

Boutique hotel and conference center

- Enhancement to existing academic facilities
- Desirable service component to the campus
- Designed, constructed, and operated by a private developer
- Permit drawings were received in 2016
- After a hold-period, the project appears to be re-energizing and KUD hopes to discuss groundbreaking in the near future

University of Central Florida
Status of Projects – April 2017
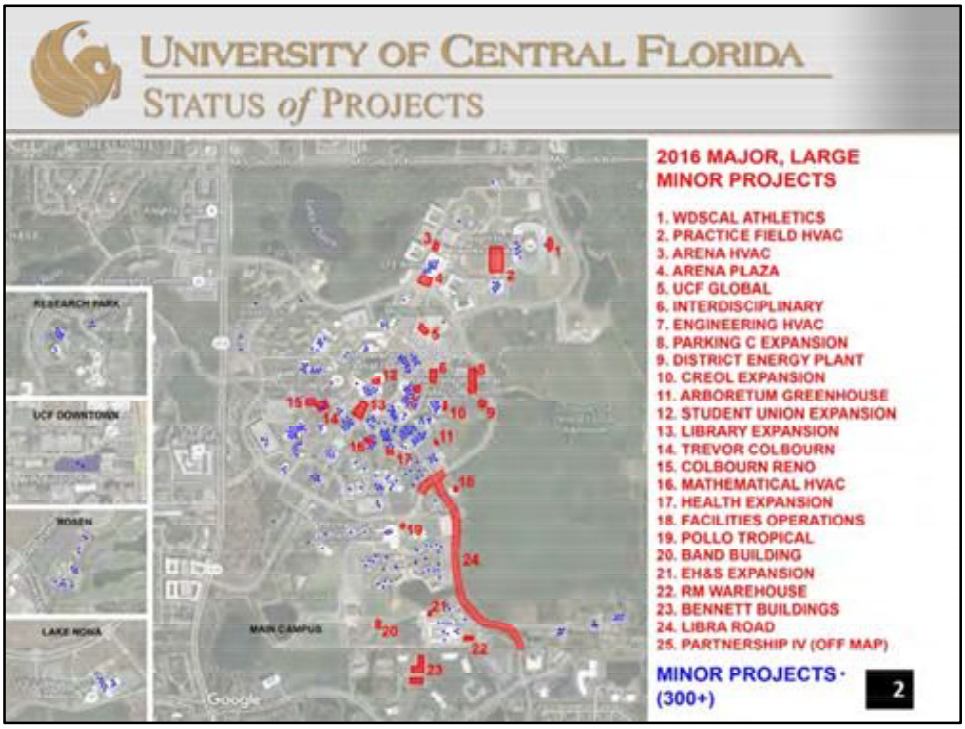
UCF Status of Projects Update
April 2017
Facilities Planning and Construction
UCF

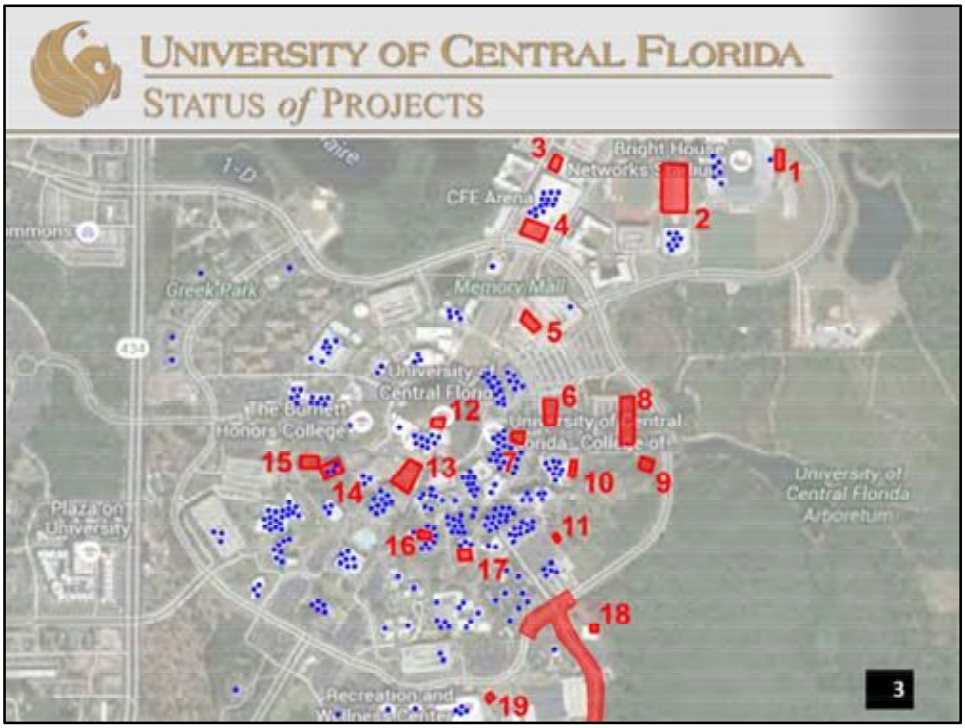
Since starting construction in January 1967, UCF has grown to 163 buildings on the main campus. There is currently $159M of projects under design and construction (major $125M and minor $34M projects), not counting the forthcoming UCF downtown campus projects.



Today's presentation starts with a big picture overview of our campus projects, briefly discusses our minor projects and deferred maintenance, and then moves to major projects. Major projects shown generally follows the order of completion, starting with projects completed since the last update, which was in April, 2015; then projects currently under construction, projects currently in design, and finally projects still in the concept phase. While I'm only going to cover some key projects, the current numbers are:

17 Major Projects (Student Health Center Addition, Global UCF, Parking Deck C expansion, Interdisciplinary, Trevor Colbourn Hall, Colbourn Hall Renovation, Wayne Densch Center for Student Athlete Leadership, Library Expansion, District Energy Plant IV, Mathematical Sciences HVAC, Engineering 1 HVAC, Libra Road, Bennett Buildings, Partnership 4, Student Union Expansion, CREOL Addition, UCF Downtown)

370 Minor Projects (construction value of $2M or less)



Totals:

- 60 in closeout
- 80 in construction
- 230 in design/permitting

While Major Projects make up the majority of the cost of our projects ($125M under design and construction, not counting UCF Downtown), Minor Projects ($34M) make up the majority of our workload.

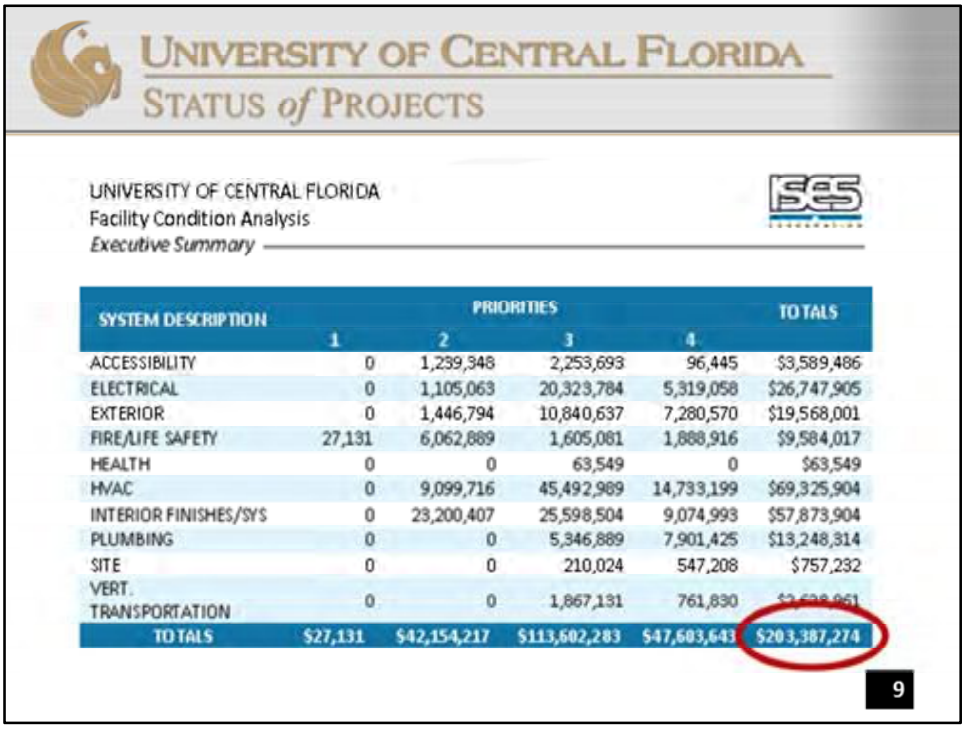
- We currently have 370 Minor Projects and 16 Major Projects – Minors make up 96% of our project count
- These projects are managed by a staff of 11 Project Managers, 3 Assistant/Associate Directors, and support staff
- Project Managers have an average of 35 projects each
- The map above illustrates in blue the quantity of minor projects

Enlarged to show help visualize the volume of projects just on the main campus under our management.

Examples of large minor projects

Examples of medium size minor projects

Examples of small minor projects



Small projects under $50K make up 50% of our project workload, by project count

Top Left – Building 5: Chemistry - Soffit deteriorated and fell.
Top Right – Building 20: Biomedical Sciences - Unfinished concrete entrance needs to be waterproofed.
Bottom Left - Building 21: Education Complex - Penthouse for HVAC equipment deteriorated and needs renovation.
Bottom Right - Building 40: Engineering I - Skylight inaccessible and cause of water intrusion. Needs to be removed or replaced with reliable system.

Hidden (sent to back) - Building 4: Stormwater Research - Decommissioned Waste Water Plant used for Storm Water research. Building should be demolished. Too expensive to renovate.

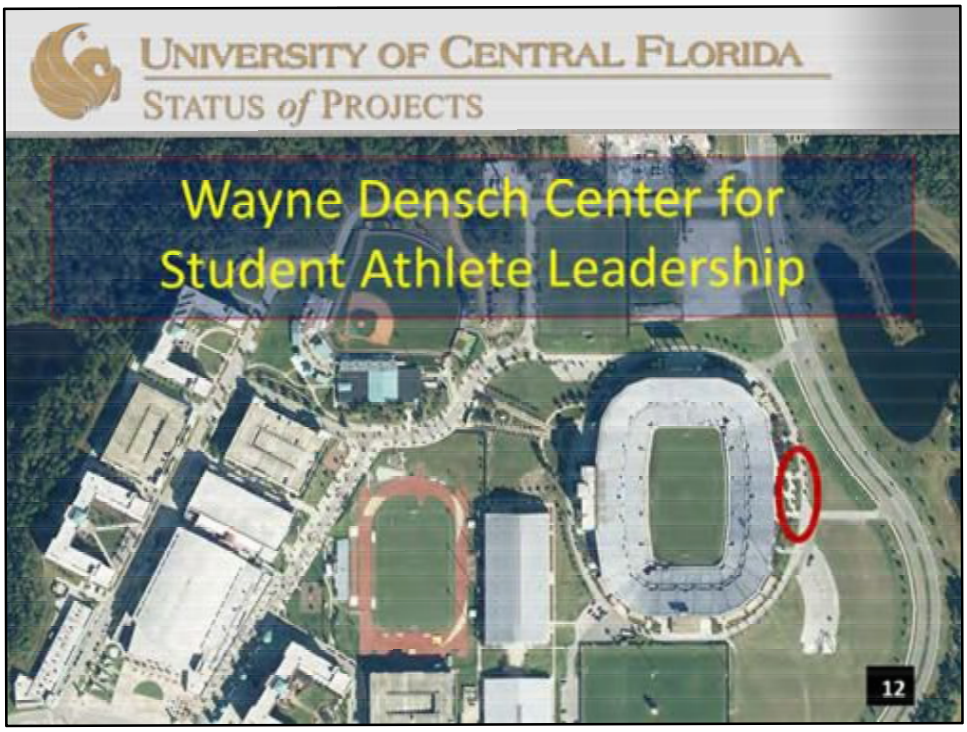
9

- 2012 ISES reports concluded that UCF had over $200M of deferred maintenance needs
- This amount was bought down to approx. $146M, using Carry Forward funds, but grows annually as our campus continues to age
- The state is not adequately funding deferred maintenance, so we must be creative in how we prioritize and solve these needs
- The University should continue to invest in its older buildings to avoid catastrophic problems and optimize the lifespan of our facilities.



This project is located on the east side of the existing Bright House Networks Stadium.

Architect: KZF
Contractor: Wharton Smith
Project Cost: $2M
Funding Source: Convocation Corporation

- Aesthetic improvements to the stadium, improvements to the fan experience!
- National brand recognition for incorporating this type of space into a stadium.
- Last year 75% of seats sold – athletics is on track to improve this for upcoming season.
- Named sponsorship, improves university revenue!

Located east of Brighthouse Networks Stadium

Architect: KZF
Contractor: Wharton Smith
Project Cost: $6M
Funding Source: Donor funding

22,000 **GSF**

Description:

- Provides new front door to the east side of the stadium
- Designed to accommodate future growth of stadium stands
- Modernizes athletic facilities, which will assist in recruitment for both student athletes and athletic staff
- Offices, tutoring rooms, computer labs, student services, study areas, career counseling space, conference rooms, and multipurpose rooms for student athletes

Status: Construction Complete, project in close-out
LEED: Tracking Silver

UCF Football set a program record with an Academic Progress Rate (APR) of 983 for multiple years, which ranks 11th among Football Bowl Subdivisions (FBS) institutions
Highest mark In the American Athletic Conference since the conference's existence.

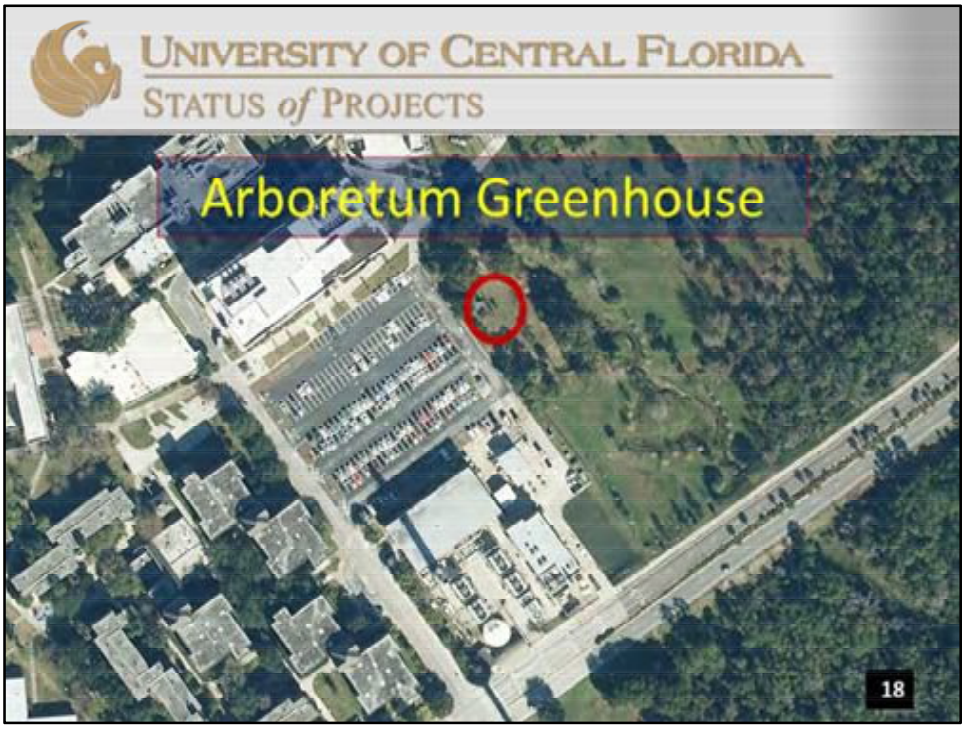
This building will further support the academic success of our student athletes.

Located in Research Park, south of Facilities & Safety Complex

Architect: ACI
Contractor: Wharton Smith
Project Cost: $6,000,000
Funding Source: University-funded – C&G

10,000 **GSF**

Description:



- Renovation of existing buildings to accommodate research labs and business incubation and to meet Florida Building Code requirements
- Adds 5 labs and 3 fume hoods
- Modernizes 110 offices and conference rooms
- Upgrades mechanical & electrical systems
- Replaced roofing systems

Status: Construction Complete, project in close-out
LEED: N/A

The buildings include space for incubator clients and potential temporary space for faculty cluster hires, until larger new construction projects can be completed

When the clusters are permanently located, the space will be used for the UCF Incubator Program (ROI)

Located southeast of Physical Sciences building

Architect: KZF
Contractor: Wharton Smith
Project Cost: $430K
Funding Source: Biology, Landscape and Natural Resources, and Utilities/Infrastructure funds

1,000 **GSF**
Description: Pre-fabricated, 24’ x 40’ greenhouse. Replaces the greenhouse that was damaged during the 2004 hurricanes and the temporary structures that have been in use since. Provides space for plant propagation for classes and student projects, as well as public outreach for environmental programs .

Status: Construction Complete; project in close-out
LEED: N/A

Located south of Parking Garage D, adjacent to Memory Mall

Architect: Schenkel Shultz
Contractor: Clancy & Theys
Project Cost: $16.6M
Funding Source: University-funded – internal sources

56,000 **GSF**
Description: Classroom space for transitioning international students into a campus learning environment:
45 faculty offices
18 classrooms
3 computer labs
4 conference rooms
Global UCF commons area
Designed with high efficiency mechanical systems

Status: Construction Complete, project in close-out; CO obtained 4/27/16; move-in begins the week of 5/2/16
LEED: Tracking Gold

Located east of Academic Villages

Engineer: Harris Civil Engineers
Contractors: Libra – Stage Door II, CARP – Allstate Paving
Project Cost: Libra - $4.4M, CARP - $1.1M Hard Bid project
Funding Source: University-internal and Utilities Infrastructure

Description: Libra – Widens road from 2 lanes to 4 lanes, with bike lanes on both sides – in accordance with the Campus Master Plan. It addresses stormwater control issues, and improves the road system at the intersection of Libra and Gemini, and south of Gemini Blvd.

CARP – Replaces asphalt in select locations on campus.

Status: CARP – Completed; Libra Drive - Construction
Estimated Completion Date: Libra Drive – Road work May 2016, Signalization June 2016

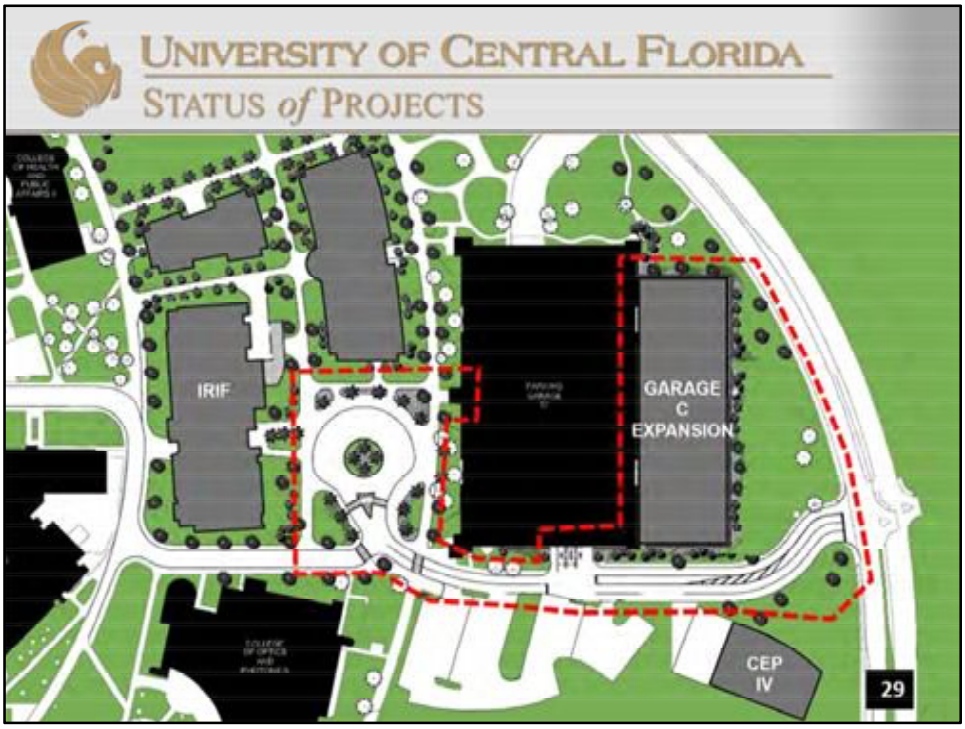
Located in existing Student Health Center, south of Chemistry building

Architect: HKS
Contractor: Barton Malow
Project Cost: $3.9M
Funding Source: University-funded – internal sources

10,400 **GSF NEW,** 2,600 **GSF Renovation**

Description:

- Creates state of the art programs for serving student needs related to international health, travel medicine, and immunizations.
- Includes space for psychiatry, substance abuse counseling, biofeedback, and dieticians.
- Building expansion includes:
    - reception
    - 15 patient care rooms
    - 15 provider offices
    - 5 records offices, records room
    - 1 conference room
    - Marketing suite
    - Storage
- Improved building appearance
- Upgrade of building HVAC controls



Status: Construction
Estimated Completion Date: July 2016
LEED: Tracking Silver

Located east of Parking Garage C

Architect: Schenkel Shultz (selected as part of the Global UCF project)
Contractor: Clancy & Theys (selected as part of the Global UCF project)
Project Cost: $9M
Funding Source: Parking Services

Description:
Project necessary due to the loss of parking caused by Interdisciplinary and UCF Global.
Adds 600 spaces and elevator to existing Garage C;
Includes ingress/egress improvements to the parking deck, and road improvements;
Adds transportation hub.

Status: Construction
Estimated Completion Date: August 2016
LEED: N/A – not LEED, but using sustainable principles (locally sourced materials, limited site disruption, etc.)

Located in Facilities & Safety Complex

Architect: Schenkel Shultz
Contractor: Heard Construction (Continuing Services GC Quotes hard bid)
Project Cost: $2M
Funding Source: University-funded – internal sources

9,000 **GSF**

Description:

- Adds additional warehouse capacity for surplus & storage
- Hard drive shredder
- Postal pack & ship in support of surplus program
- Revenue generation – roughly $250K in sales annually

Status: Design and bidding complete; construction to begin June 2016

Estimated Completion Date: Dec 16

LEED: Targeting Silver

Located south of Student Union and east of John T. Washington Center

Architect: Holzman Moss Bottino
Contractor: Turner Construction
Project Cost: $76.9M over 3 phases; $19.3M Phase I
Funding Source: CITF and Utilities Infrastructure for Phase I

Phase I: 8,000 **GSF**

Description:
Phase I

- Automatic Retrieval Center (50% of robot)
- Add sprinklers to the existing library building
- ADA restroom upgrades to the existing library building
- renovation of 7,500 sf of area on the 5th floor of the existing library to provide study space for students.

Phase 2 – connector to existing library, Phase 3 – full interior renovation of the existing library and the final 50% of the robot

- ARC Statistics
  - 2.25M volumes of material
  - Request for materials from any device with internet access
  - Automatic crane locates materials and delivers to pick-up station
  - 5-10 minutes for entire process

Status: Bidding/Permitting, received GMP the week of 4/25, anticipated start of construction as early as May 2016
Estimated Completion Date Phase I: June 2017
LEED: Will wait to apply when entire facility is completed; targeting Gold

Located south of Technology Commons

Engineer: Moses and Associates
Contractor: CPPI
Project Cost: $3.9M MEP (+$10.1M balance to complete full renovation)
Funding Source: PECO

106,523 **GSF**
Description: Dollars permitting:

- Replace HVAC
- Provide life safety upgrades
- Meet Florida Building Code requirements
- Upgrade electrical system

Status: Construction – 3 of 4 AHUs installed over winter break 2015; units operational, finalizing CxA
As part of CxA we have discovered significant holes in the building's ductwork, which we will be repairing over the summer with remaining project funds.

Estimated Completion Date: May 2016
LEED: Will wait for additional funds to complete building renovation and will target Silver

Located west of Parking Garage C

Architect: Ponikvar and Associates
Contractor: CPPI
Project Cost: $46.6M over 2 phases; $30M Phase I, $16.6M phase 2
Funding Source: University funded – internal funds (requested PECO but have not received)

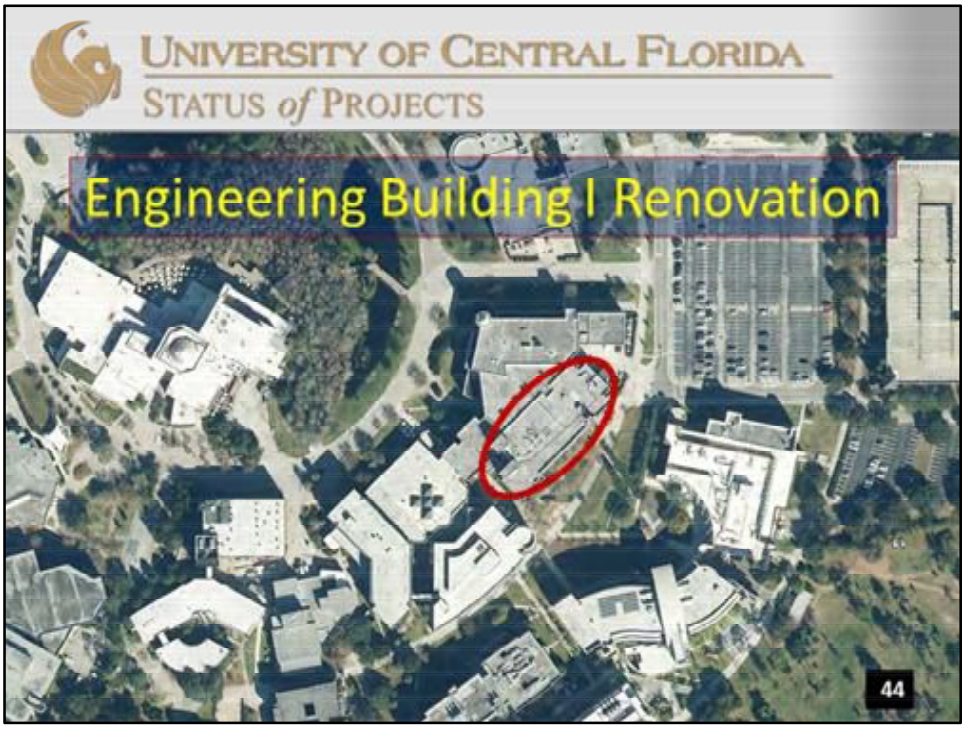
99,000 **GSF** for both phases (63,000 GSF Phase I, 36,000 GSF Phase II)

Description:

- 30 research/incubator labs, 20 material characterization rooms, conference rooms, offices, and ancillary spaces
- Houses programs from the following:
    - Office of Research and Commercialization (ORC)
    - College of Sciences (COS)
    - College of Engineering and Computer Sciences (CECS)
- Programs include:
    - Materials Characterization Facility
    - NanoSciences Technology Center
    - Sustainable Coastal Systems Cluster
    - Energy Conversion and Propulsion Cluster
    - Resilient, Intelligent, and Sustainable Energy Systems (RISES) Cluster
    - Cybersecurity and Privacy Cluster
    - Human Augmentation Robotics Cluster

Status: Construction
Estimated Completion Date: Phase 1 - July 2017; Phase 2 – September 2017
LEED: Tracking Gold

Phase 2 recently approved – we are currently bidding this phase in an effort to gets completion date close to Phase 1.



Located along Alafaya Tr. buffer west of Parking Garage A

Description: The boutique hotel and conference center will serve as an enhancement to existing academic facilities and will add a desirable service component to the campus. It is being designed, constructed, and operated by a private developer.

GSF: 99,776 GSF, 135 guestrooms
Estimated Project Cost: private developer
Projected Construction Dates: June 2016 to September 2017
Developer: KUD
Architect: Baker Barrios
Contractor: Batson Cook

Status: Construction Documents. Construction expected to start June 2016.

Located south of Engineering Building II in Academic Core

Engineer: SGM
Contractor: Barr and Barr
Project Cost: $3.6M MEP (+$14.9M balance to complete full renovation)
Funding Source: PECO

130,885 **GSF**
Description:

- Replace AHUs
- Provide life safety upgrades
- Meet Florida Building Code requirements
- Upgrade electrical system

Status: Construction Documents – delayed by code compliance issues with existing ventilation
Estimated Completion Date: May 2017
LEED: Will wait for additional funds to complete building renovation and will target Silver

Located southeast of Parking Garage C

Engineer: RLF
Contractor: CPPI
Project Cost: $13.5M
Funding Source: University-funded – internal sources

GSF: TBD
Description: Add additional chilled water capacity for future growth for the campus. Will add 2 additional chillers (with expansion to 4 chillers) and associated cooling towers. Project must be aesthetically pleasing due to its proximity to Gemini road.

Status: In Design Development; anticipate construction start July 2016
Estimated Completion Date: July 2017
LEED: Possible LEED Certified

Located west of existing Colbourn Hall

Architect: Schenkel Shultz
Contractor: Clancy & Theys
Project Cost: $23M
Funding Source: University-funded – internal sources

Approximately 76K GSF

Description:

- Will house the current occupants of Colbourn Hall (including English; Writing and Rhetoric; History, Modern Languages; Texts and Technology; Judaic Studies; African Studies; Women's Studies; Latin American Studies; the College of Arts and Humanities' Advising Office; the University Writing Center; the Center for Humanities and Digital Research; the Graduate Student Center; and 7 classrooms, 2 conference rooms, and ancillary space

Status: Schematic Design
Estimated Completion Date: August 2018
LEED: Targeting Gold

Located adjacent to Rehearsal Hall west of John T. Washington Center

Architect: Schenkel Shultz
Contractor: Clancy & Theys
Project Cost: $15M
Funding Source: University-funded – internal sources

84K GSF

Description:

- Building will undergo a total renovation
- Independent engineering analysis revealed:
    - Structural defects
    - Water intrusion issues
    - Mechanical systems past life-span
    - Life Safety deficiencies
    - Building needs to be gutted to structure and rebuilt to current building codes
- Renovation will include:
    - removal & replacement of building skin
    - Replacement of MEP systems in conjunction with construction of Trevor Colbourn Hall
    - Repair of structural defects
    - Two floors of new space; three floors of shelled space for future build-out
    - Gained Light Offices (GLO) – floor plan concept placing hard-

walled offices on interior and open office on exterior, allowing extreme daylight and views

Status: Schematic Design
Estimated Completion Date: August 2019
LEED: Targeting Gold

Located in front of the UCF Arena

Engineer/Architect: TLC/Morris
Contractors: Barton Malow/Wharton Smith
Project Cost: $3.3M (includes donor wall)
Funding Source: University and Convocation Corporation funded

GSF: TBD
Description: Cosmetic Renovation of the plaza area in front of the UCF Arena, and East Plaza Drive

Status: Permitting/Bidding
Estimated Completion Date: September 2016
LEED: N/A

Located adjacent to the Recreation & Wellness Center

Architect: BRPH
Contractor: CPPI
Project Cost: $3.3M
Funding Source: Aramark funded $2.5M; University-funded remaining – internal sources

GSF: 3,200 sf
Description:
New stand-alone dining facility to house a Pollo Tropical and Café Buscelo.
Provides foodservice venue in an area of campus near housing with little food options.
Thousands of student foot traffic per day going from housing to main campus and recreation area.
Student Government Association, Student Development and Enrollment Services, and RWC were consulted about the vendor selection and project design.

Status: Construction Documents
Estimated Completion Date: January 2017
LEED: Targeting Silver

Located adjacent to the existing band practice field, west of the Facilities and Safety Complex

Architect: Little Architects
Contractor: TBD (will be hard bid through our GC Quotes process to our Continuing Service contractors)
Project Cost: $2.5M
Funding Source: University-funded – internal sources

GSF: 4,000 gsf interior, 7,200 gsf covered exterior
Description:
New stand-alone band facility.
Provides shelter from the elements, instrument storage, restrooms, and an exterior covered practice area.
Includes new permanent lighting for the practice field.

Status: Construction Documents
Estimated Completion Date: January 2017
LEED: Targeting Silver

Building addition to the east of the existing CREOL building

Architect: RLF
Contractor: Robins Morton
Project Cost: TBD based on design options that are being considered
Funding Source: University-funded – internal sources

GSF: 8,200 gsf addition
Description:
Project will include:

- New labs
- New offices for faculty
- Potential auditorium for instruction and guest lecturers

Status: Contract Negotiation
Estimated Completion Date: January 2018
LEED: Targeting Silver

Located adjacent to the Recreation & Wellness Center

Architect: RLF
Contractor: Chilled Water Infrastructure – Barton Malow; HVAC – hard bid
Project Cost: Chilled Water - $500K; HVAC and additional upgrades - $4.5M
Funding Source: University-funded – internal sources

Description:
The two projects will include:

- New chilled water extension to the NFH
- Sprinklers and life safety upgrades so that it can accommodate up to 2,500 occupants
- Additional restrooms
- Insulation
- Potential lighting upgrade (LED lights)

Status: Construction Documents
Estimated Completion Date: Striving to make as many improvements as possible by the August 7 target date
LEED: N/A

Located within the Brighthouse Networks Stadium and the CFE Arena

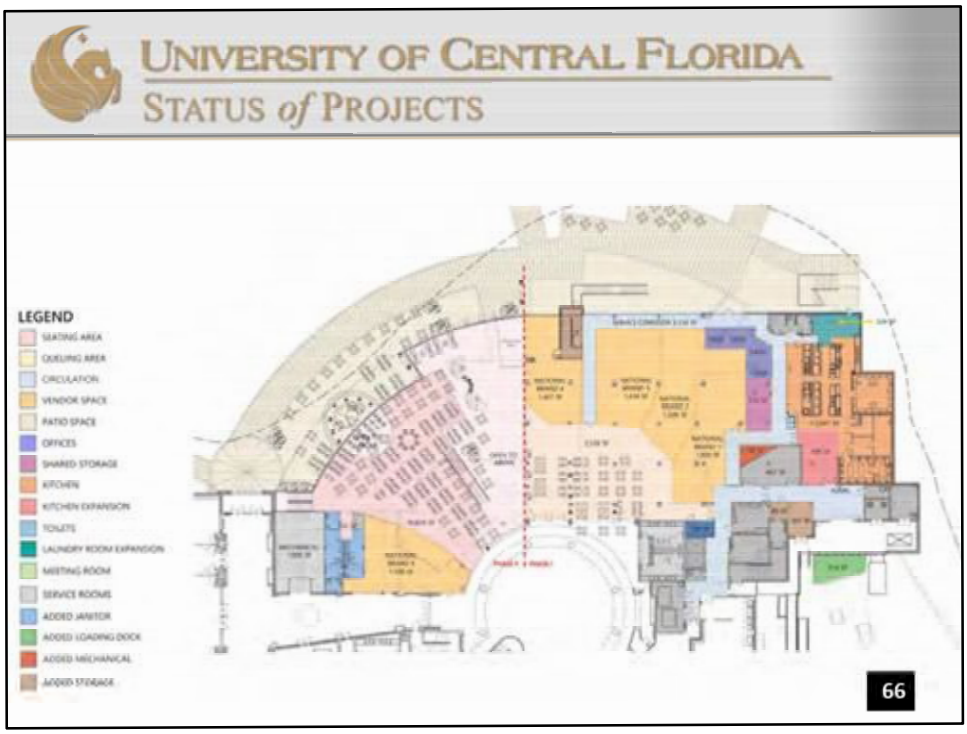
Video Board Installer: in negotiations with preferred vendor
Project Cost: $4-5M depending on final scope negotiation
Funding Source: exploring options

Description:
Project will include:

- New north end zone video and audio board
- New south end zone video board
- New controls equipment, as necessary
- Structural, electrical, and telecom upgrades as necessary

Status: ITN Negotiations in Progress
Estimated Completion Date: August 2016

Description:
Project will include:



- New suspended video board and audio systems
- New upper level ribbon video board
- New courtside video board tables
- New controls equipment, as necessary
- Structural, electrical, and telecom upgrades as necessary

Status: ITN Negotiations in Progress
Estimated Completion Date: October 2016

Expansion to the Student Union

Architect: TBD
Contractor: TBD
Project Cost: $14M
Funding Source: Aramark

GSF: TBD
Description:
Renovation and expansion of food court area of student union, in coordination with Aramark.

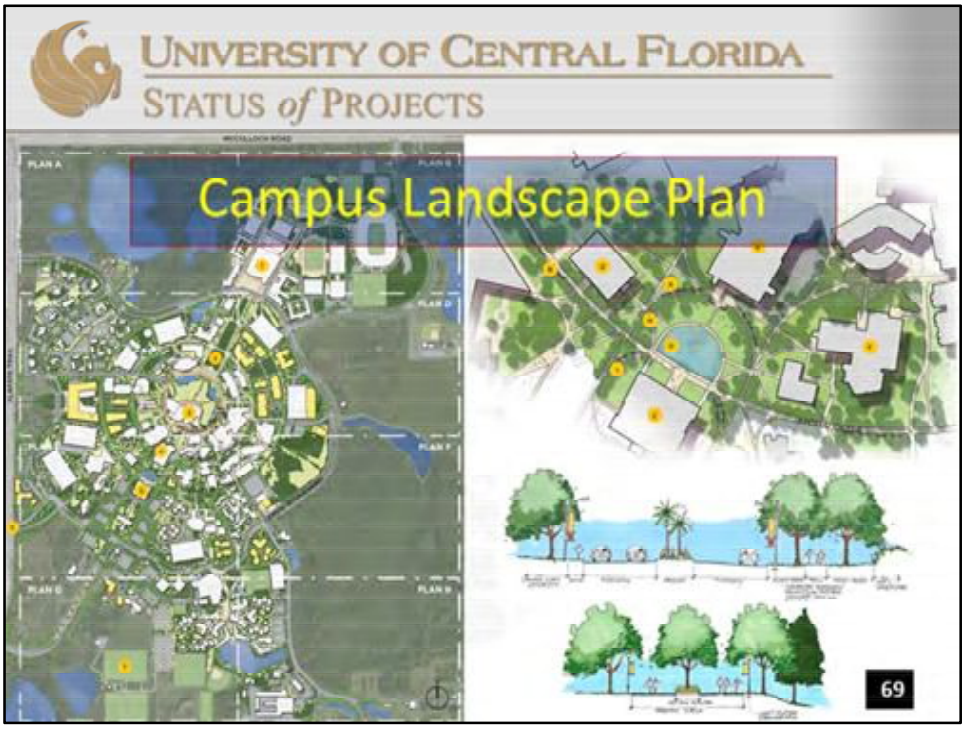
- New food concepts
- Expanded seating
- Foodservice back of house renovations

Aramark gets long-term contract.

Status: In the Selection process; Concept Design underway with a continuing service architect
Estimated Completion Date: TBD
LEED: N/A

Located in Research Park at the corner of Science Drive and Ingenuity Drive

Architect: TBD
Contractor: TBD
Project Cost: $8M received in 2014; $20M received in 2015; $14M received in 2016
Funding Source: PECO



GSF: 81,000 gsf, cost $13,898,216

Description:
DoD partners currently occupy approximately 200K s.f. in 3 leased facilities. Creates classified labs for both the Military and UCF

- Satisfies the demand from local MS&T employers for UCF students trained in advanced technologies
- Eliminates costly leases that could drive BRAC decisions
- Provides space in Research Park to support DOD presence and potential growth
- Avoids potential loss of strategic national programs and dollars to the region and to the state

Project will consist of force protection, civil/parking improvements, potential parking deck, interior build-out of building, and acquisition of additional space.

Status: Project currently advertised for AE/CM
Estimated Completion Date: TBD

Bellomo-Herbert and Carol R. Johnson Associates Landscape Architects are the project consultants who are developing a campus landscape plan.
The plan establishes standards and guidelines for how landscape and hardscape create a sense of place.
Final draft is under review.

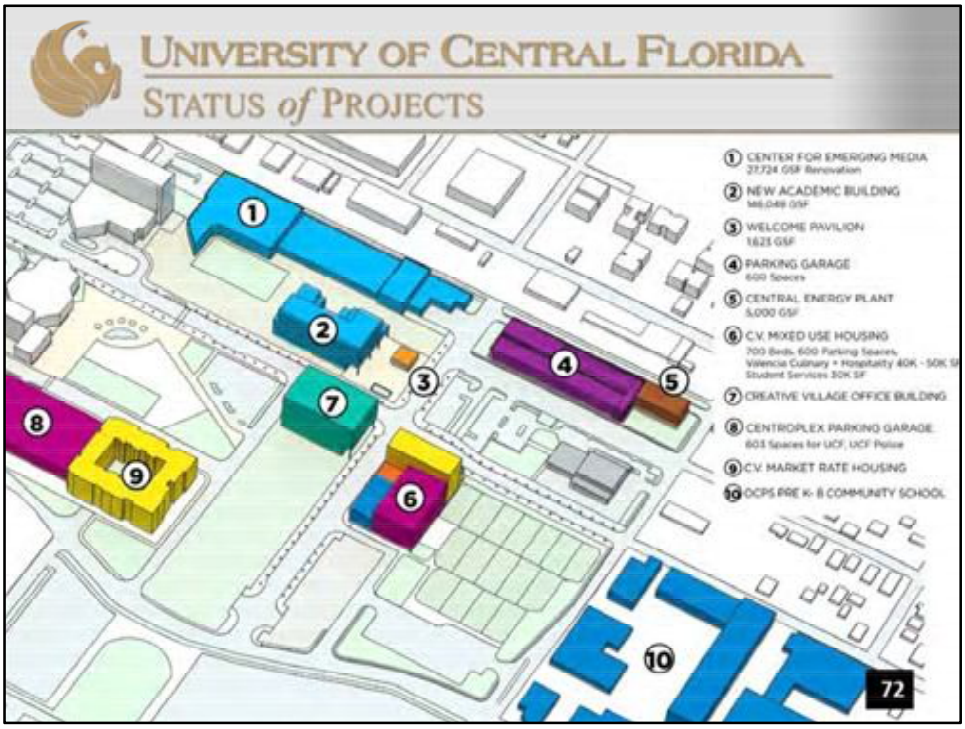
Some recommendations are moving forward, such as the sidewalk improvements at the welcome center.

Located in downtown Orlando as part of Creative Village

Academic Building – 165,000 gsf
Architect: TBD
Contractor: TBD
Project Cost: $60M
Funding Source: 1/3 PECO; 1/3 Donor funds; 1/3 University internal funds

CEM Renovation – 27,724 gsf
Project Cost: $5M
Funding Source: University – internal

Parking Garage for 600 spaces
Project Cost: $10M
Funding Source: Bonded



Tri-generation Plant – 5,000 gsf
Project Cost: TBD
Funding Source: Exploring options

Description:
UCF is a key education anchor of a 65-acre Creative Village to work, learn, and play

Full-service campus for UCF, comprising 15 acres:

- A high-energy campus focused on the digital arts and communications, healthcare administration and technology, and public service including legal studies.
- Further strengthens Orlando as a high tech digital media destination; the City's existing digital media companies already make up one of the top ten digital media clusters in the United States
- Embeds UCF into the Orlando community, as thousands of students will live and study in the district
- Enriches our successful partnership with Valencia College, as they will bring complimentary programs to the downtown site

Status: Proposals received Monday 4/25, under review by scoring committee. Shortlisted firms will be interviewed in June. Anticipate final AE/CM recommendation to President Hitt by June 17, 2016.
Estimated Completion Date: Asking AE/CM teams to determine feasibility of fast-tracking for Fall 2018 date
LEED: Targeting Gold

UCF programs include:

- COHPA: Legal Studies, Social Work, Health Management & Informatics,
- COHPA Centers: Center for Community Partnerships, Center for Public & Nonprofit Management, Center for Community Schools and Child welfare, Center for Law & Public Policy,
- Florida Center for Student with Unique Abilities
- Nicholson School of Communication: Human Communications, Masters in Communication
- College of Arts and Humanities: FIEA, CREATE, Flying Horse
- School of Visual Arts and Design: Digital Media
- Library, Student Support Services,

- Welcome Pavilion

Valencia College programs include:

- General Education
- Digital Media
- Health Information Technology
- Culinary & Hospitality

ITEM: FF-2

University of Central Florida
Board of Trustees

SUBJECT: 2018-19 Capital Outlay Budget

DATE: May 24, 2018

PROPOSED BOARD ACTION

Approve the university's 2018-19 capital outlay budget and authorize the president to make necessary adjustments to the 2018-19 capital outlay budget based on the final bill from the state.

BACKGROUND INFORMATION

Pursuant to Florida Statute 1013.61, each university's Board of Trustees must adopt an annual capital outlay budget that designates proposed expenditures by project. The attached University of Central Florida 2018-19 capital outlay budget reflects $0 for all but the Capital Improvement Trust Fund; maintenance, repair, renovation, and remodeling projects; and projects constructed or acquired with proceeds from non-state sources, including debt, categories.

As per the Finance and Facilities Committee charter, all new construction and renovation projects exceeding $2 million in construction costs, and all changes to projects that exceed $2 million in construction costs or that increase project costs by more than 10 percent of the original estimate presented to the committee will be brought before the committee for review.

Approval is sought for the attached budget along with authorization for the president to make changes to this budget when final numbers are received from the state.

Supporting documentation: Attachment A: 2018-19 Capital Outlay Budget

Prepared by: Lee Kernek, Associate Vice President for Administration and Finance

Submitted by: William F. Merck II, Vice President for Administration and Finance and Chief Financial Officer

Attachment A

2018-19 Capital Outlay Budget
Projects By Funding Source

Projects funded by Public Education Capital Outlay (PECO)	2018-19	Funded
Utilities, Infrastructure, Capital Renewal, and Roofs (P,C)	$ 14,000,000	$ -
Research Building I (P,C,E)	23,639,773	-
Engineering Building I Renovation (C,E)	17,745,473	-
College Of Nursing And Allied Health, Health Sciences Campus (P,C,E)	8,321,670	-
Mathematical Sciences Remodeling and Renovation (C,E)	11,970,963	-
Trevor Colbourn Hall and Colbourn Demolition (P,C,E)	38,000,000	-
John C. Hitt Library Phase II	2,411,142	-
Arts Complex Phase I (Performance) (P,C,E)	3,060,000	-
TOTAL	$ 119,149,021	$ -

Projects funded by donations and the Courtelis Facility Matching Grant Program	Cumulative 2018-19	
	Donations	Courtelis
Laboratory Instruction Building (P,C,E)	$ 15,372,777	$ -
Performing Arts Fund (E)	144,652	-
Career Services and Experiential Center (E)	196,950	-
Caracol in Belize (P,C,E)	350,000	-
Burnett Bio-Medical Science Center (C,E)	2,528,605	-
Arts Complex II Enhancement (P,C)	500,000	-
Medical School Library (P,C,E)	4,000,000	-
Morgridge National Reading Center (P,C)	2,297,170	-
Psychology (E)	86,540	-
Engineering III Enhancement (E)	2,394,463	-
Alumni Center and John and Martha Hitt Library (E)	7,349	-
Optics and Photonics Enhancement (E)	69,085	-
Physical Science Building (E)	1,162	-
TOTAL	$ 27,948,753	$ -

Maintenance, repair, renovation, and remodeling projects	2018-19	Funded
		$ 5,529,784

Minutes
Board of Trustees Meeting
University of Central Florida
September 15, 2016

Chairman Marcos Marchena called the meeting of the Board of Trustees to order at 1:00 p.m. in the *FAIRWINDS* Alumni Center on the UCF Orlando campus.

The following board members attended the meeting: Chairman Marcos Marchena, Vice Chair Robert Garvy, Ken Bradley, Clarence Brown, Christopher Clemente, Keith Koons, Alex Martins, Beverly Seay, David Walsh, and William Yeargin. Trustees Joseph Conte and Ray Gilley attended via teleconference.

WELCOME

Chairman Marchena reminded the board that the meeting was covered by the Florida Sunshine Law and that the public and press were invited to attend.

He welcomed the board members and called on Rick Schell, Associate Corporate Secretary, to call the roll. Schell determined that a quorum was present.

PUBLIC COMMENT

Christian Sepata, Speaker of the Senate, reported that due to hiring of new professors, various student organizations in the College of Engineering and the College of Sciences are being displaced. Sepata asked the board for assistance in finding new space. The board requested that Finance and Facilities research the matter and report back to the board.

Marchena called for approval of the July 28, 2016, and August 5, 2016, meeting minutes, which were approved.

Marchena called on President John C. Hitt for remarks and introductions.

REMARKS

Hitt announced that early fall student enrollment is 64,678, reflecting an increase of 2.6 percent from last fall. He stated that the projected average GPA and SAT two-score for incoming freshman class are at a record 4.02 and 1262, respectively.

Hitt reported that the academic credentials for freshmen at the Burnett Honors College are also all-time highs with an average GPA of 4.4 and an average SAT two-score of 1408.

Hitt announced that UCF is proud to welcome 77 freshman National Merit Scholars, the second-most in school history. He stated that the overall total of 289 National Merit Scholars is also a new school record.

He reported that early figures on UCF's minority enrollment suggest an all-time high of 45 percent, up from 44 percent last year and that Hispanic enrollment is at 23.8 percent.

He announced that the College of Medicine at Lake Nona welcomed 120 future doctors to reach its full capacity of 480 students for the first time.

Hitt stated that in the past two years, 200 net new faculty positions have been added and another 45 are expected to be added in 2017-18. Hitt commented that these new hires are primarily tenured and are tenure-track faculty members who represent disciplines in which UCF is experiencing high-enrollment growth, including areas of strategic emphasis in science, technology, and engineering.

He announced that the *Washington Monthly* magazine released its *2016 College Guide and Rankings*, with UCF surpassing all Florida schools on the list but the University of Florida. UCF ranked 32nd among public national universities.

Hitt provided an overview of several construction projects. Recently dedicated was the three-story Global UCF building that opened along Memory Mall. Hitt reported that this $16 million building includes 22 classrooms and is the new hub for international activity on campus. Hitt noted that the construction behind the John C. Hitt Library is for a new 8,000-square-foot building that will house an automated book retrieval system. The new building and other first-phase improvements should be completed next July. Hitt reported that work is underway on the Interdisciplinary Research and Incubator Building. When ready in the fall of 2017, this 99,000-square-foot facility will feature research labs, classrooms, and offices. The project's cost is $46.6 million.

In athletic news, Hitt commented that UCF is responding to the Big 12 athletic conference's inquiries for information.

INTRODUCTIONS

Hitt congratulated the following staff members for their exemplary work.

A. Employee of the Year

The USPS Employee of the Year was Lindell Jones, a teacher's assistant at the Creative School for Children for almost 18 years.

B. Employee of the Month

The USPS Employee of the Month for July was Elvis Wanamaker, an executive administrative assistant in Student Development and Enrollment Services for more than 20 years.

REPORTS

Marchena introduced Joel Hartman, Vice President for Information Technologies and Resources, Julie Hinkle, Assistant Professor of College of Nursing, and Thomas Cavanagh, Associate Vice President for Center for Distributed Learning, who gave a report on the following item.

- INFO-1 Adaptive Learning

Marchena introduced Grant Heston, Vice President for Communications and Marketing, and Tom Hope, Assistant Vice President for Strategic Initiatives, who gave a report on the following item.

- INFO-2 *U.S. News & World Report* University Rankings

ADVANCEMENT COMMITTEE REPORT

Clarence Brown, Chair of the Advancement Committee, reported the highlights from the committee meeting held earlier in the day.

- Michael Morsberger, Vice President for Alumni Relations and Development, and CEO, UCF Foundation, Inc., stated that William E. and Mary Jo Davis were among the original founders of the university who pledged their own resources to secure the land for UCF. He reported they have endowed several funds in support of scholarships with the most recent gift contributing to programs in recreation and wellness.

Brown presented the following item for board approval.

- ADV-1 Naming of the William E. and Mary Jo Davis Recreation Area at Lake Claire—A motion was made and unanimously passed by the board to approve naming the Lake Claire Recreation area the William E. and Mary Jo Davis Recreation Area at Lake Claire.

- Morsberger reported on campaign progress and the upcoming IGNITE gala.
- Julie Stroh, Senior Associate Vice President for Alumni Engagement and Annual Giving, gave a presentation on the IGNITE campaign roll-out.
- Dr. Dan Holsenbeck, Senior Vice President for University Relations, reported that the Board of Governors and the legislature are beginning the budget process and that Holsenbeck and his team have started scheduling their individual meetings with members of both bodies to discuss UCF's priorities.
- Grant Heston, Vice President for Communications and Marketing, reported that fundraising for WUCF had seen substantial growth. In comparison to the station's first fundraiser in August 2011 that raised $56,000, more than $300,000 was raised in the August 2016 fundraiser. The American Graduate program has selected WUCF as one of their featured partners to celebrate the champions who are keeping students on the path to graduation. Heston stated that Megan Nichols, an associate professor in the College of Education and Human Performance, will be featured on WUCF for her work in helping

kids with cancer succeed through the use of robotics in learning mathematics. Heston reported that following the first presidential debate on September 26, 2016, CNN has selected UCF to host a national, live, post-debate group of undecided voters. UCF is also partnering with Politico and WFTV, the local ABC affiliate, to host a state senate debate between Senator Marco Rubio and Representative Patrick Murphy. Both broadcasts will showcase UCF's campus.

AUDIT, OPERATIONS REVIEW, COMPLIANCE, AND ETHICS COMMITTEE REPORT

Beverly Seay, Chair of the Audit, Operations Review, Compliance, and Ethics Committee, reported the highlights of the committee meeting held on September 14, 2016.

- Robert Taft, Chief Audit Executive, provided an update on completed audit reports. Taft discussed work being performed by the recently hired senior IT auditor, a summary of investigation and management advisory services activity, along with upcoming department initiatives. Taft concluded his presentation with an update on recent Florida auditor general activity.
- Rhonda L. Bishop, Chief Compliance and Ethics Officer, provided a status update on the 2015-16 Work Plan and highlighted the development of the Integrity Star Newsletter. Bishop also provided an update on the 2016-17 Work Plan. Bishop provided an overview of the 2016 compliance and ethics culture survey distributed to all employees in March and April 2016. Bishop provided an update on the athletics department's compliance program and reported that the department is working on an initiative to interface the Jump Forward system with PeopleSoft.

COMPENSATION AND LABOR AD HOC COMMITTEE REPORT

John Sprouls, Chair of the Compensation and Labor Ad Hoc Committee, reported that the committee had reviewed the amendment to University Regulation UCF-3.0031, which was a technical amendment to the employee tuition waiver program.

Sprouls presented the following items for board approval.

- CL-1 Amendment to University Regulation UCF-3.0031 Employee Tuition Free Course Enrollment—A motion was made and unanimously passed by the board approving amendments to regulation UCF-3.0031.

EDUCATIONAL PROGRAMS COMMITTEE REPORT

Robert Garvy, Chair of the Educational Programs Committee, reported the highlights from the committee meeting held earlier in the day.

- Tonnette Harris, Assistant Director for Equal Opportunity and Affirmative Action Programs, reported on the 2016 Equity Accountability Program.
- A. Dale Whittaker, Provost and Executive Vice President, reported on tenure with hire.

- Whittaker presented the Provost's update, with Timothy Hawthorne, Assistant Professor in the College of Sciences, giving a presentation on Citizen Science Geographic Information Systems in Belize.
- Whittaker introduced Paula Kohler, new Executive Director for the Center for Students with Unique Abilities, who provided an update on faculty hiring.
- James Fenton, the Director of the UCF Florida Solar Energy Center, presented a summary of the 2015 seven-year external review of FSEC.
- Whittaker provided a State University System Annual Status Report on Market Tuition.
- Paige Borden, Assistant Associate Provost for Academic Program Quality and Associate Vice President for Institutional Knowledge Management, reported on the 2015-16 Academic Program Review results and provided a brief overview of the Academic Program Review process. Borden also reported on the Centers and Institutes Review results.
- Whittaker gave a presentation that showed that the majority of job growth since recovery from the recession of 2007-10 was concentrated among those having higher education degrees.

FINANCE AND FACILITIES COMMITTEE REPORT

Alex Martins, Chair of the Finance and Facilities Committee, reported highlights from the committee meeting held on August 17, 2016, and earlier in the day.

- William F. Merck II, Vice President for Administration and Finance and Chief Financial Officer, and John C. Pittman, Associate Vice President for Administration and Finance, Debt Management, reported on the Student Housing Project for UCF Downtown.
- Merck and Pittman discussed the plans to expand Nicholson Field House and add air conditioning.
- Pittman reported on the University and DSO Debt Report.
- Danny White, Vice President and Director of Athletics, and David Hanson, Executive Associate Athletic Director and Chief Operating Officer, reported on Athletics Facilities Funding and reviewed the current status of their facility projects.
- Greg Robinson, Director of Purchasing, gave a presentation regarding purchasing policies. Cristi Trask, Assistant Controller for Finance and Accounting, reported on the purchasing card program.
- Deborah German, Vice President for Medical Affairs and Dean of the College of Medicine, David Noel, Associate Vice President for Administration and Finance for the College of Medicine, and Steve Omli, Director of Finance and Accounting for the College of Medicine, presented the 2016-17 College of Medicine Faculty Practice Plan budget.
- German, Noel, and Omli reported on the 2016-17 College of Medicine Self-insurance Program budget.
- Merck, Scott Cole, General Counsel, and Jennifer Cerasa, Associate General Counsel, reported on a Memorandum of Understanding among the University of Central Florida, Ustler Development, Inc., and KUD International, LLC, for the Student Housing Project for UCF Downtown.

Martins presented the following items for board approval.

- FF-1 2016-17 College of Medicine Faculty Practice Plan Budget—A motion was made and unanimously passed by the board approving the 2016-17 College of Medicine Faculty Practice Plan Budget

- FF-2 2016-17 College of Medicine Self-insurance Program Budget—A motion was made and unanimously passed by the board approving 2016-17 College of Medicine Self-insurance Program Budget

- FF-3 Student Housing Project for UCF Downtown at the Creative Village—A motion was made and unanimously passed by the board approving the Memorandum of Understanding between the University of Central Florida, Ustler Development, Inc., and KUD International, LLC, for the development of the Student Housing Project for UCF Downtown at the Creative Village

For clarity, Marchena reiterated that: (1) the housing is not being built on UCF property; (2) UCF is not funding the construction of the housing, nor is UCF obligated to fund any short falls of the construction of the housing; and (3) UCF is leasing space in this facility for ancillary services, student services, and student housing management.

NOMINATING AND GOVERNANCE COMMITTEE REPORT

William Yeargin, Chair of the Nominating and Governance Committee, reported highlights from the committee meetings held on August 5, 2016, and September 7, 2016.

- Yeargin reported that the committee had reviewed the Board of Trustees bylaws, and a revision made the Compensation and Labor Committee-Ad Hoc Committee a permanent committee.
- He reported that the committee approved revisions to the Nominating and Governance Committee charter to more accurately reflect the roles and responsibilities of the committee.
- He stated that the committee met to discuss UCF's presidential selection process and reviewed the new Board of Governors regulations related to presidential selection. The committee requested that the chief counsel prepare a document that combines the UCF Presidential Selection Policy with the Board of Governors presidential selection policy.
- He stated that the committee reviewed the presidential leadership statement, which identifies criteria that UCF will look for in a new university president. Modifications will be made and presented to the full board.
- He indicated that the committee reviewed a new Board of Governors policy on naming buildings and facilities. The UCF policy will be aligned with the new Board of Governors policy.
- He advised that the committee reviewed the Direct Support Organizations process and Board Best Practices.

CONSENT AGENDA

A motion was made to accept the consent agenda, and members of the board unanimously approved the following actions.

- EP-1 2016 Equity Accountability Program—Approval of the 2016 Florida Equity Report
- EP-2 2016-17 Tenure with Hire—Approval of tenure with hire
- NG-1 Seventh Amended and Restated Bylaws of the University of Central Florida Board of Trustees—Approval of the Seventh Amended and Restated Bylaws
- NG-2 First Amended and Restated Nominating and Governance Committee Charter—Approval of the First Amended and Restated Nominating and Governance Committee Charter
- NG-3 Board Policy on Naming of Buildings and Facilities—Approval of the board policy title Naming of Buildings and Facilities

ANNOUNCEMENTS AND ADJOURNMENT

Marchena announced the following upcoming meetings.

Board of Governors meeting	September 21-22 (New College of Florida)
Diversity Breakfast	October 17 (Pegasus Ballroom, Student Union)
Board of Governors Facilities Committee and Budget and Finance Committee Workshops	October 18 (University of South Florida)
2016 Trustee Summit	November 2 (Florida Atlantic University)
Board of Governors meeting	November 2-3 (Florida Atlantic University)
Board of Trustees meeting	November 17 (*FAIRWINDS* Alumni Center)
Educational Programs Workshop	December 12 (Provost's Conference Room, Millican Hall)

Marchena asked that trustees coordinate arrangements to attend the 2016 Trustee Summit with Rick Schell.

Marchena adjourned the board meeting at 2:40 p.m.

Respectfully submitted: _____ Date: _____

John C. Hitt
Corporate Secretary

University of Central Florida

Board of Trustees
Finance and Facilities Committee Meeting
President's Boardroom, Millican Hall, 3rd floor
August 17, 2016

MINUTES

CALL TO ORDER

Trustee Alex Martins, chair of the Finance and Facilities Committee, called the meeting to order at 8:30 a.m. Committee members Christopher Clemente, Keith Koons, and David Walsh were present. Committee member Robert Garvy attended by teleconference. Chairman Marcos Marchena was present.

MINUTES APPROVAL

The minutes of the June 27, 2016, Finance and Facilities Committee meeting were approved as submitted.

NEW BUSINESS

2016-17 College of Medicine Faculty Practice Plan Budget (FFC-1)

Deborah German, Vice President for Medical Affairs and Dean of the College of Medicine, David Noel, Associate Vice President for Administration and Finance for the College of Medicine, and Steve Omli, Director of Finance and Accounting of the College of Medicine, presented the 2016-17 College of Medicine Faculty Practice Plan budget. The College of Medicine's Faculty Practice Plan, UCF-Health, operates a clinic on University Boulevard that provides multi-specialty care to the community, as well as a second location in the Gateway building at the Lake Nona Health Sciences Campus. The committee unanimously approved the 2016-17 Faculty Practice Plan budget as presented.

2016-17 College of Medicine Faculty Practice Plan Budget (FFC-2)

German, Noel, and Omli discussed the 2016-17 College of Medicine Self-insurance Program budget. The Self-insurance Program provides comprehensive professional and general liability protection in connection with the delivery of health care services in the College of Medicine, College of Nursing, College of Health and Public Affairs, UCF Health Services, and Counseling and Psychological Services. The committee unanimously approved the 2016-17 Self-insurance Program budget as presented.

Student Housing Project for UCF Downtown at the Creative Village (FFC-3)

William F. Merck II, Vice President for Administration and Finance and Chief Financial Officer, Scott Cole, Vice President and General Counsel, and Jennifer Cerasa, Associate General Counsel, requested approval of the Memorandum of Understanding between the University of Central Florida and Ustler Development, and KUD International, for the development of the Student Housing Project for UCF Downtown at the Creative Village.

The housing is not on UCF property, and UCF is not funding the construction of the housing nor obligated to fund any shortfalls of the construction of the housing. The only agreements contemplated are the stated affiliation agreement, a management agreement with UCF Housing to manage the facility for a fee, and a lease agreement at the rate of $17.25 per square foot for UCF's use of approximately 30,000 square feet in the building for student services. Trustee Walsh proposed a motion to remove from the MOU the provision stating the UCF Foundation will recognize the difference between the UCF rental rate for student services space and the market rate as an in-kind donation by the developer to the university, but the motion was not seconded. Chair Martins requested that the record show based on the board's previous significant concern with quality standards relative to the on-campus hotel that similar provisions find their way into the final development agreements.

The committee approved the MOU, with Chairman Marchena, Chair Martins, Vice Chair Garvy, Trustee Clemente, and Trustee Koons voting to approve. Trustee Walsh opposed.

Power Plant for the Downtown Campus (Tri-Generation Plant) Discussion
Merck and John Pittman, Associate Vice President for Administration and Finance, Debt Management, recommended that UCF enter into a state-approved performance-based contract with a company who will fund and build the UCF Downtown tri-generation plant. The cost of the plant is approximately $17 million.

UCF has asked for proposals from five companies that have the means to build a facility of this type. Once the official proposals are received, they will be brought back to the committee. The project will require Board of Trustees and Board of Governors approval.

The committee requested additional options for financing the plant: financing projections for using the performance-based contract, the costs of UCF financing the project directly via a loan or operating lease through an entity such as a bank, and the costs of purchasing electricity and chilled water directly from Orlando Utilities Commission. Once all this information is gathered, the costs of the various options will be brought back before the committee.

University and DSO Debt Report (INFO-1)
Pittman reported that the University and DSO Debt Report was provided as an information item.

Athletics Facilities Update Discussion
Danny White, Vice President and Director of Athletics, and David Hansen, Executive Associate Athletic Director and Chief Operating Officer, as a follow-up to their presentation to the committee in April, reviewed the current status of their facilities projects. The committee requested accounting history and payback details for the new audio visual equipment at Bright House Networks Stadium and the CFE Arena. They also requested a full list of Athletics' facilities projects, their cost, and their funding sources. This information will be presented at the September 15, 2016, Finance and Facilities Committee meeting.

Nicholson Fieldhouse Discussion
Merck and Pittman discussed plans to expand the use of the Nicholson Fieldhouse. Emails are being sent to departments and personnel on campus to gauge the level of non-athletic use of the facility. If enough interest is garnered, this idea will be brought back to the board for further discussion.

Purchasing Department and Purchasing Card Presentation (INFO-2)
Greg Robinson, Director of Purchasing, presented an overview of UCF's Purchasing Department and Purchasing policies. Cristy Trask, Assistant Controller for Finance and Accounting, discussed UCF's Purchasing Card program, its benefits to the university, and the rules and regulations pertaining to cardholder possession and use.

Chair Martins adjourned the Finance and Facilities Committee meeting at 10:55 a.m.

Respectfully submitted: William F. Merck II 9-27-16
William F. Merck II
Vice President for Administration and Finance
and Chief Financial Officer

DRAFT

CATEGORY DEFINITIONS

5% Statutory Reserve Requirement: in compliance with 1011.40(2), Florida Statutes, each institution shall provide a written notification to the Board of Governors if, at any time, the unencumbered balance in the education and general fund of the university board of trustees approved operating budget goes below 5 percent. As a result, each university reserves an amount equal to 5 percent of its unencumbered balance in the education and general fund.

University Board of Trustees Reserve Requirement: the amount of unrestricted funds set aside by the University Board of Trustees to address critical, unforeseen, or non-discretionary items that require immediate funding, such as unanticipated or uninsured catastrophic events, unforeseen contingencies, state budget shortfalls, or university revenue shortfalls.

Restricted by Appropriations: funds appropriated by the Legislature for a specific purpose as identified by law or through legislative work papers.

Compliance Program Enhancements: initiatives associated with being in compliance with federal law, state law, Board of Governors Regulations or any other entity with which the University must comply.

Audit Program Enhancements: initiatives associated with implementing audit programs of the institution.

Campus Security and Safety Enhancements: the support of campus security and/or safety issues, such as the recruitment of police officers, vehicles, equipment, and investments which promote security and safety at the institution. This issue may also include mental health counseling and services.

Student Services, Enrollment, and Retention Efforts: funds to promote student success through supporting student services programs, addressing enrollment, and assisting with retention efforts to support timely graduation.

Student Financial Aid: funds aimed to reduce student costs and provide the opportunity to obtain a degree in an affordable and timely fashion.

Faculty/Staff Instructional and Advising Support and Start Up Funding: funds identified to support instructional and advising activities, and/or start- up packages for new faculty. Start up packages are often expended over a multi-year period.

Faculty Research and Public Service Support and Start Up Funding: funds identified to support research and public service, and any associated start up funding - Start up packages are often expended over a multi-year period.

Library Resources: materials and database access required to support programs of study and research.

Infrastructure, Capital Renewal, Roofs, Renovation and Repair: funds to support the maintenance of university infrastructures. Such costs may include the following: preventive maintenance, replacement of parts, systems or components; and other activities needed to preserve or maintain the asset.

Utility Costs: the support of utility costs throughout the university.

Information Technology (ERP, Equipment, etc.): funds to improve operational productivity, educational improvements, and technological innovation, implementation and/or maintenance of ERP systems, and technological equipment purchases.

Subject: RE: Carry Forward Budget Information for the Board of Governors

The following items are attached:

- "2016-17 E&G Beg…" – The document submitted to the BOG last year.
- "2017-18 EG Beg…" – The document due to the BOG on Monday, August 21st. Marked DRAFT since it is being circulated.
- "SUS Carryforward History…" – Internal document.

Let me know if more information is needed.
As discussed, we are reporting faculty start up balances for filled positions as encumbrances in section C this year. Non-recurring funds held for planned hires (as well as other items) are included in Section F. The definition of encumbrances per another BOG-provided template is as follows: ***Encumbrances are defined as a reservation of fund balance for items related to unfilled contracts for goods or services which will require a disbursement of funds in a future accounting period.***

Christy and Megan;
As you know, I gave you back the paper copies of the documents that we discussed earlier. Would you please send an electronic copy of the document Dale requested, so that we can forward them to Chairman Marchena? Thank you!
Dania/Debbie—would you please schedule a 30 minute phone call with Chairman Marchena and Dale for tomorrow if possible? Once we get the electronic copies, we will need to send them to the Chairman from Dale's account.
Thanks!

2017-18 EG Beg Carryforward Comp_Draft for Dale.pdf

Dale,
Attached is a completed draft of the template provided by the BOG for reporting commitments against carry forward funds. The second page of this document contains the definitions of the categories provided. Note, the amounts in "Section E: Restricted/ Contractual Obligations" are expected to represent amounts tied to existing contracts. Everything else goes in "Section F: Committed" which may be viewed as more discretionary/ flexible by the BOG.
We can get into the detail of the amounts tomorrow – but this would be a good place to start to orient yourself, if time permits, before our meeting.
Thanks,
Christy

Subject: Commitments List for BOG

Dale,
We routinely submit a list of commitments against carry forward funds to the BOG with our annual operating budget submission. It is due on Monday, August 21st. I will send you a draft by the end of today, and Dania is helping me schedule some time to review it with you tomorrow (Thursday).
It looks like your only availability tomorrow is 10:45 – 11:30. I wasn't sure if you would prefer for Bill Merck to be present, but I've checked with his office and he is not available at that time. I can certainly meet with him separately after I meet with you unless you prefer to handle it differently – just let me know or we can discuss further when we meet.
Thank you,

V. OTHER BUSINESS	Chair Martins
VI. CLOSING COMMENTS	Chair Martins

ITEM: INFO-3

University of Central Florida
Board of Trustees
Finance and Facilities Committee

SUBJECT: Power Plant for Downtown Campus

DATE: October 12, 2016

FOR COMMITTEE REVIEW

For information only.

BACKGROUND INFORMATION

UCF Downtown requires the construction of new utilities. A study commissioned with an engineering consultant revealed that a proposed Tri-generation Facility is technically feasible and also economically viable once the second academic building is constructed. Auxiliary cash balances will fund the construction of the facilities and purchase of the equipment, and the balances will be replenished with funds from the energy savings. By year 16, the energy savings will have paid for the construction and purchase of the assets, and excess savings can be used in other areas of the university.

In addition to providing utilities for UCF Downtown, the proposed plant will provide a learning laboratory for the College of Engineering's educational program, as well as a platform for current and future sponsored research opportunities.

The UCF Downtown Tri-generation Facility fulfills the UCF Collective Impact Strategic Plan's call to innovate academic, operational, and financial models to transform higher education through alternative financing, cost avoidance, and sustainability through greenhouse gas emission reductions.

The Tri-generation Facility was reflected in the 2017-18 Capital Improvement Plan, which was approved by the Board of Trustees on July 28, 2016.

October 12, 2016 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
1:03:37 - 1:13:47	
MARTINS	Uh, we'll move on to information item number three, uh, the continuation of our discussion on the power plant for the downtown campus. John Pittman and Lee Kernek.
MERCK	Um …
KERNEK	[*inaudible*]
MERCK	OK, go ahead, Lee. We've got three of us wanna talk about it. Uh, 'cause we're both, all three kinda excited about it.
MULTIPLE SPEAKERS	[*simultaneous speaking*]
KERNEK	…[*simultaneous speaking*] and I also brought Curt Wade with me, um, because Curt is our Director of Utilities & Energy Services.
MERCK	So this…
KERNEK	… [*simultaneous speaking*] so we have really technical questions and we have Curt here [*laugh*s].
MERCK	I was gonna say after we finish talking, Curt can tell you the actual [*laughter*] facts of the case.
KERNEK	[*background cough*] [*inaudible*] …after Dave Norvell spoke with the trustees, um, ya'll had several questions for us. We did commission a study with EXP Engineering to look at our options and, uh, what they did eventually,they looked at are building, uh, utility demands, they looked at the load profile, they looked at life cycle cost analysis, and the life cycle cost analysis includes construction costs, maintenance costs, replacement costs, um, and it extended for the life cycle. They look at it 15 years past Phase Four. Um, so, uh, we also looked at the utility costs. But it pulls all of that together. They also, um, in a different light, looked at buying, um, our [*inaudible*] to support our needs, uh, the use of an energy services company to support the needs, which is what Dave was, was strongly leaning toward at the time. Uh, we looked at operating leases and we looked at self-financing. We had financing questions. John can talk about that, but it, it, it determined that…and we also looked at whether we should do chiller plant only, because there is no, uh, possibility of, of, of, uh, procuring that without somebody having to build that. So chiller plant only, we looked at DX units, and we looked at this tri-generation, which gives us electrical power, um, chilled water, and hot water. And in, in, in doing that full analysis, what we determined that it, uh, the best option, uh, at least after Phase Two, is the self-financing option. Going with the entire tri-generation, um, plant, and what it will do for us is, after Phase Two, we start showing savings. So when we start reaping the savings, over what would it cost us to purchase the utilities, um, then we'll start, uh, again have a payback after about 16 years, payback on the, on doing the tri-generation plant, and after that, then any funds will go back in to the University to be other funds for the University. And the other real, um, highlight to, to going with this method, is

October 12, 2016 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	that it gives us the ability to, um, set up a learning laboratory in the facility for the College of Engineering, and I know Dave has been working with, um, Dr. Georgiopoulos's team about the possibility of that learning lab and what that can do for, um, the learning of our, of our students, and, and, and researchers within the University. So, that's kinda the, the easy part of this. When you have questions on the technical nature or financing, and [*inaudible*] may have questions on the technical nature [*inaudible*].
MERCK	Uh, I'll just add one thing. I think what Lee said I agree with totally. Um...just to r-, reinforce the...when you build just the first building, it's not the most optimal solution, just with the one building. But we expect to be downtown for decades and decades and decades. And so there will be more than one building eventually, and that's when the savings start to kick in. And in the meantime, though, regardless, it allows us to use chilled water for our air conditioning needs, as opposed to DX units, which are kind of messy and noisy and have other problems associated with them. [*simultaneous speaking*]
KERNEK	It's very difficult to, to operate and maintain those DX units on those kinda large facilities, and, and it really ends up not being a good, uh, cost effective life cycle by doing that as well.
MERCK	So, our recommendation is certainly to do, um, self-, self-financed [*background clears throat*], um, project on our own.
KERNEK	And this facility was on your, um, capital improvement [*background cough*] [*inaudible*] plan that the trustees approved, um, to go forward to the Board of Governors.
MARTINS	Questions from the Committee?
WALSH	So, with this, uh, with this program, what percentage of the downtown campus would be self-generated [*inaudible*]?
KERNEK	All of it.
MULTIPLE SPEAKERS	[*simultaneous speaking*]
MERCK	All of our 15 acres, yeah.
KERNEK	[*simultaneous speaking*]...will be, and so, wh-, wh-, ready to do this in the smartest way was to build it, um, in phases. As we're building the campus in phases, we're building the capacity in phases as well. So again, there's, there's an initial cost, and you would have to have all the foundation and the basics, but you can add the, the, the ability to, to generate more power as you build up your campus.
WALSH	So the study will, will also OUC cost prior to this [*inaudible*].
KERNEK	Hmm-mm. It did.
WALSH	On payback in 16 years. When we did a project here years ago, I thought it was perhaps six years …
KERNEK	We had …
WALSH	… we started it. What, what's changed between the two?
KERNEK	Well, we do have tri-generation plan as opposed to co-generation.
WALSH	Hm-mmm.
KERNEK	And we're also starting from scratch. Um, and we're going to have some mitigation to do becauseof some environmental, um,

October 12, 2016 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	groundwater issues on the, on the site in some of those things. So we looked at all of those kinds of things when looking at what is the cost and how we get there.
MERCK	And, out last, uh, maybe Curt can, uh, back me up on this. But I think, too, when we did the one on campus we had a full load for the hundred percent of the plant we built. Where, as when we go downtown, the 16 years is partly drug out because we'll have lower, s-, s-, le-, less demand with the first building, and then the, as the demand increases as we add on over the years to come, that's when it starts to become even more economical in this and the savings really kick in. Is that fair?
WADE	That's fair. Um, there again I could also point out too is the facility we had talked about, so having standalone localized air conditioning versus a district system, if the unit fails, we have and plus-one, so that, you can maintain continuity in our operations, whereas you might be out for a period of time with, with standalone one.
MARTINS	Trustee Koons.
KOONS	Uh, uh, two questions. One is that a new power plant would potentially supply the, the new building as planned. But we have an existing building there. Would the power plant be able to supply the existing building? And then the second question is, if we're building a power plant for the eventual demand of additional buildings, and we have capacity that we don't need, can we sell off some of that power, and, and gain some, uh, income from it?
MERCK	There, there's some multiple answers there. Can I start [*background clears throat*] and then you can, and Curt and then, Lee, you correct me when I get off target here. But the CEM building right now has, has its own power taken care of, but its's aging and it needs to be replaced at some point [*background cough*]. So when we reach the point that financially, we decide to take that on and pick it up under the new plant, we can then take the new plant and cover those needs. It won't happen initially, because of just first cost on doing that, but it can, yes. Um, and then we will grow it to whatever extent we need going forward. Um, as far as selling things, we can't sell, because of the utility commissions, we can't sell electricity, but we could sell chilled water.
KERNEK	Chilled and hot water. And we, we did look at that in the study as well. That is feasible for us to do, and we start-, started some discussion about, um, the others within the Creative Village you [*inaudible*] have.
MERCK	So, no, no, no sale of electricity, but the possibility is there for the other.
KERNEK	It, it, it the electricity is regulated, so you can't...
MARTINS	Other questions from the committee?
WALSH	Did we evaluate also third-party ownership, the companies that invest and own these type facilities?
MERCK	Yes.

October 12, 2016 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
WALSH	Selling…[*inaudible*]
KERNEK	We did. Um, that's something we originally went into this thinking that might be the best option, and um, as we explored it, that's not the best option for us financially, and we do have those financial notes Jonathan can talk about those.
WALSH	So you did this report…[*inaudible*]
PITTMAN	Yes, we interviewed four companies, uh, of about that possibility. Three of the four companies said we would still need to get our own external financing, so you got, not only the companies' kind of profit in there, but we got a financing cost on top of that, to get this, this facility built. Um, so, when we add those costs up, we have to pay back. This one's longer than 16 years if we financed it ourself.
KERNEK	So, after we, we did that evaluation, we did [*background cough*], um, go ahead and put it out, based on, today we had, we, we got a little of a head start 'cause we know we're not required to act on them, but, uh, we did put it out as an advertisement, we put out an, uh, RFP for companies to come in, um, as a design build, to build this. Those originally were due back the 13th. Because of Hurricane Matthew, we, um, have put that off 'til the 17th. We've notified everyone through our website. And Florida [*inaudible*] we're giving 'em until the 17th.
WALSH	The alternative would be if, if didn't do this, OUC would supply everything someone would supply.
MERCK	No, not the chilled water.
UNIDENTIFIED SPEAKER	Not the chilled water.
MERCK	And that was a really important component to us.
KERNEK	Right. And in looking at, at building that chilled water by itself, cost was just astronomical. We didn't, we really didn't have the payback at all.
MARTINS	Any other questions? And then this is an item that once we have the financing plan in place, we'll come back to the Committee? Is that, is that...?
MERCK	It's up to you.
KERNEK	Up to you.
PITTMAN	The financing plan is for the University to self-fund, uh, the construction of the assets.
MERCK	Yeah, and typically we don't come back for those kind of things…
UNIDENTIFIED SPEAKER	Yeah.
MERCK	… if the project's approved, and um, we've identified the source of funding, which is OK with you, then we just usually go ahead. What we can do, we can come back just as an information item?
MARTINS	Yeah, let's do that.
MERCK	That's [*simultaneous speaking*]. And that way [*background clears throat*] we don't hold up anything if we need to…
MARTINS	Yeah, let's, let's do that…[*simultaneous speaking*]
MERCK	…award a contract.
MARTINS	… just bring it back just as an information item just to…
MERCK	Great.

October 12, 2016 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
MARTINS	…close the loop.
MERCK	OK.
WALSH	Chair, I'd suggest part of that…the, the payback is...slow.
MERCK	Right.
WALSH	It, it's a great concept, and a great project, but the payback is slow. And part of that could also be what assumptions that could be extremely conservative in the estimates to make it better.
MERCK	Yes.
WALSH	To make more, be more compelling for that [*inaudible*], review.
MERCK	Right, right. And it also depends to some extent on how quickly, um, the 15 acres that we have get built out.
UNIDENTIFIED SPEAKER	Yeah.
MERCK	If, if the, if our assumption's there, i-, if it builds out then, then the payback shortens dramatically.
WALSH	Yeah. And the model put a lot of assumptions and some of them might be… [*simultaneous speaking*].
KERNEK	We were…
WALSH	…pretty conservative.
KERNEK	…pretty conservative in doing this, but [*simultaneously speaking*], I'm sure that we were…
WALSH	There might be a [*inaudible*] [*simultaneous speaking*] one being the best case and one be and the worst case.
MERCK	Right.
WALSH	…might be better than 16 years [*inaudible*].
MERCK	I actually think it will be better, but …
KERNEK	And we do have some unknowns, as I say we have the groundwater concerns and stuff, and so we budgeted, um, uh, monies to take care of that, knowing there's going to be some mitigations. The City will be required to do some of it, but there's still going to be some things that we have to do in construction to cover [*inaudible*].
MERCK	And that's built into this model.
KERNEK	Hmm-mm.
MARTINS	Are there any other questions? OK, great. Thank you very much.

Christy/Meghan,

FYI we do not have budget specifically set aside for this in the auxiliary reserve. The funding is coming from Mr. Merck's auxiliary department, correct? There may be other items planned for in the reserve that will not happen and we can use that budget, or we may need to do a budget override for the cash transfer(s). I'm not sure if the full $12.2m cash will be needed this fiscal year.

Donna

Importance: High

Hi Christy,

Are we able to move forward with the creation of this project budget? The contract has been put in place and the designers will be invoicing soon.

Thanks,
Lashanda

Hi LaShanda,

Attached is the conceptual budget for the referenced project above. We would like to request a budget of $1,481,638 for the planning portion as per budget attached. This is a design build project which the contract has not been executed as of this date. Also, we have a proposal attached from Hanson for the basic scope of services for commissioning in the amount of $53,390 which is found on page 8 (Exhibit A).

Thanks!

Note: Due to limited use of the phone, please contact me by email or Skype (IM).

Subject: Power Plant for Downtown
Importance: High

Lee - I'm trying to understand the difference between the attached $15.1 million budget for the downtown tri-gen facility and the $10.3 million phase 1 cost presented on the attached payback schedule.

Does the $15.1 million include a portion of the capacity planned for the future phases of this project, or did the estimated cost of phase 1 increase from $10.3 million to $15.1 million?

We need to understand this so we can plan properly for the timing of funding transfers to the project. If the amounts have changed then John will need to update the payback schedule for the internal loan and we are now required to update the board.

Please advise….

May 18, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
39:01 - 47:40	
MARTINS	Now we'll move to the fiscal '17-'18 Capital Outlay Budget and we'll turn to Lee Kernek. Good morning, Lee.
KERNEK	Thank you. So every year we come to you at this time of year. The budget that you see before you has been, it's, it's prepared annually before the session has ended, uh, based on what the Board of Governors', uh, staff gives us, um, and then we revise the numbers as the, um, prior to the FFC when the numbers are available from the session, with the actual numbers that are subject only to veto. If you look at the budget in front of you, what you'll see, um, in the first session, section, is the, uh, PECO outlay. Based on the final conference budget, um, UCF received no PECO funds for this year. The same is true for Courtelis Matching Funds. So the Courtelis Fund actually went away a few years ago, and there was an attempt to bring it back during this session, but no funds were awarded this year. The third section is Maintenance Repair Renovation and Remodeling Projects. The State asked for-, the Board of Governors asked the Legislature for $45,562,000. Of that amount, UCF will receive $3.85, um, million. That's based on a State formula that takes into consideration age of buildings and square footage only, so it doesn't take into consideration, um, the numbers of students or the use of the facilities. The next section is the Capital Improvement Trust Fund. This is a return of, uh, funds that are derived from student activity fees. And it's legislatively mandated that those projects, um, have a benefit to students. The students do participate in what those projects are. Um, this year, so the return this year to us, we expected that first $6.85, uh, million that you see there, that will help us finish off the Phase One up at John C. Hitt Library, um, changes. The Phra-, Phase One includes the building and the, uh, automated retrieval system that's in there. Phase Two is the Connector Building, and we did receive, uh, a million-seven toward the Phase Two, so we're in design with that piece of the, of the, the phase right now. That is also a return this year for the State of about $45 million dollars. So that's our, uh, portion of that. The next section is, um, is buildings that we say can be other State sources. All of these are reflected in our Capital Improvement Plan to notice the Board of Governors that we'll be doing those. So those are f- in, those are internally funded, the ones that you see before you. So there, this is not from the Legislative Budget Request, but these have been noticed to the State. The final, um, section on that page, um, is projects that can include anything to be funded, um, by a DSO, by debt, or by bonds. And so you see a fairly large list here. This list is not even a wish list. It's a, what we call a just-in-case list. Because if we don't put it somewhere on that Capital Improvement Plan and funds become available to us,

May 18, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	or we have an opportunity, we can't move unless the State has been noticed, so that's why we have them there. The first two, um, were, were projects that we noticed to them or had prior approval, and the other three that you see where, where funds are allocated, it doesn't mean that we really have funding, it means that the State has said we could, we could do those in this year, if we, um, had the, the, the ability to go out and do them. And the funds have to stay on this list until, um, we actually build something. So even if we, if we don't build, um, say the Wayne Densch Sports Center expansion this year, we would have to put it back on the list the following year. So, it stays until they approve it. On the second page, what you see is our request, um, and it shows 2017-18, but we continue to put these items on the, the Plant Operations and Maintenance list until such time as funding is received. In years past, we received funding every year for Plant Operations and Maintenance. The first year that we did not receive funding was for the '15-'16, um, school year, so that includes the Florida Advance Manufacturing Research Facility all the way down through the John C. Hitt Library Expansion Phase One. For '16-'17, the funds that were not received, um, are the BTW-, BPW Building, all the way through the Arts Complex II Performance Building, and for '17-'18, um, it starts with the Trevor Colbourn Hall and is the rest of the list. So you see, um, the $8.36 million is, um, that's an annual amount that we should receive, and of course those first couple of years have already been not received for those, for those years. I have modified the request to you, um, a little bit based on, um, last year's approval terms, because as I was preparing last night I noticed that there were, there was a change last year, so I'm actually modifying the request to you, so that it will say "Approve the University's 2017-18 Capital Outlay Budget and authorized the President to make necessary adjustments to the 2017-18 Capital Outlay Budget for any line item two million dollars or less. Any budget change where the overall line item value is greater than two million will be brought to the Board of Trustees for approval if the adjustment to such a line item is more than ten percent." And that's in accordance with the minutes from last year. So that is our request.
MARTINS	OK. Before we take questions, can we have a motion, uh, to approve the '17-'18 Capital Outlay Budget with the amendment that, um, Lee has added verbally.
UNIDENTIFIED SPEAKER	So moved.
MARTINS	A motion.
UNIDENTIFIED SPEAKER	Second.

May 18, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
MARTINS	And a second. Questions from the committee?
MARCHENA	I have a question …
UNIDENTIFIED SPEAKER	Chairman Marchena.
MARCHENA	… um, in the, uh, the, the PECO list, I assume that's in order of priority?
KERNEK	It is in our order of priority from our Capital Improvement Plan, yes sir.
MARCHENA	Is it possible that we didn't get any PECO funds because the first line item is just not very sexy?
KERNEK	Actually, that is, has been our first line item for years and that used to be the fun-, the, the, the amount that was funded every year because that's how you take care of what you already have. So generally, the Legislature likes that, that you put that unsexy line item up front.
MULTIPLE SPEAKERS	[*laughter*]
MARTINS	Is that how you liked it noted for the record, Mr. Chairman?
MULTIPLE SPEAKERS	[*loud laughter*]
MARCHENA	[*clears throat*] Um, no, I appreciate your, um, your comment on clarifying the committee action. As you know, we've been talking about clarifying the delegation of authority. I just want to make sure that everybody understands that as we make those changes, those changes will apply to whatever approval we give here today.
MARTINS	Thank you Mr. Chairman. Other questions from the committee?
UNIDENTIFIED SPEAKER	Got a question. So this negative trend in PO&M, which is obviously very concerning, is it also seen at other institutions in the State?
UNIDENTIFIED SPEAKER	Yes.
KERNEK	Throughout.
MARTINS	Major issue.
GARVY	Been a pet peeve of mine for a number of years, and continues to be one because it is, uh, rapidly moving towards a state of, of disarray.
UNIDENTIFIED SPEAKER	[*simultaneous speaking / inaudible*]
GARVY	I mean, we are, i-, the, I don't, just don't understand how the Board of Governors can not respond to the deterioration that is inevitable if we don't maintain these properties. And every year, I mean, it just i-, it, zeroes come up here.
KERNEK	Yeah.
GARVY	It's ridiculous.
KERNEK	We're currently facing [*simultaneous speaking / inaudible*].
GARVY	I mean we will face a crisis if this is not addressed.
HITT	I think to be fair, the Board of Governors' members would agree with you.
UNIDENTIFIED SPEAKER	Yes.
GARVY	Well, that's right. I should, …
UNIDENTIFIED SPEAKER	[*simultaneous speaking / inaudible*]

May 18, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
GARVY	… I shouldn't put it on them. I'm sorry. I, I, y-, should restate that. The Legislature is, is, is not fulfilling its obligation to higher education in the State when they refuse to fund proper maintenance of the facilities in which we've invested so much, in which these, uh, uh, students and the administration, the faculty depend upon, to deliver, uh, the product that the Legislature wants us to produce.
HITT	And this, this is a state …
GARVY	It's outrageous.
HITT	… that used to be exemplary in that regard.
GARVY	Right.
MARTINS	Other questions or comments? Hearing none, all those in favor of, uh, approving the '17-'18 Capital Outlay Budget, uh, with noted amendment, please signify by saying "Aye."
MULTIPLE SPEAKERS	Aye.
MARTINS	Any opposed, like sign? Motion carries. Thank you.

