# The E-Learning Train Has Left the Station...

---

- Growth in all sectors
- Increasing demand by students, both on and off-campus
  - Convenience
  - Fits different learning styles
- New generation of tech-savvy students who
  - Are at ease with technology use
  - Have learned using technology
  - Are active and not passive learners
  - Are in a hurry...

# The Challenge in the U.S.

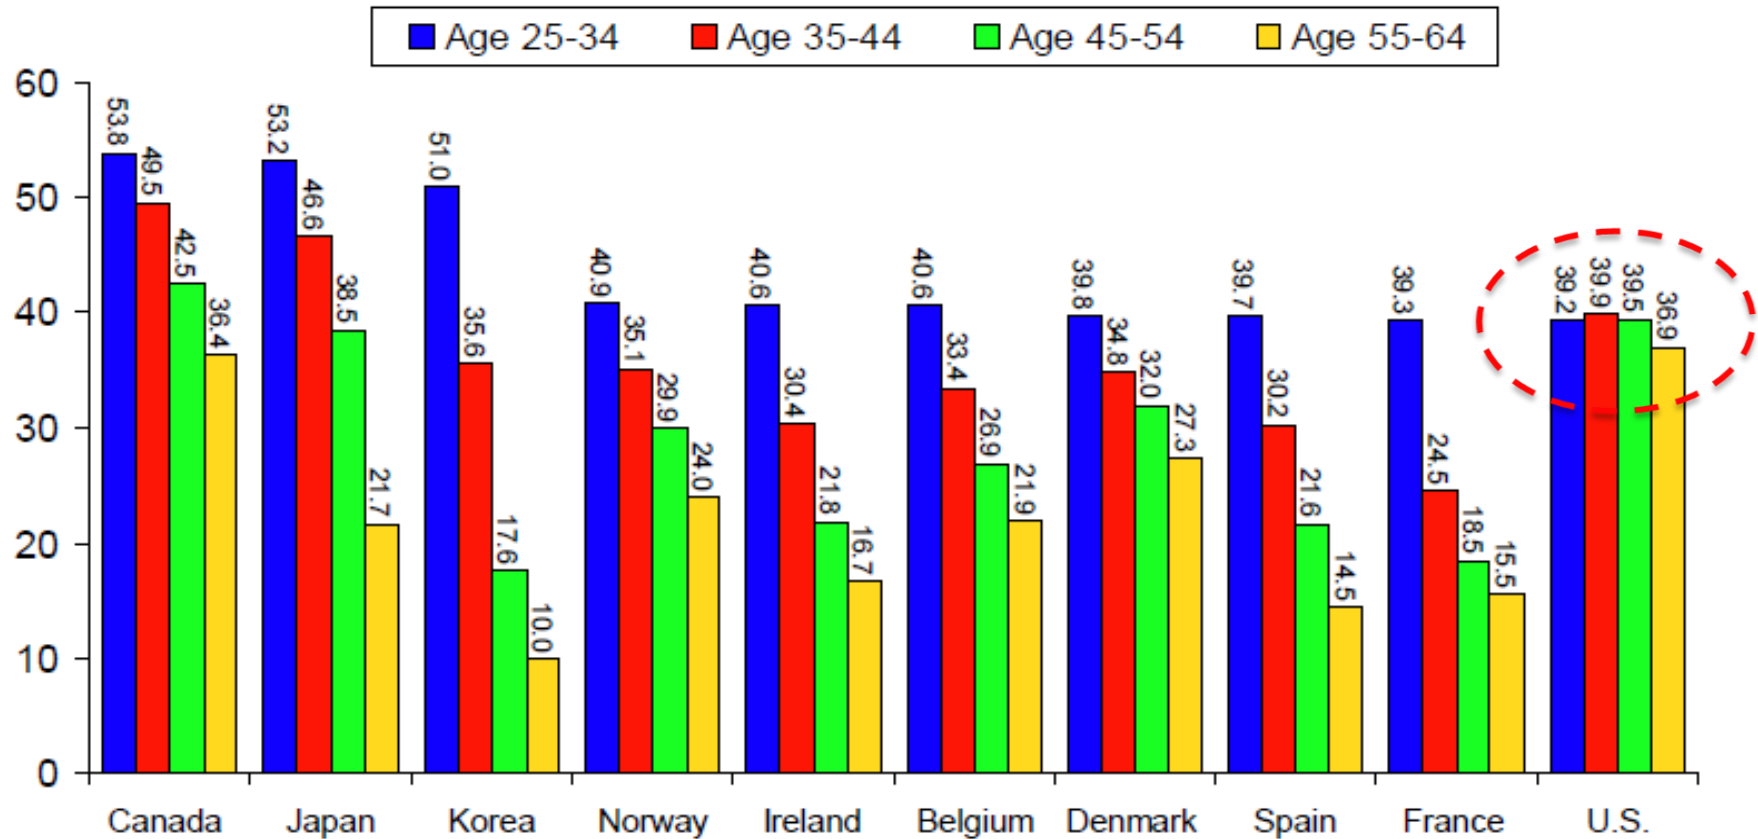

---

SREB

- Over the last generation we've moved from 1st in educational attainment to 12th
- Overall education attainment is projected to decrease -- led to calls for degree "push" by
  - President
  - Major Foundations
- Billions of dollars (federal/state) are spent on activity that never leads to a credential
- Worse: millions of students are trying, but experiencing significant failures that put their futures (and ours) at risk

# The Challenge in Florida

---

SREB

- Projected changes in elementary and secondary enrollments (22% increase by 2017)
- Current and projected Florida high school graduates college enrollment rates are increasing
- Continuing enrollment increases in Florida's public four year institutions
- Expected increases in demand (see first bullet)
- Large number of working-aged adults without a degree (and new efforts to serve them)

**A Perfect Storm...**

# E-Learning to the Rescue? (It's Already Happening in Florida!)

---

## FL Undergraduate credits by Four Year Institutions

- Student credit hours increased by 150,100
- Traditional on-campus increased by 26,600
- Traditional off-campus decreased by 27,300
- **Florida's entire FTE increase over the past year came from E-Learning**
  - 104,300 Web-based
  - 22,300 site-to-site
  - 24,300 other

# Why E-Learning?

---

- More flexible programs that meet student needs
  - Time, Location, Length, Delivery Formats
- Increasing number of faculty who utilize technology to create better learning environments
- High quality services that have been moved online (and available for all students)
- Preparation for the world of work
- Provides opportunities for true life-long learning
- Reach new markets of students (and former students)
- Can expand the reach of institutions, even to campus-based students

# National/State Policy Issues

## Degree Attainment Challenge

---

- Given new national goals, U.S. competitiveness and degree “gap”...
- Given the percentage increases each state needs for national goals...
- Given the time it will take to reach these percentage increases with traditional-aged students...and
- Given the changing demographics...
- New **opportunities**, and increasing **pressures**, on online learning

