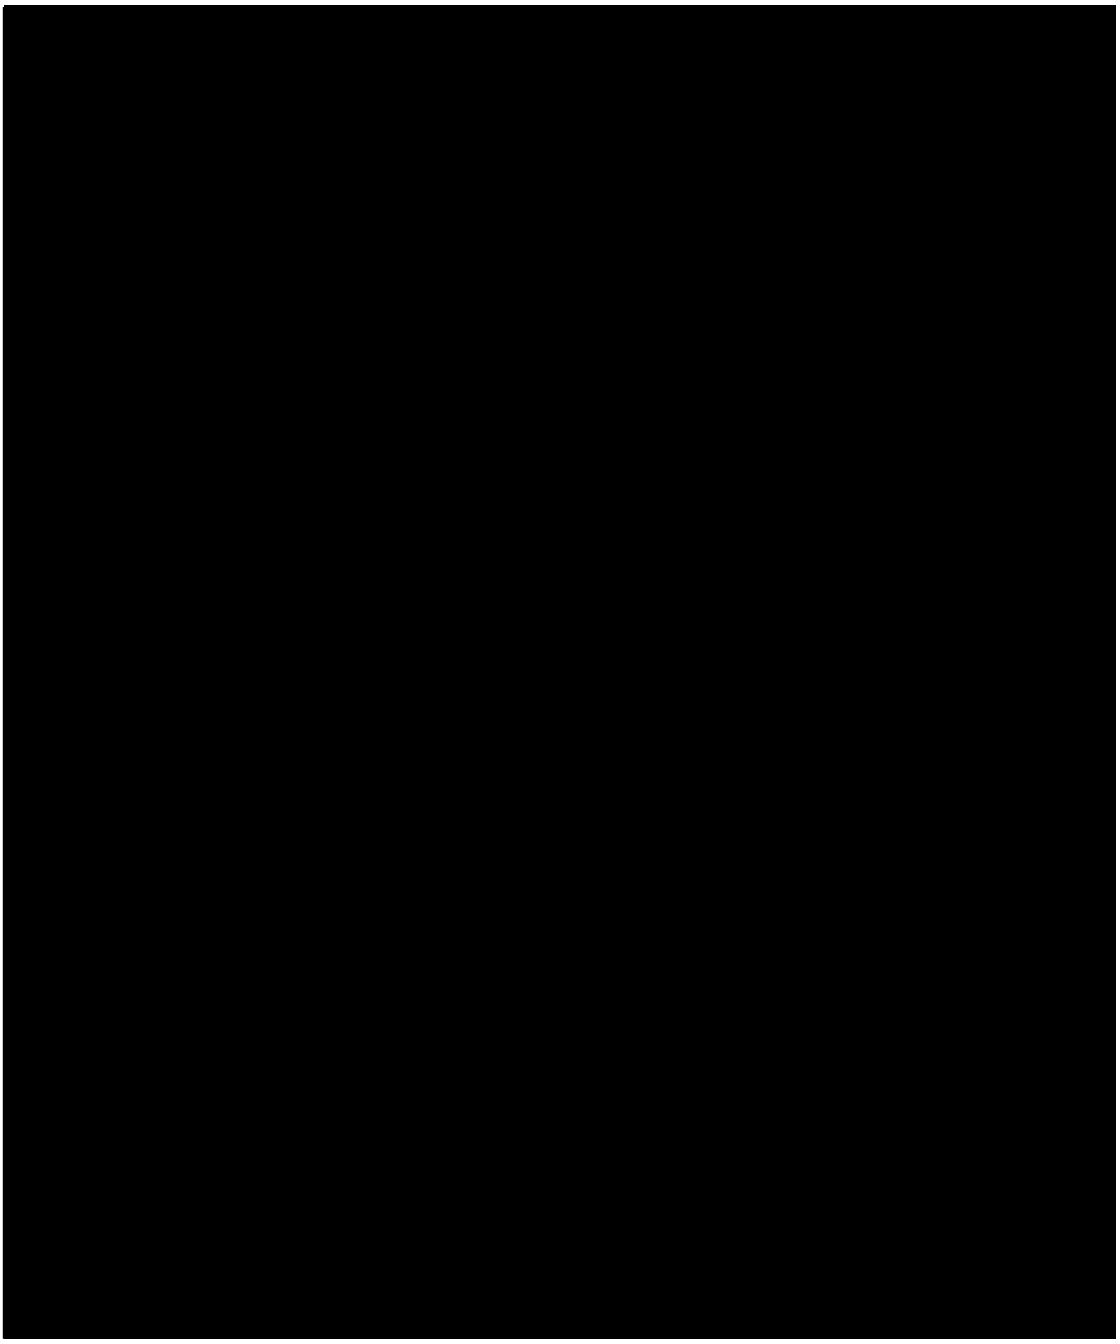
13. **COMPLIANCE.** The parties shall at all times comply with all applicable ordinances, laws, rules and regulations of local, state and federal governments, or any political