	Crohn's & Colitis Research	$ -	$ 315,070	
		$ 6,027,291	$ 315,070	$ 4,157,242

5% Statutory Reserve Requirement: in compliance with 1011.40(2), Florida Statutes, each institution shall provide a written notification to the Board of Governors if, at any time, the unencumbered balance in the education and general fund of the university board of trustees approved operating budget goes below 5 percent. As a result, each university reserves an amount equal to 5 percent of its unencumbered balance in the education and general fund.

University Board of Trustees Reserve Requirement: the amount of unrestricted funds set aside by the University Board of Trustees to address critical, unforeseen, or non-discretionary items that require immediate funding, such as unanticipated or uninsured catastrophic events, unforeseen contingencies, state budget shortfalls, or university revenue shortfalls.

Restricted by Appropriations: funds appropriated by the Legislature for a specific purpose as identified by law or through legislative work papers.

Compliance Program Enhancements: initiatives associated with being in compliance with federal law, state law, Board of Governors Regulations or any other entity with which the University must comply.

Audit Program Enhancements: initiatives associated with implementing audit programs of the institution.

Campus Security and Safety Enhancements: the support of campus security and/or safety issues, such as the recruitment of police officers, vehicles, equipment, and investments which promote security and safety at the institution. This issue may also include mental health counseling and services.

Student Services, Enrollment, and Retention Efforts: funds to promote student success through supporting student services programs, addressing enrollment, and assisting with retention efforts to support timely graduation.

Student Financial Aid: funds aimed to reduce student costs and provide the opportunity to obtain a degree in an affordable and timely fashion.

Faculty/Staff Instructional and Advising Support and Start Up Funding: funds identified to support instructional and advising activities, and/or start- up packages for new faculty. Start up packages are often expended over a multi-year period.

Faculty Research and Public Service Support and Start Up Funding: funds identified to support research and public service, and any associated start up funding. Start up packages are often expended over a multi-year period.

Library Resources: materials and database access required to support programs of study and research.

Infrastructure, Capital Renewal, Roofs, Renovation and Repair: funds to support the maintenance of university infrastructures. Such costs may include the following: preventive maintenance, replacement of parts, systems or components; and other activities needed to preserve or maintain the asset.

Utility Costs: the support of utility costs throughout the university.

Information Technology (ERP, Equipment, etc.): funds to improve operational productivity, educational improvements, and technological innovation, implementation and/or maintenance of ERP systems, and technological equipment purchases.

UNIVERSITY OF CENTRAL FLORIDA

Board of Trustees
Finance and Facilities Committee Meeting
President's Boardroom, Millican Hall, 3rd floor
September 26, 2017

MINUTES

CALL TO ORDER

Trustee Alex Martins, chair of the Finance and Facilities Committee, called the meeting to order at 8:30 a.m. Committee members William Self and David Walsh were present. Committee members Robert Garvy, Nick Larkins, and Bill Yeargin attended by teleconference. Trustee John Lord attended by teleconference.

NEW BUSINESS

Lease Agreement between Ustler Development, Inc., and Development Ventures Group, Inc., and University of Central Florida Board of Trustees (FFC-1)

William F. Merck II, Vice President for Administration and Finance and Chief Financial Officer, Thad Seymour, Vice Provost for UCF Downtown, and Jennifer Cerasa, Associate General Counsel, presented for approval the lease agreement for the UCF Downtown Campus (Creative Village) located on West Livingston Street in Orlando. The agreement involves the lease of approximately 45,000 to 48,000 square feet of academic support space in the Creative Village by UCF, as tenant, from Ustler Development, Inc., and Development Ventures Group, Inc., as landlord. The academic support space will be in the same building as the privately developed student housing that will be managed by UCF Housing. The lease agreement contains a base rent of $17.25 per square foot for 20 years. The committee unanimously approved the lease as presented.

WUCF TV Channel Sharing Agreement (FFC-2)

Grant J. Heston, Vice President for Communications and Marketing, requested approval of a 30-year channel-sharing agreement between WUCF TV and Good Life Broadcasting, Inc. The contract is a lease agreement for a portion of WUCF TV's broadcast spectrum. The new channel will air under its own name and brand and will not contain any reference to UCF or WUCF TV. More than half of the WUCF TV spectrum will still be available for use, and WUCF TV's ability to participate in a future broadcast spectrum auction also is preserved, should one occur.

WUCF TV will receive $4.25 million for the agreement, payable within the first six months. Additionally, Good Life Broadcasting, Inc., will pay 25 percent of its annual broadcast operating costs to WUCF TV for the life of the agreement, a conservatively estimated commitment of more than $1 million. If the UCF Board of Trustees approves the agreement, it is also subject to

approval by the Federal Communications Commission. The committee unanimously approved the agreement as presented.

Chair Martins adjourned the Finance and Facilities Committee meeting at 8:55 a.m.

Respectfully submitted: William F. Merck II 10.4.19

William F. Merck II
Vice President for Administration and Finance
and Chief Financial Officer

Date

Minutes
Board of Trustees Teleconference Meeting
University of Central Florida
September 27, 2017

Chairman Marcos Marchena called the teleconference meeting of the Board of Trustees to order at 8:33 a.m.

The following board members attended the meeting via teleconference: Chairman Marcos Marchena, Vice Chair Robert Garvy, Trustees Clarence Brown, Joseph Conte, John Lord, Alex Martins, Beverly Seay, William Self, John Sprouls, David Walsh, and William Yeargin.

WELCOME

Marchena welcomed the board members and called on Rick Schell, Associate Corporate Secretary, to call the roll. Schell determined that a quorum was present.

Marchena called on Nancy Myers, Director, Office of Institutional Equity, who presented the following item for board approval.

BOT-1 Florida Equity Report–A motion was unanimously passed approving the report.

Marchena called on William F. Merck II, Vice President for Administration and Finance and CFO, who presented the following items for board approval.

FF-1 Lease Agreement between Ustler Development, Inc., and Development Ventures Group, Inc., and University of Central Florida Board of Trustees–A motion was unanimously passed approving the lease agreement.

FF-2 Mental Health Counseling and Public Safety Officers Implementation Plan–A motion was unanimously passed approving the implementation plan.

Marchena called on Grant Heston, Vice President for Communications and Marketing, who presented the following item for board approval.

FF-3 WUCF TV Channel Sharing Agreement–A motion was unanimously passed approving the agreement.

Marchena called on John Sprouls, Chair of the Compensation and Labor Committee, who presented the following item for board approval.

CL-1 Article 3: Management Rights; Article 13: Work Day, Work Period, and Committee Overtime; Article 20: Probationary Periods and Promotions; Article 28: No Smoking Policy; and Article 29: Wages of the Collective Bargaining

Agreement with the Central Florida Police Benevolent Association–A motion was unanimously passed approving all of the articles.

NEW BUSINESS

Marchena called on John C. Hitt, President, who presented the following item for board approval. Marchena recommended that the item be adopted for the current semester, the next semester, and then revisit the item in the future.

BOT-2 In-State Tuition Eligibility–A motion was unanimously passed approving the In-State Tuition Eligibility.

ADJOURNMENT

Marchena adjourned the board meeting at 9:22 a.m.

Respectfully submitted: _____ Date: _____

John C. Hitt
Corporate Secretary

>
> As follow up to our discussion this morning I've worked through the "homework" I left with:
>
> 1. Attached are the talking points I used at the September 27, 2017 meeting regarding the Ustler/UnionWest lease. It includes information on the projected buildout cost. I have not listened to the recording of the meeting, but Mike Kilbride told me that he had and that it includes that discussion. I assume you have access to those recordings if you need to review them.
>
> 2. I looked through emails to/from Dale during the late 2017 and early 2018 timeframe and do not see that I sent him a copy of the downtown cost allocation spreadsheet. I didn't typically send him a lot of detailed information before our 1:1's so that doesn't surprise me. I don't recall if I gave him a hard copy, but probably not. Our updates were short and typically hit high points or items I felt he needed to be aware of. Since there was a plan in place to provide funding for the project it would not have been a hot topic. (Of course it would have been had I understood that some of the funding sources were inappropriate.)
>
> 3. Besides the Sept. 27, 2017 board meeting I don't think I had a board presenting role on Downtown until the Oct. 5, 2018 meeting where the board went back and approved each of the downtown projects individually. I haven't listened to the recording of that meeting and can't find talking points, but I believe we largely used the cover sheets for each item as the points to be discussed.

4. I haven't gone back to every board and committee meeting, but Mike Kilbride and I were pretty sure that Sept. 2017 and Oct. 2018 were the two meetings I presented to. I can do more digging if you need me to.

I think those were the main homework items. Let me know if I missed anything or if you have any further items you want me to chase down. Thanks again.

UCF Downtown: Lease with Ustler/DEVEN

for Academic and Student Support Space at Creative Village to support UCF Downtown

Background

- **On September 15, 2017, the Board approved an MOU with Ustler Development and KUD International for the privately developed student housing project in Creative Village. Staff has worked with the development company on this lease, which was one of the deliverables outlined in the MOU.**

- **This privately developed project includes 600 beds of student housing, 600 parking spaces, approximately 100,000 square feet of academic support space leased by UCF and Valencia, and retail offerings to support the campus.**

- This lease is for UCF to occupy approximately 47,000 square feet of space within the building to provide essential educational and student support services on the downtown campus. These services include registration, financial aid, academic advising and career counseling, student activities and civic engagement, recreation and wellness, health and counseling, and classroom and study space.

- It is important to note that the MOU with the developer originally noted the university would rent approximately 30,000 square feet of space. This number **reflected net square footage** from our master planning efforts. The area above represents the gross square footage of rentable space in the building.

- Valencia will also be leasing approximately 50,000 gross square feet to support the Walt Disney School of Hospitality and Culinary.

Lease Details

- Base rent for the space will be **$17.25 per square foot for a term of 20 years, and will not escalate**. This base rent includes operating expenses in the base year, with a 3% cap on escalations in subsequent years to controllable operating expenses. (Annual rent is estimated to be **$809,197.50.**)

- The lease assumes the premises will be exempt from taxes. In the event the exemption is not achieved, the landlord and tenant will share responsibility, with an annual cap limiting UCF's exposure to $40,000 annually for the first 10-years of the lease.

Buildout Funding

- The lease includes a **tenant improvement allowance of $30 per square foot** to be applied towards the design and buildout of the leased space. The tenant improvement allowance will total **approximately $1.4 million dollars**.

- **The total design and buildout for the space is approximately $5 million dollars ($106.50 per square foot) which excludes FF&E.** Including FF&E, the total project cost for the space will total **$6.7 million dollars** ($143 per square foot).

- The university's cash contribution after the tenant improvement allowance will total **$5.3 million dollars** ($113 per square foot).
    - The university's contribution will be split between auxiliary fund reserves and central funding.
    - The developer will apply tenant improvement dollars first. The university's contribution toward the space will not begin until July 2018.

Additional Information for Questions

Tax Scenario in Case Asked

- For the first ten-year term of the lease, the landlord and tenant will share responsibility with a 60/40 split (60% landlord, 40% tenant) for taxes up to $100,000. The landlord will have responsibility for taxes exceeding $100,000.
- For the second ten-year term of the lease, the landlord and tenant will share responsibility with a 50/50 split for taxes up to $150,000. The landlord will have responsibility for taxes exceeding $150,000.

KUD Name Change

- The MOU was with Ustler/KUD
- KUD has changed their name to Development Ventures Group (DEVEN).
- The lease is with Ustler/DEVEN

Funding Annual Lease Payments

- Defer to Tracey first. If not, ……
- UCF Downtown Campus planning dollars will support E&G functions
- Work with fee funded units to support their spaces (Health, Recreation, etc.)

September 26, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
9:54 - 27:24	
MARTINS	OK, our first order of business today is the lease agreement between Ustler Development and Development Ventures Group and the University of Central Florida Board of Trustees, that's FFC-1 and we will call on Bill Merck, Thad Seymour and Jennifer Cerasa to take us through this item.
MERCK	Mr. Chair, uh, the, uh, lead is going to be taken today by Thad Seymour and backed up by Jenn.
MARTINS	OK, great. Thank you, Bill.
SEYMOUR	Thank you, Bill.
MARTINS	Good, good morning Thad.
SEYMOUR	I want to note that Trustee Walsh just joined us as well.
WALSH	Morning.
SEYMOUR	Uh, thank you for, uh, I want to provide a brief over review of the lease that was in your board package. Um, just, uh, little bit of history: last September, the Board approved, uh, a memorandum of understanding between the university and Ustler development and KUD International to, uh, for the privately developed student housing project in Creative Village. Since then, uh, our staff has worked with the development company on the lease as well as, um, uh, working on the cost for the build-out and, um, we bring the final lease to you today for, uh, approval. Um, you'll recall that this is, this privately developed project includes 600 beds at student housing, 600 parking spaces, approximately 100,000 square feet of academic support space that's leased both to UCF and to Valencia and retail offerings, uh, that the private developer will manage to support the, uh, the new campus. Uh, our lease, the lease before you is for approximately 47,000 square feet of space, uh, in which we'll provide a essential educational student support services, uh, for the downtown campus, including registration, financial aid, academic advising and career counseling, student activities and civic engagement, recreation and wellness, help in counseling and, uh, classroom study space. Um, I do want to point out that the original MOU noted, um, that the university would run approximately 30,000 square feet of space. This number, uh, had come out of our planning efforts, um, with Canon Design and reflected the net square footage, um, but the above lease, of the lease that, um, is, uh, we are bringing to you today represents the gross, uh, rentable square footage which is 47,000 square feet, consistent with the guidelines, uh, that [*inaudible*], uh, state university system. Uh, as we're doing this Valencia will be leasing approximately 50,000 square feet of space for their use as well, largely for their [*inaudible*] business school of hospitality and culinary arts. Uh, couple of points on th-, on the lease itself. Uh, you may remember, uh, we negotiated a, um, a fixed, um, per square foot lease, uh, rate of $17.25 for the term of for the term of [*inaudible* –

September 26, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	background sneeze] years without increase, there's no escalation in that. Um, and then that lease also included $30 in tenant improvement allowance, um, that goes toward the buildout of the space. Uh, uh, we have since done the detailed work to, um, provide what the overall cost of that build-out would be. Um, uh, it comes to a little over a $106 square of foot consistent with, uh, this kind of, of building, uh, and when you add in the, uh, uh, FF&E and the full build-out will be $103 a square foot. So that total cost requires the university to fund, uh, $5.3 million in, uh, build-out and furnishing of that, of that space. We've, uh, identified the sources for the funding in a combination of auxiliary fund reserves and central [*inaudible*]. And so with that, I am happy to answer any questions, but we would ask your approval, uh, of the lease.
MARTINS	Thank you, Thad. Uh, questions from the committee?
GARVY	Uh, I have several, Mr. Chairman.
MARTINS	Trustee Garvy.
GARVY	[*inaudible*] uh, uh, well first of all, have we ever dealt with this landlord before?
SEYMOUR	Uh, not, not as a university, I don't believe we have, but the landlord is the master developer for, uh, for Creative Village, um, and is known to all of us then, uh, with a high reputation and, uh, both with us and the city.
GARVY	OK. So, so we have, uh, indications that, that the land-, that the landlords Ustler is, is, um, of, uh, high quality and character, etc.?
SEYMOUR	Yes and, uh, Jenn [*inaudible*] points out that we have dealt with KUD in the past.
GARVY	OK. Now, uh, uh, on page 15, [*clears throat*], of, of the book that I'm looking at, um, uh, item C indicates that, uh, the, um, ex-, that any operating expenses that are disproportionately or unfairly overburdening the project or other tenants will be allocated to, to the tenants, uh, at the landlord's discretion and that, that these obligations shall survive the expiration or earlier termination of the lease. That, is that standard? In other words, if, if we're no longer part of this lease they can still allocate, uh, these kinds of, uh, expenses to us? Is that a standard kind of…revision?
CERASA	[*inaudible*] Wha-, what, this is Jenn Cerasa, what page of the agreement are you referencing?
GARVY	Well, I'm looking at our board book. It's page 15 of the board book. It's 10, I think, of the agreement.
UNIDENTIFIED SPEAKER	[*Inaudible*]
GARVY	Item C.
CERASA	OK. [*pause*] OK, what this-, what the operating expenses does is the allocation provides that more intense uses can be billed at a higher rate; which is actually beneficial to the university because we're just, uh, we're just, um, utilizing office and academic support space. So that, uh, provision is, is standard in leases and this simply says if we don't pay what we're supposed to pay while we're in there, we're still liable for it after the fact. It's not that we would continue to accrue

September 26, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	operating expenses after we vacated the building.
GARVY	OK, thank you.
CERASA	You're welcome.
GARVY	On page 17, um, the condition of the premises, uh, term I guess that's, uh, sorry its page 15, uh, 14 and 15 of the, uh, of the contract. On page 17, uh, excuse me on page, uh, page 12 of, of the contract, conditions of the premises: "Tenant acknowledges of landlord has made no representations or promises as to the condition of the premises." Is that standard? "Nor, nor shall landlord be required to construct any alterations" – I understand that – "or improvements to the premises except as all-, re-, expresses set forth in this lease." But this…
CERASA	Correct.
GARVY	…acknowledges landlord has made no representations or promises as to the conditions of the premises.
CERASA	Correct. And at the end of the sentence modifies that statement, "except as expressly set forth in this lease." So the lease does set forth reps and warranties from the landlord as to the ability to build the project, the ability to comply with all state and local laws, to make it ADA compliant, um, and the lease - because we are so far down the road we have a very detailed work letter and, um, construction parameters that have been set, because we have been working very closely with, um, Ustler and KUD and their folks. So, that statement standard in leases, is simply saying, "I'm not promising you anything that's not promised in this lease."
GARVY	OK, alright fine. Then on page, uh, 15, the, uh, [*inaudible*] destruction, uh, can you just assure me that, that all, all those terms in that, that [*inaudible*] it's item number eight on page fif-, those terms are standard as well?
CERASA	[*pause*] Yeah, that's, that's standard language. Um, if, if, there's, uh, uh, an issue with the, with a hurricane comes through and sweeps through the building, um, you know, if it, if it damages so much of the building we have the right to, we have the right to terminate, they have the right to rebuild. Um, that, that's standard.
GARVY	OK, um, and then there were all these paragraphs that were omitted, um, started with I think nine and then throughout the contract. What, what were all these omitted paragraphs?
CERESA	So along the way, this was, uh, uh, to give you a little bit of a history, this was a several month long, probably half a year's worth of negotiations that, um, Thad, Mike Kilbride, and I have had with the developers in order to get the most advantageous terms for the university. And, um, we started with certain paragraphs in there that I requested we strike and as we moved further down the road, rather than re-number every single paragraph and check cross references – you simply add intentionally omitted, so that your cross references within the agreement stay the same.
GARVY	I see, OK, so these were requests that we made to omit various paragraphs?
CERASA	Correct [*simultaneous speaking*] so that may have been a request that

September 26, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	the, the developer negotiated out of, he negotiated things in-, out as well but, yes, but this was a result of negotiations.
GARVY	OK. Alright page, uh, 19 of the contract [*recording malfunction*] is the, uh, notice, 10-day notice, uh, for, um, um, deficiencies or whatever in the, in, in, in, in our obligations, in, in our requirements to meet certain obligations. That is, uh, that's a very short term. Even, even though it's just for a letter or, or our expression of intent to cure. You know, if there's, if there's a problem that arises, this seems to require us to notify them within 10 days of our intent to cure the problem. Then we have, you know, up to 90 days or more to actually, uh affect that. However, an issue may arise in which we cannot or, or it's unlikely that we can reach a conclusion as to whether or not we will cur-, cure that within 90 days. Uh, I-, isn't 10 days quite a short time for notification to cure? [*pause*] It is in every contract I've done in the past but I'm not in real estate.
CERESA	Yeah, let me take a look at the paragraph real quick before I respond.
GARVY	It's, it's, III trip-I, page 19.
CERASA	[*long pause*] Um…uh, uh, what, 10 days is a standard time frame. Is there something that you would… be more reasonable?
GARVY	Well, every contract I've done has been 30 days. But I'm not in real estate. I don't, I don't do real estate contracts. I mean, I don't know. But, it would seem to me that if you have to, uh, if you have to notify them within 10 days or you're in violation of the contract, there is – seems clear to me, uh, uh, a problem could arise in which our analysis of whether we have the obligation to cure it cannot be achieved within 10 days. We may have to bring in experts, we have to bring in people to evaluate the circumstances… [*background talking inaudible*]
CERASA	Uh, I'm being told by the developer that this was a lender requirement, um, which is kind of what makes it standard. They, they want to know that we're going to come in and come in quickly. Um, we're also, I don't want to say we're under tight time-frames but we have a schedule that's set forth, um, and we don't want to allow – because we have, uh, uh, a hard opening date that we are all working towards – we don't want to allow these long cure periods. Um, I can also tell you that we have a very good relationship with the developers and we've, again we've been working very closely. So I'm comfortable that if we could not…come to some conclusion in 10 days we could, we could work it out quickly thereafter and we would be OK.
SEYMOUR	Uh, and I would just add, I, uh, you see different periods in different agreements like this but this is not unusual from my experience.
GARVY	OK. So noted. Uh, finally on page, uh, 23 under signs…paragraph C…this, uh, restri- [*inaudible*] UCF from putting any exterior signs on the building, as I read it anyway. Maybe I'm mistaken. And isn't this, uh, a very important right to have? I mean, we, we're the major tenant in this building. For the life of this contract we have no rights to put any exterior signage on the building?
CERASA	Well, except as, as provided here in the project agreement. We do have rights to place signs on the building. It's just the rights that are set forth within the lease. We can't go out and plaster UCF with a

September 26, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	wrap-around on the building but we have to comply with the guidelines that we set forth in this document in a separate project agreement.
GARVY	OK can you summarize those for me please?
SEYMOUR	[*long pause* / *background talking* / *inaudible*] We're conferring, uh, Mr. Garvy. [*background talking* / *inaudible*]
CERASA	I'm being told the allocation is 40-45% to UCF with a similar split to Valencia and then 10% to the developer.
GARVY	45% of what?
CERASA	Exterior signage that's permitted by, uh, city code.
GARVY	OK, that's permitted by city code? Alright, and we're satisfied that, that will allow us [*clears throat*] to adequately, um, display UCF, um, the signage that we want externally on this building?
SEYMOUR	Ab-, ab-, absolutely. I'm looking and Grant Heston and we'll make sure that we maximize [*laughter*] [*inaudible*] we have on that building. [*laughter*]
GARVY	[*laughs*] OK is Grant, is Grant here? [*simultaneous speaking*]
CERASA	Yes he is, and he gave us a thumbs up. [*background talking / inaudible*]
UNIDENTIFIED SPEAKER	I'm very…[*simultaneous speaking*]
GARVY	OK, uh, alright well that's, that's all my questions. Thank you very much.
MARTINS	Thank you, Trustee Garvy. Other questions from the committee? [*clears throat]*
WALSH	Walsh here [*inaudible*]… the percentage
MARTINS	Trustee Walsh?
WALSH	…or, about this particular building…
UNIDENTIFIED SPEAKER	Right.
WALSH	[*inaudible*] project [*inaudible*]?
CERASA	Correct.
WALSH	And then [*inaudible*] to circle back to the topic of the 10 days. That's the notice period I'm talking about, not the cure period, correct? [*simultaneous speaking*]
CERASA	Correct.
WALSH	[*inaudible*] to notice a deficiency.
MARTINS	Anything else, Trustee Walsh?
WALSH	I'm good, thank you.
MARTINS	OK. Any other questions from the committee? [*pause*] Hearing none can we have a motion to approve?
UNIDENTIFIED SPEAKER	So moved.
MARTINS	We have a motion; can we have a second please?
MULTIPLE SPEAKERS	Second.
MARTINS	We have a motion and a second. All those in favor please signify by saying "Aye".
MULTIPLE SPEAKERS	Aye.
MARTINS	Aye. Any opposed, like sign. Motion carries. Thank you Thad, thank

MEMORANDUM

TO: SUS Data Administrators

FROM: Tim Jones, Vice Chancellor, Finance and Administration

THROUGH: Jason Jones
Chief Data Officer, Office of Data and Analytics

DATE: October 17, 2017

SUBJECT: Fund Balance Update

DUE DATE: November 17, 2017

We have been asked to provide an update on university fund balances. Attached is the fund balance report submitted in August as a component of the operating budget submission. The first tab has the original submission, while the second tab should be used to provide updated information as of October 31.

The update should be submitted through the Data Request System [https://prod.flbog.net:4445/pls/apex/f?p=760] on or before **November 17, 2017**.

If you have questions please contact Kristie Harris at Kristie.harris@flbog.edu or (850) 245-9757.

Thank you.

Subject: RE: Downtown Construction Transfers

Lea/ Meghan – Also, please transfer budget of $1,025,000 from 00010710 to 02800703. Then cash from 02800703 to a newly established "Classroom seating" project. This amount represents 5 years of funding for classroom/ ADA seating minor project replacements.

LaShanda – I just spoke briefly with Lee so she may be contacting you shortly.

Let me know if anyone has questions.

UNIVERSITY OF CENTRAL FLORIDA

Board of Trustees
Finance and Facilities Committee Meeting
President's Boardroom, Millican Hall, 3rd floor
December 13, 2017

MINUTES

CALL TO ORDER

Trustee Alex Martins, chair of the Finance and Facilities Committee, called the meeting to order at 8:30 a.m. Committee member William Self was present. Committee members Robert Garvy and Bill Yeargin attended by teleconference call. Chairman Marcos Marchena was present.

MINUTES APPROVAL

The minutes of the October 18, 2017, and October 26, 2017, Finance and Facilities Committee meetings were approved as submitted.

NEW BUSINESS

UCF Downtown Tri-Generation Facility Update (FFC-1)

William F. Merck II, Vice President for Administration and Finance and Chief Financial Officer, and Lee Kernek, Associate Vice President for Administration and Finance, requested approval for the change in facility, revised budget, and renaming of the UCF Downtown Tri-Generation Facility.

Because of the project revision, the facility name is now the UCF Downtown Central Energy Plant. The original funding approved by the Board of Trustees was $10.1 million and had a payback of 10 years for Phase I. After exploring numerous design and modeling scenarios, it was determined the initial budget is not sufficient to build the first phase of the project, and the initial payback schedule did not accurately anticipate the sizing and power generation needs of the planned facilities.

As such, the design and phased construction of a central energy plant will move forward to meet only the chilled water needs of the campus. The UCF Downtown Central Energy Plant will cost $12.3 million and will provide cost avoidance in future years.

In addition to the costs of the UCF Downtown Central Energy Plant, the decision to move from a tri-generation facility to a traditional central energy plant has cost implications for the Dr. Phillips Academic Commons. The design and construction costs for these changes increase the academic building budget by $1.3 million.

The committee unanimously approved the requests as presented.

Direct Support Organizations' 2017-18 First-Quarter Financial Reports (INFO-1)
Merck and John Pittman, Associate Vice President for Administration and Finance, Debt Management, reported that the 2017-18 first-quarter financial reports ended September 30, 2017, for the UCF DSOs were provided as information items.

University Draft Audited Financial Report 2016-17 (INFO-2)
Christy Tant, Controller and Assistant Vice President, reviewed the University Draft Audited Financial Report 2016-17.

UCF Key Financial Ratios (INFO-3)
Tant discussed the key financial ratios for UCF as of June 30, 2017, and the key financial ratios for UCF as compared to the State University System as of June 30, 2016.

University Operating Budget Report Ended September 30, 2017 (INFO-4)
Tant presented the University Operating Budget Report for the quarter that ended September 30, 2017.

UCF Investments Quarterly Report Ended September 30, 2017 (INFO-5)
Tant presented the UCF Investments Quarterly Report for the quarter that ended September 30, 2017.

UCF Facilities Planning and Construction Department Assessment Follow-up (INFO-6)
Rhonda L. Bishop, Chief Compliance and Ethics Officer, and Peter J. Wallace, Senior Vice President for HKA International, reviewed the progress following the assessment that was completed on the UCF Facilities Planning and Construction Department. Chairman Marchena recommended the following.

1. Facilities Planning and Construction notify the Finance and Facilities Committee when the e-Builder software system is fully implemented and present reports that include all project activity to the committee on a regular basis.
2. Provost Whittaker work with Facilities Planning and Construction staff and the deans to implement a Minor Projects priority system for the colleges.
3. Athletics implement a pilot program to hire a program management or owner's authorized representative firm that will manage, implement, and oversee departmental facilities projects. The cost of the firm's services will be split between Athletics and Facilities.

Chair Martins made a motion to approve these recommendations, and the committee unanimously approved them.

Chair Martins adjourned the Finance and Facilities Committee meeting at 10:20 a.m.

Respectfully submitted: William F. Merck II 2-6-18
William F. Merck II
Vice President for Administration and Finance
and Chief Financial Officer
Date

ITEM: FFC-1

University of Central Florida
Board of Trustees
Finance and Facilities Committee

SUBJECT: UCF Downtown Tri-Generation Facility Update

DATE: December 13, 2017

PROPOSED COMMITTEE ACTION

Recommend approval of the change in facility, revised budget, and renaming of the UCF Downtown Tri-Generation Facility.

BACKGROUND INFORMATION

The UCF Downtown Tri-Generation Facility project has been revised and should be renamed the UCF Downtown Central Energy Plant.

The original funding approved by the Board of Trustees was $10.1 million and had a payback of 10 years for Phase I. After exploring numerous design and modeling scenarios, it was determined the initial budget is not sufficient to build the first phase of the project, and the initial payback schedule did not accurately anticipate the sizing and power generation needs of the planned facilities. In addition, the payback period of the power generation component does not reasonably justify the initial and continued operating costs of a campus this size.

As such, the design and phased construction of a central energy plant will move forward to meet only the chilled water needs of the campus. The UCF Downtown Central Energy Plant will cost $12.3 million and will not have a payback.

In addition to the costs of the UCF Downtown Central Energy Plant, the decision to move from a tri-generation facility to a traditional central energy plant has cost implications for the Dr. Phillips Academic Commons. As a result of not self-generating power and hydronic hot water, changes are required, including adding boilers, emergency power generation, emergency circuits, and an external equipment yard. The design and construction costs for these changes increase the academic building budget by $1.3 million.

Supporting documentation: None

Prepared by: Lee Kernek, Associate Vice President for Administration and Finance

Submitted by: William F. Merck II, Vice President for Administration and Finance and Chief Financial Officer

Minutes
Board of Trustees Meeting
University of Central Florida
January 18, 2018

Chairman Marcos Marchena called the meeting of the Board of Trustees to order at 1:00 p.m. in the *FAIRWINDS* Alumni Center on the UCF Orlando campus.

Marchena reminded the board that the meeting was covered by the Florida Sunshine Law and that the public and press were invited to attend.

WELCOME

He welcomed the board members and called on Rick Schell, Associate Corporate Secretary, to call the roll. Schell determined that a quorum was present.

The following board members attended the meeting: Chairman Marcos Marchena, Vice Chair Robert Garvy, Ken Bradley, Clarence Brown, Joseph Conte, Nicholas Larkins, John Lord, Alex Martins, Beverly Seay, William Self, John Sprouls, David Walsh, and William Yeargin.

PUBLIC COMMENT

Jose Rivera, president and founder of the Puerto Rican Student Association, addressed the board regarding the destruction of Puerto Rico by Hurricane Maria. On behalf of the students, he requested that the board consider extending in-state tuition for one academic year to students displaced by the hurricane.

Alejandro Chardon, a transfer student from Puerto Rico, also asked the board to extend in-state tuition for students displaced by Hurricane Maria.

NEW BUSINESS

Marchena called on Nicholas Larkins, SGA President, who provided a brief update on circumstances in Puerto Rico. Larkins recommended that in-state tuition be extended for the summer 2018, fall 2018, and spring 2019 semesters.

Marchena advised that UCF had received a letter from the governor of Puerto Rico thanking UCF for the accommodations made for Puerto Rican students. The governor also asked that UCF extend waiving out-of-state tuition.

Marchena called on Maribeth Ehasz, Vice President for Student Development and Enrollment Services, who reported 1,135 students from Puerto Rico had applied to UCF, of which 356 were admitted as degree granting students. She reported that UCF has over 200 students enrolled from Puerto Rico who are benefiting from the non-residency fee being waived, as well as those students from Puerto Rico who were attending UCF prior to the hurricane. Ehasz reported that

for the 2018 fall term over 200 enrollment applications have been received for displaced students from Puerto Rico, evidence of continuing interest in UCF. President John C. Hitt stated that this is an opportunity to assist our fellow citizens.

Marchena presented the following item for board approval.

In-State Tuition Eligibility for Displaced Students–A motion was unanimously approved to extend in-state eligibility for students displaced from Puerto Rico and the Virgin Islands for Summer 2018, Fall 2018, and Spring 2019 semesters.

MINUTES

Marchena called for approval of the October 26, 2017; November 3, 2017; and November 8, 2017; meeting minutes, which were approved.

Marchena called on President Hitt for remarks and introductions.

REMARKS

Hitt congratulated Trustee Seay, who was reappointed to the board by the Board of Governors for a five-year term. He thanked her for her service to the board and to the university.

He commended the UCF Knights' football team for completing a perfect season and securing UCF's first national championship with a 34-27 victory over Auburn in the Peach Bowl. He stated that a parade was hosted at Disney World on the Sunday after the game and that the City of Orlando estimated a crowd of 5,000 to 10,000 fans packed Church Street for the Knights' National Championship Celebration.

He announced that UCF's football student-athletes have the highest graduation rate--92 percent--of the 12 teams competing in New Year's six bowl games.

Hitt stated that Fox35 News aired a news clip about the College of Medicine, and he shared a video featuring 18-year old Hannah Culler of Ohio, who suffers from a life-threatening immune disorder. Through the Make-A-Wish Foundation, Deborah German, Vice President for Medical Affairs and Dean of the College of Medicine, UCF med students, and faculty created a special day for Hannah, fulfilling her dream to be a medical student for a day at UCF's College of Medicine.

INTRODUCTIONS

Hitt congratulated the following members of the UCF community.

A. Student

Andrew Aboujaoude was awarded the SUS Florida Campus Compact Student Excellence in Service Award for 2017. In addition to this award, Florida Campus Compact has recognized UCF with an Engaged Campus Award, as well as a Campus-Community Partnership Award.

B. Faculty

Gary Lease, lead dentist at UCF Student Health Services, joined the dental center in 2012. Lease will receive the Academy of General Dentistry Mastership Award at its annual convocation ceremony in June. The Mastership Award is one of the most respected designations within the profession.

Eduardo Mucciolo and Enrique del Barco, professors of physics and, respectively, chair and associate chair of the Physics Department, were selected as Fellows of the American Physical Society. Election to the Fellowship is in recognition for exceptional contributions to research, and it is limited to no more than one-half of one percent of the membership.

C. Employee of the Month

The Employee of the Month for October was James McCully, a 25-year employee and senior broadcast technologist in the Nicholson School of Communication in the College of Sciences.

The Employee of the Month for November was Debra Urban, a 15-year employee and senior administrative assistant in the College of Nursing.

REPORTS

Marchena called on Vice Chair Garvy to provide an update on the presidential transition task force. Garvy introduced Tom Hope, Assistant Vice President of Strategic Initiatives, Communications and Marketing, who reported on communications and event planning and some events. Hope mentioned that an event to honor Hitt will likely take place in the CFE Arena on May 9, 2018. On February 8, Hitt will be the guest of honor at Rollins College, where President Grant Cornwell will interview him about his career. Hitt will be given an honorary degree in May from his alma mater, Austin College. Other events are being considered. Hope then introduced Julie Stroh, Senior Associate Vice President for Alumni Engagement and Annual Giving, who reported on stewardship plans to assure that individuals are appropriately engaged during this transition.

- INFO-1 Transition Task Force Update

Marchena called on Walsh, who provided an update on the following item, and he presented a brief video featuring faculty, staff, and students that showcases UCFs multiple locations.

- INFO-2 Presidential Search Update

Marchena called on Elizabeth Klonoff, Vice President for Research and Dean, College of Graduate Studies, who gave an informational report on the following item.

- INFO-3 BRIDG and NeoCity Update–December 22, 2017

ADVANCEMENT COMMITTEE REPORT

Clarence Brown, Chair of the Advancement Committee, reported the highlights from the committee meeting earlier in the day.

- Karen Cochran, Senior Associate Vice President for Advancement Development, provided an update on behalf of Mike Morsberger. The advancement division has eclipsed its $350 million calendar year-end fund raising target and aims to reach the next campaign milestone of $400 million by the end of the fiscal year. She summarized events during the Peach Bowl to capitalize on the momentum surrounding UCF and the IGNITE campaign. She highlighted the Hitt initiative, a focused effort within the IGNITE campaign to increase endowment and support for academic advancement and faculty excellence.
- Cochran presented a motion to name the Roth Athletics Center (ADVC-1), which was unanimously approved.
- Dan Holsenbeck, Senior Vice President for University Relations, gave an update on legislative activities and the proposed budget being advanced by the 2018 legislature.
- Grant Heston, Vice President for Communications and Marketing, provided an update on UCF's strategy to produce content that will gain "likes" and "shares" on news feeds. He gave a presentation highlighting UCF's presence at the Peach Bowl in Atlanta through the use of creative billboards, social media banners, and other media platforms in the Orlando and Atlanta markets. He reported that UCF license plate sales have advanced from fifth to the third highest among license plates sold by state universities in Florida.

Brown presented the following items for board approval.

- ADV-1 Naming of the Roth Athletics Center–A motion was unanimously approved for the naming of the Roth Athletics Center upon completion of the pledge by the donors.

AUDIT, OPERATIONS REVIEW, COMPLIANCE, AND ETHICS COMMITTEE REPORT

Beverly Seay, Chair of the Audit and Compliance Committee, reported the highlights of the committee meetings of November 30, 2017, and January 12, 2018.

- At the January 12, 2018, meeting, the committee unanimously approved the following items, and Seay noted that they are on the consent agenda.
    - Robert Taft, Chief Audit Executive, reported on the results for the Board of Governors' Performance-based Funding Data Integrity Certification Audit Report (AUD-1).

  - He also provided an update on the Performance-based Data Integrity Certification Form (AUD-2).

- The following information items were presented at the November 30, 2017, meeting.
  - Taft presented the University Audit Report (INFO-1).
  - Rhonda L. Bishop, Chief Compliance and Ethics Officer, provided an overview of the Conflict of Interest and Commitment Initiatives (INFO-2).
  - Bishop reported on the 2017-18 Work Plan Status of All Activities (INFO-3).
  - Bishop provided an overview on the 2016-17 Compliance and Ethics Program Annual Report (INFO-4).
  - Bishop provided an update of the Overview of Title IX (INFO-5).
  - Bishop provided an update on the Compliance, Ethics, and Risk Program and reported on the development of a Youth Protection Committee.

BOARD OF TRUSTEES

Marchena called on German to report on a proposed cancer center for the Sanford Burnham Prebys building at Lake Nona. Prior to the report, Bradley recused himself from voting due to a conflict of interest.

After German's presentation, Marchena stated that the UCF Academic Health board had approved UCF Academic Health's moving forward to pursue obtaining the Sanford Burnham Prebys facility. He noted that the facility was built with contributions from Orange County, the City of Orlando, and Tavistock, and that all three parties must agree on the facility's use when Sanford Burnham Prebys vacates the property. The state's position is that the building's fate is a local decision. Mayor Teresa Jacobs has requested Florida Hospital and UCF Academic Health to make presentations before Orange County Commissioners.

Marchena clarified that the vote is for this board is to approve the recommendation by UCF Academic Health to pursue a lease on the Sanford Burnham Prebys Medical Research Institute at Lake Nona facility in partnership with Provision Health Care and Sarah Cannon, the cancer institute of HCA Health Care, for the purpose of advancing cancer research.

Marchena presented this item for board approval.

- BOT-1 UCF Academic Health Proposal–A motion was passed with a vote of 12 for, with Bradley's recusal, approving the UCF Academic Health Proposal.

COMPENSATION AND LABOR COMMITTEE REPORT

John Sprouls, Chair of the Compensation and Labor Committee, reported the highlights of the committee meeting held on December 12, 2017, and earlier in the day.

- At the December 12, 2017, meeting, Sprouls reported that the committee unanimously approved item CLC-1 The 2017-20 Performance Unit Plan Awards.

- He reported that at the meeting earlier in the day, the committee unanimously approved two items to present to the board.
    - CLC-1 Presidential Compensation Analysis was prepared by Sibson Consulting at the request of the Presidential Search Committee. The analysis provides competitive data of the compensation for the president's job. The study provides data for three groups of presidents: a comparison peer group, an aspirational peer group, and the State University System schools. This document will form the basis for the negotiations with a successful candidate for president.
    - CLC-2 Article 3: UFF Privileges and Article 23: Salaries of the Collective Bargaining Agreement with the United Faculty of Florida, both of which have been approved by the United Faculty of Florida.

Sprouls presented the following items for board approval.

- CL-1 Presidential Compensation Analysis–A motion was unanimously passed approving the Presidential Compensation Analysis.

- CL-2 Article 3: UFF Privileges and Article 23: Salaries of the Collective Bargaining Agreement with the United Faculty of Florida–A motion was unanimously passed ratifying the reopened articles of the Collective Bargaining Agreement between the University of Central Florida Board of Trustees and the United Faculty of Florida.

EDUCATIONAL PROGRAMS COMMITTEE REPORT

Robert Garvy, Chair of the Educational Programs Committee, reported the highlights from the committee meeting earlier in the day and recounted several of the informational items presented.

- M. Paige Borden, Assistant Associate Provost for Academic Program Quality and Associate Vice President for Institutional Knowledge Management, reported on the 2015-16 Academic Program Review Recommendation Implementations (INFO-1), which involved the School of Performing Arts, School of Visual Arts and Design, and the Modeling and Simulation Program.
- Elizabeth Dooley, Dean of the College of Undergraduate Studies and Vice Provost for Teaching and Learning, reported on the Status of New Degree Programs implemented by the UCF Board of Trustees (INFO-2). She stated a Bachelor of Arts in Communication and Conflict undergraduate degree program implementation in the fall of 2015 has grown by 65 percent since its inception.
- A. Dale Whittaker, Provost and Executive Vice President, said Hitt's approval of the Academic Health Sciences Center will support health-related programs, research, and clinical services. He reported that UCF moved up 20 spots to number 16 in the *U.S. News & World Report*'s best online bachelor degree programs for 2018. He cited the national media coverage on digital learning and UCF's academic reputation from *The Wall Street Journal* and *The Washington Post*. He announced new deans for the Burnett Honors College and the Rosen College, and he updated the committee on UCF's new research

and commercialization awards. He updated the committee on student success and faculty excellence metrics, including a record 90 percent first-year retention rate.

- Whittaker introduced Zhongzhou Chen, Assistant Professor, Department of Physics, who gave a presentation on 4K Learning Telescope (INFO-3).
- Whittaker reported on 21st-Century Teaching as a "mythbuster" (INFO-4).

FINANCE AND FACILITIES COMMITTEE REPORT

Alex Martins, Chair of the Finance and Facilities Committee, reported highlights from the committee meeting held on December 13, 2017, and earlier in the day.

- Martins recapped highlights of the December 13, 2017, committee meeting.
  - William F. Merck II, Vice President for Administration and Finance and Chief Financial Officer, and Lee Kernek, Associate Vice President for Administration and Finance, requested approval for changes in the UCF Downtown Tri-Generation Facility and revision of its budget. Due to the project revision, the facility has been renamed as the UCF Downtown Central Energy Plant. The design and phase construction of the UCF Downtown Central Energy Plant will move forward to meet only the chilled water needs of the campus. The plant will cost $12.3 million and will provide cost avoidance in future years. The design and construction costs for these changes increase the budget for the Dr. Phillips Academic Commons by $1.3 million. Item FFC-1 UCF Downtown Tri-Generation Facility Update was unanimously approved by the committee.
- He noted that the following informational items were presented at the committee meeting.
  - Direct Support Organizations' 2017-18 First-Quarter Financial Reports (INFO-1)
  - University Draft Audited Financial Report 2016-17 (INFO-2)
  - UCF Key Financial Ratios (INFO-3)
  - University Operating Budget Report Ended September 30, 2017 (INFO-4)
  - UCF Investments Quarterly Report Ended September 30, 2017 (INFO-5)
  - UCF Facilities Planning and Construction Department Assessment Follow-up (INFO-6). As a result of the departmental assessment conducted by HKA International, the following were recommended.
    1. Facilities Planning and Construction will notify the Finance and Facilities Committee when the e-Builder software system is fully implemented and present reports that include all project activity to the committee on a regular basis.
    2. Whittaker will work with Facilities Planning and Construction staff and the deans to implement a Minor Projects priority system for the colleges.
    3. Athletics will implement a pilot program to hire a program management or owner's authorized representative firm that will manage, implement, and oversee departmental facilities projects. The cost of the firm's services will be split between Athletics and Facilities.

    Martins stated that this item is presented as FF-2 Facilities Planning and Construction Department Recommendations for board approval.

- Martins reported highlights of the committee meeting held earlier in the day.
  - Item FFC-1 Parking, Housing, and Health Auxiliary Facilities Operating Budgets for 2018-19 were unanimously approved by the committee, and the item is placed on the consent agenda as FF-3 for board approval.
  - Item FFC-2 WUCF TV Channel Sharing Agreement between UCF and Good Life Broadcasting includes minor changes to the contract as requested by the FCC, and the item was unanimously approved by the committee and is placed on the consent agenda as FF-4.
  - Item FFC-3 Lake Nona Incubator Lease Agreement is an amendment to the lease agreement with the Lake Nona Innovation Center I, LLC, for the developing life sciences incubator for UCF at Lake Nona. UCF's obligations, under the 12-year lease with Tavistock, approved by the UCF Board of Trustees on November 17, 2016, remain pending until substantial completion of the build-out of the multi-tenant Lake Nona life sciences incubator. In 2017, the city of Orlando and Florida Hospital amended their agreement to commit funds to one life sciences incubator at Lake Nona Medical City. As a result, Tavistock obtained from Florida Hospital an additional $2,324,223 for the construction and operation of the Lake Nona life sciences incubator. Accordingly, the lease is being revised to include these additional funds, to confirm their intended use, and to set forth the good faith obligations of each party if projected total costs exceed the new total allowance. This was unanimously approved by the committee with the caveat that if the budget for the incubator completion is exceeded, the budget would return to the committee for further review and approval. Martins indicated the item is placed on the consent agenda as FF-5.
  - Item FFC-4 UCF Finance Corporation Line of Credit for UCF Downtown Campus was unanimously passed by the committee approving the UCF Finance Corporation procuring a line of credit up to $14 million to provide the cash flow needed for construction of the UCF Downtown Campus. The item is placed on the consent agenda as FF-6.

Martins presented the following items for board approval.

- FF-1 UCF Downtown Tri-Generation Facility Revision–A motion unanimously passed approving the change in facility, revised budget, and renaming of the UCF Downtown Tri-Generation Facility to the UCF Downtown Central Energy Plant.

- FF-2 Facilities Planning and Construction Department Recommendations–A motion unanimously passed approving the recommendations.

- FF-3 Parking, Housing, and Health Auxiliary Facilities Operating Budgets–A motion unanimously passed approving the 2018-19 operating budgets for the university auxiliary facilities with outstanding revenue bonds.

NOMINATING AND GOVERNANCE COMMITTEE REPORT

William Yeargin, Chair of the Nominating and Governance Committee, reported highlights of the committee meeting held earlier in the day.

- Item NGC-1 Presidential Selection Process (NGC-1) involved modifications to the presidential selection process guidelines. The changes were approved unanimously by the committee and is on the consent agenda as NG-1.
- Item NGC-2 Amendment to University Regulation UCF-3.040 Benefits and Hours of Work made minor changes to regulations related to benefits. Clarifying language about administrative leave was added and is on the consent agenda as NG-2.
- Item NGC-3 Amendments to Chapter 5 University Regulations involves amendments to University Regulations UCF-5.006 (Student Rights and Responsibilities), UCF-5.008 (Rules of Conduct), UCF-5.009 (Student Conduct Review Process; Sanctions), UCF-5.010 (Student Conduct Appeals), UCF-5.013 (Organizational Conduct Review Process; Sanctions; Appeals), and UCF-5.015 (Student Academic Behavior Standards). Since these amendments related to students, 30-days of public notice was given prior to the meeting. There were no significant comments, and Yeargin noted that the item was processed through the Golden Rule Committee with no noteworthy comments. The committee unanimously approved the proposed amendments, and the item is placed on the consent agenda as NG-3.

STRATEGIC PLANNING COMMITTEE REPORT

Clarence Brown, Chair of the Strategic Planning Committee, reported highlights of the meeting held earlier in the day.

- Whittaker and Lisa Jones, Associate Provost for Strategy and Special Assistant to the President, reported on approval of the Collective Impact Strategic Plan by the Florida Board of Governors. Whittaker reported on the metrics that are a part of that plan.

CONSENT AGENDA

A motion was made to accept the consent agenda, and unanimously approved.

- AUD-1 Board of Governors' Performance-based Funding Data Integrity Certification Audit Report—Approval of the University Audit's report on the Board of Governors Performance-based Funding Data Integrity Certification Process

- AUD-2 Performance-based Funding Data Integrity Certification Form—Approval for submission of the Performance-based Funding Data Integrity Certification Form to the Board of Governors

- CL-3 2017-20 Performance Unit Plan Awards—Approval of the plan awards

- FF-4 WUCF TV Channel Sharing Agreement—Approval of the changes to a channel-sharing agreement between WUCF TV and Good Life Broadcasting, Inc.

- FF-5 Lake Nona Incubator Lease Agreement—Approval of an amendment to the lease agreement with the Lake Nona Innovation Center I, LLC, for the developing life sciences incubator at Lake Nona

- FF-6 UCF Finance Corporation Line of Credit for UCF Downtown Campus—Approval for the UCF Finance Corporation to procure a line of credit up to $14 million to provide the cash flow needed for construction of the UCF Downtown Campus

- NG-1 Presidential Selection Process—Approval of the revisions to the Presidential Selection Process

- NG-2 Amendment to University Regulation UCF-3.040 Benefits and Hours of Work—Approval of the amendments to the regulation

- NG-3 Amendments to Chapter 5 University Regulations—Approval of the amendments to the regulations

ANNOUNCEMENTS AND ADJOURNMENT

Marchena announced the following upcoming meetings:

Board of Governors meeting	January 24-25, 2018 (Florida State University)
Board of Governors meeting	February 22, 2018 (Conference call)
Board of Trustees meeting	March 22, 2018 (*FAIRWINDS* Alumni Center)
AGB 2018 National Conference on Trusteeship Please let Rick Schell know if you are interested in attending.	April 22-24, 2018 (San Francisco)

Marchena adjourned the board meeting at 3:05 p.m.

Respectfully submitted: _____ Date: _____

John C. Hitt
Corporate Secretary

FORM 8A MEMORANDUM OF VOTING CONFLICT FOR STATE OFFICERS

LAST NAME—FIRST NAME—MIDDLE NAME	NAME OF BOARD, COUNCIL, COMMISSION, AUTHORITY, OR COMMITTEE
Bradley Kenneth Wayne	UCF Board of Trustees
MAILING ADDRESS	NAME OF STATE AGENCY
1612 Elizabeth's Walk	University of Central Florida
CITY / COUNTY	MY POSITION IS:
Winter Park / Orange	☐ ELECTIVE ☑ APPOINTIVE
DATE ON WHICH VOTE OCCURRED	
January 18, 2018	

WHO MUST FILE FORM 8A

This form is for use by any person serving at the State level of government on an appointed or elected board, council, commission, authority, committee, or as a member of the Legislature. It applies to members of advisory and non-advisory bodies who are presented with a voting conflict of interest under Section 112.3143, Florida Statutes.

Your responsibilities under the law when faced with voting on a measure in which you have a conflict of interest will vary greatly depending on whether you hold an elective or appointive position. For this reason, please pay close attention to the instructions on this form before completing and filing the form.

INSTRUCTIONS FOR COMPLIANCE WITH SECTION 112.3143, FLORIDA STATUTES

ELECTED OFFICERS:

As a person holding elective state office, you may not vote on a matter that you know would inure to your special private gain or loss. However, you may vote on other matters, including measures that would inure to the special private gain or loss of a principal by whom you are retained (including the parent or subsidiary or sibling organization of a principal by which you are retained); to the special private gain or loss of a relative; or to the special private gain or loss of a business associate. If you vote on such a measure or if you abstain from voting on a measure that would affect you, you must make every reasonable effort to disclose the nature of your interest as a public record in a memorandum filed with the person responsible for recording the minutes of the meeting, who shall incorporate the memorandum in the minutes. If it is not possible for you to file a memorandum before the vote, the memorandum must be filed with the person responsible for recording the minutes of the meeting no later than 15 days after the vote.

For purposes of this law, a "relative" includes only your father, mother, son, daughter, husband, wife, brother, sister, father-in-law, mother-in-law, son-in-law, and daughter-in-law. A "business associate" means any person or entity engaged in or carrying on a business enterprise with you as a partner, joint venturer, coowner of property, or corporate shareholder (where the shares of the corporation are not listed on any national or regional stock exchange).

A member of the Legislature may satisfy the disclosure requirements of this section by filing a disclosure form created pursuant to the rules of the member's respective house if the member discloses the information required by this subsection, or by use of Form 8A.

* * * * * * * * * * * * * * * * *

APPOINTED OFFICERS:

As a person holding appointive state office, you are subject to the abstention and disclosure requirements stated above for Elected Officers. You also must disclose the nature of the conflict before voting or before making any attempt to influence the decision by oral or written communication, whether made by you or at your direction.

For purposes of this law, a "relative" includes only your father, mother, son, daughter, husband, wife, brother, sister, father-in-law, mother-in-law, son-in-law, and daughter-in-law. A "business associate" means any person or entity engaged in or carrying on a business enterprise with you as a partner, joint venturer, coowner of property, or corporate shareholder (where the shares of the corporation are not listed on any national or regional stock exchange).

IF YOU INTEND TO MAKE ANY ATTEMPT TO INFLUENCE THE DECISION PRIOR TO THE MEETING AT WHICH THE VOTE WILL BE TAKEN:

- You must complete and file this form (before making any attempt to influence the decision) with the person responsible for recording the minutes of the meeting, who will incorporate the form in the minutes.
- A copy of the form must be provided immediately to the other members of the agency.
- The form must be read publicly at the next meeting after the form is filed.

IF YOU MAKE NO ATTEMPT TO INFLUENCE THE DECISION EXCEPT BY DISCUSSION OR VOTE AT THE MEETING:

- You must disclose orally the nature of your conflict in the measure before participating.
- You must complete the form and file it within 15 days after the vote occurs with the person responsible for recording the minutes of the meeting, who must incorporate the form in the minutes. A copy of the form must be provided immediately to the other members of the agency, and the form must be read publicly at the next meeting after the form is filed.

DISCLOSURE OF STATE OFFICER'S INTEREST

I, Kenneth W. Bradley, hereby disclose that on January 18, 20 18:

(a) A measure came or will come before my agency which (check one or more)

___ inured to my special private gain or loss;
___ inured to the special gain or loss of my business associate, _____;
___ inured to the special gain or loss of my relative, _____;
✓ inured to the special gain or loss of Adventist Health System dba Florida Hospital, by whom I am retained; or
___ inured to the special gain or loss of _____, which is the parent, subsidiary, or sibling organization of a principal which has retained me.

(b) The measure before my agency and the nature of my conflicting interest in the measure is as follows:

The UCF Board was asked to vote on a proposal for UCF Academic Health to negotiate with Orange County to acquire property / building known as the Sanford Burnham property. My employer — Adventist Health System dba Florida Hospital — also is "bidding" on this property. Because of this fact, I recused myself from this vote.

If disclosure of specific information would violate confidentiality or privilege pursuant to law or rules governing attorneys, a public officer, who is also an attorney, may comply with the disclosure requirements of this section by disclosing the nature of the interest in such a way as to provide the public with notice of the conflict.

ITEM: FF-1

University of Central Florida
Board of Trustees

SUBJECT: UCF Downtown Tri-Generation Facility Revision

DATE: January 18, 2018

PROPOSED BOARD ACTION

Recommend approval of the change in facility, revised budget, and renaming of the UCF Downtown Tri-Generation Facility.

BACKGROUND INFORMATION

The UCF Downtown Tri-Generation Facility project has been revised and should be renamed the UCF Downtown Central Energy Plant.

The original funding approved by the Board of Trustees was $10.1 million and had a payback of 10 years for Phase I. After exploring numerous design and modeling scenarios, it was determined the initial budget is not sufficient to build the first phase of the project, and the initial payback schedule did not accurately anticipate the sizing and power generation needs of the planned facilities. In addition, the payback period of the power generation component does not reasonably justify the initial and continued operating costs of a campus this size.

As such, the design and phased construction of a central energy plant will move forward to meet only the chilled water needs of the campus. The UCF Downtown Central Energy Plant will cost $12.3 million and will not have a payback.

In addition to the costs of the UCF Downtown Central Energy Plant, the decision to move from a tri-generation facility to a traditional central energy plant has cost implications for the Dr. Phillips Academic Commons. As a result of not self-generating power and hydronic hot water, changes are required, including adding boilers, emergency power generation, emergency circuits, and an external equipment yard. The design and construction costs for these changes increase the academic building budget by $1.3 million.

Bill,
Attached are the talking points with a few adjustments we discussed this morning.
Allen and I will be there with you on Wednesday.
Mike

UCF Tri-Gen to Central Energy Plant

Talking Points v2

- The Board originally approved $10.1 million for a Tri-Generation facility to produce electricity, chilled water, and hot water on the downtown campus. The first phase of the project was originally projected to have a 10-year payback period.

- The university engaged Robins & Morton and RLF to design-build the Tri-Generation facility. Through the design process, the team evaluated various lifecycle scenarios using current data and identified the initial budget of $10.1 million is not sufficient and the 10-year payback is no longer achievable.

- The current team identified the cost of a Tri-Generation facility to support the first phase of the campus would total $19.8 million. The delta is driven by construction escalation, increased equipment costs, and exclusions of several key expenses in the initial estimate.

    - IF ASKED: Design and soft costs, project contingencies, and site work expenses were excluded from the original $10.1 million figure.

- Because chilled water is essential to the facilities on the downtown campus and the more efficient cooling method, our team is recommending the change from a Tri-Generation facility to a Central Energy Plant.

- The Central Energy Plant will allow UCF to generate chilled water at a discount to current market rates. The discount is significant enough to justify our first costs over a 10-year period.

- Because the new facility will only generate chilled water, UCF will work with OUC to provide electricity to the downtown campus.

- The total project cost for the Central Energy Plant is $13.6 million dollars. This includes:

    - $12.3 million towards the construction of a Central Energy Plant with N+1 redundancy in phase one.
    - $1.3 million towards the addition of boilers, emergency power generation and circuits, and an external equipment yard for the Dr. Phillips Academic Commons.

- The university will fund the project through central reserves that have been funding district energy facilities on the main campus.

December 13, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
12:34 - 25:49	
MARTINS	Our first order of business today is, uh, the UCF downtown tri-generation facility update and, uh, Bill Merck's going to take it from here…
MERCK	Alright, I want to start off and, um, talk about it a little bit, but we've got several subject matter experts here in the room so if we get into any engineering or any detail that people would like to know, we've got plenty of people here that can answer the questions. But its background is when we started this project we got pretty excited about the idea of doing a tri-generation facility which would have produced, um, our own electricity downtown, um, domestic hot water and chilled for all the air conditioning systems. And we, I was one of the ones that was pretty excited about that. Um, but as we got deeper into the planning and started really checking things out in, in, uh, greater detail, got further along with the design of the buildings and so forth, it showed that the production of the electric part, the electricity was not really that feasible. The payback on it was just beyond what was, um, worth doing for the initial investment. So we decided to drop that piece which also took with it, the waste heat and everything would have created an opportunity for some domestic hot water. But the chilled water still remained, uh, very viable and so we're modifying the project, uh, to accommodate chilled water for the, uh, first building and then have the capacity to structure and add modules to it to take care of the, the, um, future buildings that will come along down there. The, the chilled water for those of you who are not familiar with it, and I'm going to get a little bit over my head here and I'm gonna look to Allen Bottorff to correct me when I start straying, so Allen don't hesitate to jump in. [*Clears throat*] But, um, the alternative that's a little cheaper, first [*inaudible*] are these so-called the direct-exchange units which are mounted on the exterior of the building. They, uh, are noisy, they have some vibration, which in normal circumstances don't matter too much but when you start to get in some, uh, sensitive equipment it can create some problems. It's, um, more [*inaudible, background clearing throat*] and the creature comfort, the human comfort is not quite as great [*Inaudible*] evenness of having chilled water. So, um, we feel like there's, there's no cost savings with any of these approaches because it's all new productions. There's nothing to save from but looking at cost avoidance going down the road with the chilled water, um, about year, was it 7 or 8? Somewhere in there. Allen?
BOTTORFF	It's at year 8.
MERCK	At year 8 we end up with a considerable savings over retail purchase that we would go through as the alternative. So we're going to, uh, um, and not to mention the first cost that we would have to supplement the local utility company for running lines and everything into our building. We'll have to bear that upfront cost as well. So, all in all

December 13, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	that's where we are. We'll be doing some modifications to the building and the design now to take care of the chilled water, uh, service to the new academic building and the total cost I think was about 12 million or so for the chill-, the chilled water system and about 1.3 something like that additions to the building for, to accommodate chilled water so that's, that's the direction we're going. Without any objection I really think it's the, the thing to do. And I think it probably is helpful too, with OUC. They, I think always wanted to provide us with the electricity so that will be accommodated as well. Allen, did I miss anything?
BOTTORFF	Yes, sir. The OUC has been a true partner and, and helped us along the way.
MARTINS	Overall increase of the academic building budget is $1.3 million, correct?
BOTTORFF	Uh, yes sir. The additional, yeah. [*background throat clearing*]
MARTINS	Questions from the committee? Mr. Chairman.
MARCHENA	Bill, what is the source of funding, uh, for the $12.3 million?
MERCK	We are using and, I'm going to get Christy to correct me if I'm wrong on this. Like I said, I like to have all my subject matter experts here to back me up so if I go astray they can corral me and-. But we're, we're using the same source which is our internal, um, r-, uh, returns on investments, our interest earnings and so forth on, um, our auxiliary accounts and other accounts that are legitimately available for those purposes. And then we let those, we'll, we'll borrow from our cash balances which are enough to handle it and then as those earning come in then we replenish the, the amounts that we took out of the cash that actually belongs to the people the different departments. Is that fair?
TANT	Yes.
MARCHENA	And the, the capacity that we're including in chilled water is it, uh, to accommodate more than just the initial academic building?
MERCK	Sort of. It's going to be a building that'll accommodate the additional units necessary for the future buildings. Right, Allen?
BOTTORFF	Yes sir.
MERCK	So we're building a building with a footprint adequate for the future but we're only going to put in the units necessary for the first.
BOTTORFF	Correct. So what we're doing is we're doing a redundant system instead of what we would need is about 900 tons we're going to build two 900 ton units. That way we have a redundancy [*Inaudible*] out for service or just [*Inaudible*], uh, the land itself [*Inaudible*] add more chillers as we go along [*Inaudible*].
MARCHENA	Thank you. And, and the, uh, my next question, this project is separate from the academic building, uh, project. Is this, you did, uh, [*Inaudible*].
MERCK	Allen, did, did you hear the question?
BOTTORFF	So each, from an electrical standpoint?
MARCHENA	No, [*Inaudible*] the competition for, for building a [*Inaudible*]?
MERCK	Oh, that's, that's…
MARCHENA	Oh, yes sir. That's already been done. So the tri-generation plan has been awarded to [*Inaudible*] to do the design and construction. I got in

December 13, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	through the [*Inaudible*] process and found out that tri-gen what going to cost us actually more than what the return on the investment. So we've continued with them [*Inaudible*].
MARCHENA	Alright. Thank you.
MARTINS	Other questions from the committee?
YEARGIN	Mr. Chairman, this is, um, Bill Yeargin. I've got, um, three questions and since I'm on the phone, um, I mean, I'll just lay them all three out and then, um, Mr. Merck or others can answer. One is, it seems like a pretty good miss, you know, 10 million that's paid back over 10 years to 12 million with no pay back. So, my first question is, you know, have-, do we really understand just future for benefit, you know, how we had such a, what seems like a significant miss to me in our initial assumptions? Uh, my second question is, and, and I think I know the answer to this having to have read the background information, but just for clarity, does the tri-generation work at any cost? Um, is there, you know, and I'm just throwing out any numbers, would it work at 20 million with a 10 year pay back and was the analysis thoroughly done to see if it will work at any cost? And then my second, or my third question is, are there any other, any other intangible benefits related to technology or anything else that would make sense to continue to pursue that tri-generation facility? Those are my three questions.
MERCK	Again, I'm going to start and, uh, ask, um, the others in the room that know more than I to bail me out when I get to far afield here. But the, uh, looking at going with the full tri-generation, we were approaching 18 million, something in that neighborhood, to pull that off which is getting substantially higher. And, um, the, the electric payback was getting into something like 23 years. Um, it was, it was just not, it was going beyond the bounds of really being feasible. There's, uh, the, the technology, um, applied to anything, the thing that we are approaching right now is the, um, the chilled or if we had done tri-gen, if that, that technology is getting better every day. And so we are constantly looking at that and employing whatever the latest, um, tested proven technology is to improve our efficiency. We've been doing that for a number of years now and that's been really worthwhile to us. And so that'll be, that'll be happening on this project as well. The first part, the miss, is embarrassing. No question about that. There were two or three, maybe four contributing factors to it. One of them was, we, um, in the excitement of talking about tri-gen we got too, uh, too focused on just the construction cost and not the total project cost. So there were a lot of soft costs that were glossed over and not really taken into account at that first, when we first looked at it. Secondly, some of the consultant information that we had provided to us didn't take some of the, the realities into consideration with some of those things. And as we progressed into more detail design it became clear that our original desire for tri-gen was just not going to work. Well, it would work but at an unreasonable cost and with, um, an unreasonable time to receive anything back from it.

December 13, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
YEARGIN	So Mr. Merck, a follow up question if I can. So if the, and I'm not trying to hold you to these numbers, but I assume you've done the discounted cash flow and 12 years, 12 million with no payback is a better investment than 18 million with a 23 year payback when you, when you, um, [*Inaudible*] present value?
MERCK	The, the, the problem to me, the problem with a 23 year payback on anything is it is, uh, too ephemeral. I mean, it's just, there's too many things that can happen in 23 years that change the, change the dynamic. And so I'm just uncomfortable looking at, counting on anything that stretches out that far.
YEARGIN	I totally agree with that logic, but have we done the discounted cash flow on 18 million with a 23 year payback just to, so at least we have that comparative…?
BOTTORFF	Yeah, both, both methods were looked, both a simple payback and discounted payback [*Inaudible*] 5% and 7% discounting factor. We still got into 23, 24 years with tri-gen.
MERCK	Did you hear that?
YEARGIN	No sir. I didn't.
MERCK	Can you come up, Allen?
BOTTORFF	Uh, yes. We did look at the discounting factor on both options for, uh, tri-generation. We looked at simple payback and discounted at 5% to 7%. Uh, we found that we were still in the 23 to 24 year range, uh, for tri-gen, which, with the discounted factor.
YEARGIN	OK, thank you.
MARTINS	Does that answer all your questions Trustee Yeargin? [*clears throat*]
YEARGIN	Yes sir. Thank you.
MARITINS	Great. Others? Trustee Self.
SELF	So, uh, following up on Chair Marchena's question, so we assume, and this, this is before my time on the committee, we bidded out a tri-gen plan. We got a tri-gen, you know, bid. So would it behoove us to look at the construction bid just for the chilled water? Get a bid on that? [*Inaudible*] time frame.
MERCK	We would, well the time frame is beyond the fail but go ahead, Allen.
BOTTORFF	You know, I would say that [*background clearing throat*] the team that we currently have that has helped us get to where we are today would actually have an edge in either, either of the situations because of the time they spent in the job and their, their familiarity with it. The, the time to go back out and do a, a bid on this would probably hurt us in the long run. [*Inaudible, background cough*] opening for this chilled water plant. So I think we take advantage of the, the team that's there, would be a recommendation.
MERCK	And to their credit they didn't push forward on something…
BOTTORFF	Correct.
MERCK	…that was, that they saw as they got into it…
BOTTORFF	Right.
MERCK	… was not really workable. They were involved in saying, wait a minute. I mean, we can do it if you want it, but this is not your best option.
MARTINS	Just let me ask, Scott Cole, I heard him on the phone. Scott, we are

December 13, 2017 Finance and Facilities Committee Meeting Transcript

Speaker	Dialogue
	well within our guidelines to be able to continue moving forward with those that have been awarded the tri-gen plant?
COLE	Oh, yes.
MARTINS	Great. Other questions from the committee? OK, we do not need a vote on this? Is that correct?
UNIDENTIFIED SPEAKER	This is an action item.
MARTINS	This is an action item? Ok.
MARCHENA	This is.
MARTINS	OK. Great. Alright. So could we have a motion to approve FFC-1, uh, the updated plan for the UCF downtown tri-generation facility?
UNIDENTIFIED SPEAKER	So moved.
MARTINS	We have a motion. Do we have a second?
GARVY	Second.
MARTINS	We have a motion and a second. Any further questions or comments? Hearing none, all those in favor please signify by saying “Aye.”
MULTIPLE SPEAKERS	Aye.
MARTINS	Any opposed, like sign? Motion carries. Thank you. Thanks very much.
BOTTORFF	Thank you.
MERCK	Thanks, Allen.

Speaker	Dialogue
1:52:31 - 1:54:38	
MARCHENA	Next up is, uh, Finance & Facilities. Trustee Martins.
MARTINS	Thank you, [*clears throat*] thank you, Chairman Marchena. The, uh, Finance & Facilities Committee met both on December the 13th and earlier today. There are a number of items, uh, that we'll bring, bring before the Board for your approval today. Uh, on December the 13th, uh, the first item, uh, which we'll ask for your approval on, is the UCF Downtown Tri-Generation Facility Plant update. Bill Merck, Vice President for Administration and Finance, and Chief Financial Officer, and Lee Kernek, Associate Vice President for Administration and Finance, requested approval for the change in the facility, revised budget, and renaming the UCF Downtown Tri-Generation facility. Because of the project revision, the facility name is now the UCF Downtown Central Energy Plant. The original funding approved by the Board of Trustees was for $10.1 million, and had a payback of 10 years for Phase One. After exploring numerous design and modeling scenarios, it was determined that the initial budget is not sufficient to build the first phase of the project. And the initial payback schedule did not accurately anticipate the sizing and power generation needs of the plant facilities. As such, the design and phase construction of a central energy plant will move forward to meet only the chilled water needs of the campus. The UCF Downtown Central Energy Plant will cost $12.3 million and prov-, will provide cost avoidance in future years. In addition to the cost of the UCF Downtown Central Energy Plant, the decision to move from a tri-generation facility to a traditional central energy plant has cost implications for the Dr. Phillips Academic Commons. The design and construction costs for these changes increase the academic building budget by $1.3 million. The Committee unanimously approved the request as presented, and I move approval on behalf of the Committee.
MARCHENA	There's a motion. Is there a second?
UNIDENTIFIED SPEAKER	Second.
UNIDENTIFIED SPEAKER	[*inaudible*]
MARCHENA	Any questions? Hearing none, all those in favor of approval of FF1, please signify by saying, "Aye."
MULTIPLE SPEAKERS	Aye.
MARCHENA	All those opposed, like sign. The motion carries.
MARTINS	Thank you.

Subject: Follow Up - Philanthropy & Repayment Schedule for Downtown Capital Projects

All,
To quickly summarize the outcome of our meeting yesterday, we are setting our next philanthropic goal (capital) for the current phase of the downtown project at **$12 Million**.

As the funds are raised, they will support the three areas below:

- Critical project components that may otherwise be value engineered out of the project but are required to meet our mission/vision for the campus (example: Active Learning Classrooms)
- Additional renovations/facilities not accounted for in current *funded* Downtown Capital Projects (ex. Faculty Research Space Buildout)
- Accelerated repayment of central university resources contributed towards the capital projects in Phase 1

In addition, I am asking Tammy from our team to schedule another meeting for us to get together in late January to discuss our progress. We will make sure that Christy Tant is included in Tracy's absence.

Tracy,
Can you share the updated repayment schedule for Downtown Capital Projects? There were some updates you were going to make following our meeting.

Let me know if I missed anything. –Mike

Misty – the $12 million came from the meeting held in the Foundation offices November 2, 2107 with Dorcas, me, Paul, Thad, Mike and Karen. In that meeting Paul and others confirmed the target and the fact that those additional donations were already needed to support expected downtown costs – and that they should not be seen as new dollars available to the downtown team to expand plans. We reviewed the existing downtown projected costs schedule at that time and agreed that we would meet periodically so that all were on the same page. Attached is Mike's summary of the meeting and the schedule used at that time.

Let me know if you have any other questions.

Subject: RE: Downtown Donations

I've had a lot of conversation with the development team working on Downtown fundraising and the recurring question seems to be recollection on how the $12M became the established target for additional philanthropy. Do you have any guidance you can provide?

I can share that we are on the verge of closing a $1M gift but it includes a naming recognition so it will have to go to BOT before we can officially count it. Several others that Paul has informed me are progressing well but not a stage where we could count them yet. He is currently in Michigan attending a funeral and we can sit down to get a more thorough update once he returns, but I don't think it will result in anything at a stage that could be shared or counted yet.

Thanks,
Misty

No serious concerns, we did a thorough vetting of all the outstanding balances for year end. The biggest on the list is the Dr. Phillip's gift and they got stalled on the initial payment because of delays in ground breaking but now they are established to make their annual payments in October.

Valencia is the other big one and Mike Kilbride and Paul Baker are in constant contact I think their payment is just timing because of Valencia board approval but given the close partnership there I can't see eventual payment being an issue.

Thanks,
Misty

Misty – Is the FY18 outstanding amount due to timing, or are there any serious concerns about collectability? There are two sizable amounts and one that hasn't remitted the FY17 or FY18 installment.

Hi Brad,

We can do our best to get this updated as of August but typically we update this on a quarterly basis because there's typically not a significant amount of variation from a month to month view. Attached is this latest that we sent to John.

Thanks,
Misty

Hi Misty or Hina,

We are updating some funding schedules for capital projects. Can you please provide an update of the attached as of August 2018? We are looking to provide an update today. Please let me know if that's not possible.

Thanks for your help with this.

Brad

All - attached is an updated schedule. Christy is up to speed on this. We need to schedule a meeting with Bill Merck, Curt, and anyone else you think is appropriate, to get university support for this decision to use the next $12 million raised this way. Mike - can you have Tammy schedule that meeting? Thanks and let us know if you have any questions or comments on the schedule.

Subject: Follow Up - Philanthropy & Repayment Schedule for Downtown Capital Projects

All,

To quickly summarize the outcome of our meeting yesterday, we are setting our next philanthropic goal (capital) for the current phase of the downtown project at **$12 Million**.

As the funds are raised, they will support the three areas below:

- Critical project components that may otherwise be value engineered out of the project but are required to meet our mission/vision for the campus (example: Active Learning Classrooms)

- Additional renovations/facilities not accounted for in current *funded* Downtown Capital Projects (ex. Faculty Research Space Buildout)

- Accelerated repayment of central university resources contributed towards the capital projects in Phase 1

In addition, I am asking Tammy from our team to schedule another meeting for us to get together in late January to discuss our progress. We will make sure that Christy Tant is included in Tracy's absence.

Tracy,

Can you share the updated repayment schedule for Downtown Capital Projects? There were some updates you were going to make following our meeting.

Let me know if I missed anything. –Mike

Mike Kilbride

Managing Director

UCF Downtown

	UCF Executive Budget Committee Meeting **AGENDA**
Date:	March 23, 2018
Time:	2:00 – 3:00 p.m.
Location:	MH-395E
Facilitator:	Provost Dale Whittaker and Vice President William Merck
Voting Members:	Cristina Barreto, Scott Cole, Maribeth Ehasz, Deb German, Grant Heston, Michael Johnson, Elizabeth Klonoff, John Pittman, Rick Schell, Bill Self
Other Invitees:	Tracy, Clark, Lisa Jones, Ronnie Korosec Mike Morsberger, Robert Taft, Christy Tant, Mark Wray

UCF Budget Philosophy: An effective budgeting process transforms strategic goals into achievable operating plans, and:

- ***Properly and continuously aligns resources***
- ***Employs an "all-funds" approach***
- ***Maintains fiscal responsibility with those closest to operational decisions***
- ***Increases communication, transparency, and accountability***

- - - - Agenda Topics - - - - -

1. Update on funding for UCF Downtown Campus (Thad Seymour/ Mike Kilbride)
2. Update on Student Success Investment Model (Lisa Jones)
3. Plan for April meetings (Christy)

UNIVERSITY OF CENTRAL FLORIDA	**University Budget Committee (UBC) Meeting MINUTES**
Date:	March 26, 2018
Time:	2:00 – 3:00 PM
Location:	MH – 395
Facilitator:	Tant
Attendees:	Committee members: Barreto, Cole, Ehasz, German (via phone), Heston, Klonoff, Merck, Pittman. Other invitees: DuBuc, Jones, Morsberger (via phone), Taft
Minutes:	Wray

Discussion Points

Funding for downtown campus – Kilbride and Seymour –

Funding for Phase 1 of downtown project – project is larger than simply the Dr. Phillips Academic Commons; the existing Center for Emerging Media, central energy, parking, retail, and private student housing.

Kilbride outlined plans to pay for each component of the downtown campus and discussed plans for spending any additional funds raised. The Foundation's fundraising effort ($12 million) goal has been allocated as follows:

- $5 million academic enhancements
- $.5 million to Centroplex re-development
- $6.5 million repaymnent of university resources

Efforts are ongoing to value-engineer the downtown academic commons building and increase fundraising.

This spending plan covers facilities – the operating costs are planned to be addressed via exceptional funding requests and the move of organizational budget for the departments that relocate to downtown

Q: is there a Plan B if fundraising does not materialize? Seymour answered there is no real alternative, but stressed that fundraising status is positive. Morsberger seconded this opinion, and Kilbride offered details about how any new philanthropy funding would be allocated if and when it materializes.

Seymour reitereatred that the value-engineering efforts are paying dividends in keeping the project on track. Merck offered advice about monitoring the parking garage construction.

Student success investment model – Lisa Jones reminded the members that the Provost Whittaker charged a work group to develop a budget model that would guide allocations. The workgroup defined a process in which funding requests would occur in 3 areas:

- Undergraduate student advising
- Student engagement efforts
- Graduate student support

The leaders of each area will submit proposals for committee evaluation. Funding will come from growth in undergraduate tuition (approximately $1 million expected for the upcoming academic year). Jones notes she expects a reduction in student success funding requests for less than $1million routing to the UBC because of this model and process. Ehasz noted that scholarships and operations are not included in the model. There are slight differences in the percentage allocations of the undergraduate and graduate tuition dollars (100% for graduate vs 70% for undergraduate, with state-allocated performance funding making up any differences

Planning for April UBC meeting – Tant

3 meetings scheduled for April

April 10 – 2 hour meeting

April 25 – 6 hour meeting

April 30 - 2 hour finalization meeting

Ehasz said keep the April formatting because a student representative can see the entire process through beginning to end.

Perhaps 38 submission requests are scheduled for the April 25 meeting

Meeting adjourned 2:29 p.m.

	**UCF Executive Budget Committee Meeting** **AGENDA**
Date:	March 23, 2018
Time:	2:00 – 3:00 p.m.
Location:	MH-395E
Facilitator:	Provost Dale Whittaker and Vice President William Merck
Voting Members:	Cristina Barreto, Scott Cole, Maribeth Ehasz, Deb German, Grant Heston, Michael Johnson, Elizabeth Klonoff, John Pittman, Rick Schell, Bill Self
Other Invitees:	Tracy, Clark, Lisa Jones, Ronnie Korosec Mike Morsberger, Robert Taft, Christy Tant, Mark Wray

UCF Budget Philosophy: An effective budgeting process transforms strategic goals into achievable operating plans, and:

- ***Properly and continuously aligns resources***
- ***Employs an "all-funds" approach***
- ***Maintains fiscal responsibility with those closest to operational decisions***
- ***Increases communication, transparency, and accountability***

- - - - Agenda Topics - - - - -

1. Update on funding for UCF Downtown Campus (Thad Seymour/ Mike Kilbride)
2. Update on Student Success Investment Model (Lisa Jones)
3. Plan for April meetings (Christy)

Phish Alert

University Budget Committee,

Attached is the agenda for Monday's meeting (2 – 3pm).
Please note that Dr. Whittaker will not be in attendance due to a calendar conflict.

Thanks, and have a great weekend!

Subject: Materials from UCF Downtown Presentation to UBC

Donna,

Attached is a copy of the presentation and funding plan that was discussed at the UBC meeting yesterday. – I am in meetings most of the day, but I think an introduction would be great. I will try and call tomorrow if that is okay with you.

Mike

DOC050118.pdf Repayment Sched for Internally Financed Cap Projects. Apr18.xlsx

Received the below from Lashanda. There was an increase of $800K for the Downtown Chilled Water Plant to $12.3M (see BOT item). I updated this on the schedule in the format that Tracy put together. The $100K increase for Stadium AV is to be covered by Athletics (per John). We already had Downtown Infrastructure reflected in the schedule at $5M so no update was needed. I'm a little confused by her comment on the Downtown Academic Building. BOT item says it was a $1.3M increase, (original $60M plus $1.3M increase) but we already had a projected total cost of $66.2M in our internal loan schedule. I'll call her about that one tomorrow.

Hi Brad,
Sorry for the delay, here's what we have.
Also I have attached the document where the two asterisked projects have been requested/approved by BOT.
Let me know if you have any questions.
Internally Financed Capital Project Total Project Cost
Research I Building & Buildout Costs $ 53,502,615 $53,502,615
New Chiller(District Energy Plant IV) $ 14,561,896 $14,591,896.45
Stadium Audio Visual $ 5,600,000 $5,700,605.79
CFE Arena Audio Visual $ 2,200,000 $2,245,570.13
Center for Emerging Media $ 5,000,000
*Downtown Academic Building $ 61,200,000 $61,300,000
Downtown Garage $ 13,500,000
*Downtown Chilled Water Plant(CEP) $ 11,500,000 $12,300,000
Downtown Infrastructure $ 4,800,000 $5,000,000
Downtown Student Service Center $ 5,400,000

Hi LaShanda,
Tracy is asking for the latest total project costs for the projects below. These were as of last October so I know there may have been some changes. Could you provide us updated numbers? The numbers don't have to be exact. We just want to make sure there haven't been any significant changes and if there were, we want to update them.

Internally Financed Capital Project	Total Project Cost
Research I Building & Buildout Costs	$ 53,502,615
New Chiller	$ 14,561,896
Stadium Audio Visual	$ 5,600,000
CFE Arena Audio Visual	$ 2,200,000
Center for Emerging Media	$ 5,000,000
Downtown Academic Building	$ 61,200,000
Downtown Garage	$ 13,500,000
Downtown Chilled Water Plant	$ 11,500,000
Downtown Infrastructure	$ 4,800,000
Downtown Student Service Center	$ 5,400,000

Hi Megan and Meghan,

Can you look at the current project budgets for the attached to make sure that the values reflected here are still accurate? Don't worry about the funding sources and repayments for now, just looking to make sure first that the Total Project Cost is accurate.

Thanks.

January 13, 2017 Board of Trustees Meeting Transcript

Speaker	Dialogue
37:20 - 42:01	
Merck	We, we were talking primarily about operating budgets today, and we'll, s-, in the interest of time, pretty much cut it off here. But there's also, um, the capital budgeting that we would want to talk about too to help you grant-, get a better understanding of how we go about, um, bond issues and going in the-, how that, that whole process works. Another thing that I know the Chairman, Chair has asked us for before is, is when we talk about, um, borrowing money from ourselves to fund some things like the, the 20 million for the downtown campus or, or some of those kind of things. How do we do that? We want to get into some, some detail about that to let you know what our opportunities are as well as our limitations. Um, and the basic limitation on most all of that is, we've gotta have a plan for replenishing that with some revenue source. So there's some things, if we can't figure out how to pay it back, we can't borrow from ourselves. Then they're other things if we do have plan, and we can go over s-, uh, some examples of those, then we can borrow from ourselves a lot more cheaply than we can go to the private world to do.
Marchena	A-, and as part of that question, Bill, one of the things that I think would be important for the Board to really understand is, since we have what I choose to call, different color of money, um, i-, in what circumstances are we able to borrow from different colors of money, and then replenish?
Merck	Yeah, I …
Marchena	I think it would be important for the Board, not, not necessarily today [*simultaneous speaking*] …
Merch	No, no, I understand, understand.
Marchena	[*simultaneous speaking*] … for us to understand.
Merck	But to …
Marchena	Yeah.
Merck	… just to, to add just a little tiny bit to that, um, and you and I've had this conversation too I think, we were recently talking about, um, the downtown project and building a parking garage. And we have, um, some cash balances built up in parking services, so we had a conversation with Ben Watkins, who's head of Division of Bond Finance, and whose offices we would use to go through to do a bond issue to pay for that. His recommendation, and we're fine with it, his recommendation was to use up all of our accumulated cash against that garage, which would leave us somewhat short, maybe a couple three million dollars short. I said that what we could do to make that up, is Tracy and I would work together to borrow some money from the auxil-, other auxiliary balances, where we have a way to pay that back over time, so we pay cash for that garage, rather than borrowing any money at all. He was totally in favor of that plan, and said in the private sector if you can borrow some internally [*clears throat*] as opposed to going out that's usually the best way to do it. So, that's the kind of thing where we might wanna borrow from ourselves to lower our cost of financing to, to build something like that. But it involves a

January 13, 2017 Board of Trustees Meeting Transcript

Speaker	Dialogue
	lot of conversation and plans for as how that would be repaid. And we'll get into some more depth on that later.
Marchena	Yes, sir.
Garvy	I have one more question. [*clears throat*] To what extent, in the conversations that have taken place thus far, has, uh, maintenance and upkeep of facilities emerged, not only here, but among other universities?
Merck	It's a huge, huge issue that gets discussed quite a bit, and we do make that known to the, uh, Board of Governors' staff, and they know that, that's an issue for us. Um, w-, what hurts I think, and I, I'm, I'm gonna keep this brief, but what hurts I think is, probably pri-, prior to the recession years, um, we were getting money from the State to maintain our facilities on a fairly regular basis. We never thought it was enough, but it was, it was pretty good. A lot of that has dried up, so, our deferred maintenance is increasing, and, on some of the critical deferred maintenance items we're having to dip into our operating budget to pay for some things. Well, that takes away from our teaching and research activity if we're having to use up some of that operating money to take care of, uh, I just make up this, a roof that's leaking or things like that that just have to get done.
Unidentified Speaker	OK.
Merck	So, that's been a, a, a point of, of real concern for us at the State level.
Garvy	And, and it has been for several years.
Merck	Yes.
Garvy	My concern is that nothing seems to happen at the legislative level regarding it, so to what extent and how do we go about changing that?
Merck	We ha-, we need to continue to go through the Board of Governors to make those needs known.
Marchena	That's [*simultaneous speaking*] …
Merck	That's our, that's our avenue.
Marchena	… [*simultaneous speaking*] … point, it's the Board of Governors.
Merck	Other comments or questions regarding this item?
1:16:33 - 1:17:20	
Marchena	Trustee Garvy, I believe you're gonna also provide us with a Finance & Facilities report.
Garvy	Yes, in, uh, Chairman Martin's absence, uh, the Finance & Facilities Committee met on December 7th. Uh, Lee Kernek, Associate Vice President for Administration and Finance, requested approval of a minor amendment to the UCF Campus Master Plan, to modify the urban design and capital improvements map, and the capital improvements list, in order to add six new projects in downtown Orlando, four new projects on the main campus, and one renovation at the Florida Solar Energy Center. The committee unanimously approved the amendment, and this amendment is on today's consent agenda for approval.

SUBJECT: FAMU Misuse of Auxiliary Funds for Athletics, Investigative Report Update

PROPOSED COMMITTEE ACTION

Information only

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Florida Agricultural and Mechanical University Board of Trustees Chair, Kelvin Lawson, will provide Committee members with the results of the university's investigation into the discovery of the use of auxiliary funds to support the athletics program, which is in violation of Board of Governors Regulation 9.013. Chair Lawson reported to the Committee at its June 13, 2019 meeting that personnel actions had taken place in response to learning that staff had not been following established procedures implemented over the past few years as part of the 12-year repayment plan.

Supporting Documentation Included: PowerPoint Presentation

Facilitators/Presenters: Mr. Kelvin Lawson

Appendix F – FAMU Athletics Directors Timeline, 2008 – Present 38

Appendix G - Key BOT/BOG Athletics Cash Deficit Actions 39

Executive Summary

The Florida Agricultural and Mechanical University's ("University" or "FAMU") Division of Audit and Compliance, on May 14, 2019, became aware of the existence of transfers of University auxiliary funds to the University Athletics Department ("University Athletics"), which are unallowable under Board of Governors regulation 9.013. The University has been actively managing a 2013 corrective action plan regarding University Athletics cash deficits, updated in 2016 to include repayment of prior unallowable fund transfers to University Athletics (the "repayment plan"). Included in the corrective action plan are processes and controls that were implemented to prevent future unallowable fund transfers to University Athletics. Until the recent discovery of unallowable transfers by FAMU Division of Audit and Compliance, the University's Board of Trustees and President were unaware of the existence of improper fund transfers and had represented to the Board of Governors Audit and Compliance Committee (AACC), that the University was following the 2016 corrective action plan and only appropriate funds were being used to support University Athletics.

At the direction of the University President, and in coordination with the Board of Trustees, FAMU Division of Audit and Compliance sought support from independent external forensic professionals to help determine the status of the auxiliary fund repayment plan, investigate the existence of new improper fund transfers to University Athletics, and assist in validating the current total amount due to auxiliaries by University Athletics as of the most current date possible.

Carr, Riggs & Ingram, LLC ("CRI") was engaged by the University to provide the requested financial-related forensic services for the period of July 1, 2015, through June 20, 2019 (the "review period"). CRI's forensic procedures were designed to provide detailed responses to six objectives established by FAMU Division of Audit and Compliance. Also requested were two objectives pertaining to process and control recommendations to University Athletics budget process, to ensure that they are appropriate, correctly managed, and comply with applicable laws, regulations, policies, procedures, and accounting principles.

CRI verified the existence of six transfers not in compliance with Board of Governors regulations. Total transactions processed contrary to Board of Governors regulation 9.013 during the review period totaled $2,687,768.66.

Two of the six verified transfers of auxiliary funds to University Athletics, determined to be contrary to Board of Governors regulation 9.013, and executed outside of normal University administrative processes, totaled $2,234,006. The remaining four of six verified transfers of non-athletic concession auxiliary funds to University Athletics, determined to be contrary to Board of Governors regulation 9.013, and executed within normal University administrative processes, totaled $453,763. CRI notes that University management misapplied Attorney General Opinion 072-193, which resulted in the approval and processing of four transfers contrary to Board of Governors regulations.

