Date

***Report Fall and Spring data separately to allow for Fall to Fall semester comparison and Spring to Spring semester comparison.**

Definitions:

- *Wide cost variance is defined as a cost per course section of \$200 or more over the median average cost of textbooks and instructional materials for the same course.*
- *High enrollment is defined as the top 10% of courses ordered by headcount enrollment.*

1) Required and Recommended Textbooks and Instructional Materials for General Education Courses

a) Report on the course sections identified as wide cost variance and include the number of course sections within a course (*n*). An explanation may be provided for sections with wide cost variance (e.g. honors course, economics text for two courses).

Methodology: Identify the median average cost for textbooks and instructional materials for all course sections of a course. Exclude sections with Open Educational Resources (OER) or no required materials from wide cost variance analysis. Course sections with a cost of \$200 or more over the median cost are considered wide cost variance.

- Required (Req) Textbooks and Instructional Materials
- Recommended (Rec) Textbooks and Instructional Materials

Fall 2016

Prefix and Course Number	Course Title	Section	Total Number of Sections within Course	Req or Rec	Average Cost	Dollar Variance
ECO 2013	Principles of Macroeconomics	U3M, U4M, U5M	6	Req	\$389.00 (retail)	\$225.45
ECO 2023	Principles of Microeconomics	U3M	5	Req	\$389.00 (retail)	\$213.85
GEA 2000	World Regional Geography	U01	4	Rec	\$369.90 (retail)	\$206.55

Explanation:

From consultations with the department chairs and instructors, we can report that:

For ECO 2013 and ECO 2023, the instructor of these sections requires the same textbook for both courses, Principles of Macroeconomics and Principles of Microeconomics, which is clearly stated on the courses' syllabi. The majority of students take both courses, in which case the actual maximum cost to a student is \$194.50 per course and thus there is in fact no wide cost variance.

For GEA 2000, the full retail price of \$369.90 reported for this course includes the required textbook priced between \$82.20-\$182.65 plus the recommended textbook priced between \$74.90-\$187.25 through the Barnes & Noble FIU book stores. While both required and recommended course materials must be considered for the variance analysis according to HB 7019, the wide cost variance for this course only computes due to the additionally recommended textbook that other instructors for this same course do not suggest as a valuable learning resource to their students. Thus, the wide cost variance may not apply for this course depending on the students' personal preference of acquiring the recommended text or not.

Spring 2017

Prefix and Course Number	Course Title	Section	Total Number of Sections within Course	Req or Rec	Average Cost	Dollar Variance
ECO 2013	Principles of Macroeconomics	U3M, U4M	8	Req	\$428.00 (retail)	\$299.45
ECO 2023	Principles of Microeconomics	U3M, U4M	10	Req	\$428.00 (retail)	\$253.35

Explanation:

For ECO 2013 and ECO 2023, the instructor continues to use the same textbook required for both, Principles of Macroeconomics and Principles of Microeconomics. He also allows the use of older editions, which are often cheaper. This is clearly stated on the courses' syllabi. The majority of students take both courses, in which case the actual maximum textbook cost to a student is \$214.00 per course and thus there is in fact no wide cost variance.

- b) Describe the textbook and instructional materials selection process for general education courses with a wide cost variance among different sections of the same course.

Individual instructors for courses ECO 2013 and ECO 2023 select course materials from what is considered standard textbooks on the subject. The instructor whose textbook is generally more expensive than the textbooks chosen by other faculty of the same courses finds that the same textbook optimally covers the material for both courses.

Individual instructors for course GEA 2000 select course materials based on what they deem pedagogically best for their syllabi. The instructor of section U01 recommended an additional textbook which is optional to students.

- c) Report the course title(s) and number of section(s) that do not require or recommend the purchase of a textbook(s) and/or instructional material(s).