subdivision or agency, or authority or commission thereof, which may have jurisdiction to pass laws, ordinances, or make and enforce rules and regulations with respect to the parties in effect as of the date of the RFP. If any revisions, alterations or modifications are required by the University to cover compliance with new governmental restrictions, Payee shall be entitled to an equitable adjustment in the price, schedule and/or other provisions of this Agreement affected by the change. In the event of a violation of any laws applicable to emissions or noise, Payee shall pay any fines or penalties assessed by a government authority to the extent caused by any violation of such applicable laws by Payee in the performance of this Agreement. Notwithstanding anything to the contrary, in no event shall Payee have any obligation or liability with respect to the violation of any laws applicable to emissions or noise other than the payment of fines or penalties assessed by a government authority as set forth herein.

14. **CONFLICTS OF INTEREST.** Acceptance of this Agreement shall certify that Payee is aware of the requirements of Chapter 112, Florida Statutes and in compliance with the requirements of Chapter 112, Florida Statutes and other laws and regulations concerning conflicts of interests in dealing with entities of the State of Florida. Payee certifies that its directors and/or principal officers are not employed and/or affiliated with the University unless a current Conflict of Interest (Report of outside Activity/Employment) form has been completed, executed by such director or officer and approved in accordance with applicable University policies or rules. Violation of this article by Payee shall be grounds for cancellation of this Agreement.

15. **DELIVERY.** Delivery is to be made to "Ship To" location of this Agreement which is the University Combined Heat and Power Plant jobsite unless otherwise agreed to by the parties in writing. When delivery is specified to a location other than the University's Central Receiving Department, Payee shall direct its carrier to telephone the University's Central Receiving Department before unloading. Delivery of all shipments shall occur between 9:00 a.m. and 4:00 p.m., Mondays through Fridays only, except on State of Florida or U.S. holidays, unless otherwise agreed to by the parties in writing. The University of Central Florida is committed to sustainable practices. Palletized shipments should not exceed 1500 pounds per pallet and when possible, ship on a 40"x48" pallet. Include a packing list showing contents of shipment (if shipment is made in two or more containers). No boxing, packing, installation, assembly, or similar charges (not included in the item price) will be allowed unless expressly and specifically authorized in writing by the University on the face of this Agreement or in a separate purchase order. Payee shall deliver the goods furnished by Payee hereunder DDP University jobsite, Orlando, Florida, as that term is defined by INCOTERMS 2000.

16. **DELAY IN PERFORMANCE. (Confidential – Trade Secret Information)**



[redacted]

17. **NO HARM / NO FOUL. (Confidential – Trade Secret Information)** [redacted]

18. **EMPLOYMENT OF ALIENS.** Payee's employment of unauthorized aliens, if any, shall be considered a violation of §§274(e) of the Immigration and Nationality Act. If the Payee knowingly employs unauthorized aliens, such violation shall be cause for unilateral cancellation of the Agreement by the University.

19. **FORCE MAJEURE. (Confidential – Trade Secret Information)**

A. [redacted]

20. GOVERNING LAW. This Agreement and any attachments and addenda hereto are subject to and governed by Florida laws including, without limitation, Florida Statutes, §§768.28 and 946.15, both of which are incorporated by reference into this Agreement. The University is entitled to the benefits of sovereign immunity, including immunities from taxation.

21. **HEADINGS.** Headings have been included in this Agreement for convenience only and shall not affect the interpretation of any terms found herein.

22. **INDEMNIFICATION. (Confidential – Trade Secret Information)**

[redacted]

23. **INDEPENDENT CONTRACTOR.** Each of the parties is an independent contractor and nothing contained herein shall constitute or designate any of the employees or agents of one party as employees or agents of the other party.

24. **LEASED EQUIPMENT.** The risk of loss or damage to leased equipment; goods or property shall not transfer to the University except as provided in §680.219, Florida Statutes. Any security interest in the leased equipment, goods or property granted to Payee contrary to AGO 79-72 and AGO 80-9 is null and void.

25. **MATERIAL SAFETY DATA SHEET (MSDS).** In compliance with Florida Statutes, Ch. 442, a Material Safety Data Sheet (MSDS) must accompany any applicable item delivered under this Agreement.