FAMU Athletics Use of Auxiliary Funds
Executive Summary

CRI verified the actions taken by the University to repay the liability due to University auxiliaries, in accordance with the repayment plan. During the review period, the University had received funds from FAMU Foundation, Inc. and appropriately remitted those funds to the University auxiliaries, in accordance with the repayment plan. CRI noted the funds received from FAMU Foundation, Inc. and remitted to University auxiliaries totaled $754,904, and exceeded the expected repayment plan amount during the review period by $73,071. The increased repayment amount indicates the repayment plan was being updated for continued unallowable transfers of University auxiliary funds to University Athletics.

Based on the new transfers of funds to University Athletics, and the payments by University Athletics to University auxiliaries, CRI calculated the current liability due to University auxiliaries at June 20, 2019 to be $8,946,899.

CRI determined that the two transfers of auxiliary funds to University Athletics, which were conducted outside of University administrative processes, were transacted through management override of controls. The approval of both the University CFO and President were required to transfer University auxiliary funds to University Athletics. Only the approvals of the CFO and Controller were identified with either of the two transfers.

The primary weaknesses identified by CRI, in the controls over transfers of auxiliary funds to University Athletics, were in oversight and monitoring. Although authorization controls had been implemented to prevent such transfers, no effective mechanism for oversight of the authorization process existed, and the controls simply relied on self-monitoring for compliance.

CRI recommends the design and implementation of system-based controls within the University's PeopleSoft system to better mitigate the risk of unallowable transfers of auxiliary funds to University Athletics. The use of system controls, property designed and implemented, could; limit the ability for an improper transfer to be processed; require system logged approval of all required approvers to conduct a transfer that could potentially be unallowable; or provide automatic notification to pre-determined individuals that a potentially improper transfer was recorded, prompting further oversight or investigation.

Joseph Maleszewski
Vice President of Audit
Florida Agricultural and Mechanical University

Carr, Riggs & Ingram, LLC was engaged by Florida Agricultural and Mechanical University (the "University" or "FAMU") to provide requested financial-related forensic services for the period of July 1, 2015, through onset of this engagement June 20, 2019 (the "review period") in connection with the transfers of certain University auxiliary funds in support of University Athletics programs contrary to Board of Governors regulations. Attached is our Forensic Report detailing the procedures performed and the results of those procedures. At the University's request, we have also considered recommendations for improvements to specific areas related to the internal controls over fund transfers and the University Athletics' budget process.

We have performed this engagement in accordance with statements on Standards for Consulting Services[1] promulgated by the American Institute of Certified Public Accounts ("AICPA"), Standards for Complaint Handling and Investigations for the State University System of Florida and other applicable professional standards for forensic engagements. While our work involved analysis of accounting records, our engagement did not constitute an audit in accordance with generally accepted auditing standards or any other attestation or review service in accordance with standards established by the AICPA. Had other procedures been performed, other matters may have come to our attention that may have affected the findings and recommendations reported herein.

Objectives

The objectives of this engagement relating to auxiliary fund transfers were to:

1. Compile a timeline of key events related to the transfers of certain University auxiliary funds in support of University Athletics programs contrary to applicable Board of Governors regulations.

2. Identify and schedule pertinent transaction dates and amounts related to the repayment plan presented to the Board of Governors on September 21, 2016. This process includes both the Foundation payments to Auxiliary funds on behalf of University Athletics and auxiliary transfers to University Athletics during the review period.

3. Re-compute and validate the repayment plan based on the work performed in accordance with objective 2.

[1] 2015th Edition.

4. Identify the mechanisms, practices, processes, systems, individuals, and authorizations (verbal and written) which affected the transfers of auxiliary funds in support of University Athletics programs.

5. Evaluate whether these transfers from auxiliary funds to University Athletics complied with applicable laws, regulations, policies and procedures, and accounting policies.

6. Identify weaknesses in University processes related to the accounting and processing of planned repayments from University Athletics to Auxiliary funds to better monitor and prevent future improper auxiliary fund transfers.

As a component of the engagement, we were also asked, based on our work performed, to provide recommendations for the University, which include:

7. Make recommendations for improved controls that will prevent, detect, and correct any further recurrence of improper transfers of University Auxiliary funds to support University Athletics programs.

8. Recommend improvements to University Athletics processes for ensuring that budgets are appropriate, managed, and all related transactions comply with applicable laws, regulations, policies and procedures, and accounting principles.

Scope of Work

Our forensic procedures were to be performed for the period of July 1, 2015, through June 20, 2019, the effective start of our engagement. Our work was limited to the areas identified by FAMU Division of Audit and Compliance as specified in the objectives.

Background Information

FAMU is part of the State University System of Florida, which is governed by the Florida Board of Governors (“Board of Governors”). The University is directly governed by a Board of Trustees (the “Trustees”) which is composed of 13 members. The Board of Governors establishes the powers and duties of the Trustees. The Trustees are responsible for setting University policies and provide governance in accordance with the State law and Board of Governors regulations. The University President is selected by the Trustees and confirmed by the Board of Governors. The University President serves as the Executive Officer and Corporate Secretary of the Trustees and is responsible for administering the policies established by the Trustees for the University.

FAMU Athletics Use of Auxiliary Funds Forensic Report

Auxiliary enterprises are operated by the university or contracted to vendors to provide services and goods to faculty, staff, students, and others. State statute[2] provides that auxiliary enterprises include various activities such as: housing, bookstores, student health services, continuing education programs, food services, operation of vending machines, day care centers, golf courses, and university athletics programs. Board of Governors regulations[3] provides that each university may determine whether its auxiliary services will be self-supporting on an individual or collective basis, with the exception of the university's athletics programs, which must be self-supporting, i.e., not funded by other university auxiliary dollars.

The University accounts for its athletic programs in a separate auxiliary enterprise fund. The University Athletics' program does not produce sufficient cash resources to support its operations without external assistance. University Athletics has experienced annual cash deficits since at least 2008, and has relied on cash transfers from auxiliary funds to support operations. As Board of Governors regulations require a university's athletics program to be self-supporting, these transfers were reported as contrary to Board of Governors regulations by the Auditor General through the operational audit report No. 2014-108 issued in February 2014. Contained in the Auditor General's report No. 2014-108 was a reference to operational audit report No. 2013-103 denoting the existence of continued similar findings.

On September 21, 2016, Kelvin Lawson, Board of Trustees Chair and management provided a presentation to the Board of Governors Audit and Compliance Committee ("AACC") concerning the University's corrective action plan relating to the Auditor General operational audit findings. Within that presentation, the University's then Vice President for Finance and Administration / CFO, Angela Poole, provided the University's plan (See Appendix B) for repayment of auxiliary funds that had been used to support University Athletics' programs contrary to Board of Governors regulations. Included in the corrective action plan was a requirement for the University CFO and President to approve auxiliary transfers to University Athletics, to ensure only allowable sources were used.

As of June 30, 2015, the measurement date of the University's repayment plan presented to the Board of Governors AACC, the University Athletics' program had generated a deficit cash balance of $7,678,203 of which $664,169 was transfers from auxiliary or agency funds investment earnings to University Athletics programs. Transfers of investment earnings from auxiliary funds to a university's athletics program are allowable under Florida Statute[4] with the requirement the transferred balance is used specifically to fund athletic scholarships. Therefore, in accordance with the repayment plan presented to the Board of Governors AACC in 2016, the University committed to a payable of $7,014,034 to University auxiliary funds. Repayment was to be structured over a 12-year period with zero percent interest.

[2] Section 1011.47(1), Florida Statutes.
[3] Board of Governors Regulation 9.013 *Auxiliary Operations*.
[4] Section 1011.43, Florida Statutes.

The repayment plan was based on a funding model of shared resources between University Athletics and the University's Foundation. Beginning in fiscal year 2016/17 the University Foundation would fund the initial payments under the plan while University Athletics would begin contributing to plan payments in fiscal year 2019/20, at which point both organizations would contribute funding through the completion of the repayment plan.

During performance of internal audit functions, William Knight, FAMU Division of Audit and Compliance, Internal Auditor/Investigator, initiated inquiries on April 5, 2019, regarding University Athletics' activities and compliance with the components of an implemented corrective action plan and the auxiliary fund repayment plan. In response to those inquiries, representation was received from Ronica Mathis, Budget Director on May 10, 2019, that there were no transfers of auxiliary funds to University Athletics. On May 14, 2019 Wanda Ford, VP for Finance and Administration/CFO ("CFO") made a correction to the response provided by Ronica Mathis, Budget Director, identifying the existence of auxiliary fund transfers to University Athletics. Through correspondence with Wanda Ford, CFO on May 14, 2019 William Knight, FAMU Division of Audit and Compliance, Internal Auditor/Investigator, received an updated repayment plan prepared by Tiffany Holmes, Controller. This plan had an "as of date" of June 30, 2018, and stated that University Athletics was committed to a repayment of $9,248,040 to University auxiliaries. FAMU Division of Audit and Compliance staff began gathering information to determine why the repayment amount on the schedule provided significantly exceeded the original repayment plan when the expectation was the balance should have declined due to scheduled repayments.

At the direction of President Robinson in coordination with Board of Trustees Chair Lawson, FAMU Division of Audit and Compliance sought support from independent external forensic professionals to help determine the status of the original repayment plan, investigate the existence of new fund transfers to University Athletics, and assist in validating the current total amount due to auxiliaries by University Athletics as of the most current date possible.

Summary of Procedures Performed

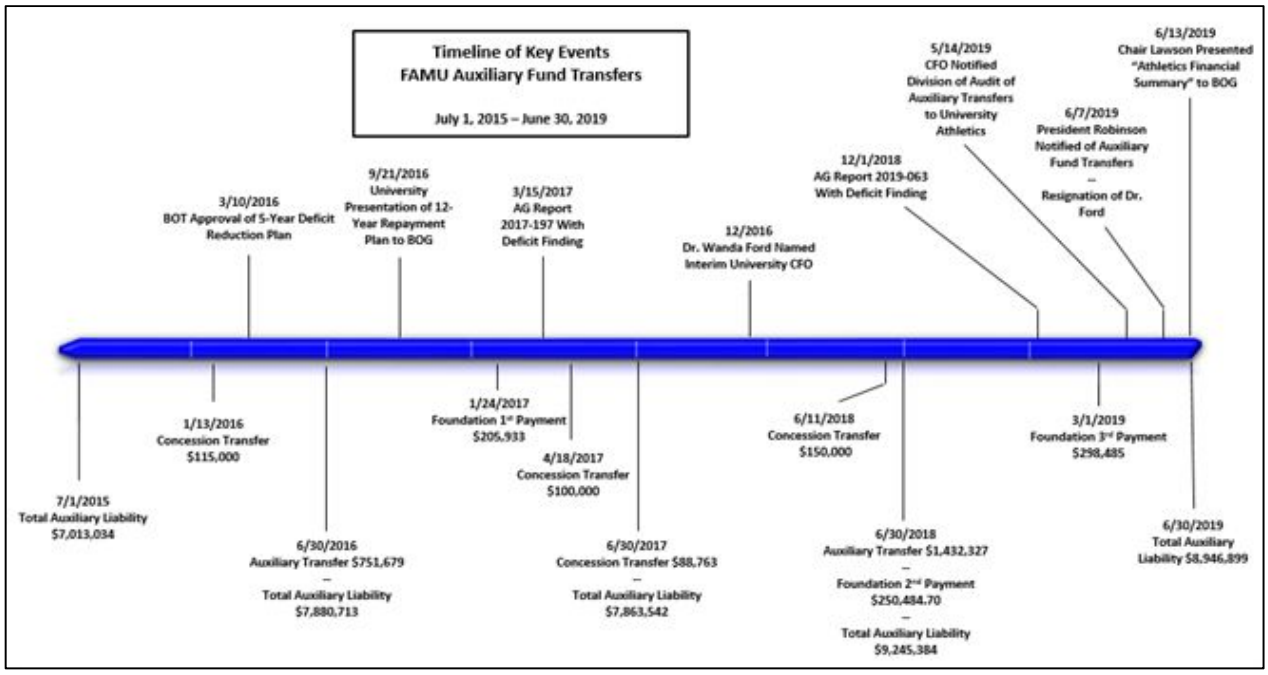
General Procedures

At the onset of the engagement, FAMU Division of Audit and Compliance provided the CRI engagement team with relevant internal reports, external audit reports, correspondence, presentations, and internal accounting relating to the identified transfers of auxiliary funds to University Athletics. The documents provided are detailed in the Appendix A of this report. CRI coordinated with FAMU Division of Audit and Compliance to facilitate and support the acquisition of requested documents for support of specific procedures, including detailed supporting documentation from the University's accounting and records management system PeopleSoft. FAMU Division of Audit and Compliance also assisted in facilitating requested interviews with identified persons of interest currently and formerly employed by the University.

CRI requested, and performed, interviews with the following employees;

- Larry Robinson – University President
- Kelvin Lawson – Board of Trustees Chair (non-employee)
- Shawnta Friday-Stroud – FAMU Foundation, Inc. Executive Director
- Jessica Huges – FAMU Division of Audit and Compliance Investigations Administrator
- Nicole Reese – Cloud, Assistant Budget Director
- Erica Wilcox – Assistant Athletics Director of Budget
- Rebecca Brown – Assistance Vice President Administrative Affairs

CRI requested, but was unable to perform, interviews with the following employees:



- Wanda Ford – Vice President of Finance and Administration/CFO (Resigned)
- Tiffany Holmes – Controller
- Ronica Mathis – Budget Director

CRI notes that interviews could not be performed with three individuals, as they requested the presence of their personal legal counsel, who could not be made available within the timeframe of CRI's engagement and expected report completion date.

Objective 1 – Compile a timeline of key events related to the transfers of certain University auxiliary funds in support of University Athletics programs contrary to applicable Board of Governors Regulations.

CRI obtained from FAMU Division of Audit and Compliance an established timeline of events related to University Athletic deficits and the identified transfers of Auxiliary funds to University Athletics. CRI validated the information provided by review of supporting records, communications, public statements, account records, payments and receipts. CRI also conducted multiple inquiries with University personnel to support the development of the key event timeline and the other objectives of the forensic engagement. The timeline developed below presents key events that transpired between July 1, 2015, and June 20, 2019.

FAMU Athletics Use of Auxiliary Funds
Forensic Report

Six transfers of auxiliary funds were determined to be contrary to Board of Governors regulations conducted during the review period and is notated on the timeline. Three scheduled payments under the established repayment plan presented by the University to the Board of Governors AACC during the review period are notated on the timeline. Non-financial information notated on the timeline include the date of the University's presentation of the repayment plan to the Board of Governors AACC, Auditor General reports detailing continued finding on University Athletics deficits, key personnel changes, dates of when the existence of improper auxiliary fund transfers were identified and reported to management, and when updates were presented to the Board of Governors AACC by the Board of Trustees regarding University Athletics.

Not included on the timeline are; the University President's weekly meetings; University and University Athletics budget planning meetings; Board of Trustees Athletics Committee meetings; monthly briefings on the status of University Athletics budget with President Robinson, Board of Trustees Chair Lawson, and the Board of Governors AACC staff and Chair; and University Athletics Task Force meetings held at varying times throughout the review period. Representations received from multiple University employees and stakeholders including the University President, Board of Trustees Chair, FAMU Foundation, Inc. President, and FAMU Division of Audit and Compliance Investigator indicate that information regarding the issues surrounding University Athletics budget deficits and the appropriate sources of funding for University Athletics was presented regularly by the University CFO, Controller, and Budget Director. Mention of these meetings or events is relevant to the review period as it serves to support that University leadership was working to maintain a culture of compliance through regular communication of University goals and policy, by having

executive management actively engaged in oversight and addressing issues with the University's operational management team.

Of the non-financial information notated on the timeline, it is important to consider the date of the first two transfers of auxiliary funds (January 13, 2016, and June 30, 2016) during the review period, and the date of the presentation of the University's repayment plan to the Board of Governors AACC (September 21, 2016). As of the presentation date to the Board of Governors AACC, the University had already transferred an additional $866,679 of auxiliary funds to support University Athletics deficits. During interviews, President Robinson and Board of Trustees Chair Lawson, expressed a clear understanding that transfers of auxiliary funds in support of University Athletics was not an allowable activity, and was not authorized nor known by them.

In gathering initial information regarding the repayment plan, CRI reviewed the Board of Governors AACC minutes of the meeting held September 21, 2016. The minutes disclosed the University's update of a 2013 corrective action plan[5], which included the presentation of the repayment plan. CRI noted the language used in the minutes focused primarily on the University's continued management of Athletic program cash deficits and the University's actions to resolve those deficits through unallowable use of auxiliary funds.

CRI reviewed the video recording of the September 21, 2016 Board of Governors AACC meeting to observe all of the information provided by FAMU management representatives and any comments from the AACC members. During the portion of the presentation provided by Angela Poole, CFO, which pertained to the use of auxiliary funds and the repayment plan, she stated; "We also are requiring approval from the CFO and the president for any transfers from auxiliary accounts to be sure that only allowed sources are used and that if they [fund sources] are not allowed we will be reporting that to our Board Representative and adding that on to any amounts that need to be repaid with understanding that these are amounts that need to be repaid." This statement stands in contrast to the PowerPoint slide deck (See Appendix B) accompanying the presentation to the Board of Governors AACC and representations made to CRI by the Board of Trustees Chair Lawson and President Robinson who indicated that transfers of this type were not allowable and not authorized and conflict with Board of Governors regulation.

While the University had attempted to lay out a clear path to resolve cash deficits, prevent unallowable uses of funds, and repay previous improper fund transfers, the process was flawed. Transfer of University auxiliary funds, contrary to Board of Governors regulations, was considered to be a potential option that could be taken by Angela Poole, CFO, as long as the transferred amount was disclosed and eventually repaid. CRI notes there were no pertinent follow-up questions to the Angela Poole, CFO's statement, and also notes that this presentation was part of an information section of the meeting and did not correspond with any action item of the Board of Governors AACC. CRI considers the statement made by Angela Poole, CFO, along with the existence of two new

[5] August 8, 2013 FAMU Board of Trustees 5-year Deficit Reduction Plan.

auxiliary fund transfers made prior to the presentation, to indicate the repayment liability between University Athletics and University auxiliary funds represented an informal line-of-credit to cover University Athletics cash deficits on an ongoing basis, as it had already been utilized for that purpose.

Objective 2 - Identify and schedule pertinent transaction dates and amounts related to the repayment plan presented to the Board of Governors on September 21, 2016. This process will include both the Foundation payments to Auxiliary funds on behalf of University Athletics and auxiliary transfers to University Athletics for during the review period.

At the onset of our engagement, CRI received a schedule of known transfers from auxiliary funds to University Athletics that were identified by FAMU Division of Audit and Compliance. The objectives of our forensic procedures performed on the this schedule were to verify the existence of those transfers, perform a search for other transfers contrary to Board of Governors regulation, and research the existence and treatment of repayment funds received from FAMU Foundation, Inc. in accordance with the repayment plan. CRI obtained the financial general ledger detail from PeopleSoft[6] for University Athletics (fund 115) and University Auxiliaries (fund 116) for the fiscal years ending June 30, 2016, 2017, 2018, and 2019, respectively. With these ledgers, we performed forensic procedures for all transactions posted to both fund 115 and 116 indicating the transaction contained activity or represented an event impacting both funds. CRI reviewed the population of activity impacting both funds 115 and 116 for transactions containing cash activity which would represent the transfer of monies between the funds. During our general inquiries and activities gaining relevant records and documents we were informed that although University Athletics is maintained in its own fund code in the accounting system, its cash is held in the same bank account with all other auxiliary funds of the University. CRI's analysis of these records results in the only evidence of transfer between the University Athletics fund and any other auxiliary fund would be found in the PeopleSoft accounting ledgers.

CRI obtained the supporting documentation for all transactions of funds from Auxiliary fund 116 to University Athletics fund 115 that contained cash activity. Based on the forensic procedures performed over the supporting documentation retained in PeopleSoft including; system review and approval logs, email correspondence, sample ledger entries, and custom excel schedules, CRI verified the existence of six transactions that appeared to not be in compliance with Board of Governors regulation. Five of the six verified by CRI transactions had been initially identified by FAMU Division of Audit and Compliance.

CRI also obtained documentation for three transfers of funds from FAMU Foundation, Inc. that was responsible for providing the initial three payments under the repayment plan presented to the Board of Governors AACC in 2016. CRI verified the receipt of the three payments through review of the PeopleSoft accounting ledger and review of the retained deposited check image. CRI then

[6] An Oracle Enterprise Resource Planning software system utilized by FAMU

reviewed the PeopleSoft accounting ledger for the three transactions, which represented the repayment of funds to auxiliary funds as defined under the repayment plan. CRI noted that the three payments received from the University's Foundation and remitted to the auxiliary funds were in excess of the initial repayment plan amounts by a total of $73,070.59. Variance in the repayment amount will be addressed in the response to Objective 3.

Figure 1

Intercollegiate Athletics Program Auxiliary Enterprise Fund, Auxiliary Fund Liability Rollforward

Date	Description	Amount Owed to Other Auxiliary Enterprises
7/1/2015	Fiscal Year Beginning	**$ 7,014,034.00**
1/13/2016	Auxiliary Transfer (Concession)	115,000.00
6/30/2016	Auxiliary Transfer	751,679.00
6/30/2016	Fiscal Year End	7,880,713.00
1/24/2017	Repayment	(205,933.89)
4/18/2017	Auxiliary Transfer (Concession)	100,000.00
6/30/2017	Auxiliary Transfer (Concession)	88,762.66
6/30/2017	Fiscal Year End	7,863,541.77
6/11/2018	Auxiliary Transfer (Concession)	150,000.00
6/30/2018	Auxiliary Transfer	1,482,327.00
6/30/2018	Repayment	(250,484.70)
6/30/2018	Fiscal Year End	9,245,384.07
3/1/2019	Repayment	(298,485.29)
6/30/2019	Fiscal Year End	**$ 8,946,898.78**

Source: University PeopleSoft Ledgers

Included in the calculated total repayment amount (Figure 1) are four transfers of non-athletic concession[7] funds from auxiliary funds to University Athletics totaling $453,762.66. In its consideration of non-athletic concession funds, the University relied on Attorney General Opinion 072-193 (See Appendix C) supporting the use of non-athletic concession funds for use by a university's athletics program. Subsequent to this issuance of Attorney General Opinion 072-193, the Board of Governors was created and established regulations specifically disallowing proceeds from the sale of foods and goods by an auxiliary fund to support a university's athletics program.

[7] Non-athletic concession funds represent auxiliary funds generated through University vending and concession activities not related to University Athletic events or programming.

Based upon the consideration that Attorney General Opinion 072-193 was still effective the University did not modify its treatment of non-athletic concession funds and utilized those funds by University Athletics when considered necessary. These transfers were contrary to Board of Governors regulation 9.013 and the balance should be repaid to the University's auxiliary funds. If the University's position on these specific fund uses were to be considered allowable then the total repayment amount would be reduced to $8,493,136.12 compared to the calculated balance of $8,946,898.78 presented in Figure 1.

Objective 3 - Re-compute and validate the repayment plan based on the work performed in accordance with objective 2.

The University's repayment plan presented to the Board of Governors AACC was composed of a 12-year repayment period, where the initial three years of payments, starting in fiscal 2016, would be facilitated by the University's Foundation. After the initial three payments under the plan and for the remainder of the plan, the Foundation would continue to make payments at a fixed amount of $269,593.54, and University Athletics would pay an escalating amount annually starting at $51,742.36, which was expected to be generated from proceeds from normal operations. As noted in Objective 2 above, CRI verified the existence of the three scheduled payments from the Foundation which were received and deposited by the University Controllers office. CRI also reviewed the PeopleSoft ledger activity representing the allocation of the repayment amounts across the impacted auxiliary funds, in accordance with the 2016 repayment plan presented to the Board of Governors.

CRI compared the actual payment amounts to the projected plan payments noting each of the three payments were roughly 9.7% greater than the scheduled plan payment amounts. Total payments made to auxiliary funds from University Athletics totaled $754,903.88 while scheduled plan payments totaled $681.833.29. The remainder of the payments to be made by FAMU Foundation, Inc. and University Athletics under the 2016 repayment plan, have yet to become due, therefore no additional payments have been recorded.

The 2019/20 fiscal year is the first year where repayment funds are to be derived from cash generated by University Athletics. University management has not requested CRI address the repayment plan other than calculation of the total repayment balance. Therefore, we have not prepared a revised or updated repayment plan. Due to the continued transfers of auxiliary funds by University Athletics subsequent to the June 30, 2015, repayment plan measurement date, the repayment plan must be re-evaluated based on current factors including: the total balance due to University auxiliary funds, projected budget surplus or deficit for the current fiscal year, the projected funding availability of FAMU Foundation, Inc., and the consideration of the repayment term compared to the original plan. Without modifying the repayment plan, the funding requirement to be generated over the remaining nine years of the repayment plan exceed the original plan by approximately $1,076,000 based on management's original repayment allocation model between FAMU Foundation, Inc. and University Athletics funds. If this additional repayment

amount was simply applied evenly over the repayment period, it would increase University Athletics funding requirements by approximately $119,000 per year.

Objective 4 - Identify the mechanisms, practices, processes, systems, individuals, and authorizations (verbal and written) which effected the transfers of auxiliary funds in support of University Athletics programs.

CRI considers the population of improper transfers of auxiliary funds to University Athletics to be composed of two categories of transfers; unspecified gap funding[8], and non-athletic concession funding.

Unspecified Gap Funding Transfers

CRI verified the existence of two transactions recorded on June 30, 2016, and June 30, 2018, totaling $2,234,006 of auxiliary funds transferred to University Athletics considered to be improper under Board of Governors regulation 9.013 and University administrative processes. These transactions were processed outside of the normal order and flow of the University's established accounting process. Per the supporting documentation obtained which included PeopleSoft approval logs, retained email correspondence, and interviews, no evidence was identified that indicate President Robinson or any member of the Board of Trustees had knowledge or were involved in the approval of these transfers. Persons included in the transfer request process include (in order of seniority) Angela Poole (CFO 3/2016 – 10/2016), Wanda Ford (CFO 12/2016 – 6/2019), Tiffany Holmes (Controller), Keisha Jackson (Assistant Controller), and Jahan Momen (Assistant Controller). Individuals with approval authority who executed that approval authority within the PeopleSoft system for improper auxiliary fund transfers consisted of Tiffany Holmes (Controller). Individuals with approval authority who executed that approval authority outside of the PeopleSoft system for improper auxiliary fund transfers consisted of Angela Poole (CFO 3/2016 – 10/2016) and Wanda Ford (CFO 12/2016 – 6/2019). Per the repayment portion of an ongoing University corrective action plan, in order for the University to transfer auxiliary funds to University Athletics, approval of both the CFO and President must be obtained. In both identified transfers only approval by the CFO or CFO staff was identified.

CRI notes that the occurrence of unspecified gap funding transfers conducted outside of Board of Governors regulation 9.013 and University administrative processes is the result of management override of controls. University administrative processes required authorization from both the CFO and the President to conduct transfers from auxiliary funds to University Athletics, and the transfers identified were processed without the required authorization.

[8] For purposes of this report gap funding are the funds used to cover a shortfall between revenues received or receivable and expenses incurred or projected to balance the budget and eliminate any cash deficit.

Non-Athletic Concession Transfers

CRI also verified the existence of four transactions totaling $453,762.66 of non-athletic concession monies transferred from auxiliary funds to University Athletics. These transfers are considered to be improper under Board of Governors regulation 9.013. As management considered the transfer of non-athletic concession funds from auxiliaries to be an allowable activity based on the University's reliance on Attorney General Opinion 072-193, the fund transfers were treated under the normal budget and finance processes with a budgetary approval being authorized by the University President. Individuals included in the transfer request process include (in order of seniority) Larry Robinson (President), Angela Poole (CFO), Wanda Ford (CFO), Tiffany Holmes (Controller), and Jahan Momen (Assistant Controller). Individuals with approval authority who executed that approval authority within the PeopleSoft system for improper auxiliary fund transfers consisted of Tiffany Holmes (Controller). Individuals with approval authority who executed that approval authority outside of the PeopleSoft system for improper non-athletic concession fund transfers from auxiliaries consisted of Larry Robinson (President), Angela Poole (CFO), and Wanda Ford (CFO). Per the repayment portion of an ongoing University corrective action plan, in order for the University to transfer auxiliary funds to University Athletics, approval of both the CFO and President must be obtained. CRI notes the transfer of non-athletic concession funds from auxiliaries appears to have been conducted in accordance with University administrative processes, but not in compliance with applicable Board of Governors regulation 9.013 as noted above (See Objective 6 for detailed information).

CRI notes that the occurrence of non-athletic concession transfers conducted outside of Board of Governors regulation 9.013 is the result of misapplication of Attorney General Opinion 072-193. University administrative processes required authorization from both the CFO and the President to conduct transfers from auxiliary funds to University Athletics, and the transfers identified were processed with the required authorization.

For all fund transfers identified from auxiliary funds to University Athletics, no additional approval or authorization was required within the PeopleSoft system, beyond the normal single system approval for any transaction posting. CRI notes that no additional reporting measures were established relating to the transfer of auxiliary funds to University Athletics which would have provided notice to designated individuals that a transaction had been processed which requires additional review and oversight.

Objective 5 - Evaluate whether these transfers from auxiliary funds to University Athletics complied with applicable laws, regulations, policies and procedures, and accounting policies.

Based on our review of Board of Governors regulation 9.013 and the University administrative process established by University management in its 2016 presentation to the Board of Governors AACC regarding the use of auxiliary funds by University Athletics, all six transfers identified and verified through our procedures are considered to be unallowable.

Objective 6 - Identify weaknesses in University processes related to the accounting and processing of planned repayments from University Athletics to Auxiliary funds to better monitor and prevent future improper auxiliary fund transfers.

Based on our review of the repayment plan as presented by University management to the Board of Governors AACC on September 21, 2016, the only specific control established was the requirement that any transfers of auxiliary funds to University Athletics be approved by both the University's CFO and President. We identified no evidence where approval of auxiliary fund transfers to University Athletics were authorized by President Robinson, as required by the repayment and corrective action plan presented to the Board of Governors AACC in 2016. Additionally, President Robinson stated that he never provided authorization of transfers, was never requested to provide authorization, nor was the existence of transfers brought to his attention. Through his representations during our interview and review of email correspondence President, Robinson did authorize the transfer of non-athletic concession funds to University Athletics from auxiliary funds, in accordance with the University's position that those specific transfers were allowable, due to the misapplication of Attorney General Opinion 072-193.

For the controls proscribed in the presentation by University Management to the Board of Governors AACC on September 21, 2016, in the absence of the President's approval, the CFO or the Controller are responsible for preventing the transfer of the auxiliary funds to University Athletics. Supporting evidence obtained during our procedures include PeopleSoft approval and posting logs and email correspondence documenting the CFO's approval, and the Controller's approval and transfer of non-concession related auxiliary fund transfers to University Athletics on two occasions during the review period June 30, 2016, and June 30, 2018. CRI notes that no documentation was located that demonstrates the CFO or Controller attempted to obtain approval of these transfers or communicate the existence of the transfers to the University President, except for the transfer of non-athletic concession funds.

A key point identified above is the divergence of practice regarding the transfer approval process followed by the University CFO and Controller. Approval of non-athletic concession transfers to University Athletics was obtained for the four identified transfers, demonstrating the ability for the transfer approval process to be conducted in its entirety. This stands in contrast with the two unspecified gap funding transfers of auxiliary funds, performed without the final required approval of the University President.

CRI notes that contained in Auditor General Operational Audit Report No. 2019-063, issued December 2018, specific mention was provided regarding the University's use of non-athletic concession funds for University Athletics programs. Also contained within the Report was the Auditor General's analysis of the rationale provided by University management regarding the specific use of non-athletic concession funds. The Report noted that the Attorney General Opinion being relied upon by management did not conform to newer regulations established by the Board of Governors regarding the use of non-athletic concession funds, while not specifically listed as

unallowable for use by an athletics program, was an unallowable use of auxiliary funds. Upon receiving and reviewing Auditor General Operational Audit Report No. 2019-063 the University made a change to its administrative processes on the use of non-athletic concession funds. CRI identified no transfers of non-athletic concession funds to University Athletics, subsequent to the Auditor General Report date.

System Controls – Preventative

CRI noted that only one authorized approval was required to effect transfers within the PeopleSoft system, and no other system controls exist that differentiate fund transfers from any other transaction recorded in the PeopleSoft system. All of the controls established by management regarding transfers between auxiliary funds and University Athletics appear to be manual controls, which can be effective when appropriately designed and managed. Manual controls are inherently susceptible to failure or override due to the need for human action to ensure the control operates as designed.

System Controls – Reporting

CRI identified no additional system controls were implemented in regards to fund transfers between auxiliary funds and University Athletics. No control was established to report on the recording in the PeopleSoft accounting system of higher risk transactions like fund transfers to University Athletics. A reporting system control would allow management to more quickly identify the existence of improper activity and more quickly remediate the issue without reliance on human action to initiate the control. CRI notes that University management created several forums where employees could report the existence of transfers of auxiliary funds to University Athletics. This included meetings where Budget Status Reports were presented by Ronica Mathis, Budget Director to update management on the budget status and any identified gap in funding. On October 2, 2018, Wanda Ford, CFO sent Ronica Mathis, Budget Director an Excel file titled “Athletic Deficit FY 18” which contained a PeopleSoft journal entry and a schedule of the 2018 University Athletics detailing the transfer of University auxiliary funds to University Athletics totaling $1,482,327 for the year ended June 30, 2018. This reinforces the weakness of reporting controls based on human action, as even with the direct inquiry sent to Budget Director Mathis by FAMU Division of Audit and Compliance on April 5, 2019, her response on May 10, 2019 indicated there were no transfers of auxiliary funds to University Athletics.

CRI notes that FAMU Division of Audit and Compliance represents on June 21, 2019 a control was implemented in PeopleSoft, to automatically report to defined individuals all transfers to University Athletics.

System Controls – Monitoring

Commonly in accounting and finance, activity of high-risk transaction processes or accounts are subsequently reviewed through a reconciliation or verification process. This process while not able to prevent an improper transaction from being posted, like the reporting process above, allows for potential improper transactions to be more quickly identified and remediated. The performance of system-based controls establish clear and consistent documented evidence of management and oversight of higher-risk activity.

University Athletics Periodic Budgetary Reporting

We received University Athletics budget general ledgers and final approved operating budget documents during the review period to validate if the board-approved budgets were correctly recorded into the budget general ledger. For the two years reviewed (fiscal year 2017/18, and 2018/19), we identified errors in the expenses and revenues recorded to the budget general ledger. For fiscal year 2017/18 expenses recorded to the budget general ledger were $50,000 greater than the governance approved amount. Additionally for the fiscal 2017/18 year; $100,000 for concession revenue was recorded into the budget general ledger which was not contained in the final board-approved budget. This concession budget amount appears to represent the non-athletic concession fund transfers documented in the response to Objective 4 and 6 of this report.

CRI notes that the University's independent auditor for University Athletics reported a significant deficiency regarding supporting documentation not reconciling to the general ledger and the cause of deficiency was the lack of defined control systems over the reconciliation function.[9]

We determined, through interviews of key personnel that University management and governance relied on a specific budget-to-actual and projection report for University Athletics which was manually prepared by the University's Budget office. We obtained copies of this report from FAMU Division of Audit and Compliance for the fiscal years of 2017/18 and 2018/19, noting these reports were not maintained in a specific area and some years during the review period could not be obtained within sufficient time to be included in the report. We compared the available budget review reports to the associated budget ledgers and general ledgers maintained in PeopleSoft to attempt to validate the information being presented. We also compared a sequence of months of the budget report to consider the consistency and accuracy of the information being presented between reported periods.

[9] FAMU Intercollegiate Athletics Program June 30, 2017, Audited Financial Statements, Finding 2017-001.

Based on our procedures we identified the following issues in the presentation of the budget and actual information:

For the monthly budget review data (See Appendix D for an example report) in fiscal year 2017, the reports appear to provide the difference between the total annual budget per account expense to date with the resulting difference being presented in a column titled "Projections." We identified several instances where the figure calculated in the Projections tab included projections as determined by management judgement and not the expected calculated difference of the budget and actual columns. Support or information for these management judgements were not included on the reports. CRI was not able to determine what the numbers represented or their source. We also identified instances where fields in the actual and/or projection columns were blank where a balance would have been expected.

The errors indicate significant issues with the budget management process. The way information being presented to users is not prepared or reconciled in an accurate, consistent, or transparent manner. Due to the budget reports from April to June of 2018 not being readily available and supporting documentation of the University's budget oversight process not being consistently maintained, we were not able to gain further understanding of the budget management and internal reporting processes. It is likely that additional findings may be identified upon reviewing of these documents.

Objective 7 - Make recommendations for improved controls that will prevent, detect, and correct any further recurrence of improper transfers of University Auxiliary funds to support University Athletics programs.

University management should seek to establish controls that prevent the transfer of auxiliary funds to University Athletics that do not conform with Board of Governors regulations.

These controls should include a mix of automated controls and manual controls including, but not limited to, the following:

- System requirement for the authorization of more than one person to post transfers over a certain dollar threshold or from/too particular funds.
- System restriction of auxiliary transfers to University Athletics without authorization provided by the University President.
- System generated notification to the University CFO, President, and FAMU Division of Audit and Compliance of all transfers to University Athletics.
- System requirement for authorization by a specific person, potentially outside of the accounting function, for transfers to University Athletics.
- Manual reconciliation process performed monthly or quarterly of all fund transfers, or absence of transfers to University Athletics from any source that must be reviewed, approved by financial management staff, and approved and retained by the President's office.

- Require documented review by signature of University Policies and Procedures, relevant Board of Governors regulations, and State and Federal laws by employees involved in the processing, reconciliation or oversight of financial activity.

Within the limitations of our objectives, we determined the unallowable transfers were influenced by issues involving the development, management, and oversight of University Athletics budget. We were not specifically engaged to consider fraud, however, based on the procedures performed, we found no evidence of individual personal gain from the transfers received by University Athletics during the review period. The controls presented above seek to address a risk associated with the authorization or restriction of certain transfers. The perceived need for those transfers was a result of underlying pressures and issues of the financial and operational management of University Athletics. The annually occurring operating and cash deficits of University Athletics and the associated Auditor General findings have created an environment where in the event the initial plan or budget begins to break down, effective and measured decision making becomes overshadowed by the perceived need to prevent continued cash deficits. Threats to effective management and decision making are also impacted by limited financial and human resources. Organizations as large and complex as the University are structured to spread responsibility across the organization as all of the needs of the University cannot be effectively carried out by a few individuals. As resources become scarce but the obligations of the University are not adjusted, pressures are created that would not exist under ideal circumstances. These pressures often result in the shifting of responsibility from the business structure onto key employees in an attempt to maintain the activities of the University at a consistent level. These pressures are an entry point for poor decision making or decision making that becomes narrowed and does not appropriately reflect the needs of the University as a whole beyond the immediate issue being addressed.

Objective 8 - Recommend improvements to University Athletics processes for ensuring that budgets are appropriate, managed, and all related transactions comply with applicable laws, regulations, policies and procedures, and accounting principles.

University Athletics stands out from all other departments of the University in that it has a regulatory mandate to be self-supporting and not utilize other auxiliary funds. University Athletics is also faced with the limitation of annual revenue being subject to large potential swings based on various external factors including, the popularity and attendance of sporting events, interest or investment of season ticket holders, athletic program success in a given sport increasing or decreasing the number of games. Variability in revenues results in management having to predict current year trends based on historical activity and expectation of the current year's program success and expected game attendance. A strong potential for overestimation of revenues exists as the persons responsible for developing the budget may be subject to bias created by their desire for the athletic programing to succeed, inflating their perception of the revenues that could potentially be generated.

Conversely, in development of the expense portion of the budget, management should have available a historical detail of expense incurred at the lowest available level of programing or activity. With this information management could then build the budget up from each event based on historical actual costs. Management should also consider the impact of participation in extra games and events due to program success, tournament appearances, etc. that may not be a part of the standard program calendar. Participation in these events are the goals of the student athletes, coaches, student body, affiliate groups and fans, and not including the potential impact of participating in these events in the budget process creates the likely situation of the University having to react to covering additional program costs that could have been projected and budgeted in the initial budget process.

Based on interviews with representatives of the University's Board of Trustees, Division of Audit and Compliance, management and operations staff, multiple examples were provided where the lack of complete or timely information created opportunities for decision making contrary to University policies and procedures.

The budget process should be driven by accurate historical information and an informed needs-based assessment of expected operations. Management should determine what information is needed to create a complete and accurate schedule of prior year University Athletics activity. What steps need to be taken to develop and obtain historical information, and what changes need to be made to existing processes to efficiently record and retain that information. Currently, information retained in the financial general ledger and budget ledgers reflect the total activity of University Athletics, but are not designed to accurately reflect the net or gross activity of individual programs, sports, or major events.

Development of the University Athletics' budget should involve the University Athletics' accounting and budget staff throughout the entire process including final reconciliation and approval. Employees who have the institutional knowledge of University Athletics at the program and sport level, can best represent those activities when discussion of cuts to various budget line items are considered. The budget development process should also take into account the actual ability for University Athletics to cut costs without impacting program delivery at the expected level. University Athletics has incurred a funding deficit annually since at least 2008 and this could be attributed to the difference between management's expectation of University Athletics' ability to reduce costs, and the operational realities of delivering the athletics program at its current size.

Establishing a consistent budget development process that is data driven and aligns with University goals can help to alleviate the impact of change in athletic administration. The University has experienced frequent changes in the Athletic Director position during the review period and earlier (See Appendix F), which traditionally is accompanied by significant turnover in an athletics department staff. Frequent turnover of these positions can hinder the ability for University Athletics to establish a culture that is fully aligned with University goals. Development of a University Athletics culture that is structured on the University's guiding principles of quality, integrity,

transparency, accountability, core values, and outstanding customer service, can create an environment that is more financially stable in the face of frequent change in administration.

Effective management of the budget throughout the year is contingent on the appropriate individuals within the offices of the Controller, Budget, and University Athletics having accurate and timely information on the obligations, expenses, and fund availability of University Athletics. Through our procedures we identified the existence of expenditures outside of the normal procurement process. This results in the potential delay or recognition of liabilities payable to vendors. The existence of numerous expenditures outside of the normal procurement process represents a disconnect between the control structure of the normal procurement process and the perceived operational demands of University Athletics staff. Management should evaluate whether some processes need to be modified to ensure University procurement policies can be followed while supporting the activities of University Athletics programs, which may significantly differ from the activities of the rest of the University. By working to reduce the occurrence of expenses outside of the normal procurement process, the information contained in the PeopleSoft general ledger becomes more timely and useful for effective decision making.

University Procurement Process

During interviews with key individuals, several statements were made regarding the existence of payments for goods or services where those activities were solicited or obtained outside of the University's defined procurement process. According to the University's procurement policy, departments are required to submit to the Office of Procurement Services a purchase requisition with the required documentary support and approvals. Submitted purchase requisitions then go through a verification process and budget check verifying existence of available funds in the budget and review for completeness of the requisition documentation in accordance with University policies. Once approved, a purchase order is created to be submitted to the external vendor as supporting authorization for the vendor's services to the University. Once goods or services are rendered an invoice would be submitted by the vendor referencing the purchase order number at which point the University's disbursement/payment process would begin.

After receiving several comments about goods and services being received by the University outside of the University's normal procurement process, we inquired of the Office of Procurement Services how transactions processed outside of the normal procurement process were handled. We also inquired if the University had reports or data available on transactions processed outside of the normal procurement process. We spoke with the Director of Purchasing, Mattie Hood, and she explained how the University handles the identification of the University receiving goods or services without an authorized purchase order. When an invoice is obtained for goods and services already received by the University, the Office of Procurement requires an after-the-fact justification form to be completed to; state the reason(s) a purchase order or contract was not executed before acquiring the goods or services, justification of why the payment should be made to the vendor, and what corrective action will take place to ensure compliance with University

policies and procedures. She noted that the Office of Procurement will accept the provided invoice and create a voucher in the system to begin formal tracking of the activity. When a completed after-the-fact justification form and support needed to validate the expenditure for appropriate coding and budget check is provided, the Office of Procurement moves the voucher through the normal procurement validation process. When the purchase order is issued, the invoice and support would be submitted to the University Controller's office to begin the standard disbursement process.

The Director of Procurement indicated that she was not aware of any reporting that captured the volume of these types of transactions or any other attributes that may be common to the transactions identified outside of the standard procurement process. To obtain information on the population of transactions where goods or services were likely received prior to obtaining a purchase order, we were directed to University Office of Information Technology to have a custom report created. CRI requested and obtained a series of reports for the fiscal years 2016 - 2019 based on the date of the invoice received, which also included the purchase order number and date, invoice amount, check amount and date, and the journal ID. With this data, we were able to run a series of analytics to understand this specific population of transactions over the review period. Figure 2 represents a high level review of the information obtained by year and total.

Figure 2

Description	2015/16	2016/17	2017/18	2018/19	Total
Number of invoices dated before the PO date	121	182	94	80	477
Total number of invoices received during the period	1,044	822	863	768	3,497
Percentage of invoices dated prior to the PO date to total invoices received during the period	12%	22%	11%	10%	14%
Dollar amount of invoices dated before the PO date	$ 130,612.82	$ 266,382.87	$ 122,103.07	$ 140,663.17	$ 659,761.93
Total dollar amount of invoices received during the period	$ 2,302,486.52	$ 1,988,233.80	$ 3,263,369.80	$ 2,663,448.71	$ 10,217,538.83
Percentage of dollar amount of invoices dated before the PO date to total invoices received during the period	6%	13%	4%	5%	7%
Average dollar amount of invoices dated before the PO date	$ 1,079.44	$ 1,463.64	$ 1,298.97	$ 1,758.29	$ 1,383.15
Average number of days between invoice and PO dates when the invoice is dated before the PO date	117.7	169.5	86.8	69.5	110.9
Average number of days between the check date and the PO date when the invoice is dated before the PO date	16.3	19.2	14.1	12.6	15.5

The table above, developed by CRI from data provided by the University Office of Information Technology, was created with an emphasis on the invoice date, not the purchase order date or the check date. For this reason, the information presented does not reflect how many transactions requiring after-the-fact justification were processed within a fiscal year, but show when those invoices originated. With that in mind, the analysis above primarily compares the two types of invoices to show the volume of transactions requiring remediation. Based on the information provided for the four-year period, 477 invoices totaling $659,761.93 were received

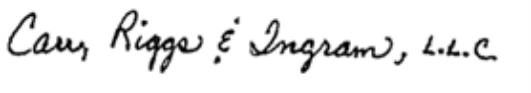
by the University without reference to a purchase order and requiring after-the-fact justification of the activity. This indicates that 14% of all invoices and 7% of the dollar amount of all invoices received during the review period were connected to goods or services not procured through the regular procurement process. The average dollar amount of these invoices was $1,383.15. Over the four year period, the average number of days between the invoice date and the date of a subsequently obtained purchase order was 110.9 days. The average number of days to issue checks for these invoices, once a purchase order is approved, is 15.5 days. This is compared to the average 50.6 day timeframe between traditional approval of purchase orders and issuance of payment, which account for the time for goods or services to be provided and validated by the University. The largest invoice identified requiring after-the-fact justification was dated in October of 2016 for $75,000. The longest period between invoice date and subsequent purchase order approval date was 583 days.

We note the analysis above represents information captured in the system for analysis of the prevalence of processing of invoices being identified without an associated purchase order, and is not a reflection of the appropriateness of the actual processing or the ultimate disbursement. The University and University Athletics may have justifiable reasons why some activity cannot be processed through the standard procurement process due to the circumstances. Additionally, the population of invoices above could contain expenditures that if processed through the normal procurement process could have been delayed, disallowed, or renegotiated to better obtain greater cost savings in consideration of the University Athletics' budget. We were not directed by management to consider those issues in detail and our procedures were not designed to evaluate those issues to reach a conclusion. The goal of performing our analysis was to present the type of analysis that can and likely should be performed to gain a better understanding of the exceptions that may exist to the University's intended processes, to provide more data-driven and fact-based information to better inform management's decision making.

The University's existing budget and procurement policies appear to reflect typical industry practices. This statement includes consideration of the identified transactions where goods and services were received before an approved purchase order was created. The University has an established process for handling those issues when identified to ensure compliance with University policies and applicable Board of Governors regulations and State statute, and has demonstrated the ability to apply those policies when needed. Execution of any process may be improved and University management should set aside time to review the processes and associated record keeping that support eventual decision making, including development of the budget. Specifically to the budget process, a completed budget year or series of years should be reviewed to identify where the budget process was successful and where improvements could be made based on actual results. This should be documented and incorporated into new policies or guidelines to ensure implementation in future budget development.

Subsequent Events

During preparation of our report, we were informed on July 29, 2019, by FAMU Division of Audit and Compliance, that information was presented to the University President and University staff that appeared to contain material errors in the presentation of revenues and the calculated University Athletics' budget deficit for the year ended June 30, 2019. The email correspondence from the Interim VP for Finance and Administration/CFO to the University President and the other staff present was provided to CRI, including an attached amended University Athletics Budget report. That email clearly summarized the information that was found to not be correct or up-to-date and the impact on the information originally provided to the President and staff on July 26, 2019.



This information was provided specifically to inform CRI that included in the misstatements identified in the presented information, the third payment made by FAMU Foundation, Inc. under the 2016 repayment plan presented to the Board of Governors AACC, was being presented as a contribution to University Athletics and not reflected as a pass through payment to the University auxiliary funds. This misstatement contributed to the understatement of the fiscal 2018/19 University Athletics' budget deficit.

CRI considers the existence of the identified error to represent the continued impact of inadequate information management and reliance on manually created reports that do not appropriately reconcile to the general ledger or budget general ledger. CRI also considers the way the revised information was presented to the University President, including; identification of the specific misstatements in information previously reported, presentation of the corrected information with a description of its overall impact, and disclosure of how that information was obtained and validated, was a very effective demonstration of how clear, transparent, data driven financial reporting can quickly add value to management's decision making process. We also want to note that the misstatements identified were researched, resolved, and reported to the University President within one business day, and along with the corrected information a new format was presented for consideration for future use to help ensure information is consistently and accurately reported for decision making.

Restrictions

This report is intended solely for the use of Florida Agricultural & Mechanical University Board of Trustees and should not be used for any other purpose without prior permission from CRI. We have no obligation, but reserve the right, to update this report for information that comes to our attention after the date of this report.

Sincerely,

Carr, Riggs & Ingram, LLC

Findings and Approach for Determining Auxiliary Funds used to Support Athletics

- No records are available to indicate which specific fund was used to fund athletics expenses during 2008-2012 as individual transactions were not recorded as payables.
- The 2013 and 2014 Auditor General Operational Audits noted auxiliary funds were used to provide for Athletics Expenses.
- Available cash balances from 2008-2015 were reviewed for 89 auxiliary funds
- In order to determine the amount to be replenished to each auxiliary fund, reasonable estimates were calculated based on a pro-rata allocation method from available cash balances from revenue generating auxiliaries during each year from 2008-2015 and a comparison of cash balances available to transfer as of the date of the analysis, excluding funds with bond requirements.

Appendix B – 2016 Auxiliary Fund Repayment Schedule

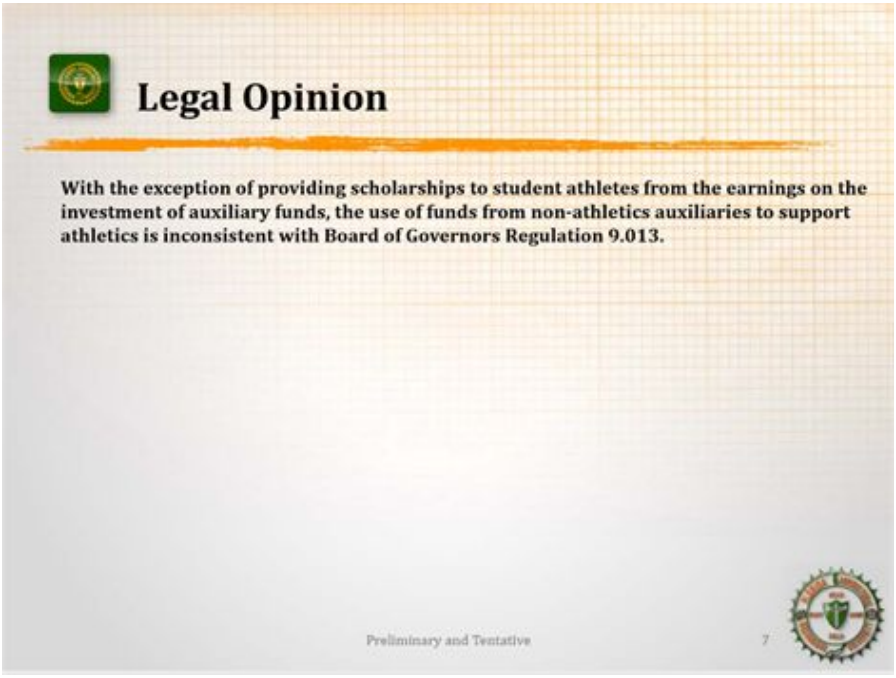
Legal Opinion

The Office of the General Counsel has reviewed both the Florida Statutes and the Regulations of the Board of Governors of the State University System of Florida as they relate to the authorized use of funds by university auxiliary enterprises and by university direct support organizations.

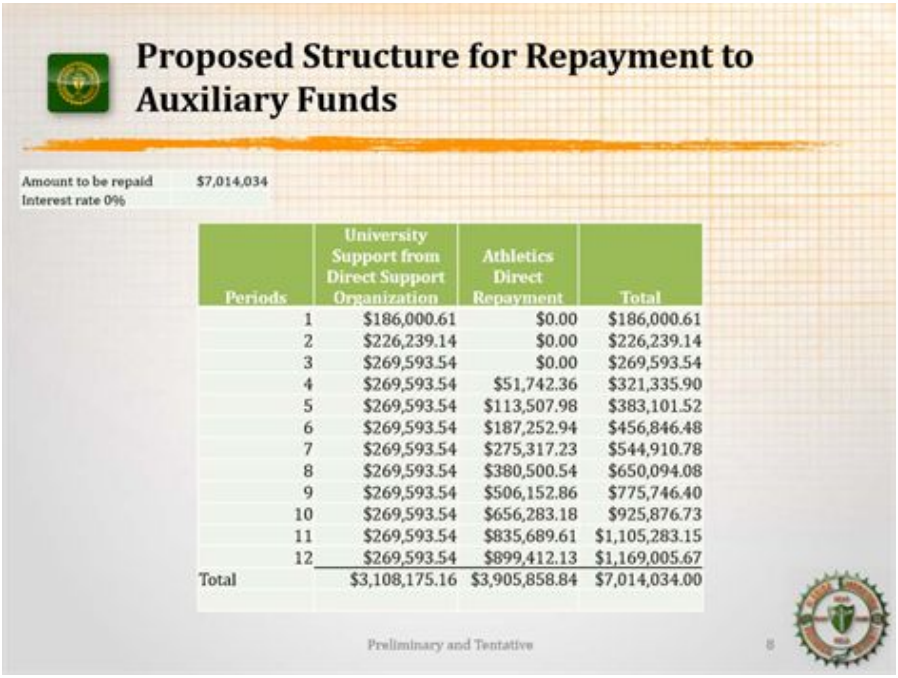
Authorized use of Auxiliary Funds

- According to Florida Statute 1011.47(1) "... ***auxiliary enterprises are business activities of a university which require no support from the General Revenue Fund***, and include activities such as housing, bookstores, student health services, continuing education programs, food services, college stores, operation of vending machines, specialty shops, day care centers, golf courses, student activities programs, data center operations, and intercollegiate athletics programs."
- Regulation 9.013 of the Board of Governors of the State University System of Florida states in relevant part: "***Each institution may determine whether its auxiliary services will be self-supporting on an individual or collective basis, except for athletics, which shall be a self-supporting entity.***"
- Florida Statute 1011.43 relating to earnings on the investment of university funds states: "***Each university is authorized to invest available agency and activity funds and to use the earnings from such investments for student scholarships and loans***. The university board of trustees shall provide procedures for the administration of these scholarships and loans by regulations."

Preliminary and Tentative 5



Legal Opinion



Authorized use of Funds by Direct Support Organizations:

- Pursuant to Florida Statute 1004.28(1)(a)2 a Direct Support Organization is: "Organized and operated exclusively to receive, hold, invest, and administer property and to make expenditures to or for the benefit of a state university in Florida . . .". The Board of Governors Regulation 9.011(1) mirrors the purposes of direct support organizations when it states:
- "Such support organizations shall be organized and operated to serve the best interests or missions of the university, including a university's research, education and service missions, and may receive, hold, invest, and administer property and make expenditures to or for the benefit of the university or for the benefit of a research and development park or research and development authority affiliated with a university."

forbid voluntary disclosure by public employees of the welfare bureau but was never intended to prevent the disclosure of the contents of official documents pursuant to the compulsion of a subpoena where the contents of such documents were pertinent to a legal inquiry.

The same principle was enunciated by the use of different words that convey a message of like import in the case of Andrews v. Cacchio, 35 N.Y.S.2d 259 (1942). The statute involved prohibited the use of records of the Division of Placement and Unemployment Insurance, State Department of Labor, unless the industrial commissioner is a party to the action or proceeding. Therefore, in a personal injury action a motion to produce such records was denied. In denying the motion the court said:

> While the act does not disclose the object of the Legislature, it undoubtedly was to prevent exposure to public gaze on the names of applicants who are receiving the benefits under the auspices of the statute and under which the employer bears the burden. This is a reasonable objective.

Of like import is the case of Hahnl v. Catherwood, 225 N.Y.S.2d 568 (1962), where the petitioner, having been indicted for larceny, was entitled to a return of books and records he had produced before the Industrial Commission pursuant to subpoena.

You are advised, therefore, that the records referred to are not available except insofar as they are needed in the proper administration of the Unemployment Compensation Act with the exception, nevertheless, that such records may be available in response to an appropriate order issued from a court of competent jurisdiction. In such case the court issuing the order gives a judgment whether the information sought is pertinent to any legal inquiry.

072-193—June 14, 1972

UNIVERSITY FUNDS

DISPOSITION OF NONSTATE FUNDS RECEIVED BY INSTITUTIONS IN UNIVERSITY SYSTEM

To: L. K. Ireland, Jr., Secretary, Department of Administration, Tallahassee

Prepared by: Rebecca Bowles Hawkins, Assistant Attorney General

QUESTIONS:

1. Must the funds expressly exempted from the requirements of §240.095, F. S., be budgeted only for purposes specifically authorized by law?

2. What restrictions, if any, are imposed upon the expenditures of these funds?

SUMMARY:

Pending legislative or judicial clarification, campus concession and other nonstate funds collected by our state universities that are not required to be deposited in the state treasury may be budgeted for entertainment and other purposes that would serve the interests of the program of higher education in this state, even though not specifically authorized by law.

Section 240.095, *supra*, requires all funds received by any institution or agency in the state university system to be deposited in the state treasury and disbursed "in such manner and for such purposes as the legislature may by

FAMU Athletics Use of Auxiliary Funds
Supplementary Information
Appendix C – Attorney General Opinion 072-193

law provide." However, the statute expressly exempts certain funds, fees and deposits such as student activity funds and vending machine collections, from this requirement and authorizes such funds to be deposited "outside of the state treasury" with the approval of the board of regents. These are the funds referred to in your first question. Also relevant here is §240.082, F. S., which expressly appropriates "to the use of the state board of regents, for the respective institutions collecting same" all moneys received by such institutions, other than from state and federal sources, "to be expended as the state board of regents may direct ...." A proviso requires such moneys to be budgeted and the budget approved by the Department of Administration prior to their expenditure.

These statutes were enacted in 1953 in substantially their present form. However, even prior to their enactment, one of my predecessors in office had ruled in AGO 045-353, Nov. 7, 1945, Biennial Report of the Attorney General, 1945-1946, p. 363, that similar funds of the institutions of higher learning then under the supervision of the State Board of Control were not within the purview of the so-called Five Fund Act (Ch. 22833, 1945, Laws of Florida) requiring, among others, that all moneys collected by all state officials, agencies and institutions should be deposited in the state treasury to the credit of the appropriate fund and disbursed only as provided by the general appropriations bill "or as otherwise provided by law." (This provision of the Five Fund Act now appears in substantially its original form as §215.31, F. S.) The 1945 opinion of this office listed "Soda Shop" funds, the Students' Activity Fund, the Athletic Association Fund, and the Entertainment and Lyceum Fund of one or the other of the state universities as not being within the purview of the Five Fund Act and thus not required to be deposited in the state treasury. And Ch. 28315, 1953, Laws of Florida (now §240.095, *supra*), included these and similar funds, fees and deposits (except the "Entertainment and Lyceum Fund") in the list of some eleven items of university revenue that were exempt from the requirement that university funds be deposited in the state treasury.

Shortly after the statutes in question were enacted in 1953, the funds listed therein were characterized in AGO 053-210, Aug. 16, 1953, Biennial Report of the Attorney General, 1953-1954, p. 338, as "nonstate" funds that are to be deposited in a "private account." And it is not unreasonable to conclude that, in adopting the statutes in question, the legislature recognized the "nonstate" character of such funds and intended to dispel any doubts as to the authority of the State Board of Control to use or authorize the use of such funds for any purpose that would serve the interest of the university system as a whole or of a particular university—subject, of course, to prior budgetary approval by the appropriate official (now by the Department of Administration)—without regard to whether any statute *specifically* referred to such a purpose and expressly authorized one or more of such funds to be used for that purpose. The provisions of §§240.082 and 240.095, *supra*, referred to and quoted above, are certainly susceptible to that interpretation; and I understand that they have been so interpreted in budgeting such funds for a great many years, and that such interpretation has been confirmed by the General Counsel for the State Board of Education in an opinion rendered on August 5, 1969, in holding that campus concession funds could be budgeted for entertainment purposes.

On the other hand, the auditor general has disapproved expenditures of campus concession funds for such items as luncheons, dinners, and refreshments. The basis for this conclusion was that the university is not *specifically* authorized by law to expend its funds for entertainment and that the attorney general's office has uniformly ruled, with respect to *other governmental units*, that public funds may not be expended for entertainment in the absence of specific statutory authority. Attorney General Opinion 071-28 was especially relied upon in support of his view. This opinion amply supports the auditor gen-

FAMU Athletics Use of Auxiliary Funds
Supplementary Information
Appendix C – Attorney General Opinion 072-193

eral's conclusion in this respect insofar as "state" funds within the purview of §215.31, *supra*, and other applicable provisions of constitutional and statutory law are concerned. See, for example, Art. IV, §4, State Const., designating the treasurer as the keeper of "state" funds and authorizing their disbursement only upon the order of the comptroller, countersigned by the governor; and Art. VII, §1(c), *id.*, providing that no money shall be drawn from the treasury "except in pursuance of appropriation made by law." It was that type of "state" fund with which AGO 071-28 was concerned.

Here, however, the funds in question are not "state" or "public" funds in the classical sense of the term as defined in 81 C.J.S. *States* §132, p. 1146, as follows:

> "Public funds" are funds of the state, such as taxes, customs, moneys, etc., *raised by operation of general law* and appropriated by the government for the discharge of its obligations or some public purpose. (Emphasis supplied.)

None of the funds here in question is from a state or federal source; all are from outside sources, such as from vending machine sales, alumni association funds, bequests and gifts, and the like. They are nonstate funds which the legislature expressly appropriated to the use of the State Board of Control [State Board of Regents] and which are to be spent "as the state board . . . may direct"—subject, of course, to prebudgetary approval by the Department of Administration. They are nonstate funds that are expressly exempt from the requirement that university system funds must be deposited in the state treasury and disbursed in such manner and for such purposes as the legislature may by law provide.

These statutory provisions are, of course, presumptively valid; and any question as to their validity must be decided by the courts in an appropriate proceeding. However, it might be noted that it appears to be well settled that the legislature may validly provide for the collection and administration of certain funds without making them state or public funds subject to constitutional and statutory requirements respecting such funds. See 81 C.J.S. *States* §154, p. 1190; and State *ex rel* Watson v. Caldwell, Fla. 1945, 23 So.2d 855. In that case the court upheld Ch. 22821, 1945, Laws of Florida, creating the State Improvement Commission and authorizing certain of its funds to be disbursed on warrants signed by the chairman of the commission and countersigned by its secretary, as against attacks on various constitutional grounds. In holding that the statute did not violate constitutional requirements respecting the disbursement of state funds, the court distinguished between moneys appropriated to the commission from the state treasury, and revenues derived from rentals on projects it constructed, grants from Congress and other sources. It said that the moneys appropriated to the commission from the state treasury must be drawn in the manner provided by law but that the revenues of the commission are held in trust for the state to be used as Ch. 22821 directs and may be withdrawn as provided by the act. It ruled also that such revenues were not "funds from the treasury" within the purview of Art. IX, §4, State Const. 1885, providing that "no money shall be drawn from the treasury except in pursuance of appriations made by law." The court said that the state treasurer was the custodian of such revenues but did not hold them as state treasurer, and that "[t]he Mayor of Tallahassee could have as appropriately been designated." Similarly, the major portion of the funds used for the operation of the university system of this state is appropriated by the legislature for that purpose and must be drawn from the state treasury in accordance with applicable constitutional requirements respecting state funds. But the nonstate funds that are collected incident to the operation of the university system never become state treasury funds; and, presumably, the court would hold, as in the *Caldwell* case, that these nonstate funds are not subject to such requirements.

Appendix C – Attorney General Opinion 072-193

It was noted in the auditor general's report that it has been the long-standing practice at universities to use the university's campus concession funds for entertainment purposes—apparently with the approval of the State Budget Commission or its successor in this respect, the Department of Administration. While a long-standing practice should not be approved if clearly erroneous (*cf.* Hialeah Race Course, Inc. v. Gulfstream Pk. R. Ass'n, Fla. 1971, 245 So.2d 625, stating that "the continued enactment by the Legislature of an unconstitutional statute [does not have] the effect of validating it"), our Florida Supreme Court is also committed to the rule that the contemporaneous administrative construction of a statute by those charged with its enforcement and interpretation is entitled to great weight, and "the courts generally will not depart from such construction unless it is clearly erroneous or unauthorized." Gay v. Canada Dry Bottling Co. of Florida. Fla. 1952, 59 So.2d 788. 790.

In light of the nature of the funds in question as nonstate funds and the express legislative mandate that they shall be kept outside the treasury and disbursed as the board of regents may direct, it seems clear that it is the *Caldwell* decision, *supra*, that is authoritative here, and not AGO 071-28, which was concerned with *state treasury* funds. As noted above, the statutes in question have long been interpreted as authorizing the expenditure of the nonstate funds in question for entertainment and other purposes not specifically authorized by law, and the General Counsel of the State Board of Education has confirmed this interpretation. As also noted, the statutes are certainly susceptible to that interpretation; and they are presumptively valid. In all of these circumstances, I am inclined to the view that, unless and until this matter should be legislatively or judicially clarified, your first question should be answered in the negative.

Answering your second question: Even though the funds in question are so-called nonstate funds, they are held in trust to be used as the State Board of Regents may direct, §240.082, *supra*—presumably, in accordance with the board's rules and regulations establishing the overall policies for the university system as authorized by §240.001, *supra*. *Cf.* State v. Caldwell, *supra*. The expenditures must be for uses that are consistent with that trust and, to that extent, are restricted. The requirement that the expenditures of such funds may be made only in pursuance of detailed budgets filed with and approved by the Department of Administration, §240.082, *supra*, is an additional restriction which operates as a check on such expenditures to insure that the funds will not be used for a purpose outside the scope of the trust. (No question is presented as to whether the use of such funds for entertainment—or other purposes for which they have customarily been used in the past—would be consistent with that trust. See, however, AGO 071-160, in which it was ruled that state funds appropriated to the governor's discretionary contingency funds and specifically authorized by law [§216.231, F. S.] to be expended by him at his discretion to promote general government and intergovernmental cooperation and to enhance the image of the state may be used for, among others, entertainment for visiting dignitaries and refreshments to be served to guests in the office of the governor.)

OIGC No. 2019-072

State University System of Florida Board of Governors
Office of the Inspector General and Director of Compliance

EXECUTIVE SUMMARY

On April 19, 2019, at the direction of the Chancellor of the State University System of Florida, the Office of the Inspector General and Director of Compliance (OIGC) initiated an investigation related to New College of Florida (New College). The scope of this investigation was limited to the following allegations:

1. Whether Dr. Joy Hamm[1] instructed admissions staff to engage in admissions practices that were discriminatory against applicants who disclosed mental health or disability related issues in the personal essay portion of their applications;[2] and

2. Whether New College's current admissions process[3] was discriminatory against applicants who discussed mental health or disability related issues in the personal essay portion of their applications.

Based on the testimonial and documentary evidence gathered and reviewed during the course of the investigation, we determined it is highly and substantially more probable to be true than not true that violations of governing directives occurred concerning both allegations. Therefore, we found both allegations to be supported.

Based on those findings, we made four recommendations related to aligning student admissions practices with applicable governing directives; taking appropriate personnel action; conducting a review of the application files that may have been negatively impacted by the inappropriate admissions practices; and providing a copy of this report alongside a copy of the university's internal investigative report for any public records requests made for that document.

In response to the report, New College President Donal O'Shea noted the institution is working diligently to follow the recommendations. He indicated New College has already taken action to change the leadership of the enrollment management department and is implementing a comprehensive review of their admissions processes to ensure that all applicants, including those who disclose a disability or a mental illness, are treated fairly and equitably in accordance with transparent admissions criteria.

[1] Hired in 2017 as the Dean of Admissions and Financial Aid; her title later changed to Dean of Enrollment Management.
[2] Since this allegation was part of the initial complaint received by New College in April 2018, we interpreted this to mean the instruction took place before or during the 2018 Admissions Cycle.
[3] Since this allegation was part of the complaint received by the OIGC in March 2019, we interpreted this to mean the 2019 Admissions Cycle.

INTRODUCTION

On March 11, 2019, the Board of Governors' OIGC was forwarded a complaint containing concerns about New College's handling of an investigation into allegations against Dr. Joy Hamm regarding discriminatory practices within the institution's student admissions processes. In general, the complaint alleged the institution's investigation was inadequate and the final report was incorrect. The complaint further alleged New College was still engaging in discriminatory student admissions practices.

The OIGC conducted a preliminary inquiry of the complainant's concerns, which included a review of the initial complaint[4] that led to the internal investigation, as well records of the internal investigation. The scope of New College's internal investigation focused on whether admissions processes at New College were discriminatory, rather than a focusing on whether Dr. Hamm promoted or engaged in discriminatory practices as alleged. Based on the preliminary inquiry, it was determined additional investigative action was needed.

On April 19, 2019, State University System of Florida Chancellor Marshall Criser signed a letter informing New College President Donal O'Shea that the OIGC would be conducting an investigation into the initial complaint regarding alleged discriminatory practices within New College's student admissions processes. The OIGC initiated an investigation in accordance with Board of Governors Regulation 4.004 *Board of Governors Oversight Enforcement Authority*, which states, in pertinent part, "(3) In addition to OIGC investigative responsibilities outlined in the OIGC charter, the chancellor may determine that allegations of material non-compliance with any law or Board of Governors regulations warrant an investigation. The Board of Governors' inspector general shall provide direction for, supervise, and coordinate such investigations…."

GOVERNANCE

In 2003, the Board of Governors was constitutionally created to operate, regulate, control, and be fully responsible for the management of the State University System of Florida.[5] The State University System of Florida is comprised of the 12 public universities located throughout the state. The Board of Governors implements its constitutional regulatory authority through the adoption of regulations, which are statements of general applicability to guide the conduct or action of universities, constituents or the public, adopted by the Board of Governors that implement its powers and duties.[6]

[4] Received by New College on April 6, 2018.
[5] Article IX, Section 7 of the Florida Constitution
[6] Regulation Development Procedure, adopted by the Board of Governors in March 2006

Each of the 12 public universities is administered by a board of trustees, whose powers and duties are established by the Board of Governors. New College is the 11th member of the State University System of Florida. It is a liberal arts honors college and is located in Sarasota, Florida. It was founded as a private college in 1960, but joined the State University System of Florida as part of the University of South Florida in 1975. In 2001, it achieved independence from the University of South Florida and became an autonomous member of the State University System of Florida. New College is home to more than 800 students and 75 full-time faculty engaged in interdisciplinary research and collaborative learning. Its mission is to offer a liberal arts education of the highest quality in the context of a small, residential public honors college with a distinctive academic program which develops the student's intellectual and personal potential as fully as possible; encourages the discovery of new knowledge and values while providing opportunities to acquire established knowledge and values; and fosters the individual's effective relationship with society.[7]

BACKGROUND

ADMISSION STANDARDS

Admission into Florida's public universities is competitive. Board of Governors Regulations 6.001[8], 6.002[9], and 6.008[10] contain minimum eligibility standards for first-time-in-college (FTIC) students seeking admission to an undergraduate degree program in the State University System of Florida. These minimum standards include, but are not limited to, 1) high school graduation, 2) a grade point average between 2.5 and 4.0 in academic core courses, 3) placement test scores, and 4) course distribution requirements (i.e., a certain amount of credits in courses such as English/language arts, mathematics, natural science, social science, foreign language, and electives).

Although the Board of Governors has established minimum standards for admission, each university may establish higher standards and include other factors into their admissions decisions. New College practices selective admission, seeking students who are able and eager to take responsibility for their own education, and who will benefit from the institution's demanding academic program and flexible curriculum.[11] New College's selection process takes into consideration factors such as grades, test scores[12], pattern of courses completed, class rank, educational objectives, past conduct, school letters of recommendation, personal letters of recommendation, and personal records of

[7] Approved by the New College Board of Trustees on January 3, 2014 and the Board of Governors on March 20, 2014.
[8] *General Admissions*
[9] *Admission of Undergraduate First-Time-in-College, Degree-Seeking Freshman*
[10] *Postsecondary College-Level Preparatory Testing, Placement, and Instruction for State Universities*
[11] As noted in the *New College of Florida General Catalogue 2018-2019.*
[12] New College uses a higher standard for the mathematics portion of the SAT and ACT Exams.

involvement in activity outside the curriculum.[13] Meeting minimum admission requirements does not guarantee admission. Likewise, not meeting minimum admissions requirements does not guarantee denial.[14] For students who do not meet the minimum requirements, New College may consider whether they possess special attributes, talents, or unique circumstances that may contribute to a representative and diverse student body. In those instances, New College may offer admission if it is determined that the applicant can reasonably be expected to do satisfactory work at the institution.

Federal and state laws[15], Board of Governors regulation[16], and university regulations[17] prohibit New College from excluding persons from participation in, denying benefits to persons, or subjecting persons to discrimination under any program or activity because of a disability.

GENERAL ADMISSIONS PROCESS

To apply for admission at New College, students must submit their application online through the Common Application[18]. The Common Application includes a writing sample ("essay") as part of the application, as well as an additional information section to provide any other pertinent information the applicant thinks necessary. For the essay, applicants may select to respond to one of seven prompts. In addition to the information submitted through the Common Application, applicants must also submit a letter of recommendation, their self-reported student academic record, their standardized test results, and an application fee or fee waiver. Student admissions decisions are made within the Office of Enrollment Management[19], under the general supervision of the Associate Dean of Admissions and Financial Aid. After a student submits all of their application materials, the application file is considered complete and goes through a multi-step review process, in accordance with the procedures outlined in the *New College of Florida Undergraduate Application Review Handbook* for the given year.

---

[13] New College of Florida Regulation 5-1002 *Undergraduate Admissions*
[14] Board of Governors Regulation 6.002 *Admission of Undergraduate First-Time-in-College, Degree-Seeking Freshmen* and New College of Florida Regulation 5-1002 *Undergraduate Admissions*
[15] Title II of the Americans with Disabilities Act of 1990 (42 United States Code Sections 12131-12134) and Section 504 of the Rehabilitation Act of 1973 (29 United States Code Section 794); and Section 1000.05, Florida Statutes
[16] Board of Governors Regulation 2.003 *Equity and Access*
[17] New College of Florida Regulation 3-4027 *Discrimination/Harassment* and New College of Florida Regulation 5-1002 *Undergraduate Admissions*
[18] The Common Application is an undergraduate college admission application that applicants may use to apply to any of more than 800 member colleges and universities in the United States and abroad.
[19] See Appendix A for an organizational chart of the Office of Enrollment Management.

Designated admissions staff members (aka "readers") conduct an initial evaluation of the application files and route them to one of five decision bins: *Deny Bin, Hold Bin, Misconduct Bin*, *Committee Bin*, and *Admit Bin*. During the initial evaluation, the reader reviews and scores various components of the application (i.e., grade point average, course rigor, test scores, essay, etc.) and determines the overall application score by adding each of the component scores together. Any applications that receive an overall score less than 85 points are routed to the *Deny Bin*; unless additional grades or scores might improve the application score, in which case the application would be routed to the *Hold Bin* and additional materials are requested from the applicant. Any applications with an overall score of 85 points or more containing information pertaining to student misconduct are routed to the *Misconduct Bin*. Any applications with an overall score between 85 and 114 points are routed to the *Committee Bin* for consideration. Any applications with an overall score of 115 points or greater are routed to the *Admit Bin*. However, applications with an overall score of 115 points or greater can also be routed to the *Committee Bin* for consideration if the application contains a "red-flag[20]."

While the *New College of Florida Undergraduate Application Review Handbook* does not provide a definition for the term "red-flag," it does provide a list of potential "red-flag" issues, which includes, but is not limited to, concerns with the letter of recommendation, essay, test scores, academic units, or grade point average. If a reader identifies a "red-flag" issue, they indicate that by noting that the application file contains a "red-flag" in the initial evaluation record and then routing that application file to the *Committee Bin*.

The Admissions Review Committee evaluates the application files that were routed to the *Committee Bin*. The Admissions Review Committee is comprised of multiple members: the readers, a faculty representative, a student affairs representative, the Director of Financial Aid, the Director of Student Recruitment, and the Associate Dean of Admissions and Financial Aid. The Associate Dean of Admissions and Financial Aid chairs the Admissions Review Committee. The committee meets as regularly as necessary throughout the year to review the application files that were routed to the *Committee Bin*. Each of the committee members has the ability to review the entire application file and provide their admissions decision recommendation in advance of the committee meeting. During the committee meeting, members discuss any application files wherein there was not a majority recommendation and make a final admissions decision. Once the final admissions decision is reached, the application file is routed to the appropriate decision bin for further processing.

[20] This first appears in the handbook for the 2018 Admissions Cycle (updated January 2018).

OBJECTIVE, SCOPE, AND METHODOLOGY

The objective of this investigation was to assess two allegations related to discrimination and violations of laws, regulations, and university policies based on testimonial and documentary evidence. The conclusions of fact (aka "findings") used by the OIGC are categorized and defined as follows:

1. Not Supported - a conclusion of fact indicating that the case supporting materials obtained in the course of the investigation establish that it is highly and substantially more probable to be not true than true that a violation of governing directives has occurred;
2. Supported - a conclusion of fact indicating that the case supporting materials obtained in the course of the investigation establish that it is highly and substantially more probable to be true than not true that a violation of governing directives has occurred;
3. Unfounded - a conclusion of fact indicating that the case supporting materials obtained in the course of the investigation establish that the allegation is not supported by facts and is clearly false; and
4. Policy Matter - a conclusion of fact indicating that the case supporting materials obtained in the course of the investigation establish that the alleged action(s) by the organization or employee were consistent with governing directives; however, the governing directives were deficient or non-existent.

Investigative fieldwork was conducted from approximately April 22, 2019 through July 1, 2019. This investigation reviewed admissions information related to the 2017, 2018, and 2019 Admissions Cycles[21]. To achieve the investigative objective, the OIGC performed the following activities:

- Researched, compiled, and reviewed relevant governing directives which served as criteria against which to evaluate the allegations;
- Conducted sworn witness and subject interviews;
- Requested pertinent information from New College based upon the reported allegations and subsequent investigative activities; and
- Reviewed the information provided by New College (including, but not limited to, the *New College of Florida Undergraduate Application Review Handbook* and admissions training materials for the 2017, 2018, and 2019 Admissions Cycles, as well as student admissions data for the 2018 and 2019 Admissions Cycles).

The OIGC conducted this administrative investigation in accordance with Board of Governors regulations, OIGC policies and procedures, and the *Principles and Standards for Offices of Inspectors General* as published by the Association of Inspectors General.

[21] Students primarily seeking admission for the Fall 2017, Fall 2018, and Fall 2019, respectively.

MATTERS INVESTIGATED

CRITERIA:

The following criteria are relevant to both of the allegations under investigations:

- Title II of the Americans with Disabilities Act of 1990 (Title II);
- Section 504 of the Rehabilitation Act of 1973 (Section 504);
- Florida Educational Equity Act;
- Board of Governors Regulation 2.003;
- New College of Florida Regulation 3-4027; and
- New College of Florida Regulation 5-1002.

Both Title II and Section 504 prohibit discrimination based on disability, stating that no qualified individual with a disability shall, solely by reason of her or his disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination. Both of the implementing Codes of Federal Regulation (CFR), 28 CFR Part 35 and 34 CFR Part 104, respectively, prohibit the use of criteria or methods of administration that have the effect of subjecting qualified individuals with disabilities to discrimination on the basis of disability. Additionally, the implementing regulation for Title II does not allow the application of eligibility criteria that screen out or tend to screen out an individual with a disability from fully and equally enjoying any service, program, or activity, unless such criteria can be shown to be necessary for the provision of the service, program, or activity being offered. Under these federal laws, disability is to be construed in favor of broad coverage and can mean any of the following:

- A physical or mental impairment that substantially limits one or more major life activities of an individual;
- A record of such an impairment; or
- Being regarded as having such an impairment.

An individual meets the requirement of "being regarded as having such an impairment" if the individual establishes that he or she has been subjected to an action prohibited under Title II because of an actual or perceived physical or mental impairment whether or not the impairment limits or is perceived to limit a major life activity.

The Florida Educational Equity Act echoes the prohibitions in Title II and Section 504, disallowing discrimination against a student in the state system of public K-20 education on the basis of certain protected classes, to include disability.[22] It also includes the prohibition of using criteria for admission to a program or course that has the effect of restricting access by persons of a particular race, ethnicity, national origin, gender, disability, or marital status. The Board of Governors adopted Regulation 2.003

[22] Section 1000.05(2)(a), Florida Statutes

Equity and Access to implement the Florida Educational Equity Act and reinforce the prohibitions against discrimination as stated in the law.

New College has two regulations that address discrimination. Regulation 3-4027 *Discrimination / Harassment* promotes an environment free from discrimination and harassment based on various factors, to include disability. Regulation 5-1002 *Undergraduate Admissions* states the institution does not discriminate in admissions based upon the applicant's race, color, religion age, disability, sex, sexual orientation, gender expression, gender identity, national origin, marital status, veteran status, or any other protected characteristic under the law.

ALLEGATION 1: DISCRIMINATORY DIRECTIVES

ALLEGATION: Dr. Joy Hamm instructed admissions staff to engage in admissions practices that were discriminatory against applicants who disclosed mental health or disability related issues in the personal essay portion of their applications.

OBSERVATIONS:

All of the "readers" for the 2018 Admissions Cycle provided testimony indicating that Dr. Hamm expressed to admissions staff, during meetings held in preparation for that admissions cycle, that she wanted them to "red-flag" admissions applications if the applicant disclosed certain information in their application file. Some witnesses stated Dr. Hamm wanted them to "red-flag" applications for any mention of mental or physical disability, or mental illness; while others noted that references to a history of abuse, violence perpetrated against or by the applicant, or anything that might lead the reader to believe the applicant is difficult or has problems with respecting others could also be "red-flagged." The witness testimony indicated these disclosures could be included in any part of the application file; however, they most often occurred in the essay or additional information sections of the applicant's Common Application. Most of the readers admitted to "red-flagging" application files for mental health or disability-related disclosures because of the instructions they received from Dr. Hamm. They expressed discomfort with the process and indicated they discussed their concerns with one another, as well as with their immediate supervisors in most cases. None of them felt comfortable bringing their concerns to Dr. Hamm directly, expressing there was a strict expectation of following the chain-of-command.

Two of the Admissions Review Committee members for the 2018 Admissions Cycle that were interviewed, who were not also readers, expressed there were applicants that went to the committee for an admissions decision even though they met the admissions criteria. Both of them expressed they noticed that applicants who wrote about struggles with mental health issues or disabilities consistently came before the committee. One of

those members expressed they had a hard time identifying why that applicant was "red-flagged" if not for their mental health or disability-related disclosure. The committee members, who were not also readers for this cycle, could not confirm whether Dr. Hamm gave the alleged instructions to the readers; however, they indicated they have heard Dr. Hamm explain she wanted to improve the school's metrics, and they needed students who were college ready and could be successful at New College.

Readers and committee members alike explained that Dr. Hamm's expressed reasoning for why they should "red-flag" those applications was because New College's Counseling and Wellness Center was underfunded and struggled to support the current student body; therefore, they needed to be able to screen for students who could be successful without the need for heavy reliance on such services.

Dr. Hamm emphatically denied providing the alleged instructions. During her interview, as well as through additional correspondence to the OIGC[23], she indicated she came into a broken system wrought with student conduct issues, wasteful or inefficient admissions recruitment practices, unclear admissions decision processes, and unprofessional behavior and policy violations by various admissions staff. She indicated she had to make changes quickly, in terms of stricter policies and oversight, physical reorganization of staff, and increased accountability, which were not well accepted by staff and earned her "fast hatred."

Dr. Hamm explained the application review process and admissions decisions for the 2017 Admissions Cycle had already been completed by the time she was hired in July 2017. After she was hired and became aware of the problems facing the student population and admissions department, changes to the way in which application files were evaluated and scored were made for the 2018 Admissions Cycle. She explained she put a mathematical formula in place, with the help of data analytics, to calculate and weight some of the application file components (i.e. grade point averages, course rigor, and test scores). She said she also asked the Writing Center to develop a rubric to help readers grade different aspects of the essay in a more objective manner; the essay score was added to the formula as a raw score. The new system also incorporated the "red-flagging" of certain issues; however, she expressed the term "red-flagging" was not coined by her. She stated the operations team came up with the term "red-flagging" when they were updating the readers' scoring sheets. To her, if some aspect of the application file was "red-flagged," it meant the file just needed "a second look" by the Admissions Review Committee.

Dr. Hamm explained the Admissions Review Committee always existed; however, in the past the members consisted of her predecessor and the Associate Dean of

[23] Received on May 12, 2019, via email.

Admissions and Financial Aid, who only considered application files if the readers could not make an admissions decision. She did not think this was fair to students and put too much control in the hands of an individual reader. She explained she changed the composition of the committee to be more representative of the campus; therefore, she included members from other departments. She indicated application files should have a second look if there was something in the essay that was of concern; however, she denied ever expressing that application files should be "red-flagged" for disclosing a mental health issue or disability. She explained that her guidance has focused on whether the applicant "closed the loop" in their essay, meaning, if they answered all of the parts of the essay prompt they selected. She also explained that she spoke with the Admissions Review Committee members about college readiness, noting that included characteristics of resiliency, and whether or not all of the materials in the application file demonstrated a level of college readiness that would be needed for a student to succeed at New College.

Dr. Hamm denied having discussions with staff about decreasing the number the students who might require services for such things as mental health or disability-related issues. She expressed that whether a student needs services or accommodations should not be considered as part of the admissions decision process. She indicated she had participated in conversations about being more honest and realistic about the services available when providing information to potential students or their family members.

The admissions data reviewed for the 2018 Admissions Cycle showed there were 58 application files, out of 1,088 total application files, that received an overall score greater than 85 points, but noted a "red-flag" or comment regarding the essay. Based on the general admissions processes described previously, 21 of those 58 application files should have been automatically routed to the *Committee Bin* regardless of the essay "red-flag" or comment because they received an overall score between 85 and 114 points. Another eight of those 58 application files would also have been automatically routed to the *Committee Bin* even though they received an overall score of 115 or greater because they noted multiple "red-flag" issues. The remaining 29 of those 58 application files would have been automatically routed to the *Admit Bin* based on their overall score (≥ 115 points); however, they were routed to the *Committee Bin* because they contained a single "red-flag" for essay. Twenty-two of those 29 application files self-disclosed a disability, mental health issue, or history of abuse; of those, thirteen were admitted to New College, whereas the other nine were denied admission[24]. The reader's scoring sheet for some of those application files noted the applicant self-disclosed a mental illness, disability, or an experience or history involving abuse.

[24] One of the nine was denied as a result of a misconduct issue.

Additionally, since one of the explanations about "red-flagging" for essay was that essays were to be "red-flagged" if the applicant did not answer all of the parts of the essay prompt, we reviewed all of the "red-flagged" essays to determine whether applicants answered all of the parts of the essay prompt. Our review found that all 58 applicants answered all parts of the essay prompt.

FINDING: Supported

Despite Dr. Hamm's denial, witness testimony indicated the admissions staff, particularly the readers, received instructions and/or guidance from Dr. Hamm to "red-flag" application files that contained disclosures related to a mental health issue or a disability so that the Admissions Review Committee could review the files and make an admissions decision. Readers admitted to "red-flagging" application files with such disclosures based on the instructions/guidance they received from Dr. Hamm. The readers' scoring sheets for the 2018 Admissions Cycle demonstrated that the reasons for some of the essay "red-flags" were for self-disclosures of specific mental illnesses or disabilities. Although offered as a reason, a review of the admissions data did not support that essays were "red-flagged" because the applicant did not thoroughly respond to all of the parts of the essay prompts.

ALLEGATION 2: DISCRIMINATORY PROCESSES

ALLEGATION: New College's current admissions process is discriminatory against applicants who discuss mental health or disability related issues in the personal essay portion of their applications.

OBSERVATIONS:

Since at least the 2017 Admissions Cycle, student applications have been subject to a multi-step review process at New College. In general, "first readers" were responsible for evaluating the application files and recommending the initial admissions decision. They followed the *New College of Florida Undergraduate Application Review Handbook* (dated December 2016), as well as any other guidance or reference material provided by the Associate Dean of Admissions and Financial Aid, to make their recommendation. The application review handbook for the 2017 Admissions Cycle did not reference a "red-flagging" system.

The application review handbook noted there was no absolute formula for admission; however, it did prescribe certain ratings for each of the components of the application file (i.e. course selection, high school core units, grade point average, class rank, test scores, essay, etc.). Taking all of the components into consideration, application files rated 1-3 would generally be admissible, while those rated 6-8 were rarely admissible.

If the "first readers" were unsure about an admissions decision, the application file could be reviewed by a "second reader," identified in the application review handbook as the chair; however, it did not specify who fulfilled that role. The third step in the process was the "Decision."

As noted under Allegation 1, Dr. Hamm made changes to the way in which application files were evaluated and scored for the 2018 Admissions Cycle; those changes were also in place for the current 2019 Admissions Cycle. Two of the most prominent changes to the review process were the institution of the mathematical formula and the development of the essay scoring rubric in order to make the scoring more quantitative and objective. The incorporation of the list of "red-flag" issues was another prominent change to the review process. Dr. Hamm explained the previous review process included an option for a secondary review, although the reasons for a secondary review were not always clear, it was not phrased as being the result of "red-flagging" an application file, and it was usually conducted by her predecessor and/or the Associate Dean of Admissions and Financial Aid. Under the new review process, the secondary review would be conducted by the Admissions Review Committee, and it would be warranted if the application file had an overall score between 85 and 114 points, or if the application had an overall score of 115 points or greater and also contained a "red-flag" for one of the issues listed in the application review handbook.