<i>Fall 2016</i>		<i>Spring 2017</i>	
Course Titles not Requiring or Recommending Purchase of Texts/Instructional Materials	Number of Sections	Course Titles not Requiring or Recommending Purchase of Texts/Instructional Materials	Number of Sections
Number of courses 846	1,745	Number of courses 756	1,488

As reported by course instructors in FacultyEnlight. Please refer to Appendix A for a detailed list with all course titles. Appendix A is available [online](#).¹

- d) What measures, if any, are being taken by the university to reduce wide cost variance among different sections of the same general education course?

¹

https://academic.fiu.edu/docs/BOG%20Textbook%20and%20Instructional%20Materials%20Report_8.21.17_pending%20BOT%20approval.pdf

Department chairs have received the wide cost variance analysis for general education courses for which they have oversight. Chairs have consulted with faculty to identify best practices for the selection of course materials and the reduction of the cost variance where possible.

e) Describe the textbook and instructional materials selection process for general education high enrollment courses.

Methodology: Order courses (course prefix/number) by headcount enrollment, excluding honors courses. The top 10% of courses are determined as high enrollment. Provide the number of courses (n) reported on.

The selection process for textbook and instructional materials for high enrollment courses (n=202) is completed either by the individual instructor (133 courses) or collectively by all instructors teaching the course (69 courses). Faculty are very conscientious when selecting the materials for their courses, always ensuring that the educational quality of the course materials serves the students' needs for optimal learning outcomes while looking for the most affordable options.

Selection Process	Total number of courses	UCC/Non-UCC	Total instances of enrollment
Individual instructor text selection	133 (66%)	28/105	44,235
Collective instructors text selection	69 (34%)	26/43	31,060
Totals	202	54/148	75,295

As an example, the Director of Statistics and Certificate Program in Actuarial Studies, Dr. Hassan Zahedi, describes the process for collectively selected course materials for a multi-section high enrollment statistics course as follows:

“For selecting a new textbook or changing an existing text to a new textbook the designated course coordinator, in consultation with the Director of the Statistics Program, collects a list of potentially suitable text books on the market for the course. The course coordinator then requests review copies of those potential textbooks from the respective publishers for circulation amongst all faculty who will be teaching at least one section of those course for their review and input. The criteria used by faculty to rank the assessed textbooks include:

- Affordability of the textbook for students
- Reputability of the author(s) and the publisher
- Clarity of the content
- Clarity and comprehensiveness of the homework problems
- Clarity of the examples in the textbook which are based on the real data sets
- Integration and use of modern statistical packages within the text book

- Supplementary materials for the book (such as power point presentation, interactive tutorial programs, students' learning resources and their affordability, instructor resources and web-based auxiliary instructional tools)
- Flexibility of obtaining the textbook in an alternative format (hard copy, paperback, electronic)

Based on the inputs from all the involved faculty, the coordinator will rank the competing textbooks and recommend the top ranked textbook for adoption.”

2) Specific Initiatives of the University Designed to Reduce the Costs of Textbooks and Instructional Materials for General Education Courses

- a) Describe specific initiatives of the institution designed to reduce the costs of textbooks and instructional materials.

New, Used, Rental and Digital Options

Barnes & Noble FIU book stores continue to offer cost savings such as new, used, rental and digital textbooks with new titles continuously added. Students have the opportunity to save as much as 80% by purchasing textbooks in the various formats offered.

Barnes & Noble @ FIU Price Match Program

Initiated by the FIU Office of Business Services, in Spring 2016 Barnes & Noble launched the price matching program. Barnes & Noble is matching the prices for textbooks advertised or offered by a local competitor, BN.com, or Amazon. The program does not include price matching items from textbook marketplaces such as Amazon Prime (membership deals) or Amazon Warehouse Deals and does not include offerings from peer to peer marketplaces, aggregator sites, digital books, publisher direct pricing or bulk purchases/course fee pricing.