SREB

Southern  
Regional  
Education  
Board

# Emerging Policy Issues

## Accountability

---

- Greater pressure to produce graduates (or completers)
  - Our rates of completion are difficult to defend
  - 40 million working age adults with some college and no degree (adding nearly one million a year to that total)
  - Funding changes that focus on rewarding completion
  - Challenges for the for-profit sector likely to be applied to the non-profit sector
  - Online programming can reach and serve many

SREB

Southern  
Regional  
Education  
Board

# Emerging Policy Issues

## Tuition/Pricing

---

- Every indication that tuition and fees will continue to rise
- Seeing some interesting tuition strategies in online learning
  - Increasing rates and fees for Technology and “Convenience” fees for online learners
    - Revenue replacement for fees paid by on-campus students
  - “Market pricing”
    - Movement away from in-state/out-of-state tuition policy in the public sector?

# Emerging Policy Issues Quality

---

- Questions linger about the quality of e-learning experiences, yet...
- We have more data on online learning than on traditional classroom activities
  - When students engage
  - How often they engage
  - What they are actually doing
- Re-focusing attention on
  - Outcomes
  - Time-to-degree
  - Address the “seat-in-a-seat” model

# Emerging Policy Issues

## Policy “Potpourri”

---

- Outsourcing
- Requirements for traditional students to complete some portion of their program online
- New competitors in the marketplace
  - For-profits
  - International institutions
- Emergence (re-emergence) of state regulatory efforts for online programming across state lines
- Prior Learning Assessment
  - Outcomes-based degrees?

SREB

Regional  
Education  
Board

# An SREB Focus on Degrees

---

SREB

- Full Court Press on Degree Completion as Outlined in “No Time to Waste”
- Focus
  - Better job of preparation for college
  - Once in college, get students to a credential
  - If they drop out, get them back in at some point
- Growing awareness of our poor degree completion results by state legislatures suggests new accountability on success (and not just access) tied to funding

# New Federal Regulations

## SREB's Stance and Actions

---

- Since inception of *Electronic Campus*, we have operated in a “free trade zone”
  - Home state “sign-off” of programs recognized by other SREB states
- Consortial or reciprocity agreements allowable under the new regs
  - Seeking clarification from feds as to our continuing use to meet new regs
- Broader campaign to repeal, amend or delay implementation
- Stay tuned...