Most of the readers for the 2018 Admissions Cycle admitted to "red-flagging" application files because of a disclosure related to mental illness or a disability (as described under Allegation 1). There were only two readers for the 2019 Admissions Cycle. One of the readers expressed there was an expectation to "red-flag" application files if the applicant mentioned they had a mental disability or disclosed an issue that might affect their ability to learn. The other reader expressed the "red-flag" for essay topic has turned into "red-flagging" essays for mental health, although that was not the only reason why an essay could be "red-flagged." That same reader noted that Dr. Hamm provided guidance during a conference call in February 2019 that they (the readers) were to stop "red-flagging" application files simply because the applicant mentioned a mental health or disability-related issue; however, based on Dr. Hamm's guidance, it was that reader's understanding that they (the readers) were still expected to "red-flag" application files if the applicant indicated an ongoing struggle with the issues they disclosed.

Admissions Review Committee members, under both the 2018 and 2019 Admissions Cycles who were not also readers, expressed they could not understand why some of the applicants were "red-flagged" for essay, if not for their mental health or disability-related disclosure. Those committee members stated they reported their concerns that applications were being "red-flagged" for improper reasons to their respective supervisor, one even reported their concerns directly to Dr. Hamm in addition to their supervisor. Dr. Hamm confirmed that a committee member brought concerns to her

attention during the 2019 Admissions Cycle; she indicated she addressed it with the readers, explaining it was not about "red-flagging" someone because they disclosed a disability, but that if the disability is the hardship the applicant disclosed, they needed to consider whether the applicant "closed the loop" and answered the essay prompt fully. Dr. Hamm said their admissions decision conversations should not be focused on the applicant's disclosure, but rather on the applicant's whole picture of "college readiness."

Additionally, for the 2019 Admissions Cycle, Admissions Review Committee members confirmed there were application files discussed in committee meetings wherein the applicant self-disclosed a mental illness or other disability. One of the members recalled discussing an applicant who disclosed self-harm/violence in their essay; the committee's discussion centered around whether that applicant wrote about what they learned from that experience. Multiple committee members indicated when discussions took place about applicants who self-disclosed a mental illness or disability, those discussions focused on whether the applicant demonstrated that they possessed coping strategies for those issues or on whether New College had the right resources to help the applicant succeed at the institution.

The admissions data reviewed for the 2019 Admissions Cycle showed there were 64 application files that received an overall score greater than 85 points, but noted a "red-flag" or comment regarding the essay, and were therefore routed to the *Committee Bin*. Based on the general admissions processes described previously, 25 of those 64 application files should have been automatically routed to the *Committee Bin* regardless of the essay "red-flag" or comment because they received an overall score between 85 and 114 points. Another 16 of those 64 application files should also have been automatically routed to the *Committee Bin* even though they received an overall score of 115 or greater because they noted multiple "red-flag" issues. The remaining 23 of those 64 application files would have been automatically routed to the *Admit Bin* based on their overall score (≥ 115 points); however, they were routed to the *Committee Bin* because they contained a single "red-flag" for essay. Eighteen of those 23 application files self-disclosed a mental health issue, disability, or history or experience of abuse; of those, 11 were admitted, four were denied, and three were placed on hold for additional information at the time of our review. The readers' scoring record for the application files that were routed to the *Committee Bin* for the 2019 Admissions Cycle did not contain any notes about the applicant self-disclosing a specific mental illness, disability, or an experience or history involving abuse; however, there were a few with notes indicating a disclosure about adversity or challenges with unclear resolutions. For those few application files, the essays referenced cognitive impairments, struggles with mental illness, or experiences of abuse.

Additionally, since one of the explanations about "red-flagging" for essay was that essays were to be "red-flagged" if the applicant did not answer all of the parts of the

essay prompt, we reviewed all 64 application files and determined the applicants answered all parts of the essay prompt.

FINDING: Supported

The testimonial evidence confirmed that application files containing self-disclosures related to mental health or disability-related issues were "red-flagged" and sent to the Admissions Review Committee for a secondary review. The admissions data that was reviewed confirmed there were application files containing such disclosures that were "red-flagged" solely for the essay. Although offered as a reason, a review of the admissions data did not support that essays were "red-flagged" because the applicant did not thoroughly respond to all of the parts of the essay prompts. This activity subjects applicants who disclose such information to different treatment than those who do not disclose such information, and could have the effect of restricting access for persons with mental illnesses or disabilities, contrary to laws, regulations and policies.

RECOMMENDATIONS

Based on the findings in the investigative report we recommend the following:

1. New College of Florida take appropriate action to ensure student admissions practices are in compliance with federal and state laws, as well as Board of Governors regulations and university policies.

2. New College of Florida take any personnel action it deems appropriate.

3. New College of Florida conduct an objective review of the applicants that may have been negatively impacted by its admissions practices.

4. New College of Florida include a copy of this investigative report should a public records request be submitted for its internal investigative report related to the initial complaint it received related to this matter.

ACKNOWLEDGEMENTS

We wish to thank New College's administration and staff for their cooperation and assistance, which contributed to the successful completion of this investigation.

Approval by:

Julie Leftheris, CPA, CIG, CIA, CFE, CISA
Inspector General and Director of Compliance

Re: Response to Draft Report of Investigation – OIGC Case No. 2019-072

Dear Ms. Leftheris:

In accordance with Board of Governors Regulation 4.004(4), New College of Florida ("New College") submits this response to the Draft Report of the Office of the Inspector General and Director of Compliance ("OIGC") dated July 19, 2019. First and foremost, New College expresses its appreciation for the OIGC's investigation and report related to the admissions practices of the College. New College desired and welcomed an independent investigation of these issues, and the OIGC's Report has been an invaluable resource in identifying areas in which the College must modify and improve its practices.

Indeed, the Draft Report has been a significant catalyst for institutional self-reflection and change, and the College is working diligently to follow the Recommendations set forth in the Report. New College has already taken action to change the leadership of the enrollment management department. Further, College officials are implementing a comprehensive review of admissions processes to ensure that all applicants, including those who disclose a disability or a mental illness, are treated fairly and equitably in accordance with transparent admissions criteria.

Moving forward, New College will engage the resources of disability advocacy groups to provide expertise regarding proper processes and training. We will work with the Board of Governors and the State University System to find the proper balance between our legal and moral obligations to equitably review applicants, identify and provide accommodations to students with disabilities, and protect the safety and well-being of our campus community.

As part of its comprehensive review, New College will also engage students and alumni to elicit information regarding their experiences with disability accommodation at the College, and to identify changes that can be made to make the educational experience at the College more

New College of Florida | 5800 Bay Shore Road | Sarasota, FL 34243-2109 | 941-487-4100 | Fax: 941-487-4101 | www.ncf.edu

accessible and supportive. Moreover, in accordance with the Draft Report Recommendations, the College will objectively and critically review the materials of applicants from the 2018 and 2019 admissions cycles who self-disclosed disabilities or mental health issues to determine if any of those applicants should be granted admission and will take any necessary appropriate action with regard to those applicants.

New College exists to prepare intellectually curious students for lives of great achievement. Our students, faculty and staff have shown unwavering dedication to working towards a truly inclusive community dedicated to excellence and student agency. With the guidance and support of the Board of Governors and our peer institutions, New College is staunchly committed to implementing necessary changes to ensure that all applicants are reviewed and considered in a fair, transparent and non-discriminatory manner. We look forward to working with you as we implement these changes so that New College and our students can realize their deepest aspirations.

Respectfully,

Donal O'Shea
President

BOARD OF GOVERNORS
ACADEMIC AND STUDENT AFFAIRS COMMITTEE
UNIVERSITY OF SOUTH FLORIDA
TAMPA, FLORIDA
June 12, 2019

Video or audio archives of the meetings of the Board of Governors and its Committees are accessible at http://www.flbog.edu.

1. Call to Order and Opening Remarks

Chair Norman Tripp convened the meeting on June 12, 2019, at 1:48 p.m. with the following members present: Governors Cerio, Corcoran, Felton, Johnson, Lamb, Morton, and Scott. A quorum was established.

2. Minutes of March 28, 2019, Committee Meeting

Chair Tripp asked for a motion to approve the minutes from the March 28, 2019, committee meeting. Governor Lamb moved to approve the minutes, Governor Corcoran seconded the motion, and the motion carried unanimously.

3. Vice Chancellor and Chief Academic Officer's Report

Vice Chancellor for Academic and Student Affairs, Dr. Christy England, reported on the following activities of the Academic and Student Affairs (ASA) unit.

- On April 2, Vice Chancellor England, Assistant Vice Chancellor for Strategic Initiatives and Economic Development, Ms. Emily Sikes, and Director of Economic Development, Mr. Roger Strickland met with staff from the Florida Chamber to discuss the ongoing projects and opportunities for future collaborations.
- On April 17-18, Mr. Strickland attended the Gulf Power Economic Symposium in Destin, Florida.
- On April 23, Dr. England attended the Council of Academic Vice Presidents (CAVP) Academic Coordination Group meeting at the University of South Florida, Center for Advanced Medical Learning and Simulation. Eleven pre-proposals were reviewed at the bachelor's, master's, and doctoral levels.
- On April 24-25, Mr. Strickland attended the Center of Academic Excellence in Cybersecurity Executive Leadership Forum in Pensacola, Florida. This national event, hosted by the University of West Florida, was an outstanding opportunity to engage with leaders in academia, industry, and government.

- On May 1-2, Mr. Jeremy Hudak attended a meeting with the Southern Regional Education Board (SREB) to discuss the Academic Common Market program of which Florida is a participant.
- On May 17, Director for Student Affairs, Dr. Lynn Nelson, participated in the Hazing Prevention Summit hosted by the University of Central Florida. This summit has been an annual event for the last several years and continues to be well attended.
- On May 17, Dr. England met with the Advisory Council of Faculty Senates in Tallahassee at the invitation of Governor Felton. Support for Kognito was made evident.
- Staff from the Academic and Student Affairs unit participated in two meetings with the FAMU-FSU College of Engineering Management Council: an in-person meeting in May and a telephone meeting in June. The College of Engineering is now ranked 111th in the country. Admissions are up for both institutions. During the June conference call, the FAMU-FSU College of Engineering 2019-2020 budget was reviewed.
- In late May, Ms. Sikes participated in the first meeting of the Advisory Group for Florida's Career and Technical Education Audit. This group was established through HB 7071 and is a part of the Governor's executive order on workforce education. Ms. Sikes will be the Board's lead staff for this activity.
- In May, Assistant Vice Chancellor for Academic Affairs, Dr. Traki L. Taylor, Director of Articulation, Ms. Lynda Page, and Ms. Sikes met with Chancellor Kathy Hebda from the Florida College System and her staff to start working on the implementation of a wide array of initiatives outlined in HB 7071.
- On May 31, Mr. Strickland attended the Make More Manufacturing Summit in Orlando.
- On June 3, Dr. Disraelly Cruz attended the spring meeting of the Florida Institute of Oceanography.
- On June 7, Dr. Nelson and Ms. Page attended the Johnson Scholarship Foundation meeting in Tampa. Career service directors were invited to discuss how they can enhance opportunities for students with disabilities upon completing their degrees and helping them transition into the workforce.
- Dr. England and Dr. Nelson attended the Council of Student Affairs VP/AVP Summit hosted by the University of South Florida in Tampa.
- The Academic and Student Affairs unit is now fully staffed with the hiring of Ms. Brittanian Gamble. She is our newest Assistant Director for Academic Affairs.

Chair Tripp explained that he requests Dr. England to share updates with the Committee at every meeting so everyone can have an understanding of the work completed by staff in the Academic and Student Affairs Unit. He expressed his appreciation for the work by Board staff.

4. <u>Math Re-Design</u>

Chair Tripp recognized Dr. England to provide an update on the State University System (SUS) and Florida College System (FCS) Mathematics Re-design effort.

Dr. England began the presentation by providing a brief overview of the Re-Design effort for the new Board of Governors members. The statewide initiative began last summer in collaboration between the Board of Governors, Florida College System, and Florida Department of Education. Since September 2018, three workgroups have convened to review the Mathematics curriculum through the entirety of Florida's K-20 Education System. Dr. England explained that each of the three workgroups had a different focus. The three different workgroups engaged in this effort are: K-12 to Postsecondary Workgroup; FCS Math Sequences Workgroup; and FCS to SUS Workgroup. Each workgroup had faculty and staff representation from all three sectors within the Florida K-20 System (K-12, FCS, and SUS). She shared that several staff members from the Board of Governors Office have also been actively involved in the effort.

Dr. England highlighted that the workgroups are in the process of wrapping up their work. The report and recommendations from the workgroups will be presented at the final meeting on June 27, 2019, in Gainesville, Florida. The workgroups will provide recommendations in a variety of areas. Dr. England shared some of these key areas, including: improving advising at both the K-12 and post-secondary levels; increasing the availability of information to parents regarding the Mathematics curriculum; and improving course and career alignment. Regarding the last area, Dr. England shared that one of the focal points has been examining the role of College Algebra as a required course for all majors and disciplines. Additionally, she shared that there were also recommendations regarding placement testing and pedagogy.

Dr. England shared that she would provide an update to the committee at the August meeting to share details from the June 27th meeting in Gainesville as well as the next steps for the Re-Design effort.

Chair Tripp noted that math re-design has been a major endeavor throughout the state. He is hopeful that this initiative will be very helpful to the SUS in the STEM areas. He indicated that he is looking forward to the report and ways to bring about necessary changes.

5. Academic Program Items

Chair Tripp introduced the following academic program requests.

A. Ph.D. in Engineering and Computing Education, CIP 14.9999, Florida International University

Chair Tripp introduced Dr. Kenneth G. Furton, Provost and Executive Vice President at Florida International University (FIU) to introduce the proposal. Dr. Monique Ross, Assistant Professor in the School of Computing & Information Sciences and STEM Transformation Institute at FIU, presented the proposal. The proposed program would prepare students to serve as faculty members in engineering or other programs; research scientists in academia, government, and industry; instructional designers at universities or in the industry; and more. The FIU Board of Trustees approved the program on March 4, 2019.

Chair Tripp asked how the program will be evaluated in a few years to ascertain its effectiveness. He inquired if the university would return to the Board of Governors in two years to provide an update on the effectiveness of the program and accomplishments. Provost Furton shared that FIU completes annual reviews on all of their programs and he would be happy to return and share the information as often as the Board would like.

Following the discussion, Chair Tripp asked for a motion to approve Florida International University's Ph.D. in Engineering and Computing Education, CIP 14.9999, at the currently approved tuition of $379.95 per credit hour for in-state students and $900.00 per credit hour for out-of-state students with total fees of $75.69 per credit hour for in-state students and $101.69 per credit hour for out-of-state students with a program implementation in Fall 2020.

Governor Lamb moved to approve, Governor Morton seconded, and the motion carried unanimously.

B. Doctor of Athletic Training, CIP 51.0913, University of Florida

Chair Tripp introduced Dr. Chris Hass, Associate Provost for Academic and Faculty Affairs at the University of Florida (UF), to present the program proposal. Dr. Patricia Tripp, a Clinical Associate Professor at UF, was present to assist with questions. The proposed Doctor of Athletic Training (DAT) would provide professionals with advanced clinical knowledge and skills while they participate in a patient-centered healthcare program. Graduates of the program would earn a Certificate of Added Qualification upon completion of an area of distinction. The proposed DAT would be the second post-professional program in the State University System of Florida. The UF Board of Trustees approved the program on September 17, 2018.

Chair Tripp asked for clarification on the differences in fees for in-state and out-of-state students. Dr. Hass responded that those were the fee structures approved for the university. Governor Cerio asked if it was the same fee structure across all graduate programs, and Dr. Hass confirmed.

Governor Felton inquired about differences in assistantships for doctoral assistants and post-professional master's students. Dr. Tripp explained that the assistantships or funded work experiences would be accompanied by an in-state tuition waiver. Dr. Tripp noted that the amount that would be covered would be dependent upon the agreement with each individual student. Since the students would be paying in-state tuition, they will only be paying in-state fees. Governor Felton then asked about the enrollment projections and suggested that the doctoral programs report back to the Board of Governors a couple of years after approval regarding program enrollment and whether or not the program has elevated the profession.

Governor Morton asked for clarification regarding requiring a master's degree for a student to become a certified Athletic Trainer in the future when demand is rapidly increasing. He stressed the need to train additional professionals to meet the demand. Dr. Tripp provided some additional information regarding the Commission on Accreditation of Athletic Training (CAATE) accreditation. Governor Morton also affirmed that it is important to prepare more educators to train future professionals. Dr. Tripp provided additional information regarding CAATE's requirements for programs.

Following the discussion, Chair Tripp asked for a motion to approve the University of Florida's post-professional Doctor of Athletic Training, CIP 51.0913, at the currently approved graduate rate tuition of $448.73 per credit hour for in-state students and $690.21 per credit hour for out-of-state students with total fees of $81.96 per credit hour for in-state students and $535.20 per credit hour for out-of-state students with a program implementation in Summer 2020.

Governor Felton moved to approve, Governor Lamb seconded, and the motion carried unanimously.

C. Ph.D. in Anatomical Sciences Education, CIP 26.0403, University of Florida

Chair Tripp recognized Dr. Chris Hass, Associate Provost for Academic and Faculty Affairs at the University of Florida (UF), to present the program proposal. The proposed program would train individuals to become educators in all anatomical science disciplines and conduct anatomical pedagogy research. The program would be the first Ph.D. in Anatomical Sciences Education in CIP 26.0403 in the State of Florida. The UF Board of Trustees approved the program on December 7, 2018.

As there was no discussion or questions on the proposal, Chair Tripp asked for a motion to approve the University of Florida's Ph.D. in Anatomical Science Education, CIP 26.0403 at the currently approved graduate rate tuition of $448.73 per credit hour for in-state students and $690.21 per credit hour for out-of-state students with total fees

of $81.96 per credit hour for in-state students and $535.20 for out-of-state students with a program implementation in Fall 2019.

Governor Lamb moved to approve, Governor Felton seconded, and the motion carried unanimously.

D. Ed.D. in Instructional Design and Technology, CIP 13.0501, University of West Florida

Chair Tripp introduced Dr. George Ellenberg, Provost and Senior Vice President at the University of West Florida (UWF) to introduce the proposal. Dr. Ellenberg then introduced Dr. William Crawley, Dean of the College of Education and Professional Studies at UWF to present the proposal. The proposed program would prepare students to serve in leadership roles for organizational development, performance improvement, technology integration, and workplace learning. The program would be the first Ed.D. in Instructional Design and Technology under CIP code 13.0501, which is an identified Program of Strategic Emphasis under the Science, Technology, Engineering, and Mathematics area. The UWF Board of Trustees approved the program on December 5, 2018.

As there was no discussion or questions on the proposal, Chair Tripp asked for a motion to approve the University of West Florida's Ed.D. in Instructional Design and Technology, CIP 13.0501, at the currently approved graduate rate tuition of $295.34 per credit hour for in-state students and $923.57 for out-of-state students with total fees of $89.26 for in-state students and $120.67 for out-of-state students with a program implementation in Fall 2020.

Governor Morton moved to approve, Governor Scott seconded, and the motion carried unanimously.

6. Articulation Coordinating Committee Credit-by-Exam Equivalencies

Dr. Traki L. Taylor presented on the Articulation Coordinating Committee's Credit-By-Exam Equivalencies. Section 1007.27(2), Florida Statutes, requires the Articulation Coordinating Committee (ACC) to establish passing scores as well as course and credit equivalents for Advanced Placement, Advanced International Certificate of Education Program (AICE), International Baccalaureate (IB), DANTES (DSST), Defense Language Proficiency Test (DLPT), UExcel (Excelsior College Exams), and College-Level Examination Program (CLEP). Board of Governors Regulation 6.006, Acceleration Mechanisms, recognizes the use of the ACC Credit-By-Exam equivalencies for determining satisfactory performance to award equivalent course credit to be applied

towards degree requirements. State University System (SUS) and Florida College System (FCS) institutions are required to award the minimum recommended credit as designated to ensure consistent application of credit by institutions in both systems. Dr. Taylor shared that the ACC, which has SUS representation within its membership, approved revisions to the equivalencies at its February 27, 2019, meeting. The State Board of Education subsequently approved the equivalencies at their May 22, 2019, meeting.

Following Dr. Taylor's presentation, Chair Tripp shared with the committee that the changes to the Credit-By-Exam equivalencies will take effect as soon as they are approved by the Board of Governors. He then asked for a motion to approve the February 27, 2019, Articulation Coordinating Committee Credit-By-Exam equivalencies.

Governor Morton moved to approve, Governor Scott seconded, and the motion carried unanimously.

7. Engineering Programs Credit Hour Review

Dr. Ralph Wilcox, Provost and Executive Vice President of the University of South Florida, provided an update on a review of engineering programs in the State University System that require more than 120 credit hours for a baccalaureate degree. Provost Wilcox introduced the draft report that the engineering deans have worked on for submission to the Board of Governors. The four critical topics addressed in the report were: hours to degree; variance by discipline and institution; time to degree; and impact on access for underrepresented populations. Each topic was explained by Provost Wilcox. A full report and set of recommendations will be presented to the Board of Governors at the August 2019 meeting.

Governor Lautenbach inquired about the variance in engineering programs. Provost Wilcox mentioned that it would be included in the final report.

Governor Kitson asked if the reduction in credit hours in engineering programs would impact accreditation and the ability for graduates to obtain employment after graduation. Provost Wilcox answered that there are accredited 120 credit hour programs; however, credit hours have to be balanced with meeting the needs of the local community and the state. Exploring flexibility in general education requirements were also discussed.

8. Academic and Student Affairs Updates

A. SUS Council of Academic Vice Presidents (CAVP)

Dr. Ralph Wilcox, Provost and Executive Vice President from the University of South Florida and member of CAVP provided an update on their activities. He noted the agenda items that would be discussed at their upcoming meeting. These items included the total credit hours for engineering programs, recent legislative changes, potential system-wide legislative budget requests on students' success, and textbook affordability.

Chair Tripp asked if CAVP is discussing student homelessness and food banks. He asked for the CAVP to report back regarding what institutions are doing to address this issue. Governor Johnson mentioned that she would be providing information on the work that the Florida Student Association (FSA) is doing on the matter.

B. SUS Council for Student Affairs (CSA)

Dr. Corey King, Vice President of Student Affairs at Florida Atlantic University and Chair of the Council for Student Affairs (CSA), provided the report. He noted that CSA has been working with Governor Johnson and Florida Student Association (FSA) to address food insecurity and food pantries at SUS institutions. Dr. King also provided an update on the fall 2019 implementation of the Kognitio mental health software. Recently he participated in a Faculty Senate conference call where they discussed the benefits of using the software. Dr. King reported that all SUS institutions have now adopted amnesty policies.

Dr. King then discussed future initiatives. CSA is planning on hosting a summit on enrollment management to discuss student success in the State of Florida. Also, CSA is continuing to develop a formal proposal for hard waiver student insurance. Lastly, he welcomed Governor Zenani D. Johnson to the Board of Governors.

Chair Tripp requested an update on hazing in the SUS for the past 12 months. Dr. King indicated he would share more details at the August Board of Governors meeting. Chair Tripp also asked about steps taken to ensure that students know about medical amnesty. Dr. King indicated he would discuss system-wide initiatives with CSA and will provide an update at the next meeting.

C. Florida Student Association (FSA)

Chair Tripp welcomed the new Chair of the Florida Student Association (FSA), Governor Zenani D. Johnson. Governor Johnson provided background on FSA and then provided an update on FSA activities. FSA has been working with legislators on the Florida pre-paid program and has been advocating for medical amnesty. This past year, FSA has been able to pass multiple proclamations on mental health. FSA also held their first state-wide Civic Engagement week.

Each year, FSA gathers students across the state to advocate for their legislative agenda. This past session, over 100 students came to Tallahassee. Potential FSA legislative agenda items for the 2019-2020 term include making Florida #1 in the nation for solving the homeless student crisis and identifying stressors that cause mental health issues for students.

9. Concluding Remarks and Adjournment

Having no further business, Chair Tripp adjourned the meeting at 3:12 p.m.

SUBJECT: Legislative Budget Request for Florida Agricultural and Mechanical University- Florida State University College of Engineering

PROPOSED COMMITTEE ACTION

Consider approval of a Legislative Budget Request to support the Florida Agricultural and Mechanical University – Florida State University College of Engineering

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

The FAMU-FSU College of Engineering is requesting $6,511,000.00 in recurring state appropriations to support several ongoing efforts of the college. The FAMU-FSU College of Engineering is a joint venture between Florida Agricultural and Mechanical University, and Florida State University. The partnership, created by the State of Florida, began 27 years ago.

The appropriations would be used to (1) recruit additional joint college faculty researchers; (2) provide start-up funds and research equipment for faculty; (3) provide support for undergraduate student success; (4) strengthen graduate programs; (5) improve faculty retention and vitality.

Shared Services/System-Wide Issue for Fiscal Year 2020-2021	☐
Unique Issue for Fiscal Year 2020-2021	☐

I. Description

Twenty-seven years ago, the State of Florida boldly created the nation's most unique shared college of engineering bringing together Florida Agricultural and Mechanical University, the leading public historically Black university with Florida State University, one of the America's 100 top research universities. Students graduate from either FAMU or FSU, but study engineering together on our shared engineering campus.

The Florida Department of Economic Opportunity recognizes that expanding engineering education is critical to Florida's future growth. Thanks to our partnership that merges excellence in research and diversity, we are the only engineering school in the US that provides top research educational opportunities to a student population that reflects the diversity of Florida and our nation. We are also far above national averages with 28% females in our undergraduate class. Since engineering is a "team sport," the diversity of our design teams provides experiences that are highly prized by corporations and these benefits accrue to all of our students, whether majority or minority.

In the four years since the legislature and partner university leadership recommitted to the joint college, we have seen an increase in most areas by 20% – to a faculty of 119, graduating 500 engineers each year and securing $24M external research funding annually. This growth was fueled by use of carryforward that is now depleted, and the future is jeopardized by the inadequate E&G funding to the college's joint budget. The State University System Board of Governors has identified our $6.5M LBR request as a top

system-wide priority in their 2020-21 budget request. If we are to sustain the recent very positive momentum, we must have financial support. Growing national recognition for the power of this grand experiment in the State of Florida will be disrupted if we do not receive an increase this year. The investment will pay off handsomely for FAMU, FSU and the State of Florida. The wonderful thing is that success of the FAMU-FSU College of Engineering helps both our partner universities achieve their strategic goals. Florida State is about to become the second university in Florida to reach the top 25 national public universities, yet the college of engineering is only 1/3 the size of the average in the top 25 and must grow to fuel FSU's longer-term advancement in the rankings. And FAMU is already one of the leading HBCUs in research and doctoral degree production, but it also aims to become the first Historically Black University to reach the elite of top research universities with the help of the joint college of engineering. Together FAMU and FSU can do something that no other university in the U.S. can accomplish by training an inclusive, diverse and excellent workforce to fuel our state's engineering labor needs. Both universities have generously provided financial support to help the college, but the joint LBR is the only sustainable way of ensuring that the partnership endures and flourishes.

We have programs planned that will significantly improve the success of our student's retention rates, graduation rates, degree and employment opportunities. For example, we know how to improve student retention, but do not have the resources for programming and support to make this available to all our students.

We will increase opportunity for our students through hiring new faculty, introducing new courses and degrees in strategic areas for the State, such as Aerospace, Computer, Systems and Biomedical Engineering, and aggressively recruit the best and most diverse cadre of doctoral students. We will attract and retain outstanding faculty in strategic areas of research, and provide them with the facilities and staff support to enable them to compete for, and win, research grants and contracts from government agencies, corporations and foundations. To do this we need to offer competitive salaries and equipment start-up investments that will be rewarded over the years through external grant funding to the institution.

The joint college is uniquely positioned to develop new and larger research centers that support key areas of technological emphasis, including health technology, materials, aerospace, biomedical engineering, computer engineering, and energy sustainability. These research centers will in turn allow the joint college to expand the size and diversity of its student body and will lead to new intellectual property and spin-off companies in the region.

To meaningfully advance goals related to research, academic quality, overall efficiency and effectiveness of the joint FAMU-FSU College of Engineering, several critical investments must be made. In 2017, the Legislature provided $1M of the $7.168M LBR that was requested. That $1M was allocated by the college to deal with market equity adjustments to salaries, and to pay salaries for new faculty and staff in the areas of undergraduate and graduate student success. We are grateful for the legislature's support, but the additional funds requested are absolutely more essential now in order to meet strategic goals for both FAMU and FSU. This new funding will enable the college to grow to the next level and compensate for nearly a decade of underinvestment.

1) **Additional Joint College Faculty Researchers ($1M Salary + $300K Fringe)**

The recruitment of eight researchers of the highest quality are essential for the Joint College of Engineering to deliver the education and impact needed by the State of Florida, while increasing its reputation to the benefit of graduates and the region.

a. Faculty in sensors and biomaterials for healthy aging ("aging in place") will require technology for medical devices and sensors that would leverage existing strengths at the college, the FSU College of Medicine and the FAMU School of Pharmacy.
b. Faculty in materials for aerospace: ultra-light and strong materials are critical to the development of a growing commercial aerospace industry, and to entrepreneurial approaches for efficient high-speed transportation. Through the college, both FAMU and FSU are funded for deep-space development, and new faculty will enable us to seek larger funding opportunities.
c. Faculty in robotics: robotics has growing applications to improve manufacturing efficiency, assist loss of function in people, and expand the capabilities of networked devises, popularly known as the "internet of things." We will strengthen our industry standing through additional hiring in the area of controls expertise within mechanical and electrical engineering.
d. Faculty in biomedical engineering: tissue engineering and synthetic biology are areas that address human health and manufacturing technology. Growing numbers of Florida undergraduates are exploring the emerging potential of biomedical engineering.
e. Faculty in cybersecurity for energy resilience: the development of sustainable energy is vitally important to the state and beyond to the global marketplace. We would expand on our strength in power systems to design a robust renewable energy "microgrid" and enhance the systems side of renewable energy capture, storage, and transportation.
f. Additional faculty to complement those listed above.

2) **Start-up funds and research equipment for faculty ($2.5M)**

a. Universities must provide "start-up" packages to attract outstanding researchers, provide the resources they need to succeed in their research, and add to the capabilities of the college in research and education.
b. Packages include funds for equipment, laboratory renovation and for technician support. Faculty hires will require an average of $600K each, numbers based on averages of ACC engineering schools shared by the ACC Deans Council. We hope we will be able to keep these costs down, but the packages in engineering will need to be competitive to hire faculty with the desired credentials.
c. Faculty hired in the FAMU-FSU College of Engineering embrace the interconnected missions of teaching, research and service. New faculty and capabilities expand the learning and career opportunities for students, and add to entrepreneurial capabilities in the community and the state.
d. Research activity is essential to the mission of a leading engineering school, and it benefits the students who need access to state-of-the-art tools and ideas. The State benefits from the best trained students, and from the entrepreneurial culture that is fostered. Start-up investments are leveraged many-fold through the external funding attracted by top faculty. Recurring funding is needed to address continuing need for faculty replacement and equipment obsolescence.

3) **Support for (undergraduate) student success ($1.465M)**

a. Salary and Fringe (**$350K Salary + $105K Fringe**)
   i. These activities require the hiring of five dedicated staff members for advising and mentoring.

b. Non-Salary Expenses Related to Student Success **($1,010,000)**
   i. Retention: to improve the retention rate of students we must provide bridge programs and peer-based tutoring to prepare students for pre-engineering science and math needs and ensure their success.
   ii. Successful transfer into major: almost 50% of incoming undergraduates fail to continue on to the major, and transfer to other majors or drop out. Enriching the pre-engineering experience with major-based projects and activities will increase the motivation of students and the successful transfer rate.
   iii. Reduce time to degree: after transferring from pre-engineering the graduation rate is over 70% but the time to graduation on average exceeds four years. Flexibility through the provision of more courses in each semester, and online courses, will reduce the average time to degree and improve the four-year graduation rate.
   iv. Recruiting: additional resources for recruiting will encourage talented and well-prepared students to enroll in the FAMU-FSU College of Engineering. In addition, we aim to connect with talented high-school students in their junior year to secure their interest and guide them to make full use of their senior year for pre-engineering preparation.
   v. Internships: internships and co-ops are very attractive to students and employers, and the experiential learning helps students find better higher-paid positions and gives employers better calibration of a potential employee's skills. Strengthening experiential learning will increase the graduation rate.

These activities require the hiring of four dedicated staff members for advising and mentoring, along with the renovation and equipping of three new laboratories for design projects, and the expansion of online distance learning capabilities.

4) **Strengthen graduate student programs ($550K)**

a. Graduate students provide the highly-skilled labor for engineering firms in Florida, provide a backbone for in-house research efforts, and leverage the opportunities for undergraduates to engage in research activities. In turn, undergraduate research, a best practice at top engineering schools, exposes engineering undergraduates to exciting "beyond the textbook" experiences that will strengthen their abilities and marketability. Funds will support student fellowships to recruit the best talent and support a staff member to assist in coordination and recruiting.

5) **Retention and Vitality ($590K + 106K Fringe)**

a. Faculty continuity and retention are essential to the growth of the college. In order to retain the best and brightest faculty, select faculty salaries must be adjusted to assure retention of those individuals. Using the Oklahoma State University Survey of 114 public research universities, the FAMU-FSU College of Engineering salaries are lower than the average for comparable disciplines, making our best faculty targets for poaching by other institutions.
b. The cost to the State of Florida to replace lost faculty leaders is much higher than retaining existing faculty, since new faculty also require significant start-up investments and their productivity takes a few years to reach full potential because of the disruption in establishing a new research laboratory.
c. Because of the unique joint nature of the FAMU-FSU College of Engineering there are some inequities between the faculty at the two institutions that must be addressed in order to improve morale. In the 2017-18 additional allocation from the state, we were able to address immediate inequities – in 2018-19 we used the joint college funds to offset the inequities, therefore eating away at our operating budget – these additional funds would permit us to continue this process through the following three years.
d. Salary adjustments would not be across the board – adjustments would be made based on a review of performance of faculty in teaching and research relative to peers at other institutions.

II. Return on Investment

These additional resources will allow each of the two universities to improve on several key performance metrics: academic progress rates, graduation rates, production of undergraduate and graduate degrees in areas of strategic emphasis, employment and salary outcomes for students, and metrics related to research and grant production. Specifically:

a. Increase (by 100 students annually) the number of bachelor's and advanced degree graduates in the strategic STEM research areas of energy, biomedical engineering, environmental sustainability, transportation and energy, with graduates better prepared for success in industry due to improvements in advanced training.
b. Significant increases (by 1000 graduates over five years) in the number of degrees awarded in the core engineering disciplines of civil, chemical, biomedical, electrical, computer, industrial and mechanical engineering – all engineering areas of strategic and critical importance to the state.
c. Graduates earning higher wages based on their marketability and fit to areas of strategic interest and importance in the engineering profession.
d. Improve the research focus and outputs in the form of patents, startup companies and commercialization of research products in the identified strategic areas for the faculty positions.
e. Assist the state in diversifying its energy portfolio and meeting its goals with respect to biomedical research, environmental sustainability, aerospace and robotics.
f. Enhance the business climate by attracting companies to Florida with significant research interest in the identified strategic areas – especially companies in the energy and power, materials, biomedical, environmental, robotics and medical devices fields.

g. Retain engineers produced in Florida to stay and work for Florida's growing field of technology-based companies.
h. Support the state's leading tourism and agricultural industries through additional research and interactions with companies doing business in Florida, by supporting sustainable infrastructure, aging in place, medical devices and aerospace.

III. Facilities

None

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Academic and Student Affairs Committee
August 29, 2019

SUBJECT: Public Notice of Intent to Amend Board of Governors Regulation 6.001 General Admissions

PROPOSED COMMITTEE ACTION

Consider approval of Public Notice of Intent to Amend Board of Governors Regulation 6.001 General Admissions

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Board Regulation 6.001 General Admissions has been amended to align the information in regulation with Section 1000.05(2), Florida Statutes. Section 1000.05(2) was amended in the 2019 legislative session, adding religion to the list of protected categories from discrimination against students and employees in the Florida K-20 public education system. Adding religion to the list of protected categories that must not be used in the admission process ensures that all areas from section 1000.05(2) are referenced.

If approved by the Academic and Student Affairs Committee and the full Board of Governors, the Intent to Amend will be available for public comment for thirty days. If no concerns are raised by that time, the Regulation will come before the Board of Governors for final approval.

Supporting Documentation Included: Board of Governors Proposed Amendment to Regulation 6.001 General Admissions

Facilitators/Presenters: Dr. Traki L. Taylor

6.001 General Admissions

(1) Based on minimum standards adopted by the Board of Governors, university boards of trustees must establish the criteria, policies, and procedures by regulation for the admission of students.

(2) University policies and procedures concerning the admission process, including the process for admission decision notification and the appeal process for an admission decision, must be posted on the university's Web site and in the university catalogs. All university policies must be consistent with Board of Governors regulations and policies.

(3) The Board of Governors affirms its commitment to equal educational opportunity and to increasing student diversity in each of the state universities; however, admissions criteria must not include preferences in the admission process for applicants on the basis of race, color, national origin, disability, religion, or sex.

(4) In the admission of students, each university must take into consideration the applicant's academic ability, and may also consider other factors such as creativity, talent, and character.

(5) Each university may return to the applicant without action any application and fees received after the application deadline designated by each institution on its official calendar.

(6) Each university must provide denied applicants notice within a reasonable period of time (as defined by the university board of trustees). Upon the applicant's written request, the university shall provide the written reasons for the denial.

(7) Consideration shall be given to the past actions of any person applying for admission when such actions have been found to disrupt or interfere with the orderly conduct, processes, functions, or programs of any other university, college, or community college. If determined to be in the best interest of the university to deny admission or enrollment to an applicant because of the applicant's past misconduct on or off campus, a university may do so,

providing such denial is consistent with state and federal law. University boards of trustees shall establish guidelines regarding evidence required for such action.

(8) Individuals whose admissions applications, residency affidavits, or supplemental documents contain false, fraudulent, or incomplete statements may be subject to disciplinary action as outlined in written university policy. Such disciplinary action may include denial of admission, suspension of registration, invalidation of college credit, invalidation of degree, dismissal from the university, or other disciplinary action. In some cases, e.g., false information on a financial aid application, such behavior may lead to legal consequences.

(9) Prior to registration, each student accepted for admission must submit on a signed medical history form, including documentation of appropriate immunization as required by each university. Some students may be required to undergo diagnostic procedures prior to registration. Exceptions may be granted pursuant to university policies. Each university may reserve the right to refuse registration to any student whose health record or report of medical examination indicates the existence of a condition which may be harmful to members of the university community.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Academic and Student Affairs Committee
August 29, 2019

SUBJECT: Public Notice of Intent to Amend Board of Governors Regulation 6.021 Hazing Prohibited

PROPOSED COMMITTEE ACTION

Consider approval of Public Notice of Intent to Amend Board of Governors Regulation 6.021 Hazing Prohibited

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Board of Governors Regulation 6.021 Hazing Prohibited has been amended to address Senate Bill 1080, which amends section 1006.63, Florida Statutes. The amendment expands the definition of hazing to include "the perpetuation or furtherance of a tradition or ritual of" any university student organization or group whether or not officially recognized by the university.

Additionally, section 6 has been added to require each university to provide an annual report to the Chancellor with the number of hazing incidents that resulted in a student or student organization being held responsible for a violation of the university's anti-hazing policy. The report will be due to the Chancellor by October 1 of each year.

If approved by the Academic and Student Affairs Committee and the full Board of Governors, the Intent to Amend will be available for public comment for thirty days. If no concerns are raised by that time, the Regulation will come before the Board of Governors for final approval.

Supporting Documentation Included:	Board of Governors Proposed Amendment to Regulation 6.021 Hazing Prohibited
Facilitators/Presenters:	Dr. Lynn Nelson

6.021 Hazing Prohibited

(1) Each university board of trustees shall establish an anti-hazing policy as part of the university's student code of conduct or as a separate regulation, that prohibits students or other persons associated with any university student organization or group from engaging in hazing.

(2) Hazing means any action or situation, which occurs on or off university property, that recklessly or intentionally endangers the mental or physical health or safety of a student for purposes including, but not limited to, initiation, ~~or~~ admission into, ~~or~~ affiliation with, or the perpetuation or furtherance of a tradition or ritual of any university student organization or group whether or not officially recognized by the university. Hazing includes, but is not limited to, pressuring or coercing the student into violating state or federal law; any brutality of a physical nature, such as whipping, beating, branding, exposure to the elements, forced consumption of any food, liquor, drug, or other substance; or other forced physical activity that could adversely affect the physical health or safety of the student; or ~~and also includes~~ any activity that would subject the student to extreme mental stress, such as sleep deprivation, forced exclusion from social contact, forced conduct that could result in extreme embarrassment, or other forced activity that could adversely affect the mental health or dignity of the student. Hazing does not include customary athletic events or other similar contests or competitions or any activity or conduct that furthers a legal and legitimate objective.

(3) Each anti-hazing policy must state that the following circumstances do not constitute a defense to allegations of hazing:
   (a) The consent of the victim had been obtained;
   (b) The conduct or activity that resulted in the death or injury of a person was not part of any official organizational event or otherwise sanctioned or approved by the student organization or group; or
   (c) The conduct or activity that resulted in the death or injury of a person was not done as a condition of membership into a student organization or group.

(4) Each anti-hazing policy must provide a program for the enforcement of such regulations and must adopt appropriate penalties for violations of such regulations, to be administered by the person at the institution responsible for the sanctioning of such organizations or groups.
   (a) Penalties may include the imposition of educational sanctions, fines, the withholding of diplomas or transcripts pending compliance with the

policy or payment of fines, and the imposition of probation, suspension, dismissal, or expulsion, depending upon the severity of the violation.

(b) In the case of an organization or group that authorizes, allows, permits or encourages hazing in blatant disregard of such regulations, penalties may also include rescission of permission for that organization or group to operate on university property or to otherwise operate under the sanction of the university.

(c) All penalties imposed by the university shall be in addition to any penalty imposed for a violation of section 1006.63, Florida Statutes, and any of the criminal laws of the state, or for a violation of any other regulation of the university to which the student or student organization or group may be found responsible.

(5) All students must be provided with a copy of the anti-hazing policy and each university student organization or group must include the policy as part of the organization's or group's bylaws. Each university shall make training opportunities available for students and student organizations and groups that are designed to reinforce the policy and increase awareness of the dangers of hazing.

(6) Each university shall provide an annual report to the Chancellor of the number of hazing incidents that resulted in a student or student organization or group being held responsible for a violation of the university's anti-hazing policy. The report shall be compliant with the Family Educational Rights and Privacy Act, 20 U.S.C. s. 1232g, and the federal regulations issued pursuant thereto, and shall be submitted to the Chancellor by October 1 of each year.

Authority: Section 7(d), Art. IX, Fla. Const.; Section 1006.63, Florida Statutes; History–New, 03-28-19, Amended _____.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Academic and Student Affairs Committee
August 29, 2019

SUBJECT: Public Notice of Intent to Amend Board of Governors Regulation 8.003 Textbook and Instructional Materials Affordability

PROPOSED COMMITTEE ACTION

Consider approval of Public Notice of Intent to Amend Board of Governors Regulation 8.003 Textbook and Instructional Materials Affordability

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Board of Governors Regulation 8.003 Textbook and Instructional Materials Affordability has been amended to address Senate Bill 6, which amended subsections (4) and (8) of section 1004.085, Florida Statutes.

The amendments include the following.

1. Omitting the requirement for state university boards of trustees to examine the cost of textbooks and instructional materials by course and course section for all general education courses offered at the institution each semester to identify variance in the cost of textbooks and instructional materials among different sections of the same course.

2. Omitting the requirement for state university boards of trustees to review the percentage of textbooks and instructional materials that remain in use for more than one term.

3. Omitting the requirement for institutions to report the selection process for general education courses identified with a wide cost variance in the board of trustees' annual report to the Chancellor.

If approved by the Academic and Student Affairs Committee and the full Board of Governors, the Intent to Amend will be available for public comment for thirty days. If

no concerns are raised by that time, the Regulation will come before the Board of Governors for final approval.

Supporting Documentation Included:	Board of Governors Proposed Amendment to Regulation 8.003 Textbook and Instructional Materials Affordability
Facilitators/Presenters:	Dr. Lynn Nelson

8.003 Textbook and Instructional Materials Affordability

(1) Each university board of trustees shall adopt a regulation that establishes textbook and instructional materials affordability policies to minimize the cost of required or recommended textbooks and instructional materials for students while maintaining the quality of education and academic freedom. The regulation shall provide for the following:

(a) Selection of textbooks and instructional materials through cost-benefit analyses that enable students to obtain the highest-quality product at the lowest available price, by considering:

1. Purchasing digital textbooks in bulk;
2. Expanding the use of open-access textbooks and instructional materials;
3. Providing rental options for textbooks and instructional materials;
4. Increasing the availability and use of affordable digital textbooks and learning objects;
5. Developing mechanisms to assist in buying, renting, selling, and sharing textbooks and instructional materials;
6. The length of time that textbooks and instructional materials remain in use;
7. An evaluation of cost savings for textbooks and instructional materials which a student may realize if individual students are able to exercise opt-in provisions for the purchase of the materials.

(b) The use of innovative pricing techniques and payment options for textbooks and instructional materials in consultation with providers including bookstores. The pricing techniques and payment options must include an opt-in provision for students and may be approved only if there is documented evidence that the options reduce the cost of the textbooks and instructional materials.

(c) A deadline for the selection of textbooks and instructional materials each term that shall provide sufficient lead time for bookstores to confirm availability, source lower cost options, explore alternatives with faculty, and maximize the availability of used textbooks and instructional materials.

(d) A procedure to document the intent of the course instructor or the academic department offering the course to use all items ordered, including each individual item sold as part of a bundled package, before the selection is finalized.

(e) A determination by the course instructor or academic department offering the course, before a textbook or instructional material is selected, of the extent to which a new edition differs significantly and substantively from earlier versions and the value to the student of changing to a new edition or the extent to which

an open-access textbook or instructional material is available.

(f) A procedure(s) to make required and recommended textbooks and instructional materials for each course offering available to students who otherwise cannot afford the cost of the textbook including consideration of the extent to which an open-access textbook or instructional material may be used.

(g) A procedure(s) by which students can obtain required textbooks and instructional materials prior to receipt of their financial aid distribution, when necessary.

(h) A deadline for posting a hyperlink to lists of required and recommended textbooks and instructional materials for at least 95 percent of all courses and course sections offered for the upcoming term in the university's course registration system and on the university's website. The designated university official shall determine compliance with this requirement no later than forty-five (45) days prior to the first day of classes for each term. Any request for an exception to the compliance deadline shall be submitted in writing to the designated university official and shall provide a reasonable justification for an exception. A course or section added after the notification deadline is exempt from this notification requirement. The posted list shall include the following information for each required and recommended textbook and instructional materials:

1. the International Standard Book Number (ISBN); or
2. other identifying information which shall include, at a minimum:
   a. the title
   ~~a.~~ b. all authors listed,
   ~~b.~~ c. publisher,
   ~~c.~~ d. edition number,
   ~~d.~~ e. copyright date,
   ~~e.~~ f. published date, and
   ~~f.~~ g. other relevant information necessary to identify the specific textbook or instructional materials required and recommended for each course.

(i) Consultation with school districts to identify practices that impact the cost of dual enrollment textbooks and instructional materials to school districts, including, but not limited to, the length of time that textbooks and instructional materials remain in use.

~~(j) Examination, each semester, of the cost of required and recommended textbooks and instructional materials by course and course section for all general education courses identifying any variance in the cost among different sections of the same course; identification of the percentage of textbooks and instructional materials that remain in use for more than one term; submission of a list of courses that have a wide variance in costs among sections or that have frequent changes in textbook and instructional materials to the appropriate academic department chair for review.~~

(2) No employee of a state university may demand or receive any payment, loan, subscription, advance, deposit of money, service, or anything of value, present or promised, in exchange for requiring students to purchase a specific textbook or instructional materials for coursework or instruction. However, an employee may receive, subject to the requirements of the Florida Code of Ethics for Public Officers and Employees and the outside activity and conflict of interest requirements set forth in university regulations and collective bargaining agreements:
(a) Sample copies, instructor copies, or instructional materials. These materials may not be sold for any type of compensation if they are specifically marked as free samples not for resale.
(b) Royalties or other compensation from sales of textbooks or instructional materials that include the instructor's own writing or work.
(c) Honoraria for academic peer review of course materials.
(d) Fees associated with activities such as reviewing, critiquing, or preparing support materials for textbooks or instructional materials.
(e) Training in the use of course materials and learning technologies.

(3) Each university board of trustees shall provide a report, by September 30 of each year, to the Chancellor of the State University System, in a format determined by the Chancellor, that details:
(a) The selection process for ~~general education courses with a wide cost variance and~~ high enrollment courses;
(b) Specific initiatives of the institution designed to reduce the costs of textbooks and instructional materials;
(c) Policies implemented regarding the posting of textbook and instructional materials for at least 95% of all courses and course sections 45 days before the first day of class;
(d) The number of courses and course sections that were not able to meet the posting deadline for the previous academic year; and
(e) Any additional information determined by the Chancellor.

The Chancellor will report to the Board of Governors a summary of the State University System's initiatives and efforts addressing textbook and instructional materials affordability by November 1 of each year.

Excellence in Engineering Education: Enhancing Undergraduate Student Access, Retention, Graduation and Student Learning Outcomes to Meet Workforce Needs

Board of Governors' Update
SUS Council of Provosts

The SUS Engineering deans, department chairs, faculty, provosts and others have spent many hours gathering data and discussing and analyzing the many questions related to:

Why are varying numbers of student credit hours above 120 required in many SUS engineering degrees?

The question emerged from the discussions of the Board of Governors in November, 2018. In the intervening months, many people who are closely engaged with preparing engineers throughout the SUS have worked together to review all undergraduate programs, not only in terms of their required credits for each undergraduate degree, but also much more, including:

1) Required credits,
2) Time to degree,
3) Performance of diverse student groups,
4) Impact of mathematics preparation upon entering degree programs,
5) Earnings of first year SUS engineering graduates.

1. Required credits

All of the SUS institutions are committed to ensuring that engineering graduates meet the needs of the engineering workforce and are educated in the most effective and efficient manner possible, while maintaining the standards required for attainment of an accredited and reputable engineering degree. We work to successfully prepare students to enter the engineering workforce or additional graduate or professional education in a timely manner. "Chapter 471, Florida Statutes, and Rule 61G15-20.006, F.A.C., requires applicants [for examinations to become licensed as a professional engineer in the State of Florida) to have an EAC/ABET accredited Bachelor of Science degree in engineering". See Appendix I.

The SUS deans reviewed the top national undergraduate engineering programs as identified by US News & World Report (USNWR), which showed average credits to degree of 126 to 128, depending upon the discipline (**Table 1**), with some programs ranging as high as 133.

Table 1. Credits to Degree by Discipline for Top Public Engineering Programs Using the Semester System. All programs are ABET accredited except for the Biomedical Engineering program at University of California-Berkeley

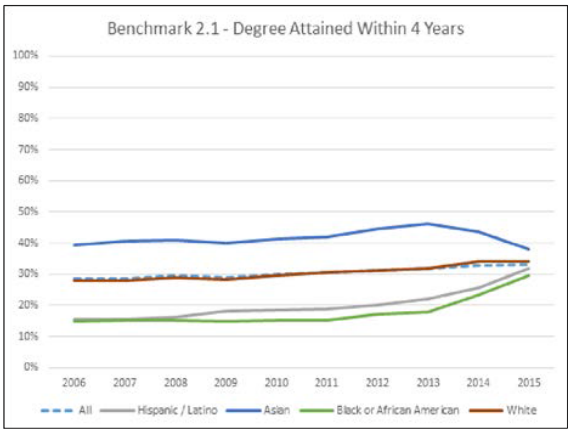
The deans then conducted reviews with their respective employer and alumni advisory boards with the goal of identifying any excess content and ensuring essential content is adequately covered. These reviews took into account the critical need for technical competence along with increasing employer demand for improved communications and team effectiveness skills. Such reviews are common in engineering as the engineering accrediting body, ABET, requires programs to gather constituent input as part of the process of reviewing and amending undergraduate engineering curricula. The engineering departments also consulted their respective industrial advisory boards and caucused with one another to discuss appropriate credits to degree.

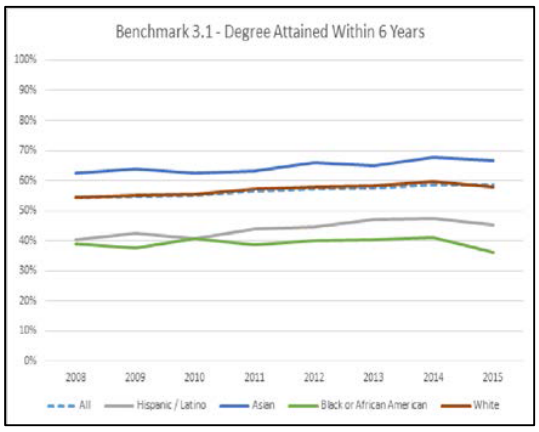
As a result of these reviews and related analyses, many SUS programs have made changes to their required credits to degree. As examples, UF has reduced both Chemical Engineering and Civil Engineering by 3 credits and UNF has proposed to

reduce their four programs to 120 credits. As a system, we are closer to parity of student credit hour requirements across specific degree programs in many of our engineering degrees. All provosts have agreed that it is our goal to finish that process, as possible, this academic year. However, not all Deans, Chairs, and Provosts agree that not all engineering degree programs can be effectively reduced to 120- student credit hours and still include the required general education coursework that students need to graduate, especially in areas that are not STEM.

Similarly, our analyses show that not all engineering programs can be properly offered at a 120-student credit hour requirement, because of the broader, deeper and more interdisciplinary range of specialized study required for such fields (biomedical engineering is a good example). Most engineering programs in the SUS have determined that it is necessary to remain at more than 120 student credit hours to degree to satisfy constituent needs. Benchmarking with peer institutions across the country suggests that all SUS institutions are in line with national norms.



It also is important to note that ABET (Accreditation Board for Engineering and Technology, Inc.) requires all changes such as these to be reviewed and assessed through extensive constituent feedback. Though there are certainly areas of overlap within common disciplines, each program is required by ABET to tailor their majors to meet constituent demands as determined by feedback from each program's employers and alumni. Therefore, it may be expected that there will be some variation in programs given that each program may target a different employer market. The ABET accreditation process allows for such variation and often results in variation in credits to degree in the same discipline.



At this point, most SUS Engineering Deans and Chairs feel strongly that further reductions in credits to some degrees is not warranted, especially in light of the feedback from employers and alumni that further reduction in credits to degree will cause significant damage to successful student placement and program reputation. Failure to adequately address constituent feedback creates a potential for probation or even loss of accreditation. Thus, further reductions in credits to degree for many programs are not advised by university Deans and Chairs.

2. Time to Degree

Our SUS engineering programs are unanimous in support of the goal of timely graduation rates for all our students. Times to degree in engineering programs at public institutions are typically longer than for most other majors. The national graduation rates for engineering over a period of time are shown in Figure 1 below.

Figure 1. National graduation rates for engineering students. These data are determined by comparing the number of students who graduate in a certain time window with the number of students who began their freshman year as engineering students. Thus, students who leave engineering but graduate in another major reduce the reported graduation rate for engineering. Exclusion of students from the freshman pool who leave engineering to graduate in a different major would produce a higher graduation rate for any given time period. *ASEE Engineering by the Numbers 2017.*

The time to degree for SUS programs are in **Table 3.**

Table 3. Time to graduation data for SUS institutions. Rates shown in the table are for students who actually graduate with a degree in engineering. Students who dropped out of engineering are not reflected in the data.

Freshman Cohort Year	2012		2013	
	Graduated within 4 years	Graduated within 5 years	Graduated within 4 years	Graduated within 5 years
UF	26.60%	85.50%	29.70%	91.70%
FAU	26.00%	66.00%	29.19%	57.66%
FGCU	27.00%	71.00%	15.00%	47.00%
FIU	17.90%	54.50%	25.60%	56.30%
FPU	n/a	n/a	n/a	n/a
FAMU-FSU	32.90%	88.60%	43.00%	96.10%
UCF	31.60%	90.90%	32.30%	79.00%
UNF	21.1%	84.20%	20.00%	76.00%
USF	38.67%	85.00%	40.96%	95.22%
UWF	7.00%	29.00%	13.00%	30.00%

For every institution reporting, 4-year completion rates are low compared to other degree completion rates. Deans, Department Chairs, and Provosts are continuing to analyze what can be done to improve these graduation rates while still preparing students to appropriate professional levels. More specifics follow later in this report.

Time to degree rates for a select group of peer schools are in **Table 4**.

Table 4. Peer group graduation rates. Data are for students who entered an engineering program in their first year and graduated with a degree in engineering. The rate does not include students who start in engineering but then graduate with a degree in another major. Inclusion of students who graduate in other majors would increase the graduation rates shown in the table. Peer group consists of University of California-Berkeley, University of Illinois at Urbana-Champaign, University of Washington, the Ohio State University, University of Michigan, Georgia Tech, Texas A&M, Purdue. *ASEE 2017*

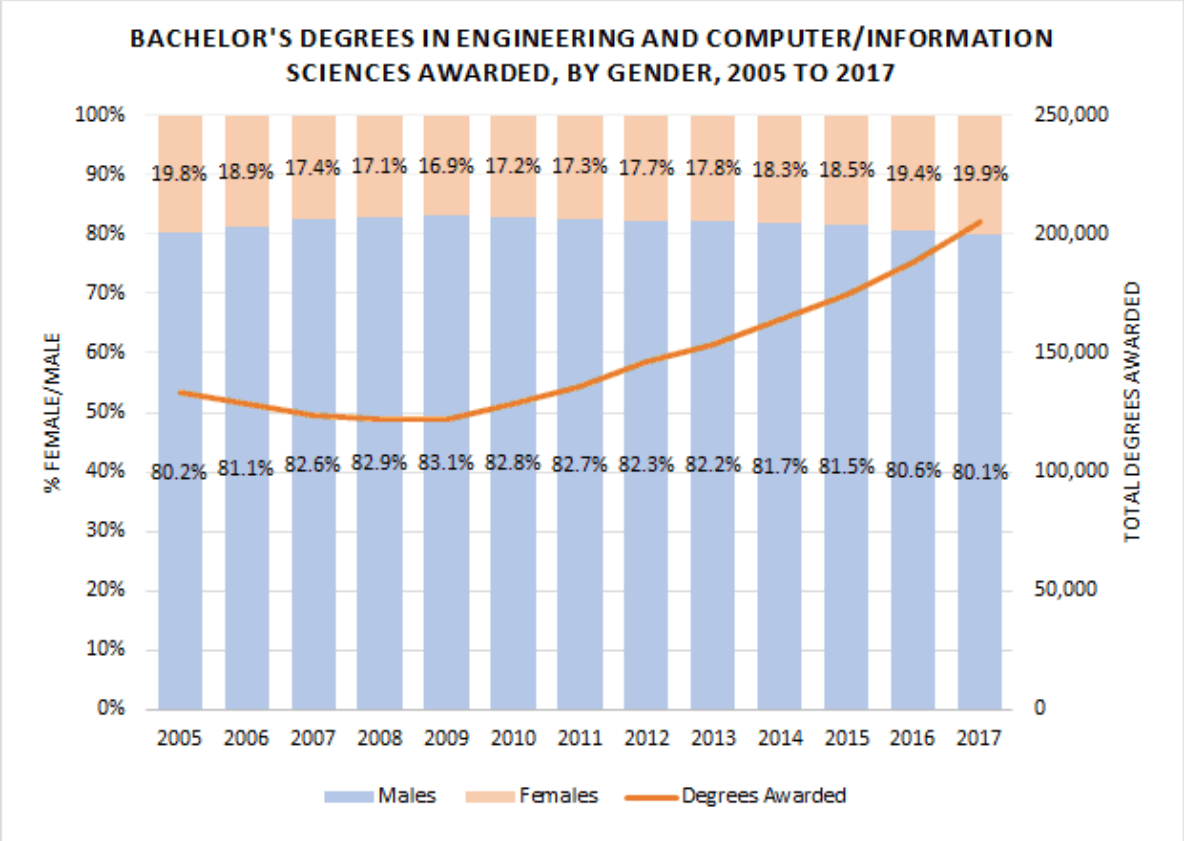
Degree attained within 4 years	11.20%	12.90%	14.90%	14.60%	23.00%
Degree attained within 5 years	40.00%	41.70%	42.40%	35.80%	No data available
Degree attained within 6 years	50.20%	48.40%	48.90%	No data available	No data available



As can be seen from these data, national 4-year graduation rates for engineering are quite low at roughly 40%, but increase significantly to over 65% by the 6th year. The disparity between 4- and 6-year rates is even more pronounced among top public programs with a majority of graduates requiring at least 5 years.

3. Performance of diverse students

Women students earned over 200,000 degrees in U.S. engineering and computer sciences programs in 2016-17. However, that figure still only represents about 20% of all bachelor's degree graduates in these fields. See Table 5 below. Although data indicate that SUS women students in engineering succeed at or near the same level as men students, they may be affected by the relative lack of female faculty as role models. Nationally, women are only 16.9% of tenured or

tenure-track faculty among engineering programs (American Society for Engineering Education, 2015).

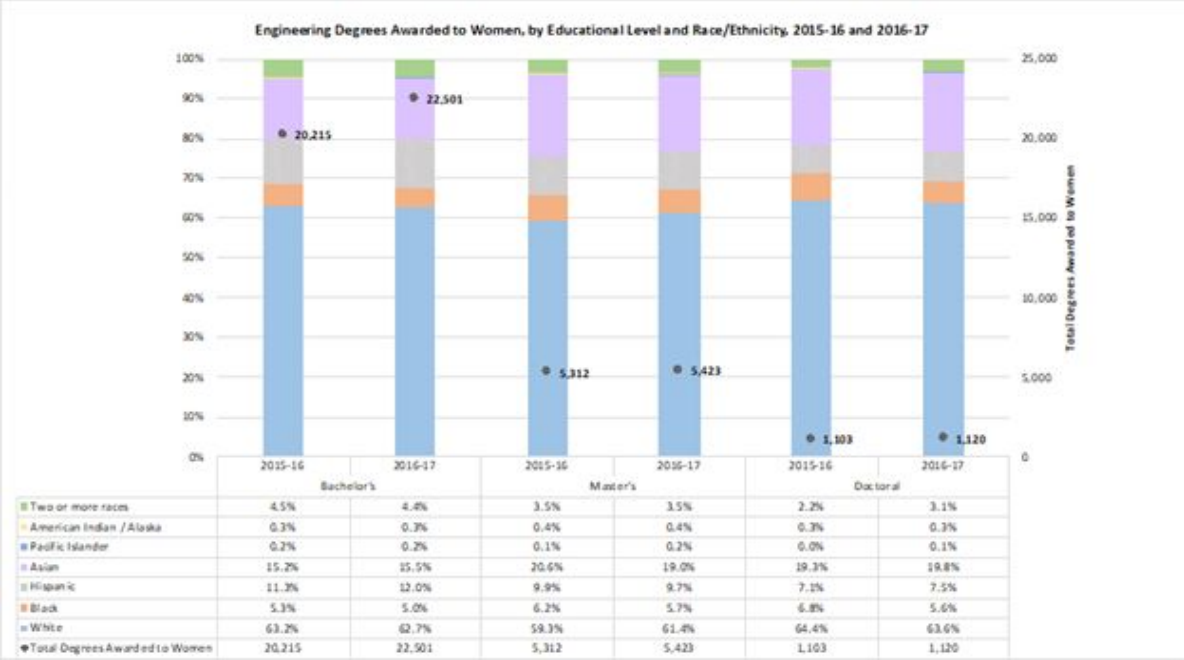


Table 5.

Source: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, *Digest of Education Statistics 2018,* Tables 325.35 and 325.45.

Further, engineering degrees earned by U.S. women of color represented only 17% of the total engineering degrees awarded to *all women*.

Table 6.

	Bachelor's		Master's		Doctoral	
	2015-16	2016-17	2015-16	2016-17	2015-16	2016-17

Total Degrees Awarded to Women	20,215	22,501	5,312	5,423	1,103	1,120

Source: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, Digest of Education Statistics 2017. Tables 322.50, 323.50, and 324.35.

Over the past ten years, Black and Hispanic women comprised fewer than 3.5% of the Bachelor's degree holders in engineering and about 4% of the bachelor's degree holders in computer science. Black women have represented about 1% of the engineering Bachelor's degree holders in the last several years. See Table 7 below.

Table 7.

Source:
National Science Foundation, National Center for Science and Engineering Statistics. 2019. Women, Minorities, and Persons with Disabilities in Science and Engineering: 2019. Special Report NSF 19-304. Alexandria, VA.

Disparity in 4- and 6-year graduation rates is pronounced among all underrepresented students, regardless of gender. Black students, in particular, drop out of engineering at higher rates than all other students and take longer to graduate. For example, UF produces a slightly lower overall rate for all students relative to the peer group, but a roughly equal 5-year rate for Hispanic students and 6-year rate for Black students.

Rates for Black students (from several SUS institutions), shown in Table 8 below, generally tend to be lower than that for all students. Five-year completion rates for all students including Black students are significantly higher.

Table 8. Time to graduation for Black engineering students in SUS institutions. Rates shown in the table are for students who actually graduate with a degree in engineering. Students who dropped out of engineering are not reflected in the data.

	2012		2013	
	Graduated within 4 years	Graduated within 5 years	Graduated within 4 years	Graduated within 5 years
UF	6.70%	60.00%	30.80%	88.50%
FAU	11.76%	35.29%	20.00%	40.00%
FGCU	n/a	n/a	n/a	n/a

FPU	n/a	n/a	n/a	n/a
FAMU-FSU	28.00%	92.00%	37.50%	75.00%
UCF	18.50%	77.80%	27.80%	83.30%
UNF	n/a	n/a	n/a	n/a
USF	33.33%	87.50%	38.24%	91.18%
UWF	0.00%	0.00%	0.00%	0.00%

The graduation rate deficit for underrepresented students has been shown to derive from a variety of causes, including those discussed briefly in later sections.

Table 9 indicates graduation rates for the University of Florida and the University of South Florida, for examples among the SUS.

Table 9. UF and USF graduation rates. Data is for students who entered an engineering program in their first year and graduated with a degree in engineering. The rate does not include students who start in engineering but then graduate with a degree in another major. Inclusion of students who graduate in other majors would increase the graduation rates shown in the table.

Freshman Year at UF	2007	2008	2009	2010	2011

Engineering degree attained within 5 years	29.0%	15.8%	30.3%	26.7%	41.2%

Again, deans, department chairs, and provosts are continuing to analyze what can be done to improve these graduation rates while still preparing students to appropriate professional levels. More specifics follow in this report.

4. Impact of mathematics preparation upon entering degree programs

Many students, especially those from underrepresented groups and those from lower socioeconomic backgrounds, have poorer high school preparation, particularly in mathematics. A lack of adequate mathematical preparation then requires such students to begin their university math sequence with Pre-Calculus (or even lower level math courses) rather than Calculus 1.

Engineering curricula are different from many majors in that they are predominantly hierarchical. Almost every course builds on another and can only be taken in a particular sequence so that technical skills can build upon one another.

As an example, consider the study of Statics. This is the study of methods for quantifying the forces between bodies and is an essential prerequisite for many engineering fields, such as mechanical, civil, aeronautical, and bioengineering, which address the various consequences of forces. One cannot study statics without first mastering Physics 1 with Calculus, and one cannot study Physics 1 with Calculus without first mastering Calculus 1.

Thus, students who start their math sequence with Pre-Calculus are delayed on their path to graduation by at least one semester. Many students from inner city or rural high schools may be less well prepared in mathematics and thus take a longer time to degree.

Table 10 shows this effect in SUS institutions.

Table 10. Time to graduation for engineering students in SUS institution whose first math class is Pre-Calculus. Rates shown in the table are for students who actually graduate with a degree in engineering. Students who dropped out of engineering are not reflected in the data.

Freshman Cohort Year	2012		2013	
	Graduated within 4 years	Graduated within 5 years	Graduated within 4 years	Graduated within 5 years
UF	3.20%	69.80%	4.40%	83.80%
FAU	10.71%	53.57%	16.67%	55.56%
FGCU	n/a	n/a	n/a	n/a
FIU	9.70%	65.50%	17.40%	52.20%
FPU	n/a	n/a	n/a	n/a
FAMU-FSU	14.10%	84.80%	22.10%	92.60%
UCF	n/a	n/a	n/a	n/a
UNF	n/a	n/a	n/a	n/a
USF	20.21%	84.04%	25.00%	88.75%
UWF	2.50%	20.00%	0.00%	5.30%

Imposing a 4-year time to graduation metric would penalize schools with high populations of students from diverse, lower income backgrounds, even if they are successful in graduating them with a degree in engineering. This seems counter to the goal of helping such students elevate their financial and social mobility prospects, which obtaining an engineering degree clearly could impact. See salaries in Table 11 below.

5. Earnings of SUS engineering, 2016-17

Table 11 above shows by institution and degree, data for the 2016-17 graduates of SUS engineering programs:

- the average, quarterly income of graduates who are employed full-time;
- the number of employed students in each group; and
- the employed students' percentage of their entire graduating 2016-17 class by institution *and* degree.

Not all data are available. The source of **Table 11** is the Florida Department of Education, Florida Education & Training Placement Information Program.

We do not have data differentiated by *time to degree* that indicate any significant differences in salary among first year graduates of SUS engineering programs at this time. However, we certainly recognize that the longer one is in school, the higher one's costs are likely to be. Thus, our overall SUS push for timely graduation, which we all support.

Given the relatively high first-year salaries of engineering graduates throughout the SUS (early career--not first-year--salaries systemwide for **all** degrees are about $48,000 annually), our Deans, Chairs, and Provosts are committed to offering the best possible curricula, as approved by ABET and SACSCOC, that lead to the post-graduation success of our students and the heightened national reputations of our programs.

6. Access to internships and co-ops for student preparation in industry and impact upon time to degree

Because of the very structured and relatively complex nature of engineering curricula, many students need to attend summer school sessions to graduate in as timely a manner as possible. One problem that the Deans note is that when students focus on graduating as quickly as possible, they may be precluding any opportunity for internship or co-op experiences. Such internships, most of which are paid and are for zero-credit, may add considerable strengths to the job application of those students, whether at the company with which they interned or another. Grumman, a company which hires a large number of SUS engineering graduates, reports that their employees who did more than one internship during their university experience tend to stay with the company for five years or more, longer than other hires. This allows great opportunities for promotions and movement into leadership roles for the employees.

So, while zero credit internships don't add to the overall student credit hour requirement, they may well add to the time to degree. Nonetheless, the Deans, Chairs, Advisory Boards, and frequent employers of our graduates indicate that they are critically important. Finding a balance among the many technical and professional courses that engineering students must complete, along with other university requirements, and along with one or more internship or co-op experiences is an important issue that the SUS Deans, Chairs, and Provosts are exploring.

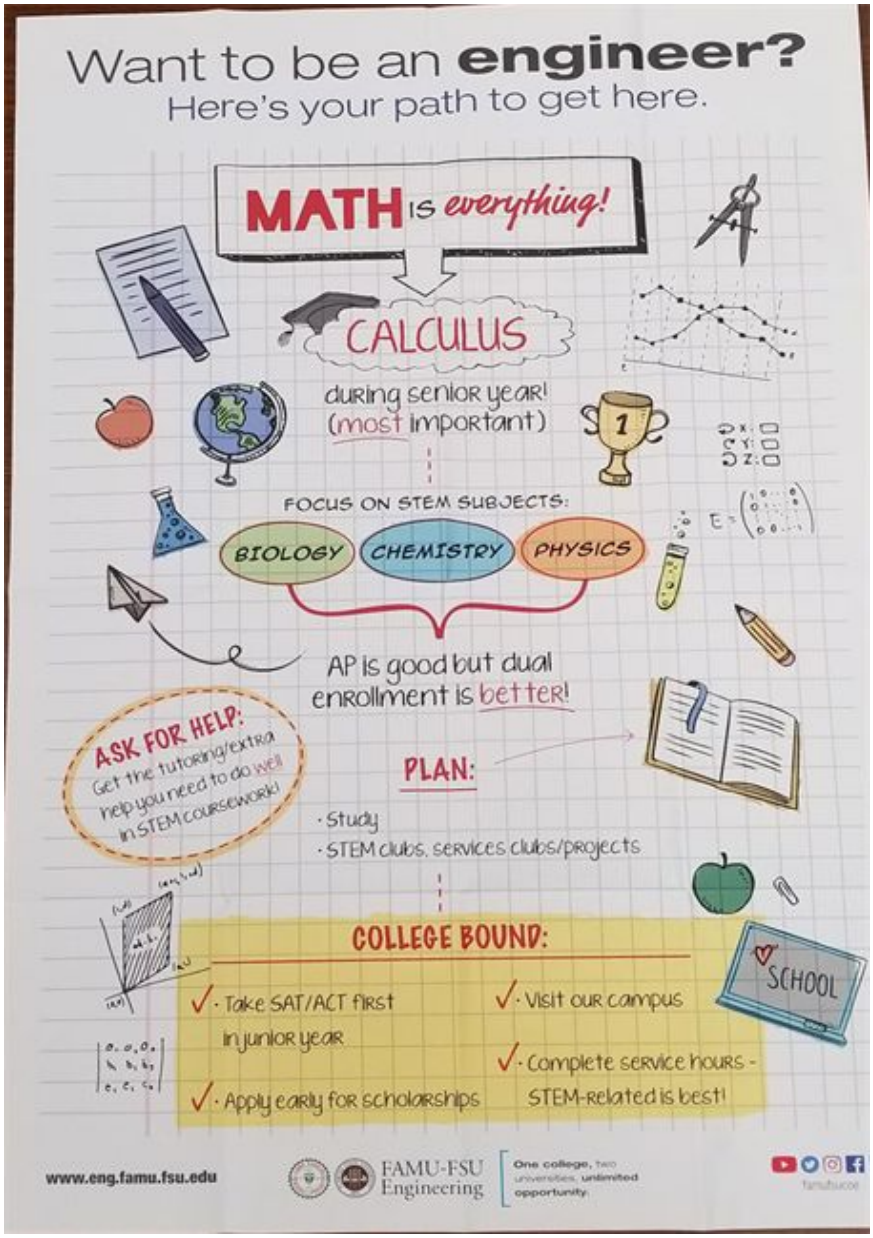
Impacts to Date and Next Steps

As noted above, all SUS Deans and Department Chairs of engineering, as well as Provosts, Advisory Boards, employers and national colleagues have worked to determine where we are and what we need to do moving forward to help build even greater student success in engineering.

In addition to the work to bring similar degrees to the same student credit hour requirement, many other efforts are ongoing:

1. The Provosts have established a Provost Engineering Committee (PEC), which now helps to oversee ongoing SUS program actions, as we work to provide our students a robust experiential learning environment for their overall university education as well as preparation for successful engineering careers.

   PEC will prepare an annual report for the Board of Governors, to be presented at the August meetings, and will provide additional updates as requested throughout the year.



2. PEC will continue to work with the Florida K-12 mathematics teachers, providing workshops, posters (like the one sent last year from FSU to all high school math teachers illustrating the centrality of calculus to beginning to study engineering, see below), and materials; the Florida Department of Education mathematics initiatives; and the Florida State College System. Pre-calculus and calculus are the keys to successful and timely entrance into engineering, and we have to both make that case and help our educational partners succeed in helping students successfully study math at these levels in high school.

3. PEC also will work on expanding and better unifying summer bridge programs for students who graduate high school and begin university engineering curricula the next fall. It is possible that such programs could be on-line or hybrid, which would make them more available to underrepresented students who may need them most.

4. Department Chairs are working with their faculty and staff colleagues to review every engineering program and produce academic maps that provide guidance for timely completion of graduation and disciplinary preparation requirements at their universities. These maps will be available on university/departmental websites.

   Maps will then be compared across programs in the SUS for improved internal consistency, and utilized by advisors at each university to help students meet graduation requirements in a timely manner. They also will help students and families recognize the likely need for summer enrollments, the importance of group and capstone projects, and particularly the need to try to integrate internships into their academic maps.

Not all of our engineering students are prepared equally to retain, graduate, and succeed professionally, but all our students deserve our best efforts and every opportunity to succeed. We are committed to that objective and pledge to work to better our efforts in successfully educating every student accepted into our engineering programs and universities.

Poster sent to all Florida high school math teachers and county school boards.

Appendix I

61G15-20.006 Educational Requirements.

(1) The evaluation of curricula and standards of accreditation for approval of degree programs required by Section 471.013, F.S., shall be based upon:

(a) An overview of engineering programs within the United States accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc., (ABET), and

(b) An evaluation of such programs and schools, following the definition of the practice of engineering set forth in Section 471.005(6), F.S.

(2) This rule shall not apply to Board approved engineering programs or where ABET accreditation is available to a school or college of engineering.

(3) Acceptable curricula requirements and degree programs shall conform to the criteria for accrediting engineering programs set forth by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc., (ABET) and found in the applicable Annual Report of ABET.

(4) The evaluation of the applicant's transcript and degree program shall include a determination of whether such a transcript and degree program is comparable to the above-mentioned model by the Education Advisory Committee as defined in Rule 61G15-18.015, F.A.C.

(5) In order to verify the applicant's curriculum and engineering program the Board may require evidence from the applicant's institution(s) at the cost of the applicant as to the areas mentioned in subsection 61G15-20.006(3), F.A.C., including when the information necessary for the evaluation set forth in subsection (4) above is not available, a site visit by Educational Advisory Committee of the Board at the expense of the applicant.

Specific Authority 471.013(1)(a)3. FS. Law Implemented 471.013(1)(a)3., 471.005(6) FS. History–New 8-18-87, Formerly 21H-20.006, Amended 12-26-94.

Powering the New Engineer to Transform the Future

BOG August 2019

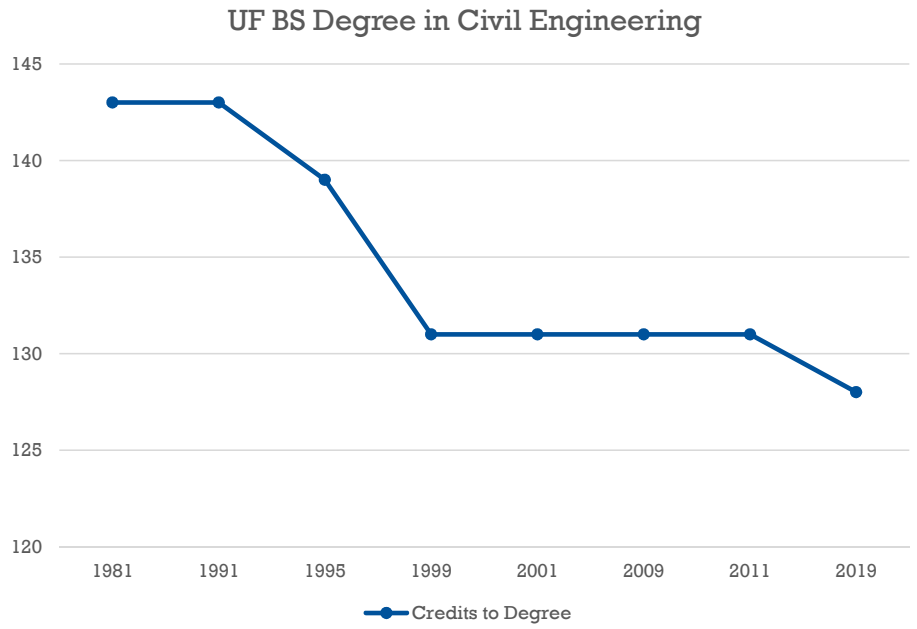
Response to BOG Inquiry Re Credits to Degree

- SUS Deans of Engineering caucused and agreed to work together to assess state of engineering undergraduate programs in Florida
- UF department chairs convened conversations between SUS chairs in their respective disciplines
- Objective was to answer the following questions:
  - What is the focus of engineering education in Florida?
  - Are our degree requirements and times to degree consistent with our top peers?
  - Are we meeting the specifications of our accrediting body (ABET)?
    - Are we meeting the needs of our employers?
  - What is the average graduation rate for engineering students ins the SUS?
- All programs agreed that providing an excellent education with a high ROI as efficiently as possible was the primary goal of their undergraduate programs

Avg. Credits to BS Engineering Degrees At Top Institutions

University of California-Berkeley, University of Illinois at Urbana-Champaign, University of Washington, the Ohio State University, University of Michigan, Georgia Tech, Texas A&M, Purdue. ASEE 2017

- Aerospace Eng: 128
- Biomedical Eng.: 128
- Chemical Eng: 129
- Civil Eng: 128
- Computer Eng: 126
- Electrical Eng: 128
- Environmental Eng: 127
- Industrial Eng: 126
- Materials Eng: 128
- Mechanical Eng: 128
- Nuclear Eng: 126
- Within the SUS, credits to degree currently range from 120 to 131



ABET Accreditation

- Required by most states in order for graduates to become licensed professional engineers
- Required by many graduate schools in order to be granted an advanced degree
- 6 year cycle
  - Must assess student learning
    - Assessed every semester
  - Must consult with constituents (includes employers and alumni)
    - At lease once per year
  - Must pursue, and document, continuous improvement
- Changes to the curricula made outside of this process can lead to loss of accreditation

SUS Discipline Reviews

- All programs in the SUS have solicited input from their employers and alumni regarding their curricula and reacted accordingly
- Different programs serve different markets and thus have different requirements
- UF example - Spring 2019
  - Every department consulted with their Employer and Alumni Advisory Board regarding student learning and success and discussed whether or not changes were needed in the curricula and credits to degree
  - Two departments concluded that some reduction in credit hours was warranted (Chemical Engineering and Civil Engineering)
  - All boards expressed extreme disapproval of further reductions in credit hours to degree
    - Significant concern over erosion in credits to degree over time

Example of Decrease in Credits to Degree Over Time

Additional Program Elements

- Co-curricular activities are critical to retention and post-graduation placement
  - Internships
  - Student design competitions
- Employers see these as differentiators
- Such activities enhance placement, career advancement and salary, but can delay time to graduation

Time to Graduation in SUS Engineering Programs

Freshman Cohort Year	2012		2013	
	Graduated within 4 years	Graduated within 5 years	Graduated within 4 years	Graduated within 5 years
UF	26.60%	85.50%	29.70%	91.70%
FAU	26.00%	66.00%	29.19%	57.66%
FGCU	27.00%	71.00%	15.00%	47.00%
FIU	17.90%	54.50%	25.60%	56.30%
FPU	n/a	n/a	n/a	n/a
FAMU-FSU	32.90%	88.60%	43.00%	96.10%
UCF	31.60%	90.90%	32.30%	79.00%
UNF	21.10%	84.20%	20.00%	76.00%
USF	38.67%	85.00%	40.96%	95.22%
UWF	7.00%	29.00%	13.00%	30.00%

Summary

- All SUS degree programs are within national norms for credits to degree for their respective degrees
- All programs have consulted with their constituents as required by ABET to ensure their curricula are in accord with employer needs
  - SUS programs serve different sectors of the technology workforce and must be responsive to their various employers
  - Credits to degree have been declining over time raising some concerns with constituents
- Engineering students in SUS institutions typically take 5 years to graduate
  - Powerful co-curricular activities enhance job prospects but delay time to graduation
  - Rigor of the curricula encourages students to take fewer credits per semester

FLORIDA STUDENT ASSOCIATION

FSA Meeting Recaps

JULY 21ST - CENTRAL FLORIDA

Kristin Whitaker spoke to us about the legislative climate. Guest speakers included UCF President, UCF VP for Student Development & Enrollment, and Florida State Rep. Anna Eskimani (D-47 Winter Park).

AUGUST 10TH - SOUTH FLORIDA

The USF Provost & Executive VP, Dr. Ralph Wilcox, gave opening remarks. Rep. Amber Mariano (R-36 New Port Richey) gave us advice on fulfilling our legislative agenda. The Florida College Access Network gave us incredible statistics and data on our agenda.

Upcoming Meeting

SEPTEMBER 21 - NORTH FLORIDA

We would like to invite any members or staff from the Board of Governors. If you would like to attend, please let us know! We would love to have you.

FSA 2019-2020 PRIORITIES

Textbook Affordability

We are very excited to work with the Board of Governors to explore potential avenues for making textbooks more affordable for students.

Food & Housing Insecurity

In the last 30 days, 45% of students were food insecure, and 56% were housing insecure in the last year. As Florida attempts to become #1 in academics, athletics, and more, we should also strive to be #1 in providing for basic needs.

S.A.N.E. Nurses On Campus

When sexual assault occurs, medical care is a vital resource available to victims. But for many, the nearest S.A.N.E. (Sexual Assault Nurse Examiners) qualified professionals could be hours away. We want to bring Sexual Assault Nurse Examiners to our campus health facilities.

Mental Health

Past leaders of the Florida Student Association have fought hard to secure good mental health resources for our students. Now that we have them, awareness and access are key. We are exploring awareness programs.

Rally in Tally

DATE

November 13, 2019 - *Invitations coming soon*

DIVERSE STUDENT REPRESENTATION

Student Body Presidents delegate students from their university to bring new energy, stories, and diversity to inform our legislators of the critical issues students face.

ONE-ON-ONE MEETINGS

Individual groups of delegates will meet with all available legislators from both the State House of Representatives and State Senate.

Every year, we send
100+
STUDENT DELEGATES
to Tallahassee

Our Team

FSA Executive Board

JOHN ALOSZKA

Internal Vice Chair

ZENANI JOHNSON

Chair

ROCHARD MORICETTE

External Vice Chair

We hope all interested members of the FSUS join us to make a difference for our students.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Budget and Finance Committee
August 29, 2019

SUBJECT: Minutes of Committee Meeting held June 12, 2019

PROPOSED COMMITTEE ACTION

Approve the minutes from the meeting held on June 12, 2019.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Committee members will review and approve the minutes of the meeting held on June 12, 2019, at the University of South Florida.

Supporting Documentation Included: Minutes: June 12, 2019

Facilitators/Presenters: Governor Syd Kitson

MINUTES

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
BUDGET AND FINANCE COMMITTEE
UNIVERSITY OF SOUTH FLORIDA
TAMPA, FLORIDA
JUNE 12, 2019

Video or audio archives of the meetings of the Board of Governors and its Committees are accessible at http://www.flbog.edu/.

Mr. Syd Kitson, Chair, convened the meeting of the Budget and Finance Committee at 3:28 p.m. Members present for roll call were Tim Cerio, Wayne Huizenga, Zenani Johnson, Brian Lamb, Ned Lautenbach, and Steven Scott. Other Board members present included Richard Corcoran, Shawn Felton, Alan Levine, Ed Morton, Eric Silagy, Kent Stermon, and Norman Tripp.

1. Call to Order

Mr. Kitson called the meeting to order. He welcomed Governors Johnson, Lamb, and Scott to the Committee.

2. Minutes of Committee Meeting

Mr. Lautenbach moved that the Committee approve minutes from the March 28, 2019, meeting. Mr. Lamb seconded the motion, and members of the Committee concurred.

3. Performance-Based Funding Allocation

Mr. Kitson introduced the first item on the agenda, approval of the 2019-2020 allocation for performance-based funding. Mr. Jones presented a PowerPoint reviewing the history of the model, the improvements made on various metrics, changes to the model approved by the Board in November, and the final points and allocation.

After discussion, Mr. Huizenga moved that the Committee approve the performance-based funding allocation as presented. Mr. Lamb seconded the motion, and members of the Committee concurred.

4. Board of Governors Regulation 9.006 – Remuneration of University Presidents and Administrative Employees

Mr. Tim Jones presented the history of the development of the regulation, the Board's constitutional and statutory authority over university personnel programs, and the state auditor's finding that the Board didn't have the authority to define faculty.

Mr. Jones noted that the state auditor was currently doing an operational audit for the Board and this has the potential to be a repeat finding. He requested direction from the Board on whether the regulation should be repealed or do we keep the regulation as is.

After discussion, Mr. Kitson and Mr. Lautenbach both stated that the Board has constitutional, statutory, and regulatory authority over personnel and we should keep the regulation.

5. Regulation 9.012 Disclosure of Gifts from Foreign Governments and Persons

Mr. Jones presented the history of this regulation. He noted that few gifts are received from foreign governments or persons. By repealing this regulation, each university would maintain this information and it could be made available upon request.

After discussion, Mr. Lautenbach moved that the Committee approve the notice to repeal the regulation. Mr. Cerio seconded the motion, and members of the Committee concurred.

6. Budget Update

Mr. Kitson requested Mr. Jones present an update on the legislative changes.

Mr. Jones reviewed the final budget adopted by the Legislature. Mr. Kitson stated that the final budget was very good considering how we started at the beginning of session. He expressed appreciation for the final budget crafted by our legislative leaders.

Mr. Kitson noted that one of the processes the Board has been supportive of is encouraging universities to work through the process with us on requesting funds from the Legislature. We worked very hard during session on supporting initiatives in our LBR, like performance-based funding and specific university requests. He indicated that, on multiple occasions last year, if a university develops a comprehensive university legislative budget request and brings that to the Board, then we will review and potentially support it. We did that with New College and Florida Gulf Coast University, we did that last year with the University of North Florida and Florida Atlantic University.

He indicated surprise that no one knew about the $15 million Florida International request. He reiterated that NCF, FGCU, FAU, UNF, and FIU should be prepared to discuss their implementation plans for the resources at a future meeting.

Mr. Jones reviewed the changes in Senate Bill 190 regarding the use of carryforward funds and the increase of reserves from five percent to seven percent.

7. Concluding Remarks and Adjournment

Mr. Kitson updated the Committee that Crowe LLP has been engaging our universities, gathering information, and has scheduled on-site visits with each campus. Crowe will provide an update to the Committee at the August 2019 meeting.

Having no further business, the meeting was adjourned at 4:23 p.m.

Tim Jones, Vice Chancellor
Finance and Administration

Syd Kitson, Chair

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Budget and Finance Committee
August 29, 2019

SUBJECT: Performance-Based Funding Study

PROPOSED COMMITTEE ACTION

Approve the Performance-Based Funding Study due to the Legislature by October 1, 2019.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Chapter No. 2018-4, Laws of Florida

BACKGROUND INFORMATION

The 2018 Legislature approved a law requiring the Board of Governors to submit recommendations to achieve a complete performance-based continuous improvement model.

> By October 1, 2019, the Board of Governors, in consultation with the state universities, shall submit to the Legislature recommendations for future consideration on the most efficient process to achieve a complete performance-based continuous improvement model focused on outcomes that provide for the equitable distribution of performance funds. In addition to recommendations submitted by the Board of Governors, the Legislature shall review recommendations from an independent entity that consults with the Board of Governors for the purpose of receiving input on behalf of the state university system. Implementation of any recommendations shall not occur unless affirmatively enacted by the Legislature.