Financial Aid Book Advances

Students unable to afford required and recommended course materials may apply for a book advance through the Office of Financial Aid, which continually monitors student financial need including cost of textbooks. In Fall 2016, 4,726 students took advantage of the book advance program amounting to \$2,543,364 in aid. In Spring 2017, there were 3,836 students who received \$1,977,756 in book advances. This aid ensures that students can purchase their course materials prior to the start of the semester and are prepared for class on the first day.

Course Reserves

The Course Reserves program provides on a semester-by-semester basis to a limited number of required and recommended across instructional materials assigned to students enrolled in a course. Materials may be in print, electronic, and multimedia formats in compliance with the Copyright Law of the United States. Whenever possible

materials will be scanned as electronic documents and made available to students 24/7. This allows students to use either library materials, or professor provided materials, free of charge. In most cases, these texts and works may not be taken outside of the library which allows for more students to have access to required and recommended course materials.

The Library Circulation Desk reports that there are a total of 6,103 Course Reserves books, articles and files (Green Library: 4,043; Hubert Library: 1,817; Engineering Center: 243). During academic year 2016-17, a total of 5,669 course reserve loans (Green Library: 3,092; Hubert Library: 2,491; Engineering Center: 86) to students were recorded.

Affordability Counts Initiative

Launched in June 2016, *Affordability Counts* is FIU Online's initiative to lower the cost of course materials to \$60 or less for 3 credit courses. Faculty are introduced to new Open Educational Resources or low-cost course materials and are encouraged to adopt such materials. Over 100 faculty are participating in this program with over 150 courses designated as "affordable courses". Students can select the courses with the affordable designation as they register. Under the leadership of Interim Assistant Vice President Joseph Riquelme, who serves on the Florida Virtual Campus Council (FLVC) on Distance Learning and Student Services, this initiative is being piloted by FIU and will be shared with FLVC members state-wide.

OpenStax Institutional Partner Program

FIU is one of the 11 universities and colleges across the nation selected to be part of the 2017-18 *OpenStax Institutional Partnership Program*. OpenStax is a nonprofit organization based at Rice University with a mission to improve student access to education through open access textbooks and educational resources. As an institutional partner, FIU will receive consulting services to assess and improve our open educational resources efforts, technical support for adoption of OpenStax content, webinars, and more. FIU's application to the program was authored by FIU Online, in consultation with the FIU Textbook Affordability Committee and the FIU Libraries. The previous year's OpenStax's partner schools are expected to save students \$8.2 million dollars.

Textbook Affordability Communications Initiative

In addition to the institution's efforts to find innovative ways to reduce textbook and instructional materials costs for students, multiple messages are dispatched to the student body to create awareness of affordability options. These include reminders to look for low-cost options, shop around early for the best price, or to take advantage of the Price Match program at the Barnes & Noble FIU book stores. Such messages are distributed via e-mail, social media and electronic message boards.

b) With implementation of the initiatives, has there been any reduction in cost of textbooks and instructional materials to the students? If there has been a reduction in cost, what is the average cost savings? Describe the average cost savings comparing fall semester to fall semester and spring semester to spring semester.

Barnes & Noble FIU Book Stores Discount Options

For Fall 2016 and Spring 2017 the Barnes & Noble FIU book stores offered 79.7% and 75.1% respectively of all textbooks as rental option with discounts of up to 80%. The utilization rates for Fall and Spring for rental was 49.3% and 53.8% respectively of all book transactions. The digital availability was at 37.5% and 37.1% respectively, with discounts of up to 60% and utilization rates of 11.7% and 12.9%. Used textbook purchases represented 13.6% and 12.7% and used textbook rentals represented 16.9% and 16% of all textbook transactions.

By taking advantage of used, new rental, used rental, or digital discount options, students saved \$1,738,954 (18.7%) in Fall 2016 and \$1,626,745 (18.6%) in Spring 2017.