26. **NON-PERFORMANCE.** Except for the obligation to make payment for undisputed amounts related to work performed or goods furnished, less any setoff amounts, including but not limited to amounts relating to liquidated damages set forth herein, neither party shall be required to perform under this Agreement or any attachments or addenda hereto executed by the University's duly authorized signatory when such performance is delayed or prevented by any cause beyond the party's or parties' control. This Agreement and any attachments and addenda hereto executed by the University's duly authorized signatory may not be altered, amended, or assigned without the prior written agreement of all the parties.

27. **NOTICES.** All notices given to a party shall be in writing. Any written notices between the parties shall be hand delivered or sent by registered or certified U.S. mail to the following addresses, or other addresses of which the parties shall have notified each other.

For UCF: University of Central Florida
Attn: Lee Kernek, Associate Vice President Facilities and Safety
4000 Central Florida Blvd.
Orlando, Florida 32816

For Payee: Mitsubishi Power Systems Americas, Inc.
Attn: Stephen A. Burris
100 Colonial Center Parkway, Suite 500
Lake Mary, FL 32746
(407) 688-6235

28. **PARKING.** The successful Payee shall ensure that all vehicles parked on campus for purposes relating to work resulting from this Agreement shall have proper parking permits. This applies to all personal vehicles and all marked and unmarked company vehicles that will be on any University campus for one (1) day or more or on a recurring basis. All such vehicles must be registered with University's Parking Services Department, and parking permits must be purchased by the Payee. Payee's vehicle(s) shall observe all parking rules and regulations. Failure to obtain parking permits, properly display them, and otherwise comply with all University's parking rules and regulations could result in the issuance of a parking ticket and/or towing at the expense of Payee or Payee's employee. For additional parking information or information regarding parking fees/rates, contact University's Parking Services Department at (407) 823-5812 or online at http://parking.ucf.edu.

29. **PUBLIC ENTITY CRIMES.** A person or affiliate who has been placed on Florida's convicted vendor list following a conviction for a public entity crime may not submit a bid on a contract to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to a public entity, may not be awarded, or perform work as a contractor, supplier, subcontractor, or consultant under, a contract with any public entity, and may not transact business with any public entity in excess of the bid limit for that public entity, for a period of thirty-six (36) months from the date of being placed on the convicted vendor list.

30. **PUBLIC RECORDS.** The Agreement may be canceled unilaterally by the University for refusal by the Payee to allow public access to all papers, documents, letters or other

material subject to the provisions of Chapter 119, Florida Statutes, and made or received by the Payee in conjunction with the Agreement. Notwithstanding anything to the contrary, information marked as "Confidential", "Proprietary", "Trade Secret", or by words of similar import, shall be protected from public disclosure and shall not be used for any purpose nor disclosed to third parties, including but not limited to competitors of the Payee, to the full extent protected under Florida law and the exemptions to Chapter 119, Florida Statutes.

31. **TAXES.** The prices herein are exclusive of any present or future federal, state or municipal sales, use, property, gross receipts, gross income, excise or other similar taxes with respect to the goods and services furnished hereunder. If the Payee is required by applicable law or regulation to pay or collect any such taxes on the goods or services furnished hereunder, then such tax shall be paid by the University in addition to the contract price. Payee shall notify University if requested to pay or collect any such taxes on the goods or services furnished hereunder, and University shall have a reasonable opportunity to respond to such request before Payee pays or collects such taxes.

32. **VIETNAM ERA VETERANS READJUSTMENT ACT OF 1974.** The University and the Payee must comply with all provisions of: (i) §402:60-250.4 of the Vietnam Era Veterans Readjustment Act of 1974; (ii) §503:60-741.4 of the Rehabilitation Act of 1973; (iii) Executive Order 11246, as amended; and, (iv) the rules, regulations, and relevant orders of the U.S. Secretary of Labor.

33. **AMENDMENTS.** No changes or amendments to this Agreement are binding on the University unless made in legible writing that is signed by an attorney in the University's General Counsel's Office and the University's Purchasing Director or designee. Payee shall return this Agreement to the University's Purchasing Department at once with a written explanation if it is not acceptable in its entirety. No changes or amendments to this Agreement are binding on Payee unless agreed to in writing by Payee.

34. **USE OF CONTRACT BY OTHER GOVERNMENT AGENCIES.** At the option of the Payee, the use of the Agreement resulting from this solicitation may be extended to other governmental agencies, including the State of Florida, its agencies, political subdivisions, counties and cities. Each governmental agency allowed by the Payee to use this Agreement shall do so independent of any other governmental entity. Each agency shall be responsible for its own purchases and shall be liable only for goods or services ordered, received and accepted. No agency receives any liability by virtue of this bid and subsequent contract award.