The State University System (SUS) is currently in year six of the Performance-Based Funding Model. The current model includes ten (10) metrics that evaluate institutions on a range of issues that were chosen after the review of over 40 metrics identified in University Work Plans. To ensure each university is striving to excel and improve on key metrics, there is a financial incentive in the model. That financial incentive is not only new state funding (State Investment Funding), but an amount of the base state funding (Institutional Investment Funding) reallocated.

Year Six of the Performance-Based Funding Model shows significant improvements in metric scores as well as overall scores of the institutions. The average score is 84 points, which is an increase of 14 points in the last four years. Nearly every institution is showing strong improvements in four-year graduation rates; the SUS average is now 52.6%, exceeding the strategic plan goal of 50%. Many of the SUS strategic plan goals have been met or are within a few percentage points of being met. The universities have also made continuous improvements in metrics resulting in reductions in the costs to the university students. The Performance-Based Funding Model has proven to be an effective way to significantly improve goals identified in the Board's State University System 2025 Strategic Plan.

With the implementation of a new allocation methodology in 2019, the Performance-Based Funding Model emphasizes continuous improvement focused on metric outcomes and provides an equitable distribution of the funding. With 25% of the State University System's base budget at risk in the model, the universities have a great incentive to invest in improving their Performance-Based Funding outcomes.

Executive Summary

The 2018 Legislature approved a law requiring the Board of Governors (the Board) to submit recommendations to achieve a complete performance-based continuous improvement model.

> *By October 1, 2019, the Board of Governors, in consultation with the state universities, shall submit to the Legislature recommendations for future consideration on the most efficient process to achieve a complete performance-based continuous improvement model focused on outcomes that provides for the equitable distribution of performance funds. In addition to recommendations submitted by the Board of Governors, the Legislature shall review recommendations from an independent entity that consults with the Board of Governors for the purpose of receiving input on behalf of the state university system. Implementation of any recommendations shall not occur unless affirmatively enacted by the Legislature.*
>
> *Chapter No. 2018-4, L.O.F.*

The State University System (SUS) is currently in Year 6 of the Performance-Based Funding Model. The current model includes 10 metrics that evaluate institutions on a range of issues that were chosen after the review of over 40 metrics identified in University Work Plans. To ensure each university is striving to excel and improve on key metrics, there is a financial incentive in the model. That financial incentive is not only new state funding (State Investment Funding), but an amount of the base state funding (Institutional Investment Funding) reallocated.

Year 6 of the Performance-Based Funding Model shows significant improvements in metric scores as well as overall scores of the institutions. The average score is 84 points, which is an increase of 14 points in the last 4 years. Nearly every institution is showing strong improvements in four-year graduation rates; the SUS average is now 52.6%, exceeding the strategic plan goal of 50%. Many of the SUS strategic plan goals have been met or are within a few percentage points of being met. The universities have also made continuous improvements in metrics resulting in reductions in the costs to the university students. The Performance-Based Funding Model has proven to be an effective way to significantly improve goals identified in the Board's State University System 2025 Strategic Plan.

With the implementation of a new allocation methodology in 2019, the Performance-Based Funding Model emphasizes continuous improvement focused on metric outcomes and provides an equitable distribution of the funding. With 25% of the State University System's base budget at risk in the model, the universities have a great incentive to invest in improving their Performance-Based Funding outcomes.

Background

In January 2014, the Board of Governors adopted the Performance-Based Funding Model. Proviso language in the General Appropriations Act directed the Board of Governors to allocate performance funds based on certain metrics. In 2015, Section 1001.92, F.S.[1] related to State University System Performance-Based Incentives was created in the implementing bill and created again in 2016 in House Bill 7029 (Ch. 2016-237, L.O.F.). In September 2016, the Board created Regulation 5.001 Performance-Based Funding[2]. Since the implementation of the model, funding has significantly increased.

Fiscal Year	State Investment	Institutional Investment	Total
2014-15	$100,000,000	$100,000,000	$200,000,000
2015-16	$150,000,000	$250,000,000	$400,000,000
2016-17	$225,000,000	$275,000,000	$500,000,000
2017-18	$245,000,000	$275,000,000	$520,000,000
2018-19	$265,000,000	$295,000,000	$560,000,000
2019-20	$265,000,000	$295,000,000	$560,000,000

Table 1

The Performance Funding Model includes 10 metrics that evaluate the institutions on a range of issues. Two of the 10 metrics are Choice metrics; one picked by the Board and one by the university boards of trustees. These metrics were chosen after reviewing over 40 metrics identified in the University Work Plans. Florida Polytechnic University will not be included in the model until such time as data is readily available[3].

The model has four guiding principles: 1) use metrics that align with SUS Strategic Plan goals, 2) reward Excellence or Improvement, 3) have a few clear, simple metrics, and 4) acknowledge the unique mission of the different institutions.

Key components of the model:

- Institutions will be evaluated on either Excellence or Improvement for each metric.
- Data is based on one-year data.
- The benchmarks for Excellence were based on the Board of Governors 2025 System Strategic Plan goals and analysis of relevant data trends, whereas the benchmarks for Improvement were determined after reviewing data trends for each metric.

[1] Appendix A, Section 1001.92, Florida Statutes
[2] Appendix B, 5.001 PBF Regulation 2016
[3] Starting with the 2021-22 appropriation, Florida Polytechnic University will be included in the plan.

- The Florida Legislature and Governor determine the amount of new state funding and an amount of institutional funding that would come from each university's recurring state base appropriation.

Metrics Common to all Institutions

Eight metrics apply to all eleven institutions. The eighth metric, graduate degrees awarded in areas of strategic emphasis (8a), applies to all institutions except New College. The alternative metric for New College (8b) is freshman in the top 10% of graduating high school class. New College is not included in metric 8a because they do not have enough students to provide substantial data information; the institution has one small graduate program while all other institutions have several graduate programs.

Performance-Based Funding Metrics	
1. Percent of Bachelor's Graduates Employed (Earning $25,000+) or Continuing their Education	6. Bachelor's Degrees Awarded in Areas of Strategic Emphasis
2. Median Wages of Bachelor's Graduates Employed Full-Time	7. University Access Rate (Percent of Undergraduates with a Pell-grant)
3. Average Cost to the Student (Net Tuition per 120 Credit Hours)	8a. Graduate Degrees Awarded in Areas of Strategic Emphasis 8b. Freshmen in Top 10% of Graduating High School Class (NCF only)
4. Four Year Graduation Rate (Full-time FTIC)	9. Board of Governors Choice – Percent of Bachelor's Degrees without Excess Hours
5. Academic Progress Rate (2nd Year Retention with GPA Above 2.0)	10. Board of Trustees Choice

Table 2

Board of Governors Choice Metric – From FY 2014-15 to FY 2017-18, the Board chose to apply three separate metrics to different institutions.

Institution	Metric
FAMU, FAU, FGCU, FIU, UCF, UNF, USF, UWF	9a. Percent of Bachelor's Degrees without Excess Hours
FSU, UF	9b. Faculty Awards
NCF	9c. National Ranking for Institutional & Program Achievements

Table 3

The decision to apply a different metric to New College of Florida was made because, at the time of the first year of Performance Funding, NCF did not have the data available

to accurately score metric 9a. The Board created metric 9b for FSU and UF to highlight each university's preeminence status.

At the November 2017 Board Meeting, the Board decided to apply metric 9a to all of the universities. Data is now readily available for NCF. The Board agreed that all institutions should put effort towards reducing the number of students graduating with excess credit hours. FY 2018-19 was the first year metric 9a applied to all institutions and metrics 9b and 9c were no longer in use.

Board of Trustees Choice Metric – Each Board of Trustees has chosen a metric from the remaining metrics in the University Work Plans that apply to the mission of that university and have not been previously chosen for the model.

Institution	2018-19 Metric 10. Board of Trustees Choice
FAMU	10a. Percent of R&D Expenditures Funded from External Sources
FAU, FGCU, FIU	10b. Bachelor's Degrees Awarded to Minorities
FSU	10c. National Rank Higher than Predicted by the Financial Resources Ranking Based on U.S. and World News Report
NCF	10d. Percent of Undergraduate Seniors Participating in a Research Course
UCF	10e. Number of Bachelor Degrees Awarded Annually
UF	10f. Number of Licenses/Options Executed Annually (Ranking)
UNF	10g. Percent of Undergraduate FTE in Online Courses
USF	10h. Number of Postdoctoral Appointees
UWF	10i. Number of Adult (Aged 25+) Undergraduates Enrolled (in Fall)

Table 4

DRAFT

At the November 2018 Board Meeting, the Board approved changes to metric 10 as requested by the university boards of trustees. In order to allow time to collect data and properly set benchmarks, the new metrics will not be applied until FY 2020-21.

Institution*	New Metric 10 (to be applied in FY 2020-21)
FAMU	Number of Bachelor's Degrees Awarded to Transfers with AA Degrees from FCS
FAU	Total Research Expenditures
FGCU	Number of Bachelor's Degrees Awarded Annually to African American and Hispanic Students
FIU	Number of Post-Doctoral Appointees
FSU	Percent of Bachelor's Graduates who took an Entrepreneurship Class
NCF	Percent of FTIC Graduates Completing 3+ High-Impact Practices
UCF	Percent of Degrees Awarded to African-American and Hispanic Student
UF	6-Year Graduation Rates
USF	6-Year Graduation Rates
UWF	Percent of Baccalaureate Graduates Completing 2+ Types of High-Impact Practice

*UNF not included because they decided to continue to apply their current metric 10.
Table 5

State University System 2025 Strategic Plan

The 2025 Strategic Plan[4] strengthens the Board's commitment to achieving excellence in the tripartite mission of its state universities – teaching, research, and public service – for the benefit of Florida's citizens, their communities, and the state economy. The Strategic Plan is a living document that helps align the State University System's goals with Florida's highest economic, workforce, and research needs. As such, the Strategic Plan frames the university's tripartite mission around three key themes – Excellence, Productivity, and Strategic Priorities for a Knowledge Economy.

The changes to the updated Strategic Plan, which the Board approved in 2014, demonstrates the Board's commitment to the kind of strategic planning that truly helps steer the State University System in the direction of Florida's highest priorities. Every five years, the Board reviews the Strategic Plan, assesses the State University System's progress on the 28 goals in the Plan, and makes adjustments, as necessary. The Board's continued close attention to the accuracy and credibility of its Strategic Plan focuses the State University System to help Florida find solutions to the educational, economic, and societal challenges of the coming decades.

[4] Appendix D or https://www.flbog.edu/board/strategicplan.php

The Performance-Based Funding Model provides incentives to universities to meet the Board's benchmarks – which are largely based on the 2025 goals in the Strategic Plan. Six of the performance funding metric's 10-point benchmarks were set using the Strategic Plan goals.

Data Integrity Process

The integrity of data provided to the Board is critical to the Performance-Based funding decision-making process. To provide assurance that the data submitted for this process is reliable, accurate, and complete, the Board developed a Data Integrity Certification process in June 2014.

University presidents and boards of trustees were directed to task their chief audit executives to perform an audit of the university's processes which ensure the completeness, accuracy, and timeliness of data submissions to the Board. Audits are to be conducted in accordance with professional auditing standards and are to be submitted to the Board of Governors Office of Inspector General by March 1st of each year.

Additionally, university presidents and boards of trustees are required to execute a Data Integrity Certification affirmatively certifying each representation. The audit results provide the basis of the president's and chair's certification. When the president and board chair cannot make the certification as prepared, a written explanation is required.

Once approved, each university's audit reports and certifications are published on the Board website each fiscal year.[5]

The 2019 Legislature passed Senate Bill 190 (Ch. 2019-103, Laws of Florida), amending section 1001.706, F.S., requiring the Board to define the data components and methodology used to implement Performance-Based Funding. The bill requires each university to conduct an annual audit to verify that the data complies with the data definitions. The Board will amend the Performance Funding Regulation (5.001) to match the new statute.

Data methodology documents for metrics 1-9 can be found in Appendices E - J as well as the Board's website.[6]

Scoring Methodology

The model measures institutional excellence and improvement of performance using the metrics detailed above. Statute requires the metrics to include 4-year graduation

[5] https://www.flbog.edu/board/office/budget/performance_funding.php
[6] *Id.*

rates; retention rates; postgraduation education rates; degree production; affordability; postgraduation employment and salaries, including wage thresholds that reflect the added value of a baccalaureate degree; access rate, based on the percentage of undergraduate students enrolled during the fall term who received a Pell Grant during the fall term; and other metrics approved by the board.

The performance of an institution is evaluated based on benchmarks adopted by the Board for each metric[7]. Excellence points are earned based on the institution's data score for each metric. Improvement points are earned based on the institution's data score increasing or decreasing from the previous year (no improvement points are given for a decreased score). Once excellence points and improvement points are determined for an individual metric, the higher point value is counted toward the institution's total points. The highest possible points an institution can earn is 100; a possible 10 points earned for each metric.

Allocation Methodology

To ensure each university is striving to excel and improve on key metrics, there is a financial incentive in the model. That financial incentive is not only new state funding but an amount of each institution's base state funding reallocated. The separate funds are referred to as State Investment Funding and Institutional Investment Funding. Section 1001.92(2), F.S. states "Each fiscal year, the amount of funds available for allocation to the state universities based on the Performance-Based funding model shall consist of the state's investment in performance funding plus institutional investments consisting of funds deducted from the base funding of each state university in the State University System in an amount provided by the Legislature."

The allocation methodology for the institutional investment for the 2018-19 fiscal year required a threshold of 51-points as the minimum number of total points needed to be eligible for the institutional investment on a 100-point scale. All SUS institutions eligible for the state's investment had their proportional amount of institutional investment restored. Any institution that failed to meet the minimum threshold of 51-points for the institutional investment was required to submit an improvement plan monitoring report to the Board of Governors for consideration at its August/September meeting that specifies the activities and strategies for improving the institution's performance.

Since July 1, 2016, there has been no university that has scored below 51-points on Performance Funding and therefore no university has had to submit an improvement plan monitoring report. If a university is required to submit an improvement plan, the Board would monitor the institution's progress on implementing the activities and strategies specified in the plan. The Chancellor would be required to withhold

[7] Appendix K, Performance Funding Model 2019-20 Benchmarks

disbursement of the institutional investment until the improvement plan monitoring report for each institution is approved by the Board. Improvement plan monitoring reports would be submitted to the Board no later than December 31 and May 31 of each fiscal year. The reports would be considered by the Board at its January and June meetings. If it is determined that the institution is making satisfactory progress on the plan, the institution would receive up to half of its institutional investment at each meeting. As required by statute, effective July 1, 2016, an institution is limited to only one improvement plan. If an institution, after the submission of one improvement plan, subsequently fails to meet the 51-point threshold, its institutional investment will be redistributed to the institutions meeting the 51-point threshold, based on the points earned by each institution.

The requirements for the intuitional investment are outlined in Section 1001.92, F.S. The Board determines the minimum funding eligibility threshold (51-points).

The allocation methodology for the state's investment for the 2018-19 fiscal year is not required by statute. It is detailed in the Board of Governors regulation 5.001 and can be modified by the Board.

The allocation methodology for the state investment for the 2018-19 fiscal year required a 100-point scale and set the same 51-point threshold as the minimum number of total points needed to be eligible for the state's investment. The three universities with the lowest points, regardless of whether they met the 51-point threshold, were not eligible for the state's investment. The proportional amount of the state's investment that would have been distributed to the three lowest scoring institutions would be distributed to the top three scoring institutions based on their total points. Institutions eligible for the state's investment received an amount based on their prorated share of recurring state base funds to the total SUS recurring base state funds.

In the case of a tie, the Board of Governors implemented a tiebreaker:

a) Compare the total of excellence and improvement scores;
b) Compare only excellence scores;
c) Score metric by metric giving a point to the institution with the higher score; and
d) If still tied, the tie will go to the benefit of the institutions, irrespective of whether the institutions are tied for placement among the top three scoring institutions or are tied for placement among the bottom three scoring institutions.

During the 2018-19 fiscal year, a tiebreaker was applied to three institutions scoring in the top three and applied to two institutions scoring in the bottom three. The scores and allocations for FY 2018-19 (Year 5) are as follows:

Institution	Points	Allocation of State Investment	Allocation of Institutional Investment	Total Performance-Based Funding Allocation
FAMU	72	$0	$14,765,439	$14,765,439
FAU	84	$20,553,876	$22,880,729	$43,434,605
FGCU	75*	$9,264,349	$10,313,143	$19,577,492
FIU	90	$39,996,601	$33,730,710	$73,727,311
FSU	86*	$51,607,104	$47,135,335	$98,742,439
NCF	75*	$0	$3,921,395	$3,921,395
UCF	77	$37,522,699	$41,770,552	$79,293,251
UF	93	$57,631,857	$53,002,618	$110,634,475
UNF	68	$0	$13,574,657	$13,574,657
USF	86*	$37,650,670	$41,913,010	$79,563,680
UWF	86*	$10,772,844	$11,992,412	$22,765,256
Total		$265,000,000	$295,000,000	$560,000,000

*Tiebreaker applied (FSU won tiebreaker for top 3 and NCF lost tiebreaker for bottom 3)
Table 6

Changes to the Allocation Methodology

During the Board of Governors' October 2018 Workshop, the Budget and Finance Committee discussed several possible changes to the Performance Funding Allocation Methodology. The proposed changes were then discussed and approved at the November 2018 Board meeting. Changes to the Performance Funding Board Regulation were given final approval at the January 2019 Board meeting[8].

The approved allocation methodology only impacts the allocation of the state's investment. The changes remove the requirement of a bottom three. On a 100-point scale, institutions with the top 3 scores are automatically eligible for their proportional amount of the state's investment. In the case of a tie for the top 3 scores, the tie will go to the benefit of the institutions. A tiebreaker is no longer needed. All institutions with a score the same or higher as the previous year, are eligible for their proportional amount of the state's investment. Any institution with a score less than the previous year but the previous year's score was higher or the same as the year before, is also eligible for their proportional amount of the state's investment. However, any institution with a score the same or lower than the previous year's score for two

[8] Appendix B, 5.001 PBF Regulation 2018

consecutive years will be required to submit a student success plan to the Board for consideration at its August/September meeting that specifies the activities and strategies for improving the institution's performance metrics in order to be eligible for their proportional amount of the state's investment. The baseline scores begin with the June 2018 results (detailed in Table 6).

Student Success Plan (for scores not showing improvement for two consecutive years):

1) If the plan is approved by the Board, the institution will receive up to 50 percent of its state's investment at the time of approval (August/September).
2) The Board will monitor the institution's progress on implementing the activities and strategies specified in the plan, and the Chancellor will withhold the remaining disbursement of the state's investment until the plan monitoring report for each institution is approved by the Board.
3) The monitoring report will be considered by the Board at its March meeting and if it is determined that the institution is making satisfactory progress on implementing the plan, the institution will receive up to the balance of its state's investment.
4) Any institution that fails to make satisfactory progress as determined by the Board, will not have its full state's investment restored, and any funds remaining will be distributed to the top three scoring institutions (including ties).

Beginning in Fiscal Year 2021-22, any institution with a score lower than 70 points will submit a student success plan to the Board for consideration at its August/September meeting that specifies the activities and strategies for improving the institution's performance metrics in order to be eligible for half of their proportional amount of the state's investment. This will apply regardless of scores below 70 increasing from the previous year.

Student Success Plan (for scores below 70):

1) If the plan is approved by the Board, the institution will receive up to 25 percent of its state's investment at the time of approval (August/September).
2) The Board will monitor the institution's progress on implementing the activities and strategies specified in the plan, and the Chancellor will withhold the remaining 25% of the disbursement of the state's investment until the plan monitoring report for each institution is approved by the Board.
3) The monitoring report will be considered by the Board at its March meeting and if it is determined that the institution is making satisfactory progress on implementing the plan, the institution will receive up to the balance of its state's investment.

4) Any institution that fails to make satisfactory progress as determined by the Board, will not have its 50% of the state's investment restored, and any funds remaining will be distributed to the top three scoring institutions (including ties). The remaining 50 percent of each institution's state's investment will also be distributed to the top three scoring institutions.

The scoring methodology will remain the same and the allocation methodology for the institutional investment remains constant, as it is required by statute.

The scores and allocations for FY 2019-20 (Year 6) are as follows:

Institution	Points	Allocation of State Investment	Allocation of Institutional Investment	Total Performance-Based Funding Allocation
FAMU	70	$13,750,113	$15,306,730	$29,056,843
FAU	86	$20,517,518	$22,840,256	$43,357,774
FGCU	81	$10,895,127	$12,128,538	$23,023,665
FIU	87	$30,459,667	$33,907,930	$64,367,597
FSU	88	$42,084,561	$46,848,851	$88,933,412
NCF	67	$3,945,308	$4,391,947	$8,337,255
UCF	88	$36,760,351	$40,921,901	$77,682,252
UF	95	$47,282,102	$52,634,792	$99,916,894
UNF	78	$12,358,238	$13,757,283	$26,115,521
USF	92	$36,504,867	$40,637,494	$77,142,361
UWF	94	$10,442,148	$11,624,278	$22,066,426
Total		$265,000,000	$295,000,000	$560,000,000

Table 7

Continuous Improvement

Success is evident throughout the scores and data of the Performance Metrics. Year 6 of the Performance-Based Funding Model shows significant improvements in metric scores as well as overall scores of the institutions. In the six years since the Performance-Based Funding Model was implemented, metrics 1 through 6, 8a, and 9 have shown significant improvements while Metric 7, the University Access Rate remains consistent with Florida's population.

Metrics 1 and 2

Metric 1, percent of bachelor's graduates employed (earning $25,000 or more) or continuing their education one year after graduation, and metric 2, median wages of bachelor's graduates employed full time one year after graduation have seen improvements since the first year of performance funding. The success in student

employment after graduation has been achieved by universities investing in career service centers with a focus on student advising, establishing partnerships with local businesses and career centers and increasing the number of degrees in STEM (Science, Technology, Engineering, and Mathematics).

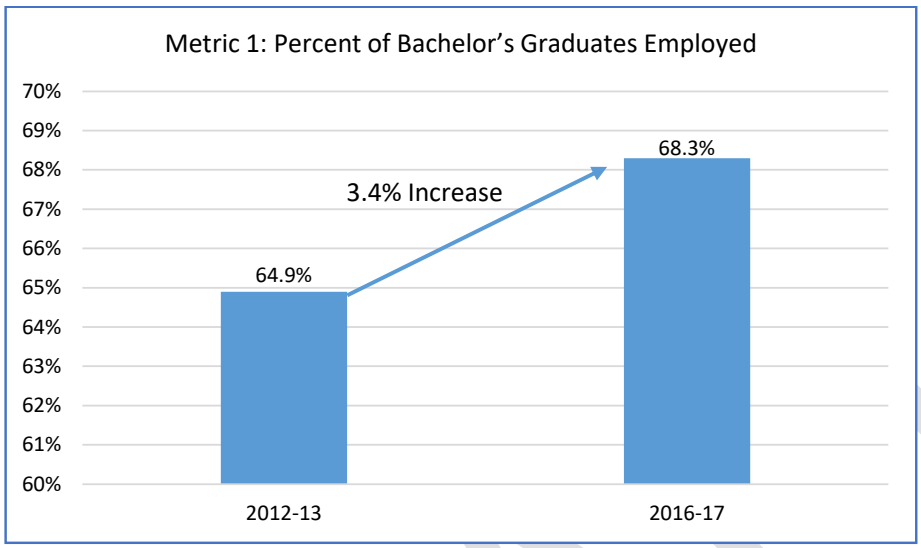

Table 8

The Strategic Plan goal/10-point benchmark for metric 1 is 90%, which reflects the Board's dedication to improving the employment and educational outcomes for the State University System students. The Board included this metric in the Strategic Plan to focus the System's efforts in better understanding this period of transition. None of the individual institutions have met the goal yet. The highest scoring institutions are UF at 71.3% and USF at 70.4%.

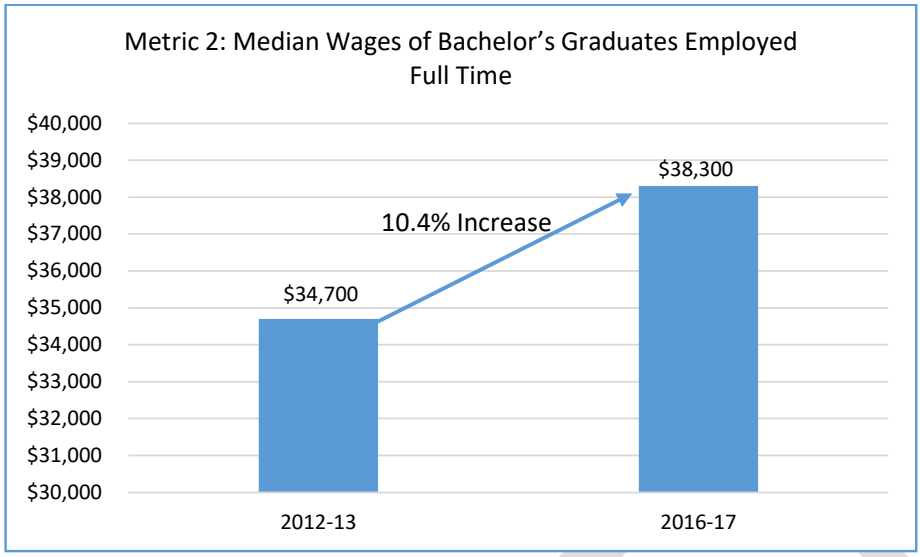

Table 9

This metric is not included in the Strategic Plan. The 10-point benchmark for metric 2 is $40,700. One university (UF) has reached the 10-point benchmark at $42,200.

Metrics 4 and 5

The universities have focused great effort in improving their graduation rates (metric 4) and retention rates (metric 5) in recent years. The success shown in these metrics is directly correlated with universities spending resources on increasing the number of advisors to focus on student retention and graduation, offering mentoring, tutoring and other services benefiting individual students. Universities have also invested in software that targets struggling students to improve the graduation and retention rates and they have increased student financial aid. The help of financial aid allows students to put more focus on academics.

The overall SUS four-year graduation rate is now 52.6%, exceeding the strategic plan goal of 50%; and the overall SUS retention rate is now less than 4 percentage points away from the strategic plan goal of 90%. The cohort size for 2009 was 35,755 compared to the cohort size in 2014 which was 37,693. While student population is increasing, graduation rates continue to increase as well.

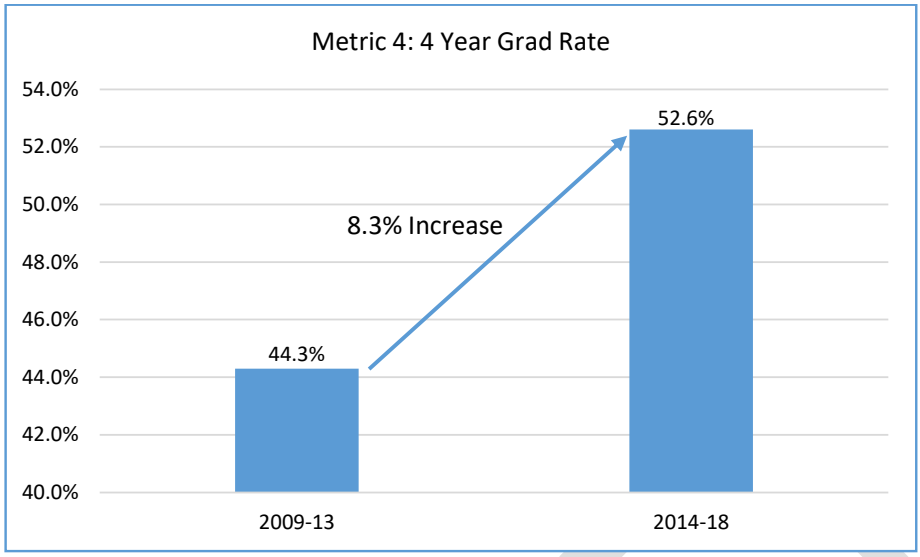

Table 10

The Strategic Plan goal/10-point benchmark for metric 4 is 50%, which the SUS average has exceeded. Four universities have also passed this goal: FSU, UF, USF, and NCF.

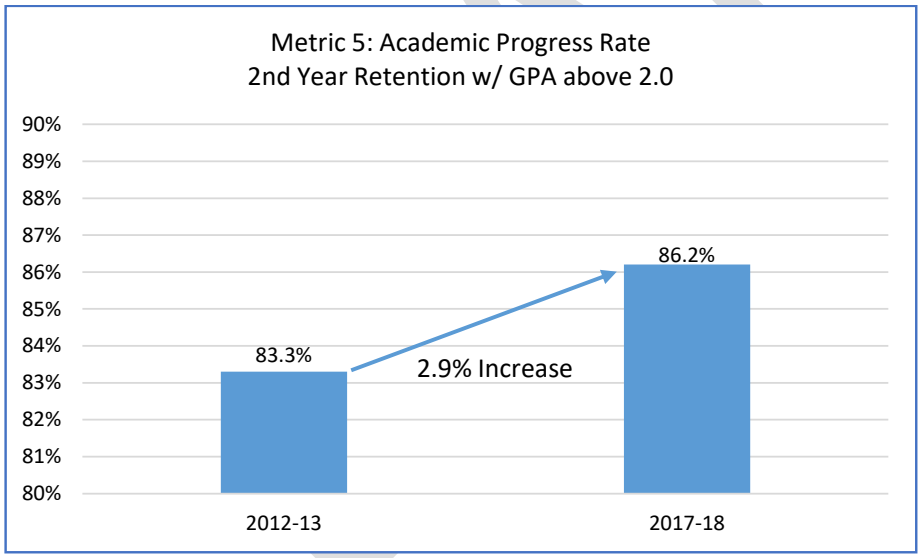

Table 11

The Strategic Plan goal/10-point benchmark for metric 5 is 90%, which the SUS average is getting very close. The cohort size for 2012 was 36,882 and the cohort size for 2017 was 39,006. UF and FSU have exceeded this goal with 95.2% and 91.4% respectively. Research shows that students who return for their 2nd Fall semester with a GPA above 2.0 are eight times more likely to graduate within six years than students who begin their second Fall semester with a GPA of less than 2. This is one reason why the Board decided to include this metric in the new Performance Funding Model.

Metrics 6 and 8a

Each year, more students are earning Bachelor's and Master's degrees in programs of strategic emphasis. The Board approves a methodology document that is used to generate a list of Programs of Strategic Emphasis to promote the alignment of the SUS degree program offerings with the economic development and workforce needs of the State[9]. Degrees that qualify as being in Programs of Strategic Emphasis fall under the following categories:

1) Critical Workforce – Education (e.g., general and secondary education degrees)
2) Critical Workforce – Health (e.g., nursing, veterinary, medicine, and therapy degrees)
3) Critical Workforce – Gap Analysis (e.g., accounting and finance degrees)
4) Economic Development – Global Competitiveness (e.g., foreign languages and international relations degrees)
5) Economic Development – STEM (e.g., science, technology, engineering, and mathematics degrees).

The overall SUS scores for Metric 6, percent of bachelor's degrees awarded in programs of strategic emphasis, and metric 8a, percent of graduate degrees awarded in programs of strategic emphasis, have surpassed the strategic plan goals of 50% and 60%, respectively. The success in these metrics can be attributed to universities increasing the number of STEM degrees and hiring additional faculty in high-wage, high-need areas.

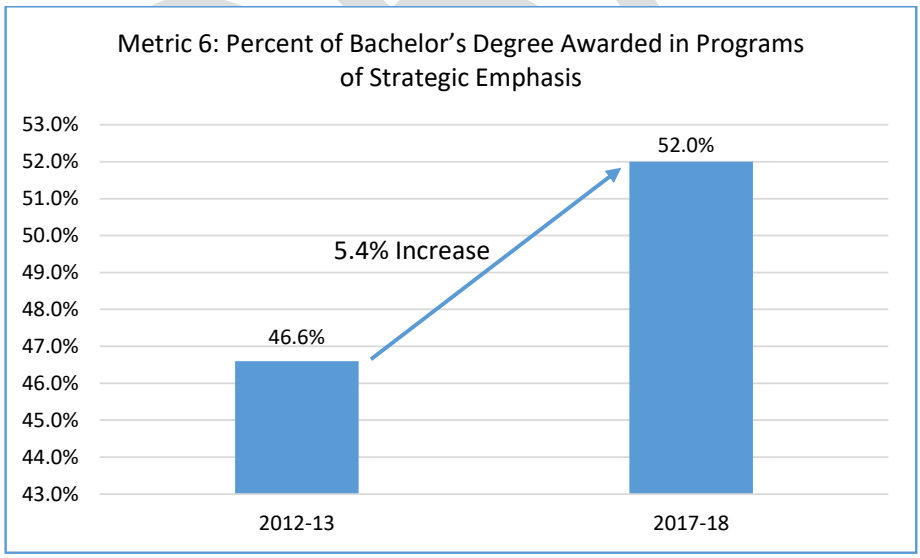

Table 12

[9] Visit: https://www.flbog.edu/pressroom/strategic_emphasis/ for full details

The Strategic Plan goal/10-point benchmark for metric 6 is 50%, which the SUS average has exceeded. Six universities have also exceeded this goal (FGCU, UCF, UF, UNF, USF, and UWF).

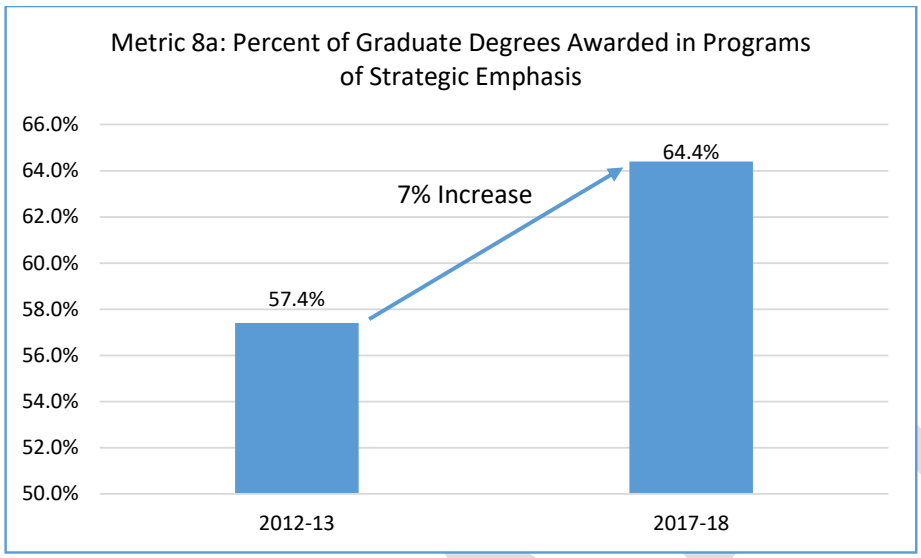

Table 13

The Strategic Plan goal for metric 8a is 60%, which the SUS average has exceeded. Five universities have also exceeded this goal (FAU, FGCU, UCF, UF, and USF).

Metrics 3 and 9

While performance funding metrics continue to improve, the cost to the students continues to decline. Universities have placed an emphasis on reducing the number of hours it takes to earn a degree, increasing financial aid to students, investing in and improving student advisors and mentors. The investments the legislature has put into the Bright Futures Scholarship has also significantly brought down the average cost to the student (metric 3). And the state continues to see the percent of degrees awarded without excess hours (metric 9) increase, nearly reaching the strategic plan goal of 80%.

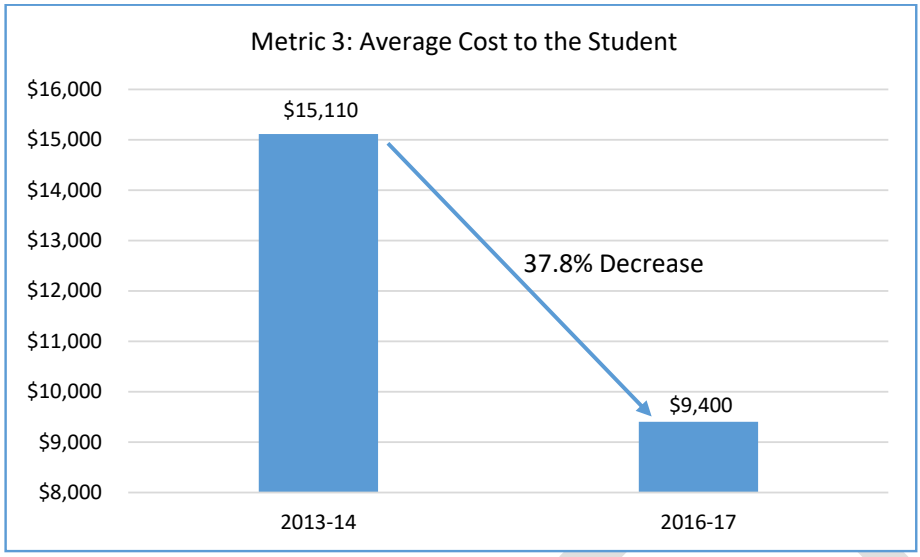

Table 14

This metric is not included in the Strategic Plan. The 10-point benchmark for metric is $9,000, which the SUS average is $400 short of. Five universities have exceeded the 10-point benchmark (FAMU, FSU, NCF, UF, and USF).

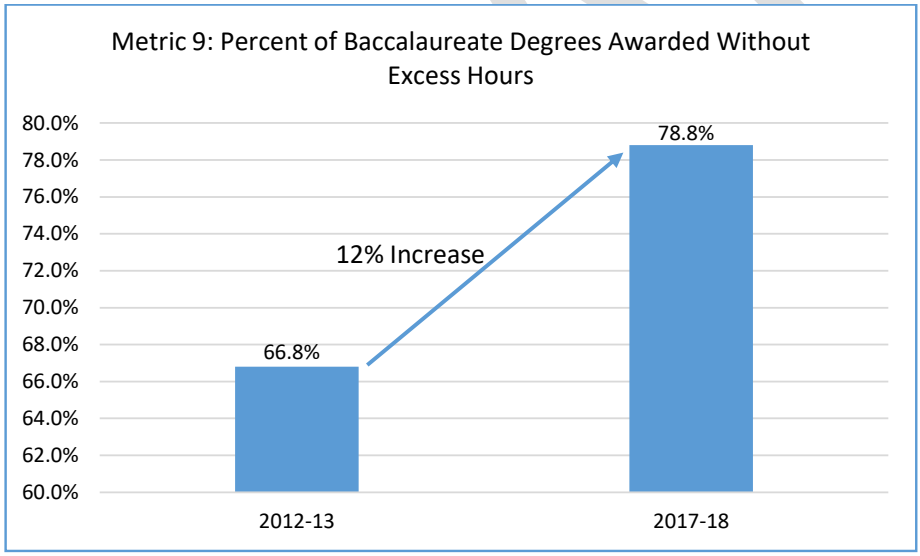

Table 15

The Strategic Plan goal/10-point benchmark for metric 9 is 80%, which the SUS average is 1.2 percentage points short of. Six universities have exceeded this goal (FSU, NCF, UF, UNF, USF, and UWF).

Metric 7

The SUS has successfully made improvements in each metric while not compromising access rates. From the first year of performance funding, the access rate has remained constant around 39%. Metric 7 (university access rate) is based on the number of undergraduates, enrolled during the fall term, who received a Pell-grant during the fall term.

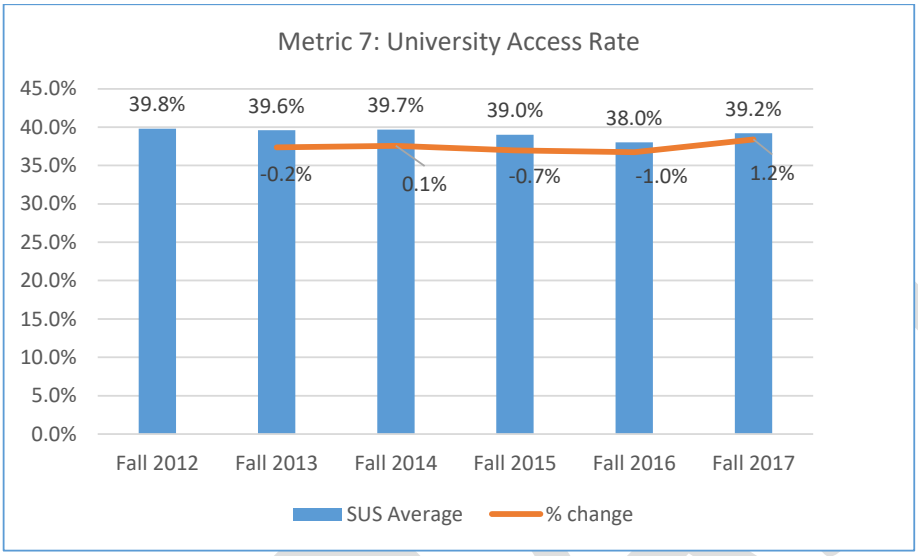

Table 16

The Federal Pell Grant program provides financial aid to students from poor and working-class families who want to better themselves by earning a college degree. The purpose of this metric within the Strategic Plan is to serve as an 'access' measure - to ensure that the State University System continues to provide opportunities to all levels of the socio-economic strata. The Strategic Plan goal is to have every university have at least 30% of their undergraduate students receiving a Pell grant. However, the 10-point benchmark for this metric is 42%. While nine universities exceed the Strategic Plan goal, and the remaining two universities are less than 2 percentage points below 30%; three universities exceed the 10-point benchmark (FAMU, FAU, and FIU).

Complete Performance-Based Continuous Improvement Model

With the recent changes in the allocation methodology, the Board has made an effort to encourage the SUS to focus on continuous improvement in metrics. The changes, specifically the removal of the bottom 3 requirement, allow the Board to equitably distribute performance funds to the universities.

If a university's score decreases or stays the same for 2 consecutive years, the university can receive up to 100% of their allocation of the state investment only after presenting

and completing a student success plan. This new requirement holds universities accountable for continuous improvement. The student success plans will be required to focus on activities and strategies that will improve the institution's performance. The Board may require the institution to focus on the specific metrics that are not showing signs of any improvement and ultimately bringing the institution's total score down.

The new allocation methodology requires schools below 70 points to receive only half of the state investment after presenting and completing a student success plan. This requirement will provide motivation for each institution to keep their excellence and improvement points high.

Setting the baseline as the 2018 scores allows each university to receive performance funds in the first year of the changes. The changes will provide an equitable distribution of performance funds. The universities are now competing against themselves to keep their score high and/or improving in order to continue earning money.

Currently, around 25% of each university's base budget (Education and General Funds only) is at risk in the Performance-Based Funding Model. The university's base budgets consist of the following program components: Instruction and Research, Administration and Support, Plant Operations and Maintenance, Student Services, Institutes and Centers, Library and Audio Visual, Radio and TV, Museums, Agricultural Extension Services, and Allied Clinics. If a university were to lose any portion of their institutional investment, there would be a significant impact on all of the above components that would be felt by the students, faculty, and staff at the institution.

By including excellence and improvement points, the performance funding model focuses on outcomes in each metric. Universities can focus on improving outcomes specific metrics by investing their funds in certain initiatives such as student financial aid, increasing the number of student advisors, mentors, and tutors, using innovative technology to pinpoint the students who need specific help, and many other initiatives.

The Board of Governor's has successfully implemented a Performance-Based Funding Model that emphasizes continuous improvement focused on metric outcomes and provides an equitable distribution of funding.

The 2018 Florida Statutes

1001.92 State University System Performance-Based Incentive.—

(1) A State University System Performance-Based Incentive shall be awarded to state universities using performance-based metrics adopted by the Board of Governors of the State University System. Beginning with the Board of Governors' determination of each university's performance improvement and achievement ratings for 2018, and the related distribution of the 2018-2019 fiscal year appropriation, the performance-based metrics must include 4-year graduation rates; retention rates; postgraduation education rates; degree production; affordability; postgraduation employment and salaries, including wage thresholds that reflect the added value of a baccalaureate degree; access rate, based on the percentage of undergraduate students enrolled during the fall term who received a Pell Grant during the fall term; and other metrics approved by the board in a formally noticed meeting. The board shall adopt benchmarks to evaluate each state university's performance on the metrics to measure the state university's achievement of institutional excellence or need for improvement and minimum requirements for eligibility to receive performance funding. Access rate benchmarks must be differentiated and scored to reflect the varying access rate levels among the state universities; however, the scoring system may not include bonus points.

(2) Each fiscal year, the amount of funds available for allocation to the state universities based on the performance-based funding model shall consist of the state's investment in performance funding plus institutional investments consisting of funds deducted from the base funding of each state university in the State University System in an amount provided by the Legislature. The Board of Governors shall establish minimum performance funding eligibility thresholds for the state's investment and the institutional investments. A state university that meets the minimum institutional investment eligibility threshold, but fails to meet the minimum state investment eligibility threshold, shall have its institutional investment restored but is ineligible for a share of the state's investment in performance funding. The institutional investment shall be restored for each institution eligible for the state's investment under the performance-based funding model.

(3)(a) A state university that fails to meet the Board of Governors' minimum institutional investment performance funding eligibility threshold shall have its institutional investment withheld by the board and must submit an improvement plan to the board that specifies the activities and strategies for improving the state university's performance. The board must review and approve the improvement plan and, if the plan is approved, must monitor the state university's progress in implementing the activities and strategies specified in the improvement plan. The state

university shall submit monitoring reports to the board by December 31 and May 31 of each year in which an improvement plan is in place. The ability of a state university to submit an improvement plan to the board is limited to 1 fiscal year.

(b) The Chancellor of the State University System shall withhold disbursement of the institutional investment until the monitoring report is approved by the Board of Governors. A state university determined by the board to be making satisfactory progress on implementing the improvement plan shall receive no more than one-half of the withheld institutional investment in January and the balance of the withheld institutional investment in June. A state university that fails to make satisfactory progress may not have its full institutional investment restored. Any institutional investment funds that are not restored shall be redistributed in accordance with the board's performance-based metrics.

(4) Distributions of performance funding, as provided in this section, shall be made by the Legislature to each of the state universities.

(5) By October 1 of each year, the Board of Governors shall submit to the Governor, the President of the Senate, and the Speaker of the House of Representatives a report on the previous fiscal year's performance funding allocation which must reflect the rankings and award distributions.

(6) The Board of Governors shall adopt regulations to administer this section.

History.—s. 14, ch. 2015-222; ss. 9, 126, ch. 2016-62; s. 12, ch. 2016-237; s. 5, ch. 2018-4.

5.001 Performance-Based Funding

(1) The Performance Based Funding (PBF) model is based upon four guiding principles:
(a) Align with the State University System's (SUS) Strategic Plan goals;
(b) Reward excellence and improvement;
(c) Have a few clear, simple metrics; and
(d) Acknowledge the unique mission of the different institutions.

(2) The PBF model measures institutional excellence and improvement of performance using metrics adopted by the Board of Governors. The metrics include graduation rates; retention rates; post-graduation education rates; degree production; affordability; post-graduation employment and salaries, including wage thresholds that reflect the added value of a baccalaureate degree; access; and other metrics that may be approved by the Board in a formally noticed meeting.

(3) The performance of an institution is evaluated based on benchmarks adopted by the Board of Governors for each metric. For each fiscal year, the amount of funds available for allocation to SUS institutions shall consist of the state's investment, plus the institutional investment from each institution's base budget, as determined in the General Appropriations Act. The amount of institutional investment withheld from each SUS institution shall be a proportional amount based on each institution's recurring base state funds to the total SUS recurring base state funds (excluding special units). Florida Polytechnic University is not included in the model until such time as data is readily available.

(4) On a 100-point scale, a threshold of 51-points is established as the minimum number of total points needed to be eligible for the state's investment.
(a) All SUS institutions eligible for the state's investment shall have their proportional amount of institutional investment restored.
(b) The three universities with the lowest points, regardless of whether they meet the 51-point threshold, are not eligible for the state's investment. The proportional amount of the state's investment that would have been distributed to the three lowest scoring institutions will be distributed to the top three scoring institutions based on the total points of the top three scoring eligible institutions.
(c) Institutions eligible for the state's investment shall receive an amount based on their prorated share of recurring state base funds to the total SUS recurring base state funds.

(5) Any institution that fails to meet the minimum threshold of 51-points for the state's investment shall submit a final improvement plan to the Board of Governors for consideration at its June meeting that specifies the activities and strategies for

improving the institution's performance. As of July 1, 2016, an institution is limited to only one improvement plan.

(a) The Board of Governors will monitor the institution's progress on implementing the activities and strategies specified in the plan, and the Chancellor shall withhold disbursement of the institutional investment until the improvement plan monitoring report for each institution is approved by the Board of Governors.
(b) Improvement plan monitoring reports shall be submitted to the Board of Governors no later than December 31 and May 31 of each fiscal year.
(c) The December 31 monitoring report will be considered by the Board of Governors at its January meeting and if it is determined that the institution is making satisfactory progress on implementing the plan, the institution shall receive up to 50 percent of its institutional investment.
(d) The May 31 monitoring report will be considered by the Board of Governors at its June meeting and if it is determined that the institution has fully completed the plan, the institution shall receive the remaining balance of its institutional investment.
(e) Any institution that fails to make satisfactory progress shall not have its full institutional investment restored, and any institutional investment funds remaining shall be distributed to the three institutions that demonstrate the most improvement on the metrics based upon those institutions' share of total improvement points.

(6) If an institution, after the submission of one improvement plan, subsequently fails to meet the 51-point threshold, its institutional investment will be redistributed to the institutions meeting the 51-point threshold, based on the points earned by each institution.

(7) In the case of a tie in the number of points earned, the Board of Governors shall implement a tie breaker in the order shown as follows:

(a) Compare the total of excellence and improvement scores;
(b) Compare only the excellence scores;
(c) Score metric by metric giving a point to the institution with the higher score; and
(d) If still tied, the tie will go to the benefit of the institutions, irrespective of whether the institutions are tied for placement among the top three scoring institutions or are tied for placement among the bottom three institutions.

(8) By October 1 of each year, the Board of Governors shall submit a report to the Governor, President of the Senate, and Speaker of the House of Representatives on the previous fiscal year's performance funding allocation, including the rankings and award distributions.

Authority: Section 7(d), Art. IX, Fla. Const., Section 1001.92, Florida Statutes; History: New 9-22-16.

5.001 Performance-Based Funding

(1) The Performance-Based Funding (PBF) model is based upon four guiding principles:
(a) Align with the State University System's (SUS) Strategic Plan goals;
(b) Reward excellence and improvement;
(c) Have a few clear, simple metrics; and
(d) Acknowledge the unique mission of the different institutions.

(2) The PBF model measures institutional excellence and improvement of performance using metrics adopted by the Board of Governors. The metrics include graduation rates; retention rates; post-graduation education rates; degree production; affordability; post-graduation employment and salaries, including wage thresholds that reflect the added value of a baccalaureate degree; access; and other metrics that may be approved by the Board in a formally noticed meeting.

(3) The performance of an institution is evaluated based on benchmarks adopted by the Board of Governors for each metric. For each fiscal year, the amount of funds available for allocation to SUS institutions shall consist of the state's investment, plus the institutional investment from each institution's base budget, as determined in the General Appropriations Act. The amount of institutional investment withheld from each SUS institution shall be a proportional amount based on each institution's recurring base state funds to the total SUS recurring base state funds (excluding special units). Florida Polytechnic University is not included in the model until such time as data is readily available.

(4) Institutional Investment
(a) On a 100-point scale, a threshold of 51-points is established as the minimum number of total points needed to be eligible for the institutional investment.
(b) All SUS institutions eligible for the state's investment shall have their proportional amount of institutional investment restored.
(c) Any institution that fails to meet the minimum threshold of 51-points for the institutional investment shall submit an improvement plan to the Board of Governors for consideration at its August/September meeting that specifies the activities and strategies for improving the institution's performance. As of July 1, 2016, an institution is limited to only one improvement plan.
(1) The Board of Governors will monitor the institution's progress on implementing the activities and strategies specified in the plan, and the Chancellor shall withhold disbursement of the institutional investment until the improvement plan monitoring report for each institution is approved by the Board of Governors.
(2) Improvement plan monitoring reports shall be submitted to the Board of Governors no later than December 31 and May 31 of each fiscal year.
(3) The December 31 monitoring report will be considered by the Board of Governors at its January meeting and if it is determined that the institution is making satisfactory progress on implementing the plan, the institution shall receive up to 50 percent of its institutional investment.
(4) The May 31 monitoring report will be considered by the Board of Governors at its June meeting and if it is determined that the institution has fully completed the plan, the institution shall receive the remaining balance of its institutional investment.
(5) Any institution that fails to make satisfactory progress shall not have its full institutional investment restored, and any institutional investment funds remaining shall

be distributed to the three institutions that demonstrate the most improvement on the metrics based upon those institutions' share of total improvement points.

(d) If an institution, after the submission of one improvement plan, subsequently fails to meet the 51-point threshold, its institutional investment will be redistributed to the institutions meeting the 51-point threshold, based on the points earned by each institution.

(5) State Investment

(a) On a 100-point scale, institutions with the top 3 scores shall be eligible for their proportional amount of the state's investment. In the case of a tie for the top 3 scores, the tie will go to the benefit of the institutions.

(b) All SUS institutions with a score the same or higher as the previous year, shall be eligible for their proportional amount of the state's investment.

(c) Any institution with a score less than the previous year but the previous year's score was higher or the same than the year before, shall be eligible for their proportional amount of the state's investment.

(d) Any institution with a score the same or lower than the previous year's score for two consecutive years shall submit a student success plan to the Board of Governors for consideration at its August/September meeting that specifies the activities and strategies for improving the institution's performance metrics in order to be eligible for their proportional amount of the state's investment. The baseline scores begin with the June, 2018 results.

(1) If the student success plan is approved by the Board of Governors, the institution shall receive up to 50 percent of its state's investment at the time of approval.

(2) The Board of Governors will monitor the institution's progress on implementing the activities and strategies specified in the plan, and the Chancellor shall withhold the remaining disbursement of the state's investment until the student success plan monitoring report for each institution is approved by the Board of Governors.

(3) The student success plan monitoring report shall be submitted to the Board of Governors on a date specified by the Chancellor.

(4) The monitoring report will be considered by the Board of Governors at its March meeting and if it is determined that the institution is making satisfactory progress on implementing the plan, the institution shall receive up to the balance of its state's investment.

(5) Any institution that fails to make satisfactory progress shall not have its full state's investment restored, and any state investment funds remaining shall be distributed to top three scoring institutions (including ties) based on the total number of points of the top three scoring eligible institutions.

(6) Beginning with the Fiscal Year 2021-22 appropriation, any institution with a score lower than 70 points shall submit a student success plan to the Board of Governors for consideration at its August/September meeting that specifies the activities and strategies for improving the institution's performance metrics in order to be eligible for 50 percent of their proportional amount of the state's investment.

(a) If the student success plan is approved by the Board of Governors, the institution shall receive up to 25 percent of its state's investment at the time of approval.

(b) The Board of Governors will monitor the institution's progress on implementing the activities and strategies specified in the plan, and the Chancellor shall withhold the remaining 25% of the disbursement of the state's investment until the student success plan monitoring report for each institution is approved by the Board of Governors.

(c) The student success plan monitoring report shall be submitted to the Board of Governors on a date specified by the Chancellor.
(d) The monitoring report will be considered by the Board of Governors at its March meeting and if it is determined that the institution is making satisfactory progress on implementing the plan, the institution shall receive up to the balance of its state's investment.
(e) Any institution that fails to make satisfactory progress shall not have its 50 percent of the state's investment restored, and any state investment funds remaining shall be distributed to the top three scoring institutions (including ties) based on the total number of points of the top three scoring eligible institutions.
(f) The remaining 50 percent of each institution's state's investment shall be distributed to the top three scoring institutions (including ties) based on the total number of points of the top three scoring eligible institutions.

(7) By October 1 of each year, the Board of Governors shall submit a report to the Governor, President of the Senate, and Speaker of the House of Representatives on the previous fiscal year's performance funding allocation, including the rankings and award distributions.

Authority: Section 7(d), Art. IX, Fla. Const., Section 1001.92, Florida Statutes; History: New 9-22-16. Amended 1-31-19.

Introduction 5
The Planning Context 6
Mission of the State University System in the 21st Century 9
2025 Vision for the State University System 11
2025 Goals for the State University System 12
2025 State University System Performance Indicators 17

At a glance

To be truly great, Florida must have well-educated citizens who are working in diverse fields, from science and engineering to medicine and bioscience to computer science, the arts and so much more. The State University System of Florida provides access to the teaching, research and service that is transforming this growing, dynamic state. It is important to remember that university faculty not only share knowledge through world-class teaching, they actually create the knowledge that is shaping society — locally, nationally and globally.

The Florida Board of Governors — the constitutional body created by voters in 2002 to oversee the State's 12 public universities — is working to build on these institutions' individual strengths and unique missions as each one claims its rightful place on the national and international stage.

Introduction

The Board of Governors is authorized in Article IX, Section 7(d), Florida Constitution, to "*operate, regulate, control, and be fully responsible for the management of the whole university system.*" The Board, as the governing body for the State University System of Florida, strongly believes that the future of Florida is dependent upon a high quality, comprehensive, and efficient system of public universities.

The 12 institutions within the System enhance the state and its many valuable assets by providing high quality academic degree programs to meet state economic and workforce needs, cutting edge research to address global problems, and community outreach to improve the quality of life for Floridians. The System now enrolls over 337,000 students. State universities collectively offer nearly 1,800 degree programs at the baccalaureate, graduate, and professional levels and annually award over 81,000 degrees at all levels.

The Planning Context

The State University System has experienced extraordinary changes and shifts in recent years, as significant economic challenges in Florida have compelled state universities to implement innovative strategies and efficiencies in order to respond to both increased demands and budget constraints. These changes are reflected by the need to revise the State University System Strategic Plan that was originally approved on November 10, 2011.

Among the most notable changes, the System's 12th university—Florida Polytechnic University—was created to focus on the production of graduates in science, technology, engineering, and mathematics. The Board's Access and Attainment Commission conducted a supply-demand study of the State's projected occupations and current degree production, and was rewarded with a legislative appropriation to close the gaps in degree production that were identified. In a related effort, the Board's list of Programs of Strategic Emphasis was revised in November 2013 to reflect changes in workforce demands. An Innovation and Online Committee and a Health Initiatives Committee were created to assist in System strategic planning. The University of Florida and Florida State University were designated as Preeminent Universities and rewarded with additional funding to raise their national rankings. And perhaps most importantly, the Board of Governors worked with the Florida Legislature and the Governor to implement a Performance-Based Funding Model that is a dramatic change to how the System will receive funding. The Performance-Based Funding Model incentivizes universities to meet the Board's benchmarks – which are largely based on the 2025 goals in this Strategic Plan.

Demand for access to Florida public higher education will continue to increase due to the growing number of interested and qualified students, the exponential expansion of knowledge, and the greater sophistication of employer demands and resulting specialization needed in the workplace. In light of the increased demand, as well as the need for greater baccalaureate degree production, it is prudent to evaluate Florida's existing postsecondary delivery system to ensure that an optimal structure exists to meet the projected needs. To this end, the Board of Governors will continue to engage with the Higher Education Coordinating Council as it reviews the organization of the state delivery system to determine the most efficient way to provide Floridians with expanded access to quality baccalaureate degree programs.

State universities have prioritized the coordination of academic program delivery in order to optimize resources, to expand efficiencies, and to respond to workforce demands for graduates with specific knowledge and skills. Specifically, university goals are being set to increase the number of graduates with degrees in the STEM (science, technology, engineering, and math) fields. While some unproductive academic programs are being re-tooled or terminated, targeted programs are being expanded or established to provide the knowledge, innovation, and commercialization ventures needed to boost production and growth in Florida's businesses and industries.

As the System takes on an expanded role in responding to Florida's critical needs, the Board will continue to actively monitor university academic planning and progress on accountability measures and performance outcomes in order to assess the System's efficiency and effectiveness. Utilizing the annual university work plans and the System's Annual Report, specific, data-driven indices have been identified that focus on the quality and impact of teaching and learning, student retention and graduation, and efficient resource utilization.

Looking ahead, the coming years will present significant economic and societal challenges to the state universities that may impact access, quality, and productivity. The Board of Governors believes, however, that the challenges facing the State University System are not barriers; they offer opportunities for clearer focus and greater efficiency. The Board is committed to providing the bold leadership necessary to enable the State University System to strategically address Florida's educational, economic, and societal needs.

Through its standing committee structure, the Board has begun to identify strategies and initiatives needing immediate action in order to address these needs. As examples, the Budget and Finance Committee, working with the Florida Legislature, has put in place a powerful Performance-based Funding model based on goals and metrics that will change how funding allocations are made to the System. The Facilities Committee is currently focused on how best to address funding for the renovation of existing facilities and the construction of new, high-priority facilities. The Academic and Student Affairs Committee is now focusing on greater System efficiencies in academic program delivery and has initiated a System-wide, adult degree completion project that will enable Floridians with some postsecondary education to complete a degree, particularly in high demand areas of the workforce. The Legislative Affairs Committee is considering strategies that will demonstrate the Board's commitment to STEM education and the commercialization of university research discoveries. A newly created Innovation and Online Committee is working to develop a strategic plan for online education

that will support the overall goals of the System's Strategic Plan. Similarly, a newly created Health Initiatives Committee will create a plan to better coordinate health education, health care delivery, and health-related research in the System.

The Board of Governors will actively engage with university boards of trustees, legislative and governmental constituents, and other community and global partners, and will lead the State University System by utilizing the following guiding principles:

- **Focus on students and enhancing their learning, development, and success.**
- **Recognize and value the roles and contributions of faculty/staff.**
- **Partner with university boards of trustees to provide support and oversight for the institutions.**
- **The Board of Governors recognizes the importance of coordinating and collaborating with the Florida College System with respect to the production of baccalaureate degrees. To that end, the Board of Governors and the Florida College System will continue to engage in meaningful discussions to ensure that resources and efforts are not duplicated on a statewide basis.**
- **Coordinate with other education sectors and seek the optimal State University System structure to help address the state's higher education needs.**
- **Advocate for the System's unique role in advancing the State educationally, economically, socially, and culturally.**
- **Identify and affirm the distinctive mission and contributions of each institution.**
- **Work with institutions to align undergraduate and graduate programmatic offerings, as well as research efforts, based on each institution's unique strengths and missions.**
- **Promote an optimal balance between institutional aspirations and the System's public mission.**
- **Support institutions in their efforts to achieve state, national, and/or international preeminence in key academic, research, and public service programs.**
- **Seek ways to organize and collaborate for increased efficiencies and a stronger System and state.**
- **Advocate for appropriate and predictable funding to achieve System goals that are tracked using a robust accountability system in a Performance-Based Funding Model.**
- **Maintain a commitment to excellence and continuous improvement.**

Mission of the State University System for the 21st Century

Article IX, Section 7(a), Florida Constitution, establishes a system of governance for the State University System of Florida *"in order to achieve excellence through teaching students, advancing research and providing public service for the benefit of Florida's citizens, their communities and economies."* The Board of Governors, as the governing body, is given responsibilities in Section 7(d) including *"defining the distinctive mission of each constituent university and its articulation with free public schools and community colleges, ensuring the well-planned coordination and operation of the system, and avoiding wasteful duplication of facilities or programs."*

In light of this constitutional framework for the State University System, the Board of Governors approves the following mission for the System as it advances toward 2025:

The mission of the State University System of Florida is to provide undergraduate, graduate and professional education, research, and public service of the highest quality through a coordinated system of institutions of higher learning, each with its own mission and collectively dedicated to serving the needs of a diverse state and global society.

The State University System has a critical, broad-based role in moving Florida forward, yet it also is uniquely poised to respond to targeted, specific challenges that arise. Whether in responding to the 2010 oil spill and its impact on Northwest Florida and the Southern U.S., providing expertise in the aftermath of the earthquake in Haiti, creating economic development such as the Florida I-4 High Tech Corridor, or enabling medical breakthroughs that improve the longevity and quality of life, Florida's state universities transform knowledge into action every day in meaningful ways.

To provide leadership that will find solutions to the educational, economic, and societal challenges of the coming decades, the state universities will continue to:

- **Support students' development of the knowledge, skills, and aptitudes needed for success in the global society and marketplace.**
- **Transform and revitalize Florida's economy and society through research, creativity, discovery, and innovation.**
- **Mobilize resources to address the significant challenges and opportunities facing Florida's citizens, communities, regions, the state, and beyond.**
- **Deliver knowledge to advance the health, welfare, cultural enrichment, and economy through community and business engagement and service.**

2025 Vision

The Board of Governors continues to be committed to achieving excellence in the tripartite mission of its state universities - teaching, research, and public service - for the benefit of Florida's citizens, their communities, and the state economy. In light of the velocity with which the 21st century is moving ahead, however, the Board of Governors recognizes the need to view this public mission through a clearer lens and with a sharper focus on teaching *and* student learning, research *and* commercialization, and community *and* business engagement.

As Florida and the nation face economic competition on an unprecedented scale, the State University System must prepare graduates to excel in the global society and marketplace. Individually and collectively, state universities must advance innovation — new technologies, new processes, new products, new ideas— in their local and state economies; help Florida's employers prosper and grow through knowledge transfer and a steady stream of qualified graduates; and make community and business engagement an integral part of their institutional culture.

The Board of Governors presents the following vision for the State University System to guide the programs, activities, and plans of the state universities during these years.

By 2025, the State University System of Florida will be internationally recognized as a premier public university system, noted for the distinctive and collective strengths of its member institutions.

2025 Goals

To realize its mission and its 2025 vision for the State University System, the Board of Governors will focus on three critical points of emphasis that will provide a framework for the targeted 2025 Goals and recognize the university's teaching, research, and public service priorities: *Excellence, Productivity,* and *Strategic Priorities for a Knowledge Economy.*

Excellence

The Board of Governors continues to expect the state universities to provide academic programs of the highest quality, to produce world class, consequential research, and to reach out and engage Florida's communities and businesses in a meaningful and measurable way.

Productivity

Florida must increase the educational attainment levels of its citizens and increase the entrepreneurial spirit of its workforce. To accomplish this, the state universities must respond by becoming more efficient in awarding degrees and focus on improving its portfolio of research and intellectual property to outside investors.

Strategic Priorities for a Knowledge Economy

The Board of Governors acknowledges that simply producing more with greater efficiencies is not inherently strategic, so this plan also has a focus on Strategic Priorities within each of the tri-partite missions that need to be prioritized to better align university outputs with state economic and workforce needs.

The chart below displays nine general goals for the state universities. The 2025 Goals will strengthen quality and reputation and maximize resource utilization to increase productivity in each of the priority areas.

STATE UNIVERSITY SYSTEM GOALS	EXCELLENCE	PRODUCTIVITY	STRATEGIC PRIORITIES
TEACHING & LEARNING	Strengthen Quality & Reputation of Academic Programs and Universities	Increase Degree Productivity and Program Efficiency	Increase the Number of Degrees Awarded within Programs of Strategic Emphasis
SCHOLARSHIP, RESEARCH, & INNOVATION	Strengthen Quality & Reputation of Scholarship, Research, and Innovation	Increase Research Activity and Attract More External Funding	Increase Commercialization Activity
COMMUNITY & BUSINESS ENGAGEMENT	Strengthen Quality & Recognition of Commitment to Community and Business Engagement	Increase Community and Business Engagement	Increase Community and Business Workforce

Teaching and Learning

The Board of Governors believes that high quality teaching and academic programming distinguish the State University System and provide the firm foundation for Florida to build and maintain a nationally preeminent system of public universities. This System Strategic Plan serves as the Board's commitment to enhancing the quality and reputation of the State University System and to focus its academic resources to lead Florida's efforts to expand the state's knowledge and innovation economy.

The Board expects the state universities to increase efficiencies and broaden their use of innovative methods of delivering educational programs, including distance/online learning, inter-disciplinary collaboration, and academic resource sharing. The Board of Governors and universities are committed to a deliberate strategy to increase the number of undergraduate and graduate degrees in STEM and Health disciplines. A general overview of the Board of Governors goals for Teaching and Learning are highlighted below.

Excellence

GOAL: Strengthen Quality and Reputation of the Universities

- Improve the quality and relevance of the System's institutions with regard to state, national, and international preeminence.

Productivity

GOAL: Increase Degree Productivity and Program Efficiency

- Increase access and efficient degree completion for students.

Strategic Priorities for a Knowledge Economy

GOAL: Increase the Number of Degrees Awarded in STEM/Health and Other Programs of Strategic Emphasis

- Increase student access and success in degree programs in the STEM/Health fields and other Programs of Strategic Emphasis that respond to existing, evolving, and emerging critical needs and opportunities. *Note: the list of programs included within the Programs of Strategic Emphasis is not static and will be updated by the Board periodically to reflect the changing needs of Florida's and the Board's priorities. The list was last updated on November 20, 2013.*

Scholarship, Research, Innovation

The component of the State University System's tripartite mission that is unique to universities is the ability of its scholarship, research, and innovation to transform economies and societies.

Through its research programs, the State University System is now playing a critical role in expanding and diversifying Florida's economy. Moving forward, the Board of Governors will work to increase federal and private funding for collaborative research that targets STEM initiatives, and will promote greater opportunities for entrepreneurship and the commercialization of research discoveries to boost production and growth in Florida's businesses and industries.

Specifically, the Board of Governors will more sharply focus the research agenda for the State University System by identifying the research strengths and priorities of each university and by strengthening research collaboration among the universities. The Board expects state university research endeavors to be directly applicable to Florida's most critical challenges and to more directly lead to commercialization, jobs, and new businesses, with a stronger linkage to local, regional, and state economic development entities.

Excellence

GOAL: Strengthen the Quality and Reputation of Scholarship, Research, and Innovation

- Improve the quality and impact of scholarship, research, and commercialization activities.
- Increase undergraduate participation in research to strengthen the pipeline of researchers pursuing graduate degrees.

Productivity

GOAL: Increase Research Activity and Attract More External Funding

- Increase research activities to help foster entrepreneurial campus cultures.
- Attract more research funding from external (includes federal and private) sources.

Strategic Priorities for a Knowledge Economy

GOAL: Increase Research Commercialization Activities

- Increase the number of patents, licenses and start-up companies created as a result of university research.

Community and Business Engagement

A critical component of the State University System's tripartite mission is public service and the commitment of state universities to reach out and engage with Florida's communities and businesses. Community engagement focuses on the collaboration between universities and their larger communities (local, regional/state, national, global) for the mutually beneficial exchange of knowledge and resources in a context of partnership and reciprocity.

The Carnegie Foundation for the Advancement of Teaching encourages colleges and universities that have made community engagement an integral part of their institutional culture to pursue a national "community engagement" classification. In the State University System, seven campuses have achieved this classification and the Board of Governors expects that all state universities will achieve the Carnegie Foundation national "community engagement" classification by 2025.

State university outreach, extension, and engagement, particularly in the areas of government, culture, health care, and public schools, often serve to attract business and industry and spark economic development. The Board of Governors strongly encourages state university students, faculty, and staff to engage in well-planned, mutually beneficial and sustainable community and business partnerships as an integral part of the institutional culture and as a specific component of each university's strategic plan.

Excellence

GOAL: Strengthen the Quality and Recognition of Commitment to Community and Business Engagement

- Improve the quality and relevance of public service activities, and grow the number of institutions recognized for their commitment to community and business engagement.

Productivity

GOAL: Increase Levels of Community and Business Engagement

- Increase faculty and student involvement in community and business engagement activities.

Strategic Priorities for a Knowledge Economy

GOAL: Increase Community and Business Workforce

- Increase the percentage of graduates who continue their education or are employed full-time.

2025 Goals: Performance Indicators

The Board of Governors' 2025 Goals for the State University System express the Board's priorities for the planning period and are framed by the Board's three critical points of emphasis: *Excellence, Productivity*, and *Strategic Priorities for a Knowledge Economy*. The primary components of the state university's tripartite mission: Teaching and Learning, Scholarship, Research, and Innovation, and Community and Business Engagement are emphasized to provide direction to the state universities. The charts that follow display outcome targets for 2025 across a series of metrics on which the Board can monitor the System's progress in addressing the 2025 Goals.

The Board's 2025 System Strategic Plan is not a static document, but will be a living and evolving plan. The Board's goals and performance indicators will continue to be refined during the period of the Strategic Plan, in consultation with the state universities and other stakeholders. To that end, the Board of Governors spent over a year examining its strategic metrics and goals with a view toward adding metrics, eliminating others, and adjusting goals either upward or downward based on the best available trend data. The result of that examination is the revision of this Strategic Plan in 2014.

Each state university's progress toward the attainment of the Board's 2025 Goals will be determined by its unique and distinctive mission, as expressed in its institutional strategic plan and its multi-year work plan. During this period, the Board will work with the universities to establish parallel goals that will align institutional strategic plans with the Board's Strategic Plan and will recognize and reflect each institution's commitment to and participation in the Board's 2025 System Strategic Plan.

Teaching and Learning

PERFORMANCE INDICATORS	2025 GOALS	
	ORIGINAL 2011	REVISED 2014
EXCELLENCE		
1) National Rankings for Universities PBF: NCF	Five universities ranked Top 50 for public undergraduate	1 in Top 10 Liberal Arts 1 in Top 10 Nation 1 in Top 11-25 Nation 2 in Top 25-50 Nation
2) Freshman in Top 10% of Graduating High School Class PBF: NCF	**50%**	**50%**
3) Professional Licensure & Certification Exam Pass Rates Above Benchmarks	All Exams Above Benchmarks	All Exam Pass Rates Above Benchmarks

Teaching and Learning

EXCELLENCE

1.National Rankings for Universities

RATIONALE: Excellence is a difficult thing to quantify and measure which is why university rankings are controversial. Institutions that do well try to benefit from the enhanced prestige with better student recruitment, increased alumni donations and government support. Others challenge the methodology by arguing the complex business of educating students, enabling cutting-edge research, and the many community and business engagement efforts cannot be boiled down into a single number -- Einstein's dictum that not everything that counts can be measured. Despite the arguments against any one ranking publication, the purpose of the Board's decision to consider multiple ranking publications was to better understand the national landscape that the System's universities live within, and to have an external evaluation of how well the universities have carried out their academic responsibilities.
SOURCE: Board staff analysis of various publications.

2.Freshman in Top 10% of Graduating High School Class

RATIONALE: The Top 10% of the high school graduating class provides an indicator of the quality of the incoming First-Time-in-College class. This metric enables universities to consider applications from a wide range of schools so they can have a diverse, yet excellent, student body. It is important to note that not every high school in Florida provides a class rank, so this data is missing for about one-quarter of the System's incoming class. The goal (of 50%) was based on the average of the top tier institutions (n=108) listed in the 2011 US News and World Reports National University rankings that cited 2009-10 Common Data Set data.

Is the 50% goal attainable? Yes. The SUS admits about 35,000 FTICs every Fall, so about 17,500 would need to have graduated in the top 10% of their high school class. Florida's public schools produced 154,000 standard diplomas in 2012-13. So, there were roughly 15,000 students in the top 10% from Florida public high schools alone. This does not even consider the students from Florida's private schools or the out of state students.

SOURCE: University submissions to the Common Data Set.

Teaching and Learning (continued)

3.Professional Licensure & Certification Exam Pass Rates Above Benchmarks

RATIONALE: Licensure & certification exam pass rates are one of the few indicators the measure how well universities are preparing students to enter professional occupations relative. This metric is based on the first-time pass rate, rather than the ultimate pass rate, to get a better sense of how well the program prepared students for their profession. For better context, the university pass rates are compared to the state and national averages for first-time pass rates.
SOURCE: Annual Accountability Reports.

4. Percent of SUS courses bearing a "high-quality" rating in the Florida Virtual Campus online catalog

RATIONALE: As stated in the *2025 Strategic Plan for Online Education*, "quality" has been one of the barriers to the adoption and growth of online education. Strategic goals in the Plan focus on quality practices and encourage universities to adopt these practices. This performance indicator, which is also found in the Plan, will require institutions in the SUS and Florida College System to jointly determine the standards a course must meet to be considered "high-quality," making those courses easily recognized by the designation in the Florida Virtual Campus online catalog.
SOURCE: Florida Virtual Campus online catalog.

PRODUCTIVITY

5. Average Time To Degree

RATIONALE: Traditionally, a bachelor's program required 120 credit hours and was expected to be completed in four calendar years for students enrolled full-time. This metric is similar to graduation rate because both are measuring completion based on time; however time-to-degree is a complement to graduation rates because it approaches the issue from the other-side. Time-to-degree looks backwards from the graduating class to see when the FTIC students first entered the university.

It is important to note that this methodology for this metric has changed since the original goal was set. In 2011, the data and goal were based on the mean average with a start date of the most recent admission. In 2014, this was changed to the median average (to reduce the effect of outliers) with a start date based on the date of first entry. This methodology change lowered the System's time to 4.0 years – or, 48 months. Historical data was re-calculated using the new method, and the System median average has been 48 months for the last six years.

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

Teaching and Learning (continued)

6 & 7. Four- and Six- Year Graduation Rates (for Full- and Part-time FTIC)

RATIONALE: Graduation rates are one of the key accountability measures that demonstrate how well an institution is serving its First-Time-in-College students. Cohorts are based on undergraduate FTIC students who enter the institution in the Fall term (or Summer term and continue into the Fall term) with fewer than 12 hours earned since high school graduation. The initial cohorts are revised to remove students, who have allowable exclusions as defined by IPEDS, from the cohort.

For purposes of making national comparisons, this metric is based only on the FTICs who graduate from the same institution where they started. For the 2008-12 FTIC cohort, the State University System of Florida was ranked 14th among states' public four-year universities with 41% graduating from the same institution that they started.

For the 2006-12 FTIC cohort, the State University System of Florida was ranked 10th among states' public four-year universities with 63% graduating from the same institution that they started. *It is important to note that this metric is based on graduation rates from the same university – another 5% transfer to another SUS institution and graduate from within the System.*

The goals (of 50% and 70% respectively) are based on reaching the highest rates among the states based on the most recently available cohorts.

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

Teaching and Learning (continued)

8. Percent of Bachelor's Degrees Without Excess Hours

RATIONALE: In 2009, the Florida Legislature established an "Excess Credit Hour Surcharge" to encourage students to complete their baccalaureate degrees as quickly as possible. It is important to note that the statutory provisions of the "Excess Hour Surcharge" have been modified several times by the Florida Legislature, resulting in a phased-in approach that has created three different cohorts of students with different requirements. This Strategic Plan metric is based on the latest statutory requirement that mandates 110% of required hours as the threshold. This metric does not attempt to report how many students have actually paid the actual surcharge during the phase-in years, but over time this metric will come to reflect these students more closely.

Due to recent changes in how the excess hour data has been collected, trend data is not available for this metric. The 2025 goal (of 80%) was set to reflect considerable growth from the current level. In 2012-13, 65% of bachelor's recipients did not earn excess hours.

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

Teaching and Learning (continued)

9. Bachelor's Degrees Awarded Annually

RATIONALE: In Fall 2012, the State University System had the second largest undergraduate enrollment in the country, and it is also remains one of the fastest growing over the last five years. Based on continued enrollment growth (for both FTICs and AA Transfers) and improvements in university graduation rates, the number of bachelor's degrees awarded annually was projected to increase to 90,000. It should be noted that the System is still on pace to reach 90,000 degrees awarded (based on 2012-13 data); however, the degree projections in 2014-15 University Work Plans projected a 2016-17 degree total that was behind the 90,000 goal pace.

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

10. Graduate Degrees Awarded Annually

RATIONALE: In 2012-13, the Florida ranked 3rd in the number of graduate degrees awarded by public four-year universities. The 2025 goal (of 30,500) has been lowered from an aspirational goal (of 40,000) to reflect changes in five-year historical growth rates due to declining enrollments at the graduate level.

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

11. Bachelor's Degrees Awarded to African-Americans and Hispanic Students

RATIONALE: This metric provides a sense of student diversity based on the race/ethnicity of the students. This metric is important to the State University System because increasing the educational attainment across all of Florida's demographics is a key to the State's future workforce. This metric is based on the number of bachelor's degrees awarded annually to African-American and Hispanic/Latino students. The 2010 Census for 18-24 year olds shows that Florida's African-American and Hispanic/Latino populations comprise 46% of the State's population. Because of the uncertainties regarding projected enrollments so far into the future, this metric has a dual goal for the overall number of degrees awarded to minorities (20,500 to 35,000) as well as increasing the proportion of degrees awarded to minorities (from 34% to 40%).

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

Teaching and Learning (continued)

12. Number of Adult (Aged 25+) Undergraduates Enrolled

RATIONALE: This metric provides a sense of student diversity based on the age of the student at the time of enrollment (not upon entry). This metric is important to the State University System because Florida's adult educational attainment level is lower than many of the other ten most populous states, which has a negative impact on the economy. Including this metric within the System Strategic Plan recognizes the important role that non-traditional students play in the current and future landscape of postsecondary education.

In Fall 2012, Florida was ranked 4th in the country among public four-year institutions in the number of adult undergraduates enrolled. However, Florida was only 14th in terms of the percentage of adult undergraduates (at 19%). In addition, the SUS has many adults who never completed the bachelor's degree that they attempted - despite many folks who dropped out yet were near completion. The 2025 goal (of 75,000) was based on a trend line that projects 69,000 adult undergraduates enrolled in Fall 2025. Because of the uncertainties regarding projected enrollments so far into the future, this metric has a dual goal of also increasing the proportion of adult undergraduates from 19% to 21%.

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

13. Distance-Learning/Online Metric(s)

RATIONALE: Through the *2025 Strategic Plan for Online Education*, the Board of Governors assumed that the system will continue its rapid growth in online education and established aggressive enrollment targets for 2025, along with strategies for reaching those targets. The Plan is expected to result in improved instruction and increased educational opportunities, leading to a greater number of Florida citizens holding valuable academic credentials and more efficient use of existing campuses.

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

Teaching and Learning (continued)

14. University Access Rate (Percent of Pell Students Enrolled in Fall)

RATIONALE: The Federal Pell grant program provides financial aid to students from poor and working-class families who want to better themselves by earning a college degree. This metric is based on the percent of undergraduates enrolled in the Fall term who received a Pell grant (excludes unclassified and post-baccalaureate undergraduate students not coded as unclassified). The purpose for this metric within the System Strategic Plan is to serve as an 'access' measure - to ensure that the State University System continues to provide opportunities to all levels of the socio-economic strata. The goal is to have every university have at least 30%of their undergraduate students receiving a Pell grant. This goal serves as an 'access' baseline for the State University System in this new era of Performance-Based Funding.
SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

15. Academic Progress Rate (2nd Fall Retention with GPA>=2)

RATIONALE: This metric is based on the percent of FTICs who started their first Fall semester with a full load (12+ credit hours) and who were found retained in the same university the following Fall term with at least a 2.0 Grade Point Average (at the end of their first year) .
This is an alternative metric, to the standard second-year retention rate, and is a much better 'leading indicator' of student success – in fact, FTICs who return for their 2nd fall with a GPA above 2.0 are *eight times more likely to graduate* within six years than students who begin their second Fall with a GPA less than 2. This is one reason why the Board of Governors decided to include this metric into the new Performance Funding Model. The trend line for this metric fairly flat, so the Board has set a goal (of 90%) based on expected improvements resulting from university efforts to respond to the Board's Performance-Based Funding model.
SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

Teaching and Learning (continued)

STRATEGIC PRIORITIES

16 & 18.Bachelor's and Graduate Degrees in Programs of Strategic Emphasis

RATIONALE: This metric is designed to promote the alignment of the State University System degree program offerings and the economic development and workforce needs of the State. The Board of Governors maintains a list of Programs of Strategic Emphasis that were revised in November 2013. This list is comprised of the following four areas: STEM, Health, Education, Global and Gap Analysis. The list of Programs of Strategic Emphasis applies to both bachelor's and graduate degrees.

Because of the uncertainties regarding projections so far into the future, these metrics have a dual goal for both the overall number of degrees awarded as well as the proportion of degrees awarded. The table below provides the 2025 values for both the trend and the goal, the amount of 'stretch' is apparent.

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

	2025 BASED ON HISTORICAL TREND (2007-08 to 2012-13)		**2025 GOAL**	
LEVEL	NUMBER	PERCENT	NUMBER	PERCENT
BACHELOR'S	41,700	48%	45,000	50%
GRADUATE	18,200	60%	18,200	60%

Teaching and Learning (continued)

17 & 19. Bachelor's and Graduate Degrees in STEM and Health

(a subset of the larger Programs of Strategic Emphasis)

RATIONALE: This metric is a subset of the larger Programs of Strategic Emphasis, and was included in the 2011 System Strategic Plan as a separate breakout because it is widely believed that education in Science, Technology, Engineering and Mathematics (STEM) are vital to future of both the nation and the planet. In this 2014 revision of the plan, Health has been added in recognition that healthcare is an especially key component of Florida's current and future workforce. The Board of Governors has decided to combine these two programmatic areas in the revised System Strategic Plan, and have established an aspirational goal in an effort to ramp up the Florida's STEM- and Health-related workforce.

Because of the uncertainties regarding projections so far into the future, this metric has a dual goal for both the overall number of STEM & Health degrees awarded as well as the proportion of STEM & Health degrees awarded. The table below provides the 2025 values for both the trend and the goal, the amount of 'stretch' is apparent.

SOURCE: Board of Governors staff analysis of the State University Database System (SUDS).

	2025 BASED ON HISTORICAL TREND (2007-08 to 2012-13)		**2025 GOALS**	
LEVEL	NUMBER	PERCENT	NUMBER	PERCENT
BACHELOR'S	28,600	33%	30,000	35%
STEM	*19,700*	*23%*		
HEALTH	*8,900*	*10%*		
GRADUATE	14,500	48%	15,200	50%
STEM	*7,900*	*26%*		
HEALTH	*6,600*	*22%*		

Scholarship, Research and Innovation

EXCELLENCE

20. Faculty Membership in National Academies

RATIONALE: One of the highest honors that academic faculty can receive is membership in the National Academy of Sciences (NAS), the National Academy of Engineering (NAE), or the Institute of Medicine (IOM). In 2011, the State University System was ranked 17th among states' public universities - with 38 faculty as members of the National Academies. Based on 10 year historical trends, the SUS is projected to have 49 members in 2023, which is projected to be ranked 15th. The goal (of 75) is to be ranked 5th in the country, which is a considerable improvement that is one of the prime objectives for the preeminent universities. *Note: there is a two-year reporting lag for this data, so 2023 data will be the latest available in 2025.*

Scholarship, Research and Innovation (continued)

21. Faculty Awards

RATIONALE: Faculty Awards in the Arts, Humanities, Science, Engineering, and Health provide a more dynamic and current look at faculty honors than the National Academy members that reflect senior faculty with distinguished careers. In 2011, the SUS was ranked 4th among states' public universities. Based on 10 year historical trends, SUS faculty are projected to receive 75 awards in 2023*, which is projected to be ranked 3rd (assumes other state trends remain stable). The 2025 goal is to maintain the current trend. Note: there is a two-year reporting lag for this data, so 2023 data will be the latest available in 2025.
SOURCE: Center for Measuring University Performance, Top American Research Universities report.

Number of Faculty Awards (Publics only)

	YEAR	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011

SOURCE: Board of Governors staff analysis of Center for Measuring University Performance annual 'Top American Research Universities' report.

22. Percent of Undergraduate Seniors Assisting in Faculty Research or Percent of Undergraduates Engaged in Research

RATIONALE: This is a new metric that addresses the emerging role that research plays in the undergraduate curriculum. This is aligned with the NSF's goal of integrating research and education. Many institutions use a variation of the broad definition provided by the Council on Undergraduate Research (CUR). The University of California System reports undergraduate research data based on their senior exit survey.
SOURCE: This data is not currently quantified at the System-level or nationally -- Board of Governors staff are investigating what data is available that can address this goal.

Scholarship, Research and Innovation (continued)

PRODUCTIVITY

23. Total Research & Development (R&D) Expenditures

RATIONALE: R&D expenditures are the primary source of information on academic research and development (R&D) expenditures in the United States. In FY2011-12, the SUS was ranked 5th among states' public universities. The global economic downturn has slowed the historical trends that were previously used to set the initial 2025 goal. However, Florida's recent annual growth rate (of $31M) is much lower than the top ten state average annual growth (of $98M). Therefore, the 2025 goal intends to reverse the State University System recent decline and project an annual growth rate of $40M. The 2014-15 University Work Plans projected a $24M annual growth rate for the next five years (or, $2.07B in 2024-25).

	NATIONAL TRENDS (2009-12)			STATE UNIVERSITY SYSTEM TRENDS			
	TOP 5 STATES	TOP 10 STATES	50 STATES	ORIGINAL GOAL 2001-09 TREND	RECENT TREND 2009-13	2014-15 WORK PLANS PROJECTIONS	REVISED GOAL
ANNUAL GROWTH	$115M	$98.5M	$32.5M	$100M	$31M	$24M	$40M
2025 GOAL	$3.26B	$3.05B	$2.17B	$3.25B	$2.16B	$2.07B	$2.29B

The Board's goal is slightly higher than the System's recent annual growth rate (of $31M) in recognition of the following issues: (1) new joint effort among SUS Vice Presidents of Research to engage in collaborative research that should be more competitive for Federal grants; (2) the tragic 2010 oil spill in the Gulf of Mexico has caused an increase in the funds available to universities to research impacts on the Gulf and its restoration; (3) the on-going maturation of three new medical schools.
SOURCE: National Science Foundation, Annual Higher Education Research and Development Survey.

Scholarship, Research and Innovation (continued)

24. Percent of R&D Expenditures funded from External Sources

RATIONALE: This metric reflects the ability of SUS institutions to win competitive grant funding from external sources (defined by NSF as from Federal, Private Industry and Other). The Board of Governors included this metric in the System Strategic Plan, because in FY2008-09, Florida was last among the Top 10 states (for public universities) in the percentage of R&D expenditures that were funded externally (with 59%). In FY2012-13, Florida still only received 59% of funding from external sources, while the top 10 average was 71% (up from the 67% in FY2008-09). The Board has decided to revise the 2025 goal so that it equals the top 10 average of 71% in FY2011-12.

SOURCE: National Science Foundation, Annual Higher Education Research and Development Survey.

STRATEGIC PRIORITIES

25. Number of Patents Awarded Annually *(in a Calendar Year)*

RATIONALE: An important aspect of university research is protecting any new Intellectual Property (IP) that results from the research. The overall number of patents awarded in a Calendar year is a general, but valuable, measure of the amount of IP that a university produces and chooses to protect. It is worth noting that when the Florida Legislature created the Preeminence metrics, they only included utility patents in their patent metric definition. The SUS has annually increased the number of patents awarded annually by 35 for the past five years; however, Board staff have used a more conservative growth factor (of 10) based on the 2012 to 2017 projections made in the 2014-15 Work Plans. The System goal is to produce 410 patents during the 2024 calendar year.

SOURCE: Board of Governors staff analysis of US Patent Office data.