Barnes & Noble FIU Book Stores Price Match

The Barnes & Noble FIU book stores continue to offer the Price Match program which has garnered great results. For the past year, savings of \$20,747 in Fall 2016 and \$17,846 in Spring 2017 were passed on to students, bringing the program total to \$59,856 matched since inception in Spring 2016.

c) With implementation of the initiatives, describe any reduction in cost variance among different sections of the same general education course. Describe the reduction in cost variance comparing fall semester to fall semester and spring semester to spring semester.

Since the legislative reporting requirement for textbook cost variances began with the Fall 2016 semester, comparisons between fall to fall and spring to spring semesters will be provided as of the 2018 report.

3) University Policies for the Posting of Textbooks and Instructional Materials

a) Describe policies implemented to ensure the posting of textbook and instructional materials for at least 95% of all courses and course sections 45 days before the first day of class. For course sections that require or recommend textbooks and/or instructional materials based on student individual needs (e.g. audition/performance, directed independent study, research topic) that may miss the posting date, please reference these as exceptions in 3(d).

FIU's Regulation 1103 on Textbook Affordability requires all instructors to post required and recommended textbooks and course materials 45 days in advance of semester start. The Office of the Provost has established a communication timeline to remind course instructors, chairs and deans each semester of the respective adoption deadline. The first notification is sent out 75 days prior to the start of the next semester. Repeat reminders follow 60 and 55 days out. As of 50 days prior to the start of the next semester, the respective department chairs are required to submit any pending adoptions on behalf of their faculty.

Faculty utilize Barnes & Noble's [FacultyEnlight](#) platform for textbook and course materials adoptions, which feeds this information into FIU's course registration system for all courses and course sections. In addition, the Office of Business Services maintains a searchable website for [FIU Course Materials](#) on which students can find required or recommended course materials by campus, term, department, course and section. The website also details pricing options for all items (i.e. rent new, rent used, buy new, buy used, rent digital, buy digital) acquired through Barnes & Noble FIU book stores.

b) Are the policies effective in meeting the reporting requirement? If not, what measures will be taken by the university to increase faculty and staff compliance for meeting the reporting requirement?

The policies sufficiently guide the institutional policies and common practices for textbook and course materials adoptions and selections processes.

c) Report the number of course sections and the total percentage of course sections that were able to meet the textbook and instructional materials posting deadline for the academic year. Note: A course section is in compliance if all textbooks and instructional materials in the course section have been entered by the deadline.

A total of 5,631 (79.3%) course sections met the posting deadline of July 8 for the Fall 2016 semester. In Spring 2017 a total of 7,409 (95.3%) course sections met the posting deadline of November 23.

d) Report the number of course sections and the total percentage of course sections that were not able to meet the textbook and instructional materials posting deadline for the academic year. Provide an explanation as to why the course sections were not able to meet the posting deadline. Note: A course section is not considered in compliance if all textbooks and instructional materials in the course section were not entered by the deadline.

A total of 1,468 (20.7%) course sections did not meet the posting deadline of July 8 for the Fall 2016 semester. In Spring 2017 a total of 367 (4.7%) course sections did not meet the posting deadline of November 23.

With the new legislative requirements taking effect July 1, 2016, the Textbook Affordability Task Force revised institutional practices for textbook submissions (see details under 3a) for the 2016-2017 academic year immediately after the law was enacted. While these measures did not affect the Fall 2016 adoption cycle, their effectiveness, however, is indicated by significantly increased timely adoption rates and full compliance in Spring (and also Summer) 2017.

An adoption is generally not made by the posting deadline because a course instructor has not been assigned at that time. This may be due to circumstances such as unforeseen changes among instructional faculty, or the likelihood that sections may be merged should there be less student demand than expected.

e) Report the number of courses that received an exception to the reporting deadline. Provide a description of the exception(s).

FIU decided not to institute the practice of submitting exception requests because our implemented policies and practices aim at full compliance with the adoption deadline so that exceptions are not needed. The preliminary trend analysis since the legislative requirement took effect in July 2016 indicates that this is an achievable goal.