35. **LIMITATION OF REMEDIES. (Confidential – Trade Secret Information)**

36. **INSURANCE.** The Payee shall obtain, maintain, and pay for insurance in the categories listed in the following insurance schedule. It is not the intent of this schedule to limit the types of insurance otherwise required by this Agreement or that which the Payee may desire to obtain. The insurance coverage in each category shall meet or exceed the minimum limits set forth in the insurance schedule below. All such insurance policies must be with insurers qualified to do business in Florida. The insurance shall cover all of the Payee's operations under this Agreement and shall be effective throughout the effective period of this Agreement. UCF, its Board of Trustees, the Florida Board of Governors, and the State of Florida, shall be included as additional named insured on each of Payee's policies. The Payee shall furnish UCF proof of Payee's insurance coverage by original ACORD certificates of insurance no later than five (5) days after this Agreement is executed. Before commencement of work under this Agreement, the Payee shall submit evidence that it has obtained full insurance coverage set forth in the following schedule. UCF shall always be exempt from, and in no way be liable for, any sums of money which may represent a deductible in any of Payee's or Payee's subcontractors' insurance policies. The payment of such deductible shall be the sole responsibility of the Payee and/or Payee's subcontractor that obtained the insurance. The Payee shall always promptly notify UCF of any change in insurance coverage or carrier by it or any of its subcontractors.

SCHEDULE:

Policy	Coverage
(a) Worker's Compensation	Statutory
(b) *Comprehensive General Liability Insurance:	
(1) Bodily Injury Liability	$1,000,000 each occurrence
(2) Property Damage Liability	$1,000,000 each occurrence
(3) Aggregate	$1,000,000
(c) Comprehensive Automobile Liability Insurance:	
(1) Bodily Injury Liability	$1,000,000 each occurrence
(2) Property Damage Liability	$1,000,000 each occurrence
(3) Combined Single Limit	$1,000,000
(d) Excess Umbrella Liability	
(1) Combined Single Limit Bodily Injury	$3,000,000 each occurrence
(2) Injury and/or Property Damage	$3,000,000 aggregate

(e) *Comprehensive General Liability to include but not be limited to:
(1) Products and Completed Operations
(2) Existence of Vehicles, Equipment or Machines on Location
(3) Contractual Liability Insurance

37. **WORKER'S COMPENSATION.** During the contract term, the Payee at its sole expense shall provide commercial insurance of such a type and with such terms and limits as may be reasonably associated with the contract, which, as a minimum, shall be: workers' compensation and employer's liability insurance in accordance with Chapter 440 of the Florida Statues, with minimum employers' liability limits of $100,000 per accident, $100,000 per person, and $500,000 policy aggregate. Such policy shall cover all employees engaged in any contract work. Employers who have employees who are engaged in work in Florida must use Florida rates, rules, and classifications for those employees. In the construction industry, only corporate officers of a corporation or any group of affiliated corporations may elect to be exempt from workers' compensation coverage requirements. Such exemptions are limited to a maximum of three per corporation and each exemption holder must own at least 10% of the corporation. Independent contractors, sole proprietors and partners in the construction industry cannot elect to be exempt and must maintain workers' compensation insurance.

38. **WARRANTY. (Confidential – Trade Secret Information)**

A. [redacted]

B.

C.

D. [redacted]

39. **WAIVER OF RIGHTS AND BREACHES.** No right conferred on either party by this Agreement shall be deemed waived and no breach of any such contract excused, unless such waiver of right or excuse of breach shall be in writing and signed by the respective party's signatory. Waiver or excuse of a breach by the other party shall not constitute a waiver or excuse of any other breach.

40. **SEVERABILITY.** If any provision of this Agreement is contrary to, prohibited by, or deemed invalid by applicable laws or regulations of any jurisdiction in which it is sought to be enforced, then said provision shall be deemed inapplicable and omitted and shall not invalidate the remaining provisions of this Agreement.

41. **ATTACHMENTS AND ENTIRE AGREEMENT.** This Agreement and any attachments and/or addenda hereto that are executed by the University's duly authorized signatory constitutes the entire and exclusive agreement between the parties. Attachments and/or addenda may include, but are not limited to, the University's ITB/RFP including all the University's ITB/RFP specifications, and the Payee's ITB/RFP response. This Agreement will be comprised of the following documents and in the event of a conflict or inconsistency between such documents, the order of precedence shall be:

A. This Agreement;
B. Other documents agreed to by the parties at the time the Agreement is executed;
C. The University's RFP and RFP specifications; and
D. Payee's RFP response.