Scholarship, Research and Innovation (continued)

26. Number of Licenses and Options Executed

RATIONALE: Another important measure of university research tracks the movement of IP from the lab to the marketplace. Universities make money from patents primarily by licensing them to outside companies, which turn them into commercial products. The overall number of licenses (and options) that have been executed annually provides a measure of the entrepreneurial nature of the university. Based on the historical trend (from 2004 to 2012), the SUS has annually increased the number of new licenses executed by 20 every year; however, given the annual volatility in this metric, Board staff have used a more conservative growth factor (of 5) and project that the System will produce 270 licenses during the 2024-25 year.
SOURCE: Annual Accountability reports.

27. Number of Start-Up Companies Created

RATIONALE: In addition to licensing Intellectual Property, sometimes it is more effective to commercialize research via a small, start-up company that is founded by, or has a close relationship, with university faculty. Many universities foster this entrepreneurial path of research commercialization with the creation of business incubators. In 2011-12, the State University System created a record 30 new start-up companies, which is 12 more than created in 2008-09. There is really no trend line that can support a reasonable prediction for this metric, so Board staff have set the goal to essentially grow one additional startup per year - this would result in about 40 by 2024-25.

SOURCE: Annual Accountability Reports

Community and Business Engagement

EXCELLENCE

28. Number of Universities with the Carnegie Foundation's Community Engagement Classification

RATIONALE: Community engagement describes collaboration between institutions of higher education and their larger communities (local, regional/state, national, global) for the mutually beneficial exchange of knowledge and resources in a context of partnership and reciprocity. The purpose of community engagement is the partnership of college and university knowledge and resources with those of the public and private sectors to enrich scholarship, research, and creative activity; enhance curriculum, teaching and learning; prepare educated, engaged citizens; strengthen democratic values and civic responsibility; address critical societal issues; and contribute to the public good.

The classification for Community Engagement is an elective classification, meaning that it is based on voluntary participation by institutions. The elective classification involves data collection and documentation of important aspects of institutional mission, identity and commitments, and requires substantial effort invested by participating institutions. It is an institutional classification; it is not for systems of multiple campuses or for part of an individual campus. The classification is not an award. It is an evidence-based documentation of institutional practice to be used in a process of self-assessment and quality improvement. The documentation is reviewed to determine whether the institution qualifies for recognition as a community engaged institution.

The Community Engagement Classification takes place on a five-year cycle. The last time institutions received the classification was in 2010. 2015 is the next opportunity for classification. Because the classification requires gathering and providing evidence of community engagement by a campus through an application, the process begins two years prior to the classification date. For example, for the 2020 classification cycle (classified campuses announced in January of 2020) the applications will be available in the spring of 2018.

SOURCE: Annual Accountability Reports and the Carnegie Foundation for the Advancement of Teaching.

Community and Business Engagement (continued)

STRATEGIC PRIORITIES

29. Percentage of Baccalaureate Graduates Continuing their Education or Employed

RATIONALE: It has always been difficult to quantify the journey of higher education graduates as they transition into the workforce. The Board of Governors included this metric in this 2011-2025 Strategic Plan to focus the System's efforts in better understanding this period of transition. Specifically, the intent of including this metric was to increase the percentage of graduates who continue their education or are found employed. In addition, it was expected that this effort would serve to better inform students about how previous graduating classes faired when they entered the workforce. In 2013 and 2014, this metric gained further importance to policymakers due to its inclusion in the new Performance Funding Models that were created by the Legislature, Governor's Office and the Board of Governors.

The metric used in Performance Based Funding in 2014 was defined as the percentage of recent baccalaureate graduates who are either employed full-time in Florida (based on the Florida Education and Training Placement Information Program [FETPIP] data) or continuing their education in the U.S. (based on the National Student Clearinghouse data). Board staff are working with FETPIP to also include non-Florida employment data for this metric in future years.

The goal (of 90%) reflects the Board's dedication to improving the employment and educational outcomes for the State University System students.

Note: The apparent drop in actual data is due to a correction in the methodology. The original data incorrectly double-counted graduates who were found both employed and enrolled.

SOURCE: Board of Governors staff analyses of data from: Florida Education and Training Placement Information Program (FETPIP), National Student Clearinghouse (NSC), the Wage Record Interchange System (WRIS2), and the Federal Employment Data Exchange System (FEDES) - which includes the US Office of Personnel Management (OPM); the Department of Defense, Defense Manpower Data Center (DMDC).

Performance Funding Metrics

Post-Graduation Data

(Percent Employed or Enrolled & Average Salary)

Overview of Methodology and Procedures

REVISED 04/28/2016

STATE UNIVERSITY SYSTEM *of* FLORIDA

Board of Governors

PERFORMANCE FUNDING METRICS

POST-GRADUATION DATA

METHODOLOGY & PROCEDURES

04/28/2016

The Board of Governors included a post-graduation metric goal in its State University System 2012-2025 Strategic Plan that was approved in 2011. Since then, the Board of Governors created a new Performance-Based Funding Model that included two post-graduation metrics that have further elevated their importance. This document provides details on the methodology and procedures used by Board of Governors staff during the development and analysis of the post-graduation data that is reported in the annual Accountability Reports and used in the Performance-Based Funding model.

1. Defining the Post-Graduation Cohort

The State University System of Florida Board of Governors (BOG) maintains a student unit record database titled the State University Database System (SUDS). This database contains over 400 data elements about students, faculty, and programs at SUS institutions. This metric is based on the data that universities submit to the Board office as part of the Degrees Awarded table on the Degrees Awarded (SIFD) file submission[1].

a. Board staff query SUDS to identify all students who earned a bachelor's degree during the academic year – includes graduates from the summer, fall, spring terms.

b. These graduates serve as a 'post-graduation cohort' that is used to track a particular group of students forward. This dataset is comprised of one record per bachelor's recipient. Note: The number of rows reflects the headcount number of baccalaureates, which will not match published counts of degrees awarded because one student can earn multiple degrees.

c. Note about duplicates: Students who receive a bachelor's degree from two separate SUS institutions during the same academic year are included in both institutions' cohorts.

2. Collecting Post-Graduation Data

Florida Board of Governors staff collect enrollment and employment information about State University System of Florida students from three sources: the National Student Clearinghouse (NSC), the Florida Education and Training Placement Information Program (FETPIP) division within the Florida Department of Education, and the State University System institutions.

a. National Student Clearinghouse (NSC) Data Match

- In compliance with FERPA and other applicable laws, the Board's Institutional Research (IR) staff sends student-level data to NSC StudentTracker staff in a file that includes the following 8 columns: first, middle, last names, suffix, date of birth, school code, search date, and a requestor return field.
- NSC requires that data be submitted to them in a particular format. For example, they require an YYYYMMDD date format from which they start the search for a particular individual – known as the Search Date. Since SUDS data only shows the term of graduation, IR staff transformed the graduation date to the last day of the month of the degree term to serve as a start date for the post-graduate search. So, for those who graduated in the spring term, we use the date YYYY0531 (for May 31). Similarly, for the summer and fall terms, we use the dates YYYY0831 (for August 31) and YYYY1231 (for December 31) respectively.
- NSC staff match the students on four criteria (first, middle, last names, and date of birth) and add enrollment and graduation records to the original dataset that we provided to NSC.
  - *Note: Social Security Numbers are not used during the NSC match process.*
- Due to limitations in the NSC data, the continuing enrollment data includes any enrollment the following year regardless of whether the enrollment was post-baccalaureate or not.
- As a quality assurance step, Board staff send two identical, yet separate, files to NSC for enrollment matching. If a discrepancy is found in the return results, a third matching request will be sent.

[1] The SUDS Data Dictionary has detailed definitions for the 21 elements included within the Degrees Awarded table and is available at: https://prod.flbog.net:4445/pls/apex/f?p=112:50:5018573689494::NO::P50_ROW_DISPLAY_COLUMNS:50.

[2] For more information about the National Student Clearinghouse, visit their website at: http://www.studentclearinghouse.org/.

b. Florida Education and Training Placement Information Program (FETPIP Data) Match

FETPIP was created by the Florida Legislature to compile, maintain, and disseminate information concerning the educational histories, placement and employment, enlistments in the United States armed services, and other measures of success of former participants in state educational and workforce development programs – see Florida Statutes, 1008.39.

- FETPIP matches student Social Security numbers to wage records that are collected as part of the Unemployment Insurance (UI) data. The UI employment data does not include individuals who are self-employed, temporarily employed, employed by a church or association of churches, employed by the military or federal government, or those without a valid Social Security number.
- FETPIP staff are also able to access U.S. Office of Personnel Management wage records for Federal civilian employees via the Federal Employment Data Exchange System (FEDES) pilot project sponsored by the U.S. Department of Labor and staffed by The Jacob France Institute at the University of Baltimore.
- FETPIP staff are able to access non-Florida wage records via the Wage Record Interchange System version 2 (WRIS2)[4]. This voluntary data sharing system allows participating states to share Unemployment Insurance (UI) wage records to calculate aggregate outcomes for select people.
  - Note: reporting individual level data is prohibited by the WRIS2 data sharing agreement.
  - As of February 2016, forty-one states, the District of Columbia, and Puerto Rico were members of the WRIS2 data sharing agreement. Note: Georgia data was not yet available as of the end of April.

c. State University System Institutions

- The State University System of Florida is dedicated to serving the military with over 10,000 students receiving military benefits annually. Unfortunately, Board staff are not able to access employment wage records via the Defense Manpower Data Center (DMDC).
- Board staff ask each university to self-report the number of ROTC Graduates who enter the military following graduation. For documentation purposes, universities should use 'Certificates of Commission' records (for example, 'DD Form 1AF' or 'AF Form 133' in the Air Force), or the Defense Manpower Data Center (free batch file matching services), to serve as documentation for these headcounts.

[3] For more information about FETPIP, visit the Florida Department of Education website at: http://www.fldoe.org/fetpip/.
[4] For more information about WRIS2, visit the U.S. Dept. of Labor website at: https://www.doleta.gov/performance/wris2.cfm.

3. Data Analysis

The enrollment and employment data matching processes typically identify post-college outcomes for about 90% of the State University System's baccalaureate cohort. It is important to note that people without employment data should not be interpreted as indicating there were unemployed. Again, the UI employment data does not include individuals who are self-employed, temporarily employed, or those without a valid Social Security number.

a. Board Staff Analysis of NSC Data

- **Defining One Year After Graduation**

  Board staff assessed all NSC records to determine whether the student had enrolled again anywhere in the United States within 14 months (or, 426 days) of the baccalaureate degree being awarded - so 'BEGIN DATE' was less than 426 days after the 'SEARCH DATE'.

- **Multiple Records**

  The data received from the NSC match typically contains multiple records per student. It was necessary to 'clean' the data by removing duplicate records for the same student. Only the duplicate enrollment records were deleted, so that only one record per individual was kept. If the NSC didn't find any particular individual, then that student had only one record (row) in the data – with no enrollment data. After the IR unit finished this de-duplication step, the total number of rows was equal to the number included in the original file produced by IRM staff.

b. Board Staff Analysis of FETPIP Data

Board staff do not have access to student-level employment data that includes non-Florida data, so the employment data that Board staff receive from FETPIP is aggregated. Board staff provide FETPIP with a report template(s) and FETPIP enters the data into template(s). This means that FETPIP is directly responsible for the quality assurance work of the employment data, and limits Board staff's ability to respond to additional stakeholder questions in a timely manner.

1. Defining One Year After Graduation

Board staff aligned academic semesters and fiscal quarters in order to define one year after graduation – see Table 1 below. The students who graduate in the spring and summer semesters enter the workforce in the middle of a fiscal quarter, so these graduates are given a fifth fiscal quarter – see tables 1 & 2 below.

Table 1. Alignment of Semesters and Fiscal Quarters

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEPT	OCT	NOV	DEC
SPRING SEMESTER					SUMMER SEMESTER			FALL SEMESTER			
1st Fiscal Quarter			2nd Fiscal Quarter			3rd Fiscal Quarter			4th Fiscal Quarter		

Table 2. Graduating Term and Fiscal Quarters after Graduation

Graduating Term	FISCAL QUARTERS AFTER GRADUATION				
	1st	2nd	3rd	4th	5th
SUMMER	FQ-3	FQ-4	FQ-1	FQ-2	FQ-3
FALL	FQ-1	FQ-2	FQ-3	FQ-4	
SPRING	FQ-2	FQ-3	FQ-4	FQ-1	FQ-2

Note about Fiscal Quarters: FQ1=Jan-Mar; FQ2=Apr-Jun; FQ3=Jul-Sep; FQ4=Oct-Dec.

2. Defining ‘ Full-Time W orker’

Florida law requires the Florida Department of Economic Opportunity to calculate a minimum wage rate each year. The annual calculation is based on the percentage increase in the federal Consumer Price Index for Urban Wage Earners and Clerical Workers in the South Region for the 12-month period prior to September 1 each year. [5]

For the purposes of the Board’s post-graduation employment data, full-time employment is measured as an annualized wage that’s greater than or equal to the annualized minimum wage for that year. The annual minimum wage equals the hourly minimum wage times 2,080 hours (52 weeks times 40 hours per week).

Table 3. History of Full-time Wage Thresholds

Calendar Year	FL Min. Wage	Annualized	Bachelor's Cohort
2011	$7.31	$15,205	2010-11
2012	$7.67	$15,954	2011-12
2013	$7.79	$16,203	2012-13
2014	$7.93	$16,494	2013-14

3. Defining a W age Threshold to ReflectAdded V alue of B accalaureate Degree

The Board of Governors asked staff to determine an alternate measure of labor market success for SUS graduates that was higher than just a proxy ‘full-time’ threshold. Board staff analyzed the 2016 U.S. Census Bureau’s Annual Social and Economic Supplement to the Current Population Survey (using a 2012 to 2014 three-year average) and found that the median personal income of a 25-29 year old full-time worker in Florida with a High School Diploma was $25,000 – see table 4 below. This represents the income of someone who decided to work instead of pursue a bachelor’s degree, which suggests a logical place to compare with a bachelor’s recipient income as an measure of the *immediate* impact of the university on their income.

Table 4. Median Personal Income of Florida's Full-Time Workers by Educational Attainment and Age (2012 to 2014)

AGE	NO HIGH SCHOOL DIPLOMA	HIGH SCHOOL DIPLOMA	SOME COLLEGE, LESS THAN 4YR DEGREE	BACHELOR'S DEGREE OR HIGHER	TOTAL
18 to 24	$15,000	$17,420	$20,000	$32,000	$20,000
25 to 29	$19,100	$25,000	$29,010	$42,000	$31,000
30 to 34	$20,000	$28,200	$35,000	$53,000	$39,650
35 to 44	$20,002	$30,000	$40,000	$60,000	$41,130
45 to 54	$25,000	$30,020	$40,830	$60,000	$42,000
55 to 64	$22,000	$39,000	$43,000	$62,000	$46,370
65 to 80+	$25,820	$38,160	$50,140	$75,000	$49,730
TOTAL	$20,160	$30,000	$37,500	$56,000	$40,000

c. Board Staff Analysis of University Data

Universities provide an aggregate total number of headcounts per year in response to Board staff's data request. Board staff add this military headcount number to the total enrolled and/or employed counts from the other sources. Note: Because this data is not provided at the student level, there is a possibility that a small number of individuals *may* be counted twice (in the employment/enrollment data and in the military headcount).

Board staff provide special consideration for New College of Florida due to the small size of their graduating cohorts. Board staff ask for the university to provide a detailed list of the overseas scholarships that any of the students in the graduating cohort received.

4. Using Outcomes

The Performance-Based Funding Model

The Board of Governors includes two metrics that are related to post-graduation outcomes in the Performance-Based Funding (PBF) model: (1) the percent employed or enrolled one year after graduation, and (2) the median wage for those employed full-time. At their January 2016 meeting, the Board of Governors decided to raise the wage threshold for the first PBF metric from the 'full-time' threshold to $25,000.[6]

a. Identifying the Percentage Enrolled or Employed Earning at least $25,000

FETPIP staff provide the data in the format that Board staff requested – this includes data for each university that identifies the headcounts from the graduating cohort for the following:

1. total number of graduates in cohort,
2. total number of graduates in cohort found enrolled in year1,
3. total number of graduates in cohort with invalid SSNs that were not found enrolled in year1,
4. total number of graduates in cohort found employed at the full-time threshold in year1,
5. total number of graduates in cohort found enrolled or employed at the full-time threshold in year1,
6. total number of graduates in cohort found enrolled or employed at the $25,000 threshold in year1,

Board staff compare the data in columns 1&2 to the dataset that was provided to FETPIP. If outputs agree with inputs, Board staff then add the supplemental information received from the universities regarding their graduates who enter the military (and NCF's overseas scholars), as column 7.

The percentage enrolled or employed is based on the numerator (column6 + column7) divided by the denominator (column1 – column 3).

b. Identifying the Median Wage

This metric is designed to reflect the median average wage for graduates within the first year of graduation. The median was used instead of the mean so that outliers did not skew the average. In recognition that many graduates are both employed and continuing their education, the focus for this metric is on those graduates who earned more than a full-time worker making minimum wage. So, the wages of part-time employed are not included in this data.

FETPIP provides Board staff with student-level employment data (only for Florida wages). Board staff query each student's wages a year following graduation and Board staff calculate the median for each university.

[6] The $25,000 threshold gained national prominence as one of the key metrics in the U.S. Department of Education's 2015 release of the College Scorecard website.

The Graduate Follow-up Study

This post-graduation data is used by Board staff to produce graduate follow-up studies. These reports provide additional insights into the outcomes of baccalaureate degree recipients as they transitioned into jobs or as they pursued further education. To this end, the studies answer the following primary questions:

1) Do graduates get jobs in Florida?
2) Are graduates pursuing further education? Do they complete additional credentials?
3) To what extent are graduates enrolled in further education while working?
4) What are the starting salaries of graduates working in Florida? How much do they increase over time?

The answers to these questions provide critical information to students, parents, educators, and policy-makers about the experiences of graduates after they complete baccalaureate degrees. The report does not represent the experiences of graduates for whom post-graduation activities are unknown; rather it depicts those outcomes that are known – known outcomes – as a result of the data matching process. Missing data cannot be interpreted as unemployed or not enrolled. Additional information about the limitations of the data sources and the methodology are available in the reports.

Reports are available from http://www.flbog.edu/forstudents/gfs/.

Performance Funding Metrics

Cost To The Student:

Net Tuition & Fees Per 120 Credit Hours

OVERVIEW OF METHODOLOGY AND PROCEDURES

1/21/2017

STATE UNIVERSITY SYSTEM *of* FLORIDA
Board of Governors

Performance Funding Model Background

The Performance Based Funding (PBF) model was approved at the January 2014 Board of Governors Meeting. The development of the model included university presidents, provosts, boards of trustees, and other stakeholders starting in the fall of 2012. The PBF model includes ten metrics that were chosen from the Board's 2025 System Strategic Plan.

The integrity of data provided to the Board of Governors is critical to the PBF model process. To provide assurance that the data submitted for this process is reliable, accurate, and complete, the Board of Governors developed a Data Integrity Certification process in June 2014. University presidents and boards of trustees were directed to task their chief audit executives to perform annual audits of the university's processes, which ensure the completeness, accuracy, and timeliness of data submissions to the Board of Governors.

Cost per Degree Metric Background

The original Cost per Bachelor's Degree focused on the Cost to the Institution and was derived from university Expenditure Analysis reports. During the June 2015 Budget and Finance Committee meeting, Governor Kuntz indicated that the Board would take suggestions for a possible alternative methodology that would enhance how the Cost of a Bachelor's Degree was calculated. Board staff convened multiple conference calls with university representatives and included a face-to-face workshop meeting on March 29, 2016, which was attended by Board Chair Kuntz and Budget Chair Lautenbach to hear university proposals for alternative metrics. After reviewing all the proposals, the Board decided to use a Cost to the Student metric that was largely based on a 2013 report from the Cost-per-Degree Workgroup.[1]

This document provides details on the methodology and procedures used by Board of Governors staff to calculate the Cost to the Student: Net Tuition & Fees per 120 Credit Hours metric that was approved by the Board at its November 3, 2016 meeting.[2] The data for this metric is reported in the annual Accountability Report (Table 1D) and included within the PBF model as metric #3.

[1] The 2013 report, *Cost of a Degree to the Student, the State & the Institution*, is available at: http://www.flbog.edu/about/budget/docs/cost_per_degree/Cost-Per-Degree-Report-FINAL-06-03-2013.pdf.

[2] The November Board meeting includes an FAQ document that addresses many questions about the new metric and is available at: http://www.flbog.edu/documents_meetings/0202_1033_7800_7.4.4%20BUD%2004c%20-%20Metric3_FAQ__JJ_2016-10-11.pdf.

1. Data Sources and Procedures

The State University System of Florida Board of Governors maintains a student unit record database titled the State University Database System (SUDS). This database contains over 400 data elements about students, faculty and programs at SUS institutions. It is important to note that SUDS does not include student tuition, fee, or book payments, so this 'Cost to the Student' metric is based on a model that serves as a reasonable estimate of the costs to the student.

The Board of Governors' Information Resource Management (IRM) unit builds datamarts that the Institutional Research (IR) staff use to calculate this metric. The datamarts are essentially the same data that is submitted to SUDS by the universities, except that IRM staff replace the student's Social Security Number (SSN) with a new unique ID that IR staff use in the analysis. IRM staff perform a series of quality assurance validation steps before providing IR staff with datamarts.

The datamarts used for this metric are built from the following SUDS files: Student Instruction File (SIF), Student Financial Aid File (SFA), and the Hours to Degree (HTD) file. Once IR staff have finished their analysis, each university Data Administrator leads the university review of the data analysis to make sure it is accurate before the data is approved by each university board of trustees and the Board of Governors as part of the Accountability Report process.

2. Overview

The 'Sticker Price' is the published tuition and fee amount; however, it does not represent the actual amount of tuition paid by most students. Students actually pay the 'net tuition' amount, which is the amount of tuition and fees that remain *after* financial aid has been taken into account.

3. Sticker Price

The sticker price refers to the sum of the published tuition and required fees amount per credit hour and the national average cost for books and supplies. Because this metric represents the cost of a degree, each institution's sum of tuition, fees, books and supplies is multiplied by the average number of credit hours attempted by students for the most recent class of bachelor's recipients who started as first-time-in-college students (FTICs) and graduated from a program that requires only 120 credit hours. This method recognizes that a student who enrolls in more credit hours pays more for tuition, fees and books.

a. Tuition and Required Fees:

The per credit hour tuition rate is established annually by the Florida Legislature in the General Appropriations Act (GAA). The Cost to the Student metric is based on the tuition rate for resident undergraduates and required fees (e.g., activity & service, transportation, health, technology, capital improvement, tuition differential, etc.) that have been approved by the Board of Governors at the request of the university boards of trustees. The tuition and fees used for this metric are available at: http://www.flbog.edu/about/budget/current.php.

b. Books & Supplies:

Textbook affordability is a concern of the Florida Legislature, the Governor, the Board of Governors and students. Board staff chose to use a national cost for books and supplies, as reported annually by the College Board,[3] as a proxy due to the lack of comprehensive data regarding book costs across the multiple sources used by students to acquire their course materials.

- The calculation of book costs is based on the costs for a 120-hour degree. The College Board's national average book cost is based on annual costs, so the average annual cost is multiplied by 4 to produce the book costs for a four-year, 120-hour degree. This new cumulative four-year cost amount is then divided by 120 to produce a 'per credit hour' cost amount.
- Due to the annual volatility of the national estimated costs for books and supplies, Board staff have decided to use the same data for book costs for the two years that are evaluated within the PBF model. This serves to standardize the book costs for the year-over-year improvement assessment.

c. Total Hours Attempted:

The average number of credit hours attempted by students who were admitted as FTIC and who graduated with a bachelor's degree from a program that requires 120 credit hours, as reported on the Hours to Degree (HTD) file.

- Native Credits: Includes all credit hours attempted at the state university from which the student received a baccalaureate degree, which is based on the sum of SECTION_CREDIT [#1459] when CRS_SYSTEM [#1484] = 'N--native'. Native credits include all failed, dropped, repeated, and withdrawals.
  - Board of Governors staff have clarified that graduate-level credit that is attempted for completion of a baccalaureate degree is included in the Cost to the Student metric. However, if graduate credit is attempted as part of a (3+2 or 4+1) dual bachelor's/master's degree, where the credit applies to both the undergraduate and graduate requirements, then it should be considered graduate degree coursework and is therefore excluded from the Cost to the Student metric. The exempted credits are based on the sum of SECTION_CREDIT [#1459] when COURSE_GROUP [#1485] = 'R'.
- Non-Native Credits Used Toward the Degree: Includes only the credit hours (sum of SECTION_CREDIT [#1459]) that are accepted for transfer by the degree-awarding institution (CRS_SYSTEM [#1484] <> 'N--native') and used toward the student's baccalaureate degree program (USAGE_INDICATOR [#1489] = 'D'). Transfer credits that were not used toward the degree are excluded from the calculation of total hours.
- Excluded credit hours: It is important to note that the courses that are excluded for the calculation of total hours for the Cost to the Student metric are slightly different than the methodology used to calculate the Excess Hours PBF metric. This difference is due to the fact that students pay for some courses (e.g., internships, remedial, and foreign language (up to 12 credits that are used to satisfy the FTIC admission requirement) that are exempt from the excess hours calculation. See Table 1 for the comparison of which course credits are included for the two metrics.

[3] The College Board's *Trends in College Pricing* report (Average Estimated Full-Time Undergraduate Budgets, Figure 1), that is based on their Annual Survey of Colleges for public four-year institutions, is available at: https://trends.collegeboard.org/college-pricing.

Table 1. Comparison of Excluded Course Categories	
EXCLUDED FROM EXCESS HOURS	EXCLUDED FROM COST TO THE STUDENT
ACTIVE DUTY MILITARY	ACTIVE DUTY MILITARY
DUAL ENROLLMENT	DUAL ENROLLMENT
EXAM CREDIT	EXAM CREDIT
FOREIGN LANGUAGE	
GRADUATE ROLLOVER	GRADUATE ROLLOVER
INTERNSHIP	
LIFE EXPERIENCE	LIFE EXPERIENCE
MILITARY COURSE	MILITARY COURSE
PERSONAL HARDSHIP	PERSONAL HARDSHIP
REMEDIAL	

4. Financial Aid

Financial aid is an administrative tool for achieving federal, state and institutional goals. Financial aid is used by universities to offset the published tuition (or sticker) price as a way to recruit students based on merit and/or to change campus diversity. The "Cost to the Student" metric includes all the gift aid (e.g., scholarships, grants and waivers) awarded to resident undergraduates in a given academic year. The total gift aid is then divided by the total credit hours earned by that same group of resident undergraduates during the same academic year. This methodology provides an average gift aid per credit hour that is then multiplied by 120 credit hours and compared to the sticker price. It is worth noting that federal 'education tax credits' are not collected within SUDS are therefore not included in the data for the Cost to the Student metric. Therefore, this metric slightly over-estimates the total costs to students.

a. Resident Undergraduates:

The only financial aid data that is included in this "Cost to the Student" metric are funds that were awarded to resident undergraduate students (FEE CLASSIFICATION [#1106] = 'F', 'R', 'T' and STUDENT CLASS LEVEL [#1060] = 'L','U'). This group of students is selected from the enrollments table by academic year and then matched to the financial aid awards table and the courses taken table using a "left join" merge procedure that includes the academic term. Including "term" in the match ensures that the resulting gift aid and credit hours do not include data for graduate students (as some undergraduates become graduate students within the same academic year).

b. Grants & Scholarships:

Grants and scholarships are often called "gift aid" because they are free money—financial aid that doesn't have to be repaid. Grants are often need-based, while scholarships are usually merit-based. Grants and scholarships can come from the federal government, state government, university, or a private or nonprofit organization. Gift aid does not include loans or Florida Prepaid College Plans.

- All grants are included (Financial Aid Award Program Identifier [#1253] between '0 – 99').
- All scholarships are included (Financial Aid Award Program Identifier [#1253] between '200 – 299').[4]

[4] For the first year of reporting, universities that did not include the 'Education Dollars for Duty' awards in their annual Student Financial Aid file (SFA) were asked to provide BOG IR staff with the EDD amounts by term, so these funds could be manually added to the scholarship totals. The Education Dollars for Duty (EDD) scholarship program is administered by the Florida Department of Military Affairs – see Section 250.10, Florida Statutes, for more information.

c. Waivers:

A waiver is a form of "gift aid" that allows for a portion of a student's tuition and fees to be reduced. Using the same methodology as grants and scholarships, the total waivers awarded to resident undergraduates during an academic year are calculated. BOG staff worked with university Data Administrators and Financial Aid Directors to resolve any questions about the waiver data calculated for any university.

- Note: BOG staff are working with university staff in an effort to improve how waivers are reported in SUDS.

d. Credit Hours:

The total credit hours attempted by the group of resident undergraduates during the academic year are included as a denominator in order to calculate the total gift aid amount per credit hour. All credit hours, regardless of the course budget entity, are included. The only exception is for courses which are taught at the institution reporting the credit but are funded through another SUS institution (STU_SECTN_FUND_CD= A-I, K). It should be noted that credit hours are based on student-level (not course-level), so any credit hours attempted at the graduate level by students coded as undergraduates are included in the count.

Performance Funding Metrics
Retention and Graduation Rates

Overview of Methodology and Procedures

REVISED 04/24/2019

STATE UNIVERSITY SYSTEM *of* FLORIDA
Board of Governors

Background

The national standard graduation rate was created by the Student Right to Know Act of 1990, which required institutions of higher education receiving federal financial assistance to report graduation rates to current and prospective students via the US Department of Education's Integrated Postsecondary Education Data System (IPEDS). This act established the graduation rate for first-time in college (FTIC) students based on 150% of the normal time for completion from the program - which is six years for a four-year program.

In 2011, the Board of Governors included retention and graduation rate metrics in its 2012-2025 System Strategic Plan. In 2014, the importance of the retention and graduation rate data was further elevated by their inclusion in a new Performance-Based Funding (PBF) Model. In 2018, the Florida Legislature changed the graduation rate metric included in PBF from a six-year to a four-year measure. This document provides details on the methodology and procedures used by Board of Governors staff during the analysis of the retention and graduation rate data as reported in the annual Accountability Plan and used in the Performance Based Funding model.

1. Overview of Data Sources & Procedure

The State University System of Florida Board of Governors maintains a student unit record database titled the State University Database System (SUDS). This database contains over 400 data elements about students, faculty and programs at SUS institutions. Retention and graduation rate data are finalized using the Retention submission. The Board's Office of Data & Analytics (ODA) unit builds the Retention file annually using data from the Admission (ADM), Student Instruction File (SIF) and the Degrees Awarded (SIFD) submissions that have been previously submitted by Institutional Data Administrators. Once Retention has been built, each Institutional Data Administrator reviews the Retention data and works with ODA staff to make edits before Institutional Data Administrators approve and submit the final data to ODA. After universities have approved the Retention submission, the Board's ODA staff analyze the number of students in a cohort (which serves as the denominator) and the number of those same students who are retained or graduated by a specified year (which serves as the numerator). ODA staff then provide the results of the retention and graduation rate data analysis to each Institutional Data Administrator for their review and approval prior to the data being shared with, and approved by, each university Board of Trustee and the Board of Governors as part of the Accountability Plan process.

2. Defining the Cohort

A cohort is a group of people used in a study who have something in common. In this case, a cohort is composed of students who were all admitted to the university during the same year. The number of students who are assigned to a cohort serves as the denominator in the calculation of retention and graduation rates. Institutional Data Administrators classify students based on the following components which Board staff use to determine student cohorts:

a. Student Level:

Only the students who meet the following criteria are included in the cohort.

- STUDENT CLASS LEVEL [#1060] is either L (lower division undergraduate) or U (upper division undergraduate).
- DEGREE HIGHEST HELD [#1112] must be less than a Bachelor's.
- FEE CLASSIFICATION KIND [#1107] must equal 'G' (general instruction).

b. Cohort Year:

A retention cohort year is defined as the summer, fall, and spring terms when DATE MOST RECENT ADMISSION [#1420] equals REPORTING TIME FRAME [#2001].

COHORTS	RECENT ADMIT DATE		
	SUMMER	FALL	SPRING
2016-2017	201605	201608	201701
2017-2018	201705	201708	201801
2018-2019	201805	201808	201801

Cohort Types:

The COHORT TYPE [#1429] is a derived element that is built by ODA staff and is based on the TYPE OF STUDENT AT TIME OF MOST RECENT ADMISSION [#1413] as assigned by the institution.

- First-Time in College Students include two types of students:
  - Students who are admitted into a university for the first time and who have earned less than 12 credit hours after high school graduation [#1413= 'B'].
  - Students who are considered 'Early Admits' because they have been officially admitted and are seeking a degree at the university prior to their high school graduation [#1413= 'E'].
- AA Transfer Students who have transferred from the Florida College System with an Associate in Arts Degree. This value is based on the three following elements:
  - TYPE OF STUDENT AT DATE OF ENTRY [#1068] or TYPE OF STUDENT AT TIME OF MOST RECENT ADMISSION [#1413] equals 'J'.
  - DEGREE HIGHEST HELD [#1112] equals 'A' (Associates).
  - LAST INSTITUTIONAL CODE [#1067] or INSTITUTION GRANTING HIGHEST DEGREE [#1411] must equal a Florida Public Community College.
- Other Transfer Students include all other undergraduate transfer students.

c. Student Right to Know Flag:

The STUDENT RIGHT TO KNOW (SRK) FLAG [#1437] is an entry status indicator that is a 'Yes/No' flag based on the term (Summer, Fall, or Spring) that a student is first admitted.

- YES: If a student enters the institution in the fall term the SRK flag will be set to 'Yes'. If a student enters the institution in the summer term and progresses to fall term, the SRK flag will be set to 'Yes'.
- NO: If a student enters in the summer term and does not progress to the fall term; or, if a student enters in the spring term the SRK flag will be set to 'No'.

d. Full-Time / Part-Time Indicator:

The FULL-TIME / PART-TIME INDICATOR [#1433] is an indicator based on the number of credit hours attempted (not earned) during their first fall term. A student entering in the fall and taking 12 or more credit hours will remain in the full-time category regardless of the number of credits taken in subsequent terms.

- This indicator is based on the CURRENT TERM COURSE LOAD [#1063] which is the number of hours enrolled/attempted during a term. This excludes courses that are audited and all credits awarded during the term through 'Credit by Examination'. Students completing prior term incompletes are not included unless they have registered and paid fees for the credits they are completing.
- This indicator is used in reporting retention and graduation data to the federal government - to IPEDS.

e. Cohort Revisions and Adjustments:

The US Congress and the US Dept. of Education allow institutions to make revisions and adjustments to their student cohorts. There is a difference between revising and adjusting a cohort. Revising a cohort means modifying the cohort data to reflect better information that has become available since the cohort was first reported. Adjusting a cohort means subtracting any allowable exclusions from the revised cohort to establish a denominator for graduation rate calculation. These cohort revisions and adjustments are typically the cause of the differences between historical and updated retention and graduation rates.

- Cohort Adjustment Flag [#1442] is a data element on the Retention Cohort Changes (RETC) table that is used by Institutional Data Administrators to indicate that a retention file record has been modified

based on a change in status of the student at the institution. Historically, this field was usually only populated for students for the six year cohort, but with the switch to the four year graduation rate, several institutions have started identifying cohort adjustments for multiple cohorts in a single retention submission.

- Institutional Data Administrators identify the students who have died, suffered a permanent disability, left to serve in the Armed Services, left to serve in with Foreign Aid Service of the federal government (such as the Peace Corps), or left to serve on an Official Church Mission. These students are removed from the cohort and are not included in the retention and graduation rates.
- Institutional Data Administrators also identify students who are officially admitted to an Advanced Graduate program (classified as 'P' or 'T') without earning a bachelor's degree. It is important to stress that this code cannot be used for students who are just seeking an Advanced Graduate degree – only students who have been formally admitted to the program and will not be earning a bachelor's degree can have this designation. Since these students will not earn a bachelor's degree, they can be removed from the FTIC cohort for the calculation of graduation rates.
  - When the 2018 Legislature changed the PBF graduation rate from six to four years effective immediately, the institutions did not have time to identify which students in their four-year cohorts had been officially accepted into advanced graduate programs, so the Board's Office of Data & Analytics made a temporary, one-year emergency methodological change to also exclude those students whose Degree Level Sought (#01053), during their fourth year, was identified as seeking a Pharmacy Degree ('W'). The graduation rates reported in the 2018 Accountability Plans used the temporary fix. The graduation rates reported in the 2019 Accountability Plans no longer used the temporary fix, which is why the historical rates for some institutions were revised in the 2019 Accountability Plans.
  - Finally, it is important to note that these Advanced Graduate students will not be removed from the Academic Progress Rate or Retention Rate calculations, as there is no reason why entry into an accelerated program would prohibit enrollment during the second fall term.
- Information Adjusted by Correction (I) is used to revise the cohort type, SRK flag, or full/part-time indicator based on newly confirmed information (e.g., SSN change, new transcription info, etc…).

COHORT ADJUSTMENTS USED IN PBF METRICS

CATEGORIES	APR/RETENTION	GRAD RATES
Death (A)	Used	Used
Registered but never attended (B)	Used	Used
Totally/Permanently Disabled (D)	Used	Used
Serve in Armed Forces (F)	Used	Used
Federal Foreign Aid Service (eg, Peace Corps) (G)	Used	Used
Natural Disaster (K)	Used	Used
Official Church Mission (M)	Used	Used
Multiple Cohorts/Illegally Enrolled (Q)	Used	Used
Information Adjusted by Correction (I)	Used	Used
Pharmacy doctoral program (P)	Not used	Used
Advanced Graduate Program (T)	Not used	Used
Transfers (1, 2, 4)	Not used	Not used

3. Calculating the Number Retained or Graduated

a. Second Year Retention Rates

- Cohorts: The number of students in the cohort serves as the denominator for the retention rate, and is based on the following rules: Cohort Type= 'FTIC'; Student Right to Know (SRK)= 'Yes'; FT/PT Indicator= 'Full-time'.
  - The methodology used for the Retention Rate in the annual Accountability Plans is different from what is reported to the U.S. Department of Education's Integrated Postsecondary Education Data System (IPEDS). The primary difference is due to timing – the retention rate that is reported to IPEDS is based on preliminary enrollment data; whereas the retention rate in the annual Accountability Plan is based on final enrollment data.
- Retained or Graduated: The numerator for the retention rate includes two components: (1) the number of students in the cohort who are still enrolled during the second fall term, and (2) those students who graduated in their first year - prior to the start of the second fall term.
- Grade Point Average: A GPA criterion was added to the standard retention rate metric to gain a sense of how well students who were retained were actually doing in their courses. Board staff decided to use a cumulative GPA (at the end of the first year - before the second fall term) of at least 2.0 as a threshold because 2.0 is a commonly referenced measure of satisfactory academic progress that is a common eligibility threshold for financial aid eligibility. It is also important to know that FTICs who return for their 2nd fall with a first-year GPA above 2.0 are 8 times more likely to graduate within six years than students who begin their second Fall with a GPA of less than 2.0.
  - The University GPA [#1801] element is included on the Enrollments table and provides a student's GPA for a given term as well as the cumulative GPA. Originally, the end of the first year cumulative GPA was based on data that was submitted prior to the second fall term. This process was complicated by timing issues due in large part to the fact that many grades were still incomplete during the summer term before the second fall term (usually due in mid-September). In order to create a smoother procedural flow, and fix timing issues caused by incomplete grades, the Board's Office of Data & Analytics worked with the Council of Data Administrators to revise the methodology to instead use the beginning of term data as reported in the second fall enrollment table (due late January). This new methodology was first implemented for the 2019 Accountability Plan, and was applied to the 2016-17 and 2017-18 cohorts to have a consistent year-over-year methodology for determining PBF 'Improvement points'. The revised GPA calculation is a simpler, more streamlined process that provides more accurate data. The detailed formulas used for calculating GPA are provided below:

  - ORIGINAL END-OF-YEAR1 METHODOLOGY

$$\frac{(GPA_INST_GRADE_PTS[\#1086] + GPA_TERM_GRADE_PTS}{(GPA_INST_HRS[\#1085] + GPA_TERM_CREDIT_HRS[\#1}$$

  - NEW BEGINNING-OF-YEAR2 METHODOLOGY

$$\frac{GPA_INST_GRADE_PTS[\#1086]}{GPA_INST_HRS[\#1085]}$$

b. Four Year FTIC Graduation Rates

- Cohorts: The number of students in the cohort serves as the denominator for the graduation rate. The denominator used in the calculation of the four-year FTIC graduation rate is based on the following: Cohort Type= 'FTIC' ('B' and 'E'), SRK= 'Yes', FT/PT Indicator= 'Full-time' only, and Cohort Adjustments.
- Graduated: The number of students in the cohort who graduated within four years (by the fourth summer term after entry) from the same institution serves as the numerator for the graduation rate. It is important to note that a small number of degrees are reported to SUDS after the degree was awarded – these are called 'late degrees'. The methodology for four-year graduation rates include these 'late degrees'; however, late degrees that haven't already been submitted on the SIFD must be submitted on the Retention submission to be included in the graduation rates.
- Note about historic rates that change. The table below provides a visualization showing the difference in reporting degrees awarded for graduation rates and academic year degree counts. The '+' symbol indicates when degrees are reported by institutions to the Board office by degree term (rows) and rept_time_frame (columns). Deg_Term indictes when the degree was awarded and rept_time_frame indicates when the institution reported that degree to the Board office. Degrees can be reported for previous terms, which is why each rept_time_frame reports degrees for multiple deg_terms.
  - The red box provides the logic on which degrees are counted for degrees reported in academic year 2016-17. The logic for reporting degrees in an academic year includes three degree terms (summer, fall, and spring) that is based on a 'summer to summer' rept_time_frame rule that excludes degrees if they are reported too late based on rept_time_frame.
  - Alternatively, graduation rates do not exclude 'late late' degrees, so each year historical graduation rates can change as 'late late' degrees are reported. In the table below, the blue horizontal line is the only criteria restricting degrees awarded for purposes of calculating a graduation rate that ends by summer 2017 (or, deg_term=201705).
  - The highlighted cells indicate which degrees were available for the 2016-17 Retention submission that were included in the 2013-17 graduation rate calculation – the yellow highlights would extend all the way back to the 201305 term if calculating the 2013-17 graduation rate. However, the 2017-18 Retention submission would also include any degrees awarded above the blue line that were not shaded yellow. These 'late late' degrees are not a large number but can change rates reported into the decimals.

	REPT_TIME_FRAME						
DEG_TERM	201605	201608	201701	201705	201708	201801	201805
201505	+	+	+	+	+	+	+
201508	+	+	+	+	+	+	+
201601	+	+	+	+	+	+	+
201605	+	+	+	+	+	+	+
201608	-	+	+	+	+	+	+
201701	-	-	+	+	+	+	+
201705	-	-	-	+	+	+	+
201708	-	-	-	-	+	+	+
201801	-	-	-	-	-	+	+
201805	-	-	-	-	-	-	+

Performance Funding Metrics

Percentage of Degrees Awarded in Programs of Strategic Emphasis

(for Bachelor's and Graduate Degrees)

Overview of Methodology and Procedures

REVISED 04/28/2016

State University System of Florida
Board of Governors

PERFORMANCE FUNDING METRICS **METHODOLOGY & PROCEDURES**

PERCENTAGE OF DEGREES AWARDED IN PROGRAMS OF STRATEGIC EMPHASIS

REVISED 04/28/2016

The Board of Governors for the State University System of Florida approves a methodology document that is used to generate a list of Programs of Strategic Emphasis (PSE) to promote the alignment of the State University System degree program offerings with the economic development and workforce needs of the State. The Board has updated the methodology document several times to reflect that Florida's workforce needs change over time. The original methodology document and program list was created as part of a 2001 Advisory Group on Emerging Technologies. In 2005, the Board updated the methodology and list as part of the 2005-2013 System Strategic Plan, and it was again formally updated in 2009 as part of the 2012-2025 Strategic Plan effort. The last update occurred in November 2013 as part of the 2025 System Strategic Plan Re-Alignment initiative.

As with past iterations of the process, the 2009 update renamed the PSE categories to better demonstrate alignment with recommendations found in the key economic and workforce council reports and available data. The categories in the approved methodology document are used to generate a dynamic list of PSE from the State University System Academic Program Inventory database. The 2013 methodology document is designed such that some disciplines are included at the two digit CIP, others at the four digit CIP, and a few selected programs at the six digit CIP. New programs are captured in the dynamic PSE list as long as they fall under one of the Board approved CIP code categories.

For more information about the Programs of Strategic Emphasis please visit the Board's webpage at: http://www.flbog.edu/pressroom/strategic_emphasis/.

This document provides details on the methodology and procedures used by Board of Governors staff to calculate the Percentage of Degrees Awarded in Programs of Strategic Emphasis (for both bachelor's and graduate level) as reported in the 2025 System Strategic Plan, annual Accountability Reports, University Work Plans, and used in the Board's Performance Based Funding model.

1. Board Staff Analysis of State University Database System (SUDS) Data

The State University System of Florida Board of Governors (BOG) maintains a student unit record database titled the State University Database System (SUDS). This database contains over 400 data elements about students, faculty and programs at SUS institutions. The Percentage of Degrees Awarded in Programs of Strategic Emphasis is based on data that universities submit to the Board office as part of the Degrees Awarded table on the Degrees Awarded (SIFD) file submission[1]. Degree data is collected three times a year at the end of each term. The SUDS data elements used to determine the Percentage of Degrees Awarded in Programs of Strategic Emphasis are:

- Degree Program Category [#1082]
- Degree Program Fraction of Degree Granted [#1083]
- Reporting Institution [#1045]
- Term Degree Granted [#1412]
- Degree Level Granted [#1081]
- Major Indicator [#2015]

a. Number of Degrees

The number of degrees awarded in Programs of Strategic Emphasis is a count of graduates with certain skill sets (not an unduplicated count of degrees), so we include all of the disciplines/CIP codes that a student completes – this includes first majors, second majors, and dual degrees.

- There are several scenarios when a student can earn a degree from more than one CIP code. By far the most common examples are at the bachelor's level within Business programs – when a student graduates with an even amount of work from two different CIPs (i.e., finance, business, marketing, accounting and political science to name a few). Other examples, which are much less common, occur when a student earns two separate degrees from two separate disciplines ("dual degrees"), or when a student earns only one degree but has done more work in one CIP than the other ("dual majors").
- The number of degrees used in the calculation of the Percentage of Degrees Awarded in Programs of Strategic Emphasis – for both the numerator (representing the select disciplines identified by the Board) and the denominator (representing all disciplines) – is made by rounding the Degree Program Fraction of Degree Granted [#1083] for each Degree Program Category [#1082] for each student up to '1' and then summing.

b. Reporting Period

The reporting year for degrees includes the summer, fall, and spring terms of a given year. The SIFD submission often includes students who were awarded a degree in a previous term that was not previously reported. The total number of degrees used to calculate the degrees awarded in Programs of Strategic Emphasis can include the degrees that were reported out-of-term (also referred to as 'late' degrees). Because it is not unusual for the summer SIFD to include degrees for students who actually graduated in the previous reporting year, the final degree data can include data reported on the following summer SIFD.

[1] The SUDS Data Dictionary has detailed definitions for the 21 elements included within the Degrees Awarded table and is available at: https://prod.flbog.net:4445/pls/apex/f?p=112:50:5018573689494::NO::P50_ROW_DISPLAY_COLUMNS:50.

2. Academic Program Inventory

In accordance with the requirements of Board of Governors regulation 8.011(4), the Board office maintains the official State University System Academic Degree Program Inventory, which identifies all the approved degree programs for each university within the System.[2] The programs are listed based on the Classification of Instructional Programs (CIP) taxonomy that the US Dept. of Education maintains. Universities may have multiple "majors" at the same degree level under one CIP code in accordance with definitions specified in regulation 8.011, and they may have degree programs at different levels within the same CIP. The degree program inventory is updated continuously, which allows for dynamic reports to be generated, such as the Programs of Strategic Emphasis List.

a. Newly Created Programs

Upon final approval, new degree programs are added into the degree program inventory with an effective term date for which enrollments and degrees can be reported. Programs that are terminated by the university also remain in the inventory database, but are noted as terminated with an effective term date after which no new enrollments can be reported. Enrollment data can still be reported for terminated programs until the programs 'teach out' any students who were enrolled at the time the program was terminated.

b. CIP Code Change

It is important to note that program curricula naturally evolve and change over time to keep up with the latest developments within their respective fields of study. Consequently, universities routinely submit requests to the Board office to change the CIP code assigned to an existing degree program in the Board's Academic Program Inventory. However, a CIP code change cannot have the net effect of adding a new degree program to the academic program inventory by changing the code for a major offered under a currently approved program. CIP Changes are different from program terminations because there is no 'teach out' phase for CIP changes.

Each CIP code change request indicates the future term in which the change will become effective. The effective term is important because any degrees awarded before the effective term are classified under the previous CIP code and degrees awarded after the CIP change are reported as the new CIP code.

c. Programs of Strategic Emphasis (PSE)

The Board of Governors approves a methodology document that is used to generate a list of Programs of Strategic Emphasis (PSE) to promote the alignment of the State University System degree program offerings with the economic development and workforce needs of the State. The Board has updated the methodology document several times to reflect that Florida's workforce needs change over time. The original methodology document and program list was created as part of a 2001 Advisory Group on Emerging Technologies. In 2005, the Board updated the methodology and list as part of the 2005-2013 System Strategic Plan, and it was again formally updated in 2009 as part of the 2012-2025 Strategic Plan effort. The last update occurred in November 2013 as part of the 2025 System Strategic Plan Re-Alignment initiative.

As with past iterations of the process, the 2009 update renamed the PSE categories to better demonstrate alignment with recommendations found in the key economic and workforce council reports and available data. The categories in the approved methodology document are used to generate a dynamic list of PSE from the State University System Academic Program Inventory database. The 2013 methodology document is designed such that some disciplines are included at the two digit CIP, others at the four digit CIP, and a few selected programs at the six digit CIP.

[2] The Board's Academic Program Inventory is available at: https://prod.flbog.net:4445/pls/apex/f?p=136:13.

[3] For more information about the Programs of Strategic Emphasis please visit the Board's webpage at: http://www.flbog.edu/pressroom/strategic_emphasis/.

3. Using Outcomes

Accountability Reports

Board IR staff provide the Percentage of Bachelor's and Graduate Degrees Awarded within the Programs of Strategic Emphasis to each university Data Administrator for their review as well as a static snap-shot of the CIPs that are included in the Programs of Strategic Emphasis for the annual Accountability Reports. Any data discrepancies between university and Board calculations are resolved prior to the printing of the Accountability Report. The data reported in the Accountability Report is subsequently used in the University Work Plans and the Performance-Based Funding Model (PBF).

- The 2012-13 Accountability Report reported the Percentage of Strategic Emphasis Degrees Awarded based on the 2009 methodology of the Areas of Programmatic Strategic Emphasis – that expired at the end of summer 2014.
- The 2013-14 Accountability Report reported the Percentage of Strategic Emphasis Degrees Awarded based on the 2013 *methodology* of the Programs of Strategic Emphasis (PSE) – effective fall 2014.

University Work Plans

University Data Administrators use the Accountability Report data to develop the out-year data goals that are provided as part of the University's Work Plans.

- The June 2014-15 University Work Plans reported the Percentage of Strategic Emphasis Degrees Awarded based on the 2009 methodology of the Areas of Programmatic Strategic Emphasis – that expired at the end of summer 2014.
- The June 2015 University Work Plans reported the Percentage of Strategic Emphasis Degrees Awarded based on the 2013 *methodology* of the Programs of Strategic Emphasis (PSE) – effective fall 2014.

Performance Based Funding Model

In 2014, the Board approved a new Performance-Based Funding Model that included ten metrics – two of which were based on degrees awarded within Programs of Strategic Emphasis at the baccalaureate and graduate levels.

- In 2014, the first cycle of PBF used the Percentage of Bachelor's and Graduate Degrees Awarded within the Programs of Strategic Emphasis that was based on the 2009 *methodology* of the Areas of Programmatic Strategic Emphasis – that expired at the end of summer 2014.
- In 2015, the second cycle of PBF used the Percentage of Bachelor's and Graduate Degrees Awarded within the Programs of Strategic Emphasis that was based on the 2013 *methodology* of the Programs of Strategic Emphasis (PSE) – effective fall 2014.

REVISED 06/08/2016

STATE UNIVERSITY SYSTEM *of* FLORIDA
Board of Governors

PERFORMANCE FUNDING METRICS

UNIVERSITY ACCESS RATE

METHODOLOGY & PROCEDURES

REVISED 06/08/2016

The State University System of Florida included the University Access Rate in the Performance-Based Funding model to help preserve access for students from low-income families. This document provides details on the methodology and procedures used by Board of Governors staff to calculate the percentage of undergraduates with a Pell-Grant as reported in the annual Accountability Report and used in the Performance Based Funding model.

BOG Analysis of State University Database System (SUDS) Data

The State University System of Florida Board of Governors maintains a student unit record database titled the State University Database System (SUDS). This database contains over 400 data elements about students, faculty and programs at SUS institutions. The University Access Rate is based on data from the enrollment table on the Student Instruction File (SIF), and the Awards table on the Student Financial Aid (SFA) file.

a. Numerator: Board staff query the Financial Aid Awards table within SUDS to identify the students who received a Pell Grant (award_prog_id='001') during the Fall term (award_payment_term= 'yyyy08').

- In addition to demonstrating financial need, the US Dept. of Education considers other factors when determining eligibility for a federal Pell grant. For example, students must be a US citizen or an eligible noncitizen[1]. The US Dept. of Education does provide a few exceptions whereby non-resident aliens can receive a Pell grant. SUDS does not collect information to allow Board staff to determine the Pell-eligibility for non-resident aliens; therefore, Board staff exclude non-resident aliens (#2043 = 'Y') from both the numerator and denominator for this metric.

b. Denominator: Board IR staff identify all degree-seeking undergraduate (both lower and upper divisions) students enrolled in the Fall term. In addition, Board staff exclude unclassified students (student_class_level='N') and post-baccalaureate students (stu_recent_adm_typ= 'P') from the denominator because these students are not eligible for a Pell grant.

Note on U S Dept. of Education Pell Data

The US Dept. of Education reports data for the 'Percent of Undergraduate Students Receiving Pell Grants' online at the Integrated Postsecondary Education Data System (IPEDS) website. However, Board staff decided not to use the IPEDS data for this metric for the following reasons:

- Since there is funding attached to the data, Board staff felt it was preferable to calculate the percentage of undergraduates receiving Pell grants using the student level data that is available in SUDS rather than simply using the data that universities report to IPEDS.
- Board staff also felt that the methodology that is used by IPEDS to generate their percentage of undergraduates who received a Pell grant is flawed. In IPEDS, the numerator is based on the number of students who received a Pell grant anytime during a particular academic year. Alternatively, the denominator is only based on the students enrolled during the Fall term – including unclassified students who are not seeking a degree and therefore not eligible for financial aid. Furthermore, the IPEDS Financial Aid survey imports the total headcount denominator from their Fall Enrollment survey. Due to the IPEDS schedule for data submissions, the State University System of Florida institutions use the *preliminary* Student Instruction File (SIFP) data when reporting the total Fall enrollment counts on the Fall Enrollment survey, so the denominator that IPEDS uses to calculate the percentage of undergraduates who received a Pell grant is based on preliminary data.

Performance Funding Metrics

Percent of Bachelor's Degrees Awarded Without Excess Hours

Overview of Methodology and Procedures

REVISED 04/28/2016

STATE UNIVERSITY SYSTEM *of* FLORIDA
Board of Governors

PERFORMANCE FUNDING METRICS

PERCENTAGE OF BACHELOR'S DEGREES WITHOUT EXCESS HOURS

METHODOLOGY & PROCEDURES

REVISED 04/28/2016

The State University System of Florida has been reporting the number of hours in excess of degree requirements for decades in its annual accountability reports. In 2009, the Florida Legislature established an "Excess Credit Hour Surcharge" to encourage students to complete their baccalaureate degrees as quickly as possible. This law created an additional fee for each credit hour that exceeds specific thresholds. It is important to note that the statutory provisions of the Excess Hour Surcharge have been modified several times by the Florida Legislature, resulting in a phased-in approach that has created three different cohorts of students with different requirements. The data described in this document are based on the latest statutory requirements, which mandate a 110% threshold of the required hours.[1]

In 2011, the Board of Governors included the excess hours metric in its 2012-2025 System Strategic Plan. In 2014, the importance of the excess hours metric was further elevated by its inclusion in a new Performance-Based Funding Model. This document provides details of the methodology and procedures used by Board of Governors staff during the analysis of the 'Percentage of Bachelor's Degrees Awarded Without Excess Hours' as reported in the Accountability Reports and used in the Performance Based Funding model.

[1] The Board's accountability metric is a retrospective summary for a given graduating class. The accountability metric does not attempt to report (and cannot be used to calculate) how many students have actually paid the surcharge at a given time. The Board of Governors will monitor actual surcharge payment data, but will continue to base the accountability metric on the latest statutory requirements because it provides a good perspective on what impact this new fee will have in the near future after the phase-in period is over. For more details see Section 1009.286, Florida Statutes at: http://www.flsenate.gov/laws/statutes/2012/1009.286.

PERFORMANCE FUNDING METRICS

PERCENTAGE OF BACHELOR'S DEGREES WITHOUT EXCESS HOURS

METHODOLOGY & PROCEDURES

REVISED 04/28/2016

1. Defining the Cohort

The State University System of Florida Board of Governors (BOG) maintains a student unit record database titled the State University Database System (SUDS). This database contains more than 400 data elements about students, faculty, and programs at SUS institutions.

a. The source data for the excess hours accountability metric are the Courses to Degree (CTD) and Hours to Degree (HTD) tables that are submitted to SUDS by each university as part of their Hours To Degree (HTD) file[2]. Note: New College of Florida (NCF) does not submit a HTD file.

b. The Hours to Degree file only includes single-major bachelor's degree recipients who were awarded a bachelor's for the first time during the academic year – summer, fall, and spring terms.

c. The course information for the students reported includes all post-secondary course work and their course work taken in high school and accepted as post-secondary credit after high school.

2. Board Staff Query of HTD

The Board's Information Resource Management (IRM) staff query the database and provide the Board's Institutional Research (IR) unit with a student-level summary of the HTD data. The primary action of this query is to summarize the number of credit hours attempted for each individual in the HTD file into the groups described below. These groupings are critically important because the Legislature has exempted several types of credit hours from being included in the calculation of excess hours. The determination of credit hour groupings is done by university staff who report to the BOG using the following HTD elements:

- Course System Code [#1484]
- Course Grouping Code [#1485]
- Credit Hour Usage Indicator [#1489]
- Section Credit [#1459]
- Credit Hour Testing Method [#1488]
- Course Section Type [#1104]
- Excess Hours Exclusion [#2065]

a. Statutory Inclusions

- Native Credits: The statute includes all credit hours attempted at the state university from which the student received a baccalaureate degree, which is based on the sum of SECTION_CREDIT [#1459] when CRS_SYSTEM [#1484] = 'N--native'. Native credits include all failed, dropped, repeated, and most withdrawals. In addition, Board of Governors staff have clarified that graduate-level credit that is attempted for completion of a baccalaureate degree is included in any calculation for excess hours.
  - However, if graduate credit is attempted as part of a (3+2 or 4+1) dual bachelor's/master's degree, where the credit applies to both the undergraduate and graduate requirements, then it should be considered graduate degree coursework and therefore should be considered exempt from excess hours. The exempted credits are based on the sum of SECTION_CREDIT [#1459] when COURSE_GROUP [#1485] = 'R'.
- Non-Native Credits Used Toward the Degree: Based on all credit hours (sum of SECTION_CREDIT [#1459]) accepted for transfer by the degree-awarding institution (CRS_SYSTEM [#1484] <> 'N--native') and used toward the student's baccalaureate degree program (USAGE_INDICATOR [#1489] = 'D').

[2] For detailed information regarding the Hours to Degree file, please see the master file documentation that is available at: http://www.flbog.edu/resources/_doc/ditr/susmaster/htd_print.pdf.

b. Statutory Exclusions

- Accelerated Mechanisms: Based on the sum of SECTION_CREDIT [#1459] when COURSE_GROUP [#1485] = 'D' or 'E'. This includes College Level Examination Program (CLEP), College Board Advanced Placement Program (AP), Advanced International Certificate of Education (AICE), International Baccalaureate (IB) examinations, and High School Dual (or Early Admit) Enrollment. Note: High School Dual/Early-Admit credits that are earned at another institution and accepted as transfer credit are also exempt from the excess hours calculation.
- Internship Courses: Based on the sum of SECTION_CREDIT [#1459] when COURSE_SECTION_TYPE [#1104] = 'I'. This should include externships, practicums, and supervised teaching activities within teacher education.
- Certification: The data collected by the Board of Governors do not identify credit hours that are classified as 'for certification'; therefore, no certification credits are being excluded from the BOG accountability metric for excess hours.
- Withdrawal Due to Personal Hardship: After summer 2014 Data Workshop discussions, a new 'Excess Hours Exclusion' element [#2065] was added to the State University Database System (SUDS) Hours to Degree file to identify these credit hours. It is important to note that for these hours to be exempted from the calculation of 'Excess Hours' for the Accountability Report, the COURSE_GROUP [#1485] code must be equal to 'A—academic course.' If the credit hours have already been exempted as a result of the COURSE_GROUP [#1485] values, then they will not be exempted again.
- Active Duty Military: These data have historically not been identified in the HTD. After summer 2014 Data Workshop discussions, a new element was added to the State University Database System (SUDS) Hours to Degree file to identify these credit hours. These hours will only include credit hours taken while on active duty. It is important to note that for these hours to be exempted from the calculation of 'Excess Hours' for the Accountability Report, the COURSE_GROUP [#1485] code must be equal to 'A—academic course.' If the credit hours have already been exempted as a result of the COURSE_GROUP [#1485] values, then they will not be exempted again.
- Dual Major: Dual majors are not included in the HTD data. Surcharge Note: Because of the variation in how the curricula for dual majors can be constructed, the credits applicable to this exemption need to be determined by each university.
- Remedial/English as a Second Language: Based on the sum of SECTION_CREDIT [#1459] when COURSE_GROUP [#1485] = 'C'. In addition, Board of Governors staff decided that up to 10 credit hours of foreign language that are used to meet FTIC admission requirements (per Regulation 6.002(1)(h)) should also be exempt from excess hours. These data are based on the sum of SECTION_CREDIT [#1459] when USAGE_INDICATOR [#1489] = 'L—Foreign Language.' It is important to note that for these hours to be exempted from the calculation of 'Excess Hours' for the Accountability Report, the COURSE_GROUP [#1485] code must be equal to 'A—academic course.' If the credit hours have already been exempted as a result of the COURSE_GROUP [#1485] values, then they will not be exempted again.
- Military Sciences: Based on the sum of SECTION_CREDIT [#1459] when COURSE_GROUP [#1485] = 'M'. This identifies courses that are part of the Reserve Officers' Training Corps (ROTC) program or credit for Military Training and Education granted to students with military training or coursework that is recognized by the American Council on Education (ACE) subject to regular institution transfer practices or limitations on amount, level, etc. of transfer credit. Credit hours earned from military courses from U.S. Military Colleges and Military Academies are also included.
- Note about Teacher Education: Board of Governors staff recommend that universities evaluate their Teacher Education programs to determine whether the number of credit hours required for the program needs to be adjusted. If so, then the university needs to apply for the change in catalog hours with BOG staff.

3. Board Staff Analysis of HTD Query

a. Quality Assessment

- Calculating Total Credit Hours: The first action that IR staff performs is a quality assessment step to see if all bachelor's recipients have earned at least 120 total credit hours – per Board regulation 6.017(b). This step sums the total native hours and the non-native hours used toward the degree. If a student has less than 120 total credit hours used toward the degree, he or she is excluded from the excess hours calculation.

- Catalog Hours and the Academic Degree Program Inventory:
  In accordance with the requirements of Board of Governors regulation 8.011(4), the Board office maintains the official State University System Academic Degree Program Inventory, which identifies all the approved degree programs for each university within the System.[3] The programs are listed based on the Classification of Instructional Programs (CIP) taxonomy that the U.S. Dept. of Education maintains. Universities may have multiple "majors" at the same degree level under one CIP code, in accordance with definitions specified in regulation 8.011, and they may have degree programs at different levels within the same CIP.

  In accordance with the requirements of Section 1007.25(8), F.S., and Board regulation 8.014, the Board of Governors may approve a request by a university board of trustees for a bachelor's degree program to exceed 120 credit hours to degree. Baccalaureate programs that have been granted this exception are identified in the Board's Academic Program Inventory along with the required catalog hours and the term when the change was made effective. The Board's Inventory displays only the credit hours associated with the longest track/major within any program associated with a six-digit CIP code.

  It is important to note that program curricula naturally evolve and change over time to keep up with the latest developments within their respective fields of study. A program curriculum change *may* cause the university to change the required credit hours associated with an academic program. Universities that want to change the maximum credit hours for a program that has already been approved to exceed 120 credit hours must request approval for the administrative change (whether higher or lower) from the Board's Academic and Student Affairs (ASA) staff as specified in Board of Governors regulation 8.014. If ASA staff approve a change, the Program Inventory is updated to reflect the new maximum credit hours along with the effective term for the new maximum hours.

  In the HTD file, the university reports the catalog hours for each student, which can vary within a CIP due to differences between majors that are grouped into the same CIP, or due to students who entered the university years apart and completed slightly different curricula. To ensure compliance with statute and regulation, Board staff use the Board-approved maximum credit hours for each university's CIP, combined with their effective terms, as reported in the Program Inventory, when calculating the 'Excess Hour' threshold for each program.

[3] The Board's Academic Program Inventory is available at: https://prod.flbog.net:4445/pls/apex/f?p=136:13.

b. Calculating Excess Hours

- The calculation of the excess hours metric is executed at the student level and combines the different groups of data provided by IRM in a way that mirrors statute as closely as possible.
  - The formula starts with a sum of all 'native' credit hours plus non-native credits that were used toward the degree. 'Native' refers to whether the credits were earned at the same institution. 'Non-Native' credits refers to the credits that were earned elsewhere and accepted for transfer. This credit hour subtotal is then compared to 110% of the Board-approved maximum catalog hours. The final step subtracts the credit hours from the statutory exempt categories (which include all exempted native credit hours and only the non-native exempted credit hours that were used toward the degree). Note: Non-native credit hours that were not used toward the degree are not included in the exempted hours because these credit hours were already excluded from the initial subtotal.
  - The formula used is shown below.

    [ALL NATIVE + NON-NATIVE HOURS USED TO DEGREE] – (CATALOG HOURS*1.10) – (EXEMPTED HOURS)

    EXEMPTED HOURS include all native hours plus non-native hours that were used toward the degree from the following categories: Dual Enrollment, Exam Credit, Internships, Remedial, Language (to fulfill 2nd language admission requirements), Life Experience, Military Course Credit, Graduate Rollover Courses, Withdrawals due to Personal Hardship, and courses earned while serving on Active Duty in the Military (as described in Section 2b of this document).

- The result of the 'Excess Hour' formula above provides a numerical value for each baccalaureate recipient that is either negative, zero, or positive. If negative or zero, the student did not accrue any excess hours. If positive, the student did accrue excess hours. This numerical value is translated into a simple "Yes/No" flag, which is then used to summarize the number and percentage of baccalaureate recipients based on their designation.

4. Using Outcomes

The Performance-Based Funding Model

Board staff provides the results of the Excess Hours data analysis (as well as the student-level data that it was based upon) to each university Data Administrator for their review prior to the data being approved by each university Board of Trustees and the Board of Governors as part of the Accountability Report process. The Percentage of Bachelor's without Excess Hours is reported as an overall total and by student type (FTIC, AA Transfer, and Other Transfer). The percentage for all students is used in the Performance-Based Funding model.

- Board staff compare newly submitted HTD data to prior year data and ask university Data Administrators about any odd trends. It is important to note that if the university implemented any methodology, or procedural changes that cause an impact to the data, then Board staff will require the university resubmit the prior year HTD using the same improved method/process. This is needed to ensure that the year-over-year change in data is based on actual performance and not due to a technical methodological/procedural change to the data collection processes.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Budget and Finance Committee
August 29, 2019

SUBJECT: Board of Governors Regulation 5.001 Performance-Based Funding

PROPOSED COMMITTEE ACTION

Approve the Public Notice of Intent to Amend Regulation 5.001.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

Senate Bill 190 was signed by the Governor on June 18, 2019.

Included in the bill is the requirement that each university conduct an annual audit to verify that the data submitted to the Board complies with the data definitions. This requirement has been added to the regulation along with the requirement that the audit and certification be submitted to the Board's Inspector General by March 1 of each year.

Supporting Documentation Included: Amended Regulation 5.001

Facilitators/Presenters: Tim Jones

5.001 Performance-Based Funding

(1) The Performance-Based Funding (PBF) model is based upon four guiding principles:
(a) Align with the State University System's (SUS) Strategic Plan goals;
(b) Reward excellence and improvement;
(c) Have a few clear, simple metrics; and
(d) Acknowledge the unique mission of the different institutions.

(2) The PBF model measures institutional excellence and improvement of performance using metrics adopted by the Board of Governors. The metrics include graduation rates; retention rates; post-graduation education rates; degree production; affordability; post-graduation employment and salaries, including wage thresholds that reflect the added value of a baccalaureate degree; access; and other metrics that may be approved by the Board in a formally noticed meeting.

(3) The performance of an institution is evaluated based on benchmarks adopted by the Board of Governors for each metric. For each fiscal year, the amount of funds available for allocation to SUS institutions shall consist of the state's investment, plus the institutional investment from each institution's base budget, as determined in the General Appropriations Act. The amount of institutional investment withheld from each SUS institution shall be a proportional amount based on each institution's recurring base state funds to the total SUS recurring base state funds (excluding special units). Florida Polytechnic University is not included in the model until such time as data is readily available.

(4) Institutional Investment
(a) On a 100-point scale, a threshold of 51-points is established as the minimum number of total points needed to be eligible for the institutional investment.
(b) All SUS institutions eligible for the state's investment shall have their proportional amount of institutional investment restored.
(c) Any institution that fails to meet the minimum threshold of 51-points for the institutional investment shall submit an improvement plan to the Board of Governors for consideration at its August/September meeting that specifies the activities and strategies for improving the institution's performance. As of July 1, 2016, an institution is limited to only one improvement plan.
1.(1) The Board of Governors will monitor the institution's progress on implementing the activities and strategies specified in the plan, and the Chancellor shall withhold disbursement of the institutional investment until the improvement plan monitoring report for each institution is approved by the Board of Governors.
2.(2) Improvement plan monitoring reports shall be submitted to the Board of Governors no later than December 31 and May 31 of each fiscal year.
3.(3) The December 31 monitoring report will be considered by the Board of Governors at its January meeting and if it is determined that the institution is making satisfactory progress on implementing the plan, the institution shall receive up to 50 percent of its institutional investment.
4.(4) The May 31 monitoring report will be considered by the Board of Governors at its June meeting and if it is determined that the institution has fully completed the

plan, the institution shall receive the remaining balance of its institutional investment.

5.(5) Any institution that fails to make satisfactory progress shall not have its full institutional investment restored, and any institutional investment funds remaining shall be distributed to the three institutions that demonstrate the most improvement on the metrics based upon those institutions' share of total improvement points.

(d) If an institution, after the submission of one improvement plan, subsequently fails to meet the 51-point threshold, its institutional investment will be redistributed to the institutions meeting the 51-point threshold, based on the points earned by each institution.

(5) State Investment

(a) On a 100-point scale, institutions with the top three 3 scores shall be eligible for their proportional amount of the state's investment. In the case of a tie for the top three3 scores, the tie will go to the benefit of the institutions.

(b) All SUS institutions with a score the same or higher as the previous year, shall be eligible for their proportional amount of the state's investment.

(c) Any institution with a score less than the previous year but the previous year's score was higher or the same than the year before, shall be eligible for their proportional amount of the state's investment.

(d) Any institution with a score the same or lower than the previous year's score for two consecutive years shall submit a student success plan to the Board of Governors for consideration at its August/September meeting that specifies the activities and strategies for improving the institution's performance metrics in order to be eligible for their proportional amount of the state's investment. The baseline scores begin with the June, 2018 results.

1.(1) If the student success plan is approved by the Board of Governors, the institution shall receive up to 50 percent of its state's investment at the time of approval.

2.(2) The Board of Governors will monitor the institution's progress on implementing the activities and strategies specified in the plan, and the Chancellor shall withhold the remaining disbursement of the state's investment until the student success plan monitoring report for each institution is approved by the Board of Governors.

3.(3) The student success plan monitoring report shall be submitted to the Board of Governors on a date specified by the Chancellor.

4.(4) The monitoring report will be considered by the Board of Governors at its March meeting and if it is determined that the institution is making satisfactory progress on implementing the plan, the institution shall receive up to the balance of its state's investment.

5.(5) Any institution that fails to make satisfactory progress shall not have its full state's investment restored, and any state investment funds remaining shall be distributed to top three scoring institutions (including ties) based on the total number of points of the top three scoring eligible institutions.

(6) Beginning with the Fiscal Year 2021-22 appropriation, any institution with a score lower than 70 points shall submit a student success plan to the Board of Governors for consideration at its August/September meeting that specifies the activities and strategies for improving the institution's performance metrics in order to be eligible for 50 percent of their proportional amount of the state's investment.

(a) If the student success plan is approved by the Board of Governors, the institution shall receive up to 25 percent of its state's investment at the time of approval.
(b) The Board of Governors will monitor the institution's progress on implementing the activities and strategies specified in the plan, and the Chancellor shall withhold the remaining 25% of the disbursement of the state's investment until the student success plan monitoring report for each institution is approved by the Board of Governors.
(c) The student success plan monitoring report shall be submitted to the Board of Governors on a date specified by the Chancellor.
(d) The monitoring report will be considered by the Board of Governors at its March meeting and if it is determined that the institution is making satisfactory progress on implementing the plan, the institution shall receive up to the balance of its state's investment.
(e) Any institution that fails to make satisfactory progress shall not have its 50 percent of the state's investment restored, and any state investment funds remaining shall be distributed to the top three scoring institutions (including ties) based on the total number of points of the top three scoring eligible institutions.
(f) The remaining 50 percent of each institution's state's investment shall be distributed to the top three scoring institutions (including ties) based on the total number of points of the top three scoring eligible institutions.

(7) By October 1 of each year, the Board of Governors shall submit a report to the Governor, President of the Senate, and Speaker of the House of Representatives on the previous fiscal year's performance funding allocation, including the rankings and award distributions.

(8) University chief audit executives shall conduct or cause to have conducted an annual data integrity audit to verify the data submitted for implementing the Performance-based Funding Model complies with the data definitions established by the Board of Governors. The audit report shall be presented to the university's board of trustees for their review, acceptance, and use in completing the data integrity certification. The audit report and data integrity certification are due to the Board of Governors' Office of Inspector General by March 1 each year.

Authority: Section 7(d), Art. IX, Fla. Const., Section 1001.92, Florida Statutes; History: New 9-22-16. Amended 1-31-19, x-x-19.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Budget and Finance Committee
August 29, 2019

SUBJECT: Board of Governors Regulation 7.003 Fees, Fines, and Penalties

PROPOSED COMMITTEE ACTION

Approve the Public Notice of Intent to Amend Regulation 7.003.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

Senate Bill 190 was signed by the Governor on June 18, 2019. Included in the bill are changes to the excess hour threshold.

Effective with the 2019 summer term and thereafter, an excess hour surcharge equal to 100 percent of the tuition rate will be charged for each credit hour in excess of 120 percent degree program hours. If a student changes their degree program, the excess hour threshold will only be adjusted if the number of credit hours required to complete the new degree program exceeds that of the original degree program.

Supporting Documentation Included: Amended Regulation 7.003

Facilitators/Presenters: Tim Jones

7.003 Fees, Fines and Penalties.

(1) The Board of Governors must authorize all fees assessed to students. Accordingly, the specific fees listed in this section, and the tuition and associated fees defined in Regulation 7.001, are the only fees that may be charged for state fundable credit hours without the specific approval of the board, except as authorized in Regulation 8.002. For purposes of clarification, the term "at cost" or "cost" as used in this regulation includes those increased costs that are directly related to the delivery of the goods, services, or programs.

(2) Each university board of trustees is authorized to assess the following fees at the statutory amounts listed:

(a) Security / Access / Identification Card, Duplicate Security / Access / Identification Card, Fee Card, or Passbook:
1. Annual – cost up to $10.00.
2. All duplicates – cost up to $15.00

(b) Orientation Fee – up to $35.00.
1. Effective fall 2011, the board of trustees of the University of West Florida may assess a $50 Orientation Fee.

(c) Admissions Deposit – Up to $200. The admissions deposit shall be imposed at the time of an applicant's acceptance to the university and shall be applied toward tuition upon registration and budgeted in the Student and Other Fee Trust Fund. In the event the applicant does not enroll in the university, the admissions deposit shall be budgeted in an auxiliary account of the university and used to expand financial assistance, scholarships, student academic and career counseling services, and admission services at the university.

(d) Transcript Fee – per item; up to $10.00.

(e) Diploma Replacement Fee – per item; up to $10.00.

(f) Service Charge – up to $15.00 for the payment of tuition and fees in installments.

(g) Audit Registration Fees -- Audit registration assures a course space for the student; however, no grade is awarded. This fee is the same as the tuition and associated fees provided in Regulation 7.001. Budgeting of fee proceeds shall be in the Student and Other Fee Trust Fund.

(h) Registration of Zero Hours -- Such registration provides for examinations, graduations, use of facilities, etc., when deemed appropriate by the institution. The student is assessed tuition and associated fees for one credit hour. The Zero Credit Fee shall be budgeted in the Student and Other Fee Trust Fund.

(i) Application Fee -- Individuals who make application for admission to universities within the State University System shall pay a non-refundable Application Fee of not more than $30.00. The fee shall be budgeted in the

Student and Other Fee Trust Fund. Provisions may be made to waive the application fee as specified by the university.

(j) Late Registration Fee -- Universities shall assess a Late Registration Fee to students who fail to register before the end of the regular registration period. This fee may also be assessed to students reinstated after their course schedules were cancelled due to non-payment of fees. The fee shall be not less than $50 nor more than $100 with a minimum of 50 percent budgeted to the Student and Other Fee Trust Funds and the balance budgeted in an Auxiliary Trust Fund. Provisions may be made to waive the Late Registration Fee as specified by the university.

(k) Late Payment Fee -- Universities may assess a Late Payment Fee to students who fail to pay, or make appropriate arrangements for payment (installment payment, deferment, or third-party billing), of tuition and associated fees by the deadline set by each university. The fee shall be not less than $50 nor more than $100 with a minimum of 50 percent budgeted to the Student and Other Fee Trust Fund and the balance budgeted in an Auxiliary Trust Fund. Provisions may be made to waive the Late Payment Fee as specified by the university.

(3) Before the board's last meeting of each calendar year, the university board of trustees shall notify the board of any potential increases in fees outlined in sub-paragraph (2). A university board of trustees may then submit a proposal for an increase in that fee to the Board of Governors' budget committee for consideration by the committee during a June meeting.

(a) The proposal shall be submitted in a format designated by the chancellor and include at a minimum:

1. The current and proposed increase to the fee and a description of the process used to determine the need for the increase, including any student involvement.
2. The service or operation currently being funded by the fee.
3. An analysis of whether the service or operation can be performed more efficiently to alleviate the need for any increase.
4. The additional or enhanced service or operation to be implemented.
5. Identification of other resources that could be used to meet this need.
6. The financial impact on students, including those with financial need.
7. The current revenue collected and expenditures from the current fee.
8. The estimated revenue to be collected and expenditures for the fee increase.

(b) The board will act upon the budget committee recommendation at the next scheduled meeting.

(c) An increase in these fees can only be implemented with the fall term.

(d) Every five years the university board of trustees shall review the fee increase to determine if the fee has met its intended outcomes and whether the fee should be increased, decreased or discontinued. The

university board of trustees shall submit its findings to the board. Any subsequent decreases or continuation in these fees are delegated to the university board of trustees, with notification to the chancellor.

(4) Each university board of trustees is authorized to establish separate activity and service, health, and athletic fees on the main campus, branch campus, or center.

(a) The fees shall be retained by the university and paid into the separate activity and service, health, and athletic funds. A university may transfer revenues derived from the fees authorized pursuant to this section to a university direct-support organization of the university pursuant to a written agreement approved by the Board of Governors.

(b) The sum of the activity and service, health, and athletic fees a student is required to pay to register for a course shall not exceed 40 percent of the tuition. Within the 40 percent cap, universities may not increase the aggregate sum of activity and service, health, and athletic fees more than 5 percent per year or the same percentage increase in tuition, whichever is higher.

(c) A university may increase its athletic fee to defray the costs associated with changing National Collegiate Athletic Association divisions. Any such increase in the athletic fee may exceed both the 40 percent cap and the 5 percent cap imposed by this subsection. Any such increase must be approved by the athletic fee committee in the process outlined in subparagraph (4)(d) and cannot exceed $2 per credit hour.

(d) Increases in the health, athletic, and activity and service fee must be recommended by a fee committee, at least one-half of whom are students appointed by the student body president. The remainder of the committee shall be appointed by the university president. A chairperson, appointed jointly by the university president and the student body president, shall vote only in the case of a tie. The recommendations of the committee shall take effect only after approval by the university president, after consultation with the student body president, and approval by the university board of trustees. An increase in these fees may occur only once each fiscal year and must be implemented beginning with the fall term.

(e) The student activity and service fee shall be expended for lawful purposes to benefit the student body in general. This shall include, but shall not be limited to, student publications and grants to duly recognized student organizations, the membership of which is open to all students at the university without regard to race, sex, or religion. The fee may not benefit activities for which an admission fee is charged to students, except for student-government-association-sponsored concerts. The allocation and expenditure of the fees shall be determined by the student government association of the university, except that the president of the university may veto any line item or portion thereof within the budget when

submitted by the student government association legislative body. The university president shall have 15 school days from the date of presentation of the budget to act on the allocation and expenditure recommendations, which shall be deemed approved if no action is taken within the 15 school days. If any line item or portion thereof within the budget is vetoed, the student government association legislative body shall within 15 school days make new budget recommendations for expenditure of the vetoed portion of the fees. If the university president vetoes any line item or portion thereof within the new budget revisions, the university president may reallocate by line item that vetoed portion to bond obligations guaranteed by activity and service fees.

(f) Unexpended fees and undisbursed fees remaining at the end of a fiscal year shall be carried over and remain in the student activity and service fund and be available for allocation and expenditure during the next fiscal year.

(5) Technology Fee – Each university board of trustees may establish a technology fee to be paid by all students. The fee may be up to 5 percent of the tuition charged per credit hour. The revenue from this fee shall be used to enhance instructional technology resources for students and faculty. The revenue and expenditures shall be budgeted in the Local Fund budget entity.

(6) Off-Campus Educational Activities - As used herein, "off-campus" refers to locations other than state-funded main campuses, branch campuses, or centers. Each university board of trustees is authorized to establish fees for state fundable off-campus course offerings when the location results in specific, identifiable increased costs to the university. These fees will be in addition to the tuition and associated fees charged to students enrolling in these courses on-campus. The additional fees charged are for the purpose of recovering the increased costs resulting from off-campus vis-à-vis on-campus offerings. The university shall budget the fees collected for these courses to the Student and Other Fee Trust Funds. Each university shall use the additional fees collected to cover the increased cost of these courses and reimburse the appropriate Educational and General fund, or other appropriate fund if the costs are incurred in other than Educational and General funds.

(7) Material and Supply Fees - Each university board of trustees is authorized to assess Material and Supply Fees not to exceed the amount necessary to offset the cost of materials or supply items which are consumed in the course of the student's instructional activities, excluding the cost of equipment and equipment repairs and maintenance. Revenues from such fees shall be budgeted in the Auxiliary Trust Fund.

(8) Housing Rental Rates – Basic rates for housing rental shall be set by each university board of trustees. In addition, the university board of trustees is authorized to establish miscellaneous housing charges for services provided by the university at the request of the students.

(9) Parking Fines, Permits and Decals -- Each university board of trustees shall establish charges for parking decals, permits and parking fines.

(10) Transportation Access Fee - Each university board of trustees is authorized to establish a transportation access fee, with appropriate input from students, to support the university's transportation infrastructure and to increase student access to transportation services.

(11) Returned Check Fee -- Each university board of trustees shall assess a service charge for unpaid checks returned to the university.

(12) Collection costs -- Each university board of trustees is authorized to assess a charge representing reasonable cost of collection efforts to effect payment for overdue accounts. Amounts received for collection costs shall be retained by the university.

(13) Service Charge -- Each university board of trustees is authorized to assess a service charge on university loans in lieu of interest and administrative handling.

(14) Educational Research Center for Child Development Fee -- Each university board of trustees is authorized to assess child care and service fees.

(15) Transient Student Fee – Each university board of trustees is authorized to assess a fee not to exceed $5.00 per course for accepting a transient student and processing the student's admissions application pursuant to Section 1006.73.

(16) Capital Improvement Fee – This fee may be used to fund any project or real property acquisition that meets the requirements of Chapter 1013. Each university board of trustees shall assess $4.76 per credit hour per semester. Any increase in the fee beyond $4.76 must be first recommended by a fee committee, at least half of whom are students appointed by the student body president. The remainder of the committee shall be appointed by the university president. A chairperson, appointed jointly by the university president and the student body president, shall vote only in the case of a tie. The recommendations of the committee shall take effect only after approval by the university president, after consultation with the student body president, and approval by the university board of trustees. An increase in these fees may occur only once each fiscal year and must be implemented beginning with the fall term. The fee may not exceed 10 percent of the tuition for resident students or 10 percent of the sum of tuition

and out-of-state fees for nonresident students. The fee for resident students shall be limited to an increase of $2 per credit hour over the prior year, and any proposed fee increases or decreases must be approved by the Board of Governors. No project proposed by a university which is to be funded by this fee shall be submitted to the Board of Governors for approval without prior consultation with the student government association of that university.

(17) Student Financial Aid Fee – Each university board of trustees is authorized to collect for financial aid purposes an amount not to exceed 5 percent of the tuition and out-of-state fee. The revenues from fees are to remain at each university. A minimum of 75 percent of funds from the student financial aid fee shall be used to provide financial aid based on demonstrated financial need. Each university shall report annually to the Board of Governors on the revenue collected pursuant to this subsection, the amount carried forward, the criteria used to make awards, the amount and number of awards for each criterion, and a delineation of the distribution of such awards. The report shall include an assessment by category of the financial need of every student who receives an award, regardless of the purpose for which the award is received. Awards which are based on financial need shall be distributed in accordance with the federal methodology for determining need. An award for academic merit shall require a minimum overall grade point average of 3.0 on a 4.0 scale or the equivalent for both initial receipt of the award and renewal of the award.

(18) Each university board of trustees is authorized to assess the following fees which will have varied amounts:

(a) Development Research School Fees – activity fees which shall be discretionary with each university.
(b) Library Fines – per book or unit, per day; the funds shall be budgeted to the Student and Other Fee Trust Fund.
(c) Overdue Reserve Library books – per book, per library hour; the funds shall be budgeted to the Student and Other Fee Trust Fund.
(d) Late Equipment Fee, Physical Education – per item, per day.
(e) Fees and fines relating to the use, late return, and loss and damage of facilities and equipment.
(f) Distance Learning Fee - Universities may assess a distance learning fee to any student enrolled in a course listed in the distance learning catalog. The average distance learning fee amount assessed by a state university may not exceed $30 per credit hour.

(19) Each university board of trustees is authorized to assess reasonable fees for incidental non-academic services provided directly to individuals. This could include, but not be limited to, fees for duplicating, lost keys, copyright material, breakage, standardized tests, library loans.

(20) Each university board of trustees is authorized to assess an international student service fee to cover the university costs associated with reporting requirements of the Student and Exchange Visitor Information System administered by the Department of Homeland Security for F-Visa and J-Visa degree seeking students.

(21) Excess Hour Fee –This fee shall be budgeted in the Student and Other Fee Trust Fund.

(a) State universities shall require a student to pay an excess hour surcharge for each credit hour in excess of the number of credit hours required to complete the baccalaureate degree program in which the student is enrolled. Each university must calculate an excess hour threshold for each student based on the number of credit hours required for the degree. For any student who changes degree programs, the excess hour threshold must be adjusted only if the number of credit hours required to complete the new degree program exceeds that of the original degree program.

(~~a~~ b) All state university undergraduate students who entered a postsecondary undergraduate program at any Florida public institution of higher education as a first-time-in-college student in fall 2009 or thereafter and prior to fall 2011 shall pay an excess hour fee equal to 50 percent of the undergraduate tuition identified in Regulation 7.001(3) for each credit hour in excess of 120 percent of the number of credit hours required to complete the baccalaureate degree program in which the student is enrolled.

(~~b~~ c) All state university undergraduate students who entered a postsecondary undergraduate program at any Florida public institution of higher education as a first-time-in-college student in fall 2011 and prior to fall 2012 shall pay an excess hour fee equal to 100 percent of the undergraduate tuition identified in Regulation 7.001(3) for each credit hour in excess of 115 percent of the number of credit hours required to complete the baccalaureate degree program in which the student is enrolled.

(~~c~~ d) All state university undergraduate students who entered a postsecondary undergraduate program at any Florida public institution of higher education as a first-time-in-college student in fall 2012 ~~or~~ through the 2019 spring term ~~and thereafter~~ shall pay an excess hour fee equal to 100 percent of the undergraduate tuition identified in Regulation 7.001(3) for each credit hour in excess of 110 percent of the number of credit hours required to complete the baccalaureate degree program in which the student is enrolled. For the 2019 summer term and thereafter, an excess hour surcharge equal to 100 percent of the tuition rate for each credit hour in excess of 120 percent shall be paid. Effective July 1, 2018 each university shall refund the excess hour

surcharge assessed for up to 12 credit hours to any first-time-in-college student who completes a baccalaureate degree program within four years after their initial enrollment in a university.

(~~d~~ e) Each university shall implement a process for notifying students of this fee upon a student's initial enrollment. A second notice must be provided to the student when the student has attempted the number of credit hours needed to complete the baccalaureate degree program in which the student is enrolled. The second notice must include a recommendation that each student who intends to earn credit hours at the university in excess of the credit hours required for the baccalaureate degree program in which the student is enrolled meet with the student's academic advisor. The excess hours' determination shall be based on the baccalaureate degree program in which the student is enrolled. If a student changes degree programs, the excess hours' threshold shall be adjusted to the new program's required hours. Pursuant to Regulation 7.002(1), the university shall establish regulation procedures for the implementation of this section.

(~~e~~ f) All credit hours for courses taken at the university from which the student is seeking a baccalaureate degree shall be included when calculating the number of hours taken by a student, including:

1. Failed courses.
2. Courses dropped or withdrawn from after the university's advertised last day of the drop and add period, except as provided for in subparagraph (21)(f).
3. Repeated courses, except repeated courses for which the student has paid the full cost of instruction as provided in Regulation 7.001(11).
4. All credit hours earned at another institution and accepted for transfer by the university and applied toward the student's baccalaureate degree program.

(~~f~~ g) All credit hours earned under the following circumstances shall not be calculated as hours required to earn a baccalaureate degree:

1. College credits earned through an articulated accelerated mechanism.
2. Credit hours earned through internship programs.
3. Credit hours required for certification, recertification, or certificate programs.
4. Credit hours in courses from which a student must withdraw due to reasons of medical or personal hardship.
5. Credit hours taken by active-duty military personnel.
6. Credit hours required to achieve a dual major taken while pursing a baccalaureate degree.
7. Remedial and English as a Second Language credit hours.

8. Credit hours earned in military science courses that are part of the Reserve Officers' Training Corps program.

(22) Convenience fee – Each university board of trustees may establish a convenience fee when accepting payments by credit cards, charge cards, and debit cards. The fee shall not be greater than the cost of providing the service. The fee is not refundable to the payor.

(23) Before the Board of Governors' last meeting of each calendar year, the university board of trustees shall notify the board of any potential new fees that are being considered by the university. A university board of trustees may then submit a proposal for a new fee not currently authorized in board regulation or statute to the Board of Governors' budget committee for consideration by the committee during a June meeting.

(a) The proposal shall be submitted in a format designated by the chancellor, and include at a minimum:

1. The purpose to be served or accomplished with the fee.
2. The demonstrable student-based need for the fee that is currently not being met through existing university services, operations or another fee.
3. The process used to assure substantial student input or involvement.
4. Any proposed restrictions, limitations, or conditions to be placed on the fee.
5. The financial impact of the fee on students, including those with financial need.
6. The estimated revenue to be collected and proposed expenditures for the new fee.
7. The outcome measures that will be implemented to determine when the purpose of the fee will be accomplished.

(b) The aggregate sum of any fees approved by the board that a student is required to pay to register for a course shall not exceed 10 percent of tuition. All other fees shall be based on cost.

(c) The fee can only be implemented in the fall term.

(d) The revenue generated by this fee may not be transferred to an auxiliary enterprise or a direct-support organization and may not be used to pay or secure debt.

(e) The university shall account for the revenue and detailed expenditures of this fee in the Annual Report.

(f) The fee cannot be an extension of, or cover the same services, as an existing statutory fee.

(g) The fee cannot be utilized to create additional bonding capacity in an existing fee.

(h) The fee should support a new service or activity that is not currently supported or should be supported with education and general funds (state and tuition).
(i) The fee shall not supplant revenue from other sources that are currently used or have been used to support a service or activity.
(j) The fee should support a service or activity in which a majority of students is able to participate or from which derive a benefit.
(k) Once the board approves a fee under this section, a university fee committee shall be established similar to other existing fee committees.
(l) The board will act upon the budget committee recommendation at the next scheduled meeting.
(m) Every five years the university board of trustees shall review the fee to determine if the fee has met its intended outcomes and whether the fee should be increased, decreased or discontinued. The university board of trustees shall submit its findings to the board. Any subsequent decreases or continuation in these fees are delegated to the university board of trustees, with notification to the chancellor.
(n) If a university board of trustees' proposal is denied, within five calendar days the university board of trustees may request reconsideration by the board's Tuition Appeals Committee, which shall consist of the chair of the board and the chair of each board committee. The Tuition Appeals Committee will meet within ten calendar days after the Board of Governors denial to consider a university board of trustees request for reconsideration.

(24) Pursuant to subparagraph (23), the university boards of trustees designated below are authorized to assess the following fees:

(a) Green Fee – This fee may be assessed to establish or improve the use of renewable energy technologies or energy efficiencies that lower the university's greenhouse emissions.

1. University of South Florida: up to $1.00 per credit hour
2. New College of Florida: up to $1.00 per credit hour
3. University of West Florida: up to $1.00 per credit hour

(b) Test Preparation Fee – at cost. This fee may be assessed to increase accessibility to test preparation courses in programs where students are expected to obtain specific preparation for a practice-based examination.

1. Florida International University
2. Florida A&M University – (bar test preparation)

(c) Student Life and Services Fee – This fee may be assessed to expand student participation in transformational learning opportunities that build new and enhances ongoing activities which connect students to the institution.

1. University of North Florida: not to exceed 5 percent of tuition.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Budget and Finance Committee
August 29, 2019

SUBJECT: Board of Governors Regulation 7.008 Waiver and Exemptions of Tuition and Fees

PROPOSED COMMITTEE ACTION

Approve the Public Notice of Intent to Amend Regulation 7.008.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

Senate Bill 7098 was signed by the Governor on May 10, 2019.

Included in the bill is the requirement that boards of trustees must waive tuition and associated fees for children and spouses of deceased emergency medical technicians, paramedics, and active duty members of the United States Armed Forces. The amount waived by the university shall be an amount equal to the cost of tuition and associated fees for a total of 120 credit hours.

The child or spouse may attend on either a full-time or part-time basis. The benefits provided to a child under this section must continue until the child's 25th birthday. The benefits provided to a spouse under this subsection must commence within five years after the death occurs and may continue until the 10th anniversary of that death.

Upon failure of any child or spouse benefited by the provisions of this subsection to comply with the ordinary and minimum requirements of the institution attended, both as to discipline and scholarship, the benefits shall be withdrawn as to the child or spouse and no further moneys may be expended for the child's or spouse's benefits so long as such failure or delinquency continues.

Only a student in good standing in his or her respective university may receive the benefits.

A child or spouse receiving benefits under this subsection must be enrolled according to the customary rules and requirements of the university attended.

Supporting Documentation Included: Amended Regulation 7.008

Facilitators/Presenters: Tim Jones

7.008 Waivers and Exemptions of Tuition and Fees

(1) Each university board of trustees is authorized to waive tuition, non-resident tuition and associated fees for purposes that support and enhance the mission of the university. All tuition, non-resident tuition and associated fees waived must be based on regulations that are adopted by the university board of trustees and where applicable, consistent with regulations adopted by the Board of Governors.

(2) Each university shall have an individual designated as the university liaison to handle student issues and/or questions regarding waivers.

(3) The following categories of tuition and fee exemptions and waivers are established pursuant to Florida Statute and are considered mandatory:

(a) Deceased Law Enforcement, Correctional, or Correctional Probation Officers Employed by the State or Political Subdivision thereof – Each university board of trustees shall waive certain educational expenses that the child or spouse of the deceased officer incurs while obtaining an undergraduate education or a postgraduate education if a law enforcement, correctional, or correctional probation officer is accidentally killed or receives accidental bodily injury which results in the loss of the officer's life while engaged in the performance of the officer's law enforcement duties on or after June 22, 1990, or is unlawfully and intentionally killed or dies as a result of such unlawful and intentional act on or after July 1, 1980, while the officer was employed by a political subdivision of the state.

1. The amount waived by the university must~~shall~~ be in an amount equal to the cost of tuition and associated fees for a total of 120 credit hours. The child or spouse may attend on either a full-time or part-time basis. The benefits provided to a child under this section shall continue until the child's 25th birthday. The benefits provided to a spouse under this subsection must commence within five (5) years after the death occurs, and entitlement thereto shall continue until the 10th anniversary of that death.

2. Upon failure of any child or spouse who receives a waiver in accordance with~~benefited by the provisions of this~~ this subsection to comply with the ordinary and minimum requirements regarding discipline and scholarship of the institution attended, ~~both as to discipline and scholarship, the~~ such benefits ~~shall~~ must be withdrawn as to the child or spouse and no further moneys may be expended for the child's or spouse's benefits so long as such failure or delinquency continues.

3. Only a student in good standing in his or her respective university

may receive the benefits provided in this subsection.

4. A child or spouse receiving benefits under this subsection must be enrolled according to the customary rules and requirements of the university attended.

(b) Deceased Firefighters Employed by the State or a Political Subdivision thereof - Each university board of trustees shall waive certain educational expenses that the child or spouse of the deceased firefighter incurs while obtaining an undergraduate education or a postgraduate education if a firefighter is accidentally killed or receives accidental bodily injury which results in the loss of the firefighter's life while engaged in the performance of the firefighter's duties on or after June 22, 1990, or is unlawfully and intentionally killed or dies as a result of such unlawful and intentional act on or after July 1, 1980, while the firefighter was employed by a political subdivision of the state.

1. The amount waived by the university mustshall be in an amount equal to the cost

of tuition and associated fees for a total of 120 credit hours. The child or spouse may attend on either a full-time or part-time basis. The benefits provided to a child under this section shall continue until the child's 25th birthday. The benefits provided to a spouse under this subsection must commence within five (5) years after the death occurs, and entitlement thereto shall continue until the 10th anniversary of that death.

2. Upon failure of any child or spouse who receives a waiver in accordance with benefited by the provisions of this

subsection to comply with the ordinary and minimum requirements regarding discipline and scholarship of the institution attended, such both as to discipline and scholarship, the benefits must

shall be withdrawn as to the child or spouse and no further moneys may be expended for the child's or spouse's benefits so long as such failure or delinquency continues.

3. Only a student in good standing in his or her respective university may receive the benefits provided in this subsection.

4. 4. A child or spouse receiving benefits under this subsection must be enrolled according to the customary rules and requirements of the university attended.

(c) Deceased Emergency Medical technician or Paramedic Employed by the State or Political Subdivision thereof – Each university board of trustees shall waive certain educational expenses that the child or spouse of a deceased emergency medical technician or paramedic incurs while obtaining an undergraduate education or postgraduate education if an emergency medical technician or paramedic is accidentally killed or receives an accidental bodily injury that subsequently results in the loss of the emergency medical

technician's or paramedic's life while engaged in the performance of his or her duties on or after July 1, 2019.

1. The amount waived by the university must be in an amount equal to the cost of tuition and associated fees for a total of 120 credit hours. The child or spouse may attend on either a full-time or part-time basis. The benefits provided to a child under this section must continue until the child's 25th birthday. The benefits provided to a spouse under this subsection must commence within five (5) years after the death occurs, and entitlement thereto may continue until the 10th anniversary of that death.

2. Upon failure of any child or spouse who receives a waiver in accordance with this subsection to comply with the ordinary and minimum requirements regarding discipline and scholarship of the institution attended, such benefits to the child or spouse must be withdrawn and no further moneys may be expended for the child's or spouse's benefits so long as such failure or delinquency continues.

3. Only a student in good standing in his or her respective university may receive the benefits provided in this subsection.

4. A child or spouse receiving benefits under this subsection must be enrolled according to the customary rules and requirements of the university attended.

(de) Deceased Teacher or School Administrator Employed by a Florida District school Board – Each university board of trustees shall waive certain educational expenses that the child of the deceased teacher or school administrator incurs while obtaining an undergraduate education or a postgraduate education if the teacher or school administrator is killed or is injured and dies as a result of an unlawful and intentional act, provided such killing or injury inflicted by another person and the motivation for the act is related in whole or part to the fact that the individual is a teacher or school administrator, or such act is inflicted while he or she is engaged in the performance of teaching duties or schooladministration duties while employed by a Florida district school board. The amount waived by the university shall be an amount equal to the cost of tuition and associated fees for a total of 120 credit hours at a university. The child may attend on either a full-time or part-time basis. The benefits provided under this paragraph shall continue until the child's 25th birthday.

1. Upon failure of any child benefited by the provisions of this paragraph to comply with the ordinary and minimum requirements of the university attended, both as to discipline and scholarship, the benefits shall be withdrawn as to the child and no further moneys may be expended for the child's benefits so long as such failure or delinquency continues.

2. A student who becomes eligible for benefits under the provisions of this paragraph while enrolled in a university must be in good standing with the institution to receive the benefits provided herein.
3. A child receiving benefits under this paragraph must be enrolled according to the customary rules and requirements of the university attended.

(e) Deceased Active Duty Member of the United State Armed Forces – Each university board of trustees must waive certain educational expenses that the child or spouse of the deceased active duty United States Armed Forces member incurs while obtaining an undergraduate education or a postgraduate education if a member is killed or receives bodily injury while on active duty which results in the loss of the member's life, provided that such killing is not the result of suicide and that such bodily injury is not intentionally self-inflicted. Members of the Florida National Guard who are killed, or who die as the result of injuries incurred, while on active duty qualify for educational benefits as a member of the United States Armed Forces as provided in this subsection.

1. The amount waived by the university must be in an amount equal to the cost of tuition and associated fees for a total of 120 credit hours. The child or spouse may attend on either a full-time or part-time basis. The benefits provided to a child under this section must continue until the child's 25th birthday. The benefits provided to a spouse under this subsection must commence within five (5) years after the death occurs and may continue until the 10th anniversary of that death.

2. Upon failure of any child or spouse who receives a waiver in accordance with this subsection to comply with the ordinary and minimum requirements regarding discipline and scholarship of the institution attended, such benefits to the child or spouse must be withdrawn and no further moneys may be expended for the child's or spouse's benefits so long as such failure or delinquency continues.

3. Only a student in good standing in his or her respective university may receive the benefits provided in this subsection.

4. A child or spouse receiving benefits under this subsection shall be enrolled according to the customary rules and requirements of the university attended.

(f~~d~~) Wrongfully Incarcerated – A university shall waive tuition and associated fees for up to 120 hours of instruction if the wrongfully incarcerated person meets and maintains the regular admission requirement of the university; remains registered and makes satisfactory academic progress as defined by the university in which the person is enrolled. A wrongfully incarcerated person is someone who has had a felony conviction and sentence vacated by a court and the original sentencing court has issued its order finding that the person neither committed the act, nor did not aid, abet or act as an accomplice or accessory to the act or offense.

(ge) Acceleration – Each university board of trustees shall waive tuition and associated fees for eligible secondary, or home educated, students who enroll in postsecondary courses that are creditable toward both a Florida high school diploma and an associate or baccalaureate degree. Early admission is a form of dual enrollment through which eligible secondary students enroll in a postsecondary institution on a full-time basis in courses that are creditable toward the high school diploma and the associate or baccalaureate degree.

(hf) Florida Department of Children and Families - Each university board of trustees shall exempt from the payment of tuition and associated fees, including lab fees, any student who is or was at the time he or she reached the age of 18 in the custody of the Department of Children and Families or a relative or nonrelative under section 39.5085, Florida Statutes; who was adopted from the Department of Children and Families after May 5, 1997; or after spending at least six (6) months in the custody of the Department of Children and Families after reaching 16 years of age. Additionally, material and supply fees and fees associated with enrollment in career-preparatory instruction shall be exempted. Any student requesting this exemption must provide certification of eligibility from the Department of Children and Families or its contracted providers to the university in which the student seeks to enroll. This exemption shall remain valid up until the time the student reaches the age of 28.

(ig) Homeless – Each university board of trustees shall waive tuition and associated fees for any student who lacks a fixed, regular, and adequate nighttime residence, excluding university housing, or whose primary nighttime residence is a public or private shelter designed to provide temporary residence for individuals intended to be institutionalized, or a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

(jh) Child Protection and Child Welfare Personnel – Employees as defined in section 402.403, Florida Statutes, who are enrolled in an accredited master's degree in social work or a certificate program, and maintain at least a grade of 'B' in all courses are exempt from tuition and fees.

1. Eligible employees shall have an approved Department of Children and Families, community-based agency or a subcontractor waiver form stating that the necessary employment qualifications have been met.

(ki) School Psychology Training Program – Each university board of trustees shall waive tuition and associated fees for internship credit hours applicable to an internship in the public school system under the supervision of the Florida Department of Education certified school psychologist employed by the school system for any graduate student.

(lj) Purple Heart Recipients – Each university board of trustees shall waive undergraduate tuition and associated fees for each recipient of a Purple Heart, or another combat decoration superior in precedence which was awarded for valor, and who:

1 . Is enrolled as a full-time, part-time, or summer-school student in an undergraduate program that terminates in a degree or certificate;
2 . Is currently, or was at the time of the military action that resulted in the awarding of the Purple Heart or other combat decoration superior in precedence, a resident of this state; and
3 . Submits to the university the DD-214 form issued at the time of separation from service as documentation that the student has received a Purple Heart or another combat decoration superior in precedence. In situations where admissions or financial aid application deadlines preclude providing a DD-214 in time to meet such a deadline, the official (service specific) transmitting correspondence that would normally accompany such an award to a previously discharged service member would suffice until an updated DD-214 could be obtained and presented to the postsecondary institution. However, the updated DD-214 must be submitted to the postsecondary institution by the start of the student's next term of enrollment for continued eligibility for the waiver. In situations where a service member is on active duty and has not been issued a DD-214, the official (service specific) transmitting correspondence that would normally accompany such an award or a certification of the appropriate combat award by the service specific administrative record holder [e.g., Adjutant, G-1 (general staff officer - personnel), or JAG (Judge Advocate General)] would meet the documentation requirement.
4. A waiver for a Purple Heart recipient or recipient of another combat decoration superior in precedence shall be applicable for 110 percent of the number of required credit hours of the degree or certificate program for which the student is enrolled. This waiver is considered "countable aid" for student financial aid purposes. Therefore, if this waiver is administered by an office other than the college financial aid office, college officials must notify the Director of Financial Aid that a student has qualified for the waiver. The waiver covers only tuition and fees associated with credit hour instruction provided directly by the university and does not include any additional fees that may be charged for specialized programs or by external organizations. This includes, but is not limited to, flight school, study abroad travel and living expenses, and courses taken elsewhere as a transient student.

(mk) Non-resident Waiver – Each university board of trustees shall waive out-of-state fees, including the out-of-state financial aid fee, for students, including, but not limited to, students who are undocumented for federal immigration purposes, who meet the following conditions:

1. Attended a secondary school in this state for three (3) consecutive years immediately before graduating from a high school in this state;
2. Apply for enrollment in an institution of higher education with 24 months after high school graduation; and
3. Submit an official Florida high school transcript as evidence of attendance and graduation.
4. The waiver is applicable for 110 percent of the required credit hours of the undergraduate degree or certificate program for which the student is enrolled.
5. A state university student granted an out-of-state fee waiver must be considered a non-resident student for purposes of calculating the system-wide total enrollment of non-resident students as limited in Regulation 7.006.
6. A student who is granted an out of state fee waiver is not eligible for state financial aid.
7. Each university shall, within the non-resident student enrollment system-wide, prioritize the enrollment of a veteran who is granted an out-of-state fee waiver pursuant to paragraph L over a student who is granted an out-of-state fee waiver under this paragraph.

(n~~l~~) Veterans – Each university board of trustees shall waive out-of-state fees for honorably discharged veterans of the United States Armed and Reserve Forces (Air Force, Army, Coast Guard, Marines, and Navy) and the National Guard (Army and Air) who physically reside in Florida while enrolled at a university. Persons who are entitled to and uses educational assistance provided by the United States Department of Veterans Affairs also qualify for this waiver if they physically reside in Florida while enrolled at the university in any term beginning after July 1, 2015. Tuition and fees charged to a veteran or person who qualifies for the out-of-state fee waiver under this subsection may not exceed the tuition and fees charged a resident student enrolled in the same course~~program.~~.

(o~~m~~) Active Duty – Each university board of trustees shall waive out-of-state fees for a person who is an active duty member of the Armed Forces of the United States residing or stationed outside of the state. Tuition and fees charged to a student who qualifies for the out-of-state fee waiver may not exceed the tuition and fees charged to a resident student.

(p~~n~~) Welfare Transition Program – Each university board of trustees shall exempt tuition and fees for any student enrolled in an employment and training program under the welfare transition program. The local workforce development board shall pay the state university for costs incurred for welfare transition program participants.

(q~~o~~) State Employees – Each university board of trustees shall waive tuition and

fees for state employees, subject to approval by an employee's agency head or the equivalent, to enroll in up to six credit hours of courses per term on a space-available basis. This does not include persons employed by a state university.

(4) The following general categories of tuition and fee exemptions and waivers are established pursuant to Florida Statute and are considered discretionary:

(a) Florida Linkage Institutes – Each university board of trustees may exempt up to 25 full-time equivalent students per year from the payment of out-of-state fee and out-of-state financial aid fee for students enrolled through the Florida Linkage Institutes Program.

(b) A university may waive the tuition differential for students who meet the eligibility requirements for the Florida public assistance grant.

(c) Intern Supervisors – Persons who supervise interns for institutions within the State University System may be given one non-transferable certificate (fee waiver) for each full academic term during which the person serves as an intern supervisor. This certificate shall provide for waiver of the basic fee (as defined in Regulation 7.001).

1. Certificate holders are entitled to a waiver of tuition for a maximum of six (6) hours credit instruction (including credit through continuing education) during a single term at any state university.
2. Certificates shall be valid for three (3) years from date of issuance.
3. Eligible recipients of an Intern Participation Certificate may be identified by a university as a person who engages in the direct supervision of at least one university intern for 300 contact hours, which may be accumulated over multiple semesters provided at least 100 contact hours of direct supervision is provided per semester.
4. To be eligible for a Certificate, the internship program must be an essential part of the course of instruction and must be required as part of the degree.
5. Each university shall develop procedures and policies to govern the issuance, distribution, security, and redemption of certificates.
6. Each university shall maintain accurate data on Intern Participation Certificates and annually submit a report of certificate activity to the Board of Governors according to a prescribed format.

(d) University Employees – Each university board of trustees may allow full-time university employees to enroll up to six 6 credit hours of tuition-free courses per term on a space available basis.

(e) Florida residents 60 years of age or older - Each university board of trustees may waive any or all application, tuition, and associated fees for persons 60 years

of age or older who are residents of this state and who enroll to audit courses being offered for college credit. No academic credit shall be awarded for attendance in classes for which fees are waived under this subsection. This privilege may be granted only on a space-available basis, if such classes are not filled as of the close of registration. A university may limit or deny the privilege for courses which are in programs for which the Board of Governors has established selective admissions criteria. Persons paying full fees and state employees taking courses on a space-available basis shall have priority over those persons whose fees are waived in all cases where classroom spaces are limited.

(f) Public School Classroom Teacher – Each university board of trustees may waive tuition and fees for a classroom teacher who is employed full-time by a school district and who meets the academic requirements established by the university for up to six (6) credit hours per term on a space-available basis in undergraduate courses related to special education, mathematics or science approved by the Department of Education. The waiver may not be used for courses scheduled during the school district's regular school day.

(g) Sponsored Credit Courses and Programs – Each university board of trustees is authorized to waive tuition, associated fees and material and supply fees for participants in sponsored credit courses and programs in accordance with Board of Governors Regulation 8.002 and pursuant to a regulation adopted by the university board of trustees under Board Regulation 7.008, and section 1009.26(9), Florida Statutes.

(h) Non-resident students – Non-resident students who are non-degree seeking may be entitled to a waiver of the out-of-state fee if the credit hours generated by such students are non-state fundable and the cost for the program of study is recovered from the fees charged to all students.

(i) Admissions Deposit – A university that establishes an admissions deposit must adopt policies that provide for the waiver of this deposit on the basis of financial hardship.

(5) Each university shall report the purpose, number, authority, and value of all fee waivers and exemptions granted annually in a format prescribed by the Board of Governors. For these reporting purposes, there is no differentiation between waivers and exemptions.

Authority: Section 7(d), Art. IX, Fla. Const.; History–Formerly BOR Rule 6C-7.008 and 6C-2.53, Amended 7-19-74, Amended and Renumbered 12-17-74, Amended 1-10-78, 9-28-81, 8-11-85, Formerly 6C-7.08, Amended 12-25-86, 9-7-87, 12-9-91,

SUBJECT: Board of Governors Regulation 9.007 State University Operating Budgets

PROPOSED COMMITTEE ACTION

Approve the Public Notice of Intent to Amend Regulation 9.007.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

This regulation is being amended to include requirements in Senate Bill 190 that was approved by the Governor on June 18, 2019 and to provide clarification and guidance on other operating budget issues. The following changes include:

- Requires Board of Trustees and Board of Governors to approve the use of carryforward spending plans.
- Clarifies that Education & General (E&G) funds can be used for furniture, fixtures, and equipment.
- Clarifies that E&G funds can be used to maintain, repair, remodel, and renovate existing E&G facilities and space.
- Clarifies the use of interest and investment earnings.
- Defines non-recurring expenditures.
- Requires amendments to the carryforward spending plans be reported to the Board of Governors.

Supporting Documentation Included: Amended Regulation 9.007

9.007 State University Operating Budgets

(1) Each university president shall prepare an operating budget, ~~,~~ including an Education & General (E&G) Carryforward Spending Plan, for approval by the university board of trustees in accordance with instructions, guidelines and standard formats provided by the Board of Governors.

(2) Each university board of trustees shall adopt an operating budget, including an E&G Carryforward Spending Plan, for the general operation of the university as prescribed by the regulations of the Board of Governors. The university board of trustees-ratified operating budget and E&G Carryforward Spending Plan must be is presented to the Board of Governors for approval by a date established by the Chancellor. Each university president shall implement the operating budget and E&G Carryforward Spending Plan of the university as prescribed by Florida Statutes, regulations of the Board of Governors, policies of the university board of trustees, provisions of the General Appropriations Act, and data reflected within the State University System Allocation Summary and Workpapers publication.

(3) The operating budgets of each state university shall consist of represent the following budget entities:

(a) Education and General (E&G)– reports actual and estimated fiscal year operating revenues and expenditures for all E&G funds, including: General Revenue, Student and Other Fees Trust Fund, Educational Enhancement Trust Fund (Lottery), Phosphate Research Trust Fund, – and including the following previously-appropriated trust funds: Experiment Station Federal Grant, Experiment Station Incidental, Extension Service Federal Grant, Extension Service Incidental, UF-HSC Incidental, and UF-Health Science Center Operations and Maintenance. In addition, expenditures from university E&G carryforward funds (unexpended E&G balances from all prior-period E&G appropriations) shall be included in the actual history fiscal year reporting. University budgeted E&G carryforward funds shall not be included in any estimated-year (budgeted) amounts shall be reported in the E&G Carryforward Spending Plan Fund Balance Composition Report.

1. Except as Unless otherwise provided expressed by law, E&G funds are to be used for E&G operating activities only, such as, but not limited to, general instruction, research, public service, plant operations and maintenance,, furniture, fixtures, and equipment, student services, libraries, administrative support, and other enrollment-related and stand-alone operations of the universities.

2. Universities shall accumulate ending E&G fund balances for activities such as those outlined in section 3(a)(4), but not limited to, student successa contingency for unfunded enrollment growth, potential budget reductions, anticipated increases in university operations, and prior year encumbrances. The ending E&G carryforwardfund balances can only be used for nonrecurring expenditures. At any time the unencumbered available balance in the E&G fund of the university board of trustees approved operating budget falls below seven (7) percentfive (5) percent of the approved total, the universitypresident shall provide a written notification and planexplanation to the Board of Governors to attain a seven (7) percent balance of state operating funds within the next fiscal year.
3. Each university that retains a state operating fund carryforward balance in excess of the seven (7) percent minimum shall submit an E&G Carryforward Spending Plan for its excess carry forward balance. The Carryforward Spending Plan shall be submitted to the university's board of trustees for review, approval, or if necessary, amendment by September 1, 2020, and each September 1 thereafter. The Board of Governors shall review, approve, and amend, if necessary, each university's E&G Carryforward Spending Plan by October 1, 2020, and each October 1 thereafter.
4. A university's E&G Carryforward Spending Plan shall include the estimated cost per planned expenditure and a projected timeline for completion of the expenditure. Authorized expenditures in an E&G Carryforward Spending Plan may include:
    a. Commitment of funds to a public education capital outlay project for which an appropriation has previously been provided that requires additional funds for completion and which is included in the list required by section 1001.706(12)(d);
    b. Completion of a renovation, repair, or maintenance project (as defined in Board Regulation 14.0025) that is consistent with the provisions of section 1013.64(1), up to $5 million per project and replacement of a minor facility that does not exceed 10,000 gross square feet in size up to $2 million;
    c. Completion of a remodeling or infrastructure project (as defined in Board Regulation 14.0025), including a project for a developmental research school, up to $10 million per project, if such project is survey recommended pursuant to section 1013.31;

d. Completion of a repair or replacement project necessary due to damage caused by a natural disaster for buildings included in the inventory required pursuant to section 1013.31;
e. Operating expenditures that support the university mission and that are nonrecurring; and
f. Any purpose specified by the university board of trustees or in the General Appropriations Act.

5. Annually, by September 30, the chief financial officer of each university shall certify the unexpended amount of funds appropriated to the university from the General Revenue Fund, the Educational Enhancement Trust Fund, and the Student and Other Fees Trust Fund as of June 30 of the previous fiscal year.

2.6. A University may spend the minimum carry forward balance of seven (7) percent if a demonstrated emergency exists and the plan is approved by the university's board of trustees and the Board of Governors.

7. Expenditures from any source of funds by any university shall not exceed the funds available. No expenditure of funds, contract, or agreement of any nature shall be made that requires additional appropriation of state funds by the Legislature unless specifically authorized in advance by law or the General Appropriations Act.

8. The following units are required to report under this budget entity:

State Universities
UF - Institute of Food and Agricultural Science
UF Health Science Center
USF Medical Center
FSU Medical School
UCF Medical School
FIU Medical School
FAU Medical School
FAMU-/FSU College of Engineering
Florida Postsecondary Comprehensive Transition Program (UCF)

(b) Contracts and Grants – reports actual and estimated year revenues, expenditures, and positions for university functions which are supported by foundations, various state and federal agencies, local units of governments, businesses, and industries. Universities shall comply with all applicable federal, state, local, and university

regulations and guidelines as they relate to grants, contracts, and sponsored research programs.

(c) Auxiliary Enterprises – reports actual and estimated year revenues, expenditures, and positions for self-supporting functions such as, but not limited to, parking services, housing, bookstore operations, and food services.

(d) Local Funds – reports actual and estimated year revenues, expenditures, and positions for the following specific areas:

1. Student Activities – revenues generated primarily from the activity and service fee each university is authorized to charge its students as a component of the mandatory fee schedule. Activities commonly supported by these revenues include student government, cultural events, student organizations, and intramural/club events.
2. Intercollegiate Athletics – revenues generated from the student athletic fee that each university is authorized to collect as a component of the mandatory fee schedule, and from other sources including ticket sales, radio/TV, bowl games, and tournament revenues.
3. Concession Fund – revenues generated from various vending activities located around the campuses. The university's budget must reflect the various departments/activities on each campus which benefit from receipt of these funds.
4. Student Financial Aid – revenues received by the university for loans, grants, scholarships, and other student financial aid. Expenditures of these funds must be reported by activities such as externally-funded loans, student scholarships, need-based financial aid, academic-based financial aid, and athletic grants/scholarships.
5. Technology Fee – revenues generated from the technology fee that a university is authorized to charge its students as a component of the mandatory fee schedule. Proceeds from this fee shall be used to enhance instructional technology resources for students and faculty.
6. Board-Approved Fees – student fees presented to the Board of Governors for approval by a university board of trustees that is intended to address a student need not currently being met through existing university services, operations, or another fee.
7. Self-Insurance Programs – revenues received by the university from entities and individuals protected by the self-insurance

programs. This budget must reflect expenditures related to the administration of the self-insurance programs and the judgments or claims arising out of activities for which the self-insurance program was created.

(e) Faculty Practice Plan – related to the activities for the state universities' medical schools and health centers. This budget must be designed to report the monetary level of clinical activity regarding the training of students, post-graduate health professionals, and medical faculty.

(4) The operating budgets of each university shall represent the following:

(a) The university's plan for utilizing the resources available through direct or continuing appropriations by the Legislature, allocation amendments, or from local sources including student tuition and fees. The provisions of the General Appropriations Act and the SUS Allocation Summary and Workpapers publication will be taken into consideration in the development and preparation of the E&G data.

(b) Actual prior-year revenues, expenditures (including E&G carryforward amounts expended), and positions, as well as current-year estimated revenues, expenditures, and positions. University E&G carryforward funds shall not be included in any estimated-year (budgeted) amounts, but shall be reportedbudgeted in the E&G Carryforward Spending Plan.

(c) Assurance that the universities are in compliance with general legislative intent for expenditure of the appropriated state funds and with the Board of Governors' regulations, guidelines and priorities for all funding sources..

(5) Any earnings (interest, investment or other) earnings resulting from the investment of current-year E&G appropriations are considered to be of the same nature as the original appropriations, and are subject to the same expenditure regulations as the original appropriations. E&G interest earnings are not to be utilized for non-E&G related activities or for fixed capital outlay activities except as provided where expressly allowed by law. Interest Earnings resulting from invested E&G carryforward funds are considered to be additions to the university's E&G carryforward balance .and shall be expended in accordance with section (3)(a) of this regulation.

Anticipated interest earnings for the estimated year from invested E&G funds should not be included when building the detailed operating budget schedules. Estimated-year E&G interest earnings and planned expenditures of these funds should only be reported on the manually-prepared E&G Schedule I and Summary Schedule I reports.

(6) Any unexpended E&G appropriation carried forward to the fund balance in a new fiscal year shall be utilized in support of nonrecurring E&G operating activities only except as otherwise provided where expressly allow by law.

(7) E&G non-recurring is defined as an expenditure that is not expected to be needed or available after a point in time. Non-recurring expenditures have distinct elements:

(a) Time limited in nature, where an end date to a given contract or activity is known,
(b) There is no promise or guarantee of future funding,
(c) May cross multiple years, but the above two provisions apply,
(d) May address financial challenges resulting from external factors (examples could include, but are not limited to, federal government shutdown, drop in state revenue resulting in a mid-year reduction)

(8) Any amendments to the approved E&G Carryforward Spending Plan during the fiscal year shall be reported to the Board of Governors for a time period and in a format as prescribed by the ChancellorB.

Authority: Section 7(d), Art. IX, Fla. Const., History: New 12-6-07, Amended 11-21-13, 9-22-16, _____.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Budget and Finance Committee
August 29, 2019

SUBJECT: 2019-2020 State University System Operating Budget

PROPOSED COMMITTEE ACTION

Approve the 2019-2020 State University System Operating Budget.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Regulation 9.007

BACKGROUND INFORMATION

Each state university is required to submit a detailed operating plan for each budget entity for the 2019-2020 fiscal year. The State University System (SUS) operating budget consists of five different budget entities: 1) Education and General, 2) Contracts and Grants, 3) Auxiliary Enterprises, 4) Local Funds, and 5) Faculty Practice Plans.

1. The Education and General (E&G) budget entity includes the allocation of funds appropriated by the 2019 Legislature, student tuition, and other previously appropriated funds. The E&G budget entity contains resources that provide educational opportunities to citizens through instructional programs; research directed toward solving technical, social, and economic problems facing the state and nation; and public service programs. Universities have flexibility in the development of the E&G operating budget but must report in the traditional SUS categories.

2. The Contracts and Grants budget entity supports research and public service through awards from federal, state, and local sources.

3. Auxiliary Enterprises budget entity is comprised of ancillary support units such as student housing, food service, bookstores, parking services, and computer support.

4. The Local Funds budget entity consists of operating resources for student activities, athletics, concessions, student financial aid, technology fee, Board-approved local fees, and self-insurance programs.

5. Finally, the Faculty Practice Plans budget entity provides for clinical activities associated with the University of Florida and University of South Florida Health Centers, and the Florida State University, University of Central Florida, and Florida International University Medical Schools.

Each university Board of Trustees has approved an operating budget. The universities have developed their budgets in accordance with Board Regulation 9.007 State University System Operating Budgets. The regulation requires each university to maintain an unencumbered balance in the E&G fund equal to or greater than seven percent of the university Board of Trustees approved operating budget.

STATE UNIVERSITY SYSTEM OF FLORIDA
2019-2020 System Operating Budget
University Summary Schedule I Reports

The state universities are required to submit a detailed plan for each budget entity for the 2019-2020 fiscal year. Universities have developed their budgets in accordance with Board of Governors Regulation 9.007 – State University System Operating Budgets. Each university Board of Trustees has approved an operating budget for the current year.

The State University System (SUS) operating budget consists of five different budget entities: 1) Education and General, which includes both non-medical and medical entities, 2) Contracts and Grants, 3) Auxiliary Enterprises, 4) Local Funds, and 5) Faculty Practice Plans which are affiliated with the universities' medical programs. A description of these entities is provided below:

1. The **Education and General** budget funds the general instruction, research, and public service operations of the universities. A large portion of the system's 2019-2020 beginning fund balance reserves ($361.4 million) is dedicated to meeting the 7% reserve requirement set forth in Section 1011.45(1) of the Florida Statutes. Additionally, millions of dollars have been reserved by the SUS to cover the costs associated with the hiring of faculty, maintenance of facilities and equipment, the maintenance of each university's financial software system, various research enhancement programs and initiatives, and the potential for budget reduction shortfalls.
   NOTES:
   1) For fiscal 2019-20, the Board of Governors will not be approving the non-operating expenditures line items for University E&G Carryforward or Fixed Capital Outlay. These items will be reviewed and approved at the October 3, 2019, Budget and Finance Committee meeting.
   2) The Florida Postsecondary Comprehensive Transition Program estimated activity, for which the University of Central Florida is the fiscal agent, is reflected in the Education and General budget column.

2. The **Contracts and Grants** budget contains activities in support of research, public service, and training. Large fund balances are due to the timing of receipt of federal contracts or grants.

3. **Auxiliaries** are ancillary support units on each university campus. Major activities include housing, food services, bookstores, student health centers, facilities management, and computer support. Ending fund balances includes financial activities such as debt service payments, reserves, repair and replacement reserves for future maintenance costs, construction and renovation of auxiliary facilities, and prior-year encumbrances.

4. **Local Funds** include the following university activities:
a) **Student Activities –** Supported primarily by the student activity and service fee revenues generated by the operations of student government, cultural events, organizations, and intramural/club sports.
b) **Financial Aid –** This activity represents the financial aid amounts for which the university is fiscally responsible. Examples include the student financial aid fee, bright futures, federal grants, college work study, and scholarships. The ending fund balance represents a timing difference between the receipt of the funds and disbursement to students.
c) **Concessions –** These resources are generated from various vending machines located on the university campuses.
d) **Athletics –** Revenues are primarily derived from the student athletic fee, ticket sales, and sales of other goods and services. Sufficient fund balances are maintained to provide the necessary support for ongoing athletic activities.
e) **Technology Fee –** Revenues generated from this fee are to be used to enhance instructional technology resources for students and faculty.
f) **Board Approved Local Fees –** Resources generated from these local fees are utilized to address student-based needs not currently being met through existing university services, operations, or another fee.
g) **Self-Insurance Programs –** These programs at UF, FSU, USF, UCF, FAU, and FIU are directed by the respective self-insurance councils and the captive insurance companies (these companies underwrite the risks of its owner and the owner's affiliates). These activities are supported by premiums charged to the insured individuals and entities (primarily medical faculty and institutions).

5. **Faculty Practice –** The Faculty Practice Plans collect and distribute income from faculty billings for patient services to the University of Florida, Florida State University, University of South Florida, Florida Atlantic University, University of Central Florida, and Florida International University Medical Schools and Health Science Centers.

Other notes referred to on the Summary Schedule I report are:

6. Other Receipts/Revenues includes items such as interest, penalties, refunds, admissions, fines, taxes, etc.

7. Other Non-Operating Expenditures include items such as refunds, payment of sales taxes, or indirect costs.

The following Summary Schedule I reports were provided to the Board of Governors' Office of Budgeting and Fiscal Policy as a component of each state university's annual operating budget for fiscal year 2019-2020.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Budget and Finance Committee
August 29, 2019

SUBJECT: 2019-2020 Board General Office Budget

PROPOSED COMMITTEE ACTION

Approve the 2019-2020 Board General Office Budget and authorize the Chancellor to make changes as necessary to support office functions.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; 2018 General Appropriations Act

BACKGROUND INFORMATION

The Board General Office Budget for 2019-2020 totals $11.4 million and supports 65 authorized positions. The 2019 General Appropriations Act allocates funds by specific category and funding source as follows:

Appropriation Category	Appropriation
Salaries & Benefits - GR	$6,078,233
Salaries & Benefits – Trust Funds	$794,554
Other Personal Services – GR	$51,310
Other Personal Services – Trust Funds	$20,785
Expenses - GR	$736,982
Expenses – Trust Funds	$156,799
Operating Capital Outlay - GR	$11,782
Operating Capital Outlay – Trust Funds	$5,950
Contracted Services – GR*	$784,103
Contracted Services – Trust Funds	$73,000
Risk Management Insurance - GR	$11,960

DMS – HR Services - GR	$17,110
DMS – HR Services – Trust Funds	$4,249
Data Processing Services - GR	$269,527
Special Projects - GR	$2,350,000

*$2,350,000 in pass-through funds were included in the Board General Office Budget for a Take Stock in Children program and UF Medical Marijuana Clinical Research program.

Each funding source and category has specific restrictions on spending funds from that appropriation. Appropriations are allowed to be transferred between categories via budget transfers filed with the Governor's Office. These transfers cannot exceed five percent or $250,000 whichever is greater. Any transfers in excess of this amount must be approved by the Legislature and Governor through an established budget amendment process.

Appropriation Funding Source:

- General Revenue – appropriations from this source have the least restrictions and can be used for any basic operating expense.
- Trust Funds – appropriations from this source are primarily used to support Board Facility Office staff and expenses.

Appropriation Category:

- Salaries & Benefits – salaries and benefits associated with 63 authorized positions.
- Other Personal Services – these funds are utilized for temporary employment. The Board utilizes university students to supplement basic phone coverage and other office needs.
- Expenses – these funds are utilized for basic operating expenses such as travel, rent, office supplies, or equipment costing less than $1,000.
- Operating Capital Outlay – these funds are utilized for items costing more than $1,000, such as computers or furniture.
- Contracted Services – these funds are utilized for any service requiring a contractual agreement.
- Risk Management Insurance – these funds are transferred to the Department of Management Services to cover the costs associated with the State's risk management pool.
- DMS – HR Services – these funds are transferred to the Department of Management Services to cover the costs associated with the State's PeopleFirst System.

- Data Processing Services – these funds are transferred to the Northwest Regional Data Center to pay for data storage services.
- Special Projects – legislative initiatives included in the General Appropriations Act.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Budget and Finance Committee
August 29, 2019

SUBJECT: 2020-2021 State University System Legislative Budget Request

PROPOSED COMMITTEE ACTION

Approve the 2020-2021 operating Legislative Budget Request for the State University System and allow the Chancellor to make technical changes as necessary.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Section 216.023, Florida Statutes

BACKGROUND INFORMATION

Annually, the Board of Governors must prepare and submit a State University System Legislative Budget Request (LBR) for state appropriated operating funds to the Legislature and Governor by October 15. However, with session starting in January the LBR is due September 16. In accordance with subsection 216.023(1), Florida Statutes, this LBR is based on an independent judgment of needs and, pursuant to the LBR instructions, will be presented to the Legislature and Governor by the statutory due date.

The Board approved the 2020-2021 LBR Guidelines at the March 2019 meeting. Technical instructions were provided to the universities and they responded with system and individual university budget needs.

The LBR to be considered will focus on performance-based funding, preeminence, university center of excellence, and base operating initiatives. The LBR totals $5.3 billion and represents a 3.7 percent increase, excluding requests for the FAMU-FSU College of Engineering, Moffitt Cancer Center and the Institute of Human and Machine Cognition. The LBR consists of three major components:

a. Performance-Based Funding of $75 million in additional state investment and $45 million in institutional investments. This would bring the total to $680 million; $340 million in the state's investment and $340 million in the institution's investment. These funds will be allocated based on the Board's performance-based funding model. Resources will be utilized to

continue the improvements made in student success; retention rates, graduation rates, affordability, degrees and jobs.

b. Preeminence funding of $35 million is requested to continue strides made in improving the academic and research footprint of preeminent universities nationally.
c. University Center of Excellence funding of $40 million is requested for non-preeminent universities to enhance a current program's national excellence.
d. Base Operating Initiatives - $36.5 million. This includes funding for operational funding new and existing facilities, State Fire Marshal inspections, and University of Florida – Institute of Food and Agricultural Sciences (UF-IFAS) workload.

Each university has provided information on the following areas:

1. Performance-Based Funding – Each university has provided an overview of the initiatives they are undertaking based on the performance-based funds received this year.
2. Efficiencies - Each university has provided a summary of various efficiency initiatives that have taken place or are underway. These efficiencies are expected to save resources, increase efficiencies, and/or save staff time.
3. Ten Percent Reductions - The detailed budget instructions provided by the Legislature and Governor's Office requested each agency, including universities, to provide information on the impact of a ten percent budget reduction (which is a standard, annual request made by the Legislature and Governor).

Supporting Documentation Included:
1. 2020-21 LBR Executive Summary
2. Base Operating Initiatives
3. University Initiatives
4. Matching Gift Program
5. Statewide & Joint Initiatives
6. Performance-Based Funding Initiatives
7. System Efficiencies
8. Ten Percent Reductions

27	***Incremental Growth for 2020-2021***	***$ 19,773,254***
28	***Total Support w/ Statewide and Joint Initiatives for FY 2020-2021***	***$ 5,311,356,318***

Notes :

- For FY 2020-2021, the System's request for performance funding is as follows: for state investment, $265 M from FY 2019-2020 plus $75 M in new state funds for a total of $340 M; for institutional investment, $295 M from FY 2019-2020 plus $45 M redirected from the system base for a total of $340 M. Total support of $680 M for performance base funding initiatives.

- Operational funding for new university E&G facilities consists of the ongoing funds needed to operate an E&G facility subsequent to being placed into service. Examples include electricity, sewer and water costs, janitorial and grounds services, general maintenance, and other routine expenses.

State University System
Base Operating Initiatives

The following provides a brief explanation of the system initiatives included in the 2020-2021 Legislative Budget Request. More detailed information is available in the Board Office.

1. **Operational Funding for New University E&G Facilities - $30.2 million**

These resources support the basic operations (utilities, janitorial services, and maintenance) for new Education and General facilities authorized by the State for construction or acquisition. For fiscal years 2016-2017, 2017-2018, 2018-2019 and 2020-21, the System did not receive an incremental increase in state support from the Legislature for plant, operations, and maintenance efforts for facilities that opened during the year. Existing university resources were utilized, thus fewer resources were available for the academic enterprise. It is estimated that $30.2 million in recurring funding would be needed to support the three prior years in addition to the upcoming fiscal year.

2. **State Fire Marshal Inspections - $2.4 million**

Pursuant to Section 633.218, Florida Statutes, the State Fire Marshal (SFM) is required to inspect all state-owned buildings on a recurring basis, and high-hazard occupancies must be inspected annually. The 4,000 plus buildings of the State University System generally fall in the category of both state-owned and high hazard, and thus as a practical matter all university facilities are inspected every year by SFM employees.

Historically, the SFM has not assessed an inspection fee to the universities for the annual inspections. It appears that this practice dates back many years to the former Board of Regents with an agreement between Chancellor Reed and the SFM office. However, a recent program review has led the SFM to reinstate invoicing the SUS for fire inspection services as provided by law and Rule 69A-54.004, F.A.C.

According to the SFM, the universities are the only state-owned buildings that are inspected by the SFM without a fee assessment. The SUS and SFM have been in discussions regarding the annual inspections and the fees associated. Below is a break-down from the SFM by university for the annual inspection fees:

Name	Annual Fee
Florida Agricultural & Mechanical University	$105,322.46
Florida Atlantic University	$199,057.14
Florida Gulf Coast University	$94,083.86
Florida International University	$214,346.09
Florida Polytechnic University	$13,849.24
Florida State University	$428,669.57
New College of Florida	$19,264.99
University of Central Florida	$225,543.50
University of Florida	$611,994.82
University of North Florida	$85,111.69
University of South Florida	$326,226.05
University of West Florida	62,876.26
Total:	**$2,386,645.67**

Section 633.218, Florida Statutes, provides that each state department must include in its annual budget proposal a request for sufficient funds to cover the costs of any fees imposed by the SFM services, including inspection fees. Pursuant to statutory language, the SUS requests recurring appropriations in the amount of $2.4 million to cover the annual inspection costs for each university beginning with the 2020-2021 fiscal year.

3. **University of Florida – Institute of Food & Agricultural Sciences (IFAS) Workload - $3.9 million**

The UF-IFAS Workload Formula is a cost to continue funding formula that responds to increased research and extension workload demand. It was developed at the request of and approved by the Board of Governors in 2004. The legislative request for 2020-2021 increased workload is $3.9 million.

The model uses extension delivery methods to measure increases in workload by both extension and research faculty in the form of workload delivery units. The model uses non-traditional teaching methods (such as field consultations, office consultations, telephone and email requests, group workshops, and printed materials) and converts these contacts to the equivalent of student FTEs. These delivery methods are converted by multiplying by a factor to account for level of effort and then divided by 40, which is the number used to convert student credit hours to FTEs. The total IFAS research and extension budget (General Revenue) is divided by this number to determine the value of a workload delivery unit.

The request for UF-IFAS Workload addresses three separate priorities of the University of Florida in their strategic plan: (1) to have "an exceptional academic environment, achieved by a diverse community of students, faculty, and staff";

(2) "growth in research and scholarship that improves the lives of the world's citizens"; and (3) to have "a physical infrastructure and efficient administration and support structure that enables preeminence".

State University System
2020-2021 University Initiatives

- **Total Value: $280 M**

University-Unique Initiative	Total Request	Non-Recurring
FAMU – Academic Program Enhancement	$ 3,500,000	
FAMU – Agriculture, Research, Education and Training in Support of Florida's Agricultural Industry	$ 2,200,000	$ 1,600,000
FAMU – Expansion of Academic Support Services	$ 2,500,000

FAMU – Student Scholarship Financial Support	$ 6,000,000	
FAMU – Technology Infrastructure	$ 2,000,000	$ 1,000,000
FAMU & FSU College of Engineering – Integrated Advancement for the Joint FAMU-FSU College of Engineering	$ 6,511,000	
FAU – FAU100 (Year 3)	$ 12,800,000	
FGCU – Operational Funding/Student Success	$ 9,200,000	
FIU – Base Funding	$ 17,000,000	
FIU – Target STEM Initiatives	$ 4,998,664	$ 1,100,000
FSU – Enriching Florida's Talent Pipeline (Preeminence)	$ 25,000,000	
FSU – National Rankings Enhancement	$ 25,000,000	
UCF – UCF*orward*	$ 18,400,000	
UCF – UCF RESTORES	$ 3,784,500	$ 1,200,000
UF – Center for Application of Artificial Intelligence	$ 3,880,688	$ 2,100,000
UF – iCoast: Coastal Monitoring for Action	$ 1,065,000	$ 1,065,000
UF – Top 5 National Ranking Operating Support	$ 50,000,000	
UF/IFAS – Algal Bloom Research & Mitigation	$ 1,754,000	$ 1,754,000
UF/IFAS – Demonstration of Reducing Residential Water Quality Impacts	$ 920,000	$ 920,000
UF/IFAS – Florida 4-H Environmental Education	$ 1,625,000	$ 1,625,000
UF/IFAS – IFAS Workload	$ 3,882,213	
UNF – Creation of UNF Medical Nexus	$ 23,819,022	$ 11,032,202
USF – Advancing the academic excellence and national stature of USF, the State University System and Florida	$ 37,424,835	
USF/Florida Institute of Oceanography (FIO), a State University System AISO	$ 1,477,908	
UWF – Developing Talent for Florida's Future	$ 10,100,000	
UWF – Programs of Excellence	$ 3,777,840	
Total	**$ 279,620,670**	**$ 23,396,202**

2020-2021 LBR

State University System
Major Gifts Matching Program

Total: $285 M

Although this program was suspended on June 30, 2011, approximately $285,056,280 represents the total amount of state matching funds outstanding as of date. The matching program provides state matching funds to universities for private donations that establish permanent endowments with the proceeds of the investments used to support libraries, instruction, and research programs.

The total amount of state matching funds by university is presented as follows:

	2006-07	2007-08	2008-09	2009-10	2010-11	Total
UF	$15,910,175	$34,100,562	$19,493,131	$26,203,955	$35,297,440	$131,005,263
FIU	$201,699	$8,334,888	$1,534,335	$8,813,845	$22,887,626	$41,772,393
FSU	$443,732	$11,128,182	$4,809,888	$10,382,199	$12,500,578	$39,264,579
USF	$137,057	$12,994,204	$3,568,757	$2,678,732	$6,631,380	$26,010,130
FGCU	$50,000	$3,873,491	$903,173	$1,566,758	$5,358,859	$11,752,281
UCF	$62,550	$4,423,813	$2,091,570	$1,153,227	$2,533,846	$10,265,006
FAU	$125,000	$5,714,511	$663,142	$1,084,421	$1,931,551	$9,518,625
UNF	$404,794	$1,532,066	$909,135	$1,218,993	$5,195,198	$9,260,186
NCF	$0	$1,195,212	$313,923	$100,000	$938,860	$2,547,995
UWF	$420,000	$107,382	$795,896	$270,129	$844,694	$2,438,101
FAMU	$75,000	$498,643	$0	$0	$648,078	$1,221,721
Total	**$17,830,007**	**$83,902,954**	**$35,082,950**	**$53,472,259**	**$94,768,110**	**$285,056,280**

2020-2021 LBR

Statewide and Joint Initiatives
FAMU-FSU Joint College of Engineering, Moffitt Cancer Center, and Institute for Human and Machine Cognition
FY 2020-2021 Legislative Budget Request

FAMU-FSU Joint College of Engineering - $6.5 M

In the four years since the legislature and partner university leadership recommitted to the joint college, we have seen an increase in most areas by 20%- to a faculty of 119, graduating 500 engineers each year and securing $24M external research funding annually. This growth was fueled by use of carryforward that is now depleted,and the future is jeopardized by the inadequate E&G funding to the college's joint budget. If we are to sustain the recent very positive momentum, we must have financial support. Growing national recognition for the power of this grand experiment in the State of Florida will be disrupted if we do not receive an increase this year.

We have programs planned that will significantly improve the success of our student's retention rates, graduation rates, degree and employment opportunities. We will increase opportunity for our students through hiring new faculty, introducing new courses and degrees in strategic areas for the State, such as Aerospace, Computer, Systems and Biomedical Engineering, and aggressively recruit the best and most diverse cadre of doctoral students.

The joint college is uniquely positioned to develop new and larger research centers that support key areas of technological emphasis, including health technology, materials, aerospace, biomedical engineering, computer engineering, and energy sustainability. These research centers will in turn allow the joint college to expand the size and diversity of its student body and will lead to new intellectual property and spin-off companies in the region.

To meaningfully advance goals related to research, academic quality, overall efficiency and effectiveness of the joint FAMU-FSU College of Engineering, several critical investments must be made. In 2017, the Legislature provided $1M of the $7.168M LBR that was requested. That $1M was allocated by the college to deal with market equity adjustments to salaries, and to pay salaries for new faculty and staff in the areas of undergraduate and graduate student success. We are grateful for the legislature's support, but the additional funds requested are absolutely more essential now in order to meet strategic goals for both FAMU and FSU. This new funding will enable the college to grow to the next level and compensate for nearly a decade of underinvestment.

2020-2021 LBR

Moffitt Cancer Center - $8.5 M

Moffitt is the leading educational facility for oncology in the State. As part of the State University System and a Statutory Teaching Hospital, we train more students in cancer than any other Florida institution.

- Moffitt is a training ground for the next generation of oncologists, scientists and other oncology professionals. Current funding of **$10.6 million** contributes to the education and training of over 2,600 students either rotating or working full time at Moffitt. These students include*:*
    - Full Time Medical Residents and Fellows
    - Post-Doctoral Training Program
        - +100 trainees currently
        - Post-Doctoral fellows attract grants in epidemiology, immunology & health outcomes
    - Medical Residents and Fellows rotate annually through our training programs utilizing a Physician-Scientist Mentorship
    - Undergraduate and Advanced Practice Nursing Students
    - Radiologists
    - Nutrition Therapists
    - Medical and Physician Assistants
    - Pharmacy Students

- Our educational programs start as early as high school with summer internship programs with our Integrated Mathematical Oncology Department.

- Moffitt works with the University of South Florida at the graduate level. Dr. Kenneth Wright (Immunology) has directed an accredited PhD Program since 2001 in Cancer Biology, funded by Moffitt Cancer Center in collaboration with the University of South Florida. Taught exclusively by Moffitt faculty members, it has produced more than 45 graduates and currently have 25 active students. The training program expanded its Cancer Biology degree to include three new majors this year: 1) Integrated Mathematical Oncology; 2) Chemical Biology; and 3) Cancer Immunology Immunotherapy. With four majors, the program now contributes to the training of a more diverse group of tomorrow's scientists.

- We are facing a critical shortage of oncologists in the State of Florida as the next generation reaches the peak cancer age. It is proven that the majority of residents stay in the state they train; Moffitt Cancer Center is working to ensure that we maintain as many residents/physicians as possible.

Moffitt's education funding was at one time almost $14 million. Several reductions occurred during the recession and the appropriation has still not been restored to the 2008 level. While education programs have remained strong, growth and expansion have not been to the levels needed. We are now spending over $19 million a year in education funding.

2020-2021 LBR

In addition, the State Appropriations also funds a portion of the infrastructure necessary for the diverse set of training programs to succeed. These activities include protected time for faculty to train and mentor students and other trainees and maintenance of a wide array of scientific literature and periodicals, which continues to increase as Moffitt expands into new areas of research. Examples of initiatives to be funded from the incremental $8.5M request include:

- Medical Residents, Fellows and Other Training Positions
- Research Graduate Training and Other Research Education
- Other Organizational Training and Education
- Salary Support and Benefits

Junior Faculty (Assistant Members)

A shortfall of cancer physicians and researchers is projected nationally in the coming decades due to many challenges facing trainees and faculty first starting out. For researchers, the limited extramural funding and competition nationally against more senior faculty make it difficult for junior faculty just beginning their careers to be successful. Moffitt emphasizes recruitment and training of early career faculty members to provide a nurturing and robust scientific environment that encourages junior faculty to succeed.

Institute for Human and Machine Cognition (IHMC) - $4.7 M

For the 2020-2021 Legislative Budget Request year, IHMC is requesting $4,739,184 million ($3,739,184 in recurring funds and $1,000,000 in nonrecurring) from the State of Florida to enhance and grow current operations at its Pensacola and Ocala Florida locations. IHMC is a world-renowned research institute working in the areas of artificial intelligence, cyber security, robotics, assistive technologies, natural language understanding, data mining, and other related high technology fields. A 501(c)3 statewide research institute created pursuant to Section 1004.447 F.S., IHMC is part of the State University System of Florida with formal research affiliations with FAU, FIT, UCF, UF, USF, UWF, MOTE Marine, Moffitt Cancer Center and the Andrews Research Institute. IHMC's federal research clients include NASA, Army, Navy, Air Force, DARPA, IARPA including work for special operations community in human performance enhancement and resilience in extreme environments.

IHMC has received national recognition for its community outreach initiatives, including its highly popular public evening lecture series, summer robotics camp, and youth-oriented science and educational outreach initiatives (Science Saturdays and I LOVE Science). In 2016, IHMC launched its STEM-Talk Series, a free podcast series featuring some of the most interesting people in science and technology. With 92 episodes online, STEM-Talk has maintained a 5-star

rating with over one million listeners and was awarded first-place in the Science and Medicine Category of the 12th Annual People's Choice Podcast Awards.

A recognized economic driver, IHMC was honored with the top US Department of Commerce Award for Excellence in Technology-Driven Economic Development. In 2015, IHMC scientists and researchers made worldwide news after placing second in the international DARPA dynamic walking robotics competition held in Pomona, California. In 2016, IHMC won the Silver Medal for its powered exoskeleton in the "Cybathlon" and IHMC has been invited back to compete in the second "Cybathlon" to be held in October 2020. The Cybathlon, held in Zurich Switzerland, is a unique international championship in which people with physical disabilities compete against each other to complete everyday tasks using state-of-the-art technical assistance systems. In January of 2019, IHMC was named one of the five finalists to compete in the three-year Toyota Mobility Assistance International Competition. Also in 2019, CEO Ken Ford was selected to join an elite group of industry leaders (to include senior executives from Google, Oracle, Amazon, and Microsoft) on the newly formed National Security Commission on Artificial Intelligence. IHMC's CEO Dr. Ken Ford and Senior Research Scientist Dr. Jerry Pratt have both been inducted into the Florida Inventor's Hall of Fame. CEO Ken Ford, Senior Research Scientists Bill Clancey and Peter Pirolli and Research Scientist David Fries have recently been honored as elected Fellows of the National Inventors Academy and Research Scientist Dr. Dawn Kernagis received the Young Scientist/Medical Doctor Award from the Undersea and Hyperbaric Medical Society.

Researchers at IHMC pioneer technologies aimed at leveraging and extending human capabilities. Active research areas include: knowledge modeling and sharing, adjustable autonomy, robotics, advanced interfaces and displays, communication and collaboration, computer-mediated learning systems, intelligent data understanding, software agents, cyber security, sensory substitution, natural language understanding, expertise studies, work practice simulation, knowledge representation, and other related areas. IHMC prides itself on a broad and interdisciplinary approach to addressing societal issues and creating advanced technological solutions, thus its research staff includes well-known computer scientists, cognitive psychologists, neuroscientists, physicians, and engineers. IHMC faculty and staff collaborate extensively with industry and government to develop science and technology that can be enabling with respect to society's broader goals. IHMC researchers receive contract and grant funding from an array of government and private sources. IHMC research partners include: DARPA, NSF, NASA, Army, Navy, Air Force, NIH, DOT, IBM, IDEO, Microsoft, Boeing, Lockheed, Bank of America, Salk, UAB, SRI, and SAIC, among many others.

In October 2016, IHMC completed construction of an $8 million, world class research building in Pensacola that houses a state-of-the-art robotics lab and a sensory augmentation lab. Named the "Levin Center for IHMC Research", the building is purposefully equipped with a glass walkway on its second floor to enable (and encourage) student field trips and visitors to experience, in real time, activities transpiring in the robotics lab below. This unique experience of watching young scientists and engineers at work on futuristic technologies, including walking robots and powered exoskeletons, will inspire and excite local youth about careers in STEMM (science, technology, engineering, math and medicine) fields. Since the grand opening of the

Levin Research Center, IHMC has hosted thousands of public school student field trips, as well as expanded outreach in the community for visitors including international groups and professional organizations. On April 12, 2019, National Robotics Day, IHMC once again opened its doors where over 1200 people visited and toured the Levin Research Center and robotics labs.

In 2017, IHMC purchased a two-acre lot adjacent to its main facility with the future plan to build additional lab space for expanding research in areas of human performance and resilience. IHMC recently leased space from the Andrews Institute in nearby Gulf Breeze to house two IHMC lab research simulations on newly awarded projects as we are currently out of space in the two Pensacola facilities. In FY 2018-19, the State University System Board of Governors approved the establishment of a Joint PhD program in Intelligent Systems and Robotics, between IHMC and the University of West Florida, the first of its kind in Florida and one of only a few in the nation. A PhD Program Director has since been hired and the inaugural class of doctoral students will begin in August of 2019.

Over the past several years, IHMC has worked to expand and diversify its research areas by attracting new Research Scientists in the research and development of microsystems and robotics/automation, human performance optimization and risk mitigation for operators in extreme environments, and in cognitive science, artificial intelligence, and human-computer interaction, with applications in digital health, sensemaking, and information foraging. IHMC believes all three of these new research arenas will be very successful and assist IHMC in attracting more federal research dollars to Florida. This past fiscal year, IHMC added a Chief Research Scientist, Five Research Scientists, Six Research Associates, two Program Managers and one lab technician to keep pace with new federal research awards.

Also this past year, IHMC has licensed its exercise technology innovations into the commercial sector and is working with a small Pensacola based business to further economic development efforts in our region and similar conversations about licensing IHMC technologies are happening with small businesses in Ocala and Gainesville.

In summary, the funding request of $4.739 million will enable IHMC to continue to enhance its operations and expand in research of national significance including advanced cognitive assistance technologies, network/cyber security, ocean technologies, companion devices, exoskeletons, critical infrastructure protection, human performance enhancements and sustainable energy modeling and simulation. This research expansion is happening in both downtown Pensacola and downtown Ocala, in part through the successful recruitment of top scientists and researchers to Florida. Maintaining prominence in current research areas and developing strength in these emerging research areas are vital to IHMC’s continued growth and of critical importance to our national defense, security and overall societal needs.

State University System
Efficiencies

Universities were asked to describe three monetary or non-monetary operational efficiency efforts made, currently underway, or planned at their university within the past year that seeks to enhance the quality, effectiveness, and efficiency of processes that affect the students on campus.

The following are a few examples of the efficiencies administered throughout the system:

- Entered into a $125 million loan agreement via the HBCU Capital Finance Program funded by the U.S. Department of Education. The funding provides capital to Historically Black Colleges and Universities to address infrastructure needs. The loan agreement allowed for the financing of a new 700-bed student housing facility and refinancing of existing housing debt. An average of $3M in interest savings annually will be realized utilizing this loan agreement. – FAMU;

- Implementing new enterprise software integrated with existing Workday financial system to provide efficient and convenient core facilities scheduling, invoicing, and billing. Will increase graduate and undergraduate student research access to sophisticated research infrastructure by lowering core management costs and by adding customer-managed equipment reservations. – FAU;

- Contracted with Conversion Technologies International, Inc. (CTI) for handling the receiving and conversion of both PO based and non PO based invoices that are not coming in as e-Invoices through Workday. CTI converts these invoices to an electronic format accepted by Workday. The CTI solution provides the University a 100% solution to turn all of its invoices into an electronic format within Workday. This creates efficiencies by ensuring that the AP team does not need to manually scan and capture the invoice data to load to Workday. - FAU;

- Continued with the consolidation and elimination of administrative functions and positions in order to eliminate duplication of effort and achieve greater efficiency - FGCU;

2020-2021 LBR

- Information technology was further reorganized, combining functions that generate greater efficiencies when able to operate under one umbrella. The most immediate and positive return is the leveraging of purchases across functional technology areas, resulting in lowered cost and the most impactful deployment of equipment such as servers and desktops. – FGCU;

- Enhanced Transcript Processing: Enrollment Services, along with the Division of Information Technology is implementing Brainware software, which provides the capacity to automate transcript processing using optical character recognition (OCR) for incoming paper transcripts and reduce processing time from weeks to hours. During the 2018-2019 academic year, FIU received 47,390 transcripts from potential transferring students; 13,290 transcripts were in hard copy. With this enhanced capacity, Enrollment Services will be able to provide the institution and students with a more efficient transcript posting process by posting transfer credits on a timelier basis, yielding higher conversion rates; and generating operational efficiencies by reducing the time to review and post a transcript to PeopleSoft from up to 1 hour to a few minutes. Additionally, the earlier availability of transfer credits allows students to be better informed as they work with advisors to review course selection, make adjustments, and avoid accruing excess hours. – FIU;

- FIU Online has streamlined fully online course scheduling which is now integrated into the scheduling workflow within the Office of Class Management (OCM) scheduling process, eliminating the need for multiple course scheduling workflows. Additionally, FIU Online has switched to a pooled scheduling system reducing the time needed to schedule and modify course needs as a team handles all requests in queue. Finally, academic units now have the option to schedule their own online courses during the key-in period rather than sending them afterward to FIU Online. This now allows fully online courses to be included in the same strategic schedule planning process as all other courses. – FIU;

- Enhanced numerous business processes to ensure appropriate controls and approvals in conformance with best practice. (e.g. expense reports, purchase requisitions, supplier invoices, FMLA, Federal Work Study, etc.) These enhancements are part of our continuous improvements efforts. – Florida Poly;

- Redesigned the structure and delivery of key gateway courses, including adding additional support for students, to improve student learning and course passage rates. This resulted in improved student completion of these courses. Based on the improved passage rates, an estimated 775

students successfully completed these courses during the fall 2018 and spring 2019 semesters, reducing the need for students to retake the courses in future semesters. This represents a collective cost savings to these students of approximately $0.5 million in tuition and fees. This also resulted in a direct cost savings in instructional costs for these course sections of approximately $0.4 million– FSU;

- CashNet is an electronic payment system that allows students to pay charges for tuition and other student services. The system was launched during FY 2018-19 and serves multiple functions for the College. Students can make payments to post real-time to their student account, with the ability to receive text alerts for payments or other account changes. Furthermore, CashNet provides the functionality for the College to set up storefronts and checkouts to accept payments from a variety of functions and sources – family weekend, orientation, parking operations, etc. This tool saves a considerable amount of time for the students and the Business Office; minimizing paper, duplication of effort, and improving communication regarding student billing and other financial obligations between the Business Office and the students served. – NCF;

- In early 2018, the university embarked on a discovery journey to bring widespread and significant change to UCF's Oracle PeopleSoft Financials system. Born from this work, project UCF Rising is a comprehensive restructuring plan that will modernize our research administration business processes and technologies. The project currently will integrate the Huron Research Suite with PeopleSoft Grants module within UCF Financials, replacing a legacy, homegrown pre-award system and enabling UCF's Office of Research meet the Collective Impact Strategic Plan goal of doubling research awards to $250 million by 2020. – UCF;

- Continuing to set its own institutional records for student success, UCF's focus remains on ensuring a more affordable, high-quality degree for Florida's students. Improvements to our graduation rates, average time to degree, and student-to-faculty ratio lead to reduced costs for students and more efficiency for UCF. Thanks to additional institutional aid, including a record amount raised for first-generation scholarships, and a lower credit hour average, last year's average cost to the student was the lowest in five years. The new downtown campus in partnership with Valencia College opening in fall 2019 will pioneer a new model that saves students up to $6,000 to earn a four-year degree. Undergraduate students attending the new campus will have the opportunity to realize this reduced cost of attendance by taking co-listed general education courses offered to both UCF and Valencia students. – UCF;

- UF's Information Technology division has developed data-driven dashboards for academic advisors to allow access to reports with up-to-date, comprehensive information. This real-time data makes in-office visits all-inclusive and valuable for students and more efficient for both students and staff. This information enhances graduation and retention rates and decreases excess hours. The ability to track students comprehensively and provide this information to both students and advisors helps students graduate on time. Status reports and degree audits connect the degree audit system and the registration system, which also manages enrollment. Students receive a schedule showing critical courses that they must take at specific times during their college career and the grades that they must earn in order to remain on track and graduate in four years. This schedule allows colleges to better manage course offerings according to student timelines for graduation and has a direct impact in enabling students to graduate on time. – UF;

- The Office of ADA & Title IX is implementing a newly acquired on-line training course for sexual assault prevention for students, along with a free, internally 2020-2021 LBR created, employee course to train our entire campus on how to maintain a safer community, eliminate sexual harassment and assaults, and properly handle situations as they arise. The new student program efficiently addresses other health topics such as alcohol education and drug use education, along with bystander intervention training. This is a shared initiative with the Division of Student Affairs, the Athletic Department, the Office of Human Resources, with the Office of Title IX Compliance co-facilitating the training opportunities for all students and employees, including student employees within the Division of Student Affairs, along with all athletic department employees and athletes. Utilizing an efficient "train the trainer" model, there have already been 50 university professionals trained to facilitate bystander intervention training within their respective departments. Ultimately, this is a more efficient process to properly inform the entire campus regarding healthy relationships. The initiative provides better information and support, and ultimately, a safer, more informed campus community. This initiative saves the Office of Title IX Compliance many hours by not directly providing as many trainings to the various university constituents. – UF;

- The division of Student Affairs was merged into Academic Affairs and now reports to the Provost. The integration of Academic Affairs and Student Affairs is transforming the student experience and significantly advancing student success through increased collaboration,

communication, and innovation. Multiple departments have been realigned to provide better service and support to our students (for example, Career Services and Advising are now together). Teams of faculty and staff from across the division (the Student Success Rapid Response Team is one example) are coming together to develop initiatives to improve student success. The integration has also improved efficiency and allowed us to reallocate significant resources (just over $1 million) to improve the student experience. - UNF;

- Three Vice President positions were eliminated during the year: Vice President and Chief of Staff, Vice President of Student Affairs and Vice President of Human Resources -- generating savings of $759 thousand. Student Affairs was merged into Academic Affairs and the department of Human Resources was moved under the Vice President of Administration and Finance. In addition, two Associate Vice President positions were eliminated: one in Student Affairs and one in Administration and Finance generating savings of an additional $390 thousand. – UNF;

- USF IT completed the migration of all disaster recovery (DR) systems located at our Clemson University collocation datacenter. These 72 servers were rehosted in a public cloud (Microsoft Azure), providing improved redundancy and resiliency to our DR systems infrastructure environment. We were able to eliminate major risks/vulnerabilities such as aging equipment, extensive failover times and scalability constraints. Moving our DR systems to public cloud has also provided more reliable business continuity for some of our most critical faculty and student systems, in the event of common threats/ natural disasters in our region, such as hurricanes. Our data security stance was also improved from this migration as databases are now routed through private internet protocols –(IP) versus the previous public IP configuration. Cost offsets of $94,000/yr. were seen, with better transparency for future cost savings efforts in the environment. We have the ability for self-service of these systems, reducing support process times nearly in half. – USF.

- Through the use of the State of Florida Contracts and SUS shared initiatives for cloud computing and use of shared advertising, the University realized savings of more than $690,000 FY 2019. Additionally, owner direct purchases made for the construction of the Lab Sciences building resulted in more than $10,000 savings of sales taxes. - UNF

For detailed reports by institution, please contact the Board of Governors General Office.

2020-2021 LBR

State University System
2019-2020 Performance Funding Initiative

Universities were requested to provide information on the intended use of the 2019-2020 performance funds.

- Faculty recruitment and multi-year merit pay adjustments, retention efforts for academic advisors and support services staff – FAU;
- Summer term expansion providing necessary coursework for 3-year accelerated degree programs – FAU;
- Faculty hiring, instruction and retention in engineering and health sciences to address specific needs within programs of strategic emphasis and respond to employment demands of the region – FGCU;
- A new division of student success and enrollment management has centralized advising services to more effectively meet student needs – FGCU;
- Amplify Learner Success and Institutional Affinity to deliver high-tech and high-touch innovative solutions that accelerate students' academic and career success – FIU;
- Faculty market equity and retention efforts – FSU;
- Student to faculty ratio reduction strategies – FSU;
- Invest in campus information technology and minor renovation projects – NCF;
- Faculty hiring and retention increasing positive impacts on student success – UCF;
- Student Access and Success enhances scholarship programs – UCF;
- Achieving Top 5 Public University National Ranking status by investing in faculty recruitment and retention, and targeted support for students, faculty, graduate students and infrastructure – UF;
- Increase campus technology through network infrastructure replacement impacting in-class and on-line technology – UNF;
- Increase course availability and use specialized skills by employing visitors and adjuncts – UNF;
- Invest in faculty that specifically support STEM initiatives – USF/Tampa;
- Invest in campus infrastructure areas including Information Technology, Student Services and Campus Safety – USF Tampa;

2020-2021 LBR

- Enhance student success, services and resources in targeted areas of management, marketing, finance, accounting and information technology – USF/Sarasota-Manatee;
- Further investment in faculty to support STEM efforts – USF/St. Pete;
- Hire and retain additional faculty in areas of strategic emphasis such as Cybersecurity, Mechanical Engineering, Entrepreneurship, Supply Chain Logistics and Nursing Practice - UWF

For detailed reports by institution, please contact the Board of Governors General Office.

2020-2021 LBR

State University System
Reductions

In preparation for the 2020-2021 LBR submission to the Legislature and to the Governor, all state agencies were asked to identify the programs and/or services that would be eliminated or reduced if a 10% reduction is enacted for FY 2020-2021.

For the State University System, the total amount of reductions is an estimated $309 million. Each institution was allocated a proportionate amount of the total reduction based on their recurring general revenue and lottery appropriations for FY 2019-2020.

The university summaries identify various reduction proposals. The following provides some examples:

- Eliminate administrative positions
- Reduce basic services to include admissions operations, police and safety, and core technology enterprises
- Eliminate departmental administrative and faculty positions
- Eliminate large units and/or subunits; reduce or close programs
- Reduce student scholarships, need-based financial aid, instructional and research initiatives and faculty recruiting
- Hire non-tenure track instructors with instruction-only assignments
- Reduce student planned enrollment and full-time equivalent (FTE)
- Reduce academic, university, research and/or student services support
- Implement a purchasing, administrative hiring, and travel freeze
- Reduce library resources, services and hours
- Curtail funding allocated for broadcasting services
- Phase out up to 5 degree programs and 150 summer courses
- Reduced workforce for instruction, an increased student-faculty ratio, and a decreased research and tech transfer enterprise
- Reduce research support (laboratory technicians, post-doctoral, and graduate students)
- Risk accreditation status and risk retention of current faculty and staff
- A decrease in research activity represents lost economic opportunity in the State
- Reduce enrollment to maintain faculty-to-student ratios and the quality of student learning which has the cascading effect of reducing the number of available courses and ultimately the number of graduates
- Reduce and/or cap enrollment and course section availability to students
- Reduce services provided by the Florida Virtual Campus

For detailed reports by institution, please contact the Board of Governors General Office.

2020-2021 LBR

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Budget and Finance Committee
August 29, 2019

SUBJECT: 2020-2021 Board General Office Legislative Budget Request

PROPOSED COMMITTEE ACTION

Approve the 2020-2021 Board General Office Budget Request and allow the Chancellor to make technical changes as necessary.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Section 216.023, Florida Statutes

BACKGROUND INFORMATION

Annually, the Board of Governors must prepare and submit a State University System Legislative Budget Request (LBR) for state appropriated operating funds to the Legislature and Governor by October 15. However, with session starting in January, the LBR is due September 15. In accordance with subsection 216.023(1), Florida Statutes, this LBR is based on an independent judgment of needs and, pursuant to the LBR instructions, will be presented to the Legislature and Governor by the statutory due date.

The Chancellor recommends approval of a Board General Office LBR of $9 million and requests authority to make technical changes as necessary. The Legislature and Governor approved the Board's 2019-2020 increase for Instructional Technology (IT) services of $543,000; therefore, the Board is not requesting any additional increase for 2020-21.

Pursuant to the LBR instructions, each agency must prepare a ten percent reduction plan. The Board General Office plan is included for information purposes.

Florida Board of Governors General Office
2020-2021 Legislative Budget Request

Funding of $9.0 million is needed to support the 65 authorized positions and associated operating expense for the Board Office. The operating expense covers the costs associated with data collection and management, Board meeting expenses, travel expenses, office supplies, and other Board initiatives.

Last year, the Board requested and received $543,976 to implement critical cyber security initiatives, disaster recovery and backup, and modernization of existing databases.

Florida Board of Governors General Office
Ten Percent Reduction Plan
Fiscal Year 2020-2021

Legislative Budget Request instructions from the Legislature and Governor require all state agencies and the universities to prepare a ten percent reduction plan in case state revenues decline and budget cuts must be implemented.

The General Office recurring budget of $9.0 million is predominately salaries and benefits (77%) to support 65 authorized positions plus student assistants. The remaining 23% percent of the budget includes support for office activities (such as; Turlington Building rent payments, data collection/support, travel for staff and board members, office supplies) and pass-through funds to the Northwest Regional Data Center and to the Department of Management Services for human resource services and risk management.

The Board Office prepares a University System Accountability Plan. Tremendous work goes into the collection and analysis of data to provide information to key stakeholders so that strategic investments and decisions can be made about the university system. The Board Office has been fortunate to receive the financial support needed to ensure the success of these critical areas, including Information Technology resources of $543,000 in new resources for 2019-2020.

A ten percent budget reduction would total $901,634 and significantly hamper the progress that has been made in moving the Office forward to ensure a successful Accountability Plan and improving data collection and technology. Strategic decisions would need to be made on which areas of the budget to be reduced.

For planning purposes, basic operating costs would be reduced, which may include: travel for staff and travel reimbursements to university personnel who participate in educational plant surveys throughout the fiscal year; training and professional development for staff; operating capital outlay; and/or elimination of student assistants.

There would be insufficient operating expenses to absorb the full ten percent reduction; therefore, the balance could come from the elimination of any vacant or filled positions. Advertisements are currently out for four vacant positions with plans to fill two positions by the end of August and the remaining two by the end of September. Three of these four positions are IT. If these positions are filled, strategic decisions would need to be made on which positions would be eliminated after reviewing all Office functions.

SUBJECT: Business Process Review

PROPOSED COMMITTEE ACTION

For information.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Section 216.023, Florida Statutes

BACKGROUND INFORMATION

This past spring, the Board, working with Florida State University, our Shared Initiatives partner, engaged Crowe LLP to perform an Internal Management and Accounting Control and Business Process Review at all 12 universities.

This review will result in an individualized report for each university that identifies potential financial process risks and recommendations for improvement. A system report will be developed and presented at the October Board meeting.

Representatives from Crowe LLP will provide an update to the Committee on their progress.

JUNE 11-13, 2019

1. Call to Order and Pledge of Allegiance

On June 13, 2019, Chair Ned C. Lautenbach convened the meeting at 10:52 a.m. with the following members present and answering roll call: Vice Chair Syd Kitson; Tim Cerio; Dr. Shawn Felton; H. Wayne Huizenga, Jr.; Zenani Johnson; Darlene Jordan; Brian Lamb; Alan Levine; Ed Morton; Dr. Steven Scott; Eric Silagy; Kent Stermon and Norman Tripp. Ms. Patricia Frost attended the meeting by telephone. Members stood for the Pledge of Allegiance.

2. Chair's Report to the Board of Governors

Chair Lautenbach thanked Vice Chair Les Muma, President Genshaft, and the University of South Florida for hosting the meeting. Vice Chair Muma welcomed members to the university and President Genshaft said she was pleased to have the Board visit the campus.

Chair Lautenbach welcomed several new members to the Board. Ms. Zenani Johnson is the new student member of the Board and is majoring in Psychology at the University of West Florida. Mr. Brian Lamb serves as the Executive Vice President and head of Wealth and Asset Management at Fifth Third Bank and is the immediate past chair of the University of South Florida Board of Trustees. Dr. Steven Scott is a board-certified physician and chair of Scott Holdings, LLC. He formerly served as the chair of the University of Florida Board of Trustees. Mr. Eric Silagy is President and Chief Executive Officer of Florida Power & Light Company, and Mr. Kent Stermon is the Chief Operating Officer of Total Military Management.

Chair Lautenbach announced U.S. News & World Report named Florida the No. 1 state for higher education for the third year in a row. He attributed this to the overall improvement the universities have been making on the performance funding metrics, especially those relating to graduation rates and affordability. Florida's graduation rate has increased by 9.5 percent over the past five years and four-year degrees now cost, on average, less than $10,000. He thanked Florida's elected leaders for their support which has enabled us to keep costs low while continuing to raise quality.

Chair Lautenbach next recognized President Saunders for her efforts in spearheading year-over-year improvements in the metrics at the University of West Florida. He also congratulated Florida State University for maintaining the top graduation rate in the State University System and for breaking the 70 percent barrier on graduation rates.

Chair Lautenbach recognized the five outgoing Board members, Mr. Jay Patel, Mr. Fred Salerno, Dr. Fernando Valverde, Ms. Jalisa White, and Dr. Zach Zachariah. Resolutions honoring their distinguished service and contributions to the State University System and the Board of Governors were presented to the Board for adoption. He expressed admiration for their focus on improving student outcomes and Ms. Shirley read the resolution honoring Mr. Patel, who was present to accept a framed certificate in recognition of his dedicated service. Ms. Jordan moved adoption of the resolutions, which was seconded by Mr. Lamb and the members concurred unanimously.

3. Minutes of Board of Governors Meeting

A. Board of Governors Meeting held March 28, 2019

Mr. Tripp moved approval of the Minutes of the meeting held March 28, 2019, as presented. Mr. Lamb seconded the motion, and the members concurred unanimously.

4. Chancellor's Report

In the interest of time, Chancellor Criser kept his report brief but reminded members for every $1 a student pays in tuition, the state invests $3 plus another $1 in student assistance and scholarships such as Bright Futures, which factors into Florida's No. 1 ranking. He explained we are developing a plan to remain the No. 1 state for postsecondary education for the fourth year and are working with Enterprise Florida to disseminate the message to businesses that Florida is, and will remain, the No. 1 state for higher education. Chancellor Criser presented current Board members and former Board chairs with a commemorative globe to mark the occasion of Florida being the No. 1 state for postsecondary education for three years in a row and thanked everyone for their contributions to this distinguished honor.

5. Overview of 2019 Legislation and Student Champion Award

Chair Lautenbach commented on the successful legislative session, which resulted in achieving a number of Board priorities including passage of House Bill 595, the medical amnesty bill. He recognized Representative David Silvers who sponsored House Bill 595, noting the legislation aims to save lives by providing immunity from prosecution for any person who seeks medical assistance for someone who is experiencing alcohol

poisoning. Chair Lautenbach requested Representative Silvers join him at the podium for the presentation of the Student Champion award as a small token of the Board's appreciation of Representative Silvers' efforts to bring this legislation to fruition.

Representative Silvers thanked Chair Lautenbach and the Board, stating he is honored and humbled to accept the Student Champion award. He explained he has embraced the plight of the younger generation who are often overlooked and marginalized and whose rights are often impacted by gaps in the law. One such group involves students who engage in excessive alcohol consumption and whose lives may be saved if they or someone with them calls for medical assistance. He said the bill creates automatic immunity from prosecution for a person who calls for help for a person who has been drinking to excess.

He recounted a tragedy that occurred when he was attending the University of Florida where a student died as a result of excessive drinking and the students who were on the scene were under the age of 21 and afraid to call for help. He emphasized had one of those students made the call, the tragic death may have been avoided. He noted this situation, and others like it, is why the Board of Governors made this legislation a priority and why he was honored to sponsor the bill. He reported the number of alcohol-related deaths in the United States among 18-24 year olds is on the rise, growing from 200 in 1998 to nearly 1000 in 2014.

Representative Silvers announced Governor DeSantis signed House Bill 595 the week before and emphasized the next challenge is getting the word out to students about the bill to encourage them to make the call to save a life. He thanked the Board, Chancellor Criser and Ms. Kristin Whitaker, the Board's Assistant Vice Chancellor of Public Policy and Advocacy, for their support during session.

Chair Lautenbach recognized Ms. Whitaker to provide an overview of the 2019 legislative session. He complimented Ms. Whitaker and Renee Fargason, the Board's Director of Public Policy and Advocacy, on their hard work and effectiveness during session. Ms. Whitaker began by reporting on the final budget. Although the universities' base budgets were cut by $35 million (shared proportionately across the State University System), total funding exceeded last year's budget by $69 million. This funding included nearly all of the Board of Governors' funding priorities for New College of Florida, Florida Atlantic University, the University of North Florida and Florida Gulf Coast University.

Ms. Whitaker next reported on policy bills that passed during session. She thanked Representative Silvers and Senator Jeff Brandes for their sponsorship and support of House Bill 595 which will result in saving lives and was a top priority of the Board of Governors, the universities, and the Florida Student Association. Senate Bill 1080, sponsored by Senator Lauren Book and Representative Chip LaMarca, amends Florida's

hazing statute to expand the type of conduct that could lead to criminal prosecution of persons engaged in hazing activities. The bill was spearheaded by Florida State University and is named after Mr. Andrew Coffey, an FSU student who tragically passed away as a result of an off-campus hazing incident. Ms. Whitaker thanked FSU for their efforts, stating this bill will send a message to all students about the extreme dangers of hazing.

Senate Bill 190, the higher education bill sponsored by Senator Kelli Stargel and Representative Ray Rodrigues, amends the Bright Futures Scholarship program by increasing the test scores required for eligibility for the Academic Scholars and Medallion Scholars awards; amends the excess credit hour surcharge; and establishes 2+2 targeted pathways articulation agreement requirements, in addition to the other provisions previously discussed in the Budget and Finance and Facilities Committees.

House Bill 7071, known as the Workforce Education bill, sponsored by Representative Amber Mariano and Senator Travis Hutson, establishes apprenticeships; career planning services; allows for the substitution of a science credit with computer science for purposes of high school graduation; requires school districts to offer financial literacy courses; and creates career and technical high school graduation pathways.

Senate Bill 620, known as Military Friendly initiative, sponsored by Senator Doug Broxson and Representative Mel Ponder, enables active duty members or their family members to qualify for in-state tuition at the time of admission even if they are subsequently deployed outside of Florida.

House Bill 741, the Anti-Semitism bill, sponsored by Representative Randy Fine and Senator Mike Caruso, prohibits discrimination on the basis of religion in the K-20 public school system.

In closing, Ms. Whitaker thanked Chair Lautenbach, Vice Chair Kitson and Governor Cerio for their efforts during the 2019 session. She also thanked the university governmental relations teams and gave a special thanks to the students, led by former Governor Jalisa White, who underscored the importance of legislative support for keeping higher education affordable and accessible for all students.

6. Recognition of Dr. Judy Genshaft, President, University of South Florida

Chair Lautenbach said it was fitting to be meeting at the University of South Florida given that the Board was going to honor President Genshaft's extraordinary dedication and service to the university for the past nineteen years. He called on Vice Chair Les Muma of the University of South Florida Board of Trustees to begin the ceremony. On behalf of the Board of Trustees and the entire university community, Mr. Muma said it

was his honor to recognize President Genshaft for her fearless service to the university and the Tampa Bay community for the last nineteen years. He noted the university has become what she always envisioned and worked tirelessly for, and that was to become a preeminent state research university which regularly earns national and international recognition, while also serving the needs of the Tampa Bay community. Mr. Muma explained they created a video tribute because it is too difficult to put into words all of her accomplishments. The video tribute honoring her achievements was shown.

Mr. Muma thanked President Genshaft on her historic tenure and the legacy she is leaving and turned the ceremony back to Chair Lautenbach. Chair Lautenbach stated while the list of her accomplishments is long, the single theme that marks her presidency and sets her apart from others is the ambition and advocacy she displayed in representing the university and its students. Her heart and soul are imprinted on the university and now her name will grace a new Honors College thanks to a $23 million donation that she and her husband, Mr. Steven Greenbaum, gave to the university. This gift, combined with prior gifts made by President Genshaft and Mr. Greenbaum, now total $33 million.

Under President Genshaft's leadership, USF was awarded preeminent status and has risen steadily in the ranks to become the No. 58 public university in the country as reported by U.S. News and World Report. During her tenure, the university experienced a 40% increase in enrollment, saw its four-year graduation rate triple from 24 to 61 percent, and closed the graduation gap by race, ethnicity and socioeconomic status. Equally impressive is the transformation on research. USF's research activity has tripled to more than $568 million in annual expenditures, positioning USF as one of the nation's top 30 public universities for research.

Chair Lautenbach also remarked on President Genshaft's role as an economic leader in the Tampa Bay community and her service on the Greater Tampa Chamber of Commerce, the Tampa Bay Partnership, and the Tampa Hillsborough Economic Development Corporation. In closing, Chair Lautenbach congratulated President Genshaft on a remarkable career and presented her with a plaque commemorating her extraordinary service. Her achievements have left an indelible mark on the university that will reverberate for generations to come.

President Genshaft said this was emotional for her and that everyone wants to make a difference in what they do. She paraphrased Mr. Frank Morsani stating, the first part of your life you learn, the second part you earn, and in the third part, you return. She indicated the return may be financial or bringing others forward on a path to success. It has been her privilege to be a part of the State University System and to lead USF forward, but emphasized she did not do it alone. She thanked the Board of Governors and her board of trustees for their support and acknowledged the team she works with at USF, noting everyone has to grow in the same direction to hit the goals. She

recognized her staff who were present at the meeting, stating she feels fortunate to have been surrounded by such capable people. She closed by expressing her passion for the University of South Florida and thanked everyone for their support.

7. Public Comment

The Board received two requests for public comment. The first speaker was Mr. Steven Pearson, a National Life member of the Florida Agricultural and Mechanical Alumni Association. Mr. Pearson expressed concern over the FAMU Board of Trustees and the Board of Governors limiting enrollment at the university, and the action taken by the FAMU Board of Trustees to reduce the number of students admitted under the profile mechanism from 20 to 15 percent. He explained of the 11,000 applicants for the next academic year, the university only plans to admit 1500 students. He contends this limit on enrollment conflicts with the mission of the university to provide educational opportunities to students and in particular to African American students. He requested the Board of Governors to not limit enrollment at FAMU.

Mr. James Ransom, representing the Tampa Organization of Black Affairs and the SMBG, was the next speaker. Mr. Ransom congratulated President Genshaft on her accomplishments and said he had previously met with Governor Brian Lamb when he was the chair of the University of South Florida Board of Trustees and President Genshaft about instituting changes in how the university spends money demographically by race and gender. He explained the university is working on a program but at some point, he and his organization would like to meet with the Board of Governors, the Legislature, and the Governor to discuss policies, procedures, or changes in law regarding institutional expenditures and how to make them more transparent and accountable. In addition, they would like to meet with the Board to discuss possible changes to presidential contracts. He thanked the Board for its time.

8. Board of Governors Self-Evaluation Survey Results

Chair Lautenbach recognized Dr. Traki L. Taylor to report on the Board of Governors Self Evaluation Survey results. Dr. Taylor presented information on the strengths and areas for improvement identified by members in response to the survey. All respondents agreed or strongly agreed the Board adheres to a code of ethics; advocates system interests to state agencies and legislators; is knowledgeable about state and regional higher education needs and university missions; monitors the effectiveness of the universities in fulfilling their missions through accountability and strategic planning measures; and promotes an environment where members feel engaged and empowered to raise issues for discussion. She noted members identified the following areas for improvement: the need to increase the understanding of university fiscal conditions and enhance fiscal oversight; increase the authority of and interactions with the

Chancellor; and expand policy centric discussions. In response to what the Board should accomplish in the next two years, members recommended expanding their understanding of each university's specific needs; enhancing training experiences and interactions with university trustees; ensuring workforce needs are met; and continued focus on improving graduation rates.

9. Confirmation of Reappointment of President for Florida Polytechnic University

Chair Lautenbach recognized Mr. Don Wilson, Chair of the Florida Polytechnic University Board of Trustees, to present Dr. Randy Avent for confirmation of his reappointment as President. Mr. Wilson stated he was pleased to recommend the extension of Dr. Avent's contract to the Board for confirmation. The Florida Polytechnic University Board of Trustees voted unanimously to extend Dr. Avent's contract through July 6, 2020.

For the benefit of new members on the Board, Mr. Wilson provided an overview of Dr. Avent's educational and employment background and invited members to read the lengthy recitation of Dr. Avent's accomplishments that was submitted with the request for confirmation. When building a new institution from the ground up, he noted new accomplishments occur each day. For example, Dr. Avent was with Governor DeSantis this morning at a ribbon-cutting ceremony for the new SunTrax facility, located next to the Florida Polytechnic campus, which will serve as a research and development hub for autonomous vehicles and roadway design. Mr. Wilson said Florida Polytechnic will be an active participant in that research and development. Mr. Wilson requested the Board to confirm the extension of Dr. Avent's contract.

Chair Lautenbach called for a motion to confirm Dr. Avent. Mr. Tripp made the motion, which was seconded by Mr. Huizenga and the members present concurred unanimously.

10. Confirmation of Reappointment of President for New College of Florida

Chair Lautenbach recognized Mr. Felice Schulaner, Chair of the New College of Florida Board of Trustees, to present Dr. Donal O'Shea for confirmation of his reappointment as President. Ms. Schulaner said Dr. O'Shea and his team have been working diligently to implement the action plans in their Strategic Plan. In the first year of their growth plan, the college hired 15 highly qualified faculty to add depth and breadth to their academic programming, particularly in the areas of STEM and global competitiveness. They have also been reviewing staffing, programs, policies and processes in all areas to ensure they have the capacity to support their growth efforts. While they are deeply disappointed the enrollment targets will not be achieved in the first years of the plan,

they believe the strategies they have instituted will allow them to achieve the 1,200 student goal slightly beyond the 2023 anticipated timeframe.

Ms. Schulaner said Dr. O'Shea is a driving force in the Cross College Alliance, which impacts over 18,000 students and provides opportunities for student and faculty collaborations. He secured a significant grant from the Andrew Mellon Foundation to promote relationships between the Alliance and the community's arts organizations. Based on performance on that grant, the Mellon Foundation invited New College to submit a new proposal and they just received word they were awarded the grant. Ms. Schulaner indicated this is significant because the Mellon Foundation rarely awards grants to public institutions.

Dr. O'Shea is also engaged with the Sarasota-Manatee community, serving on the local chambers of commerce and the Council of Public Liberal Arts Colleges. He is also is deeply committed to New College's success and his recent performance appraisal reflects the board of trustees' confidence in his ability to lead the college. She noted July 1 marks the beginning of Dr. O'Shea's eighth year as president and on June 8, 2019, the New College Board of Trustees unanimously approved the extension of his contract through June 30, 2020. Ms. Schulaner requested the Board confirm the extension of Dr. O'Shea's contract.

Chair Lautenbach called for a motion to confirm Dr. O'Shea. Mr. Huizenga made the motion, which was seconded by Ms. Jordan and the members present concurred unanimously.

11. Confirmation of Reappointment of President for Florida State University

Chair Lautenbach explained Mr. Ed Burr, Chair of the Florida State University Board of Trustees, was in the hospital or recovering and unable to attend. However, Chair Burr had submitted a letter requesting confirmation of President Thrasher's term from November 10, 2019 to November 10, 2020, which included six pages of President Thrasher's accomplishments. Chair Lautenbach read some of the highlights from the letter, which included: FSU moving up in the rankings from No. 43 to No. 26 in just four years; FSU researchers being awarded $226 million in grants; FSU leading in student retention at 93% and in four-year graduation rates at 68.4%; the cost per degree decreasing from $15,040 to $8,680 in the past three years; graduate student employment opportunities increasing by 12% over last year; and FSU being ranked in the top two most efficient universities by U. S. News and World Report.

The letter also referenced President Thrasher's ability to respond to changing, dynamic circumstances and bringing people together to build strong internal and external partnerships. The Florida State University Board of Trustees voted unanimously to

extend President Thrasher's contract and requested the Board of Governors to confirm the extension.

Chair Lautenbach called for a motion to confirm Dr. Thrasher. Mr. Kitson made the motion, which was seconded by Mr. Huizenga and the members present concurred unanimously. Governor Levine asked Chair Lautenbach if the Board could revisit the one-year limitation on contract extensions for university presidents. Chair Lautenbach indicated that issue could be revisited at a future meeting.

12. Strategic Planning Committee Report

Chair Lautenbach called on Ms. Jordan for the Strategic Planning Committee report. She stated the committee reviewed the 2019 university accountability plans, preeminent and emerging preeminent state research university annual status updates, and Florida International University's 2025 Strategic Plan and its request to be designated as an Emerging Preeminent State Research University. She said the committee has nine action items for the Board's consideration.

A. Florida International University 2025 Strategic Plan

Ms. Jordan moved approval of Florida International University's 2025 Strategic Plan not contingent upon a legislative budget request or other sources of funding. Mr. Cerio seconded the motion and the members present concurred unanimously.

B. 2019 University Accountability Plans

Ms. Jordan moved approval of the 2019 Accountability Plans for the University of West Florida, Florida Agricultural and Mechanical University, New College of Florida, Florida Atlantic University, University of North Florida, University of Florida, and University of Central Florida, excluding those sections of the plans that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Board accepts the out-year portions of the plans. Mr. Huizenga seconded the motion and the members present concurred unanimously.

Ms. Jordan moved approval of the Florida State University 2019 Accountability Plan, excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Board accepts the out-year portions of the plan, as amended to restore the prior year goals for Metric 1. Mr. Lamb seconded the motion and the members present concurred unanimously.

Ms. Jordan moved approval of the University of South Florida 2019 Accountability Plan, excluding those sections of the plan that require any additional regulatory or

procedural review or approval pursuant to law or Board regulations, and that the Board accepts the out-year portions of the plan, as amended to restore the prior year goals for Metric 4 for the 2015-2019 and 2017-2021 cohorts. Mr. Huizenga seconded the motion and the members concurred unanimously.

Ms. Jordan moved approval of the Florida International University 2019 Accountability Plan, excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Board accepts the out-year portions of the plan, as amended to restore the prior year goals for Performance Based Funding Metrics 1, 2, 6, and 7, and Preeminence Metrics 3, 6, and 10. Mr. Lamb seconded the motion and the members concurred unanimously.

Ms. Jordan moved approval of the Florida Gulf Coast University 2019 Accountability Plan, excluding those sections of the plan that require any additional regulatory or procedural review or approval pursuant to law or Board regulations, and that the Board accepts the out-year portions of the plan, as amended to restore the prior year goals for Performance Based Funding Metric 5 and to increase the goals for Metric 4 as follows: 2015-2019 cohort to 33%, 2016-2020 cohort to 37%, 2017-2021 cohort to 41%, and the 2018-2022 cohort to 45%. Mr. Huizenga seconded the motion and the members concurred unanimously.

C. Preeminent and Emerging Preeminent State Research University Annual Status Updates

Ms. Jordan moved approval of the Preeminent State Research University Annual Status Updates from the University of Florida, Florida State University, and the University of South Florida. Mr. Lamb seconded the motion and the members concurred unanimously.

Ms. Jordan moved approval of the Emerging Preeminent State Research University Annual Status Update from the University of Central Florida. Mr. Lamb seconded the motion and the members concurred unanimously.

D. Designation of Florida International University as an Emerging Preeminent State Research University

Ms. Jordan made a motion to designate Florida International University as an Emerging Preeminent State Research University and to approve its five-year plan. Mr. Lamb seconded the motion and the members concurred unanimously.

13. Academic and Research Excellence Committee Report

Chair Lautenbach recognized Mr. Levine for the Academic and Research Excellence Committee report. He reported on a discussion he had with the university vice presidents of research regarding the fact the State University System has surpassed the 2025 research goal and collectively is now at $2.3 billion. He said they discussed increasing the goal to $3 billion and also discussed the lack of a strategic plan for research. Mr. Levine indicated he will agenda this item for the committee to discuss in August.

He also reported on a presentation by President Genshaft and Dr. Paul Sanberg, USF's Vice President for Research, Innovation, and Knowledge Enterprise, regarding the substantial growth in research at the university. Finally, Mr. Levine said the committee was bringing forward one item for approval by the Board.

A. Consortium for Medical Marijuana Clinical Outcomes Research

Mr. Levine moved approval of the University of Florida as the lead institution for the Consortium for Medical Marijuana Clinical Outcomes Research and authorization to execute a one-year contract between the Board of Governors and the university to allocate $1.5 million in appropriated funds for fiscal year 2019-20. Mr. Morton seconded the motion and the members concurred unanimously.

14. Academic and Student Affairs Committee Report

Chair Lautenbach recognized Mr. Tripp to report on the Academic and Student Affairs Committee. Mr. Tripp reported the committee took up five items for approval.

A. Ph.D. in Engineering and Computing Education, CIP 14.9999, Florida International University

Mr. Tripp moved approval of the Florida International University's Ph.D. in Engineering and Computing Education, CIP 14.9999, at the currently approved tuition. Ms. Jordan seconded the motion and the members concurred unanimously.

B. Doctor of Athletic Training, CIP 51.0913, University of Florida

Mr. Tripp moved approval of the University of Florida's post-professional Doctor of Athletic Training, CIP 51.0913, at the currently approved graduate rate tuition. Ms. Jordan seconded the motion and the members concurred unanimously.

C. Ph.D. in Anatomical Science Education, CIP 26.0403, University of Florida

Mr. Tripp moved approval of the University of Florida's Ph.D. in Anatomical Science Education, CIP 26.0403, at the currently approved graduate rate tuition. Ms. Jordan seconded the motion and the members concurred unanimously.

D. Ed.D. in Instructional Design and Technology, CIP 13.0501, University of West Florida

Mr. Tripp moved approval of the University of West Florida's Ed.D. in Instructional Design and Technology, CIP 13.0501, at the currently approved graduate rate tuition. Mr. Kitson seconded the motion and the members concurred unanimously.

E. Articulation Coordinating Committee Credit-By-Exam Equivalencies

Mr. Tripp moved approval of the February 27, 2019, Articulation Coordinating Committee Credit-By-Exam equivalencies. Ms. Jordan seconded the motion and the members concurred unanimously.

15. Budget and Finance Committee Report

Chair Lautenbach recognized Mr. Kitson for the Budget and Finance Committee report. Mr. Kitson stated that, like the other universities, Florida International University will be held accountable for the $15 million appropriation from the last legislative session and will present a work plan to the committee at its next meeting to articulate how it will spend the funding, what their goals are, and how it will impact student success. In addition, the committee has requested an update from New College of Florida, Florida Gulf Coast University, the University of North Florida, and Florida Atlantic University on the work plans associated with the funding those institutions received. Mr. Kitson then reported on several action items considered by the committee requiring Board approval.

A. Regulation 9.014 Collegiate License Plate Revenues

Mr. Kitson moved approval of an amendment to Board Regulation 9.014 to reflect a change made by the University of North Florida Board of Trustees to decrease the amount of license plate revenue to be used for fundraising. Ms. Jordan seconded the motion and the members concurred unanimously.

B. Performance-Based Funding Allocation

Mr. Kitson moved approval of the Performance-Based Funding Allocation for the 2019-2020 fiscal year as presented. Ms. Jordan seconded the motion and the members concurred unanimously.

C. Public Notice of Intent to Repeal Board of Governors Regulation 9.012 Requiring Disclosure of Gifts from Foreign Governments and Persons

Mr. Kitson moved approval to notice the Board's intent to repeal Board of Governors Regulation 9.012 Disclosure of Gifts from Foreign Governments and Persons. Ms. Jordan seconded the motion and the members concurred unanimously.

16. Facilities Committee Report

Chair Lautenbach recognized Mr. Huizenga for the Facilities Committee report. Mr. Huizenga said the committee discussed several items including the potential lease of a portion of the University of South Florida's new College of Medicine facility by Tampa General Hospital and the work that Board staff has completed to date on the new points system for facilities constructed with Public Education Capital Outlay funds. Mr. Huizenga reported the committee has three items for approval by the Board.

A. University of Florida Educational Plant Survey

Mr. Huizenga called for a motion to approve the University of Florida Educational Plant Survey. Mr. Tripp made the motion, which was seconded by Mr. Lamb and the members concurred unanimously.

B. New College of Florida Educational Plant Survey

Mr. Huizenga called for a motion to approve the New College of Florida Educational Plant Survey. Mr. Tripp made the motion, which was seconded by Mr. Kitson and the members concurred unanimously.

C. Florida International University Aquatic Center Pool Repairs

Mr. Huizenga called for a motion to approve the use of Capital Improvement Trust Fund (CITF) funds for the Florida International University Aquatic Center pool repairs on the university's Biscayne Bay Campus and to amend the Board's prior CITF project list to include this project. Mr. Tripp made the motion, which was seconded by Mr. Kitson and the members concurred unanimously.

17. Audit and Compliance Committee Report

Chair Lautenbach recognized Mr. Cerio for the Audit and Compliance Committee report. Mr. Cerio reported the committee had several information items. The committee heard an update on the status of the investigation into the University of Central Florida's potential misuse of additional educational and general funds for construction and expects a final report at the August meeting. The committee also heard from Ms. Nancy Watkins, the University of South Florida's Audit and Compliance Committee Chair, who reported on the university's review into the use of carryforward funds in the construction of the Dr. Kiran C. Patel Center for Global Solutions. And lastly, the committee received an update from Mr. Kelvin Lawson, the Chair of the Florida Agricultural and Mechanical University, on the status of the university's athletics program cash deficit and the recent identification of financial improprieties at the university. Mr. Lawson described the university's plan for aggressively addressing these financial issues as well as the ongoing efforts to erase the athletics program cash deficit.

The committee also has one action item requiring Board approval.

A. Office of Inspector General and Director of Compliance 2019-2020 Work Plan

Mr. Cerio moved approval of the Office of Inspector General and Director of Compliance 2019-2020 Work Plan. Ms. Jordan seconded the motion and the members concurred unanimously.

18. Innovation and Online Committee Report

Chair Lautenbach called on Mr. Morton for the Innovation and Online Committee report. Mr. Morton stated that in addition to reviewing the quality metrics from the 2025 Strategic Plan for Online Education, the committee heard from two large companies that employ graduates from online programs. The committee also has one action item for the Board's consideration.

A. State University System 2018 Annual Report for Online Education

Mr. Morton moved approval of the State University System 2018 Annual Report for Online Education. Ms. Jordan seconded the motion and the members concurred unanimously.

19. Nomination and Governance Committee Report

Chair Lautenbach moved approval of the reappointment of Dr. Adrienne Perry to the Florida Polytechnic University Board of Trustees, subject to confirmation by the Florida Senate and attending an orientation session and annual Trustee Summits. The appointment term runs from June 13, 2019 to July 15, 2020. Mr. Kitson seconded the motion, and the members concurred unanimously.

Chair Lautenbach moved approval of the appointment of Mr. Michael Griffin to the University of South Florida Board of Trustees, subject to confirmation by the Florida Senate and attending an orientation session and annual Trustee Summits. The appointment term runs from June 13, 2019 to January 6, 2020. Mr. Kitson seconded the motion, and the members concurred unanimously.

20. New Member Orientation

Orientation sessions were held for new members Richard Corcoran, Zenani Johnson, Brian Lamb, Steve Scott, Eric Silagy, and Kent Stermon on June 11, 2019 and June 13, 2019. Chair Lautenbach and Vice Chair Kitson, together with Chancellor Criser and Board staff, provided information on the Board's constitutional responsibilities and fiduciary duties; budgeting and revenue sources for university operations and capital facilities; performance based funding; the Board's 2025 Strategic Plan and the strategic planning process and accountability plans; the Board's audit and compliance function; Florida's Sunshine laws and Code of Ethics; the Board's Strategic Plan for Online Education; the process for planning and constructing educational facilities; the Board's advocacy role; and communications.

21. Think Florida Presentation

On June 12, 2019, Chancellor Criser moderated a panel that included Mr. Dale Ketcham, the Vice President of Government and External Relations at Space Florida, Ms. Stephanie Jarmak, a Ph.D candidate in physics and planetary sciences at the University of Central Florida, and Mr. Jon Gustafson, the Director of Workforce Partnerships and Incentives at Lockheed Martin in Fort Worth, Texas (Mr. Gustafson arrived late due to flight delays).

Chancellor Criser started the discussion asking Mr. Ketcham to talk about the emerging trends in the aerospace industry. Mr. Ketcham said six years ago when the shuttle was retired, Cape Canaveral lost many high quality jobs, but with the growing interest in the commercial space universe and the investment by the state and private industry to develop the hardware for space commerce in Florida, that trend has been reversed. He mentioned that Blue Origin has constructed a facility in Florida where it will build the

largest commercial rockets in the world. Firefly, a company that builds smaller rockets, has also established a presence in Florida. Mr. Ketcham indicated the space industry's biggest constraint is talent, together with the need to buttress research in Florida. He mentioned the University of Central Florida is partnering with Space Florida on the development of a new microgravity center and the plan is for Florida to become the gateway for all economic activity in the solar system.

Chancellor Criser asked Ms. Jarmak to share some of her experiences as a student that has prepared her to work in the space industry. She said the study of physics helped her develop critical thinking skills and effective communication which she believes is essential for the STEM-related workforce. She also benefited from the opportunity to work with private aerospace companies like Blue Origin and Virgin Orbit and interact with experts in the field of planetary science through her work at the Center for Microgravity Research at UCF.

Chancellor Criser asked about talent development. Ms. Jarmak said as demographics change and younger workers enter the workforce, it's important to offer more leadership and mentorship opportunities to students, in particular to underrepresented students to ensure a more diverse workforce. Mr. Ketcham said when you plan to take manufacturing off the planet, a host of skill sets come into play and the challenge will be to integrate those skill sets for the services that will be needed. He pointed to coding and cyber as two of the high-demand skill sets and discussed the tension that often exists between industry and academia when industry expects students to be fully trained when they enter the workforce. He surmised part of that difficulty is due to the fact that companies are innovating so quickly, they don't know which skill sets they will need in five years.

Governor Morton asked what advice they would give to students interested in seeking a career in aerospace. Ms. Jarmak recommended students develop transferable skills in critical thinking and programming, and to seek out opportunities for hands-on experience or research experience.

Mr. Gustafson joined the panel and Chancellor Criser asked him to comment on what Lockheed Martin is doing to get students interested in careers in the industry and what the State University System can do to step up its game. Mr. Gustafson said Lockheed Martin has created a strategic program focusing on skill needs, recognizing the digital transformation of the workforce and the need to make significant investments to create a talent pipeline. They are involved in leveraging employee training, both in reskilling and upskilling, and expanding their apprenticeship and tuition reimbursement programs. He noted while over half of their workforce does not have a college degree, gaps in the workforce exist in the advanced manufacturing area. He said they are more focused on competencies and skills; however, rather than specific degree programs.

Governor Tripp asked how the State University System could be a better partner. Mr. Gustafson emphasized the need to collaborate on aligning programs to meet the skill needs and to expand access and opportunities to students early in the educational pipeline. Governor Tripp asked if a task force consisting of college, university, and industry representatives charged with looking at industry workforce needs over the next 5 to 10 years would be helpful. Mr. Gustafson agreed, stating the task force could develop a strategic plan for meeting those needs.

In closing, the panelists were asked what would be their number 1 suggestion to a high school student or freshman who is interested in the aerospace industry. Mr. Gustafson emphasized the need to start early with understanding available career paths and the type of credentials required for the job. Ms. Jarmak recommended the student seek out a mentor such as a graduate student who is studying in the field they want to pursue. Mr. Ketcham agreed with the other panelists, but emphasized the need for the student to put in the effort it takes to become proficient in their area of interest.

Chancellor Criser thanked the panelists for their participation and insights.

22. Concluding Remarks and Adjournment

Chair Lautenbach announced the next in-person meeting of the Board will be August 28-29, 2019 at Florida Gulf Coast University. He also reminded everyone the next Trustee Summit will be held on October 29, 2019. Having no further business, the meeting was adjourned at 12:31 p.m. on June 13, 2019.

SUBJECT: Confirmation of Reappointment of the President for Florida International University

PROPOSED BOARD ACTION

Confirm the reappointment of Dr. Mark Rosenberg as the president of Florida International University.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board Regulation 1.001(5)(c); Section 1001.706, Florida Statutes.

BACKGROUND INFORMATION

Board Regulation 1.001(5)(c) requires renewals of presidential employment agreements to be confirmed by the Board of Governors.

On June 19, 2019, the Board of Trustees of Florida International University approved an amendment to Dr. Rosenberg's employment contract, unanimously reappointing Dr. Rosenberg to serve as the president of Florida International University. The reappointment extends the term of Dr. Rosenberg's contract through August 3, 2021. Chair Claudia Puig is requesting confirmation of Dr. Rosenberg's reappointment by the Board of Governors.

Highlights of Dr. Rosenberg's leadership of Florida International University are included in the Board materials.

Board of Trustees

August 9, 2019

Chair Ned C. Lautenbach
Florida Board of Governors
State University System of Florida
325 W. Gaines Street, Suite 1614
Tallahassee, FL 32399

Dear Chair Lautenbach:

At its June 19, 2019 meeting, the Florida International University (FIU) Board of Trustees unanimously voted to extend President Mark B. Rosenberg's contract through August 2021. Specifically, the FIU Board of Trustees approved the attached "President's Employment Agreement Term Sheet." In accordance with BOG regulations, we are now requesting the Board of Governors' confirmation of our offer to extend Dr. Rosenberg's contract. I am very happy to provide this summary of accomplishments for Dr. Mark B. Rosenberg in support of his contract extension.

Following his contract extension into 2020, Dr. Rosenberg has continued to represent our university both at the national and local level, and has led us to many accomplishments which I have listed below:

Student Achievements

- Over 16,000 students were awarded degrees from FIU
- FIU's student athletes excelled with our football team qualifying and winning the Makers Wanted Bahamas Bowl, our swimming and diving team winning its fourth consecutive conference title and our women's tennis team winning its first championship all while achieving their highest collective GPA yet
- FIU's College of Law has continued to achieve the highest passage rate of any Florida law school (February 2018 and July 2018 exams)
- FIU's Model UN ranked #1 in North America by BestDelegates.com
- Expansion of FPL call center on campus allowing for twice as many on-campus jobs for our students
- Overall enhancement of the student experience allowing students experiences such as working abroad in Spain, building custom two-factor authentication systems, researching the beliefs and stigmas regarding HIV in India and volunteering locally and globally during spring and winter break

Modesto A. Maidique Campus, PC 548, Miami, Florida 33199 • (305) 348-6495 • Fax: (305) 348-6426

Equal Opportunity/Equal Access Employer and Institution

Institutional Achievements

- FIU is now ranked amongst the top 100 public universities in the United States
- FIU was designated an emerging preeminent university by the Board of Governors
- FIU went public with its first ever Capital Campaign with over $506M raised with over $65M being raised in the past year
- FIU's faculty and staff campaign has raised over $5M in the past year
- FIU has now surpassed 10,000 employees including faculty, staff and administrators
- FIU has added 311 faculty members
- FIU's research expenditures increased to $196M, up from $177M in our previous fiscal year
- FIU was awarded a record $124M in research funding
- FIU faculty members were awarded 66 patents in 2018, an increase of 57% from 2017
- FIU was named a "Great College to Work For" by the Chronicle of Higher Education for the fourth time in a row
- FIU was designated an Association of Public and Land-Grant Universities (APLU) Innovation & Economic Prosperity University
- FIU has hosted the President of the United States, and several cabinet members

Additionally, Dr. Rosenberg held Chair positions on the Association of Public and Land-Grant Universities (APLU) Coalition of Urban Serving Universities and the Commission on Access, Diversity and Excellence and co-chaired the Roundtable on Systemic Change in Undergraduate STEM Education.

We hope that you will support us by confirming Dr. Rosenberg's appointment for another one-year term from August 2020 through August 2021.

Should you have any questions, do not hesitate to reach out to me.

Sincerely,

Claudia Puig
Chair, FIU Board of Trustees

Florida International University
One Year Extension to Employment Agreement
For President Mark B. Rosenberg
Current Term: 2014-2020
Proposed Extension Term: 2020-2021

Description:	Proposed Terms
Term of Contract	Change. One year extension of the term, from August 3, 2020 to August 3, 2021 ("Term").
Compensation:	
Annual Base Salary	Unchanged. Base salary is fixed at $502,578.63 since October 2013 and includes opportunity for potential increases determined in discretion of Board (no automatic increases).
Annual Incentive Bonus	Change. Increases potential performance bonus amount awardable in 2019-20 and thereafter up to $150,000, and otherwise unchanged. Up to $100,000 awardable in 2018-19, as per current contract. ($100,000 awarded in April 2019 BOT meeting.) Special criteria for bonus consideration (separate from regular annual performance evaluation goals). President Rosenberg must remain in position at time of award except for any award for the final year of the Term which shall be paid no later than June 15, 2022 (following consideration by the BOT of the Accountability Plan under the new Board of Governors timeline and process).
Benefits/Expenses:	
Annual Retirement Supplement	Unchanged. Payment of $80,000 annually as a retirement supplement, no later than each December 31st, provided that President Rosenberg continues in employment as President in good standing as of December 15th immediately prior to the time scheduled for each annual payment.
All Other Miscellaneous Monetary Benefits	Unchanged. Includes car allowance, club membership initiation fee, premiums for long-term care insurance or other insurance, physical exams, relocation expenses.
Retention Bonus	Change. Added retention bonus of $50,000 earned as of August 3, 2021. (President Rosenberg will receive payment of the $100,000 retention bonus in current contract on August 3, 2019 (expiration of original term)). Retention bonus payments are conditioned on President Rosenberg being employed as President in good standing on the date earned.
Provisions Upon Expiration of Term as President:	
One-Year Research Leave Upon Expiration of	Unchanged. The current contract provides for a one-year research leave at the then-current annual President salary level at the

Description:	Proposed Terms
Term at President Pay Level; Earned As of Expiration of Current Term (August 3, 2019), subject to conditions.	expiration of the original term (i.e., August 3, 2019). The one year research leave is considered earned as of August 3, 2019, even if the contract terminates prior to the expiration of the Term (i.e., August 3, 2021), as long as President Rosenberg has remained in good standing through to the effective date of termination.
Benefits Following Research Leave	Unchanged. Faculty position considered earned as of August 3, 2019, even if the contract terminates prior to the expiration of the Term (August 3, 2021), as long as President Rosenberg has remained in good standing through to the effective date of termination. For the 3 years following research leave, if faculty duties under 12-month faculty appointment maintained, (i) annual base salary shall be at 75% of the last annual President base salary level, (ii) eligible for $30,000 annual research stipend, (iii) provided support of a .75 FTE staff assistant within the salary range of other FIU staff assistants, (iv) receives "University Professor" title, and (v) teaching load reduced. After this 3 year period, if President Rosenberg wishes to continue his faculty appointment, the Board Chair in consultation with the applicable Dean shall determine his salary and stipend following negotiation with President Rosenberg in an effort to seek mutual agreement.
Post-presidency Office Space with Computer, Phone and Current Furniture Specified	Unchanged. President Rosenberg will be assigned Office 623B in the Green Library for use during his research leave and duration of his tenure at FIU, so long as he remains in good standing with the University, as determined by the Board Chair, and subject to events of force majeure, renovations to the office or building and other similar causes that require the office space to be temporarily or permanently unavailable. If the office space becomes temporarily or permanently unavailable, reasonably similar alternative office space will be provided in the same or nearby building on the same campus.
President Emeritus Title	Unchanged. Upon termination of his service as President, President Rosenberg shall be entitled to receive the title of President Emeritus. The Board will consider a resolution to grant President Emeritus status upon termination of the Term or reasonably soon thereafter.
Other:	
Severance Pay	Unchanged. Unchanged from current contracts with FIU and FIU Foundation.
Future Extensions	Change. Date by which President Rosenberg and Chair meet to discuss interest in extension changed to June 30, 2020 from June 30, 2019; if extended, date for finalization of formal agreement changed to October 1, 2020 from October 1, 2019. This is consistent with current contract and last year's amendment.

Approval Process and Execution of Amended Contract	Unchanged. Agreement on all terms is conditioned upon obtaining FIU Board approval of terms, FIU Foundation approval of its funding obligation, and approval of the extension by the Board of Governors, and upon mutual execution of a contract document consistent with this Term Sheet.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Confirmation of Reappointment of the President for the University of West Florida

PROPOSED BOARD ACTION

Confirm the reappointment of Dr. Martha D. Saunders as the president of the University of West Florida.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board Regulation 1.001(5)(c); Section 1001.706, Florida Statutes.

BACKGROUND INFORMATION

Board Regulation 1.001(5)(c) requires renewals of presidential employment agreements to be confirmed by the Board of Governors.

On June 19, 2019, the Board of Trustees of the University of West Florida approved an amendment to Dr. Saunders' employment contract, unanimously reappointing Dr. Saunders to serve as the president of the University of West Florida. The reappointment extends the term of Dr. Saunders' contract through December 31, 2020. Chair Mort O'Sullivan is requesting confirmation of Dr. Saunders' reappointment by the Board of Governors.

Highlights of Dr. Saunders' leadership of the University of West Florida are included in the Board materials.

Supporting Documentation Included: 1. Letter from the University of West Florida Board of Trustees Chair
2. Leadership Highlights/Contract Terms

Ned C. Lautenbach Chair
Florida Board of Governors
State University System of Florida
325 W. Gaines Street, Suite 1614
Tallahassee, Florida 32399-0400

Dear Chair Lautenbach:

At its meeting on June 19, 2019, the University of West Florida Board of Trustees unanimously approved the attached "President's Employment Agreement," which extends Dr. Martha D. Saunders' contractual term for a one-year period commencing on January 1, 2020, through and including December 31, 2020, on the terms and conditions described therein. In support of this decision, I am very pleased to provide this summary of accomplishments for Dr. Saunders, who has served as the President of the University of West Florida since January 1, 2017.

Dr. Saunders' tenure as president has been marked by accomplishments in a variety of areas. Leading the accomplishments is our ranking alongside top-performing public universities for three consecutive years in the performance-based funding metrics established by the Board of Governors. The Board recognizes Dr. Saunders' unique ability to elevate UWF's reputation by blending the University's strategic plan with the Board of Governors strategic priorities. UWF is consistently named a "Best for Vets College" by Military Times and has received the Higher Education Excellence in Diversity Award from INSIGHT Into Diversity magazine three times.

Dr. Saunders has keenly recognized the best opportunities for UWF and increased the visibility of the University through innovative programs. She has tactfully capitalized on UWF's assets and thoughtfully determined new areas of growth. The state's first doctoral program in intelligent systems in robotics will launch in Fall 2019, a prime example of Dr. Saunders working toward the continued goal of growing UWF beyond humble beginnings.

Her accomplishments have positioned UWF as a highly desirable institution and Dr. Saunders continues finding new ways of increasing higher education accessibility for all prospective

An Equal Opportunity/Equal Access Institution

students. As a change maker, she has driven the action behind the solutions and propelled higher education into the future.

Below are some of her most significant accomplishments, among many:

Teaching & Learning

- In partnership with the Institute for Human and Machine Cognition, UWF is launching a doctoral program in intelligent systems and robotics, the first of its kind in Florida and one of only a few in the nation.
- The Usha Kundu, MD College of Health undergraduate nursing program ranked second in the state of Florida for percentage of students passing the NCLEX exam, with nearly 99% of UWF students passing the first time.
- The UWF Robotics team placed in the top two in the IEEE SoutheastCon competition for two consecutive years.
- The Usha Kundu, MD College of Health launched a Physician Assistant Pipeline Program with FSU to recruit and train qualified Florida panhandle students to become physician assistants who will care for elderly, rural, minority and underserved populations in Florida.
- UWF's four-year graduation rate is up 45% over four years. The continued enhancement of student support services, including first-year advising, tutoring and student accessibility resources has aided in the increasing rate.
- A greater number of degrees were awarded in programs of strategic emphasis.
- The cost per degree at UWF has decreased from $12,850 in the 2016-17 academic year to $9,920 in the 2017-18 academic year.

Scholarship, Research and Innovation

- The University was selected to host the National Conference on Undergraduate Research (NCUR) 2022 which will bring 5,000 talented university students and their advisors to our campus and community.
- The UWF Center for Cybersecurity was designated as the National Center of Academic Excellence Cybersecurity Regional Resource Center for the Southeastern region by the National Security Agency and U.S. Department of Homeland Security.
- The University was selected to host the 2019 Cybersecurity Centers of Academic Excellence Executive Leadership Forum, in partnership with the National Security Agency and the U.S. Department of Homeland Security.
- UWF partnered with our regional economic development body, Florida West, to launch the Cybersecurity Strategic Plan .
- The Sea3D Additive Manufacturing Lab was launched, offering additive manufacturing

capabilities through 3D printing. Funding by the Florida legislature made the purchase of the equipment possible.

- UWF strengthened the quality of scholarship and innovation through the work of UWF's Innovation Institute, the University's world-class faculty and talented students.
    - The Innovation Institute responded to the Florida Board of Governors' 2025 Strategic Plan for Online Education and launched Complete Florida. This program includes success coaches, who proactively explore options with students for prior learning assessment during initial advising and program determination, with close coordination with partner institutions.
    - A 5-year, $3 million grant from the U.S. Department of Education will bring new technology, equipment and additional staff to campus for STEM education.
    - A $1.3 million grant to support students pursuing teaching careers in STEM fields.
    - The National Institutes of Health renewed funding for UWF's Maximizing Access to Research Careers Scholars Program with an anticipated five-year budget of $1.44 million, allowing the program to fund eight scholars per year.
    - Former Florida Gov. Rick Scott and the Florida Department of Health awarded UWF more than $94,000 in grant funds for adaptive dance Alzheimer's research.
    - UWF student Megan Morton was one of three students recognized worldwide by cybersecurity company Morphisec in its 2018 Women in Cybersecurity Scholarship competition.
    - Dr. Alexis Janosik is working with the National Oceanic and Atmospheric Administration to take an inventory of reef fish communities in the Gulf of Mexico.
    - Dr. Peter Cavnar, Dr. Hui-Min Chung and Dr. Claudia Stanny were awarded a grant from the National Science Foundation to provide research experiences for transfer students.

Community and Business Engagement

- UWF strengthened its presence in downtown Pensacola through partnerships, new locations and an institutional campaign.
- A new Office of Military Engagement was formed to enhance our partnerships with area military bases and defense industries, and appointed retired U.S. Navy Capt. Chris Middleton as military liaison.

- iHire, an initiative that connects uniquely qualified and talented graduates with employers in Northwest Florida and beyond, was launched.
- Partnerships with Florida Agency for State Technology and the Florida Department of State were established to enhance Florida's cybersecurity resiliency.
- Nine new degree programs were approved to address workforce shortages.
- The UWF Office of Economic Development and Haas Center developed a high impact program for UWF students connected to the national Hacking for Defense (H4D) collaborative. UWF undergraduate students worked with Air Force Special Operations Command, Y-12 National Security Complex and 7th Special Forces Group to build solutions solving critical national security problems.
- UWF completed a $64.7 million capital campaign that included $18 million in scholarship endowment funding.

In addition, Dr. Saunders has made numerous presentations to local, state, national and international groups. She received the 2019 National Association of Colleges and Employers Career Services Champion Award, a testament to her forward thinking and support of career services. This year, Dr. Saunders was named as one of the Miami Herald's 50 Influential Floridians. She maintains a high social media profile and is frequently sought as a thought leader on higher education issues. In addition, she is teaching an undergraduate class in the Department of Communication.

Florida law, namely Section 1001.706(6)(a), Florida Statutes, entrusts to the Board of Governors confirmation of the reappointment of a university president by the University's Board of Trustees. Accordingly, on behalf of the UWF Board of Trustees, I respectfully request that the Board of Governors confirm Dr. Saunders' reappointment for a one year period commencing January 1, 2020, through and including December 31, 2020, on the terms and conditions described in the approved employment agreement.

Please do not hesitate to reach out to me should you have any questions or wish to discuss this matter.

Sincerely,

Mort O'Sullivan, Chair
University of West Florida Board of Trustees

cc: Dr. Martha D. Saunders

University of West Florida
One-Year Extension to Employment
Agreement For President Martha D. Saunders
Current Term: 2017-2019
Proposed Extension Term:
January 1, 2020-December 31, 2020

Description	Proposed Terms
Term of Contract	One-year extension of the term, from January 1, 2020 to December 31, 2020 ("Term").
Compensation:	
Annual Base Salary	Under the extension contract, the base salary will be increased from her current 2019 salary of $386,761 to $405,000.00 beginning January 1, 2020. This is an increase of less than 5%. Otherwise unchanged. The opportunity for potential increases are determined annually by the Board of Trustees in conjunction with the Board's valuation of job performance and eligibility for any salary increase generally applicable to University employees in her employment classification.
Annual Incentive Bonus	Unchanged. Annual Performance Incentive may be granted for annual achievement of performance incentive criteria set by the Board of Trustees in an amount of up to twenty percent (20%) of base salary.
Benefits/Expenses:	
Annual Retirement Supplement	Unchanged. Payment of a supplemental deferred compensation benefit equal to 18.9% of base salary during each year of service as President. This supplement is in addition to regular state benefits and contributed to a defined contribution 401(a) plan.
All Other Monetary Benefits During Term	Unchanged. Includes car and housing allowance, annual physical examination to the extent the costs are not covered by the President's health insurance, supplemental pay for mobile phone and eligibility for all applicable State of Florida and University developed benefits authorized by the legislature or other authorized governing bodies based on her annual base salary. The President is also entitled to all benefits applicable to executive service personnel in accordance with University policy and Florida law.
Provisions Upon Expiration of Term as President:	
One-Year Discretionary Professional Development Leave Upon Expiration of Term at 90% of President's Pay Level; Providing for an Additional One-Year Professional Development Leave Without Pay; Providing for Financial Support for Professional Development Leave Activities .	The current agreement provides for a one-year discretionary professional development leave at the end of the Presidential term. The professional development leave may be extended for one additional calendar year at the President's discretion. However, any professional development leave exceeding one year will be unpaid. The extension agreement provides a salary in the amount of 90% of the then-current salary level at the expiration of her term as President during the first one-year of professional development leave. Otherwise, consistent with current contract. During the period of professional development leave she shall develop and enhance her skills in research, service and consulting and retooling for the classroom. She will receive $12,000.00 in financial support for professional development leave activities, including travel expenses and tuition costs.

Faculty Position Following End of Presidential Term or End of Discretionary Professional Development Leave; Faculty Position and Assignment Defined; Benefit for Scholarly Work.	Under the extension contract, if the President chooses to return to faculty status, the President's salary as Professor shall be $242,205.92. Under the current contract if the President chooses to return to faculty status, the President's salary as Professor will be calculated as follows: (a) if the President has served at least three years as President – the higher of (x) a salary equal to ninety percent (90%) of her salary as Provost at UWF for calendar year 2016, or (y) a salary equal to the average of the salaries of the three (3) highest paid tenured faculty in the college to which she is assigned; (b) if Employee has served less than three years as President – a salary equal to ninety percent (90%) of her salary as Provost at UWF for calendar year 2016; (c) For purposes of these calculations, it is agreed that the President's salary as Provost at UWF for calendar year 2016 is $255,348, and that 90% of such salary is a rate per annum equal to $229, 813.20. Otherwise the conditions for the President to return to faculty status and her benefits remain unchanged. If the contract is terminated without cause, if the President resigns with ninety (90) days prior written notice or if the extension contract is not renewed at the end of the Term and expires, the President shall be offered the opportunity to return to a faculty position as a tenured Professor in the University's Department of Communication. President Saunders' workload as a tenured Professor in the Department of Communication will be distributed as follows: teaching – 50%, research – 25%, and service – 25%. The University will make a one-time contribution of $25,000 to fund a seed account to support her scholarly work. The salary guarantee shall extend for five (5) years of satisfactory performance as a tenured faculty member; thereafter, President Saunders' salary shall be determined to reflect the market and performance.
Other:	
Adjustment to Evaluation Cycle	Unchanged.
Approval Process and Execution of Amended Contract	Agreement on all terms is conditioned upon obtaining UWF Board approval of terms, UWF Foundation approval of its funding obligation, and approval of the extension by the Board of Governors, and upon mutual execution of a contract document with language carrying forward current contract provisions as amended per terms set forth in this Term Sheet.
Termination of the Agreement for Cause	Unchanged. The Board may terminate this Agreement at any time for cause. For neglect or inattention by the President, the Board is required to give specific written notice of such neglect or inattention and she may be removed for cause only after she has continued such neglect or inattention during a subsequent period specified by the Board not less than thirty (30) days following her receipt of the written notice from the Board of Trustees that she is not in compliance. Other acts of termination for "cause" for serious misconduct are defined by the contract without a required notice period.
Termination of the Agreement Without Cause	Unchanged. Ninety (90) days prior written notice if the Board or President terminates this Agreement at any time prior to the expiration of the Term.

MARTHA DUNAGIN SAUNDERS, PH.D., APR, CPRC

EDUCATION

Ph.D. (Communication Theory & Research), Florida State University, 1990
M.A. (Journalism) Grady School of Journalism, University of Georgia, 1979
B.A. (French) University of Southern Mississippi, 1969

LEADERSHIP DEVELOPMENT EXPERIENCES

- National Security Forum, United States Air Force Air War College, 2019
- Fulbright Scholar, U.S.-France International Education Administrators Program (IEA), U.S. Department of State Bureau of Educational and Cultural Affairs, October 2015
- Oxford University Conclave on Global Ethics, 2006
- U.S. Department of Defense Joint Civilian Orientation Conference, 2002
- Harvard Institute for Management and Leadership in Education, 2001

AWARDS AND RECOGNITIONS

- Career Service Champion Award from the National Association of Colleges and Employers for leadership in support of career services education, 2019
- Miami Herald's 50 Influential Floridians, 2019
- Hattiesburg (MS) Public Schools Hall of Fame, 2018
- Inweekly (Pensacola) Power List (2019, 2018,2017, 2016, 2015, 2014)
- Citizen of the Year 2016, Rotary Club of Gulf Breeze
- Rotary International Paul Harris Fellow, 2017
- 50 Top Business Women in Mississippi, Class of 2012
- National Stevie Award for Women in Business, 2011
- National winner, Silver Anvil Award, Public Relations Society of America for campaign to enrich the brand of a research university, 2011
- Alumni Hall of Fame, University of Southern Mississippi, 2010
- The Hub Award (City of Hattiesburg), 2010
- Chi Omega Fraternity, Roselyn Dabbs Outstanding Alumna, 2008
- Woman of Excellence Award, Diabetes Foundation of MS, Inc., 2008
- University of West Florida Distinguished Service Award, 1996
- National winner, Silver Anvil Award, Public Relations Society of America for "Just 2 It!" public safety campaign, 1994
- Florida Teaching Incentive Program (TIP) Award, 1994
- Invited faculty, The Florida State University's London Study Center, Fall Semesters 1992 and 1993
- Outstanding Undergraduate Teaching and Advising Award, University of West Florida, 1992
- Distinguished Teaching Award, University of West Florida, 1992
- Golden Apple Award for Teaching Excellence, Escambia County [FL]Foundation for Excellence, 1991

RECENT SERVICE AFFILIATIONS

- United States Global Leadership Council's Florida Advisory Committee (2019)
- United States Magistrate Judge Selection Panel (2018)
- Achieve Escambia Leadership Board (2017 – present)
- Baptist Healthcare Corporate Board (March 2018 – 2021)
- Baptist Hospital, Inc./Jay Hospital, Inc. Board of Directors (2016 – 2018)
- Studer Community Institute, Pensacola, Florida. Board of Directors (2015 – 2018)
- Southern Association of Colleges and Schools. Board of Directors (2014 – 2016)
- Southern Association of Colleges & Schools Commission on Colleges (SACSCOC). Board of Trustees (2007 – 2013)
- Institute for Human and Machine Cognition (IHMC), Pensacola, Florida. Board of Directors (2013 – present)
- Public Relations Society of America. Accredited member (APR)
- Pensacola (Florida) Rotary Club

ADMINISTRATIVE POSITIONS & ACCOMPLISHMENTS

President (January 2, 2017 – Present)
Professor of Communication
University of West Florida

Administrative Initiatives

- Expanded UWF presence in region (Sea3D Lab, UWF Global Online, Center for Cybersecurity in downtown Pensacola)
- Led 50th Anniversary celebration
- Launched Reubin O'D. Askew Institute for Multidisciplinary Research
- Launched Division of Research and Strategic Innovation
- Completed Strategic Plan 2017 – 2022
- Sponsored Next Big Thing Awards for transformative initiatives

Facilities

- New campus master plan (launching 2018)
- University Park Center, opened 2018 (32,700 gsf)
- Laboratory Sciences Annex (53,000 gsf)

Academics

- Recruited first class of National Merit Scholars, 2018
- Top 3 university, SUS performance based funding, 2017, 2018
- Launching Ph.D. Intelligent Systems & Robotics, 2019
- Launched UWF Global Online, 2018

Development

- First named department (Rubin O'D. Askew Dept. of Government)
- Named College of Health (Usha Kundu, M.D. College of Health)
- Named Master of Science in Nursing (Earl & Nancy Hutto)
- Completed Sea Change Capital Campaign at $64.3 million(in excess of $50 million goal) December 2017

Research & Strategic Innovation

- Launched UWF Innovation Network featuring knowledge clusters in cybersecurity, advanced manufacturing, and coastal communities

Student Engagement

- Launched iHire marketing program to increase employment for graduates

Provost & Executive Vice President (January 2, 2013 – December 31, 2016)
Professor of Communication
University of West Florida

- Established UWF Innovation Institute; mission is to enrich the community, state and region through academic partnerships; current projects include STEM Immersive Education and a legislatively funded degree completion initiative for the state of Florida; awarded oversight of Florida Virtual Campus
- Established Center for Research & Economic Opportunity (CREO)
- Established University College committed to the institution-wide delivery of high-impact educational practices leading to professional readiness
- Established UWF Center for Cybersecurity; focused on information technology, industry standard certifications, research, and community partnerships; received NSA and DHS designation as a Center of Academic Excellence in Cyber Defense Education
- Established the Office of Equity, Diversity and International Programming and commissioned UWF's first diversity plan
- Reorganized Division of Academic Affairs leading to a named college of Science & Engineering
- Launched The Village & Catalyst International Programs
- Launched faculty & staff professional development programs
- Launched Banner Student project
- Developed a five-year strategic enrollment plan
- Developed a financial literacy program for current students
- Led SACSCOC Application leading to successful Reaffirmation of Accreditation

President (2007 – 2012)
Professor of Communication
University of Southern Mississippi (six teaching/research campuses)

Administrative Initiatives: (Post-Katrina rebuilding)

- Strategic plan with clear, measurable indicators
- Master plan for Hattiesburg campus
- Master plan for Gulf Coast Research Lab
- Master plan for new campus on Gulf Coast
- Climate Action Plan (toward carbon neutrality by 2040)
- Revised budget model
- Increased reserve funds

Facilities (Approximately $300 million)

- Century Park Phase II Residence Facilities/approximately $55 million
- Trent Lott National Center of Excellence for Economic Development and Entrepreneurship/$25.8 million

- Century Park Residence Facilities (LEED gold certified) $47.6 million
- Centennial Gateway/$208,000
- Fencing (Hattiesburg campus)/$625,000
- College of Business building/$33 million
- College Hall renovation/$6.5 million
- The Accelerator (National Formulation Science Laboratory)/$27 million
- Science & Technology Building (Gulf Park campus) $10.7 million
- Parking garage (1200 spaces) $14.4 million
- Stadium end zone renovation (luxury seats and club seating) $31.8 million
- Softball field renovation/$1.7 million
- Baseball Field renovation/$643,000
- Tennis courts/$2.22 million
- Post-Hurricane Katrina restoration (Gulf Park campus)/$12 million
- Reed Green Coliseum improvements/$8.8 million
- Baseball suites and press box/$3.7 million
- School of Nursing building/$28 million

Academics

- Record enrollment (5 years)
- Record freshman recruitment (5 years)
- Increased average freshman ACT scores
- Increased annual degrees awarded (over 5-year average)
- Increased professional accreditations
- Increased external research funding to record high.
- Increased student satisfaction inventory results on all measures
- Established National Center for Spectator Sports Safety & Security
- Established Lake Thoreau Environmental Center
- Re-established College of Nursing and began CSRN program
- Established polymer science engineering program

Connection with Community

- Increased student volunteer hours
- Established position to lead university economic development efforts
- New business partnerships including Stion Corporation & GE Aviation

Visibility & Development

- Record high private donations (from $3million/annually to $20 million/annually)
- Increased annual total media mentions
- Increased annual national media hits (excluding athletics) by 800 percent
- Increased number of endowed funds
- Increased total gifts and commitments to Athletic Foundation

Chancellor (2005-2007)
University of Wisconsin-Whitewater
Whitewater, Wisconsin

Capital Projects (Approximately $110 million)

- Construction of new College of Business & Economics building, $42 million, completed Summer 2009
- University Center reconstruction, $20 million, completed Summer 2008
- Construction of new LEEDS certified 450 bed apartment-style residence halls, $35 million, completed Summer 2009 (Phase I) and Summer 2010 (Phase II)
- MultiSport Athletic Complex, $7.2 million, Phases I & II completed 2007
- Bookstore remodeling, $2.4 million, completed Summer 2008
- All-agency project to update, replace and resize utilities, $3 million, completed Fall 2007

Planning & Development

- Developed unique campus strategic plan built on substantial campus, community and alumni input; revised financial review process to strengthen accountability and oversight
- Secured $2.2 million in private funding (2006) for naming of new College of Business Education building
- Reviewed federal funding priorities for the UW as a member of the University of Wisconsin System Federal Relations Council
- Completed successful Higher Learning Commission of the North Central Association of Colleges and Schools reaffirmation of accreditation
- Oversaw continued development of nationally ranked athletic program housing three national championships in two years; appointed to NCAA Chancellors/Presidents Advisory Group
- Elected member of the Downtown Revitalization Board; provided strong support for the city of Whitewater's successful bid to become a Main Street community; developed strategies for town/campus communications and effective problem-solving
- Developed plan for keeping university connected with alumni which includes e-mail for life; expanded staffing for alumni relations
- Developed first ever campus diversity plan; oversaw increase in graduation rates for multicultural students of 5.6 percent; winner State of Wisconsin's Ann Lydecker Educational Diversity Award (2006)
- Developed Student Ambassador Program; launched three new undergraduate online programs

Vice President for Academic Affairs (2002 – 2005)
Columbus State University, University System of Georgia

- Direct involvement in $100 million capital campaign; 8 named professorships; 26 named scholarships; naming of TSYS Department of Computer Science ($3 million); naming of Saunders Center for Music Studies ($3 million); endowment for faculty professional development ($ 1 million); Kresge Grant for capital projects ($ 1 million); Knight Grant for teacher retention ($375,000); Goizueta

Foundation grant for the recruitment and retention of Hispanic students ($500,000)
- Created CSU Centers of Excellence to oversee 30+ public-private partnerships
- Attained initial AACSB accreditation for D. Abbott Turner College of Business
- Designed and implemented a plan for recruitment and retention of minority faculty leading to a 25 percent increase in two years
- Secured collections for Bo Bartlett Gallery to be housed on downtown arts campus
- Established CSU campus in Oxford, England; negotiated enrollment agreements with Greyfriar's College and Corpus Christi College of Oxford University; led in the acquisition of a privately funded $2.5 million residential facility for students in Oxford
- Wrote collaborative grant (with Muscogee County School System) leading to establishment of Early College
- Established CSU Center for Quality Teaching and Learning
- Developed and implemented award winning comprehensive media program ("Change Your Mind…At CSU") including television, radio and print advertisements and collateral materials contributing to average enrollment increases of 9 percent
- Developed specialized recruitment plan for Schwob School of Music
- Designed and implemented a faculty salary competitiveness program to increase faculty salaries to national averages
- Designed and implemented a model for employment of part-time faculty consisting of increased salary, specialized orientations and part-time faculty handbook
- Expanded International Education from 11 to 27 individual programs
- Won University System of Georgia 2004 Best Practices Award for Internationalizing Programs
- Initiated a Global Perspectives graduation requirement
- Designed, implemented, and secured funding for CSU's First Year Experience including a University Advising Center, Freshman Convocation, Learning Communities and residence hall initiatives leading to increased student retention by 7 percent over two years
- Designed and implemented plan for increased graduation rate as a member of the Chancellor's Task Force for Graduation Rate
- Developed and implemented an enrollment plan targeting Hispanic students
- Created advisor position for university athletes
- Decentralized budgeting authority to college deans
- Established Artist-in-Residence Program
- Led SACSCOC Reaffirmation of Accreditation review
- Led university strategic planning process for 2005-2010
- Developed plan for recruitment and preparation of a new generation of Super Teachers in Mathematics and the Sciences

Dean, College of Arts & Sciences (2000 – 2002)
Interim Dean, College of Arts & Sciences (1999 – 2000)
University of West Florida

- Led the successful merger of two colleges (College of Science and College of Arts & Social Sciences) and coordinated programming at Fort Walton Beach campus.
- Co-chaired workgroup for unique community/university joint strategic planning process
- Created a Division of Life & Health Sciences
- Created Maritime Studies degree program
- Created Interdisciplinary Information Technology degree program
- Created Historic Preservation degree program
- Developed and implemented a successful enrollment marketing plan ("Bringing Out the Best") contributing to enrollment increase of 12 percent in two years.
- Created a transparent and strategically-driven budgeting process
- Established a collaborative AA to BA program on the campus of Okaloosa-Walton Community College
- Secured legislative approval for BS degree in Nursing
- Secured legislative funding for University Honors Program ($150,000/year)
- Administrative liaison to newly established Board of Trustees when Board of Regents system was abolished by the state legislature
- Attained initial ABET accreditation of electrical and computer engineering program
- Initiated $3 million capital campaign for electrical & computer engineering program
- Established peer tutoring centers in science and mathematics

Director of University Honors Program
Associate Dean, College of Arts & Social Sciences (1996 – 1999)
University of West Florida

- Expanded University Honors Program to recommended standards of the National College Honors Council leading to naming as "Best Honors Program" and "Best Student Honors Council" by Florida Leader Magazine
- Established Honors International Summer Experience and secured private funding of $50,000 annually
- Secured a $1 million gift for University Honors Program in support of programming on First Amendment issues
- Developed award winning Honors publications

Coordinator, Public Relations Program, Dept. of Communication Arts (1986 – 1996).
University of West Florida

- Developed curriculum and programming toward initial AEJMC accreditation
- Increased program size to largest in department

- Created and implemented national/international internship program leading to placements in the White House, U.S. Olympic Planning Committee and the American Embassy in London
- Created and implemented shadow programs with local and regional professionals.
- Established charter chapter of Public Relations Student Society of America and student chapter of Florida Public Relations Association
- University Gifts Chair, UWF Capital Campaign, exceeding campus goal by 11 percent

UNIVERSITY TEACHING EXPERIENCE

Professor of Communication, University of West Florida, 2013 – Present
Professor of Communication, University of Southern Mississippi, 2007 – 2012
Professor of Communication, University of Wisconsin-Whitewater, 2005 – 2007
Professor of Communication, Columbus State University, 2002 – 2005
Professor of Communication, Associate Professor, Assistant Professor, Instructor, University of West Florida, 1984 – 2002

COURSES TAUGHT

Undergraduate: Integrated Advertising & Public Relations Concepts, Public Relations Strategies, International Public Relations, Feature Writing, Magazine Writing, Newspaper Reporting, Principles of Public Relations, Communication Research Methods, Public Relations Management, Writing for Public Relations, International Public Relations, Honors International Summer Experience.
Graduate: Case Studies in Communication, Special Topics in Public Administration, Content Analysis Research Methods, Crisis Communication, Introduction to Graduate Studies, International Public Relations.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Renewal of Chancellor's Employment Agreement

PROPOSED BOARD ACTION

Approval of renewal of Chancellor's Employment Agreement and delegation of authority to the Chair

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

On September 13, 2018, the Board approved the renewal of the Chancellor's Employment Agreement for a one year term from January 1, 2019 to January 1, 2020.

Based on Chancellor Criser's exemplary performance, Chair Lautenbach is requesting renewal of the agreement for an additional one year term from January 1, 2020 to January 1, 2021, and a delegation of authority from the Board to negotiate a revised compensation amount and to execute the Employment Agreement on behalf of the Board.

Facilitators/Presenters: Chair Ned Lautenbach

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Approval of creation of a subsidiary of the H. Lee Moffitt Cancer Center and Research Institute, Inc.

PROPOSED BOARD ACTION

Approve the creation of a subsidiary ("Immuno, Inc.") of the H. Lee Moffitt Cancer Center and Research Institute, Inc. ("Cancer Center").

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Section 1004.43(1), Florida Statutes.

BACKGROUND INFORMATION

Section 1004.43(1), Florida Statutes, provides that the Cancer Center may, with the prior approval of the Board of Governors, create either for-profit or not-for-profit subsidiaries to fulfill its mission of research, education, treatment, prevention and the early detection of cancer. To fulfill its mission, the Cancer Center is requesting approval from the Board of Governors to create a wholly owned for- profit company ("Subsidiary"), as described in the attached Certificate of Incorporation, to create a clinical research organization ("CRO") to partner with biotech, pharmaceutical, and healthcare organizations to support and accelerate clinical research through clinical trial support and administration. Through the Subsidiary the Cancer Center will be able to engage in activities that are not recognized by the IRS as charitable or exempt but which nonetheless supports the mission and goals of the Cancer Center. Specifically, the creation of the Subsidiary will permit the Cancer Center to more easily seek investment and partner with for-profit entities in collaborative clinical trial support and administration that can lead to the development of new forms of cancer treatment.

The new company will initially be incorporated as a wholly owned subsidiary of the Cancer Center. As the Subsidiary requires additional capital, outside investments can be made in the CRO by other investors who may acquire ownership interests. The Cancer Center will initially appoint the board of directors that will manage the affairs of the Subsidiary and oversee the operations of the Subsidiary, ensuring that the Subsidiary contributes to the Cancer Center's mission. As sole shareholder, the Cancer Center will also approve any changes to the Certificate of Incorporation and must approve the Bylaws of the Subsidiary. Audited financial statements of the Subsidiary will be prepared annually and submitted to the Auditor General and the Board of Governors.

The Board of Governors, the Auditor General and the Office of Program Policy Analysis and Government Accountability shall have the authority to request and receive supplemental information relative to the operation of the subsidiary.

Draft of 7/31/19

CERTIFICATE OF INCORPORATION
OF
IMMUNO, INC.

I, the undersigned natural person acting as an incorporator of a corporation (the "Corporation") under the General Corporation Law of the State of Delaware (the "DGCL"), do hereby adopt the following Certificate of Incorporation (the "Certificate") for the Corporation:

ARTICLE I: NAME

The name of the Corporation is Immuno, Inc.

ARTICLE II: REGISTERED OFFICE AND AGENT

The address of the registered office of the Corporation in the State of Delaware is Corporation Trust Center, 1209 Orange Street, in the City of Wilmington, County of New Castle, 19801. The name of its registered agent at such address is The Corporation Trust Company.

ARTICLE III: PURPOSES

The purposes for which this Corporation is organized are to engage in any lawful activity within the purposes for which corporations may be organized under the DGCL.

ARTICLE IV: CAPITAL STOCK

The total number of shares of all classes of capital stock which the Corporation shall have authority to issue is 1,000 shares of Common Stock, $0.0001 par value per share. Each share of Common Stock shall be entitled to one vote.

ARTICLE V: INCORPORATOR

The names and mailing address of the incorporators are: Alan F. List, Yvette M. Tremonti, and L. David de la Parte, c/o H. Lee Moffitt Cancer Center & Research Institute, Inc., 12902 USF Magnolia Drive, Tampa, FL 33612.

ARTICLE VI: PERIOD OF EXISTENCE

The Corporation will have perpetual existence.

ARTICLE VII: BOARD OF DIRECTORS

The number of directors will be fixed by, or in the manner provided in, the Bylaws of the Corporation.

ARTICLE VIII: ELIMINATION OF CERTAIN LIABILITY OF DIRECTORS

A director of this Corporation shall not be liable to the Corporation or its stockholders for monetary damages for breach of fiduciary duty as a director, except to the extent that exculpation

from liability is not permitted under the DGCL as in effect at the time such liability is determined. No amendment or repeal of this Article VIII shall apply to or have any effect on the liability or alleged liability of any director of the Corporation for or with respect to any acts or omissions of such director occurring prior to such amendment or repeal.

ARTICLE IX: CORPORATE OPPORTUNITY

To the maximum extent permitted from time to time under the law of the State of Delaware, this Corporation renounces any interest or expectancy of the Corporation in, or in being offered an opportunity to participate in, business opportunities that are from time to time presented to its officers, directors or stockholders, other than those officers, directors or stockholders who are employees or former employees of the Corporation or one of its subsidiaries. No amendment or repeal of this paragraph shall apply to or have any effect on the liability or alleged liability of any officer, director or stockholder of the Corporation for or with respect to any opportunities of which such officer, director or stockholder becomes aware prior to such amendment or repeal. To the fullest extent permitted by law, any Person purchasing or otherwise acquiring any interest in any shares of capital stock of the Corporation shall be deemed to have notice of and to have consented to the provisions of this paragraph. As used herein, "Person" shall mean any individual, corporation, general or limited partnership, limited liability company, joint venture, trust association or any other entity.

ARTICLE X: MEETINGS AND CORPORATE RECORDS

Meetings of the stockholders may be held within or outside the State of Delaware, as the Bylaws may provide. The books of the Corporation may be kept (subject to any provision contained in the DGCL) outside the State of Delaware at such place or places as may be designated from time to time by the Board of Directors or in the Bylaws of the Corporation. Elections of directors need not be by written ballot unless the Bylaws of the Corporation so provide.

ARTICLE XI: AMENDMENTS TO THE CERTIFICATE

The Corporation reserves the right to amend, alter, change or repeal any provision contained in this Certificate of Incorporation in any manner now or hereafter prescribed by the DGCL, and all rights conferred upon stockholders herein are granted subject to this reservation.

ARTICLE XII: AMENDMENTS TO BYLAWS

In furtherance and not in limitation of the powers conferred by the DGCL, the Board of Directors is expressly authorized to make, alter or repeal the Bylaws of the Corporation.

[Signature Page Follows]

Draft of 7/31/19

THE UNDERSIGNED INCORPORATOR, for the purposes of forming the Corporation, does make and file this Certificate of Incorporation, hereby declaring and certifying that the facts here stated are true and accordingly has set his hand on _____ __, 2019.

By:_____
Name: L. David de la Parte, Esq.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Florida Polytechnic University's 2019 Accountability Plan

PROPOSED BOARD ACTION

Consider approval of Florida Polytechnic University's 2019 Accountability Plan

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation 2.002

BACKGROUND INFORMATION

Board of Governors Regulation 2.002 requires the development of an institutional accountability plan intended to reflect each institution's distinctive mission and to focus on core strengths within the context of State University System goals as well as regional and statewide needs. The accountability plans outline each institution's strategic direction and top priorities as well as performance expectations and outcomes on institutional and system-wide goals.

At its June 11-12, 2019 meeting, the Strategic Planning Committee deferred taking action on Florida Polytechnic University's 2019 Accountability Plan, requesting that the University return in August 2019 with a revised plan. Florida Polytechnic has submitted a revised plan for consideration to approve. The Strategic Planning Committee Chair will provide a recommendation to the full Board.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Drugs, Alcohol, and Mental Health Task Force Report

PROPOSED BOARD ACTION

Consider approval of the Drugs, Alcohol, and Mental Health Task Force Report

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Dr. Christy England, Vice Chancellor for Academic and Student Affairs, provided the Drugs, Alcohol, and Mental Health Task Force with a report of the accomplishments and recommended solutions related to student mental health and student use and abuse of drugs and alcohol. The Task Force reviewed the report and the Task Force Chair will provide a recommendation to the full Board.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: SUS Textbook Affordability Initiative

PROPOSED BOARD ACTION

Consider for approval

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

During the June meeting of the Board's Innovation and Online Committee, Chair Morton announced that he had asked staff to present a plan to develop master agreements with publishers at the system level so that students throughout the state may obtain materials at more affordable prices than are currently available.

The Chancellor and his staff worked with a system-wide group to develop the action plan. If approved by the Innovation and Online Committee, the proposed plan will move to the full Board for approval.

Supporting Documentation Included: Action Plan included with the Innovation and Online Education Committee materials

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: 2019-20 Capital Improvement Fee Trust Fund (CITF) Allocation

PROPOSED BOARD ACTION

Approve the 2019-20 university CITF project allocations and authorizing the Chancellor to approve adjustments within a university's CITF allocation as may be requested by the university board of trustees.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Senate Bill 2500 General Appropriations Act

BACKGROUND INFORMATION

The 2019 General Appropriations Act included funding of $44,000,000 for projects to be funded from the Capital Improvement Fee Trust Fund, with proviso specifying that:

> *Funds in Specific Appropriation 17 shall be allocated by the Board of Governors to the universities on a pro rata distribution basis in accordance with the Board of Governors Legislative Budget Request for funding from the Capital Improvements Fee Trust Fund, as approved January 31, 2019. Each board of trustees shall report to the Board of Governors the funding it allocates to each specific project.*

Attached is a draft pro rata distribution for Board consideration and the specific project(s) being requested by the university at this time.

In some instances, completion of the desired project may require additional funding. The Board has not yet determined what amount will be requested during the 2020-21 Legislative Budget Request cycle.

Supporting Documentation Included: Information located in the Facilities Committee materials.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: 2020-2021 State University System (SUS) Fixed Capital Outlay (FCO) Legislative Budget Request (LBR)

PROPOSED BOARD ACTION

Review and approve the 2020-2021 SUS Fixed Capital Outlay Legislative Budget Request; Update on the Initial Public Education Capital Outlay (PECO) Points List.

Approval is recommended by the Chancellor.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

The requested budget provides the State University System of Florida continued capital outlay support and has been prepared in accordance with statutory requirements and guidelines adopted by the Board of Governors. All university fixed capital outlay legislative budget requests have been approved by the institutional boards of trustees.

In summary, the staff recommendation to the Board is adoption of a lump sum budget as the initial budget request for 2020-2021. The proposed amounts are in accordance with the official estimated amounts as provided by Florida law. A workshop is scheduled for October 3, 2019, at the University of Central Florida. At the workshop, the Committee will review the PECO projects using the preliminary selection group process pursuant to Senate Bill 190 (the points process).

Senate Bill (SB) 190 Process

SB 190 requires the use of a points-based project ranking system, and establishes six ranking criteria. However, SB 190 leaves it up to the Board to determine the actual point values assigned to each metric. The staff recommended point scale is as follows:

	Maximum Points
1. Prior Legislative Funding	20 Points
2. Maintenance and Infrastructure	15 Points
3. Space Needs Met	25 Points
4. University Priority	5 Points
5. Renovation or Replacement	15 Points
6. Eligibility Points	20 Points
Total Points	100 Points

Per SB 190, Criteria 1 and Criteria 6 are mutually exclusive. The Space Needs Met metric and Renovation/Replacement/Maintenance are not typically found in the same project. These and other factors indicate that the maximum project score is around 50 points.

As both the process and points values assigned are preliminary, each university has been given the opportunity to amend their Capital Improvement plans. Importantly, this public and transparent process allows for the correction of any out-of-date or incorrect information on the part of either Board or university staff.

The Facilities Committee will review both the 1) methodology and 2) all PECO point projects at its meeting scheduled for October 3, 2019. In as much as the methodology drives the points values, the Committee may (or may not) need to meet briefly later in the month to recommend a final comprehensive LBR for full Board approval October 30th.

Specific Fixed Capital Outlay Appropriation Requests

- **[ADOPT $110,155,073M] The PECO 2020-2021 SUS Five-Year Fixed Capital Outlay Request -**

  [ADOPT $44M] Request for Capital Improvement Trust Fund (CITF) Allocation - represents an amount based on current CITF revenue projections, with a base assumption of no future fee increases. The pro-rata distribution will be adopted at a future meeting of the Board.

- **[Information] Preliminary Selection Group -** represents an assessment of: 1) projects deemed potentially eligible for funding; and 2) the preliminary points assigned to eligible projects.

Supporting Documentation: Information located in the Facilities Committee materials.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Proposed Amendment to Board of Governors Regulation 14.0025 Action Required Prior to Fixed Capital Outlay Budget Request

PROPOSED BOARD ACTION

Action - Notice of Intent to Amend Board Regulation 14.0025

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

This regulation was amended on March 27, 2008, to specify that budgets approved by the board of trustees, rather than the Chancellor, and would serve as the basic planning documents for facility construction:

> *Building programs approved by the university president, and budgets approved by the ~~Chancellor~~ university board of trustees, shall serve as the basic planning documents for development of plans and specifications for construction.*

The proposed amendments re-establish a role for the Chancellor and provides for Board approval of fixed capital outlay budgets, in parallel to the approval of university operating budgets, as provided in Board Regulation 9.007, State University Operating Budgets:

- Specifies that projects requested for inclusion on the the Board of Governors' three-year Public Education Capital Outlay (PECO) Priority List must be supported by an educational plant survey.
- Specifies that the Chancellor's Office will provide a format for the fixed capital outlay budget to be approved by the university board of trustees.
- Provides that the fixed capital outlay budget approved by the trustees must be submitted to the Board for approval (parallels the process for the operating budget).
- Authorizes the Chancellor to approve Fixed Capital Outlay amendments up to $5,000,000.

The proposed draft has been provided to the universities for feedback.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Public Notice of Intent to Amend Board of Governors Regulation 6.001 General Admissions

PROPOSED BOARD ACTION

Consider approval of Public Notice of Intent to Amend Board of Governors Regulation 6.001 General Admissions

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Board Regulation 6.001 General Admissions has been amended to align the information in regulation with Section 1000.05(2), Florida Statutes. Section 1000.05(2) was amended in the 2019 legislative session, adding religion to the list of protected categories from discrimination against students and employees in the Florida K-20 public education system. Adding religion to the list of protected categories that must not be used in the admission process ensures that all areas from s.1000.05(2) are referenced.

If approved by the Academic and Student Affairs Committee and the full Board of Governors, the Intent to Amend will be available for public comment for thirty days. If no concerns are raised by that time, the Regulation will come before the Board of Governors for final approval. The Chair of the Academic and Student Affairs Committee will provide a recommendation to the Board of Governors.

Supporting Documentation Included: In Academic and Student Affairs Committee Materials

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Public Notice of Intent to Amend Board of Governors Regulation 6.021 Hazing Prohibited

PROPOSED BOARD ACTION

Consider approval of Public Notice of Intent to Amend Board of Governors Regulation 6.021 Hazing Prohibited

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Board of Governors Regulation 6.021 Hazing Prohibited has been amended to address Senate Bill 1080, which amends section 1006.63, Florida Statutes. The amendment expands the definition of hazing to include "the perpetuation or furtherance of a tradition or ritual of" any university student organization or group whether or not officially recognized by the university.

Additionally, section 6 has been added to require each university to provide an annual report to the Chancellor with the number of hazing incidents that resulted in a student or student organization being held responsible for a violation of the university's anti-hazing policy. The report will be due to the Chancellor by October 1 of each year.

If approved by the Academic and Student Affairs Committee and the full Board of Governors, the Intent to Amend will be available for public comment for thirty days. If no concerns are raised by that time, the Regulation will come before the full Board for final approval. The Chair of the Academic and Student Affairs Committee will provide a recommendation to the Board of Governors.

BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Public Notice of Intent to Amend Board of Governors Regulation 8.003 Textbook and Instructional Materials Affordability

PROPOSED BOARD ACTION

Consider approval of Public Notice of Intent to Amend Board of Governors Regulation 8.003 Textbook and Instructional Materials Affordability

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

Board of Governors Regulation 8.003 Textbook and Instructional Materials Affordability has been amended to address Senate Bill 6, which amended subsections (4) and (8) of section 1004.085, Florida Statutes.

The amendments include the following.

1. Omitting the requirement for state university boards of trustees to examine the cost of textbooks and instructional materials by course and course section for all general education courses offered at the institution each semester to identify variance in the cost of textbooks and instructional materials among different sections of the same course.

2. Omitting the requirement for state university boards of trustees to review the percentage of textbooks and instructional materials that remain in use for more than one term.

3. Omitting the requirement for institutions to report the selection process for general education courses identified with a wide cost variance in the board of trustees' annual report to the Chancellor.

If approved by the Academic and Student Affairs Committee and the full Board of Governors, the Intent to Amend will be available for public comment for thirty days. If no concerns are raised by that time, the Regulation will come before the Board of

Governors for final approval. The Chair of the Academic and Student Affairs Committee will provide a recommendation to the full Board.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Board of Governors Regulation 9.012 Requiring Disclosure of Gifts from Foreign Governments and Persons

PROPOSED BOARD ACTION

Approve Public Notice of Intent to Repeal Regulation 9.012.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

In September 2010, a new regulation was adopted to require university boards of trustees, on behalf of their direct-support organizations, to annually disclose gifts received from foreign governments or persons in excess of $100,000. Universities receiving any direct or indirect federal financial assistance are required to disclose all gifts and contracts received from foreign sources in excess of $250,000, individually or in combination from one source, to the United States Department of Education. In 2010, a bill was proposed in the Legislature that would have required universities to report all gifts received from foreign sources in excess of $100,000 to the Department of Revenue. Because any reporting obligation is more properly a function of State University System governance, a new regulation was developed to capture the information at the system level.

Since the creation of the regulation, only six universities have reported information. Given the total number of donations the universities receive during the course of a year, the number received from foreign individuals is small.

Board staff recommends the repeal of this regulation and require the universities to maintain this information and provide it upon request, if needed.

Year	**FAU**	**FIU**	**FSU**	**UCF**	**UF**	**USF**	**Total**
2018		1		3	13	1	18
2017	1		1	1	9	1	13

2015				1	6	2	9
2014			1	1	2	1	5
2013					3		3
2012			1				1
2011			2				2

No public comments were received.

Supporting Documentation Included: Repeal Regulation 9.012

For Repeal

~~**9.012 Disclosure of Gifts from Foreign Governments and Persons**~~

~~(1) Each university board of trustees on behalf of any direct support organization shall disclose the amount, terms, restrictions, and requirements made a part of any gift given to a university or direct support organization by a foreign government or foreign person that exceeds $100,000 during each fiscal year to the Board of Governors, unless otherwise prohibited by law. For purposes of this reporting requirement, if a foreign government or foreign person donates more than one gift to a university or direct support organization in a single fiscal year and the total value of those gifts exceed $100,000, all gifts received from that government or person shall be disclosed to the Board of Governors annually on September 1.~~

~~(2) The following definitions are applicable for purposes of this regulation:~~
~~(a) "Foreign government" means the government of any country, nation, or group of nations other than the government of the United States or the government of a state or political subdivision, including any agent of such government;~~
~~(b) "Foreign person" means any person who is not a citizen or national of the United States or a trust territory of the United States, and includes an agent of the person, and any legal entity created under the laws of a foreign government, including a foreign partnership, foreign trust, or foreign corporation.~~

~~(3) For each gift subject to disclosure under this regulation, the university board of trustees on behalf of any direct support organization shall provide the following information, unless otherwise prohibited by law:~~
~~(a) the amount of the gift and the date received;~~
~~(b) the name of the foreign government if the gift is made by a foreign government;~~
~~(c) the name of the foreign country in which a foreign person is principally located or resides if the gift is made by a foreign person; and~~
~~(d) any terms, restrictions, and requirements made a part of any gift received by a foreign government or person, including any conditions or restrictions regarding the control of curricula, faculty, student admissions or student fees or contingencies placed upon the university or the direct support organization to take a specific public position or to award an honorary degree.~~

~~Authority: Section (7)(c), Art. IX, Fla. Const., History: New 09-16-10.~~

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Performance-Based Funding Study

PROPOSED BOARD ACTION

Approve the Performance-Based Funding Study due to the Legislature by October 1, 2019.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Chapter No. 2018-4, Laws of Florida

BACKGROUND INFORMATION

The 2018 Legislature approved a law requiring the Board of Governors to submit recommendations to achieve a complete performance-based continuous improvement model.

> By October 1, 2019, the Board of Governors, in consultation with the state universities, shall submit to the Legislature recommendations for future consideration on the most efficient process to achieve a complete performance-based continuous improvement model focused on outcomes that provide for the equitable distribution of performance funds. In addition to recommendations submitted by the Board of Governors, the Legislature shall review recommendations from an independent entity that consults with the Board of Governors for the purpose of receiving input on behalf of the state university system. Implementation of any recommendations shall not occur unless affirmatively enacted by the Legislature.

The State University System (SUS) is currently in year six of the Performance-Based Funding Model. The current model includes ten (10) metrics that evaluate institutions on a range of issues that were chosen after the review of over 40 metrics identified in University Work Plans. To ensure each university is striving to excel and improve on key metrics, there is a financial incentive in the model. That financial incentive is not only new state funding (State Investment Funding), but an amount of the base state funding (Institutional Investment Funding) reallocated.

Year Six of the Performance-Based Funding Model shows significant improvements in metric scores as well as overall scores of the institutions. The average score is 84 points, which is an increase of 14 points in the last four years. Nearly every institution is showing strong improvements in four-year graduation rates; the SUS average is now 52.6%, exceeding the strategic plan goal of 50%. Many of the SUS strategic plan goals have been met or are within a few percentage points of being met. The universities have also made continuous improvements in metrics resulting in reductions in the costs to the university students. The Performance-Based Funding Model has proven to be an effective way to significantly improve goals identified in the Board's State University System 2025 Strategic Plan.

With the implementation of a new allocation methodology in 2019, the Performance-Based Funding Model emphasizes continuous improvement focused on metric outcomes and provides an equitable distribution of the funding. With 25% of the State University System's base budget at risk in the model, the universities have a great incentive to invest in improving their Performance-Based Funding outcomes.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Board of Governors Regulation 5.001 Performance-Based Funding

PROPOSED BOARD ACTION

Approve the Public Notice of Intent to Amend Regulation 5.001.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

Senate Bill 190 was signed by the Governor on June 18, 2019.

Included in the bill is the requirement that each university conduct an annual audit to verify that the data submitted to the Board complies with the data definitions. This requirement has been added to the regulation along with the requirement that the audit and certification be submitted to the Board's Inspector General by March 1 of each year.

August 29, 2019

SUBJECT: Board of Governors Regulation 7.003 Fees, Fines, and Penalties

PROPOSED BOARD ACTION

Approve the Public Notice of Intent to Amend Regulation 7.003.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

Senate Bill 190 was signed by the Governor on June 18, 2019. Included in the bill are changes to the excess hour threshold.

Effective with the 2019 summer term and thereafter, an excess hour surcharge equal to 100 percent of the tuition rate will be charged for each credit hour in excess of 120 percent degree program hours. If a student changes their degree program, the excess hour threshold will only be adjusted if the number of credit hours required to complete the new degree program exceeds that of the original degree program.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Board of Governors Regulation 7.008 Waiver and Exemptions of Tuition and Fees

PROPOSED BOARD ACTION

Approve the Public Notice of Intent to Amend Regulation 7.008.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

Senate Bill 7098 was signed by the Governor on May 10, 2019.

Included in the bill is the requirement that boards of trustees must waive tuition and associated fees for children and spouses of deceased emergency medical technicians, paramedics, and active duty members of the United States Armed Forces. The amount waived by the university shall be an amount equal to the cost of tuition and associated fees for a total of 120 credit hours.

The child or spouse may attend on either a full-time or part-time basis. The benefits provided to a child under this section must continue until the child's 25th birthday. The benefits provided to a spouse under this subsection must commence within five years after the death occurs and may continue until the 10th anniversary of that death.

Upon failure of any child or spouse benefited by the provisions of this subsection to comply with the ordinary and minimum requirements of the institution attended, both as to discipline and scholarship, the benefits shall be withdrawn as to the child or spouse and no further moneys may be expended for the child's or spouse's benefits so long as such failure or delinquency continues.

Only a student in good standing in his or her respective university may receive the

benefits.

A child or spouse receiving benefits under this subsection must be enrolled according to the customary rules and requirements of the university attended.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: Board of Governors Regulation 9.007 State University Operating Budgets

PROPOSED BOARD ACTION

Approve the Public Notice of Intent to Amend Regulation 9.007.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Board of Governors Regulation Development Procedure

BACKGROUND INFORMATION

This regulation is being amended to include requirements in Senate Bill 190 that was approved by the Governor on June 18, 2019 and to provide clarification and guidance on other operating budget issues. The following changes include:

- Requires Board of Trustees and Board of Governors to approve the use of carryforward spending plans.
- Clarifies that Education & General (E&G) funds can be used for furniture, fixtures, and equipment.
- Clarifies that E&G funds can be used to maintain, repair, remodel, and renovate existing E&G facilities and space.
- Clarifies the use of interest and investment earnings.
- Defines non-recurring expenditures.
- Requires amendments to the carryforward spending plans be reported to the Board of Governors.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: 2019-2020 State University System Operating Budget

PROPOSED BOARD ACTION

Approve the 2019-2020 State University System Operating Budget.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Regulation 9.007

BACKGROUND INFORMATION

Each state university is required to submit a detailed operating plan for each budget entity for the 2019-2020 fiscal year. The State University System (SUS) operating budget consists of five different budget entities: 1) Education and General, 2) Contracts and Grants, 3) Auxiliary Enterprises, 4) Local Funds, and 5) Faculty Practice Plans.

1. The Education and General (E&G) budget entity includes the allocation of funds appropriated by the 2019 Legislature, student tuition, and other previously appropriated funds. The E&G budget entity contains resources that provide educational opportunities to citizens through instructional programs; research directed toward solving technical, social, and economic problems facing the state and nation; and public service programs. Universities have flexibility in the development of the E&G operating budget but must report in the traditional SUS categories.

2. The Contracts and Grants budget entity supports research and public service through awards from federal, state, and local sources.

3. Auxiliary Enterprises budget entity is comprised of ancillary support units such as student housing, food service, bookstores, parking services, and computer support.

4. The Local Funds budget entity consists of operating resources for student activities, athletics, concessions, student financial aid, technology fee, Board-approved local fees, and self-insurance programs.

5. Finally, the Faculty Practice Plans budget entity provides for clinical activities associated with the University of Florida and University of South Florida Health Centers, and the Florida State University, University of Central Florida, and Florida International University Medical Schools.

Each university Board of Trustees has approved an operating budget. The universities have developed their budgets in accordance with Board Regulation 9.007 State University System Operating Budgets. The regulation requires each university to maintain an unencumbered balance in the E&G fund equal to or greater than seven percent of the university Board of Trustees approved operating budget.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: 2019-2020 Board General Office Budget

PROPOSED BOARD ACTION

Approve the 2019-2020 Board General Office Budget and authorize the Chancellor to make changes as necessary to support office functions.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; 2018 General Appropriations Act

BACKGROUND INFORMATION

The Board General Office Budget for 2019-2020 totals $11.4 million and supports 65 authorized positions. The 2019 General Appropriations Act allocates funds by specific category and funding source as follows:

Appropriation Category	Appropriation
Salaries & Benefits - GR	$6,078,233
Salaries & Benefits – Trust Funds	$794,554
Other Personal Services – GR	$51,310
Other Personal Services – Trust Funds	$20,785
Expenses - GR	$736,982
Expenses – Trust Funds	$156,799
Operating Capital Outlay - GR	$11,782
Operating Capital Outlay – Trust Funds	$5,950
Contracted Services – GR*	$784,103
Contracted Services – Trust Funds	$73,000
Risk Management Insurance - GR	$11,960
DMS – HR Services - GR	$17,110

DMS – HR Services – Trust Funds	$4,249
Data Processing Services - GR	$269,527
Special Projects - GR	$2,350,000

*$2,350,000 in pass-through funds were included in the Board General Office Budget for a Take Stock in Children program and UF Medical Marijuana Clinical Research program.

Each funding source and category has specific restrictions on spending funds from that appropriation. Appropriations are allowed to be transferred between categories via budget transfers filed with the Governor's Office. These transfers cannot exceed five percent or $250,000 whichever is greater. Any transfers in excess of this amount must be approved by the Legislature and Governor through an established budget amendment process.

Appropriation Funding Source:

- General Revenue – appropriations from this source have the least restrictions and can be used for any basic operating expense.
- Trust Funds – appropriations from this source are primarily used to support Board Facility Office staff and expenses.

Appropriation Category:

- Salaries & Benefits – salaries and benefits associated with 63 authorized positions.
- Other Personal Services – these funds are utilized for temporary employment. The Board utilizes university students to supplement basic phone coverage and other office needs.
- Expenses – these funds are utilized for basic operating expenses such as travel, rent, office supplies, or equipment costing less than $1,000.
- Operating Capital Outlay – these funds are utilized for items costing more than $1,000, such as computers or furniture.
- Contracted Services – these funds are utilized for any service requiring a contractual agreement.
- Risk Management Insurance – these funds are transferred to the Department of Management Services to cover the costs associated with the State's risk management pool.
- DMS – HR Services – these funds are transferred to the Department of Management Services to cover the costs associated with the State's PeopleFirst System.

- Data Processing Services – these funds are transferred to the Northwest

Regional Data Center to pay for data storage services.

- Special Projects – legislative initiatives included in the General Appropriations Act.

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: 2020-2021 State University System Legislative Budget Request

PROPOSED BOARD ACTION

Approve the 2020-2021 operating Legislative Budget Request for the State University System and allow the Chancellor to make technical changes as necessary.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Section 216.023, Florida Statutes

BACKGROUND INFORMATION

Annually, the Board of Governors must prepare and submit a State University System Legislative Budget Request (LBR) for state appropriated operating funds to the Legislature and Governor by October 15. However, with session starting in January the LBR is due September 16. In accordance with subsection 216.023(1), Florida Statutes, this LBR is based on an independent judgment of needs and, pursuant to the LBR instructions, will be presented to the Legislature and Governor by the statutory due date.

The Board approved the 2020-2021 LBR Guidelines at the March 2019 meeting. Technical instructions were provided to the universities and they responded with system and individual university budget needs.

The LBR to be considered will focus on performance-based funding, preeminence, university center of excellence, and base operating initiatives. The LBR totals $5.3 billion and represents a 3.7 percent increase, excluding requests for the FAMU-FSU College of Engineering, Moffitt Cancer Center and the Institute of Human and Machine Cognition. The LBR consists of three major components:

a. Performance-Based Funding of $75 million in additional state investment and $45 million in institutional investments. This would bring the total to $680 million; $340 million in the state's investment and $340 million in the institution's investment. These funds will be allocated based on the Board's performance-based funding model. Resources will be utilized to

continue the improvements made in student success; retention rates, graduation rates, affordability, degrees and jobs.

b. Preeminence funding of $35 million is requested to continue strides made in improving the academic and research footprint of preeminent universities nationally.
c. University Center of Excellence funding of $40 million is requested for non-preeminent universities to enhance a current program's national excellence.
d. Base Operating Initiatives - $36.5 million. This includes funding for operational funding new and existing facilities, State Fire Marshal inspections, and University of Florida – Institute of Food and Agricultural Sciences (UF-IFAS) workload.

Each university has provided information on the following areas:

1. Performance-Based Funding – Each university has provided an overview of the initiatives they are undertaking based on the performance-based funds received this year.
2. Efficiencies - Each university has provided a summary of various efficiency initiatives that have taken place or are underway. These efficiencies are expected to save resources, increase efficiencies, and/or save staff time.
3. Ten Percent Reductions - The detailed budget instructions provided by the Legislature and Governor's Office requested each agency, including universities, to provide information on the impact of a ten percent budget reduction (which is a standard, annual request made by the Legislature and Governor).

STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
August 29, 2019

SUBJECT: 2020-2021 Board General Office Legislative Budget Request

PROPOSED BOARD ACTION

Approve the 2020-2021 Board General Office Budget Request and allow the Chancellor to make technical changes as necessary.

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution; Section 216.023, Florida Statutes

BACKGROUND INFORMATION

Annually, the Board of Governors must prepare and submit a State University System Legislative Budget Request (LBR) for state appropriated operating funds to the Legislature and Governor by October 15. However, with session starting in January, the LBR is due September 15. In accordance with subsection 216.023(1), Florida Statutes, this LBR is based on an independent judgment of needs and, pursuant to the LBR instructions, will be presented to the Legislature and Governor by the statutory due date.

The Chancellor recommends approval of a Board General Office LBR of $9 million and requests authority to make technical changes as necessary. The Legislature and Governor approved the Board's 2019-2020 increase for Instructional Technology (IT) services of $543,000; therefore, the Board is not requesting any additional increase for 2020-21.

Pursuant to the LBR instructions, each agency must prepare a ten percent reduction plan. The Board General Office plan is included for information purposes.
